NEW SERIES OF COLONIAL REPORTS.—ANNUAL.

1	British Honduras - - - - - -	1889

No. 2.

MAURITIUS.

MAURITIUS.

(In continuation of Colonial Report No. 88, Old Series.)

Sir C. C. LEES to LORD KNUTSFORD.

Government House, Mauritius,
December 9, 1890.

MY LORD,

I HAVE the honour to transmit to your Lordship the accompanying copy of a report upon the Blue Book for 1889 by the Colonial Secretary.

I have, &c.
(Signed) C. C. LEES,
Governor.

The Right Hon.
Lord Knutsford, G.C.M.G.
&c. &c. &c.

COLONIAL SECRETARY TO GOVERNOR.

Port Louis,
December 2, 1890.

SIR,

I BEG to forward to you for transmission to the Secretary of State a short report on the Blue Book for 1889.

Revenue.

2. The revenue, which was estimated at Rs. 7,280 803, realised Rs. 8,744,864 or Rs. 1,464,061 more than had been anticipated, and Rs. 170,806 more than in 1888.

3. This increase is mainly due to the transport of sugar by rail, the receipts of the railway showing a surplus of Rs. 267,444 over those of 1888, and indicating a remunerative cane crop, the export having been 11,716,916 kilos. more than in the preceding year.

Expenditure.

4. The expenditure of 1889 was heavy. It was only Rs. 13,984 below the total receipts, and was as much as Rs. 788,695 in excess of the expenditure of 1888.

MAURITIUS.

5. During the five years which end with the year 1889, large sums have figured in the expenditure of the Colony which do not properly come under its ordinary expenditure, such as moneys spent on re-afforestation, defence works, the Mare aux Vacoas, and sundry purchases of public utility.

6. If these, amounting for five years to a total of Rs. 1,197,390, be deducted from the total deficits in the five years amounting to Rs. 2,381,630 you will notice that the expenditure has yearly exceeded the revenue by Rs. 236,848.

7. It will be necessary to remedy this state of things, but taking the last figure to be the average expenditure for five years inclusive of 1889, the balance of revenue in 1889 being even so small as Rs. 13,984, shows how much this Island is dependent on its main resource, namely, the sugar cane.

8. A good crop and fair prices at once go to swell the revenue in such items as transport and export dues, while the budget of the following year can depend on larger imports.

9. Thus the year 1888 was not so good a cane year as 1889, and the decrease in shipping in 1889 was 29 inwards and 8 outwards, while a general increase of 5 per cent. on customs duties whether fixed or ad valorem, with the exception of rice, flour, and salt fish, only gave an increase of about Rs. 270,000 over the year 1888.

Imports.

10. The imports for the last three years, exclusive of specie and bullion, have been valued as follows:—

	Rs.
1887 - - - -	23,434,100
1888 - - - -	15,341,202
1889 - - - -	15,612,056

Exports.

While the exports for the corresponding years have been valued at:—

	Rs.
1887 - - - -	25,998,086
1888 - - - -	32,201,978
1889 - - - -	32,806,815

11. The decrease in shipping which will be noticeable in the following table, is attributable mainly to the fact that the smaller vessels are giving way to the steamers of larger tonnage, and that sailing vessels are decreasing in number.

Shipping.

12. Thus in 1889 the increase in tonnage over 1888 has been 22,362, and the decrease in the number of ships 37.

—	Inwards.	Outwards.	Ships, both In and Out.
	Tons.	Tons.	Ships.
1888 - - -	314,432	307,912	914
1889 - - -	336,794	329,245	877

Population.

13. The estimated population for 1889 was on the 31st of December 372,664, being an increase of 3,362 over that of 1888 at the same date, of which the Indians number 254,465 against 118,199 of the general population.

Birth and Death Rate.

14. The births throughout the Colony exceeded the deaths by 1,134, which is 793 less than in 1888, while the number of deaths exceeded those of 1888 by 1,374; but if the death-rate exceeded that of 1888 by 3·4, the birth rate exceeded that of 1888 by 1·3.

15. The continued high death-rate of the Colony is now particularly arresting attention, and, it is hoped, will in a short time show an amelioration by the practical measures which a competent authority will advise and carry out.

Immigration.

16. 3,814 immigrants more than in 1888 were introduced into the Colony at an increased cost of Rs. 7·37 per male statute adult, and the total number of immigrants introduced was 4,527 during the year.

17. The table in the summary showing the number of coolies who have left the Colony during the last few years is very suggestive of the growing dislike of the Indian population to leave Mauritius after their term of contract is at an end. Thus the emigration in 1885 was 4,001, and dwindled in 1889 to 1,319.

Poor Relief.

18. The admissions into hospital or asylum were 10,065 as against 8,791 in 1888, and the paupers at the charge of Government were 1,514 against 1,414 in the previous year, the excess of cost of maintenance for 1889, being Rs. 14,767.

19. You will, however, notice that there was a slight decrease of admissions to the leper asylum and to the lunatic asylum as compared with 1888.

Education.

20. A decrease of 319 scholars on roll in 1889 is not a healthy sign, nor is the decrease of 457 in the average attendance of scholars, or the falling off by 47 in the number of pupils at the Royal College or Royal College schools.

21. It is to be hoped that when the commission of inquiry has finished its labours this state of things will be changed.

Judicial Department.

22. The judicial department appears to show an improvement over 1888. There were 306 offences less than in 1888 reported to the police or to the magistrates; 1,160 convictions less than the previous year, and 565 less admissions to the gaol, but it must be borne in mind that the revelations which caused the inquiry into the police force had demoralised that body for the time, and that the above improvement is scarcely, under the circumstances, a reliable factor in the appreciation of the morality of the people.

Forests and Crown Lands.

23. In order to obtain Rs. 67,338 for sales and leases of forests and crown lands, a sum of Rs. 108,284 was expended, which is however a very slight improvement on 1888, when, to obtain Rs. 57,522 01 the expenditure, exclusive of disbursements for purchase of land, was Rs. 102,488.

Railways, Post Office, and Telegraphs.

24. The railway receipts which in 1888 were Rs. 1,533,769 realised Rs. 1,801,213 in 1889, or an increase of Rs. 267,444, and the post office and telegraphs also showed a small increase of Rs. 7,109.

25. From these remarks your Excellency will see that, though no striking comparison can be established between the year under notice and its predecessor, still certain facts are becoming more noticeable and call for attention with a view to further legislation.

Establishments.

26. The yearly heavy charge for establishment is no doubt inherent to the great distance of this Colony from the larger centres of activity which might otherwise attract and give occupation to its inhabitants, but the increased charges upon the public charity caused by the large Indian population of this island who practically do not contribute to the revenue is matter for earnest consideration.

27. The change in the nature of the shipping which must eventually require the deepening of the harbour to meet the requirements of heavier tonnage is becoming a matter of necessity which the year 1889 has made clear.

28. In the same way the continued high death-rate has revealed the necessity in the interest of the Colony of attacking the problem of sanitation in a more practical manner than hitherto; and in conclusion I must add, that, if the comparison between 1889 and 1888 as indicated by the figures in the Blue Book does not reveal much change, there is no doubt in my mind that it suggests the urgency of remedial legislation and of adherence to sounder economical principles.

Legislation.

The legislation of 1889 does not call for much notice, except the Ordinance No. 9 to make further provision for preventing the pollution of rivers and streams which is likely to do good in a matter of great necessity if strictly enforced.

I have, &c.

(Signed) HUBERT E. H. JERNINGHAM,
Colonial Secretary.

His Excellency the Governor.

No. 27.

MAURITIUS.

MAURITIUS.

[For Report for 1889 *see* Colonial Report (Annual) No. 2.]

Sir C. C. Lees to Lord Knutsford.

Government House, Mauritius,
September 9, 1891.

My Lord,

I have the honour to transmit to your Lordship the Mauritius Blue Book for the year 1890, together with a copy of a report upon the Blue Book by Mr. Elliott.

I have, &c.
(Signed) C. C. Lees,
Governor.

The Right Hon.
Lord Knutsford, G.C.M.G.
&c. &c. &c.

Report to accompany the Blue Book for 1890.

Revenue and Expenditure.

1. The revenue received in 1890 was Rs. 7,774,773, an increase of Rs. 376,440 over the amount estimated. This increase is in a great measure due to Customs duties paid on an unusual amount of goods withdrawn from bond towards the close of the year in anticipation of the passing of an Ordinance, which was under the consideration of the Council of Government, to authorise the levying of a surcharge of 10 per cent. on the principal items of revenue.

2. There was also an increase in the amount received from harbour dues, owing to the passing of an Ordinance imposing increased dues which came into force in September 1890.

3. The increased duty on rum issued for home consumption, which was imposed by Ordinance 17 of 1889, also contributed to the excess of revenue over estimates.

4. There was an increase in the revenue derived from the Post Office, a part of which is attributable to the establishment of the system of postal parcels.

5. There was a decrease in the revenue expected under the head of Interest and Exchange, which is owing to the rate of exchange having fallen below the rate at which it was estimated the amounts collected in England would be brought to account.

MAURITIUS.

6. The expenditure in 1890 was Rs. 7,705,311, which was Rs. 264,747 less than the amount estimated.

7. This decrease is attributable to savings on establishments, to the payment in 1890 of subsidy for the Colombo Mail Service for one quarter only, while provision had been made for the whole year, to a less expenditure on account of coal for the railway, the amount expected from Australia not having been shipped owing to strikes; and to the fall in the rate of exchange, so that the whole amount anticipated for that item was not required.

8. The saving on coal was able to be effected because the Railway Department drew from its reserve stock, which will have to be made good this year.

9. When the year opened it was estimated that the revenue would fall short of the expenditure by Rs. 571,725, but this deficit, owing to the causes previously mentioned, was converted into a surplus of Rs. 69,462.

Imports and Exports.

10. The trade for the year was valued at Rs. 44,323,642, against Rs. 50,875,235 in 1889, and Rs. 49,378,905 in 1888; divided into—

——	1888.	1889.	1890.
	Rs.	Rs.	Rs.
Imports - - -	16,538,469	17,676,556	16,702,818
Exports - - -	32,840,436	33,198,679	27,620,824

or, exclusive of specie and bullion—

——	1888.	1889.	1890.
	Rs.	Rs.	Rs.
Imports - - -	15,341,202	15,612,056	16,375,377
Exports - - -	32,291,978	32,806,715	26,962,930

11. The value of the principal imports for the three years 1888, 1889, and 1890 was as follows:—

——	1888.	1889.	1890.
	Rs.	Rs.	Rs.
Animals - - - -	394,788	295,383	332,744
Apothecaries' ware - -	165,739	171,118	182,670
Grain, flour, meal - -	5,261,574	4,038,773	5,153,773
Provisions - - -	1,363,911	1,258,111	1,434,549
Malt liquors, wines and spirits -	868,065	856,623	823,657
Cotton manufactures - -	1,046,684	978,420	1,254,631
Woollen manufactures - -	147,278	212,433	218,597

MAURITIUS.

——	1888.	1889.	1890.
	Rs.	Rs.	Rs.
Haberdashery - - -	354,076	333,307	407,245
Coal - - - -	351,168	839,385	542,372
Machinery - - -	80,014	135,285	209,607
Iron and steel - - -	144,536	198,639	193,691
Hardware and cutlery - -	450,247	566,340	1,043,452
Leather, wrought and unwrought - - -	217,287	260,465	243,721
Manure and fertilizers - -	1,256,042	2,155,611	1,100,217
Oil of all kinds - - -	526,941	601,562	764,064
Tobacco - - -	185,327	139,776	193,304
Total - - -	12,813,677	13,041,231	14,098,294

12. The value of the imports given in the Blue Book is the declared value at the port of shipment, value in sterling being converted into rupees at 10 per £. Nothing is added for charges and exchange, the amount of which is shown in a separate column.

13. Were the charges and exchange added to the declared value of the imports the great disparity between the amount of the imports and exports would be very much diminished, as will be seen from the following table, which shows the result of adding the charges and exchange to the value of the imports given in the preceding table:—

——	1888.	1889.	1890.
	Rs.	Rs.	Rs.
Animals - - - -	697,640	524,741	551,820
Apothecaries' ware - -	287,424	299,335	302,197
Grain, flour, meal - -	7,306,008	5,599,672	7,070,167
Provisions - - -	2,204,676	2,045,895	2,231,893
Malt liquors, wine, and spirits -	1,496,864	1,506,552	1,367,227
Cotton manufactures - -	1,651,627	1,543,804	1,949,851
Woollen manufactures - -	250,822	364,365	358,275
Haberdashery - - -	607,386	575,653	667,081
Coal - - - -	944,643	2,274,448	1,408,150
Machinery - - -	139,224	238,097	347,948
Iron and steel - - -	248,959	345,815	320,269
Hardware and cutlery - -	779,711	986,725	1,724,693
Leather, wrought and unwrought - - -	370,730	448,435	399,247
Manure and fertilizers - -	2,168,741	3,700,562	1,757,762
Oil of all kinds - - -	791,636	821,954	1,121,645
Tobacco - - - -	292,443	223,496	298,784
Total - - -	20,238,534	21,499,549	21,877,009

14. The principal export of the Colony is sugar, and the following table shows in kilogrammes (1,000 of which make a ton) the quantity exported in the years 1888, 1889, and 1890; the value in

MAURITIUS.

rupees as declared at the Custom House; and the rate calculated therefrom per 100 kilogrammes:—

Year.	Quantity exported in Kilogrammes.	Declared Value in Rupees.	Value per 100 Kilogrammes.
			Rs.
1888 - - -	130,066,518	28,754,798	22
1889 - - -	141,783,434	28,994,791	20
1890 - - -	128,405,938	23,483,868	18

From this it will be seen that the crop in 1890 was not only inferior in quantity to those of the two previous years, but that the selling price of sugar had fallen considerably; the value of 100 kilos. being in 1890 Rs. 18 against Rs. 20 in 1889, and Rs. 22 in 1888.

15. The principal markets for our sugar were:—

—	1888.	1889.	1890.
	Kilos.	Kilos.	Kilos.
India - - - -	66,077,096	63,981,575	68,260,803
Australasia - - -	31,775,136	41,634,740	30,185,866
United Kingdom - -	12,291,913	14,112,787	14,995,667
Cape Colonies - - -	8,667,146	10,666,308	11,741,487
United States - - -	6,340,467	8,949,065	1,505,126
Ceylon - - - -	2,819,628	1,198,576	596,901

While the exports of sugar to India, the United Kingdom, and the Cape Colonies have increased, there has been a great decline in the quantity exported to the United States and Ceylon.

16. During the year 1890 a trial of the diffusion system for the extraction of sugar from the cane was made on Britannia Estate, belonging to the Oriental Bank Estates Company, and it appears from the figures given by the manager of the Company that the quantity of sugar obtained by this system was about 30 per cent. beyond the amount that would have been obtained by the ordinary process of sugar making.

17. The cost of the necessary apparatus and of its installation was advanced from the Colonial Treasury, and will be recovered by a small addition to the export duty on sugar.

18. While attention has thus been given to the question of how to extract from the cane the largest possible amount of sugar, the necessity of obtaining from the soil a larger yield of canes containing a larger amount of sugar has not been lost sight of, and with the

approval of the Council of Government a station at Agronomique is about to be created where experiments will be made with the object of improving the system of cultivation to its utmost limit.

Shipping.

19. The following table gives the number of ships and their tonnage, entered inwards and cleared outwards in 1888, 1889, and 1890 :—

Year.	Inwards.		Outwards.	
	No.	Tonnage.	No.	Tonnage.
1888 - - -	465	314,432	449	307,912
1889 - - -	436	336,794	441	329,245
1890 - - -	456	343,302	463	346,320

20. A commission appointed to consider what improvements should be made in the harbour with a view to provide better accommodation for the larger class of vessels that now frequent it has sent in a report, and the subject is under consideration.

Population.

21. The estimated population for 1890 was on the 31st December 377,986, being an increase of 5,322 over that of 1889 at the same date. The general population was estimated at 119,001, of which 62,101 were males and 56,900 females. Of the Indian population, estimated at 258,985, 149,264 were males and 109,721 females.

22. The births registered in 1890 were 13,303 and the deaths 12,781.

23. The birth-rate was lower than it has been of late years, 1888 excepted, when the rate was about the same.

24. The mean annual death-rate in 1890 was 34·3 per thousand, a very high rate. With the exceptions of the years 1882, 1883, and 1887, the mortality of 1890 was higher than that of any year since the time of the great fever.

25. The Sanitary Commission, which was appointed in 1890, having suggested that the services of an engineer well versed in sanitary and water supply questions be secured, Mr. Osbert Chadwick, sanitary engineer, is now considering what measures can be adopted to improve the public health.

Education.

26. The average number of pupils in the Royal College and Royal College Schools in 1890 was 475, an increase of 29 over the number who attended in 1889, but 18 below the number in 1888. 187 pupils belonged to the Royal College proper, which is in Port Louis; the College School in Port Louis had 140 pupils, and the College School at Curepipe 148.

27. The staff of the Royal College and College Schools consists of a rector and 42 professors and masters, besides which there are four religious instructors and four ushers.

28. The Royal College is affiliated to the University of London, and many of its pupils have graduated there.

29. Eight private schools in the Colony are received into association with the Royal College; their pupils following the course of secondary instruction prescribed for the pupils of the Royal College; and being required to submit to an annual examination held at the Royal College.

30. There are various classes of scholarships given as rewards to successful competitors at the annual examinations, the most valuable being those which are known as the English scholarships, awarded every year to the two most deserving pupils, who are sent to pursue their studies in the United Kingdom, and who receive an annual allowance of 200*l.* for four years, and the cost of their passage to and from England.

31. The average number of scholars on the rolls of the Government schools and grant-in-aid schools in 1890 was 15,743, an increase of 191 over the number who attended in 1889, but 128 below the number in 1888.

32. The average attendance in these schools in 1890 was about the same as in 1889, and the superintendent of schools says that considering (1) the fever which prevailed as usual in Port Louis, and in the low-lying parts of the Colony during the first four or five months of the year, after the setting in of the heavy rains; and (2) the epidemic of influenza which broke out in the middle of the year and lasted for several months, that attendance may be considered somewhat satisfactory, and bears favourable comparison with the attendance of previous years.

33. The expenditure on educational purposes in 1890 was Rs. 422,298, against a sum of Rs. 413,146 in 1889 and of Rs. 414,789 in 1888.

Post Office and Telegraphs.

34. The revenue collected in this department exceeded by Rs. 2,632 the amount collected in 1889. There was an increase of 86,674 in the number of letters which passed through the office, and of 5,792 in the number of postcards; but there was a decrease of 168,306 in the number of newspapers.

35. The mail service by the Messageries Maritimes Company was continued with great regularity, and a new mail service by

the vessels of the British India Steam Navigation Company, was commenced in the month of June. This is a four-weekly service between Mauritius and Colomb, where the steamers connect with lines to England, Australia, India, and China. Half the subsidy is paid by the Imperial Government and half by the Colony.

Railways.

36. The receipts for 1890 were Rs. 1,575,889, a decrease of Rs. 225,324 as compared with 1889. The reduction in the sugar crop is the principal cause of this decrease. The expenditure in 1890 was Rs. 1,106,304, a decrease of Rs. 200,089 on the expenditure of 1889.

37. The Acting General Manager reports that the passenger service was conducted with regularity; no delay in the running of the trains was complained of by the public, nor is he aware that any passenger received any damage through the fault of the Railway Department.

38. An extension of the Moka line, from Montagne Blanche Station to Rivière Sêche Station, which will connect the existing line with the North Line, has been sanctioned, and the work is now in hand

Immigration.

39. The number of Indian immigrants introduced into the Colony in 1890 was 3,025 : 1,094 of whom were from Calcutta and 1,931 from Madras. They were conveyed in eight vessels, one of which was a sailing ship, while the others were steamers. Only one death occurred during the voyage from India, and that was on board the sailing ship.

40. The average cost of introduction per male statute adult was Rs. 154 . 32, a slight reduction on the cost of those introduced in 1889.

41. There was again a decrease in the number of immigrants leaving the Colony, the number recorded at the immigration depôt being 1,054.

42. The proportion of females to males among the immigrants who arrived in the Colony was 36 per cent., and the proportion of females to males in the departures was 27 · 6 per cent.

Poor Relief.

43. The expenditure under this head in 1890, including establishment charges, was Rs. 409,131, showing a diminution of Rs. 45,474 on the expenditure under the same head in 1889.

44. Indoor relief was given at Barkly Asylum and in several convents to infirm and destitute persons and to orphans : and at St. Lazare Asylum to lepers. In the public hospitals were received those unable to provide themselves with medical care and treatment.

MAURITIUS.

45. The number of persons assisted at the Barkly Asylum in 1890 was 954, against 754 in 1889, the number remaining on 31st December 1890 being 340. The number of deaths in the year was 67, against 65 in the previous year, and the ratio of mortality was 7·02 per cent., against 8·62 in 1889.

46. The number of lepers maintained at St. Lazare in 1890 was 314, against 303 in the previous year, the number remaining on 31st December 1890 being 156. The mortality in 1890 was 42 against 35 in the previous year, and the ratio of mortality was 13·37 per cent. against 12·02 in 1889.

47. The number of patients treated in the Public Hospitals in 1890 was 10,436, against 9,976 in 1889. Of these 8,331 were treated in hospitals in the rural districts, and 2,105 at the Civil Hospital in Port Louis. The total number of deaths in the several hospitals was 1,165, against 1,013 in 1889; and the ratio of mortality was 11·16 per cent. against 10·15 in the previous year.

48. Besides the medical care given to paupers in the public hospitals, there were 47,403 attendances of sick people at the public dispensaries, against 31,213 in 1889, showing the very large increase of 16,190 over the previous year, which is ascribed to a recrudescence of fever, and the epidemic of influenza.

49. Of the insane patients treated at the Government Lunatic Asylum, 473 were at the cost of the Poor Law Commission.

50. Out-door relief in the shape of rice and money was given to 11,977 persons against 12,848 in the previous year.

Criminal Statistics.

51. The following table shows the number of offences reported to the police or the magistrates in the last three years; the number of persons apprehended or summoned; the number of convictions in the inferior courts, and the number of acquittals.

Year.	Offences.	Persons.	Convictions.	Acquittals.
1888 - -	26,880	17,706	13,707	3,805
1889 - -	26,574	17,183	12,547	4,455
1890 - -	30,085	21,405	16,173	5,055

52. The convictions and acquittals in the Supreme Court during those years were :—

——	Convictions.	Acquittals.
1888 - - - -	129	23
1889 - - - -	83	13
1890 - - - -	101	13

53. The number of committals to gaol in those years is shown in the following statement:—

Year.	For Debt.	For non-payment of Fines and Costs.	For safe Custody or not furnishing Security.	For Penal Imprisonment.
1888 - -	17	2,224	1,550	4,160
1889 - -	10	1,848	1,591	3,937
1890 - -	13	2,037	1,885	4,943

54. The construction of a new central prison at Beau Bassin, six miles from town, has long occupied attention, and the building is being pressed on. The enclosure wall is finished, and one block containing accommodation for 520 prisoners is now occupied. When the work is completed there will be accommodation for 800 prisoners, and it will then be possible to close the existing central prison in Port Louis, and the district prisons at Flacq, Grand Port, and Savanne.

55. The reformatory for juvenile offenders is also under the management of the Superintendent of Prisons. 382 boys were sent to the reformatory in 1890, and the number remaining on 31 December was 128. The health of the boys was good, and there was but one death in the year caused by malarial fever.

Meteorological Observations.

56. Dr. Meldrum, the Director of the Royal Alfred Observatory, has, as usual, contributed a valuable paper on the results of the Meteorological Observations taken during the year.

57. The mean temperature in the shade at the Observatory was 72 · 2 degrees against an average of 73 · 6 for the 16 years 1875–1890; the absolute highest temperature being 84 · 4 on 15th January, and the absolute lowest 53 · 5 on 26th July.

58. It should be stated that the Observatory is about three miles from the West Coast, and stands on a plain 178 feet above sea level.

59. The rainfall for the year at the Observatory was 53 · 17 inches on 208 days, against an average of 47 · 98 inches on 201 days for the last 16 years. The wettest months were February, March, and April, and the driest, September.

Legislation.

60. Thirty-two Ordinances were passed by the Council of Government in 1890.

Mauritius.

61. Ten of these deal with questions affecting the revenue of the Colony, the principal of which are Ordinances to amend the harbour dues, to impose a tax on the cultivation of tobacco, to amend the license laws, to levy a surcharge of 10 per cent. on the principal items of revenue, and to convert certain *ad valorem* Customs duties into fixed duties according to weight, measurement, or number.

62. The Ordinance to amend the law relating to the liquidation and partition of successions is of considerable importance. This Ordinance simplifies the procedure and renders less expensive the system of partition of successions such as it exists under the codes, and special provisions are made with regard to successions the assets of which do not exceed Rs. 6,000.

63. Another important measure was the Ordinance to provide for the payment of grants out of public funds in support of the established Church of Scotland, the Church of England, and the Roman Catholic Church in Mauritius, and for the distribution of such grants. This Ordinance was passed to give effect to the recommendations of the Committee of the whole Council of Government, which were practically accepted by all parties as a final and satisfactory settlement of the question of the redistribution of the Ecclesiastical grants.

64. Another Ordinance was passed to constitute the Presbyterial Committee of the Church of Scotland in Mauritius into a corporate body with defined powers of control and management.

65. Other Ordinances to which I may call attention are the following:— No. 12, to consolidate and amend the law relating to the emoluments of the Governor of Mauritius; No. 9, to amend the law relating to the Curatelle; No. 17, to consolidate and amend the law relating to the civil status; and No. 5, to amend the Quarantine Ordinance of 1887.

ANNUAL REPORTS FOR 1889 AND 1890.

No. 1.

Acting Administrator BROWN to LORD KNUTSFORD.

Government House, Seychelles,
February 15, 1892.

MY LORD,

I HAVE the honour to forward direct one copy of each of Blue Book Reports for 1889 and 1890, which your Lordship had expressed a desire to receive at an early date.

I have further the honour to enclose copy of my Despatch to the Governor covering duplicate copies.

I have, &c.
(Signed) R. M. BROWN,
Acting Administrator.

The Right Hon.
Lord Knutsford, G.C.M.G.,
Secretary of State for the Colonies.

REPORT ON THE SEYCHELLES BLUE BOOK FOR THE YEAR 1889.

REVENUE AND EXPENDITURE.

The revenue of the year 1889 amounted to Rs. 208,967 against Rs. 200,095.56 in the preceding year, and the expenditure was Rs. 195,550.12 against Rs. 188,715.78 in the year 1888.

The following is a comparative statement of the principal heads of receipts in the years 1888 and 1889:—

—	1888.	1889.
	Rs. c.	Rs. c.
Import duties - - -	106,325 71	121,941 19
Licenses - - - -	24,072 50	24,017 50
Local rate - - - -	28,849 71	28,707 06
Fines, fees, and forfeitures of court	7,067 73	4,354 23
Registration - - -	7,906 56	9,525 92
Mortgage - - - -	1,226 54	968 30
Rum duty - - - -	7,002 24	3,746 74
Stamps - - - -	3,493 00	3,376 00

	Rs.
Total revenue - - - -	208,967
Total expenditure - - - -	195,550
Balance in favour of revenue - -	13,417

EXPORTS AND IMPORTS.

The exports, exclusive of specie, amounted to Rs. 653,102.37 against Rs. 529,675.18 in the preceding year, showing an increase of Rs. 123,427.19. This is mainly attributable to the increased exportation of vanilla during 1889.

Imports.

The imports show a total of Rs. 570,989.55 against Rs. 568,289.82 in 1888, showing an increase of Rs. 2,699.73. Such increase is mainly due to increased importation of coals, building materials, coffee, and cotton stuffs.

Assets and Liabilities.

The assets of the Dependency on the 31st December, according to a statement of the Treasurer duly audited, amounted to Rs. 79,748.40.

The liabilities amounted to Rs. 80,998.17, showing a balance of Rs. 1,249.97 against the Dependency.

SHIPPING.

Eighty vessels manned by 8,086 men, including mail steamers and men-of-war, with an aggregate tonnage of 168,325 tons, entered the Port of Victoria, during the year, namely:—

	Tons.
13 men-of-war - - - -	25,700
36 mail steamers - - -	133,674
31 merchant vessels other than mail steamers - - -	9,051

MAURITIUS.

SEYCHELLES.

Of the men-of-war—
- 9 were British.
- 2 were German.
- 1 was French.
- 1 was Austrian.

Of the merchant vessels—
- 30 were British.
- 37 were French (including mail steamers).

POPULATION AND VITAL STATISTICS.

The number of births registered in the Dependency during the year 1889 was 508, namely:—

—	General Population.		African Population.	
	Male.	Female.	Male.	Female.
Legitimate - - - - -	174	157	25	21
Natural acknowledged - - -	9	7	0	0
Natural - - - - -	59	51	5	0
	242	215	30	21

The birth rate per 1,000 was 31·709 as against 32·40 in 1888.

The rate of still-births per 1,000 was 1·997 as against 2·21 in 1888.

The number of deaths registered during the year was 368, the rate per 1,000 being 22·970 as against 17·10 in 1888.

There were 155 marriages celebrated in 1889 as against 173 in 1888.

EDUCATION.

In 1889 there were 25 schools aided by the Government grants, attended by 1,733 children, against 24 schools in 1888 attended by 1,729 children.

Eighteen schools with 1,349 pupils were under the control of the Roman Catholic Mission, and seven schools with 384 pupils were managed by the civil chaplain and the Church Missionary Society.

The sum voted in 1889 for grants in aid was Rs. 8,000, the same amount as in 1888.

It was apportioned as follows, viz.:—

	Rs.	c.
Roman Catholic schools - -	6,038	78
Church of England schools - -	1,781	41
Church Mission school at Capucin -	179	81

MAURITIUS.

SEYCHELLES.

JUDICIAL.

Criminal Side.

The total number of criminal informations filed in 1889 was 578, as against 859 reported for 1888. Out of the 578 informations filed, 531 were adjudicated upon, as against 796 in 1888; the number of informations in which no further action was taken, or which were not adjudicated upon within the year, were 47 as against 63 in 1888.

There were 452 persons convicted as against 778 in 1888.

The decrease was noticeable chiefly in cases of

Disturbance, for which 135 persons were convicted in 1889 as against 221 in 1888;

Drunkenness, for which 104 persons were convicted as against 130 in 1888;

Breach of license law, of which only two persons were convicted in 1889 as against 63 in 1888; Breach of laws for the repression of larcenies of produce for which there were 24 convictions in 1889 as against 59 in 1888, larceny and possession of stolen property for which there were 50 persons convicted in 1889 as against 87 in 1888; Breaches of the fishery laws, for which three persons only were convicted in 1889 as against 54 in 1888.

There were no cases of murder or manslaughter in 1889 as in 1888. The most serious offences were rape, swindling, wounds and blows, assaulting police, embezzlement, larcenies, adultery, defamation and slander, perjury and forgery.

Civil Side.

The number of civil cases entered in 1889 was 126 as against 200 in 1888.

Stipendiary Side.

Sixty six persons were charged in the Stipendiary Court as against 167 in 1888. 44 persons were *convicted* as against 166 in 1888.

There were five convictions for non-production of tickets against 85 in 1888.

The engagements and discharges before the stipendiary magistrate were as follows:—

——	1889.	1888.
Engagements - - - - -	66	58
Discharges - - - - -	56	54

MAURITIUS.
—
SEYCHELLES.

The total number of cases of all jurisdictions entered before the Courts in 1888 and 1889 stands as follows:—

—	1888.	1889.
Criminal - - - - -	859	578
Civil - - - - - -	200	126
Stipendiary - - - - -	144	47
Total - - -	1,203	751
Decrease - - -	452 cases.	

There were four appeals from decisions of the Court of Seychelles in 1889, all four were dismissed.

Gaol.

252 persons were committed to gaol in 1889 as against 472 in 1888. Of these 23 were sentenced to one year or more as against 15 in 1888, the remainder being sentenced to less than one year.

In 1889 as in 1888 there were no deaths in the prison.

HOSPITAL.

The number of persons treated in the public hospital in 1889 was 259 against 228 in 1888, as follows:—

—	1888.	1889.
Paupers - - - - - -	55	60
Prisoners - - - - - -	86	93
Paying patients - - - - -	87	106
Total - - - - -	228	259

Of these 259 persons—

196 were discharged as cured.
36 „ „ relieved.
2 „ „ unrelieved.
4 „ „ malingering.
9 died.
12 remained in hospital at the end of the year.
———
259
═══

MAURITIUS.
—
SEYCHELLES.
—

The principal ailments were measles (in the beginning of the year), dysentery, fever, anæmia, venereal diseases, rheumatism, wounds.

DISPENSARY.

The number of applications for medicines at the public dispensary was 5,365 against 5,169 in 1888.

VACCINATION.

253 children were vaccinated at the Public Hospital and 63 at the outlying station of Mahé. In the Praslin ward there were 48 vaccinations, making a total for the Dependency of 301, as against 547 in 1888.

LEPER CAMP.

There were seven lepers maintained in the leper camp of Curieuse Island during the year, namely:—

Males - - - - -	5
Females - - - - -	2

PAUPER CAMP.

Eleven aged paupers were maintained in the pauper camp at Curieuse Island during the year.

LUNACY.

There were five lunatics maintained at the expense of the Seychelles Government at the Mauritius Lunatic Asylum during the year.

Of these five were declared lunatics during the year.

ECCLESIASTICAL.

The census taken in 1881 does not show separately the number of adherents of each Church.

The number of ministers employed in 1888 was as follows:—

Church of England.

Civil chaplain - - - - -	1
Minister for South Mahé - - -	1
Minister for Praslin - - - -	1
Evangelists and catechists - - -	12
Total -	15

Roman Catholic Church.

PUBLIC WORKS.

Extension of Roads and Bridges.

North-east Road.—700 feet of road were opened on a width of 16 feet, including an embankment 200 feet long, with dry stone side walls from 5 to 8 feet in height.

Seven masonry bridges were built to replace rotten timber bridges, or across streams not bridged over before. These bridges involved the building of retaining walls on a length of 350 feet.

Anse La Mouche and Anse Poules Bleues.

Six bridges were built on the road from Anse Poules Bleues to Baie Lazarre, the spans varying from 6 to 12 feet. These bridges were built with masonry abutments and Capucin timber.

2,000 feet of road were opened at Anse La Mouche.

Anse aux Pins.—A bridge 82 feet long and 14 feet wide was built over the Mare Cayolle.

Forêt Noire Road.—3,237 feet of road were made, on a width of about 8 feet, from where the road was left off last year to the bridge on River Tanguin.

MAURITIUS.

SEYCHELLES

850 feet were also cut on the other side of the river, but the road is there in an incomplete state and not joined to the finished portion.

South Road.—486 feet of road were made on a width of 17 feet, including a causeway 200 feet long with side walls 4 feet high.

Port Gland.—A causeway 14 feet wide and of an average depth of 4 feet was built on a length of 304 feet.

Maintenance of Roads and Bridges.

The road from Anse Boileau to Baie Lazare was cleaned on a length of 2,200 feet. The road from Anse Boileau to town (Misère Road) was cleaned on a length of 48,000 feet.

The same road was repaired, drains opened, &c. on a length of 8,000 feet.

The road from Pointe Laine to Anse Forbans was cleaned on a length of 37,000 feet. This work was done in the first days of January 1890.

The "Canelles" road, leading from Anse Boileau to Anse La Mouche, was cleaned, drains opened, &c.

The South Road, North-east Road, and Forêt Noire Road were cleaned and kept in fair order.

Timber bridges on all the roads were repaired. Our old ones on the South Road were replaced by masonry culverts, and a masonry arch bridge 14 feet span was erected in Malakoff Street in town.

The causeway joining the police station to the Roman Catholic church, which had been to a large extent destroyed by a flood at the beginning of the year, was thoroughly repaired, and two bridges which had been carried away replaced.

Coal Wharf.

The central portion of the wharf was raised about 18 inches on an area of 1,800 square yards. The granite side walls were repaired and raised to the same height on a length of 640 feet, and the wall was built on a length of 55 feet where it did not exist before.

Completion of Landing Warehouse.

A new landing warehouse alongside the pier was completed. The old warehouse was pulled down and rebuilt to the same height and breadth as the new one.

The building is now 79 feet long, 26 broad, and 12 feet high.

GAOL.

A small house, 13 feet × 10 feet, with barred windows, was erected at Curieuse for a leper prison.

CROWN LANDS.

No noticeable changes in connexion with Crown Lands took place in 1889.

The work of reforestation received attention during the year. Seeds of valuable timber trees were planted, and the young timber plants of the previous years were looked after and have thriven. The Coco de Mer valley at Praslin was looked after, a large number of nuts having been planted.

The produce of Curieuse and Félicité Islands considerably increased during the year, owing to many of the young cocoanut trees having commenced to bear fruit.

The following is Conservator of Crown lands' valuation of the produce of the property under his charge for the year 1889, including rent of property leased, and produce whether sold, supplied to departments, or utilised for reforestation, &c.

Revenue of Crown Lands for the Year 1889.

Name of Property.	Revenue. Rs.	ct.
Church Missionary Society		50
Coal Wharf	200	00
Messageries Wharf	600	00
Ilot on Reefs	50	00
Ilot Hodoul	210	00
Félicité Island	1,080	00
Ile Récifs	666	00
Mamelles Island	40	00
Ile ronde of Praslin	4	00
Right end side of Victoria Pier	40	00
Fibre Factory	400	00
Land between Factory and Sea	50	00
Amirantes Islands	553	00
Long Island	155	00
Coco de Mer Ravine	260	00
Curieuse Island	2,300	57
Sea Way New Oriental Bank	50	00
Sea Way alongside the Pier	160	00
Sea frontage along Victoria Pier	160	00
	6,979	07

The expenditure for Crown Lands for 1889 is stated as follows:—

	Rs.
Forest lands in Mahé	240
Long Island Guardian	192
Guardian and Labourers, Curieuse	467
Coco de Mer Ravine Guardian	144
Forest Ranger	360
Conservator of Crown Lands, &c.	1,200
	2,603

MAURITIUS.

SEYCHELLES.

Police.

The strength of the police force in 1890, as in 1889, was 46 of all ranks, including 1 chief officer, 1 sergeant-major, 2 sergeants, 3 corporals, 10 first class, 10 second class, 14 third class, and 5 boatmen constables, distributed over 9 stations, including the central station at Victoria.

The Police Reward Fund showed a balance of Rs. 418.03 on the 31st December 1889.

There were 19 reports against constables for misconduct during the year.

Detection and Repression of Crimes, &c.

The number of persons prosecuted by the police in 1889 was 512, of whom 439 were convicted and 73 acquitted.

The value of property alleged to have been stolen in 1889 was Rs. 373.56, and the amount recovered Rs. 210.56, as against Rs. 3,081.90 stolen and Rs. 1,284.83 recovered in 1888.

The total amount of fines inflicted in police prosecutions in 1889 was Rs. 2,926 as against Rs. 9,972 in 1888.

Liberated Africans and Labourers generally.

No liberated Africans or immigrants of any kind were introduced during the year 1889. The last liberated Africans were introduced in 1874.

The actual number of liberated Africans in Seychelles in 1889 cannot be stated with accuracy. The number in 1881 according to the census was 1,817.

It results from the Acting Inspector of liberated Africans' report that 363 Africans were employed on estates during 1889 against 313 in 1888, namely:—

In 1889—	
Under written contract - - -	85
Under verbal contract - - -	278
Total - - -	363
In 1888—	
Under written contract - - -	105
Under verbal contract - - -	208
Total - - -	313

The number of labourers of all classes reported to have been employed on estates in 1889 was 895 as against 819 in 1888.

The total of wages earned by labourers employed on estates in 1889, was according to the Acting Inspector's report, Rs. 72,005.70 as against Rs. 59,405.05 earned in 1888, and the total amount of wages lost by labourers through absences, sickness, &c., was Rs. 10,770.76 in 1889 as against Rs. 9,084.51 in 1888.

173 labourers are reported to have been employed on estates on the *share* system under Regulation 3 of 1888, of whom 98 were Africans.

There were no prosecutions by the Inspector of liberated Africans against masters or servants in 1889. There were none in 1888.

The number of marriages of liberated Africans in 1889 is reported to have been 30 against 12 in 1888, and of African creoles (*i.e.*, offspring of liberated Africans) 14 against nine in 1888.

There were 51 births among the African population in 1889 against 82 in 1888, and 21 deaths against 26 in 1888.

Eighty-seven liberated Africans were convicted on police prosecution for various offences in 1889 against 246 in 1888.

LEGISLATION.

The following Regulations were passed by the Board of Civil Commissioners in 1889:—

1. An amended Regulation—" To make better provision for " the repression and detection of larcenies of vanilla and other " produce."
2. A Regulation—" To consolidate and amend the laws relating " to prisons."

N.B.—This Regulation was not forwarded for approval. An Ordinance has since been introduced into the Legislative Council embodying its principal provisions.

The following Ordinances were passed by the Legislative Council:—

1. " An Ordinance to confer upon members of the Legislative " Council all the powers, rights, and privileges vested in members " of the Board of Civil Commissioners by any laws or proclama- " tions in force in the Seychelles Islands."
2. " An Ordinance to provide for the service of the Seychelles " Islands for the year 1889."
3. " An Ordinance to amend Regulation 1 of 1888."
4. " An Ordinance to exempt the Administrator from the " payment of Customs Duties."
5. " An Ordinance to transfer the duties of stamp officer from " the District Clerk to the Postmaster."
6. " An Ordinance to regulate the practice of medicine, surgery, " and midwifery in the Seychelles Islands."
7. " An Ordinance to provide for the service of the Seychelles " Islands for the year 1890."

(Signed) R. M. BROWN,
Acting Administrator.

MAURITIUS.

SEYCHELLES.

REPORT ON THE SEYCHELLES BLUE BOOK FOR THE YEAR 1890.

REVENUE AND EXPENDITURE.

The revenue of the year 1890 amounted to Rs. 224,16.37 against Rs. 208,967.12 in 1889. The expenditure was Rs. 219,393.46 against Rs. 195,550.12 in 1889.

The following is a comparative statement of the heads of receipts in the years 1889 and 1890:—

—	1889.		1890.	
	Rs.	c.	Rs.	c.
Import duties - - -	121,949	19	122,285	04
Licenses - - - -	24,017	50	24,808	50
Local rate - - - -	28,767	16	29,749	42
Fines, fees of court or office -	4,354	23	6,661	28
Registration - -	9,525	92	9,265	02
Mortgage - - - -	968	30	1,040	85
Stamps - - - -	3,376	00	3,791	46
Rum duty - - - -	3,746	74	6,109	38
Total revenue - - - -			224,169	37
Total expenditure - - - -			219,393	46
Balance in favour of revenue - -			4,775	91

EXPORTS AND IMPORTS.

Exports.

The exports, exclusive of specie, amounted to Rs. 620,578.80 against Rs. 653,102.37 in the preceding year, showing a decrease of Rs. 32,525.57. This is mainly attributable to a decrease in the exportation of vanilla in 1890.

Imports.

The imports show a total of Rs. 657,512.20 against Rs. 570,989.55 in 1889, showing an increase of Rs. 86,522.65. This increase is mainly due to an increased importation of coals, building materials, and cotton stuffs.

ASSETS AND LIABILITIES.

The assets of the Dependency on the 31st December, according to a statement from the Treasurer duly audited, amounted to Rs. 85,314.32.

The liabilities amounted to Rs. 72,801.36, showing a balance in favour of assets of Rs. 12,512.96.

SHIPPING.

Eighty-eight vessels manned by 13,966 men and of an aggregate tonnage of 192,994 tons entered the Port of Victoria in 1890, namely :—

	Tons.
25 men-of-war - - - -	40,651
36 mail steamers - - -	141,597
27 merchant vessels other than mail steamers - - - -	10,746
88 Total - - -	192,994

Of the men-of-war—

21 were British.
2 were French.
1 was Italian.
1 was German.
25

Of the merchant vessels—

24 were British.
1 was Norwegian.
1 was American.
1 was Dutch.
36 were French (mail steamers).

POPULATION AND VITAL STATISTICS.

The number of births registered in the Dependency was 623 as against 508 in 1889, namely ;—

——	General Population.		African Population.	
	Male.	Female.	Male.	Female.
Legitimate - - - - - -	210	201	24	33
Natural acknowledged - - -	20	13	12	0
Natural - - - - - - -	57	52	5	5
	287	266	32	38

Taking the population to be 16,021, as found at the census of 1881, the birth rate per 1,000 was 44·24 as against 31,709 in 1889; the rate of still-births 4·26 per 1000 as against 1·997 in 1889.

The number of deaths registered during the year was 257 as against 368 in 1889, and the death rate 18·25 per 1,000 against 22·970 in 1889.

There were 187 marriages against 155 in 1889.

EDUCATION.

In 1890 there were 24 schools aided by Government grants attended by 1,844 children, against 25 schools in 1889 attended by 1,733 children.

Eighteen schools with 1,498 pupils were under the control of the Roman Catholic Mission, and six schools with 346 pupils were managed by the civil chaplain and the Church Missionary Society.

The sum voted in 1890 for grants in aid was Rs. 8,000, the same amount as in 1889.

It was apportioned as follows, viz.:—

	Rs.	c.
Roman Catholic schools - -	6,122	84
Church of England schools - -	1,718	04
Church Mission school at Capucin -	159	12

JUDICIAL.

Criminal Side.

The total number of criminal informations filed in 1890 was 643 against 578 in 1889. Of the 643, 498 were filed by the police and 145 by private parties.

637 cases were adjudicated upon against 531 in 1889, six cases were not adjudicated upon or not pressed to conclusion as against 47 in 1889.

845 persons were charged in 1890, 673 by the police and 172 by parties, as against 675 in 1889.

There were 531 convictions in 1890 (462 upon police prosecution and 69 on prosecution by parties), as against 452 in 1889.

As in preceding years, the most numerous offences were drunkenness and disturbance, there being 112 convictions for drunkenness as against 104 in 1889, and 174 convictions for disturbance as against 135 in 1889.

There were 314 persons prosecuted for disturbance of which 140 were acquitted.

57 persons were charged with larceny as against 74 in 1889, and there were 35 convictions as against 50 in 1889.

Of the 57 persons charged with larceny there were 23 charged with larceny of agricultural produce. Of these 16 were convicted.

On the other hand, there were 67 persons prosecuted for breach of the special law for repression of larcenies of produce, resulting in 56 convictions, against 47 persons prosecuted under the old law, and 23 convictions, in 1889.

There was one prosecution for infanticide, which did not result in a commitment for trial; the accused was subsequently prosecuted and convicted for concealment of birth.

The most serious offences this year were burglary, wounds and blows, concealment of birth, defamation, embezzlement, escape of prisoners, facilitating escape of prisoners, attempt upon chastity, bestiality.

Civil Side.

The number of civil cases was 147 as against 126 in 1889, showing an increase of 21 cases; in addition to which there were 41 matters dealt with in chambers.

Stipendiary Side.

There were 65 persons charged in the Stipendiary Court against 66 in 1889, and 40 convictions against 44 in 1889.

The engagements and discharges before the Stipendiary Magistrate were as follows:—

——	1890.	1889.
Engagements - - - - -	168	66
Discharges - - - - - -	57	56

showing an increase in the number of labourers entering into written contracts of service of 60 in favour of 1890.

The total number of cases in all jurisdictions entered before the Courts in 1889 and 1890 respectively stands as follows:—

——	1889.	1890.
Criminal - - - - - -	643	578
Civil - - - - - - -	147	126
Stipendiary - - - - - -	65	47
Total - - - - -	855	751

Increase of 1890 over 1889 - - 104 cases.

There, in 1890, were three appeals, namely, one from a conviction and two from decisions in civil matters. All three were dismissed.

GAOL.

Three hundred and fourteen persons were committed to gaol in 1890 as against 252 in 1889. Of these three were sentenced to five years or more and 13 to one year or more, the remainder being sentenced to less than one year.

In 1890, as in 1889, there were no deaths in the prison.

MAURITIUS.
—
SEYCHELLES.

HOSPITAL.

The number of persons treated in the public hospital in 1890 was 170 against 259 in 1889, showing a decrease of 89.

There were as follows:—

—	1889.	1890.
Paupers	60	43
Prisoners	93	50
Paying patients	106	77
Total	259	170

Of these 170 persons—

113 were discharged as cured.
30 „ „ relieved.
5 „ „ unrelieved.
9 died.
13 were still in hospital at the end of the year.

The principal ailments were anæmia, dysentery, hernia, rheumatism, phthisis, syphilis, vulnus, ulcers, veruls.

There were 6,349 applications for medicines at the public dispensary in 1890 against 5,365 in 1889.

The vaccinations by the Government medical officers in 1890 were 311 at Mahé and 61 in the Praslin ward, in all 372.

Leprosy Camp.

There were seven lepers maintained in the leper camp on Curieuse Island during the year, namely:—

Males	5
Females	2
Total	7

Pauper Camp.

Twelve aged paupers were maintained in the pauper camp at Curieuse during the year.

Lunacy.

There were nine lunatics maintained at the expense of the Seychelles Government at the Mauritius Lunatic Asylum during the year. Of these four were declared lunatics during the year.

ECCLESIASTICAL.

As stated in previous reports, the number of adherents of the two Churches supported by the Government in Seychelles is not shown separately from those of other Dependencies in the returns of the census taken in 1881.

The following number of ministers were employed in 1890:—

Church of England.

Civil chaplain	1
Minister for Mahé	1
Minister for Praslin	1
Evangelists and catechists	10
Total	13

Roman Catholic.

Priests	13
Lay Brothers of the Capucin order	4
Marists Brothers	7
Sisters of St. Joseph	45
Total	69

CHURCHES AND CHAPELS.

Church of England.

Churches	3
Chapels	8
Total	11

Roman Catholics.

Churches	12
Chapels	6
Total	18

POLICE.

The strength of the police force in 1890 was 46 of all ranks, as in 1889, namely:—

1 chief officer of police,
1 sergeant-major,
2 sergeants,
3 corporals,
10 first-class constables,
10 second-class constables,
14 third-class constables,
5 boatmen constables,

distributed over nine stations, including the central station at Victoria.

The Police Reward Fund showed a balance of Rs. 819.27 on the 31st December 1890.

Detection and Repression of Crimes, &c.

The number of persons prosecuted by the police in 1890 was 673 against 512 in 1889. Of these 462 were convicted and 211 were acquitted.

The value of property alleged to have been stolen in 1890 was Rs. 4,893.89 against Rs. 373 in 1889, and the value of property recovered Rs. 327.28 against Rs. 210.56.

The total amount of fines inflicted in police prosecutions in 1890 was Rs. 4,906.50 as against Rs. 2,926 in 1889.

Liberated Africans and Labourers generally.

No liberated Africans or immigrants of any kind were introduced during 1890.

It results from the report of the inspector of liberated Africans that 300 Africans were employed as labourers on estates as against 363 in 1889. Of these 92 were under written and 208 under verbal contract.

The number of labourers of all classes reported as employed on wages on estates in 1890 is 718 against 895 in 1889. Of these 95 were under written and 613 under verbal contract.

It results from the inspector's report that 85 persons were registered for employment on the share system in 1890 as against 173 in 1889, and that of these 173, 62 were Africans and 23 Creoles.

From the same report it results that the total wages earned by labourers of all classes on estates in 1890 was Rs. 76 786.00 against Rs. 72,005.70 in 1889, and that the total of forfeitures for absences, &c. was Rs. 7,023.71 against Rs. 10,770.76 in 1889.

The number of marriages of liberated Africans is reported to have been 20 as against 30 in 1889, and of offspring of Africans, 16 against 14 in 1889.

Eighty-one births among liberated Africans are reported in 1890 as against 51 in 1889, and 19 deaths against 21 in 1889.

Ninety-four liberated Africans were convicted on police prosecutions for various offences in 1890 as against 87 in 1889.

LEGISLATION.

The following Ordinances were passed by the Legislative Council in 1890:—

1. "An Ordinance to reorganise the Board of Health for the "Seychelles Islands and to regulate its powers and duties."

2. "An Ordinance to amend the law concerning penalties."

3. "An Ordinance to confer certain powers upon the Registrar "of the Court of Seychelles."

4. "An Ordinance to confer upon the Conservator of Mortgages "for the Seychelles Islands the custody of all papers, title deeds, "maps, plans, minutes, registers and memoranda of survey relating "to immovable property situate in these Islands."

5. "An Ordinance to empower the Administrator in Executive "Council to fix rates chargeable for postage and post office money "orders."

6. "An Ordinance to amend Mauritius Proclamation No. 36 of "1877 extending to the Seychelles Islands with certain modifica"tions Ordinance No. 19 of 1868 (Mauritius), which is "An "Ordinance to repeal certain provisions of the Code of Civil Pro"cedure, of the Civil Code, and of the Colonial Ordinances relative "to sales of immovable properties.'"

7. "An Ordinance to remove doubts as to the extent of the "powers of the Court of Seychelles under Mauritius Ordinance 16 "of 1869."

8. "An Ordinance to invest the Conservator of Mortgages of the "Seychelles with the powers and duties of Receiver of Registration "Dues."

9 "An Ordinance to provide for the summary punishment of "persons committing perjury in connexion with proceedings "before the Court of Seychelles."

10. "An Ordinance to repeal certain clauses of Regulation 3 of "1872 of the Seychelles Board of Civil Commissioners (for the "establishment of a public hospital at Port Victoria) and to make "other provision in lieu thereof."

11. "An Ordinance to compel notaries practising in the Sey"chelles Islands to keep double minutes of deeds drawn up by "them, and to make better provision for the custody of such "minutes and for the transcription of certain deeds."

12. "An Ordinance to empower the Court of Seychelles to issue "injunctions in certain cases, and to grant provisional execution "pending decision on appeal."

13. "An Ordinance to prohibit the keeping of pigs in the town "of Victoria within certain limits."

Mauritius.

Seychelles.

PUBLIC WORKS.

Extension of Roads and Bridges.

North-east Road.—200 feet of road were opened on a width of 16 feet. The bridge on Caiman river was pulled down and rebuilt in masonry with parapets 3 feet high on each side.

Forêt Noire Road.—1,560 feet of road were made on a width of 8 feet.

South Road.—540 feet of road were made with a deep cutting across the mountain and side walls in some places from 3 to 4 feet high

Maintenance of Roads and Bridges.—North-west Bay and Bel-ombre roads were cleaned as well as roads from Barbaron to Port Gland, Anse Boileau to Takamaka 39,600 feet. Anse la Mouche to Anse Royale 10,500 feet. Pointe Larne to Petit Paris 17,000 feet.

Repairs were made to bridges at Praslin and La Digne, and six bridges were repaired in town.

CROWN LANDS.

The boundaries of several portions of the Crown lands were settled during this year by the Government surveyor.

The plantations of young timber trees were increased during the year.

The following is the Conservator's valuation of the revenue of the various Crown lands and of the current expenditure during the year:

Revenue of Crown Lands for the Year 1890.

Name of Property.	Revenue.	
	Rs.	ct.
Messageries Coal Wharf	600	00
Admiralty Wharf	200	00
Fibre Factory	400	00
Ilot on Reefs	50	00
Ilot Hodoul	250	00
Capucin Land	400	00
Félicité Island	1,960	00
Church Missionary Society	00	50
Ile Récifs	666	00
Mamelles Island	50	00
Ile ronde of Praslin	4	00
Right end side of the Pier	40	00
Land alongside the Pier	160	00
Sea frontage alongside the Pier	160	00
Land between Factory and Sea	50	00
Amirantes Islands	399	83
Plaisance	40	00
Long Island	179	50
Coco De Mer Ravine	85	00
Curieuse Island	1,771	55
Anse Lagio	15	00
Aldabra Island	1,783	82
Total	9,265	20

The expenditure for Crown lands for 1890 is stated as follow:—

	Rs.	ct.
Plaisance Guardian	120	00
Long Island Guardian	19	00
Coco De Mer Ravine Guardian	144	00
Curieuse Island Guardian and labourers	624	00
Conservator of Crown Lands	1,200	00
Forest Ranger	360	00
Total	2,640	00

R. M. BROWN,
Acting Administrator.

MAURITIUS.

RODRIGUES.

No. 2.

REPORT ON THE RODRIGUES BLUE BOOK FOR THE YEAR 1889.

Civil Commissioner's Office, Rodrigues,
March 28, 1890.

SIR,

I HAVE the honour to transmit herewith the Blue Book report on this island for the year 1889.

I have, &c.
(Signed) J. CLAN. O'HALLORAN,
Civil Commissioner and
Police Magistrate.

The Hon.
The Colonial Secretary,
Mauritius.

I.—TAXATION.

The only change made in the taxation of the island during the past year was the reduction from 1st January 1889 of the dog tax from Rs. 2.50 to Rs. 1.50; but by Ordinance No. 43 of 1888 a surtax of 5 per cent. was levied on the usual tax on horses and dogs and by Ordinance No. 41 of 1888 a stamp of four cents was imposed on all receipts for Rs. 10 and upwards during the year 1889.

II.—REVENUE AND EXPENDITURE.

	Rs.	c.
The revenue of 1889, exclusive of Customs collected in Mauritius, was - - - -	5,297	52
Showing a decrease of -	5,071	74
On the revenue of 1888, which was -	10,369	26
The expenditure of 1889, exclusive of payments made in Mauritius, was - - - -	18,421	58
Showing a decrease of - -	1,184	74
As compared with expenditure of 1888, which amounted to - -	19,606	32

The principal heads of revenue were land rent, pasturage, and licenses. Land rent was reduced to Rs. 2, pasturage for goats to 15c., and dog tax to Rs. 1.25.

The rate of revenue per head of population in 1889 was Rs. 2.67 and the rate of expenditure Rs. 9.31 against Rs. 5.38 and Rs. 10.19 in 1888.

III.—JUDICIAL STATISTICS.

Offences for which prosecutions took place in 1889 numbered 57, being an increase of eight on the year 1888. There was an increase of five in the number of persons brought before the Courts in 1889 over the previous year. Of 49 persons brought before the police court on various charges, 34 were convicted, while seven out of nine charged before the Stipendiary Court were sentenced. The offenders comprised two Americans, one European, 52 Creoles (of Mauritius and Rodrigues), two Indians, and one Malagasy.

The most serious charges were two cases of larceny, two of possession of stolen property, one of swindling, and two of wounds and blows.

The number of civil cases amounted to 69 as against 143 in 1888.

IV.—PRISONS.

Twenty-one prisoners were committed during 1889 as compared with 31 in 1888.

—	1888.	1889.
For non-payment of fines and costs - -	3	3

The chief officer of police is the keeper of the gaol, the constables acting as prison guards.

No offences were committed in the prison and no escapes took place in 1889.

V.—POST OFFICE.

The revenue derived from this source during 1889 stands at Rs. 203.26, being an increase of Rs. 91.20 on year 1888.

Money orders drawn on Mauritius amounted to Rs. 17,644.95, being an increase of Rs. 9,866.57 on previous year. Orders were drawn on Rodrigues to the value of Rs. 711.00, a decrease of Rs. 196.93 over year 1888.

MAURITIUS.

RODRIGUES.

In 1889 there was a decrease of 404 letters, and an increase of 572 newspapers received at the Post Office, and an increase of 499 letters despatched as compared with 1888.

VI.—PUBLIC WORKS.

Rs. 1446.43 was expended on works (including sanitary) and buildings, versus Rs. 1569.55 in 1888. The following were the principal works:—

A wooden building was purchased for Rs. 500 to serve as a police station, and Rs. 235.00 were expended in converting the old police station and lock-up into a prison.

The roofs of the quarters of the Government Medical Officer and the police station, Mont Lubin, were recovered with latanier leaves, as well as a new kitchen erected at the latter place at a total cost of Rs. 108.00, while a new kitchen at St. Gabriel School cost Rs. 35.00.

A stone jetty was built at a cost of Rs. 82.50 to replace the old wooden one, which was rotten. The roads were repaired as required at a cost of Rs. 408.00.

Repairs to boats and Government buildings, excluding painting, were executed as required at a cost of Rs. 313.99 against Rs. 119.00 in 1888. Painting public buildings and boats cost Rs. 57.00.

VII—POPULATION AND VITAL STATISTICS.

The population of this Dependency on the 31st December 1889 was 1,978, an increase of 54 souls.

Population on 31st December 1888			1,924

Population on 31st December 1889			1,978

Estimation of numbers employed at various callings and those unemployed:—

Government servants	19
Traders	9
Agriculturists	1,000
Artizans	13
Fishermen	300
Other callings	150
Unemployed, aged people, and young children	487
	1,978

There were 23 marriages and one still-birth in 1889 against 23 marriages and one still-birth in 1888.

There was an increase of one in the mortality of 1889 over 1888, 23 being infants and young children under six years of age.

One marriage *in articulo mortis* was celebrated.

VIII.—LEGISLATION.

During 1889 no special laws were enacted by the Legislative Council of Mauritius for this island, but Ordinance No. 43 of 1888, for levying during the year 1889 a surtax of 5 per cent. on animals and licenses, changing to a fixed duty the ad valorem duty on salt and matches, and increasing by 5 per cent. Custom duty on all goods; and Ordinance 41 of 1888 imposing a stamp of 4 cents on all receipts for Rs. 10 and upwards was (made) applicable to this island.

Ordinance No. 34 of 1888 to exempt from Custom dues tobacco grown in Rodrigues.

Ordinance No. 35 of 1888.—To reduce certain dues payable in the Island of Rodrigues.

Ordinance No. 36 of 1888.—To empower the Civil Commissioner to accept payment in kind of taxes and other sums due to the Crown.

Ordinance No. 39 of 1888.—To empower the Governor to order the removal and detention in the Island of Rodrigues of prisoners detained in the Central Prison, -were passed by the Council of Government of Mauritius on 13th December 1888 and came into force in this island in January 1889.

Ordinance No. 5 of 1889 was enacted to confer powers on the Commissioners sent to hold an inquiry regarding charges brought against the Civil Commissioner of Rodrigues and Capt. Cadier (master of the ship subsidised by the Government for transport of mails) by the Hon. E. Antelme, one of the elected members of the Council of Government.

IX.—EDUCATION.

The Government schools at Port Mathurin and St. Gabriel were the only schools existing during the year.

At the Port Mathurin School the average number on roll was 58 and average attendance 49, against 54 and 47 in 1888.

At the St. Gabriel School the roll number was 87 and average attendance 58, versus 60 and 40 in 1888.

The cost of the Port Mathurin School was Rs. 2,095.92, and school fees received Rs. 98.25, while in 1888 it was Rs. 1,995.96 and fees received Rs. 97.52.

The St. Gabriel School cost Rs. 1,140.00, the same amount as in 1888. No fees are charged at this school.

The annual cost to Government of each pupil at both schools was Rs. 21.63 against Rs. 36.65 in 1888.

On December 19th, 1889, the scholars of the Port Mathurin School were examined at special request of the Civil Commissioner by the Rev. Père Jauny, curé of Rodrigues, and Mr. Darius Julien, Government schoolmaster of Mauritius, on leave in this island. 36 pupils were presented for examination, of whom 18 passed.

On the 21st December the examination of the St. Gabriel School took place, the examiners being the same as for Port Mathurin School. Of 45 pupils who were examined, 32 passed. The subjects of examination in both schools were reading, dictation, composition (in French and English), geography, grammar, arithmetic, and writing.

X.—ESTABLISHMENTS.

The cost of establishments in 1889 was Rs. 14,573.60 against Rs. 14,702.34 in 1888, being a decrease of Rs. 128.74, caused by the departure of the Rev. F. MacCarthy, Roman Catholic chaplain, on 31st October, and the payment of only half salary to his successor, the Rev. H. J. Jauny, from 24th November to the 15th December 1889.

XI.—EXPORTS AND IMPORTS.

The estimated value of exports for 1889 was Rs. 62,696.50, against Rs. 46,333 in 1888; and imports Rs. 134,806.50 as compared with Rs. 53,420.20 in the previous year.

Rate of export per head of population was Rs. 31.69 versus 24.08 in 1888.

Rate of import per head of population was Rs. 68.15 versus 27.76 in 1888.

XII.—METEOROLOGICAL OBSERVATIONS.

Daily observations of the barometer, thermometer, winds and weather were made by Mr. C. Mason, Chief Officer of Police, who transmitted them to the Director of the Observatory at Mauritius.

The highest temperature (indoors) was 88.7 on the 17th Februatry 1889, and the lowest 68.9 on the 6th July 1889.

The average daily rainfall was one-eighth of an inch, the greatest fall was 4½ inches on the 11th March 1889.

No hurricane visited the island during the year.

XIII.—GOVERNMENT HOSPITAL AND DISPENSARY.

Eight in-patients and 3,012 out-patients were treated at the hospital and dispensary during 1889. The prevailing diseases were burns, hernia, chicken-pox, alcoholism, rheumatism, and retention of urine.

There was a decrease of 15 in-patients at the hospital, and an increase of 357 out-patients at the dispensary during 1889 as compared with 1888.

The expenditure on account of hospital was Rs. 2,708.98 and receipts Rs. 11.50.

There was an increase of Rs. 40.66 in the total cost of hospital in 1889 as compared with 1888, and a decrease of Rs. 35.13 in the receipts for the same period.

The cost to Government of each patient in hospital and dispensary was in 1889 Rs. 0.89 against Rs. 1.00, in 1888. This is exclusive of cost of medicines.

The Government Medical Officer visited the dispensary at Mount Lubin once a week during the year.

XIV.—GENERAL REMARKS.

During the first few months of 1889 the rainfall was excessive; but from August to the end of the year a severe drought existed, the consequence of which was the failure of the usual food of the mountaineers.

The threatened famine was reported by the Civil Commissioner to the Governor of Mauritius, who sent 600 bags of rice for the relief of the island.

The sanitary condition of the island was good.

No men-of-war and no vessels beyond the one subsidised by Government for "conveyance of mails" and a small private schooner visited the Dependency during 1889.

On the 21st October the Rodrigues Inquiry Commission arrived and commenced their labours on the following day. They left on the 12th November 1889.

On the 31st October the Roman Catholic curé was transferred to Mauritius, and in December his successor, the Rev. H. J. Jauny, arrived.

J. CLAN. O'HALLORAN,
Civil Commissioner and
Police Magistrate.

Island of Rodrigues,
March 26, 1890.

MAURITIUS.

RODRIGUES.

No. 3.

Governor SIR C. C. LEES to LORD KNUTSFORD.

Government House, Mauritius,
January 15, 1892.

MY LORD,

I HAVE the honour to transmit to your Lordship the report on the Rodrigues Blue Book by Mr. Colin, the Acting Magistrate, for the year 1890.

2. The report is accompanied by a report on the financial statements as directed.

3. I regret that I have not yet been able to transmit to your Lordship the Seychelles Blue Book Reports for 1889 and 1890*, but I have called the attention of both Mr. Griffith and Mr. Brown to the omission in furnishing the reports for these years.

I have, &c
C. C. LEES,
Governor.

The Right Hon.
Lord Knutsford, G.C.M.G.,
&c. &c. &c.

The ACTING MAGISTRATE of RODRIGUES to the COLONIAL SECRETARY.

Rodrigues Magistracy,
November 3, 1891.

SIR,

I HAVE the honour to transmit herewith my Annual Report for 1890, and regret not to have been able to send it sooner.

I have, &c.
B. H. COLIN,
Acting Magistrate.

The Hon.
The Colonial Secretary,
Mauritius.

REPORT on the RODRIGUES BLUE BOOK for 1890.

TAXATION.

No alteration was made in the taxation of this island during the year 1890.

---

* *See* No. 1.

REVENUE AND EXPENDITURE.

	Rs.	c.
The revenue of 1890, exclusive of Customs, collected in Mauritius was - - - -	6,766	72
Showing a decrease of - -	1,467	91
As compared with the revenue of 1889, which was - - -	8,234	63
The expenditure of 1890 under estimates and special votes (without including payments made in Mauritius) was - - -	20,846	04
Showing an increase of - -	527	77
On the expenditure of 1889, which amounted to - - -	20,318	27

The principal heads of revenue were land sales, land rent, pasturage fees, and sale of Government property.

The increase of expenses is to be attributed chiefly to the influenza which has prevailed at Rodrigues, to the sum which had to be paid for the continuation of St. Gabriel Church and to the extra expense incurred by having a new Roman Catholic priest at Rodrigues, *i.e.*, the Rev. Father Lefeuvre.

EXPORTS AND IMPORTS.

The exports, exclusive of specie, amounted to Rs. 63,852.65 in 1890 against Rs. 62,696.50 in the year 1889, showing an increase of Rs. 1,156.15 in the exportation of 1890.

The imports in 1890 are valued at Rs. 131,283.45 against Rs. 134,806.50 in 1889, showing a decrease of Rs. 3,523.05 in the importation of 1890.

The rate of export per head of population was Rs. 31.66 and a fraction in 1890, against Rs. 32.34 and a fraction in 1889.

The rate of import per head of population was Rs. 63.31 and a fraction in 1890, against Rs. 69.89 and a fraction in 1889.

SHIPPING.

POPULATION AND VITAL STATISTICS.

The population of this Dependency on the 31st December 1890 was 2,010 souls, against 1,943 on the 31st December 1889, showing an increase of 67 souls.

NOTE.—The number given by Mr. O'Halloran in his report for 1889 was but an approximate one.

MAURITIUS.

RODRIGUES.

The census of the island having been taken since, I have been able to obtain correct numbers.

Population on the 31st December 1889 -			1,943
Total births in 1890 - -	131		
„ arrivals in 1890 - -	54 =	185	
Less deaths in 1890 - - -	80		
„ departures in 1890 - -	38 =	118	
Increase in 1890 - - - -			67
Population on the 31st December 1890 -			2,010

Classification showing the number of those employed at various callings and those unemployed (year 1890).

Government servants - - -	21
Traders - - - - -	10
Agriculturists - - - -	400
Artizans - - - - -	18
Fishermen - - - - -	200
Other callings - - - -	14
Unemployed, aged people and young children under the age of 16 - - -	1,347
Total - -	2,010

The number of births in 1890 amounted to 131 against 91 in the preceding year, showing an increase of 40 births. There were 3 still-births in 1890 against 1 in 1889; 44 marriages were celebrated in 1890 against 23 in 1889; 7 marriages *in articulo mortis* against 1 in 1889.

The number of deaths amounted to 80 in 1890 against 33 in 1889, showing an increase of 47 in the mortality of 1890. This great mortality is to be attributed to the "influenza."

Classification of Religious Beliefs.

Roman Catholics - - - - -	1,930
Protestants - - - -	66
Musulmans - - - -	5
Hindoos - - -	7
Pagans - - - -	2
Total - -	2,010

MAURITIUS.

RODRIGUES.

PUBLIC HOSPITAL AND DISPENSARY.

—	1889.	1890.
In-patients treated at the hospital	8	67
Out-patients treated at the dispensary	3,012	3,549
Deaths in the hospital	1	7

The prevailing diseases throughout the island were :—Worms, influenza, rheumatism, throat complaints, a few cases of chicken-pox, bronchitis, uterine complaints.

The diseases treated at the hospital were:—Uterine complaints 7, bruises 1, phthisis 2, influenza 46, liver complaints 2, sore throat 1, foot diseases 1, ear diseases, 2, apoplexy 1, inflammation of the intestines 1, anthrax 1, lumbago 1, general debility due to old age 1 ; total, 67.

—	1889.		1890.	
	Rs.	c.	Rs.	c.
Receipts on account of in-patients	11	50	13	50
Total expenditure on account of hospital	2,708	98	2,976	12
Cost of each patient in hospital and dispensary.	0	89	0	82

The rent of the hospital has been paid in Mauritius, and the medicines for the dispensary were sent from Mauritius—I must state here that several items of expenditure for the hospital, amounting to Rs. 87.73, and vaccination fees, amounting to Rs. 112.50, incurred in 1890 have not been included in the above sum of Rs. 2,976.12, the said items having been paid only in 1891.

POOR LAW COMMISSION.

—		1889.	1890.
Paupers provided for by Government.	Males	13	13
	Females	5	6

Each pauper received 500 grams of rice per diem, and an entire suit of striped drill at the end of the year. The rice and suit were sent from Mauritius. The sum of Rs. 284.35 for relief of poor during the influenza and for their funeral are included in the expenditure on account of the hospital.

ECCLESIASTICAL.

The number of adherents to the different creeds is given under the heading "Population and Vital Statistics." The Roman Catholic Church in the island is supported by Government, and the Church of England by the London Missionary Society.

There are two Roman Catholic priests at Rodrigues, both are paid by Government. The Reverend F. Jauny receives a salary of Rs. 2,000 per annum, and the Reverend F. Lefeuvre a salary of Rs. 1,000 per annum.

Mr. Ed. Gellé, the clerk of the magistrate acts as Catechist for the Church of England; he is paid by the London Missionary Society.

The two Roman Catholic chapels at Rodrigues are *The Sacred Heart* at Port Mathurin, and *St. Gabriel* on the mountain Gabriel.

The expenses incurred by the Government in 1890 for the continuation of the St. Gabriel chapel amounted to Rs. 1,000.00 (grant-in-aid fund).

Mr. Gellé performs his religious ceremonies in the Government school of Port Mathurin.

EDUCATION.

There were only two schools in operation at Rodrigues in 1890, *i.e.*, Port Mathurin's and St. Gabriel's schools. At Port Mathurin's school the number of pupils present at any time during the year 1890 amounted to 63 against 65 in 1889. The average number on roll was 59 against 58. The average attendance 46 against 49.

At St. Gabriel's school the number of pupils present at any time during 1890 amounted to 106 against 87 in 1889. The average number on roll was 106 against 87. The average attendance 73 against 58.

The cost of Port Mathurin's school was Rs. 2,095.92 against Rs. 2,095.92 in 1889. The school fees received in 1890 amounted to Rs. 103.75 and in 1889 to Rs. 98.25.

The cost of St. Gabriel's school was Rs. 1,140.00 in 1890 and Rs. 1,140.00 in 1889. No fees are charged at this school.

The annual cost to Government of each pupil at both schools was Rs. 18.41 and a fraction in 1890, against Rs. 21.63 in the preceding year.

POST OFFICE.

The revenue collected in 1890 was Rs. 158.64 against Rs. 203.58 in 1889.

MAURITIUS.
—
RODRIGUES.
—

The letters and newspapers which passed through the office were as follows:—

	Letters received	Newspapers received
1889	978	1,009.
1890	826	327.

	Letters despatched
1889	1,382.
1890	1,178.

Money orders drawn on Mauritius amounted to Rs. 15,826.46 in 1890 and to Rs. 17,644.95 in the previous year. Orders were drawn on Rodrigues to the value of Rs. 373.79 in 1890 against Rs. 711.00 in the year 1889.

JUDICIAL STATISTICS.

Police Court, Criminal Side.

Number of informations filed - - 48 in 1889—41 in 1890.
" persons tried - - 50 " —46 "
" persons against whom cases given up - - *nil* " — 5 "
" persons convicted - - 35 " —35 "
" persons acquitted - - 15 " — 6 "

Police Court, Civil Side.

Number of plaints entered - - 69 in 1889—141 in 1890.
" plaints adjudged upon - 55 " —134 "
" plaints withdrawn or struck out - - - 9 " — 7 "
" judgments for plaintiffs - 55 " —128 "
" judgments nonsuited or dismissed - - - 5 " — 6 "

There were two applications for search warrants in 1890 against five in 1889. One application for rectification of an act of birth, and one for the appointment of a guardian *ad hoc* for the marriage of a minor in 1890.

Stipendiary.

Number of informations filed - 9 in 1889—10 in 1890.
" cases tried - - 7 " — 9 "
" cases given up - 2 " — 1 "
" convictions - - 7 " — 7 "
" acquittals - - — " — 2 "

The number of engagements amounted to four in 1890 against three in 1889, and the number of discharges to four in 1890 against three in 1889.

The total number of cases of all jurisdictions entered before the District and Stipendiary Courts during 1889 and 1890 stands as follows:—

Criminal - 48 in 1889— 41 in 1890.
Civil - - 69 „ —141 „
Stipendiary - 9 „ — 10 „

Showing a decrease of 7 cases in criminal matters, an increase of 72 civil cases, and an increase of 1 stipendiary case.

LEGISLATION.

By Ordinance 16 of 1890 the titles of Police Magistrate and Civil Commissioner of Rodrigues were abolished, the holder of the appointment to be styled "Magistrate of Rodrigues." Ordinances *6, 14, 18, 22, 26, and 31 of 1890, though not specially enacted for this island, are applicable to it.

GAOLS.

Twenty-four prisoners were committed during 1890 against 21 in 1889.

---

* Subsequent to the enactment of Ordinance 6 of 1890, Proclamation 20 of 1891 extended the delay for taking the census at Rodrigues to the 3rd May 1891.

The chief officer of police is the keeper of the gaol, and the constables act as prison guards.

No offences were committed in the prison and no escapes took place in the years 1889 and 1890.

The prisoners' extra rations amounted to Rs. 20.12. Rice and salt were sent from Mauritius.

POLICE AND FOREST RANGER.

The police force of Rodrigues is composed of a chief officer of police, of one police corporal, of one first-class Creole constable, of one first-class Indian constable, of two second-class Indian constables. These constables act also as prison guards.

There is but one forest ranger for the whole island; he acts also as special constable. There were eleven reports made against the members of the police in 1890 with the following results:—

Neglect of duty	Cautioned. Cautioned. Cautioned. Rs. 5 fine.
Disobedience of orders	Six hours' extra duty. Cautioned. Six hours' extra duty. Cautioned. Six hours' extra duty.
Drunk when on duty	Rs. 2.50 fine.
Insubordination	Rs. 5 fine and two days' cells.

The expenses incurred in 1890 for the police force and forest ranger amounted to Rs. 4,179.84 against Rs. 4,174.20 in 1889.

The chief officer of police, the corporal, and constables of police and the forest ranger received each two serge suits, three pairs of drill trousers, four white shirts, three pairs of boots, and two caps in 1890; the same in 1889. These things were sent from Mauritius.

The allowances paid to the police and forest ranger for rations amounted to Rs. 481.80 in 1890 and to Rs. 481.80 in the preceding year.

ESTABLISHMENTS.

The cost of establishments in 1890 was Rs. 15,463.80 and Rs. 14,729.60 in 1889—showing an increase of Rs. 734.20 as compared with 1889. This difference is due to the Roman Catholic priest, Father McCarthy, being paid in 1889 part of his salary in Mauritius, and to the arrival at Rodrigues of the Rev. F. Lefeuvre, a second Roman Catholic priest.

METEOROLOGICAL OBSERVATIONS.

Daily observations of the barometer and thermometer were made by the Chief Officer of Police, Mr. Mason, who transmitted them to the Director of the Royal Alfred Observatory at Mauritius.

The highest temperature (indoors) was on the 10th January 1890. Thermometer, 88.1. Barometer, 30.170 at 3 p.m.

The lowest temperature (indoors) was on the 25th July 1890. Thermometer, 67.0. Barometer, 30.270 at 9 a.m.

During the month of June 1890, which was the month in which there were the heaviest rainfalls, the rain-gauge marked 1,279 lines, which is equivalent to a little more than 12¾ inches. From the 19th at 9 a.m. to the 20th June at 9 a.m. a little more than 5¼ inches of rain had fallen during these 24 hours.

No hurricane visited the island during the year.

REGISTRATION.

There were 27 documents registered at Rodrigues in 1890 against 24 in 1889. The revenue derived thereby amounted to Rs. 13.50 in 1890 against Rs. 12.00 in 1889, showing an increase of Rs. 1.50 in favour of the year 1890.

FORESTS AND CROWN LANDS.

In 1890 there were 512 acres of land leased to agriculturists, from one to four acres, at Rs. 2 per acre, and 460 acres in 1889, showing an increase of 52 acres on the previous year.

The same number of fishing posts, island and town lots (on Pas Géométriques for boat shed), were leased in 1890 as in 1889, and all. with the exception of Gombrany island, fetched the same price during these two years, *i.e.*, 42 fishing posts at Rs. 5 each, Hermitage island Rs. 5, Gombrany island Rs. 15 in 1889 and Rs. 16 in 1890, Ile-aux-chats at Rs. 10, Ile-aux-fous Rs. 5, and four town lots at Rs. 5 each.

The number of Government lessees in 1890 was 258 against 267 in 1889.

The revenue actually received under the heading of land rent amounted to Rs. 1,025.30 in 1890 against Rs. 1,262.50 in 1889.

The pasturage dues brought a revenue of Rs. 554.30 in 1890 against Rs. 1,159.80 in 1889.

The pasturage revenue for 1889 and 1890 is exclusive of Rs. 2,205.75 due by Mr. James Martin on the 31st December 1890.

Twenty-one acres and four lots were sold for Rs. 604.25 in the year 1890 against one acre sold for Rs. 30 in 1889.

The amount derived from forest produce amounted to Rs. 161.61 in 1890 against Rs. 147.75 in 1889.

No land was bought by Government in 1889 and 1890.

The outstanding land rent for 1890 amounted to Rs. 231 on the 31st December 1890 against Rs. 00 in 1890.

There was still a balance of Rs. 381.30 due for pasturage fees on the 31st December 1890. The forest ranger was in charge of the forest branch during the years 1889 and 1890.

PUBLIC WORKS.

Rs. 979.59 were expended on works (including sanitary) and buildings in 1890, against Rs. 1,446.43 in 1889. The following were the principal works, *i.e.*, completing a stone wall round the prison; adding a verandah to St. Gabriel school; re-roofing Government House. In the above sum of Rs. 979.59 I have not included the sum of Rs. 20 for repairs of boats, and the sum of Rs. 107.75 for cleaning Mountain Reserves lines.

GENERAL REMARKS.

The crop was very fair in 1890, unfortunately towards the end of the year an epidemic of influenza prevailed here with great violence, and prevented the cultivators from continuing their plantations.

The arrears of payments may be chiefly attributed to that fact.

As many as 46 persons died from the influenza, and 36 from other diseases.

Mr. de La Peyre arrived at Rodrigues on the 1st September 1890, and he took over the administration of the island on the 13th of that month, date of the departure of Mr. O'Halloran for Mauritius.

On the 28th November 1890 the title of Civil Commissioner and Police Magistrate was abolished, and the officer in charge of this island to be styled Magistrate of Rodrigues.

On the 12th December Mr. B. H. Colin (the Acting Magistrate) arrived at Rodrigues and relieved Mr. de La Peyre. No man-of-war visited the island during the year 1890.

B. H. COLIN,
Acting Magistrate of Rodrigues.

Rodrigues Magistracy,
5th November 1891.

REPORT BY THE AUDITOR GENERAL.

THE HON. THE COLONIAL SECRETARY,

THE accounts of the revenue and expenditure of Rodrigues kept in the audit office are extracted from the quarterly accounts sent by the magistrate, but our figures as regards the revenue and matters of account for 1890 do not agree with those given by the magistrate in his Blue Book Report.

According to the audit books the revenue collected at Rodrigues in 1890 was Rs. 6,875.19, and the total of the matters of account was Rs. 17,245.06, making the total receipts in 1890 Rs. 24,120.25.

The magistrate gives the revenue as Rs. 6,766.72, and matters of accounts as Rs. 18,152.35, or a total receipt of Rs. 24,919.07.

As regards the expenditure, both real and matters of account, the audit books give the same total as stated by the magistrate, but there is again a difference in the items. The audit books give the real expenditure as Rs. 20,817.04, and matters of account as Rs. 438.79, making a total of Rs. 21,255.83.

The magistrate give Rs. 20,846.04 as the real expenditure, and Rs. 409.79 as matters of account, making the same total of Rs. 21,255.83.

I consider that the audit figures should be accepted, because the following statement shows, I think, that they are correct:—

	Rs.	c.
Balance in chest on 31st December 1889, as per magistrate's return - -	14,687	99
Receipts in 1890 as per audit books - -	24,120	25
	38,808	24
Deduct disbursements - - -	21,255	83
Balance - - -	17,552	41

This balance is made up of the following items:—

	Rs.	c.
Deficit of Mr. O'Halloran - - -	5,390	00
Remitted to Mauritius on 24th December 1890 - - - - -	8,500	00
Balance in chest on 31st December 1890, as per magistrate's return - - -	3,662	41
Total - -	17,552	41

I annex a statement of the revenue and expenditure of Rodrigues for 1890 showing in parallel columns the figures as given by the magistrate and by the audit office.

THOS. ELLIOTT,
Auditor General.

MAURITIUS.

ALDABRA ISLAND.

No. 4.

Governor SIR C. C. LEES to LORD KNUTSFORD.

Government House, Mauritius,
August 24, 1891.

MY LORD,

I BEG to transmit, for your Lordship's information, the following Despatch from the Administrator covering an interesting report from Mr. James Spurs, the lessee of Aldabra Island.

I should be glad if the suggestion made by Mr. Griffith in the last paragraph of his Despatch might be adopted.

I have, &c.
(Signed) C. C. LEES,
Governor.

The Right Hon.
Lord Knutsford, G.C.M.G.,
&c. &c. &c.

Government House, Seychelles,
August 14, 1891.

SIR,

IN my Despatch of the 3rd May 1890, I had the honour to inform your Excellency that I had asked Mr. Thomas James Spurs, the lessee of the Aldabra Islands, to furnish me with information as to the land tortoises and the resources of the islands generally.

2. Mr. Spurs, who has recently paid a visit to Mahé, was good enough to hand me before his redeparture for Aldabra on the 20th July a report, of which the enclosed is a copy, containing much valuable information concerning the group, but especially as to the island of Aldabra itself.

3. It is gratifying to learn that the fears which were entertained as to the possible extinction of the land tortoises owing to the occasional depredations on the part of crews of Arab dhows, small vessels from Bourbon, and the turtle fishermen from various places, have not been altogether realised; and that, in consequence of the natural difficulties which present themselves to persons who occasionally come in search of these interesting creatures, and the peculiarly seclusive nature of the animals themselves, there is improbability of their becoming extinct.

4. The views expressed by Mr. Spurs in the closing paragraphs as to the possible extinction of the shell-giving turtle throughout the various groups of islands under the Seychelles Government are not altogether shared by other persons competent to form an opinion on the subject. No doubt if legislative enactments could be effectively carried out much might be done to encourage and increase the growth of the carets or hawks-bill turtle; but legislation is one thing, and the enforcement of laws against fishermen on the open sea or in uninhabited places is another.

ALDABRA ISLAND.

5. There are one or two other items of interest relating to the Aldabra group omitted by Mr. Spurs which it may not be out of place here to mention.

The shallower waters around these islands contain large quantities of the beche-de-mer, or sea cucumber, the tripang of the Malays.

Mr. Spurs has taken with him some Chinese from Mahé who are experts at preparing this article of diet, which finds a large and ready sale in the Chinese markets.

Orchilla weed or rocella lichen of good quality is also found in no inconsiderable quantity on the islands, and doubtless the lessee will discover its collection and shipment to be a remunerative industry.

Mr. Spurs personally informed me that he expected to obtain annually upwards of 12,000 of the green turtle or edible turtle, the meat of which he proposes to dry and ship. Some idea of the value attaching to these islands may be obtained from the above particulars.

6. Although the rent at which the islands have been leased may be considered trifling, I think the Government are fortunate in having secured Mr. Spurs for a tenant; for it will be gathered from his report, which is interesting reading, that he is an observant man and a lover of Nature, nor do I think he is likely, to use an old and homely phrase, to kill the goose that lays the golden eggs by exhibiting that rapaciousness which has characterised the actions of others who have been there before him.

7. Your Excellency might perhaps be disposed to make the suggestion in transmitting Mr. Spurs's report to the Right Honourable the Secretary of State that it should be printed as an Appendix to the Annual Reports for 1889 and 1890 upon which I am engaged, or, if deemed of sufficient interest, as a separate miscellaneous Colonial paper.

I have, &c.
(Signed) T. RISELY GRIFFITH,
Administrator.

His Excellency
Sir Charles Cameron Lees, K.C.M.G.,
Governor and Commander-in-Chief,
Mauritius.

MAURITIUS.

ALDABRA ISLAND.

To His Honour T. RISELY GRIFFITH, Esq., Administrator of Seychelles Islands.

Port Victoria, Seychelles,
July 19, 1891.

SIR,

THE island of Aldabra, situated between 9° 24′ south latitude and 46°22′ east longitude from Greenwich, is the most westerly island of the group of that name composed of the islands of Aldabra, Astove, Cosmoledo, and Assumption.

By its extent, formation, flora, and fauna, Aldabra is, from a scientific point of view, more interesting than the sister islands. It is completely covered with trees and stunted shrubs, but very green. Its aspect is agreeable. Here and there mangrove trees of 55 feet in height show their thick foliage and adorn the landscape. It is undesirable and unnecessary to venture into these inextricable bushes, inhabited as they are by myriads of large mosquitoes, the sting of which makes one suffer.

The island is flat, and the land to the westward extends from north-west to nearly south east. Its length is 20 miles, the eastern part bending crescent shape to its two extremities and forming a basin in the interior, which is closed on the east side by three islands. These fragments are separated by four channels, of which only one gives access to the lagoon at low water. The narrowness of this channel, and the strong currents that are met with there, render it practicable only for steamers.

The geological formation of this group differs from those of other known fossil coral islands. This is owing to volcanic eruption, whilst the Farquhar Islands, Providence, the Amirantes, and the Chagos are the products of degradation or subsidence, as fully explained by the celebrated Darwin.

Yet in the Chagos group, at Diego Garcia, there is a basement of 100 feet in length to the south promontory of the island. The small island to the north-east, which has raised promontories, has not undergone the course of degradation. At Aldabra the raised promontories remain the same as they have been from their formation.

At first sight it seems extraordinary that an island essentially madreporic and so vast should not be interspersed with sandy plains; but throughout its extent it is a solid madreporic mass. When, however, it is known how strong the currents and surf are in these latitudes it is easily explained. In fact the sea bursting with great violence on the reef (which had not yet reached the level of the water) swept off all the calcareous detritus, throwing it into great depths.

This natural sweeping maintained a great cleanliness, and imparted to the different sorts of corals an extraordinary strength of growth, especially observable on the cliffs, which, corroded by the sea and disintegrated by the atmospheric agents, expose to view the mighty fossil coral masses of which they are formed. Hence the total absence of sandy fields.

MAURITIUS.

ALDABRA ISLAND.

In the other formations such as the Chagos group, when the reefs had attained their last stage of growth, which is nearly one foot above the strong ebb tides, the masses of sands and rolled-up corals were accumulated by the effect of the surges which met in an inverted shape on the point of the reefs. The latter must have remained stationary in order to be able to form a great deposit, or it might be that their movement of degradation was extremely slow.

In these conditions the sands and the rolled-up corals solidly aggregate, but then it is easy to give an account of their mode of formation, since it is by the infiltrations of lime across these masses that they solidify, and this solidification remains always some inches below the level of high water.

The most elevated promontory of solid masses at Aldabra is to be found on the west section of that island called Picard Island, and measuring 25 feet above the sea. Here andthere walls are to be found being the result of the degradation of the mass, or else proceeding from the decomposition of a great porite, which builds its haunt in a cylindrical or cisternlike form. It is only in the Aldabra group that I have seen this sort of coral in a fossil state, and I have been unable to find even one alive.

In decomposing this coral yields a yellow vegetable mould, which is of very great fertility. Unfortunately there is very little of it, so as to enable one to derive any profit or advantage.

In almost all the western part of Aldabra, from the south to the north, there is a reef of from 100 to 200 yards in width. In the eastern part the sea breaks almost everywhere against the coral reefs.

This reef has been formed on one side by the destruction of the cliff, and on the other by the growth of reefs from the side towards the open sea. Upon this reef and around the island the corals grow no more with that prodigious vigour which they possessed many ages ago. Upon the interior belt, however, of the island, formed of a slimy depth which the destruction of the solid masses has left, there are to be found paludal trees, which from a distance present a green border.

The hurricane that in May 1889 laid waste Farquhar Island has here overturned or blown down almost all the large trees. But, apart from the havoc made by this hurricane, there are other injuries of a nature more severe, which I attribute mainly to the mephitic exhalations of the soil. In many places small paludal forests are to be met with but all dead, of which some trees are still standing, while others have been apparently blown down by the wind. Their death seems to have been caused by violence. One thing which will, I think, lead you to accept these remarks of mine is the fact that your Honour was kind enough to read to me a paragraph from a report which Commander Needham, R.N., who visited Aldabra in H.M.S. "Reindeer," addressed to Vice Admiral Fremantle last year, in which he states having seen a remarkable occurrence, in the rising many times of a jet of vapour

MAURITIUS.

ALDABRA ISLAND.

of large quantity from the water which appeared around it to be depressed as in a whirlpool. The inference is that Aldabra is still liable to volcanic action.

It has been my duty to study at Aldabra some very curious climatic phenomena. In the months of December, January, and February some very strong squalls of rain are constantly formed towards the west and the north-west of the island, but as they gradually approach the land they disperse without a single drop of water falling upon the earth. The rain only falls when the squalls which have passed above the island are driven back by a contrary wind. This rain is then but local and of short duration.

On the 12th January of the present year (1891) the island was visited by a small cyclone, the barometer falling to 29°, which is a strong depression for our latitudes. During the 24 hours of the duration of the bad weather, nearly six inches of water fell. From the beginning of this epoch to the end of February the weather was very dry, the thermometer ranging in the shade, from 9 o'clock a.m. to 3 o'clock p.m., 92, 94, and 96 degrees Fahrenheit, and the barometer falling to 27 degrees. Whereas during my 18 years of abode at Diego Garcia, and five years at Farquhar Island, I have never seen the hot season bring about a barometric depression of more than six to eight-tenths of an inch.

The flora of Aldabra, compared with that of other fossil coral islands, is very rich; about 30 species and varieties of trees and shrubs exist, but very small, seeing that they grow on the corals where they hardly find means for growth.

Foremost among the fauna we find the big tortoises. These chelonians are still numerous. It is only on the section of the island called "Picard" that they have been destroyed by the harpooners, or "vareurs," who usually encamp at that place when they come to fish at Aldabra.

Upon my arrival there I caused to be taken 11 large tortoises on the principal section of the island and set them loose on the Picard Island, where I took measures to destroy the rats, which are the most redoubtable enemies of young tortoises. Thanks to this precaution the tortoises will multiply at the usual and proper rate.

On seeing a tortoise of Aldabra, which seems so heavy, one cannot believe that it is able to move about in the place where it lives. In fact it is impossible to meet with a place more liable to cause accidents and filled with more obstacles than this group. Yet this shapeless reptile opens its way everywhere with a comparatively remarkable skill and swiftness. One day I caused some of them to be placed in a natural ditch for the purpose of setting them loose on the morrow, but what was my astonishment a minute afterwards to see one in the plain running away as fast as its legs could carry it. With the help of its nails it succeeded in getting out of the ditch, a thing which I was far from believing it capable of doing. From May to September these beasts enter in the woods, where they conceal themselves in the most bushy places, and only come out in October, where they show themselves with the first rain. It is then that they couple together, and the female lays eggs in November, January, and February. Each time they lay from six to eight eggs.

The sea-birds are numerous. The grallics, or waders, are represented by several varieties, and a species of macrodactyl, which seem to have originally belonged to Aldabra. As they are neither flying nor swimming birds, they could not have come from Madagascar or Africa. The sparrows form a group of six families an varieties, after which we find a climber.

The sea-turtles are numerous throughout the whole group, but it is curious to note that the males alone inhabit the bay and the elevated grounds which are around the islands. It is the same in the Chagos Archipelago and the Amirantes, &c., &c. As soon as a female has attained the age of producing (which takes place usually at from 20 to 25 years) she disappears—whither, is a mystery no one knows But when they return and approach the coasts to lay eggs they are covered with barnacles which show a development of two or three weeks. As the turtles swim up on the surface of the water in deep places, these shells adhere to their carapace during the journey. I think the absence of the females from the coasts is due to the rather considerable number of the males. The females have more value and are more easily caught than the males, so much so that at the present time there are nearly 10 males to one female, while the proportion which is met with in bringing them up from the eggs is 10 females to one male. Hence the desperate fights between these animals during the breeding season, from which the sharks derive an immense advantage. The species of dog-fish which frequent these latitudes is too small to be able to eat a big turtle; it cuts off its fins, the head, and the tail. Once I caught one of 10 feet long, which had in the paunch three heads and the remainder of the fins of big turtles, and a young entire turtle which I estimated weighed nearly 30 pounds.

A female turtle lays eggs three times in each season, and on each occasion produces 125 eggs. As soon as the young turtles are hatched, and before reaching the water, they become the prey of land crabs, of the grallics, and frigates, or man-of-war birds. Once in the water the danger is not over, for they are there the prey of all the fish large enough to swallow them. For this reason they do not live on the coasts, but allow themselves to be carried by the currents and surges, which they are not strong enough to resist, far out into the sea. In these depths their lives are still uncertain, but it is only there that they can better escape the grasp of their enemies.

In former times the "carets," or hawks-bill turtle, were an important branch of the productions of Aldabra, their scales being particularly large Their number, however, has greatly diminished owing to the destructive practices of the harpooners. They proceed in the following manner:—

MAURITIUS.

ALDABRA ISLAND.

The water of the bay is saline; at low water, therefore, they go near the corals where they know these animals feed. It is with difficulty that they are able to distinguish in this disturbed water whether they are large or small, but, disliking to miss a big turtle, they throw the harpoons at all they meet with. As the implement they use for this purpose has a spring which opens or straightens when it has penetrated into the interior of the animal, it is cut open to disengage or free the implement, which invariably kills the poor beast.

The laws which regulate turtle fishing in Seychelles have been made, doubtless, by intelligent men, but they could not have known the habits of these interesting beasts. And if these laws are not amended and strictly enforced, before 10 years turtles will be no more in Seychelles.

The turtle is a valuable object of commerce and a veritable curiosity.

On the whole the Aldabra group is very interesting from a scientific point of view, but it has little or no prospect of a good future from a commercial standpoint, as it is improbable that anything can be done there by way of cultivation.

Trusting that this information and these few remarks will be of some interest to your Honour,

I have, &c.

REPORT ON THE SEYCHELLES BLUE BOOK FOR THE YEAR 1891.

REVENUE AND EXPENDITURE.

According to the figures supplied by the treasurer, the receipts of the year 1891 amounted to Rs. 217,322.10 against

MAURITIUS.

SEYCHELLES.

Rs. 224,169.27 in the preceding year, and the payments to Rs. 210,724.96 against Rs. 219,393.46 in the year 1890.

The excess of receipts over payments in 1891 was Rs. 6,597 against Rs. 4,765.91 in 1890.

The actual receipts in 1891 exceeded the estimated receipts by Rs. 7,172.16.

The actual payments fell short of estimated expenditure by Rs. 3,827.90.

The changes made in the form of the estimates in 1891, and as a consequence, in the classification of revenue and expenditure in the Treasury books, render it somewhat difficult to give a comparative statement of the details of revenue and expenditure.

The following may, however, be noted: Customs duties in 1890 gave 122,285.04, whereas in 1891 they yielded only 112,776.37, showing a decrease of Rs. 9,508.67. The revenue from this source fell short of the estimates only by Rs. 72.363.

Licenses, excise, and internal revenue not otherwise classified, produced in 1891, according to the Treasurer's report, Rs.41,863.42, the receipts under the items comprised under that heading, having been (according to the printed estimates) in 1890, Rs. 41,370, showing consequently a slight increase (Rs. 493) in favour of 1891.

Taxes (local rate, dog tax, and water rates) produced in 1891 Rs. 31,165.45 as against Rs. 29,749 in 1890, showing an increase of Rs. 1,416.45 in favour of 1891.

Fees of court or office produced in 1891 Rs. 15,337.07. In 1890 the aggregate revenue of the items now included under that heading is stated in the estimates to have been *Rs. 11,819.* This shows an increase of Rs. 3,518 in favour of 1891.

Pilotage shows a difference of Rs. 300 in favour of 1891.

Post office and money orders produced in 1890 Rs. 9,268, whereas in 1891 this head produced only Rs. 5,782.02, showing a decrease of Rs. 3,485.98; this was foreseen, there having been a large sale of new postage stamps in 1890, which was not likely to be renewed in 1891—the revenue under this heading has, however, exceeded the estimate (Rs. 4,838) by Rs. 944.02.

EXPORTS AND IMPORTS.

Exports.

The imports, exclusive of specie, amounted to Rs. 798,698.45 against Rs. 620,578.80 in the preceding year, showing an increase of Rs. 178,119.65 in favour of 1891.

This increase as due to an exceptionally large crop of vanilla.

Imports.

The imports show a total of Rs. 610,325.50 against Rs. 657,512.20 in 1890, showing a decrease of Rs. 47,186.70. This is attributed to the following causes:—

Previous to 1891 the number of Indian traders was abnormal, and I am afraid the importations were somewhat recklessly made

The result of this was felt in 1891. The progress of the Chinese, who are gradually getting the trade of these islands into their hands, who work steadily and avoid rash speculations, who import their own goods and have a vessel of their own, seriously interfered with the Indian custom of importers.

One importer with a large Indian clientèle, closed his business in December 1890, and as this entailed the closing of accounts of his customers, the result was the closing of several Indian firms, a series of law suits, levy of stock-in-trade, and consequent diminution of imports.

The very high rate of exchange, and the very low prices of vanilla, in the European market, have also necessarily affected the imports of the year.

Assets and Liabilities.

The assets of the Dependency on the 31st December 1891, according to a statement from the Treasurer duly audited, amounted to Rs. 97,143.87.

The liabilities amounted to Rs. 82,744.45, showing a balance in favour of assets of Rs. 14,399.42.

SHIPPING.

Seventy-nine vessels, manned by 8,356 men, and of an aggregate tonnage of 185,750 tons, entered the Port of Victoria in 1891, namely:—

		Tons.
19	men-of-war - - - -	24,252
36	mail steamers - - -	150,138
24	merchant vessels (other than mail steamers) - - -	11,360
79	Total -	185,750

Of the men-of-war—

13 were English.
1 was French.
1 was Italian.
2 were German.
2 were Portuguese.

Of the merchant vessels—

19 were British.
4 were Norwegian.
1 was French.
36 were French (mail steamers).

MAURITIUS.

POPULATION AND VITAL STATISTICS

SEYCHELLES.

A census of the Seychelles Islands was taken on the night of the 5th April 1891, showing a total population, exclusive of shipping, of 16,440, against 14,191 in 1881, showing an increase of 2,249 in 10 years.

What is called the general population, as distinguished from the African population, amounted to 14,686, of which 7,267 males to 7,419 females.

The African population amounted to 1,754, of which 1,035 males and 719 females.

Taking the whole population, the number of males exceeds that of females by 174.

The population of the principal Island of Mahé was 13,351, as against 11,436 in 1881.

The population of Praslin in 1891 was 1,235, as against 974 in 1881, and Ladigue 866, as against 742 in 1881. The other Islands showed an aggregate population of 945, as against 1,039 in 1881.

Of the total population of 16,440, there were 16,106 British subjects, 229 French subjects, 45 Chinese, 28 Portuguese, 10 Americans, 9 Arabians, 4 Germans, 2 Turks, 2 Swiss, 1 Swede, 1 Dutch, 1 Italian, 1 Spaniard, 1 Greek.

The natives of the British Isles numbered in all 84.

Natives of France numbered 76.

The total number of Europeans may be stated at 200.

It is not possible to state the number of inhabitants of European extraction, as they are merged in what is called the general population, as distinguished from the African.

The natives of Seychelles numbered 13,639.

Those of Mauritius and its minor dependencies, 391.

Natives of Africa, 1,754.

Asiatics, 293.

Natives of Réunion, 141.

The number of births registered in the Dependency was 619, as against 623 in 1890, namely:—

—	General Population.		African Population.	
	Males.	Females.	Males.	Females.
Legitimate - - - - - -	203	173	29	30
Natural acknowledged - - - -	20	18	2	3
Natural - - - - - -	69	65	4	3
Total - -	292	256	35	36

MAURITIUS.

SEYCHELLES.

The birth-rate per 1,000 was 37·53, as against 44·24 in 1891.

The rate of still-births per 1,000 was 2, as against 4·26 in 1890.

The number of deaths registered during the year was 302, as against 257 in 1890, and the death-rate 18·37 per 1,000, against 18·25 in 1890.

There were 150 marriages, against 187 in 1890.

EDUCATION.

In 1891 there were 26 schools aided by Government grants, attended by 1,844 children, against 24 schools in 1890 attended by 1,844 children.

Twenty schools, with 1,542 pupils, were under the control of the Roman Catholic Mission, and six schools, with 302 pupils, were managed by the civil chaplain and the Church Missionary Society.

The sum voted in 1891 for grants in aid was Rs. 8,000, the same amount as in 1890.

It was apportioned as follows, viz.:—

	Rs.
Roman Catholic schools - -	6,542.61
Church of England schools - -	1,300.98
Church Mission school at Capucin -	156.41
	Rs. 8,000

JUDICIAL.

Criminal Side.

The total number of criminal informations filed in 1891 was 713, against 643 in 1890. Of the 713, 570 were filed by the police and 143 by private parties.

Six hundred and ninety-two cases were adjudicated upon, against 637 in 1890, 21 cases entered within the year had not been adjudicated upon or had not pressed to conclusion on the 31st December 1891, as against six in 1890.

Nine hundred and seventy-nine persons were charged in 1891 (308 by the police and 171 by parties) as against 845 in 1890.

There were 699 convictions in 1891 (628 upon police prosecution and 71 on prosecution by parties), as against 531 in 1890.

As in preceding years the most numerous offences were drunkenness and disturbance, there being 99 convictions for drunkenness, as against 112 in 1890, and 230 convictions for disturbance, as against 174 in 1890.

There were 331 persons prosecuted for disturbance, of which 230 were convicted and 101 acquitted.

One hundred and ten persons were charged with larceny, as against 57 in 1890, and there were 80 convictions, as against 35 in 1890.

Of the 110 persons charged with larceny, there were 49 charged with larceny of agricultural produce. Of these, 34 were convicted.

On the other hand, there were 35 persons prosecuted for breach of the special law for repression of larcenies of produce, resulting in 29 convictions, against 67 persons charged and 56 convictions in 1890.

There was one prosecution for infanticide, which did not result in a commitment for trial, the accused was subsequently prosecuted and convicted for concealment of birth, and one charge of attempt at murder on private prosecution resulted in an acquittal.

The most serious offences this year were assaulting police, attempt at murder, attempt upon chastity, wounds and blows, concealment of birth, defamation, embezzlement, larceny, breach of Fishery law, adultery.

Civil Side.

The number of civil causes was 177, as against 147 in 1890, showing an increase of 30 cases; in addition to which there were 59 matters dealt with in chambers.

Stipendiary Side.

There were 136 persons charged in the Stipendiary Court, against 65 in 1890, and 78 convictions, against 40 in 1890.

The engagements and discharges before the stipendiary magistrate were as follows :—

——	1891.	1890.
Engagements - - - -	50	168
Discharges - - - - -	81	57

showing a decrease in the number of labourers entering into written contracts of service of 118 against 1891.

The total number of cases in all jurisdictions entered before the Courts in 1890 and 1891 respectively stands as follows :—

—	1891.	1890.
Criminal	713	643
Civil	177	147
Stipendiary	136	65
Total	1,026	855
Increase of 1891 over 1890	171 cases.	

There was in 1891 one appeal which was dismissed by the Supreme Court.

Gaol.

Three hundred and fifty-six persons were committed to gaol in 1891, as against 314 in 1890. Of these, one was sentenced to five years or more, and 11 to one year or more, the remainder being sentenced to less than one year.

In 1891 there were 5 deaths in the prison.

HOSPITAL.

The number of persons treated in the public hospital in 1891 was 197, against 170 in 1890, showing an increase of 27 ; they were as follows :—

—	1890.	1891.
Paupers	43	42
Prisoners	50	56
Paying patients	77	99
Total	170	197

Of these 197 persons—

127 were discharged as cured.
32 " " relieved.
8 " " unrelieved.
18 died.
12 were still in hospital at the end of the year.

The principal ailments were anæmia, dysentery, influenza, intussusception, meningitis, paralysis, pneumonia, rheumatism, ulcers, and vulnus.

There were 6,129 applications for medicines at the public dispensary in 1891, against 6,349 in 1890.

The vaccinations by the Government Medical Officers in 1891 were 310 at Mahé, and 74 in the Praslin ward; in all, 384.

LEPROSY CAMP.

There were seven lepers maintained in the leper camp on Curieuse Island during the year, namely :—

Males - - - - -	5
Females - - - - -	2

PAUPER CAMP.

Fifteen aged paupers were maintained in the pauper camp at Curieuse Island during the year.

LUNACY.

There were ten lunatics maintained at the expense of the Government of Seychelles at the Mauritius Lunatic Asylum during the year, three were declared lunatics during the year.

ECCLESIASTICAL.

In 1891, as in previous years, the only religious communities provided with churches and clergy, were the Protestant and Roman Catholic.

Of a population of 16,592 (including 152 forming the crew of H.M.S. "Marathon" then in harbour).

2,768	were returned as Protestants.
4	as Catholics Apostolic.
892	as Catholics.
12,610	as Roman Catholics.

The number of clergy, churches, and chapels employed by each community is as follows :—

Church of England.

Civil chaplain - - - - -	1
Minister for South Mahé - - -	1
Minister for Praslin - - - -	1
Evangelists and catechists - - -	8
Total -	11

Roman Catholic.

Bishop	1
Priests	13
Lay Brothers, of the Capucin order	4
Marist Brothers	7
Sisters of St. Joseph	45
Total	70

CHURCHES AND CHAPELS.

Church of England.

Churches	3
Chapels	8
Total	11

Roman Catholic.

Churches	12
Chapels	6
Total	18

PUBLIC WORKS.

The following are the principal public works attended to during the year.

Maintenance of Roads and Bridges.

Repairs were made to drains and streets, and to various bridges, some of which were pulled down and rebuilt. The roads were repaired and maintained partly by the Public Works Department, and partly by contractors.

Extension of Roads and Bridges.

The *Forêt Noire Road* was continued on a length of 270 feet, including a causeway 170 feet long, with side walls 5 to 10 feet high, and a wall 17 feet long and 2½ feet high built on each side. Three bridges were also built on this road.

Point La Rue Road was extended 1,486 feet, including a causeway 160 feet long and from 9 to 19 feet high, with side walls 2½ feet high.

North-east Road was extended 1,950 feet.

Water Works.

A reservoir was built at La Digue Island, and pipes laid down to supply the plateau with water which was very much needed.

A new reservoir was built and pipes were laid supplying the northern suburb of the town of Victoria with water. The Rochou River reservoir was repaired, and many of the pipes supplying the town with water were cleaned.

Other Works.

Repairs were made to Denis Island Light House, two legs of the tripod were repaired, portions of the ladders replaced, &c.

A pavilion was built for the assistant keeper.

The roof of the Custom House shed was repaired, and repairs were made to the market.

The cutter "Wave" was recoppered and repaired, and repairs were made to the Port Office boats.

The Government House Bungalow was reshingled, and the verandah repaired and re-covered.

Important repairs were made to the buildings of the Quarantine Station, the roof being completely reshingled.

A new female prisoners sleeping ward was built, with suitable Matron's quarters, in the Victoria prison, and a working shed was built for the male prisoners.

The walls of the pier and coal wharf have been repaired and continued, and the south-east corner of the pier walled and filled in.

A building for the accommodation of untried prisoners has been erected in the police yard.

Various articles of furniture have been made for public offices, and repairs have been made for departments.

The Government school house was completed this year, and supplied with the necessary furniture.

The printing office has been enlarged, and a ceiling made to it, and various fittings supplied.

CROWN LANDS.

The Crown Lands are as stated in previous reports. No additions or changes have been made. The trees planted in previous years are thriving, and about 10,000 new seeds were planted during the year.

The post of Government Surveyor having been vacant during the greater part of the year, no surveying work could be performed. A property called Concession Lavoquier, reported to be covered with virgin forest, and which the conservator reports was never taken possession of by the original grantee, and has returned to the possession of the Crown, is exposed to encroachments by neighbours, and could not be sufficiently protected, because not surveyed; when a Government Surveyor is appointed, this work should be attended to without delay.

Some Coco-de-Mer have been planted at Praslin and Curieuse, and timber seeds have been planted at La Digue.

The rent of Félicité has increased, and the revenue of Curieuse is daily increasing.

A special law has been passed for the protection of this valuable Island from depredators.

The Amirantes are not leased.

The Revenue and Expenditure of Crown lands during the year, including rent and produce, are reported by the Conservator to have been as follows:—

Name of Property.	Revenue. Rs.	ct.
Messageries Coal Wharf	600	00
Admiralty Wharf	200	00
Fibre Factory	400	00
Ilot on Reef	50	00
Ilot Hodoul	250	00
Church Missionary Land		25
Capucin Land	156	00
Félicité Island	1,950	00
Ile Récifs	450	00
Mamèlles Island	50	00
Ile Ronde Praslin	4	00
Land alongside the Pier	160	00
Land between Factory and Sea	50	00
Amirantes	605	47
Plaisance and other lands	145	00
Long Island	352	68
Coco de Mer Ravine	175	00
Curieuse Island	2,959	00
Aldabra	600	00
Sea Way alongside the Pier	50	00
Total - - - Rs.	9,207	40

Expenditure.

	Rs.
Plaisance, labourer	144
Long Island, guardian	192
Coco de Mer Ravine, guardian	144
Forest Ranger	360
Conservator of Crown Lands, &c.	1,200
Curieuse Island, overseer and labourers	600
Total - - Rs.	2,640

Police.

The strength of the police force in 1891 was 51 of all ranks, against 46 in 1890, namely:—

1 chief officer,
1 sergeant-major,
2 sergeants,
3 corporals,
10 first-class ⎫
10 second-class ⎬ constables,
19 third-class ⎪
5 boatmen ⎭

distributed over 9 stations, including the central station at Victoria.

The Police Reward Fund showed a balance of Rs. 958.24 on the 31st December 1891.

Detection and Repression of Crimes, &c.

The statistics of prosecutions and results are given under the heading *Judicial.*

The value of property alleged to have been stolen in 1891 is reported by the chief officer of Police to have been Rs. 792.40, against Rs. 4,893.89 in 1890, and the value of property recovered Rs. 225.40 against Rs. 327.28.

The total amount of fines inflicted in police prosecutions in 1891 was Rs. 8,378 as against Rs. 4,906.50 in 1890.

Liberated Africans and Labourers generally.

No liberated Africans or immigrants of any kind were introduced during 1891.

In the census of 1891 the number of members of the *African* population is returned as *1,754.*

It results from the report of the Inspector of liberated Africans that 293 Africans were employed as labourers on estates, as against 300 in 1890, 87 were under written, and 206 under verbal, contract.

The number of labourers of all classes reported as employed on wages on estates in 1891 is 882 against 719 in 1890. Of these, 89 were under written, and 793 under verbal, contract.

It results from the Inspector's report that 54 persons were registered for employment on the share system in 1891 as against 85 in 1890, and that of these 54, 39 were Africans and 15 Creoles.

From the same report it results that the total wages earned by labourers of all classes on estates in 1891 was Rs. 74,955.06 against Rs. 76,786.00, and that the total of forfeitures for absences, &c. was Rs. 11,401.01 against Rs. 7,023·71 in 1890.

The number of marriages of liberated Africans is reported to have been 15 as against 20 in 1890, and of offspring of Africans 8 against 16 in 1890.

Seventy-six births among liberated Africans are reported in 1891 as against 81 in 1890, and 29 deaths against 19 in 1890.

One hundred and thirty-seven liberated Africans are reported to have been convicted on police prosecutions for various offences in 1891 as against 94 in 1890.

LEGISLATURE.

The following Ordinances were passed by the Legislative Council in 1891:—

1. "An Ordinance to consolidate and amend the laws relating "to Vagrancy."

MAURITIUS.

SEYCHELLES.

2. "An Ordinance to amend the law relating to the security of "Notaries and Attornies and to regulate the custody of monies "and other matters connected with the practice of Notaries."

3. "An Ordinance to provide for the service of the Seychelles "Islands for the year 1891."

4. "An Ordinance to amend the law as to licenses in so far as "it refers to the duty levied on licenses to be issued to Assurance "Companies and their agents, and to distillers."

5. "An Ordinance to make better provision concerning the "Promulgation of laws in the Seychelles Islands." (Disallowed.)

6. "An Ordinance to provide for the refund of Customs Duty "paid on goods imported or purchased for the use of the "Administrator of the Seychelles Islands."

7. "An Ordinance for regulating pensions, compensations, "and allowances to be granted in respect of offices held in Her "Majesty's Civil Service in the Seychelles Islands."

8. "An Ordinance to provide for the service of the Seychelles "Islands for the year 1892."

MAURITIUS.

[For Report for 1890 *see* Colonial Report (Annual) No. 27.]

Acting Governor Jerningham to Lord Knutsford.

Government House, Mauritius,
August 24, 1892.

My Lord,

I have the honour to transmit to your Lordship copies of the summary of the Blue Book and of a report thereon by the Acting Colonial Secretary, Mr. Elliott.

I have, &c.
(Signed) Hubert E. H. Jerningham,
Administering the Government.

The Right Hon.
Lord Knutsford, G.C.M.G.,
&c. &c. &c.

Report to accompany the Blue Book for 1891.

Revenue and Expenditure.

1. The revenue received in 1891 was Rs. 7,595,650, a decrease of Rs. 179,123 as compared with the revenue of 1890.

2. The estimated revenue of 1891 was Rs. 7,429,977, but as this amount was insufficient to meet the estimated expenditure of Rs. 7,911,571, additional taxation was imposed by Ordinances passed in December 1890. The amount that it was anticipated would be obtained in 1891 by the extra taxation was not reached, owing to the large quantity of goods withdrawn from bond before the close of December 1890, in order to avoid the additional duty leviable in 1891.

3. The customs dues in 1890 produced Rs. 2,645,186, and in 1891 Rs. 2,424,425, a decrease of Rs. 220,771, due principally to the cause mentioned in the preceding paragraph, and partly also to a falling off in the importation of tobacco.

Owing to the increase in the harbour dues, Rs. 18,048 more were received under this head in 1891 than in 1890.

4. The license, excise, and other internal revenue duties, which produced Rs. 2,565,910 in 1890, amounted in 1891 to Rs. 2,709,757,

MAURITIUS.
1891.

an increase of Rs. 143,847, attributable to the addition
leviable in 1891.

5. The revenue under the head of "Fees of Court o
"Payments for Specific Services, and Reimbursements
shows a decrease in 1891 of Rs. 167,949 as compared wi
but this is due to the fact that the receipts on account
Law patients and the sale of medicines to the Poor Law
sion, which are matters of account, were credited to re
1890 and not in 1891.

6. There was an increase in 1891 of Rs. 21,432 in the
revenue, of Rs. 15,520 under land sales, and of Rs. 1
miscellaneous receipts.

7. The expenditure in 1891 was Rs. 8,192,265 an in
Rs. 486,954 over the expenditure of 1890.

8. In 1891 there was an unforeseen expenditure of Rs.
occasioned by an epidemic of small-pox, and a sum of Rs.
was paid for the diffusion plant set up on Britannia Estate
There was also a larger amount spent by the Publi
Department, as more extensive repairs were required
buildings, and the works at the new Central Prisons, Bea
were continued.

Assets and Liabilities.

9. The following statement will show the position of the
ment accounts under the heads,—1. of the Commissi
Currency, who issue Government notes of the value of 5,
50 rupees in exchange for silver rupees of India; 2.
Government Savings Bank, under the direction of the
General; 3. of the Curatelle, which administers the e
deceased persons and absentees who are not represente
Colony; and 4. of the Treasury proper.

——	Assets.	Liability.
	Rs.	Rs.
Commissioners of Currency -	2,945,151	2,668,250
Savings Bank - - -	3,588,289	3,447,627
Curatelle - - -	470,010	470,010
Treasury proper - -	1,581,103	726,020
Total - - -	8,584,553	7,311,907

15th January 1895 and 15th January 1896, and bearing interest at 6 per cent.; of 56,000*l.* Savanne Railway 4½ per cent. debentures, payable by annual drawings; of 2,600*l.* Moka Railway 4 per cent. debentures, payable by annual drawings; of 73,400*l.* Consolidated 4 per cent. debentures, payable by annual drawings; of 480,749*l.* 13*s.* Mauritius Inscribed Stock; and of 4,000*l.* Poor Law Commission 5 per cent. debentures.

11. For the redemption of the debentures and inscribed stock the sinking fund accumulated up to the 31st December 1891 amounted to 140,293*l.* 14*s.* 10*d.*, and, adding to this the surplus balances of the Commissioners of Currency, the Savings Bank, and the Treasury proper, which amount to Rs. 1,272,646, or, converted into sterling at Rs. 13·90 the £, 91,557*l.* 6*s.* 8*d.*, the balance representing the debt at the close of 1891 was 545,898*l.* 11*s.* 6*d*:

Imports and Exports.

12. The trade for the year was valued at Rs. 40,785,744, against Rs. 44,323,642 in 1890; divided into—

—	1890.	1891.
	Rs.	Rs.
Imports - - -	16,702,818	16,477,341
Exports - - -	27,620,824	24,308,403

or, exclusive of specie and bullion—

—	1890.	1891.
	Rs.	Rs.
Imports - - -	16,375,377	16,433,133
Exports - - -	26,962,930	23,755,088

13. The value of the principal imports for the years 1890 and 1891 was as follows:—

—	1890.	1891.
	Rs.	Rs.
Animals - - -	332,744	302,245
Apothecaries' ware - -	182,670	111,929
Grain, flour, meal - -	5,153,773	5,915,858
Provisions - - -	1,434,549	1,113,102
Malt liquors, wines and spirits -	823,657	806,341
Cotton manufactures - -	1,254,631	917,664
Woollen manufactures -	218,597	174,597

——	1890.	1891.
	Rs.	Rs.
Haberdashery - - -	407,245	364,170
Coal - - - -	542,372	611,934
Machinery - - -	209,607	91,226
Iron and steel - - -	193,691	183,269
Hardware and cutlery - -	1,043,452	406,130
Leather, wrought and unwrought - - -	243,721	162,966
Manure and fertilizers - -	1,100,217	1,064,140
Oil of all kinds - - -	764,064	696,562
Tobacco - - -	193,304	133,890
Total - - -	14,098,294	13,086,023

14. Adding the charges and exchange to the value of the imports given in the preceding table, the result will be as follows :—

——	1890.	1891.
	Rs.	Rs.
Animals - - -	551,820	521,285
Apothecaries' ware - -	302,197	240,829
Grain, flour, meal - -	7,070,167	8,281,693
Provisions - - -	2,231,893	1,744,627
Malt liquors, wine, and spirits -	1,367.227	1,370,766
Cotton manufactures - -	1,949,851	1,420,386
Woollen manufactures - -	358,275	292,978
Haberdashery - - -	667,081	610,864
Coal - - - -	1,408,150	1,620 141
Machinery - - -	347,948	155,084
Iron and steel - - -	320,269	310,585
Hardware and cutlery - -	1,724,693	688,065
Leather, wrought and unwrought - -	399,247	271,042
Manure and fertilizers - -	1,757,762	1,706,018
Oil of all kinds - -	1,121,645	1,012,135
Tobacco - - -	298.784	212,453
Total - - -	21,877,009	20,458,751

15. The following table shows in kilogrammes the quantity of sugar manufactured in the Colony exported in the years 1890 and 1891; the value in rupees as declared at the Custom House; and the rate, calculated therefrom, per 100 kilogrammes.

Year.	Quantity exported in Kilogrammes.	Declared Value in Rupees.	Value per 100 Kilogrammes.
			Rs.
1890 - - -	128,405,938	23,483,868	18
1891 - - -	124,180,980	21,119,674	17

MAURITIUS.
1891.

16. The principal markets for our sugar were:—

—	1890.	1891.
	Kilos.	Kilos.
India	68,260,803	72,870,213
Australasia	30,185,866	19,217,225
United Kingdom	14,995,667	11,858 823
Cape Colonies	11,741,487	13,771,113
United States	1,505,126	4,148,689
Ceylon	596,901	1,055,651

17. The value of other local products exported in 1891 was as follows:—

	Rs.
Rum	389,926
Vanilla	211,314
Aloe fibre	453,530
Molasses	94,313
Cocoa-nut oil	180,588

Shipping.

18. The following table gives the number of ships and their tonnage, entered inwards and cleared outwards in 1890 and 1891:—

Year.	Inwards.		Outwards.	
	No.	Tonnage.	No.	Tonnage.
1890	456	343,302	463	346,320
1891	408	300,330	396	295,311

19. Of the vessels entered inwards, 194 sailing vessels and 93 steamers were British; 32 sailing vessels and 41 steamers were French; 13 sailing vessels and 2 steamers were German; 14 sailing vessels were Norwegian; and the 19 other vessels were of American, Arabian, Austrian, Danish, Dutch, Italian, Malagasy, and Swedish nationality.

Population.

20. By the Census taken on the night of the 5th April 1891, it was ascertained that the resident population was 370,588, composed as follows :—

—	Males.	Females.	Total.
General population - - -	58,639	56,129	114,668
Indo-Mauritians - - -	80,653	75,938	156,591
Other Indians - - - -	66,846	32,483	99,329
Total - - -	206,038	164,550	370,588

21 The Indo-Mauritians are persons of Indian origin born in the Colony, and are generally the offspring of parents both of whom were Indian immigrants. The other Indians are chiefly immigrants from India who have come to Mauritius under contracts of service. The general population includes all persons born in the Colony (except those of Indian parents or where the father was of Indian origin) besides Europeans, Chinese, &c., and is most easily defined as the residuum after separating the Indo-Mauritians and the other Indians.

22. The following statement will give the number of the inhabitants of the districts of the Colony according to the Census of 1881 and that of 1891 :—

Districts.	1881.	1891.
Port Louis (including Flat and Gabriel Islands) - - - - - -	66,652	62,169
Pamplemousses - - - - -	37,670	38,547
Rivière du Rempart - - - - -	20,726	24,151
Flacq - - - - - -	56,022	56,734
Grand Port - - - - -	52,982	48,169
Savanne - - - - - -	34,447	34,977
Black River - - - - -	15,292	15,698
Plaines Wilhems - - - - -	46,315	57,591
Moka - - - - - -	29,768	32,552
Total - -	359,874	370,588

MAURITIUS.
1891.

23. The births registered in 1891 were 13,878, an increase of 575 over the number registered in 1890; and the number of deaths registered in 1891 was 9,976, a decrease of 2,805 compared with 1890. The births in 1891 exceeded the deaths by 3,902.

24. The birth-rate in the total population was 37·4 and the death-rate 26·9 per thousand. The death-rate in 1890 was 34·3 per thousand.

25. The Census returns show 21 persons as being 100 years of age or more, as against 12 in 1881.

Education.

26. In 1891 there were 77 Government schools and 84 schools aided by Government grants, against 71 Government schools and 77 aided schools in 1890.

27. The average number of scholars on the roll in 1890 and 1891 was as follows:—

—	1890.	1891.	Increase.
Government Schools - - -	8,082	8,876	794
Aided Schools - - - -	7,661	8,114	453
Total - - -	15,743	6,990	1,247

28. Of the total number of pupils, 71·46 per cent. were of European, African, or Chinese descent, and 28·53 per cent. were Indians or of Indian origin. The following percentages show their religious persuasions:—

Members of Church of England -	2·97	per cent.
Roman Catholics - - -	74·16	,,
Members of other Christian denominations - - - -	1·41	,,
Mahomedans - - -	6·23	,,
Hindoos and others - - -	15·20	,,

29. The average number of pupils in the Royal College and Royal College Schools in 1890 and 1891 was as follows:—

—	1890.	1891.
Royal College proper - - -	187	193
Royal College School, Port Louis - -	140	145
Royal College School, Curepipe - -	148	189
Total - - -	475	527

30. The sums disbursed for educational purposes in 1891 were as follows:—

	Rs.
Royal College - - - - -	171,769
Expenditure on Government schools exclusively - - - - -	152,123
Expenditure on aided schools exclusively -	94,335
Expenditure common to Government and aided schools - - - - -	13,497
Industrial education - - - -	3,854
Administration - - - - -	19,774
Total - - - - -	Rs. 455,352
Total expenditure in 1890 - -	Rs. 422,299
Increase of expenditure in 1891 -	Rs. 33,053

31. This additional expenditure was caused by an increase in the grants to aided schools, by grants in aid to schools associated with the Royal College, by the opening of second grade Government schools on the half-time system, and by an increase to the personal emoluments of teachers in the Royal College and Government schools.

Post Office and Telegraphs.

32. The revenue collected in this Department in 1891 was Rs. 73,910, while the revenue brought to account in 1890 was Rs. 81,593. This apparent decrease is owing to the postage stamps sold at the Treasury having been credited to the item Internal Revenues in 1891, whilst in 1890 the amount was credited to the Post Office Department.

33. The letters, post cards, and newspapers which passed through the office in 1890 and 1891 were as follows:—

Year.	Letter.	Post Cards.	Newspapers.
1890 - - -	1,063,800	21,543	1,150,903
1891 - - -	1,069,994	22,414	1,194,383
Increase -	6,194	871	43,480

34. The postal money-order business showed an increase of Rs. 52,299 over that of 1890.

MAURITIUS.
1891.

35. The mail services by the Messageries Maritimes Company and the British India Steam Navigation Company were continued with great regularity. A subsidy of Rs. 80,000 was paid to the Messageries Maritimes Company, and a subsidy of 3,750*l.* was paid by the Colony to the British India Steam Navigation Company, a similar sum being also paid to the Company by the Imperial Government.

Railways.

36. The revenue for 1891 was Rs. 1,597,321, an increase of Rs. 21,432 over the revenue of 1890, due to the transport of a larger quantity of goods; the expenditure in 1891 was Rs. 1,043,708, a decrease of Rs. 62,596 when compared with that of 1890, owing to the careful management of the General Manag and Engineer of Railways.

37. The works on the extension of the Moka line from Montagne Blanche Station to Rivierè Sèche Station were continued.

Immigration.

38. There were but few Indian immigrants introduced into the Colony in 1891; 656 from Calcutta and 335 from Madras; and there was also a decrease in the number of immigrants who left the Colony, there being altogether 900 against 1,054 in 1890.

39. The average cost of introduction per engaged man was Rs. 140 . 50.

40. The proportion of females to males among the immigrants who arrived in the Colony was 38·8 per cent., and the proportion of females to males in the departures was 25·7 per cent.

Poor Relief.

41. The expenditure in 1891, including establishment charges, was Rs. 249,695, while the expenditure in 1890 was set down at Rs. 409,131.

42. It had been the practice to prepare bills for the fees chargeable on account of patients sent by the Poor Law Commissioner for treatment at the Civil Hospital and the Lunatic Asylum, and for medicines supplied to poor law dispensaries and hospitals, and the amount of such bills was entered in the accounts as revenue, and figured also on the expenditure side. As this was entirely a matter of account, the practice ceased at the end of 1890. In paragraph 5 of this Report reference is made to the decrease in revenue under the head of reimbursements by the omission of sums under this head.

43. The number of patients treated in the public hospitals in 1891 was 8,158, against 10,436 in 1890. Of these 6,686 were

MAURITIUS.
1891.

treated in hospitals in the rural districts, and 1,472 at the Civil Hospital in Port Louis. The total number of deaths in the several hospitals was 750, against 1,165 in 1890; and the ratio of mortality was 9·19 per cent., against 11·16 in the previous year.

44. The number of persons assisted at the Barkly Asylum in 1891 was 802, against 954 in 1890, the number remaining on the 31st December 1891 being 359. The number of deaths in the year was 43, against 67 in the previous year, and the ratio of mortality was 5·36 per cent., against 7·02 in 1890.

45. The number of persons treated in convent hospitals and infirmaries in 1891 was 597, against 754 in 1890; the number remaining on 31st December 1891 being 254. The number of deaths in the year was 111, against 112 in 1890; and the ratio of mortality was 18·59 per cent., against 14·85 in 1890.

46. The number of lepers maintained at St. Lazare in 1891 was 258, against 314 in 1890; the number remaining on 31st December 1891 being 168. The mortality in 1891 was 23, against 42 in 1890, and the ratio of mortality was 8·91 per cent., against 13·37 in 1890.

47. The number of lunatics treated in the lunatic asylum in 1891 was 475, against 473 in 1890; the number remaining on the 31st December 1891 being 378. The mortality in 1891 was 9, against 12 in 1890, and the ratio of mortality was 1·89 per cent., against 2·53 in 1890.

48. The number of sick people treated at the dispensaries in 1891 was 41,926, against 47,403 in 1890.

49. Out-door relief in the shape of rice and money was given to 12,935 persons in 1891, against 11,977 in 1890.

Criminal Statistics.

50. The total number of offences reported to the police or to the magistrates in 1891 was 32,345, against 30,085 in 1890.

Of the offences reported in 1891—

7,112 were for offences against the person.
637 „ „ prædial larceny.
5,512 „ „ offences against property other than prædial larceny.
and 19,094 „ „ other offences.

51. The total number of convictions in the inferior courts in 1891 was 17,793, against 16,173 in 1890.

These convictions are classified as follows:—

1,144 for offences against the person.
412 „ prædial larceny.
1,455 „ offences against property other than prædial larceny.
4,573 „ offences against the law relating to masters and servants.
10,209 „ other offences.

52. The convictions in the Supreme Court were as follows:—

27 for offences against the person.
69 ,, ,, ,, property.

53. The acquittals were as follows:—

In the inferior courts - - -	4,926
,, ,, Supreme Court - - -	15

54. The number of persons committed to gaol in 1891 was 9,419, against 8,878 in 1890.

7	were imprisoned	for debt.
1,974	,,	,, nonpayment of fines and costs.
1,941	,,	,, safe custody till trial, or for not furnishing security.
5,497	,,	,, purposes of penal imprisonment.

The above-mentioned committals include 347 removals to the reformatory for juvenile offenders.

55. The sentences of imprisonment in 1891 were as follows:—

To three months or less - - -	4,276
To more than three months and less than one year - - - - - -	952
To one year and less than five years - -	212
To more than five years - - -	57

Meteorological Observations.

56. The mean temperature in the shade at the Observatory, which stands on a plain 178 feet above sea-level, about three miles from the West Coast, in the district of Pamplemousses, was 73 degrees, against an average of 73·5 for the 17 years 1875–1891; the absolute highest temperature being 86 degrees, on 4th February, and the lowest 55 degrees, on 1st August.

57. The rainfall for the year at the Observatory was 44·63 inches on 224 days, against an average of 47·78 inches on 203 days for the last 17 years. The wettest months were March and April, and the driest month October.

58. The rainfall for the year at the Nursery Gardens, Curepipe, in the district of Plaines Wilhems, at an elevation of 1,840 feet above sea-level was 139·32 inches on 288 days.

Legislation.

59. Thirty-one Ordinances were passed by the Council of Government in 1891.

60. Six of them deal with questions affecting the revenue of the Colony. Three were passed to continue in operation during 1892 Ordinances passed in previous years to impose extra taxation, so as to provide the amount necessary to make the revenue of 1892 sufficient to meet the estimated expenditure. Another Ordinance

reduced the licence duty payable by attorneys from Rs. 150 to Rs. 60 per annum; and by another, the licence duty payable by house, land, and cattle agents was reduced from Rs. 150 to Rs. 50 per annum. The sixth was to render effective Ordinance 25 of 1890, which had imposed licence duties on certain traders.

61. By Ordinance 4 of 1891, "To provide for the prevention of Accidents in Aloe-fibre Factories," the great difficulty which persons wishing to claim compensation would otherwise have met was removed, as the party injured is not bound to prove negligence on the part of the employer, as he would have to do in an action under the code.

62. Ordinance No. 15, "To make it lawful in certain cases for "Persons on board a Ship which does not enter the Harbour to "land before such Ship is admitted to pratique," provides for the case of passengers arriving on board ships with clean bills of health and otherwise entitled to pratique, but which do not wish to communicate because of epidemic disease existing in the Colony. Before the passing of this Ordinance those passengers were either prohibited from landing, or were obliged to go to a quarantine station.

63. Ordinance No. 25, "To amend the Law relating to the "harbouring and employment of Vagrants and Deserters," was passed to render liable to penalties those who harbour or employ vagrants and deserters without having previously taken reasonable precautions to ascertain whether such persons were vagrants or deserters.

(Signed) THOMAS ELLIOTT,
22nd August 1892. Acting Colonial Secretary.

No. 70.

RODRIGUES.

(For Report for 1890 *see* Colonial Report [Annual] No. 40.)

The MAGISTRATE of RODRIGUES to the ACTING COLONIAL SECRETARY.

Rodrigues Magistracy,
24th June 1892.

SIR,

I HAVE the honour to transmit, herewith, my Annual Report for 1891. I have entered into rather lengthy details, as numerous errors have been made in my last year's report (errors for which I cannot account). The present one will, I hope, enable the Honourable the Auditor General, whose totals of expenditure and Revenue for 1890 are correct, to see the difference in the items between the books of this office and those of the Audit.

I have, &c.
(Signed) B. H. COLIN,
Magistrate.

The Hon. the Colonial Secretary,
Mauritius.

I.—TAXATION.

No change was made in the taxation of this island during the year 1891.

II.—REVENUE AND EXPENDITURE.

	Rs.
The real revenue of 1891, (exclusive of Customs and sums collected in Mauritius) was - -	5,829.32
Showing an increase of - -	1,150.38
On the revenue of 1890, which was -	Rs. 4,678.94

Rodrigues. 1891.

	Rs.
The expenditure of 1891, under estimates and special votes (without including payments made in Mauritius) was - -	21,746.37
Showing an increase of - -	1,168.39
On the expenditure of 1890, which was - - - - Rs.	20,577.98

The ratio of the revenue to the population of 1891 was Rs. 2.77 and a fraction per head. The ratio of the expenditure was Rs. 10.36 and a fraction per head.

The principal heads of revenue were:—Land rent, dog tax, pasturage dues, licenses, fines and forest revenue.

The increase of expenses is to be chiefly attributed to—increase of salaries, repairs to boats, payment of vaccination fees for 1890,—arrears of increments paid to Mr. Ternel, quarantine expenses and census.

III.—Establishments.

The cost of establishments in 1890 and 1891 shows the following differences:—

—	1890.	1891.
	Rs.	Rs.
Salaries - - - - -	14,309.67	17,017.86
Allowances - - - - -	1,117.80	1,115.49
Total - - - -	15,427.47	18,133.35

IV.—Pensions.

Rs. 1,336.32 were expended for pensions in 1891 and a similar sum in 1890.

V.—Magistracy.

The magistrate's salary paid at Rodrigues amounted to Rs.3,999.96 in 1891, against Rs.1,952.43 in 1890.

The magistrate acts also as postmaster (*Vide* Post Office).

The magistrate's travelling expenses were Rs.106.44 in 1890, and Rs.159.00 in 1891.

The magistrate has a residence given him by Government and is allowed a Government labourer who receives Rs.240.00 per annum.

The stationery, books, &c., for the office are sent from Mauritius.

VI. —POST OFFICE.

The revenue collected in 1891 for postage and commission on money orders was Rs.139.66 and Rs.158.64 in 1890.

The letters received were 811 in 1891 and 125 in 1890—newspapers 554 in 1891 and 327 in 1890.

The money orders drawn on Mauritius amounted to Rs.12,219.31 in 1891, and to Rs.15,826.46 in 1890.

Orders were drawn on Rodrigues to the value of Rs.583 in 1891, against Rs.393.79 in the preceding year.

The expenditure amounted to Rs.120 in 1891, and to Rs.76 in 1890 (Postmaster's salary).

VII.—STAMPED PAPERS AND LICENSES AND INTERNAL REVENUE STAMPS.

The following revenue was derived from the above in 1890 and 1891:—

——	1890.	1891.
	Rs.	Rs.
Stamped papers	158.66	148.43
Receipt stamps		
Stamps for bills of lading		
Trade licenses	1,230.75	1,265.00
Game licenses		
Total	1,389.41	1,413.43

showing a difference of Rs.24.02 in favour of 1891.

VIII.—EXPORTS AND IMPORTS.

The exports exclusive of specie amounted to Rs.42173 against Rs.63,852.65 in 1890, showing a decrease of Rs.21,679.65.

The imports amounted to Rs.110,073.96, against Rs.131,283.45 in 1890, showing a decrease of Rs.21,209.49.

The rate of export per head of population was Rs.20.10 and a fraction in 1891, against Rs.31.76 and a fraction in 1890.

The rate of import Rs.52.46 and a fraction against Rs.65.31 and a fraction in 1890.

RODRIGUES.
1891.

IX.—SHIPPING.

Under this head the year 1891 compared with 1890 shows the following differences:—

1890.		1891.	
Inwards - -	8	Inwards - - - -	6
Outwards - -	8	Outwards - - - -	5

The subsidy for postal communication between Mauritius and Rodrigues (1890 and 1891) was paid in Mauritius.

X.—POPULATION AND VITAL STATISTICS.

The population of this Dependency on the 31st December 1890 was - - - - - -		2,010
Number of births in 1891 - -	109	
„ arrivals „ - - -	52=161	
Number of deaths in 1891 - - -	22	
„ departures „ - - -	51=73	
Increase in 1891 - - - - - -		88
Population on the 31st December 1891 - -		2,098

The birth-rate shows a decrease of 22 births in 1891, if compared with the previous year.

The death-rate a decrease of 58 deaths.

There were no still-births in 1891 and three in 1890.

Nineteen marriages were celebrated in 1891 and 44 in 1890.

There were no marriages "in articulo mortis" in 1891, against seven in 1890.

A sum of Rs.400 was paid to the officers in charge of the census which was made in this island in1891.

XI.—EDUCATION (Annexure G).

In 1891 there were two schools in operation at Rodrigues. The expenses thereof are paid by Government.

RODRIGUES.
1891.

Port Mathurin School.

Average number on roll 65, and average attendance 53, against 59 and 46 in 1890.

St. Gabriel School.

Roll number 150, and average attendance 100, against 106 and 73 in 1890.

The costs of both schools (including Mr. Ternel's arrears of increments for 1890 and 1891 paid in 1891) amounted to Rs.3509.14 in 1891 and to Rs.3.141.42 in 1890, after deduction of the school fees, which amounted to Rs.98.50 in 1891, and to Rs.103.75 in 1890. School books and stationery (sent from Mauritius) were sold to the pupils of both schools to the value of Rs.69.20 in 1891 to Rs.64.09 in 1890.

The annual cost to Government of each pupil inscribed on the roll at both schools was Rs.16.32 and a fraction in 1891, against Rs. 19.03 and a fraction in 1890.

Prizes sent from Mauritius were distributed to the pupils of both schools at the end of 1891.

XII.—JUDICIAL STATISTICS.

Criminal Side.

——	1890.	1891.
Number of informations filed, including applications for search warrants - -	41	61
Number of adjudications - - -	36	43
„ cases abandoned - - -	5	18
„ persons convicted - -	35	38
„ persons acquitted - -	6	15

The most numerous charges were: Larcenies, abusive language and breach of forest and fishery laws.

Civil Side.

The number of civil cases entered in 1891 was 75, against 141 in 1890.

Stipendiary.

—	1890.	1891.
Number of cases entered - - -	10	18
Criminal Side:		
Number of convictions - - -	7	6
„ acquittals or - - -	—	4
„ cases given up - - -	3	4
Civil Side:		
Number of cases for plaintiff - - -	—	4
„ „ defendant - -	—	4

The most numerous charges were for breach of contract, of which there were 14, against one in 1890.

Engagements	-	- 1 in 1891 and 4 in 1890.
Discharges -	-	- 2 in 1891 and 4 in 1890.

The total number of cases of all jurisdictions amounted to—

Criminal -	-	- 41 in 1890	and 61	in 1891.
Civil -	-	- 141 „	and 75	„
Stipendiary -	-	- 10 „	and 18	„
		192 „	and 154	„

showing a decrease of 38 cases on the year 1890.

The court revenue in 1891 was Rs.467.06, against Rs.296.10 in 1890 (fees of office are included).

The expenditure Rs.86.75, against Rs.118.75 in 1890.

XIII.—GAOLS.

Twenty-one persons were committed to gaol in 1891 and 24 in 1890.

The prisoners' extra rations amounted to Rs.31.98 in 1891, and to Rs.19.52 in 1890. Rice and salt were sent from Mauritius.

In 1891 a female prison warder had to be taken, and was paid Rs.19.75.

The chief officer of police is keeper of the gaol and the constables act as prison guards.

XIV.—POLICE FORCE AND FOREST RANGER.

The expenses incurred in 1891 for these branches amounted to Rs.4,711.39, against Rs.4,661.64 in 1890.

In the above amount of Rs.4711.39 are included salaries, allowances, salaries which had to be paid to new constables detained in quarantine, and passages of constables transferred to Mauritius.

The police uniforms, clothing and boots were sent from Mauritius.

XV.—MEDICAL BRANCH.

The number of patients treated in the public hospital in 1891 was 10, and 67 in 1890.

2,064 received medical care at the dispensary, against 3,549 in 1890.

One death occurred in the hospital in 1891, and seven in 1890.

The prevailing diseases were dysentery, worms and rheumatism.

102 children were vaccinated in 1891.

The receipts on account of in-patients amounted to Rs.8.75 in 1891, against Rs.13.50 in 1890.

The total expenditure for the medical branch was Rs.2,859.63 in 1890, and Rs.2757.82 in 1891, showing a difference of Rs.101.81 in favour of 1891. In the above sum of Rs.2,757.82. are included Rs.112.50 for Vaccination fees of 1890, and Rs.87.75 for hospital expenditure incurred the same year.

The rent of the hospital was paid in Mauritius; the 547½ lbs. of rice given to the hospital servant to complete his rations were sent from Mauritius.

XVI.—POOR LAW.

The same number of paupers were provided for in 1890 and 1891, *i.e.*, 13 males and 6 females. Each pauper received 500 grammes of rice "per diem" and a suit of drill at the end of the year. The rice and clothing were sent from Mauritius.

A sum of Rs.254.25 was expended in 1890 for the relief and burial of the destitute inhabitants (during the influenza). No special assistance was required from Government in 1891.

XVII.—ECCLESIASTICAL.

There are two Roman Catholic churches at Rodrigues, one of them is supported by Government (St. Gabriel Church).

RODRIGUES.
1891.

The expenditure for the Roman Catholic church was Rs.2,730.44 in 1891 against Rs.3,541.56 in 1890.

The catechist of the Church of England officiates at the Government School at Port Mathurin; he is paid by the London Missionary Society.

XVIII.—LEGISLATION.

No special laws were enacted by the Legislative Council of Mauritius for this island. Proclamation No. 20 of 1891 extended the delay for taking the census at Rodrigues to the 3rd May 1891.

XIX.—REGISTRATION.

Thirty-seven documents were registered in 1891, and 28 in 1890.

The revenue derived thereby amounted to Rs.18.50 in 1891, against Rs.14 in 1890.

XX.—METEOROLOGICAL OBSERVATIONS.

The Chief Officer of Police took daily observations which have been transmitted to the Director of the Royal Alfred Observatory at Mauritius.

	N. Ther.	N. Bar.
Highest temperature (indoors) 22nd January 1891, 3 p.m. - - - -	08·06	30·120
Lowest temperature (indoors) 29th July 1891, 9 a.m. - - - -	68·07	30·340
Heaviest rainfall in 24 hours, from 9 a.m. 28th to 9 a.m. 29th January 1891. -	1¾ inch.	

The month of January was the month in which there was the heaviest rainfalls—the rain gauge marked 923 lines, which is equivalent to 9¼ inches.

No hurricane visited the island in 1891.

Mr. Mason, chief officer of police, received Rs.180.25 in 1890 and Rs.182.50 in 1891 for taking these observations (charged under miscellaneous expenses).

XXI.—FOREST AND CROWN LANDS.

In 1891 there were 414 acres of land paid for by agriculturists at Rs.2 per annum the acre, for 1891, and 212½ acres for 1890.

Thirty-two fishing posts were leased in 1890 and 1891; they fetched Rs.170 in 1891 (out of which Rs.50 are arrears of 1890) against Rs.140 in 1890 (arrears of 1889 included).

The islands were leased for Rs.56.75 in 1891, against Rs.36 in 1889.

The town lots (four) obtained Rs.25 in 1891, and Rs.20 in 1890.

The number of Government lessees in 1891 was 265, against 261 in 1890.

The Revenue actually received under the heading of Land Rent amounted to Rs.1,504.75 in 1891, and to Rs.898.30 in 1890. (Fishing posts, town lots, islands and other land leases are included therein.)

The pasturage dues brought a Revenue of Rs.963 in 1891 and Rs.485 in 1890.

The pasturage revenue is exclusive of the sum of Rs. 1,800 paid by Mr. James Martin in Mauritius in 1891.

No sale of land was made in 1891; a sum of Rs.140.34 was received for land sold previous to that year. No land was bought by Government in 1890 and 1891.

The amount of forest produce sold was Rs.228.28c., in 1891, against Rs.247.95 in 1890.

The outstanding land rent amounted to Rs.260 on the 31st December 1891, *i.e.*, Rs.20 for 1890 and Rs.240 for 1891.

A balance of Rs.472.05 was still due for pasturage fees on the 31st December 1891, without including Mr. Martin's pasturage dues, which amounted to Rs.1,597.75 on the 31st December 1891.

A sum of Rs.82 was paid in 1891 as compensation for land taken away from certain inhabitants for reserves, since 1888.

XXII.—Buildings and Boats.

A sum of Rs.59.06 was expended in 1891 under the heading of Maintenance of Buildings (Estimates), against Rs.657.75 in 1890. No new works were made in 1891 (boards, paint, glass, bolts, &c., are sent from Mauritius and paid for there).

Rs.146.83 was spent for repairs of boats, against Rs.20 in 1890.

(Canvass and fixtures for boats are sent from Mauritius.)

XXIII.—Miscellaneous Expenses (not referred to under any special heading of this Report).

1. The cleaning of the town was made by two scavengers and one boatman (the salaries of the scavengers amounted to Rs.312.00 in 1891 and to Rs.288.00 in 1890, (*vide* Establishments); the rations of each consisted "per annum" of 540 lbs. of rice sent from Mauritius, and of Rs.19.32 paid here for salt fish, &c. The boatman received Rs.120 "per annum" for towing the night-soil barge to sea; no rations are given to him.

RODRIGUES.
1891.

2. A sum of Rs.209.27 was spent in 1891 for quarantine purposes.

3. Divers works not specially provided for under Item 26 Sub-item 12 of Estimates (Maintenance of Buildings) cost to Government Rs.16.50 in 1891 and Rs.380.79 in 1890.

4. Sundry payments were made to the amount of Rs.53.96 in 1891, and Rs. 162.50 in 1890.

5. The pilot received in 1891 Rs.55 as a gratuity for having been detained 11 days in quarantine.— Rs.10 were paid the same year to Forest Ranger Constance for special services during the influenza of 1890.

6. Sums paid by error by the inhabitants were refunded to them to the amount of Rs.4 in 1891, and Rs.6.38 in 1390.

Petty Supplies.

Rs.15.56 were expended for petty supplies in 1891, and Rs.33.35 in 1890.

Special Repayment.

Rs.118.91 were refunded to Mr. E. Gellé in 1890 (a sale of land which had been made to him having been cancelled). No special repayment was made in 1891.

XXIV.—RICE ACCOUNT.

In 1889, 600 bags of rice were sent to Rodrigues. The cost price thereof, including charges, amounted to Rs.6,028.10 The landing of the rice at Rodrigues cost Rs.39,50, making a total of Rs.6,067.60.

The price fixed for the sale of the rice at Rodrigues was Rs.6,073.10.

	Rs.
The amount paid up to the 31st December 1889, was - - - - -	15.18
The amount paid up to the 31st December 1890, was - - - - -	1,630.07
The amount paid up to the 31st December 1891, was - - - - - -	2,258.66
Losses incurred by Death [*] - - - -	248.33
Unrecoverable - - - -	289.96
Carried to Paupers' rice - - - -	5.59
Total -	Rs. 4,447.79
Sum recoverable and outstanding -	Rs. 1,625.31

---

[*] *Note.*—Some widows and children paid part of the rice debt of those deceased; this accounts for that loss being only Rs.248.33 on the 31st December.

RODRIGUES.
1891.

In December 1890, 600 bags were received here and sold in 1891, cost price, including charges, Rs.5,917.00. Landing at Rodrigues Rs.40. Total Rs.5,957.00. Total value of sale price at Rodrigues Rs.5,958.92, *i.e.*, sold :—

	Rs.
558 bags and 63 lbs. - - - - -	5,584.30
26 „ damaged - - - - -	234.00
78 lbs. damaged - - - - -	5.72
15 bags carried to paupers' rice - -	135.00
9 lbs. missing - - - - - -	0.90
Total -	Rs. 5,958.92

Amount paid up to 31st December 1891 -	2,496.13
Unrecoverable - - - - - -	165.00
9 lbs. missing - - - - - -	0.90
Total -	Rs. 2,662.03
Sums recoverable and outstanding - -	Rs. 3,296.89

In 1891, 200 bags of rice were sent to Rodrigues, but the sale thereof began only in 1892.

GENERAL REMARKS.

The crop was very poor in 1891, owing to the epidemic of influenza which prevailed here in 1890 and which prevented the inhabitants from cultivating their land. I must, however, say that they showed an exceptional goodwill in paying their debts.

It is to be regretted that there are no regular roads at Rodrigues, otherwise much might be done towards its improvement. Rs.3,500 must at least be spent to have decent roads, and I would suggest that the outstanding amount recoverable on the rice due by the inhabitants be paid by them in making roads.

The civil and criminal laws require alterations, the magistrate's jurisdiction should be enlarged. It would be advantageous to extend to Rodrigues the laws applicable to District Courts ni Mauritius, with this "proviso" as regards "Bench" matters,—that in all cases wherein the matter may be tried by a "Bench" ni Mauritius, the magistrate of Rodrigues shall have jurisdiction to convict for a period not exceeding two years. Special authority should be conferred on the magistrate to try summarily cases of perjury. In nine cases out of ten perjuries are committed here.

RODRIGUES.
1891.

Notarial powers may be given to the magistrate in order to facilitate sales of land.

Vanilla being planted on several estates, it is necessary, to prevent depredations, that Ordinance No. 7 of 1875 be extended to Rodrigues. The Fishing Regulation is defective; an experiment has been made of late by the principal fishermen of the island, who stopped beating the tam-tam, and the result was beneficial to all. A special Article to Regulation 4 of 1882 prohibiting that mode of fishing may be framed.

B. H. COLIN,
Magistrate.

Rodrigues Magistracy,
9th June 1892.

No. 92.

MAURITIUS.
1892.

MAURITIUS.

[For Report for 1891 *see* Colonial Report (Annual) No. 57.]

Sir H. E. H. JERNINGHAM to the MARQUESS OF RIPON.

(Extract.)

Government House, Mauritius,
September 11, 1893.

I HAVE the honour to transmit to your Lordship the Report on the Blue Book for 1892, which has been furnished by Mr. Elliott, the late Acting Colonial Secretary.

REPORT to accompany the BLUE BOOK for 1892.

Revenue and Expenditure.

1. The revenue received in 1892 was Rs. 7,473,029, a decrease of Rs. 122,621 as compared with the revenue of 1891.

2. The estimated revenue of 1892 was Rs. 7,392,631, and as this amount was insufficient to meet the estimated expenditure of Rs. 7,766,555, Ordinances were passed in December 1891, continuing in force Ordinances 20, 21 and 22 of 1890, under which additional taxation had been imposed and it was estimated that the extra taxes would in 1892 produce Rs. 364,925.

3. But owing to the disastrous hurricane of 29th April 1892 the anticipated revenue was not realised. The sugar crop was so much reduced that the export duty on sugar amounted only to Rs. 319,279, while Rs. 425,000 had been anticipated. The railway receipts, owing to the reduced crop, showed a falling off of Rs. 106,679, and the excise duty on rum issued for home consumption was short by Rs. 265,651. On the other hand, the import duties produced Rs. 213,000 more than the estimate, and harbour duties showed an increase of Rs. 32,339 over estimate.

4. The estimated expenditure in 1892 was Rs. 7,766,555, and the actual expenditure was Rs. 8,024,484, an excess of Rs. 257,929 over estimate.

5. The epidemic of small-pox which commenced in 1891, continued throughout the year, and caused an expenditure of Rs. 241,536, which had not been provided for, and a sum of

Rs. 291,131 was spent in repairing damages to public buildings caused by the hurricane of the 29th April and in giving assistance to the sufferers therefrom. The amount provided to meet the charge on account of the Public Debt was exceeded by Rs. 108,213, the rate of exchange having risen considerably in 1892.

6. A saving of Rs. 112,502 was effected on the amount provided for the Civil Service, and through the non-execution of public works for which provision had been made in the estimates of 1892 there was a further saving of Rs. 111,912. Her Majesty's Government, in consideration of the losses inflicted on the colony by the hurricane, relieved the colony of further payments on account of the military contribution for the year 1892, and this caused a reduction of expenditure under that head of Rs. 126,213.

Assets and Liabilities.

7. The following statement shows the position of the Government accounts under the heads:—1. Of the Commissioners of Currency; 2. Of the Government Savings Bank; 3. Of the Curatelle; and 4. Of the Treasury proper.

—	Assets.	Liability.	Surplus.
	Rs.	Rs.	Rs.
Commissioners of Currency -	4,425,061	3,976,265	448,796
Savings Bank - - -	3,723,306	3,332,177	391,129
Curatelle - - -	462,461	462,461	—
Treasury proper - -	8,316,114	7,391,707	924,406
Total - - -	16,926,942	15,162,610	1,764,331

Public Debt.

8. The Public Debt stood as follows on the 31st December 1892:—

	£	s.	d.
Mauritius Railway Debentures payable 15th January, 1895, and 15th January, 1896, and bearing interest at 6 per cent. - -	161,000	0	0
Savanne Railway 4½ per cent. Debentures payable by annual drawings -	55,000	0	0
Moka Railway 4 per cent. Debentures payable by annual drawings - - - -	2,600	0	0
Consolidated 4 per cent. Debentures payable by annual drawings - - -	72,100	0	0
Mauritius Inscribed Stock - - -	480,749	13	0
Poor Law Commission 5 per cent. Debentures	3,500	0	0
Total - - - - - -	774,949	13	0

	Rs.	£	s.	d.
9. For the redemption of the debentures and inscribed stock, the sinking fund accumulated up to 31st December, 1892, amounted to - - - - - -		161,177	18	10
Adding to this the surplus balances:—				
Treasury proper - -	924,406			
Savings Bank - - -	391,129			
Commissioners of Currency -	448,796			
Total - - -	1,764,331			
Which converted into sterling at Rs. 16 the £ equal - - - - -		110,270	13	8
The balance representing the debt of the Colony is - - - - -		503,501	0	6
Total - - -		774,949	13	0

Imports and Exports.

12. The trade for the year 1892 was valued at Rs. 41,751,323, against Rs. 40,785,744 in 1891; divided into—

——	1891.	1892.
	Rs.	Rs.
Imports - - -	16,477,341	23,401,176
Exports - - -	24,308,403	18,350,147

or, exclusive of specie and bullion—

——	1891.	1892.
	Rs.	Rs.
Imports - - -	16,488,133	15,746,116
Exports - - -	23,705,088	18,093,181

11. The large amount of Rs. 7,655,060 in specie was imported in 1892, of which Rs. 6,322,081 was received by Government on

MAURITIUS.
1892.

account of the loan of 600,000*l.* guaranteed by Her Majesty's Treasury under the Mauritius Hurricane Loan Act, 1892.

12. The value of the principal imports for the years 1891 and 1892 was as follows:—

——	1891.	1892.
	Rs.	Rs.
Animals - - -	302,245	310,876
Apothecaries' ware - -	141,929	144,446
Grain, flour, meal - -	5,915,858	5,469,001
Provisions - - -	1,113,102	1,068,306
Malt liquors, wines and spirits -	806,341	828,111
Cotton manufactures - -	917,664	1,044,591
Woollen manufactures - -	174,597	168,398
Haberdashery - - -	364,170	353,559
Coal - - - -	611,934	592,496
Machinery - - -	91,226	205,372
Iron and steel - - -	183,269	278,845
Hardware and cutlery - -	406,130	447,989
Leather, wrought and unwrought - - -	162,966	166,052
Manure and fertilizers - -	1,064,140	1,366,463
Oil of all kinds - - -	696,562	569,321
Tobacco - - -	133,890	190,169
Total - - -	13,086,023	13,203,995

13. Adding the charges and exchange to the value of the imports given in the preceding table, the result will be as follows:—

——	1891.	1892.
	Rs.	Rs.
Animals - - -	521,285	579,960
Apothecaries' ware - -	240,829	265,412
Grain, flour, meal - -	8,281,693	7,465,162
Provisions - - -	1,744,627	1,800,806
Malt liquors, wines, and spirits	1,370,766	1,540,602
Cotton manufactures - -	1,420,386	1,725,123
Woollen manufactures - -	292,978	307,375
Haberdashery - - -	610,864	640,473
Coal - - - -	1,620,141	1,637,284
Machinery - - -	155,084	381,696
Iron and steel - - -	310,385	500,097
Hardware and cutlery - -	688,065	828,199
Leather, wrought and unwrought - - -	271,042	297,682
Manure and fertilizers - -	1,706,018	2,367,405
Oil of all kinds - -	1,012,135	886,050
Tobacco - - -	212,453	311,897
Total - - -	20,458,751	21,535,223

14. The following table shows in kilogrammes the quantity of sugar manufactured in the Colony exported in the years 1891 and 1892:—

Year.	Quantity Exported in Kilogrammes.
1891 - - - -	124,180,980
1892 - - - -	93,091,256

15. The principal markets for our sugar were:—

—	1891.	1892.
	Kilos.	Kilos.
India - - - - -	72,870,213	54,386,563
Australasia - - -	19,217,225	8,533,167
United Kingdom - -	11,858,823	13,982,675
Cape Colonies - - -	13,771,113	7,718,485
United States - - -	4,148,689	—
Ceylon - - - -	1,055,651	5,513,722
St. Helena - - -	47,112	2,034,749

16. The value of other local products exported in 1892 was as follows:—

Rum - - - -	303,618 Rupees.
Vanilla - - - -	169,985 „
Aloe fibre - - - -	309,653 „
Molasses - - - -	104,583 „
Cocoa-nut oil - - -	197,653 „

Shipping.

17. The following table gives the number of ships and their tonnage entered inwards and cleared outwards in 1891 and 1892:—

Year.	Inwards.		Outwards.	
	No.	Tonnage.	No.	Tonnage.
1891 - - -	408	300,330	396	295,311
1892 - - -	399	327,528	398	325,742

18. Of the vessels entered inwards, 163 sailing vessels and 117 steamers were British; 30 sailing vessels and 36 steamers were French; 22 sailing vessels and 2 steamers were German; 14 sailing vessels were Norwegian; and the 15 other vessels were of American, Austrian, Belgian, Danish, Dutch, Swedish and Malagasy nationality.

Population.

19. The estimated population on the 31st December, 1892, was 374,079.

20. The births registered in 1892 were 14,985, of whom 7,596 were males and 7,389 were females. Of the total number of births, 4,367, divided into 2,180 males and 2,187 females, belonged to the general population, and 10,618, divided into 5,416 males and 5,202 females, belonged to the Indian population. The birth-rate in the total population was 40·05 per thousand.

21. The deaths registered in 1892 were 13,055, of whom 7,309 were males and 5,746 were females. Of the total number of deaths, 4,412, divided into 2,281 males and 2,131 females, belonged to the general population, and 8,643, divided into 5,028 males and 3,615 females, belonged to the Indian population.

22. There were 1,335 deaths unregistered at the Civil Status Offices. Of these 103 were deaths from small-pox, and 1,232 were persons killed in the terrible hurricane of the 29th April 1892, and whose bodies were obliged to be buried before they could be identified and the necessary formalities accomplished. These 1,232 deaths were in the following districts:—

Port Louis - - - - -	674
Pamplemousses - - - - -	42
Riviere-du-Rempart - - - -	8
Flacq - - - - - -	93
Grand Port - - - - -	66
Savanne - - - - -	47
Black River - - - - -	16
Plaines Wilhems - - - -	60
Moka - - - - - -	26

23. Including the unregistered deaths the death-rate in the total population was 38·46 per thousand.

Education.

24. In 1892 there were 81 Government schools and 87 schools aided by Government grants, against 77 Government schools and 84 aided schools in 1891.

25. The average number of scholars on the roll in 1891 and 1892 was as follows:—

—	1891.	1892.	Decrease.
Government Schools - - -	8,876	8,477	399
Aided Schools - - - -	8,114	7,980	134
Total - - -	16,990	16,457	533

26. Of the total number of pupils, 73·83 per cent. were of European, African, or Chinese origin, and 26·16 per cent. were Indians or of Indian origin. The following percentages show their religious persuasions:—

Members of Church of England -	3·01 per cent.
Roman Catholics - - -	74·40 „
Members of other Christian denominations - - - -	1·62 „
Mohamedans - - -	6·07 „
Hindoos and others - - -	14·86 „

27. The average number of pupils in the Royal College and Royal College Schools in 1891 and 1892 was as follows:—

—	1891.	1892.
Royal College proper - - -	193	201
Royal College School, Port Louis - -	145	141
Royal College School, Curepipe - -	189	172
Total - - - -	527	514

MAURITIUS. 1892.

28. The sums disbursed for educational purposes in 1892 were as follows:—

	Rs.
Royal College - - - - -	180,392
Expenditure on Government schools exclusively - - - - -	150,629
Expenditure on aided schools exclusively -	92,918
Expenditure common to Government and aided schools - - - -	10,520
Industrial education - - - -	2,595
Administration - - - -	19,770
Total - - - - -	Rs, 457,324
Total expenditure in 1891 - -	Rs. 455,352
Increase of expenditure in 1892 -	Rs. 1,972

Post Office and Telegraphs.

29. The revenue brought to account in this Department in 1892 was Rs. 66,843, against Rs. 73,910 in 1891.

30. The letters, post-cards, and newspapers which passed through the office in 1891 and 1892 were as follows:—

Year.	Letters.	Post Cards.	Newspapers.
1891 - - -	1,069,994	22,414	1,194,383
1892 - - -	1,126,254	24,447	1,261,584
Increase -	56,260	2,033	67,201

31. The postal money-order business, foreign and inland, showed an increase of Rs. 42,808 over that of 1891.

32. The following subsidies were paid to ocean mail packets:— Rs. 80,000 to the Messageries Maritimes Company, and 3,750*l.* to the British India Steam Navigation Company, a similar sum being also paid to the Company by the Imperial Government.

159

MAURITIUS.
1892.

Railways.

33. The railway revenue and expenditure for the years 1891 and 1892 were as follows:—

—	1891.	1892.	Decrease.
	Rs.	Rs.	Rs.
Revenue - - - - -	1,597,321	1,490,642	106,679
Expenditure - - -	1,043,708	984,025	59,683

The decrease in the revenue is under the item "conveyance of goods," and is due to the reduction in the crop of 1892 caused by the hurricane of the 29th April 1892.

Immigration.

34. There was no immigration of Indian labourers in 1892. The number that left the Colony in 1892 was 1,478, of whom 1,129 were males and 349 females. The amount of money carried away by the departing Indians, as declared by them, was Rs. 35,224, and the average amount per statute adult (exclusive of paupers) was Rs. 81.

35. The amount standing to the credit of the Indian population at the Government Savings Bank on the 31st December 1892 was Rs. 1,526,429 possessed by 10,002 persons classified as follows:—

235 new immigrants.
6,055 old „
1,063 passengers.
2,619 Indo-Mauritians,

36. The Indian population on sugar estates on the 30th June 1892 was 116,503, of whom 52,247 were labourers.

Poor Relief.

37. The expenditure under this head in 1892, including establishment charges, was Rs. 231,186, showing a diminution of Rs. 18,509 on the expenditure under the same head in 1891.

38. The number of patients treated in the public hospitals in 1892 was 11,231, against 8,158 in 1891. Of these 8,630 were treated in hospitals in the rural districts, and 2,601 at the Civil Hospital in Port Louis. The total number of deaths in the several hospitals was 1,175, against 750 in 1891; and the ratio of mortality was 10·46 per cent., against 9·19 in the previous year.

39. The number of persons assisted at the Barkly Asylum in 1892 was 803, against 802 in 1891, the number remaining on the 31st December 1892 being 358. The number of deaths in the year was 33, against 43 in the previous year, and the ratio of mortality was 4·10 per cent., against 5·36 in 1891.

40. The number of lepers maintained at St. Lazare in 1892 was 290, against 258 in 1891; the number remaining on the 31st December 1892 being 171. The mortality in 1892 was 37, against 23 in 1891, and the ratio of mortality was 12·75 per cent., against 8·91 in the previous year.

41. The number of persons maintained in the convent hospitals and infirmaries in 1892 was 667, against 597 in 1891; the number remaining on the 31st December 1892 being 238. The number of deaths in the year was 129, against 111 in 1891; and the ratio of mortality was 19·34 per cent., against 18·59 in 1891.

42. Of the insane patients treated at the Government Lunatic Asylum 483 were at the cost of the Poor Law Commission.

43. The number of pauper orphans maintained in 1892 by the Poor Law Commission was 165, of whom 51 were males and 114 females.

44. The number of sick people treated at the dispensaries in 1892 was 57,961, against 41,926 in 1891, showing an increase of 16,035.

45. Out-door relief in the shape of rice and money was given in 1892 to 3,018 persons, 631 being males and 2,387 females.

Criminal Statistics.

46. The total number of offences reported to the police or to the magistrates in 1892 was 30,539, against 32,345 in 1891.

Of the offences reported in 1892
6,721 were for offences against the person.
789 „ „ prædial larceny.
5,274 „ „ offences against property other than prædial larceny.
and 17,755 „ „ other offences.

47. The total number of convictions in the inferior courts in 1892 was 17,440, against 17,793 in 1891.

These convictions are classified as follows:—
965 for offences against the person.
482 „ prædial larceny.
1,674 „ offences against property other than prædial larceny.
4,180 „ offences against the law relating to masters and servants.
10,139 „ other offences.

48. The convictions in the Supreme Court were as follows:—
28 for offences against the person.
66 „ „ „ property.

49. The acquittals were as follows:—

In the inferior courts - - -	4,622
„ „ Supreme Court - - -	15

MAURITIUS.
1892.

50. The number of persons committed to gaol in 1892 was 9,452, against 9,419 in 1891.

5 were imprisoned for debt.
2,287 „ „ nonpayment of fines and costs.
2,027 „ „ safe custody till trial, or for not furnishing security.
5,133 „ „ purposes of penal imprisonment.

The above-mentioned committals include 382 removals to the reformatory for juvenile offenders.

51. The sentences of imprisonment in 1892 were as follows:—

To three months or less - - -	4,364
To more than three months and less than one year - - - - - -	576
To one year or more, and less than five years -	160
To five years or more - - - - -	33

Meteorological Observations.

52. The mean temperature in the shade at the Observatory, which stands on a plain 178 feet above sea-level, about three miles from the West Coast, in the district of Pamplemousses, was 74°·1, against an average of 73°·6 for the 18 years (1875–1892); the highestt emperature being 85°·7 on the 12th January, and the lowest 58°·8 on the 27th July.

53. The rainfall for the year at the Observatory was 59·12 inches on 221 days, against an average of 48·41 inches on 204 days for the last 18 years. The greatest fall in 24 hours was 7·32 inches on February 13. The wettest months were January, February, and March, and the driest month was September.

54. The rainfall for the year at the Nursery Gardens, Curepipe, in the district of Plaines Wilhems, at an elevation of 1,840 feet above the sea-level, was 154·78 inches on 342 days, against an average of 130·10 inches on 262 days. On February 13th, at 6.30 a.m., the receptacle of the rain gauge was found overflowing.

55. The centre of a violent cyclone passed over the island on the 29th April. The lowest reading of the barometer was 27·956 inches, and the maximum velocity of the wind for five minutes, from 46 minutes past 3 to 51 minutes past 3 in the afternoon, at the rate of 121·2 miles per hour; but the greatest average hourly velocity was 103·3 miles from 3.30 to 4.30 p.m.

56. This cyclone of the 29th April 1892 has been unprecedented in Mauritius with regard to time of year, direction and force of wind, and the suddenness, rapidity, and extent of the changes which took place. Nearly all the loss of life and property occurred in less than two hours.

Legislation.

57. Thirty-one Ordinances were passed by the Council of Government in 1892.

58. Eight of them were occasioned by the necessities created by the hurricane of the 29th April.

59. The first was passed six days after the hurricane "to make " provision for enabling land owners who are employers of labour " to obtain provisions for men and cattle on their estates with the " guarantee of Government," as it was thought that difficulties might be experienced by some in obtaining the necessary supply of provisions for their labourers. The second, passed on the same day, authorised the Governor to grant to persons whose houses had been destroyed or damaged by the hurricane permission to remove trees from certain Crown Lands and Pas Geometriques for rebuilding or repairing their houses. The third, also passed on the same day, as a means of relieving fishermen and others, who had suffered much from the hurricane, made it lawful to fish with nets for one month in the bays and creeks in which fishing with nets was prohibited by the fishery law, and which reserves were consequently well stocked with fish.

60. A committee of the Council of Government having recommended that a loan of 600,000*l.* be raised by the colony to meet the wants and necessities created by the hurricane and to provide funds for certain public works, Ordinance No. 4 of 1892 was passed. Her Majesty's Government decided to invite Parliament to guarantee the loan of 600,000*l.* proposed to be raised by the above Ordinance, and by the Mauritius Hurricane Loan Act, 1892, Her Majesty's Treasury was empowered to guarantee it. As further legislation was necessary to carry out the provisions of the Loan Act, Ordinance No. 12 of 1892 was accordingly passed.

61. Ordinance No. 5 of 1892 was passed to empower Stipendiary Magistrates to modify Contracts of Service with the consent of the parties thereto. The object of this Ordinance was to allow immigrants under engagement to accept a lower rate of wages on estates so damaged by the hurricane that the owners found themselves unable to continue paying the wages they had contracted to give.

62. As it had been necessary to take measures for the immediate burial of many persons who had been killed or who had died from the injuries received during the hurricane, and it had not been possible to obtain regular permits of burial or otherwise comply with the formalities required by the Civil Status Ordinance, an Ordinance was passed to legalise the orders on this subject given by the Officer Administering the Government.

63. The last of the eight Ordinances referred to above was passed to empower the Governor to remit college fees in certain

cases, for some persons had been rendered so destitute by the hurricane that they were unable to pay the college fees, and had been obliged to withdraw their boys from the Royal College.

64. Two Ordinances deal with questions affecting the revenue of the Colony. One was passed to continue in force during the year 1893 the Ordinance authorising the levying of a stamp duty on receipts; and the other continued in operation for the year 1893 Ordinance No. 20 of 1890, by which a surcharge of 10 per cent. was imposed on certain duties and taxes, and it also increased the import duties for the year 1893 on the goods mentioned in it.

65. Ordinance No. 28 of 1892 was passed to amend and consolidate the laws regulating the working of the Customs, the draft of which had been prepared by a Commission appointed in 1888 by the Officer Administering the Government for the purpose of examining and reporting upon the Customs laws of the Colony, a general system of drawbacks, and the removal of the export duty on sugar.

COLONIAL REPORTS.—ANNUAL.

No. 98.

RODRIGUES.

(For Report for 1891, see Colonial Report [Annual] No. 70.)

The MAGISTRATE of RODRIGUES to the ACTING COLONIAL SECRETARY, Mauritius.

Rodrigues Magistracy,
April 8, 1893.

SIR,

I HAVE the honour to transmit, herewith, my Annual Report on Rodrigues for the year 1892. The differences in the numbers mentioned in my Report for 1891 and those reproduced in the present one, are due to my having altered my former classifications.

I have, &c.
(Signed) B. H. COLIN,
Magistrate.

The Hon. the Colonial Secretary.

REPORT on the RODRIGUES BLUE BOOK for the Year 1892.

TAXATION.

No change was made in the taxation of this island during the year 1892.

REVENUE AND EXPENDITURE.

The revenue of 1892 (exclusive of Customs and sums collected in Mauritius) amounted to Rs.6,960.44 against Rs.5,894.90, in the preceding year; and the expenditure was Rs.25,541.62 against Rs.24,010.36 in the year 1891.

The principal heads of revenue were land rent, dog tax, pasturage fees, licenses, fines, and forest revenues.

The increase of expenses is to be chiefly attributed to increase of salaries, new buildings and repairs, and quarantine expenses.

Rodrigues.
1892.

ESTABLISHMENTS.

The cost of establishments in 1891 and 1892 shows the following differences :—

—	1891.	1892.
	Rs.	Rs.
Salaries	16,966.20	17,079.46
Allowances	1,115.49	1,357.80
Total	18,081.69	18,437.26

PENSIONS.

Rs.1,336.32 were expended for pensions in 1892 and the same in 1891.

MAGISTRACY.

The following expenditure was incurred for the Magistracy of Rodrigues :—

—	1891.	1892.
	Rs.	Rs.
Salary of magistrate	3,999.96	4,999.92
Salary of Postmaster	120.00	120.00
Travelling expenses	159.00	142.00
Clerical assistance	240.00	480.00
Government labourer and messenger	240.00	240.00
Total	4,758.96	5,981.92

The Magistrate has a residence.

The stationery, books, &c., for the office are sent from Mauritius.

POST OFFICE.

The revenue collected in 1892 for postage and commission on money orders was Rs.174.96 against Rs.139.66 in 1891.

The letters received amounted to 811 in 1891 and to 951 in 1892 ; the letters despatched to 724 in 1891 and to 1,113 in 1892.

Newspapers 544 in 1891, and 725 in 1892. The money orders drawn in Mauritius amounted to Rs.12,219.31 in 1891, and to Rs.13,732.09 in 1892.

Orders were drawn on Rodrigues to the value of Rs.583 in 1891, and of Rs.1,147.90 in 1892.

The Magistrate acts as Postmaster.

STAMPED PAPERS—LICENSES AND INTERNAL REVENUE STAMPS.

The following revenue was derived from the above in 1891 and 1892 :—

——	1891.	1892.
	Rs.	Rs.
Stamped papers Receipt stamps	148.43	177.31
Stamps for bills of lading Trade licenses Game licenses	1,265.00	1,253.36
Total	1,413.43	1,430.67

EXPORTS AND IMPORTS.

The exports, exclusive of specie, amounted to Rs.71,366.38 in 1892 against Rs.42,174 in 1891, showing an increase of Rs.34,172.38. The imports show a total of Rs.118,164.89 against Rs.110,073.96 in 1891, showing an increase of Rs.8,090.93.

SHIPPING.

Under this head the year 1892, compared with the previous year, shows the following differences :—

1891.		1892.	
Inwards	6 ships.	Inwards	9 ships.
Outwards	5 ,,	Outwards	9 ,,

The subsidy for postal communication (1891 and 1892) was paid in Mauritius.

POPULATION AND VITAL STATISTICS.

The population on the 31st December 1891			2,098
Number of births in 1892	130		
,, arrivals ,,	85	=215	
,, deaths ,,	23		
,, departures ,,	80	=103	
Increase in 1892			112
Population on the 31st December 1892			2,210

The birth-rate shows an increase of 21 births in 1892, if compared with the previous year.

The death-rate an increase of 1 death.

There were 2 still-births in 1892 and none in 1891.

Twenty marriages were celebrated in 1892 against 19 in 1891.

There was one marriage "in articulo mortis" in 1892, against none in 1891.

EDUCATION.

There are two Government schools at Rodrigues, one at Port Mathurin, the other at St. Gabriel. Port Mathurin school—average number on roll 73, average attendance 57, against 65 and 53 in 1891. St. Gabriel school—average number on roll 141, average attendance 103, against 150 and 100 in 1891. The cost of both schools (after deduction of the school fees, which amounted to Rs.49.25 in 1892 and to Rs.98.50 in 1891) amounted to Rs.3,509.14 in 1891, and to Rs.3,588.67 in 1892.

School fees were abolished in 1892.

School books and stationery (sent from Mauritius) were sold to the pupils of both schools to the value of Rs.69.20 in 1891 and of Rs.83.90 in 1892.

The annual cost to Government of each pupil inscribed on the roll at both schools was Rs.16.76 and a fraction in 1892, against Rs.16.32 and a fraction in 1891.

JUDICIAL.

Criminal Side.

——	1891.	1892.
Number of informations filed, including applications for search warrants - -	61	57
Number of adjudications - - -	43	44
„ cases abandoned - - -	18	13
„ persons convicted - -	38	41
„ persons acquitted - -	15	11

The most numerous charges were breach of forest laws, assault, disturbance, wounds and blows, and abusive language.

Civil Side.

The number of civil cases entered in 1892 was 45, against 75 in 1891.

Stipendiary Side.

The number of stipendiary cases amounted to 18 in 1891 and to 16 in 1892.

The most numerous stipendiary cases were for breach of contract.

Engagements - -	1 in 1891 and 0 in 1892.
Discharges - - -	2 in 1891 and 1 in 1892.

The total number of cases of all jurisdictions amounted to :—

——	1891.	1892.
Criminal - - - - - -	61	57
Civil - - - - - -	75	45
Stipendiary - - - - -	18	16
	154	118

GAOLS.

Twenty-one persons were committed to gaol in 1891 and 12 in 1892.

The prisoners' extra rations cost Rs.31.98 in 1891 and Rs.5.24 in 1892.

Rice and salt for prisoners were sent from Mauritius.

The chief officer of police is keeper of the gaol, and the constables act as prison guards.

POLICE FORCE AND FOREST RANGERS.

The expenses incurred in 1892 for these branches amounted to Rs.4,648.22, against Rs.4,711.39 in 1891.

In the above amount are included salaries, allowances, and passages.

The police uniforms, clothing, and boots were sent from Mauritius.

RODRIGUES.
1892.

MEDICAL BRANCH.

The number of patients treated in the public hospital in 1892 was 6* and 10 in 1891.

2,341 persons received medical care at the dispensaries* against 2,064 in 1891.

One death occurred in the hospital during the year 1892 and one in 1891.

The prevailing diseases were influenza, worms, and rheumatism.

73 children were vaccinated in 1892 and 102 in 1891.

The receipts on account of in-patients amounted to Rs 0 in 1892 and to Rs.8·75 in 1891.

The total expenditure for the medical branch was Rs.2,338.11 in 1892 against Rs.2,757.82 in 1891.

The rent of the hospital was paid in Mauritius, and the 547½ lbs. of rice given to the hospital servant to complete his rations were sent from Mauritius.

POOR LAW.

The number of paupers provided for in 1892 amounted to 19, *i.e.*, 15 males and 4 females, against 19 in 1891, *i.e.*, 13 males and 6 females.

Each pauper received 500 grammes of rice per diem and a suit of drill at the end of the year. The rice and clothing were sent from Mauritius.

A sum of Rs.112.15 was spent in 1892 for the relief of destitute inhabitants and for the burial of paupers.

Four bags of rice were distributed gratis.

ECCLESIASTICAL.

There are two Roman Catholic churches at Rodrigues, one of them is supported by Government (St. Gabriel Church).

The expenditure for the Roman Catholic church was Rs.1,999.92 against Rs.2,730.44 in 1891.

The catechist of the Church of England officiated at the Government School of Port Mathurin; he is paid by the London Missionary Society.

LEGISLATION.

No special laws were enacted for Rodrigues in 1892.

REGISTRATION.

Fifty-four documents were registered in 1892 and 37 in 1891.

The revenue derived thereby amounted to Rs.18.50 in 1891 and to Rs.27 in 1892.

---

* NOTE.—The Government Medical Officer went on leave to Mauritius on the 8th October and returned on the 26th December. During his absence those who required medical care were attended to by the Magistrate assisted kindly by several gentlemen. Two persons were admitted to the hospital in that interval, and an average of four persons (per diem) received remedies from the dispensary. They are not included in the number given above.

METEOROLOGICAL OBSERVATIONS.

The Chief Officer of Police took daily observations which have been transmitted to the Director of the Royal Alfred Observatory at Mauritius.

	N. Ther.	N. Bar.
1. Highest temp. (indoors) 23.2.93, 3 p.m.	90.01	29.980
2 Lowest temp. (indoors) 26.7.92, 9 a.m.	68.02	30.205

3. Heaviest rainfall in 24 hours, from 9 a.m. 19th to 9 a.m. 20th May.
4. The month of May was the month in which there were the heaviest rainfalls—the rain gauge marked 871 lines, which is equivalent to a little short of $8\frac{3}{4}$ inches.
5. No hurricane visited the island in 1892.

The Chief Officer of Police received Rs.183 in 1892 and Rs.182.50 in 1891 for taking these observations.

FOREST AND CROWN LANDS.

In 1892 there were 543 acres of land paid for by agriculturists at Rs.2 per annum (with the exception of 4 acres leased since 1889 at R.1 per acre and 2 acres leased to Mr. Viger at the nominal rent of R.0·25 (for a saline).

Rs.16 were paid for arrears of 1890, leaving Rs.4 unpaid on the 31st December 1892.

Rs.193 were paid for arrears of 1891, leaving Rs.47 unpaid on the 31st December 1892. (In the Rs.193 are included 4 acres at R. 1).

Thirty-three fishing posts were leased in 1892 and 32 in 1891. (They fetched Rs.195, out of which Rs.35 are arrears of 1891.)

Outstanding: Rs.5 for 1891 and Rs.5 for 1892. These ten rupees are due by Mr. Martin who pays his taxes in Mauritius.

The islands were leased for Rs.64.02 in 1892, against Rs.56.75 in 1891.

The town lots obtained Rs.30 in 1892 and Rs.25 in 1891. Outstanding: Rs.10 for 1891 and Rs.10 for 1892.

The number of Government lessees in 1892 was 291, against 265 in 1891.

The Revenue actually received under the heading of Land Rent amounted to Rs.1,535.31 in 1892, and to Rs.1,504.75 in 1891. (Fishing posts, town lots, islands, and other land leases are included therein.)

The pasturage dues (exclusive of the sums paid and due by Mr. Martin in Mauritius) brought a Revenue of Rs.1,381.15 in 1892, against Rs.963 in 1891. Outstanding on the 31st December 1892: Rs.59.10 for 1891 and Rs.3.30 for 1892. No sale of land was made in 1891 and 1892; a sum of Rs.140.34 was received in 1891 for land sold previous to that year.

The amount derived from forest produce amounted to Rs.240, against Rs.228.28 in 1891.

RODRIGUES.
1892.

BUILDINGS AND BOATS.

A sum of Rs.488.81 was expended in 1892 under the heading of Maintenance of Buildings, against Rs.59.06 in 1891 (boards, paint, glass, bolts, &c., were sent from Mauritius).

A sum of Rs.1,500 was spent in 1892 for the new building at Mount Lubin and a further sum of Rs.500 for the constable's barracks. (This latter item under a special vote.) Rs.29.03 were spent for repairs of boats against Rs.146.83 in 1891.

EXPENSES NOT REFERRED TO UNDER ANY SPECIAL HEADING.

Amount paid up to 31st December 1892 -	953.50
Unrecoverable - - - - - -	165.00
9 lbs. missing - - - - - -	0.90
Total -	Rs.3,615.53

31st December 1892.—Sums recoverable and outstanding: Rs.2,343.39.

In December 1891 200 bags were sent to Rodrigues, and sold for cash in 1892.

	Rs.
Sums obtained - - - - - -	1 638.24
1½ bags short, destroyed by insects - -	12.52
4 bags distributed gratis to paupers during influenza - - - - - - -	33.40
Total -	Rs.1,684.16

In December 1892 100 bags of rice were sent, but the sale thereof began only in 1893.

GENERAL REMARKS.

The crop would have been better in 1892 had not the population suffered from two epidemics of influenza, and had not the bean crop been an utter failure. The inhabitants showed as usual a very good will in paying their debts.

Mr. Viger has begun the works for a saline and I hope that before the end of 1893 the inhabitants will have salt at Mauritius es.

anilla plantations are getting prosperous.

obacco plantations are increasing and give most satisfactory ts.

Rodrigues.
1892.

Most of the buildings which needed repairs have been repaired. The Government Medical Officer's quarters were erected at Mount Lubin. The new hospital was being constructed at the end of 1892.

B. H. Colin,
Magistrate of Rodrigues.

Rodrigues.
1893.

RODRIGUES.

(For Report for 1892, *see* Colonial Report [Annual] No. 98.)

The Magistrate, Rodrigues, to the Colonial Secretary.

Rodrigues Magistracy,
April 17, 1894.

Sir,

I have the honour to transmit, herewith, the Annual Report on the Rodrigues Blue Book for the year 1893.

I have, &c.
(Signed) B. H. Colin,
Magistrate.

The Honourable the Colonial Secretary.

Report on the Rodrigues Blue Book for the Year 1893.

Taxation.

During the year 1893 no change was made in the taxation of this Dependency.

Revenue and Expenditure.

	Rs.
The revenue of 1893 (exclusive of Customs and sums collected in Mauritius) amounted to -	5131.06
And the revenue of 1892 to - - -	7002.10
Showing a decrease of - - -	Rs.1871.04

The principal heads of revenue were land-rent, pasturage fees, dog tax, licenses, forest produce, fines and sales of crown land.

RODRIGUES.
1893.

	Rs.
The expenditure of 1893 under estimates and special votes (not including payments made in Mauritius) and matters of account amounted to - - - -	22,600.74
And the expenditure of 1892 to - -	25,541.62
Showing a decrease of - - -	2,940.88

The ratio of the revenue to the population in 1893 was Rs. 2.19¾ per head, and that of the expenditure Rs. 9.78 and a fraction per head.

The difference in the expenditure is partly due to the erection of new buildings in 1892.

The difference in the revenue is partly due to the fact that in December 1892, some person lent money to the inhabitants to pay the taxes due by them and he was refunded of his advances in 1893, and partly to the drought that prevailed in 1893.

EXPORTS AND IMPORTS.

	Rs.
Exclusive of specie the value of the exports during the year 1893 was - - -	94,972.30
and during 1892 - - - -	71,366.38
showing an increase of - - -	Rs. 23,605.92

The value of the imports during the year 1892 amounted to - - - - -	118,164.89
and during the year 1893 to - - -	107,002.25
showing a decrease of - - - -	Rs. 11,162.64

The ratio of exports per head was in 1893 Rs. 40.90 and in 1892, Rs. 32.29.

The ratio of imports per head was in 1892, Rs. 52.78 and in 1893, Rs. 45.88.

SHIPPING.

The number of ships which arrived at Rodrigues was 18 in 1892 and 21 in 1893.

The subsidy for postal communication during those two years between Rodrigues and Mauritius was paid in Mauritius.

POPULATION AND VITAL STATISTICS.

The population in 1892 was 2,210 and on the 31st of December 1893 the number of inhabitants was 2,332.

The number of declarations of births in 1893 was	128
The number of deaths was	30
The number of arrivals was	142
The number of departures was	128

The declarations of births show a decrease of two when compared to those made in 1892, the deaths an increase of seven.

There were two still-births in 1892 and one in 1893.

In 1892 20 marriages were celebrated and 19 in 1893.

There was in 1892 one marriage in "articulo mortis" and none in 1893.

EDUCATION.

There are only two schools at Rodrigues the expenses of which are paid by Government, one at Port Mathurin and the other at St. Gabriel.

——	1892.	1893.
PORT MATHURIN SCHOOLS.		
Average number of pupils on roll	73	83
Average number of attendances	57	61
ST. GABRIEL SCHOOL.		
Average number of pupils on roll	147	89
Average number of attendances	103	50

Books, &c., &c., (sent from Mauritius for both schools) were sold to the pupil to the amount of Rs.83.90 in 1892 and Rs. 90.46 in 1893.

The cost of both schools amounted to Rs. 3,637.92 in 1892, and Rs. 3501.53 including Rs. 497.50 for enlargement of Gabriel School in 1893.

The annual cost to Government for each pupil inscribed in 1893 was Rs. 20.35.

Judicial.

The most common charges were for larceny, possession of stolen property, assault, trespass, disturbance, wounds and blows, breach of forest laws, abusive language and contraventions.

——	1892.	1893.
Criminal Side.		
Number of informations filed including applications for search-warrants - -	57	68
Number of adjudications - - -	44	61
Number of cases given up - - -	13	7
Number of persons convicted - -	41	50
Number of persons acquitted - -	11	25
Civil Side.		
Number of cases entered - - -	45	71
Stipendiary Side.		
Number of cases - - - -	16	12
Number of engagements - - -	0	3
Number of discharges - - -	1	0
The total number of cases of all jurisdictions was - - - - -	118	151
Showing an increase of 33 cases in 1893 -	—	—

The Court revenue was Rs. 416.29, and the expenditure Rs. 123.14.

Gaols.

The only prison is at Port Mathurin and can contain 20 prisoners. There is no reformatory or place of detention for juvenile offenders, and no proper accommodation for female prisoners.

Seventeen (17) persons were committed to gaol in 1893 and twelve (12) in 1892.

Medical.

The hospital is no longer at Port Mathurin, having been removed to Mont Lubin.

The number of patients attended to in the public hospital was 6 in 1892 and 47 in 1893.

In 1892 medical advice at the dispensary both at Mont Lubin and Port Mathurin was given to 2,341 patients and in 1893 to 2,318.

In 1892 one (1) death occurred at the hospital and three (3) in 1893.

The prevailing diseases were bronchitis, broncho-pneumonia, pneumonia, inflammation of the throat, stomatitis, throat, liver complaints, enteritis, diarrhœa and dysentery, rheumatism, neuralgia, worms, fever, abscesses, wounds and eczema, diseases of the eyes and ears, and diseases common to women.

In 1892 73 children were vaccinated and 83 in 1893.

The receipts from in-patients amounted to Rs. 10.13 in 1893, and nothing in 1892.

The total expenditure for the Medical Department of this Dependency amounted to Rs. 2,338.11 in 1892 and to Rs. 2,714.14 in 1893.

POOR LAW.

The number of paupers provided for in 1892 amounted to 19 viz.: 15 males and 4 females, and in 1893 to 21, viz.: 16 males and 5 females.

Each pauper receives at the beginning of the month rice calculated at the rate of 500 grammes per diem, and at the end of the year 1 rupee and a suit of clothes. The rice and clothes were sent from Mauritius.

Two bags of rice were distributed gratis to the poor.

ECCLESIASTICAL.

There are two Roman Catholic churches at Rodrigues, one of them is supported by Government (St. Gabriel Church). The expenditure for the Roman Catholic church was the same in 1893 as in 1892, viz.: Rs. 1,999.92, the salary of the priest.

There is no catechist nor minister of the Church of England.

LEGISLATION.

No special laws were enacted for this Dependency in 1893.

REGISTRATION.

There were 54 documents registered in 1892 and 52 in 1893. The revenue derived thereby was Rs.27.00 in 1892 and Rs.26 in 1893.

RODRIGUES.
1893.

METEOROLOGICAL OBSERVATIONS.

The Chief Officer of Police took daily observations which have been transmitted to the Director of the Royal Alfred Observatory in Mauritius.

	N. Ther. F.	N. Bar. In.
1. Highest temp. (indoors) 1.1.93, 3 p.m.	90·06	30·190
2. Lowest temp. (indoors) 17.7.93, 9 a.m.	68·07	30·285

3. The heaviest rainfall in 24 hours was on the 25.1.93, and gave 4 inches and 16 lines.

The month of January was the month in which there were the heaviest rainfalls; viz., 10¼ in.

No hurricane visited the island in 1893.

Rodrigues suffered from a very severe drought which lasted from September to the 20th of December, when there began to be some rain.

The Chief Officer of Police received Rs.183 in 1892 and Rs.182.50 in 1893 for taking these observations.

FOREST AND CROWN LANDS.

—	1892.	1893.
The land rented by cultivators at Rs.2 per acre amounted to	543	545
among which are included 4 acres leased at R.1 per acre, and 2 acres let to Mr. L. A. Viger for a "saline" at a nominal rent of R. 0.25.		
The fishing posts numbered	33	26
and fetched	Rs. 160	Rs. 115
The islands were let for	64.02	30
The town lots obtained	30	45
including in 1893 the arrears of 1891 and 1892, amounting to Rs. 10.		
The number of Lessees was	291	345
The Revenue actually received under the heading of land rent, including islands, town lots, fishing posts, and other land leased by Government, including the arrears for 1891 and 1892 did amount to	Rs. 1,535.31	Rs. 1,078.99
The pasturage dues (not including the sums paid by Mr. J. Martin in Mauritius) but including Rs.150 for arrears of 1892 amounted to	1,381.15	458.15
The amount derived from Forest produce amounted to	240.00	180.63

GENERAL REMARKS.

The crop of beans, the main produce of the island, has been very bad: about three-fifths of last year's crop which was not good. The Dependency has besides greatly suffered from a very severe drought.

The consequence is that taxes have been only partly paid and this with the greatest difficulty.

The new hospital at Mont Lubin has been completed according to the contract passed with my predecessor.

Mr. Viger has prepared some salt which is very fine.

Tobacco is getting quite a favourite, and as it grows here very well and has a very fine flavour, though badly prepared, I venture to foretell that this plant shall soon be a source of riches to this island.

Many of the buildings still want repairs but workmen here are not always obtainable.

The island was favoured with a visit of his Excellency the Governor of Mauritius and the inhabitants were highly pleased and honoured thereby.

The Government Engineer arrived in Rodrigues in October and marked out the site of the new road. He has also indicated the spot where the water of Port Mathurin River is to be dammed.

The Government Surveyor is still in Rodrigues surveying the numerous lots of Crown land which the inhabitants wish to purchase. He has also found out that in dry weather the river supplies Port Mathurin with over 52,000 litres of water and in October, when it had not been raining for nearly one month, it yielded over 28,000 litres in 24 hours.

Water supply in Port Mathurin would prove a boon to the inhabitants.

YVES JOLLIVET,
Acting Magistrate of Rodrigues.

MAURITIUS.

[For Report for 1892 *see* Colonial Report (Annual) No. 92.]

Sir H. E. H. JERNINGHAM to the MARQUESS OF RIPON.

Government House, Mauritius,
September 7, 1894.

MY LORD,

I HAVE the honour to transmit to your Lordship the Report on the Blue Book for 1893, which has been furnished by Mr. King-Harman, the Colonial Secretary.

I have, &c.
(Signed) HUBERT E. H. JERNINGHAM,
Governor.

REPORT on the BLUE BOOK for 1893.

REVENUE AND EXPENDITURE.

	Rs.
The Revenue for 1893 amounted to - -	8,103,922
And the Expenditure to - - -	7,872,096
Showing a balance in favour of the Treasury of - - - - - -	231,826

	Rs.
As compared with the previous year, the Revenue showed an increase of - - -	630,892
And the Expenditure a decrease of - -	152,387

The ratio of revenue to the population was Rs. 21.79 per head. The ratio of expenditure to the population was Rs. 21.17 per head.

After meeting all the ordinary expenditure of the year, and after providing for all claims against the Colony, not including the Public Debt, the Treasury at the close of the year remained with an available balance in hand of Rs. 1,377,588.

MAURITIUS.
1893.

PUBLIC DEBT.

	£	s.	d.
The Public Debt, including the Hurricane Loan, amounted at the close of 1893 to - - - -	1,372,149	0	0
To meet which the Colony was provided with assets amounting to -	726,725	10	0
Leaving a balance of - -	645,423	10	0

payable at periods varying from 30 to 47 years, which will doubtless be extinguished in due course of time by the gradual operation of the Sinking Fund.

With regard to the assets of the Colony, it may be stated that by far the major portion of them are realizable at short notice, and included over 3,000,000 rupees in cash.

IMPORTS AND EXPORTS.

The trade for the year 1893 was valued at Rs. 49,302,654 against Rs. 41,751,323 for 1892; and was divided as follows:—

——	1892.	1893.
	Rs.	Rs.
Imports - - -	*23,401,176	‡21,388,191
Exports - - -	†18,350,147	§27,914,463

* Specie Rs. 7,655,066. † Specie Rs. 256,966. ‡ Specie Rs. 2,488,252. § Specie Rs. 5,737,977.

or, exclusive of specie and bullion—

——	1892.	1893.
	Rs.	Rs.
Imports - - -	15,746,116	18,899,939
Exports - - -	18,093,181	22,176,486

The sum of Rs. 2,488,252 in specie was imported in 1893, of which Rs. 305,976 was received by Government on account of the loan of 600,000*l.* guaranteed by the Imperial Treasury under the provisions of the Mauritius Hurricane Loan Act, 1892, and a sum of Rs. 5,737,977 was exported to India and other places, principally on account of remittances by merchants and traders.

The value of the principal imports for the years 1892 and 1893 was as follows:—

——	1892.	1893.
	Rs.	Rs.
Animals - - -	310,876	312,363
Apothecaries' ware - -	144,446	155,692
Grain, flour, meal - -	5,469,001	8,009,247
Provisions - - -	1,068,306	1,088,017
Wines spirits, &c. - -	828,111	863,193
Cottons - - -	1,044,591	1,083,619
Woollens - - -	168,398	163,227
Haberdashery - - -	353,559	394,139
Coal - - - -	592,496	412,812
Machinery - - -	205,372	99,539
Iron and steel - - -	278,845	215,105
Hardware and cutlery - -	447,989	377,899
Leather - - -	166,052	191,005
Manures - - -	1,366,463	1,806,518
Oil of all kinds - - -	569,321	756,855
Tobacco - - -	190,169	187,890
Total - - -	13,203,995	16,117,120

The following table shows in kilogrammes the quantity of sugar manufactured in the Colony exported in the years 1892 and 1893; the value in rupees as declared at the Customs House; and the rate, calculated therefrom, per 100 kilogrammes:—

Year.	Kilogrammes.	Value.	Value per 100 Kilogrammes.
		Rs.	Rs.
1892 - - -	93,091,256	15,154,894	16.27
1893 - - -	86,067,841	19,409,218	22.46

The following are the principal markets to which the sugar was shipped:—

——	1892.	1893.
	Kilos.	Kilos.
India - - - -	54,386,563	39,804,432
Australia - - -	8,533,167	7,114,642
United Kingdom - -	13,982,675	10,235,082
Cape Colonies - - -	7,718,485	11,620,164
Ceylon - - - -	5,513,722	10,342,402
Hong Kong - - -	411,705	1,406,544
France - - - -	977	2,084,926
Portugal - - - -	——	2,570,911

The value of other local products exported in 1892 and 1893 was as follows :—

—	1892.	1893.
	Rs.	Rs.
Rum - - - - -	313,618	332,441
Vanilla - - - -	169,985	83,895
Aloe Fibre - - - -	309,653	264,840
Molasses - - - -	104,583	104,625

SHIPPING.

The following table gives the number of ships and their tonnage entered inwards and cleared outwards in 1892 and 1893 :—

Year.	Inwards.		Outwards.	
	No.	Tonnage.	No.	Tonnage.
1892 - - -	399	327,528	398	325,742
1893 - - -	340	293,990	347	293,042

Of the vessels entered inwards :—

136 sailing vessels and 102 steamers were British.
23 sailing vessels and 42 steamers were French.
20 sailing vessels and two steamers were German.

The remaining 14 sailing vessels and one steamer were of American, Danish, Italian, Norwegian, Swedish and Zanzibarian nationalities.

Population and Vital Statistics.

The entire population of the Colony and the numbers of its two main divisions at the close of 1893 are estimated as follows :—

—	Males.	Females.	Total.
General Population -	59,578	56,354	115,932
Indian Population -	144,979	110,887	255,866
Total - -	204,557	167,241	371,798

The Indian population comprises immigrants, or labourers imported for service, chiefly on sugar estates; settlers from India; and Indo-Mauritians or persons of Indian parentage born in the Colony. This is the largest section of the comunity and comprehends about 170,000 persons of the two sexes and of all ages.

The general population is the non-Indian section of the community; it is chiefly native, but includes all strangers domiciled in the Colony (except Indians). An important group of the general population is the Chinese community, whose strength is estimated at 3,926.

The marriages celebrated by the Civil Status Officers were 1,083 in number; 556 in the general population, (but of these in 37 cases one of the parties was of Indian origin) and 527 in the Indian population. The marriage rate or number of persons married to every thousand living was 6·3 in the whole population. This rate is lower than that of either of the two preceding years.

The births registered in 1893 in the whole and each component group of the population are as follows:—

—	Males.	Females.	Total.
General Population -	1,998	1,911	3,909
Indian Population -	4,726	4,560	9,286
Total - -	6,724	6,471	13,195

The total number of births is less by 1,790 than that of the previous year. The decrease is attributed to the heavy mortality of the year, which fell on women of child-bearing ages as on other age groups. The birth rate of the whole community was 35·3. In 1892 this figure was 40·1.

In the Indian section the rate was 36·0, and in the general section 33·7.

The number of still births was 991; 264 in the General, and 727 in the Indian, population. The corresponding rates to 1,000 live births are 75·1 in the total, 67·5 in the General, and 78·3 in the Indian, sections respectively. The rate is slightly better than that of the previous year.

The deaths in 1893 were distributed as follows:—

—	Males.	Females.	Total.
General Population -	2,358	2,110	4,468
Indian Population -	6,554	4,285	10,839
Total - -	8,919	6,395	15,307

The death rate of 1893 was 40·9; the heaviest mortality experienced since the epidemic of fever in 1867–68. The cause of the increase of mortality was influenza, to which cause 3,441 deaths are attributed. The death rate in the general population was 38·5 and in the Indian 42·0.

The death rate among Immigrant Indians was 58·9. Of the whole number of deaths, 39·4 per cent. are ascribed to fever.

There were 91 violent deaths caused by accident, and 24 suicides (23 of the Indian and 1 of the general population). The mode of self destruction was in 19 cases hanging; all in the Indian population (16 males and three females).

EDUCATION.

Primary Schools.

There were in operation in 1893, 171 primary schools, viz.—Government schools 81 and aided schools 90. In 1892 there were 81 Government schools and 87 aided schools.

The actual attendance of pupils in each category of the foregoing schools was in 1893—

—	Average on Roll.	Average Attendance.
Government Schools - - -	8,636	5,162
Aided Schools - - - -	8,023	5,015
Total - - -	16,659	10,177

Compared with the attendance in 1892, these figures show an increase of 202 pupils in an average number on roll and a decrease of 12 pupils in average attendance.

On the 31st December 1893 the children attending the Government and State-aided schools stood as follows with regard to race :—

1. Creoles, European, African, or Chinese :—

Government schools - - -	6,291
Aided schools - - - -	6,132

2. Indian and Indo-Mauritian :—

Government schools - - -	2,244
Aided schools - - - -	1,946
	16,618

Religious Classification.

—	Government schools.	Aided schools.	Total.
Roman Catholic - -	6,243	6,106	12,349
Church of England - -	251	285	536
Other Christian bodies - -	133	127	260
Mahomedans - - -	616	447	1,063
Hindoos and others - -	1,297	1,113	2,410
Total - -	8,540	8,078	16,618

The teaching staff in the primary schools of the Colony at the end of the year 1893 consisted of 249 teachers and monitors in the Government schools, and of 169 teachers in the aided schools; being an increase of three teachers for the Government and of 11 for the aided schools as compared with 1892.

The cost to Government per pupil on roll in 1893 was:—

	Rs.
In Government schools - - -	16·66
In aided schools - - - -	11·59

Being Rs. 0·57 and Rs. 0·05 respectively less than in 1892.

Expenditure.

	Rs.
Administration - - - -	21,114.85
Government schools exclusively - -	149,503.41
Aided schools exclusively - -	92,956.11
Common to Government and aided schools	15,132.63
Industrial education - - -	3,245.30
	Rs.281,952.30

An increase of Rs. 5,520 over the expenditure on primary education in 1892.

Royal College.

The average number of pupils in the Royal College and Royal College Schools in 1892 and 1893 was as follows:—

—	1892.	1893.
Royal College proper - - -	201	201
Royal College School, Port Louis - -	141	117
Royal College School, Curepipe - -	172	179
Total - - - -	514	497

The expenditure for 1893 was Rs. 194,136.94 showing an increase of Rs. 13,244 over the disbursements for 1892.

POST OFFICE AND TELEGRAPHS.

The postal business during the year showed a slight falling off as compared with 1892, both in regard to the correspondence and newspapers which passed through the office, and also in the revenue collected. The Money Order business was more active, and showed an increase of Rs. 106,693 as compared with the previous year.

Statistics.

—	1892.	1893.	Decrease in 1893.
Letters - - -	1,126,254	1,115,853	10,401
Postcards - -	24,447	20,520	3,927
Newspapers - -	1,261,584	1,176,296	85,288

The Revenue collected in 1893 was Rs. 66,367 against Rs. 66,843 in 1892.

The first sub-marine telegraph cable laid to Mauritius was completed by the Eastern and South African Telegraph Company in November, and was formally inaugurated on the 25th of that month. The communication is made viâ Seychelles and Zanzibar to Aden, and the annual subsidy to be paid by the Colony is 7,000*l.*

RAILWAYS.

The railways showed an increase of business and of revenue as compared with 1892; the revenue being Rs. 1,533,720, an increase of Rs. 95,078 over the receipts of the previous year, and the expenditure amounting to Rs. 1,010,565 or Rs. 26,540 more than in 1892.

IMMIGRATION.

In 1893 there arrived in the Colony 332 immigrants, of whom 85 were from Madras and the remainder from Calcutta. The number of those who returned to India during the year was 1852, but of these 159 were coolies from Réunion, returned at the expense of the Government of that Colony. As compared with 1892, 135 more souls returned during the year under report.

The immigrant population has, owing to an unhealthy year and an excess of departures over arrivals, decreased from 86,456 in

1892 to 80,693 in 1893. Of the Creole Indian population, which gradually increases, there were working in estates 19,842, the total number of labourers employed in estates being 51,980.

METEOROLOGY.

The mean temperature between two open windows in a large and lofty room at the Observatory, 180 feet above sea level, was 72·°4 against an average of 73°·5 for the last 19 years; the absolute maximum 85°·6 on December 30 and the absolute minimum 57°·4 on August 16th. The mean temperature, obtained from maximum and minimum thermometers exposed in a Stephenson screen on the lawn, was 74°·1 against an average of 74°·8 for the last nine years; the absolute maximum 92°·7 on December 24, and the absolute minimum 53°·4 on September 13.

The mean temperature taken in the district of Moka, 1,100 feet above sea level, was 68°·7; the absolute maximum, 86°, on December 26, and the absolute minimum, 52°, on August 15.

At Curepipe, 1840 feet above sea level, the mean temperature was 67°·1; the absolute maximum, 86°·2, on December 30, and the absolute minimum, 49°·8, on August 14.

The mean barometric pressure at sea level was 30·080 inches, which is the average for the last 19 years; the maximum was 30·411 on August 22, and the minimum 29·330 on January 22.

The rainfall at the Observatory was 48·33 inches against an average of 48·41 inches for the last 19 years. The greatest fall in one month was 12·55 inches in January, and the least 0·91 inch in September. The greatest fall in 24 hours was 4·08 inches from 9 a.m. on the 20th, to 9 a.m. on the 21st April, and the greatest intensity a fall of 1·075 inch in 30 minutes on April 12. February and December were unusually dry. In other parts of the island, the rain fall was much greater than at the Observatory. At Cluny (in Grand Port), 1,000 feet, it was 131·24 inches, and at Curepipe, 1,840 feet, 119·30 inches.

The average hourly velocity of the wind was 10·6 miles against 11·1 miles for the last 18 years. The greatest velocity for one hour was 37·3 on January 27.

LEGISLATION.

Twenty-six Ordinances were passed by the Council of Government in 1893. The financial position of the Colony necessitated the renewal for another year of the Ordinances authorising the levying of a stamp duty on receipts, imposing a surcharge of 10 per cent. on certain duties and taxes, and increasing certain import duties. The loan of 600,000*l.* raised by the Colony in 1892 to meet the wants and necessities created by the disastrous hurricane of the 29th April in that year, and to provide funds for

P. N.- 11

28

589643

MAURITIUS. 1893.

certain public works having proved insufficient for the purposes for which it was obtained, a further enactment was passed in 1893 sanctioning the addition of 20,000, the premium on the above named loan, and of a sum not exceeding Rs. 450,000 to the amount set apart for making loans to planters.

Owing to an extensive conflagration on the 23rd July, a large portion of the town of Port Louis was completely destroyed, and an Ordinance was passed to provide for the acquisition by the Government of the burnt area with a view to the improvement of the same, and also to enable the necessary works for the drainage of that section of the town to be carried out in accordance with a scheme recommended by Mr. O. Chadwick, C.E., C.M.G.

JUDICIAL STATISTICS.

The total number of offences reported to the police or to the magistrates in 1893 was 39,347 or 8,808 more than in 1892.

The total number of convictions in the inferior courts was 17,890, or 450 more than 1892 and in the Supreme Court 94 against 67 in the previous year.

MILITARY.

The troops in the Colony, including one battalion of the Black Watch, Royal Artillery (90), Royal Engineers (65), Mauritius Companies Royal Artillery (203), numbered 824. The total military expenditure amounted to 54,997*l.* 14*s.* 6*d.*, and the contribution paid by the Colony during the year was 14,701*l.* 9*s.* 10*d.*

MAURITIUS.

MAURITIUS.
1894.

(For Report for 1893, *see* Colonial Report [Annual], No. 120.)

Sir H. E. H. JERNINGHAM to Mr. CHAMBERLAIN.

Government House, Mauritius,
September 2, 1895.

SIR,

I HAVE the honour to transmit to you copies of the Mauritius Blue Book for the year 1894.

2. I also transmit herewith the report on the Blue Book which has been furnished by Mr. King-Harman, the Colonial Secretary.

I have, &c.
HUBERT E. H. JERNINGHAM,
Governor.

BLUE BOOK, 1894.

REVENUE AND EXPENDITURE.

The revenue for 1894 amounted to Rs. 8,534,427·49 and the expenditure to Rs. 8,587,039·27, leaving a deficit of Rs. 52,611·78 which had to be met out of the available balances in the Treasury.

As compared with the previous year, 1893, the revenue for the year under report showed an increase of Rs. 480,505·47 and the expenditure also an increase of Rs. 714,942·44.

The ratio of revenue to the population was Rs. 22·68 per head and that of the expenditure Rs. 22·82 per head.

MAURITIUS.
1894.

PUBLIC DEBT.

The public debt on 31st December 1894 stood as follows:—

	£	s.	d.
Mauritius Debentures, payable 15th February 1895 and 15th January 1896 and bearing interest at 6 per cent. -	161,000	0	0
Savanne Railway 4½ per cent. Debentures, payable by annual drawings - -	59,900	0	0
Moka Railway 4 per cent. Debentures, payable by annual drawings in and from 1884 - - - -	2,600	0	0
Mauritius Inscribed Stock under Ordinance 1 of 1887 (including the loan made for the Mare-aux-Vocoas Water Works, 36,000*l.*) - - -	480,749	13	0
Poor Law Commission 5 per cent. Debentures, issued in 1873 - - -	3,000	0	0
Hurricane Loan, 1892 - - -	600,000	0	0
Total Public Debt - -	1,369,849	13	0

	£	s.	d.
For the redemption of the debentures and inscribed stock, the sinking fund accumulated up to the 31st December 1894 amounted to - -	224,404	19	8

Surplus Balances.

	Rs.	c.
Treasury proper -	1,551,046	90
Savings Bank -	966,805	33
Commissioners of Currency -	586,184	69
Total -	3,104,036	92

	£	s.	d.	£	s.	d.
Converted into £ sterling at 1*s.* $0\frac{20}{32}$*d.* per rupee	163,370	7	6			
Balance due from Loan Commission -	393,684	6	0			
				781,459	13	2
Leaving a balance of - -				588,390	19	10

payable at periods ranging from 30 to 47 years and provided for in the gradual operation of sinking funds.

ASSETS AND LIABILITIES.

On the 31st December 1894, the accounts of the Commissioners of Currency showed:—

	Rs.	c.
Assets - - - - -	4,611,299	69
Liabilities - - - -	4,025,115	00
Surplus - - -	586,184	69

The Government Savings Bank showed:—

	Rs.	c.

Surplus, 31st December 1894 -	1,551,046	90

IMPORTS AND EXPORTS.

Exclusive of specie and bullion, the value of imports in 1894 amounted to Rs. 21,096,011 and that of exports to Rs. 31,228,619.

The values in 1893, also exclusive of specie and bullion, were:—

	Rs.
Imports - - - - -	18,899,939
Exports - - - - -	22,176,486

The rate of imports per head of population was as follows during 1893 and 1894:—

	Rs.	c.
1893 - - - - - -	50	83
1894 - - - - - -	56	07

The rate of exports per head of population was as follows:—

	Rs.	c.
1893 - - - - - -	59	67
1894 - - - - - -	83	00

The exports of sugar manufactured in the Colony in 1893 and 1894 were as follows:—

—	Quantity.	Value.
	Kilos.	Rs.
1893	86,057,841	19,409,218
1894	138,431,733	28,461,574

The value of the other principal local products exported in 1893 and 1894 were as follows:—

—	1893.	1894.
	Rs.	Rs.
Rum	332,441	424,632
Vanilla	83,895	82,720
Aloe fibre	264,840	171,526
Molasses	104,625	217,859
Cocoanut oil	251,198	59,565
Raw hides	33,539	33,499

The following are the principal markets to which the sugar of the Colony was shipped:—

—	1893.	1894.
	Kilos.	Kilos.
India	39,804,432	73,335,600
Australia	7,114,642	17,075,354
United Kingdom	10,235,082	11,828,624
Cape Colonies	11,620,164	12,369,395
Ceylon	10,342,402	14,179,389
St. Helena	96,068	93,764

Hardware and cutlery - - - - -	377,899	352,360
Leather (wrought and unwrought) - -	191,005	158,995
Manure and fertilizers - - - - -	1,806,518	724,193
Oil of all kinds - - - - - -	756,855	799,552
Tobacco - - - - - - -	187,890	141,555

SHIPPING.

The following table gives the number of ships and their tonnage entered inwards and cleared outwards in 1893 and 1894.

Year.	Inwards.		Outwards.	
	No.	Tonnage.	No.	Tonnage.
1893 - - -	340	293,990	347	293,042
1894 - - -	335	316,350	340	324,748

Of the vessels that entered and cleared, 124 sailing vessels and 93 steamers were British; 25 sailing vessels and 51 steamers were French; 28 sailing vessels and 3 steamers were German; and 14 sailing vessels and 2 steamers were Norwegian.

There were also two American, three Danish, and two Swedish, sailing vessels.

POPULATION AND VITAL STATISTICS.

The population of the Colony may be divided into two main sections: Indian and general, or non-Indian. The former includes the immigrants or labourers imported for service on sugar estates, settlers from India, and Indo-Mauritians, or persons of Indian parentage born in the Colony; the latter comprises the native, or creole race, whether of European or African descent, and all foreigners domiciled in the island, including the Chinese, an important group, whose strength is estimated at about 4,000.

The estimated population at the close of 1894 was as follows:—

——	Males.	Females.	Total.
Indian population - - -	146,581	112,643	259,224
General „ - - -	60,047	56,948	116,995
Total - - -	206,628	169,591	376,219

The births registered in 1894 were:—

Indian population - - -	9,875
General „ - - - -	4,287
Total - - -	14,162

The deaths:—

Indian population - - -	7,207
General „ - - - -	3,585
Total - - -	10.792

The mortality of 1894 was relatively low; the deaths numbered 10,792 against 15,307 of the preceding year when influenza prevailed. The corresponding death rate is 29 per 1,000, more satisfactory figures than usual. In 1886 and 1891 the death rate was a little lower, 28·9 and 27·2; but with these exceptions the death rate is one of the lowest recorded.

The death rate among the Indian division was 28·1 while in the general division it was 30·9.

The death rate of the male population was 28·9, and that of the female 29·1, showing no appreciable difference.

LEGISLATION.

Thirty-one Ordinances were passed by the Council of Government in 1894, of which one was disallowed by Her Majesty and an Order in Council issued to effect the object which the projected Ordinance had in view.

The legislation of the year included many noticeable measures, of which the following may be briefly cited as the most important:—

(1.) An Ordinance for the administration of the loan fund. This ordinance creates a permanent department charged with the duties of managing the fund arising out of the loan of 600,000*l.* guaranteed by the Imperial Government, and raised for the relief of planters and owners of houses after the disastrous hurricane of the 29th April 1892. The fund is charged with the payment of interest and sinking fund on the guaranteed loan as well as all expenses connected with the administration of the fund. The administration is vested in the Governor, and a board consisting of four officials and seven unofficial members of the Council of Government is created to advise him.

(2.) An Ordinance to amend the law relating to the Mare-aux-Vacoas water supply. This Ordinance was passed with a view to regulate the distribution of the filtered water now being supplied from the Mare-aux-Vacoas to an important section of the Island. It enacts stringent regulations in order to put a stop to the incredible waste of water which went on under the old system of water works; it introduces the meter system of supply for both domestic and non-domestic purposes, and was introduced in accordance with the recommendations of Mr. Osbert Chadwick, C.E., C.M.G.

(3.) An Ordinance to provide for the carrying out of drainage works in the town of Port Louis. This Ordinance also was introduced to carry out a scheme by Mr. Chadwick for the underground drainage of a portion of the town. This scheme of drainage met with much opposition on the part of a considerable, and a not uninfluential, portion of the inhabitants of Port Louis, and was combated in its passage through the Legislature by the two metropolitan members. Otherwise there was perfect unanimity in the Council of Government as to the necessity of attempting the proposed experiment, and the measure was passed with two dissentients only.

(4.) An Ordinance to empower the municipality of Port Louis to levy a tax on tenants' houses in the town. This Ordinance was introduced, at the request of the mayor and corporation, in order to assist the financial condition of the municipality, to which the Secretary of State for the Colonies had drawn attention. The members for Port Louis having declined to introduce the Ordinance, it was drafted and introduced by the Procureur-General, and passed after considerable discussion and opposition. In the meanwhile, the majority of the municipal council having expressed themselves against the principle of the Ordinance, no action has yet been taken to apply its provisions.

(5.) An Ordinance to amend an Order in Council of the 13th April 1831 by substituting the sum of Rs. 10,000 for 1,000*l*. was introduced by the Hon. W. Newton, Q.C., senior member for Port Louis. This Ordinance gave rise to much interesting discussion, being opposed by the Procureur-General on the ground that it went beyond the powers of the Colonial Legislature. It was passed against the wish of the Procureur-General, and was afterwards disallowed, an Order in Council being issued by Her Majesty to effect the object which Mr. Newton had in view.

METEOROLOGICAL OBSERVATIONS.

The mean temperature in the shade between two open windows in a lofty room was 73·2 against an average of 73·5 for the last 20 years.

The absolute maximum was 86·4 on January 6th; the absolute minimum 56·8 on June 11th.

The mean temperature from a maximum and minimum thermometer exposed in a Stevenson's screen on a lawn was 74·3, against an average of 74·5 for the last ten years. The absolute maximum was 93·5 on January 3rd, the absolute minimum 50·6 on June 10th.

So far as is yet known, there were nine tropical cyclones in the South Indian Ocean in the course of the year, two of which passed close to the Island, doing, however, no material damage beyond the upsetting of a train crossing a bridge whereby five lives were lost. The train was light, largely made up of carriages carrying an upper storey, and left the rails before the force of a violent gust of wind. The Observatory, where the meteorological observations are taken, is on a plain 179 feet above the sea level and about six miles from Port Louis.

In the upper parts of the Island the temperature is much cooler, varying between a maximum of 86 in the summer months, January, February, and March, to a minimum of 53 in the cool season, June, July, and August.

The rainfall in the higher parts is heavy, the average at Curepipe, 1,840 feet above the sea level, being 125 inches.

IMMIGRATION.

In 1894, 338 coolies were received from Calcutta and 381 from Madras. These men are supplied from the Emigration Agencies on requisition from the planters, and are employed on the cultivation of Sugar estates.

During the year, 754 coolies returned to India accompanied by 214 women.

EDUCATION.

Primary Schools.

There were in operation in 1894, 174 primary schools, viz: Government schools, 82; aided schools, 92. In 1893 there were 81 Government schools, and 87 aided.

The average number of scholars on roll in 1894 was:—

In Government schools - -	9,191
In aided schools - - -	8,510
Total - - -	17,701
Average number in 1893 - -	16,659
Increase - - - -	1,042

Of the total number of pupils at the end of 1894, 71·76 per cent. were creoles of either European, African, or Chinese descent, and 28·24 per cent. were Indians or of Indian origin.

Royal College.

The average number of pupils in the Royal College and Royal College School in 1893 and 1894 was as follows:—

—	1893.	1894.
Royal College proper - - -	201	203
Royal College School, Port Louis - -	117	100
Royal College Curepipe - -	179	195
Total - - - -	497	498

The expenditure on education in 1894 was Rs. 496,005·44, showing an increase of Rs. 19,916·20 over the disbursements of 1893.

JUDICIAL STATISTICS.

The total number of offences reported to the police or to the magistrates in 1894 was 51,103, an increase of 11,756 over the reports in 1893.

The total number of convictions in the inferior courts was 19,995, an increase of 2,105 over the convictions in the previous year.

The convictions in the Supreme Court were:—

—	1893.	1894.
Offences against the person - - -	23	7
Offences against property -	40	27
Other offences - - - - -	4	11
Total - - -	67	45

The acquittals were as follows:—

—	1893.	1894.
Inferior courts - - - - -	5,208	5,012
Supreme Court - - - -	21	20
Total - - - -	5,229	5,032

MAURITIUS.
1894.

RAILWAYS.

The railways of the Colony are in a flourishing condition, the passenger traffic being conducted with great regularity. No delay in the running of the trains was complained of by the public, and with the exception of the disaster on the 22nd February, when a train was blown off the St. Louis bridge, no accident of any moment occurred during the year.

The revenue and expenditure of the Railway Department were:—

Revenue Rs. 1,585,720, an increase of Rs. 205,088 over 1893.

Expenditure, Rs. 1,010,565, an increase of Rs. 74,864 over 1893.

MILITARY.

The troops in the Colony, including one battalion of the Black Watch, Royal Artillery (European and Indian) (333), Royal Engineers (72), numbered 915 as against 824 in 1893.

The total military expenditure amounted to 51,867*l.* and the contribution paid by the Colony was 13,805*l.* 13*s.* 9*d.*

H. KING-HARMAN,
Colonial Secretary.

No. 183.

MAURITIUS.

(For Report for 1894, *see* No. 156.)

The ACTING GOVERNOR to Mr. CHAMBERLAIN.

Government House, Mauritius,
July 30, 1896.

SIR,

I HAVE the honour to transmit to you copies of the Mauritius Blue Book for the year 1895, together with copies of the usual summary.

2. I also transmit herewith my report on the Blue Book.

I have, &c.
C. A. KING HARMAN,
Administering the Government.

REPORT ON THE BLUE BOOK for 1895.

FINANCE.

The Revenue for year 1895 was Rs. 8,273,622.03, the expenditure Rs. 8,488,736.78, showing an excess of expenditure over revenue amounting to Rs. 215,114.75.

That excess was met from the surplus balances in the Treasury, no extra taxation being imposed beyond a slight readjustment of the customs duties, involving a small increase in certain items.

The revenue collected showed an increase of Rs. 758,812 in excess of the estimate, and the expenditure was Rs. 182,222 below what was anticipated.

The balance in favour of the Treasury at the end of 1894 was Rs. 1,551,046.96, and at the end of 1895 Rs. 1,254,403·10, showing a decrease of Rs. 296,643·86. This decrease would have been larger had not the Colony obtained a windfall of Rs. 216,354 by carrying to revenue surplus investments of the Commissioners of Currency.

The balance in favour of the Treasury, besides being reduced by the excess of expenditure over revenue, also suffered from the depreciation of the rupee value of the sterling investments of the Colony.

There was also an unexpected falling off in the receipts from the important item of duty on rum, the amount collected having been Rs. 287,687 below what had been estimated; and this loss, combined with the fact that the Budget for the year had shown an anticipated deficit of Rs. 500,000, more than accounts for the comparatively small deficit of Rs. 215,114 with which the accounts for the year were closed.

MAURITIUS.
1895.

In the early part of the year, owing to the payment into the Sinking Fund for the redemption of Railway Debentures being in excess of the amount required for the extinction of the debt, a sum of 20,587*l.* 18*s.* 7*d.* was passed over to the credit of the Surplus Fund Account. That account amounted at the end of 1895 to 54,453*l.* 12*s.* 1*d.*, which in case of emergency can be realised at any time.

The assets of the Colony at the close of the year amounted to Rs. 2,517,470.32, with liabilities Rs. 1,263,067.22, leaving a balance of Rs. 1,254,403.10 in favour of the Treasury.

To meet the Public Debt, which at the close of 1895 stood at 1,276,535*l.* 7*s.* 3*d.*, the amount at the disposal of the Colony from Sinking Funds and surplus balances, valuing the rupee at 1s. 1$\frac{11}{16}$*d.*, equivalent to a rate of exchange of 75 per cent., amounted to 642,557*l.* 5*s.*11*d.*, leaving a balance of 633,978*l.*1*s.* 4*d.*, which represents the actual debt of the Colony.

Financial Condition of the Municipal Corporation of Port Louis.

* Including 43,845 kilos., value Rs. 9,014·53, shortshipped in preceding year, but on which the duties had been paid.

† Including 43,845 kilos. shortshipped in preceding year.

MAURITIUS.
1895.

The value of other local products exported in 1894–95, inclusive of shipping charges, was as follows:—

—	1894.	1895.
	Rs.	Rs.
Rum - - -	439,434	300,558
Vanilla - - -	84,374	222,303
Aloe fibre - -	178,388	423,006
Molasses - -	431,361	355,316
Cocoanut oil - -	85,571	93,241

The following statement shows the quantities of the local products exported in 1894–95:—

—	1894.	1895.
Rum (litres) - - - -	3,053,783	3,024,583
Vanilla (kilos.) - - - -	4,136	18,766
Aloe fibre (kilos.) - - - -	857,633	1,311,838
Molasses „ - - -	7,415,350	9,808,490
Cocoa-nut oil (hectol.) - - -	4,207	2,378

The falling off in imports and exports in 1895, as compared with the previous year, is to be attributed to the short sugar crop in 1894–95, as compared with the crop of 1893–94.

In 1894, 138,431 tons of sugar was exported, and in 1895 only 116,454 tons.

The imports were also affected to a certain extent by the rate of exchange.

In 1894 the average rate was 80 per cent., and in 1895, 83·23 per cent.

SHIPPING.

The returns of shipping, as compared with 1894, are as follows:—

—	1894.		1895.	
	No.	Tons.	No.	Tons.
Entered - -	335	316,350	344	346,506
Cleared - -	340	324,748	338	340,508
Total -	675	641,098	682	687,014

MAURITIUS.
1895.

showing an increase of nine ships entered in 1895, and a decrease of two ships cleared.

MILITARY EXPENDITURE.

The military contribution paid by the Colony in 1895 amounted to 14,906*l.* 5*s.*

The troops in the Colony at the end of the year, including Staff, Royal Artillery, Royal Engineers, 1st Battn. the Black Watch, Army Service Corps, Ordnance Store Corps, and Medical Staff Corps, amounted to 946 men.

The total military expenditure amounted to 53,859*l.*

VITAL STATISTICS.

At the close of the year 1895 the resident population of the Colony amounted to 378,041 men, women, and children of different races and nationalities; not including the troops, nor the crews of non-colonial ships temporarily riding in the harbour of Port Louis. The increase, as compared with the total population at the end of 1894, is 1,822, and this increase is almost entirely due to the excess of arrivals over departures, the natural increment of population, that is to say, the excess of births over deaths, being only 12. The natural increment in 1894 was 3,370, and the remarkable falling off is due mainly to the high death rate of the year under report.

The population may be divided into two principal heads: General, including the Chinese, and Indian, including all those of Indian descent.

At the close of the year 1895 the general population consisted of—

Males.	Females.	Total.
60,350	56,699	117,049

and at the end of 1894:—

Males.	Females.	Total.
60,047	56,948	116,995

showing an increase of 303 males, but a decrease of 249 females, and a resultant total increase of 54.

The Chinese element included in the above figures consisted at the close of 1895 of 3,700 souls, an increase of 83 over a similar population at the end of the previous year.

The Indian population may be divided into three sections: the Indo-Mauritians, or natives of Indian extraction, the immigrants, and those other Indians who have either come to the Colony under no indenture, or have remained after their period of indenture has been concluded.

The figures showing the strength of these various Indian elements on the 31st December 1895 are as follows :—

—	Males.	Females.	Total.
Indo-Mauritians - - -	90,000	87,000	177,000
Immigrants - - - -	51,153	24,757	75,910
Other Indians - - - -	5,967	2,115	8,082
			260,992

These figures as compared with those at the close of the previous year show an increase of 539 males and 1,229 females, total 1,768.

We find, therefore, that during the year 1895 the Indian population had increased by 1,768 souls, the Chinese had increased by 83, and the remaining general creole population had decreased by 29, giving a net increase of 1,822 souls. The natural increment, or the increase of births over deaths, among the Indian population during 1895 was 231, or not quite 1 per 1,000; but among the general population there was a natural decrement of 219, or about 2 per 1,000. The total natural increment was therefore only 12, as stated in the beginning of this report.

Proportion of males to females. In the whole population the males predominate; but the ratio of predominance is steadily diminishing. In the general population there are 106 males to 100 females and in the combined Indian sections 129 males to 100 females. The marriage rate or number of persons married to every 1,000 living in the whole population in 1895 was 6·2. This is lower than that of the previous year, when it was 6·7.

The birth rate during the year (of the total population) was 37·1 per 1,000, or 1 per 1,000 lower than in 1894, when, however, the birth rate was exceptionally high.

The mortality of 1895 was exceedingly high, the death rate being 37·1 as against 29·0 in 1894. In 1893 the rate was 40·9, due principally to an epidemic of influenza, and in 1892 the terrible cyclone of the 29th April raised the rate to 38·2. These two years excepted, the death rate of 1895 will be seen to be the highest since 1868. The principal cause of the high rate seems to be the prevalence of dysentery, which in some districts occasioned very many deaths.

In Port Louis the death rate for the year was 47·7, as against 42·2 in the year 1894.

MAURITIUS.
1895.

POLICE.

The total effective strength of the Police Force as allowed by law is 708; the actual strength, however, on the 31st December 1895 was 704. But from these numbers must be deducted 113 men employed on miscellaneous duties or sick in hospital, thus leaving but 591 for the repression and detection of crime and for the enforcement of the laws.

The question of increasing the strength of the force is under consideration.

The force during 1895 was composed of the following nationalities:—

Europeans	45
Mauritians	468
Indians	173
Arab	1
Americans	6
Australian	1
Cape of Good Hope	5
Réunion	5

CRIMINAL STATISTICS.

The total number of offences reported to the police or to the Magistrates in 1895 was 33,023, a decrease of 18,080 as compared with 1894.

The total number of convictions in the inferior courts was 19,592, an increase of 403 as compared with 1894.

The convictions in the Supreme Court were as follows:—

——	1894.	1895.
Offences against the person	7	37
Offences against property	27	28
Other offences	11	2
Totals	45	67

The acquittals were as follows:—

——	1894.	1895.
In the inferior courts	5,012	2,495
In the Supreme Court	20	8
Totals	5,032	2,803

PRISONS.

The admissions into the several gaols of the Island during the year 1895 amounted to 6,417 males and 341 females, a decrease of 1,000 males and an increase of 3 females as compared with the previous year.

The population on 31st December, including 35 in hospital, was 1,033 as compared with 1,067 on the last day of 1894, of whom 56 were in hospital.

The numbers admitted to hospital during the years 1894 and 1895, with the number of deaths in each of those years, are as follows:—

Year.	Admitted.			Died.		
	Males.	Females.	Total.	Males.	Females.	Total.
1894 - - -	1,439	37	1,476	70	2	72
1895 - - -	1,773	79	1,832	78	3	81

Twenty-one escapes occurred during the year, 20 of which were from gangs employed at out-door labour. In 1894 there were 25 escapes, 23 being from out-door labour. 24 escaped prisoners were re-captured in 1895, including five who had escaped in previous years.

The value of the work done by the prisoners during the year, together with the value of the material, plant, and machinery in hand on the 31st December amounted to Rs. 142,218.35 as against similar values in 1894, Rs. 109.266.50.

The bulk of the work was extra-mural either in the prison gardens or on the roads, and the work done within the walls was exclusively for the use of the Government Departments.

Taking credit for cash payments and labour of prisoners the cost per head has been Rs. 135.64 against Rs. 142.33 in 1894.

The long pending works at the central prisons, Beau Bassin, were practically concluded by the end of the year, and orders had been issued for the closing of the three district prisons and for the concentration of all prisoners at the central prison, where accommodation was ready for 972 men, any over that number being detained in the Port Louis gaol.

In the new block B., 432 prisoners can be received on the separate system, and steps will be taken to partly introduce the same system into Block A., where 540 prisoners are confined in association, three men being in each cell.

REFORMATORY.

The number of juvenile offenders admitted into the Reformatory during the year 1895 was 270, a decrease of 90 as compared with the preceding year. The conduct of the boys was very unsatisfactory, escapes were frequent, and 218 offences against discipline are recorded during the year.

The absence of any minimum period of detention leads to the commitment of boys for short periods, and the institution is apparently regarded more in the light of a juvenile prison than a reformatory. Under these circumstances it is hardly to be wondered at that the object for which it was established is rarely attained.

EDUCATION.

The year under report is not marked by any special event in the Education Department. An attempt was made during the year to bring to a head and to give effect to certain recommendations of the Royal College Commission, together with instructions from the Secretary of State, which would have placed the Education Department under a Director of Public Instruction, the post of Superintendent of Schools and the Council of Education with its committees being thereby abolished, and which would also have brought about other important changes in the educational system in the Colony.

But the elected members of the Legislature, supported by the entire press of the Island, requested that the matter should be postponed until after the elections had been held, during which time the proposals could be laid before, and discussed by, the electorate.

This was agreed to, and no change was therefore introduced in 1895.

The year 1894 closed with 172 schools and 17,701 pupils. The number of schools increased to 179 and the pupils to 18,279 by the end of 1895.

Of these schools, 49 were first grade, 31 second grade, two reformatory and 97 State-aided. The 97 State-aided were divided into:—

Roman Catholic -	- 61	with 6,554 pupils.
Church of England	- 33	„ 2,001 „
Presbyterian -	- 2	„ 172 „
Mahomedan -	- 1	„ 133 „

The Superintendent of Schools reports that the results of the examinations in the Government and non-Roman Catholic schools were more satisfactory than in 1894, marked improvements being noticeable in almost every branch. The Inspector of Roman Catholic Aided Schools reports in the same satisfactory terms.

The sum spent on primary Government schools for the year 1895, irrespective of cost of administration, maintenance of Government buildings, cost of scholarships, books, and stationery for sale to aided school managers, Government teachers and pupils, and industrial apprenticeships, was Rs. 255,682·75 against Rs. 238,752.80 in 1894.

The grant to aided schools amounted to Rs. 103,060 against Rs. 92,992.72 in 1894.

The cost per pupil amounted to—

	Rs.
In Government schools - - -	16.20
In aided schools - - - -	11.63

against Rs. 15.86 and Rs. 10.93 respectively in 1894.

MAURITIUS.
1895.

The programme of studies in a Government school is far more important and extensive than that of a State-aided school and the work done reaches a higher standard.

In the year under report the first examination took place for two scholarships for girls, of the annual value of Rs. 244 each for three years. 27 candidates presented themselves and the general result of the examination was satisfactory.

SAVINGS BANK.

The number of depositors in 1895 as compared with 1894 shows an increase of 511, the numbers for the respective years being :—

1895 - - - -	23,327
1894 - - - -	22,816

The amount deposited in 1895 was Rs. 1,047,135, in 1894 Rs. 1,149,816, showing a decrease in 1895 of Rs. 102,681.

The amount withdrawn in 1895 was Rs. 1,226,184, in 1894 Rs. 1,236,678, showing a decrease in 1895 of Rs. 10,494.

The total sum standing to the credit of depositors at the end of 1895, including the interest due to them was Rs. 3,174,043.

Of this sum Rs. 1,476,289 belonged to the Indian population.

The funds belonging to the Savings Bank at the end of 1895 were distributed as follows, the value of the investment being shown in each case :—

	£	s.	d.
2¾ per cent. Consols - - -	65,142	18	5
3½ per cent. Canada - - -	1,546	1	5
4 per cent. Cape of Good Hope (A. and O.) - - -	13,615	17	6
4 per cent. Cape of Good Hope (T. and D.) - - -	763	18	9
4 per cent. Ceylon - - -	31,274	5	0
3½ per cent. New South Wales -	11,117	9	10
4 per cent. do. - -	4,911	18	1
4 per cent. Victoria (1919) - -	2,031	4	3
4 per cent. do. (1920) - -	1 624	10	4
	132,028	3	7
Indian Securities—			
3 per cent. Stock, Rs. 65,000 at 60⅞ -	3,956	17	6
Do. Rs. 1,691,500 at 58⅞ -	99,587	1	3
	235,572	2	4

	Rs.	c.
Equal at par to - - -	2,355,721	16
Add exchange at 75 per cent. - -	1,766,790	87
Total investments in rupees - -	4,122,512	03
Add cash balance - - -	19,985	41
Total assets of Bank -	4,142,497	44

The liabilities of the bank at the end of 1895 were:—

	Rs.	c.
Due to depositors - - - -	3,073,358	14
Do. Treasury account advances - -	266,258	19
Total - - - -	3,339,616	33
Balance in favour of bank - - -	802,881	11

The total amount of interest at 3½ per cent. accruing to depositors in 1895 was Rs. 97,017.44, or Rs. 34,487.92 less than the interest realised by investments.

The total cost of the establishment of the bank in 1895 was Rs. 13,470.36.

LEGISLATION.

Out of 49 Draft Ordinances introduced into the Council of Government during the session of 1895, 32 were passed. Owing to the great pressure of work, some important measures, such as the New Building Act, the New Penal Code, and the Vaccination and Re-vaccination Ordinance, could not be proceeded with, but will be re-introduced as early as possible.

Of the Ordinances passed, the following are the most important:—

"To amend and consolidate the Customs Tariff."

The principal object of this measure is to consolidate the Customs Tariff by amalgamating the permanent with the provisional Customs Tariff Laws; the provisional surtax of 10 per cent. on Customs duties and the increased duties on certain imports have thus been made permanent and the work of the Customs Department and of the mercantile community in regard to Customs entries has been simplified.

Advantage has been taken of the passing of this law to amend by increase or reduction a number of items of the tariff.

An Ordinance "to provide for the appointment of a Board of Commissioners for the towns of Beau Bassin and Rose Hill," and an Ordinance "to provide for the appointment of a Board of Commissioners for the town of Quatre Bornes."

These two Ordinances were introduced to satisfy the demand of the inhabitants in the districts or towns mentioned for a certain measure of local government, and excited a great deal of local interest. The respective Boards are provided with funds necessary for the carrying out of the work entrusted to them by giving them a sum from the Treasury equal to the amount of the direct taxes paid on vehicles and animals used and kept in the town and also the power to levy a rate upon house property not to exceed one per cent. per annum of the value of the property assessed.

An Ordinance "to appropriate five per cent. of the Revenue of "Mauritius to the use of the Imperial Government as a Military "Contribution."

This Ordinance was passed, but not in the exact form in which it was introduced, several important items of receipt being exempted from the per-centage and the operation of the law restricted to revenue accruing after January 1896.

An Ordinance "to amend Ordinance No. 5 of 1887."

Under this Ordinance the magistrates of the Colony are given the duties and powers of revising barristers in respect of the elections to the Council of Government.

An Ordinance "to reduce to 4 per cent. the rate of interest on all moneys belonging to the Widows and Orphans Pension Fund and invested with the Government of this Colony."

"The Crown Prosecutor's Ordinance, 1895," renders permanent the posts of two Crown Prosecutors and defines their duties and powers

IMMIGRATION.

729 adult men and 226 women were imported during the year 1895 from Calcutta, and 481 adult men and 159 women from Madras, and during the same period 784 men and 219 women were returned to India.

The mortality on the sugar estates was very high, due principally to dysentery and an epidemic of measles. The total number of deaths from all causes amounted to 3,925, equal to 34·2 per 1000.

The rate per 1,000 of mortality on sugar estates for the last five years has been as follows:—

1891 - - - -	23·4 per 1,000.
1892 - - - -	29·9 „
1893 - - - -	39·1 „
1894 - - - -	25·2 „
1895 - - - -	34·2 „

It is satisfactory to observe that the relations between employers and employed are improving year by year, judging from the diminishing number of complaints lodged by the Indians in the district courts.

As a light thrown upon the permanent settlement of Indians in the Colony, the Protector of Immigrants reports that in regard to the value of property bought by Indians during the year 1894, as compared with 1893, there is an increase of Rs. 774,707, but that in 1895 there was a decrease of Rs. 865,182.

In spite of the sickly season, the condition of the Indian population in the Island during the year under review was satisfactory. Work was plentiful throughout the year, and in consequence wages were high. It is estimated that a fourth of the sugar manufactured in the Island was produced by them

POST OFFICE and TELEGRAPH.

The revenue collected in 1895 was Rs. 66,021.35, an increase of Rs. 407.06 over the amount collected in 1894.

The expenditure amounted to Rs. 183,742.32, or Rs. 1,451.60 more than the disbursements in 1894.

The business of the Department shows an increase in letters, post cards, and newspapers, but a considerable decrease in the postal money orders.

The subsidy of Rs. 60,000 to the Messageries Maritimes Company continued to be paid during the year.

An annual subsidy also of 7,000*l.* is paid by the Colony to the Eastern and South African Telegraph Company, Limited, towards the expense of the cable from Mauritius to Seychelles, and Seychelles to Zanzibar.

POOR LAW RELIEF.

The total number of paupers relieved and maintained by the Poor Law Department throughout the Colony during the year 1895 amounted to 82,042 against 83,575 for the previous years, showing a decrease of 1,533 in favour of the year under report.

The relief was distributed as follows :—

Indoor - - - - -	12,870
Outdoor - - - -	69,172
Total - -	82,042

The expenditure of the Department in 1895 amounted to Rs. 186,647·93 against Rs. 218,640·00 spent in the preceding year, a decrease of Rs. 32,993 in favour of 1895.

The ratio of paupers in general in 1895 as compared with the population on December 31, 1894, was 1 in 4, about the same as that of the year 1894.

AGRICULTURE.

The year 1895 opened badly. A short crop and low prices in 1894 had left a balance against the Colony, and there was little in the position of the staple industry to warrant a hope for an improvement in the market. In January and February a rainfall far below the average not only caused apprehensions of a drought such as did so much damage to the crop of 1894, but actually arrested vegetation and threw back the young canes at least a month. Plentiful rains in March, however, did much to remedy the mischief, and a favourable season, without any important meteorological disturbance, produced one of the largest crops recorded during the last few years. The destruction of the Cuban crop and a good demand for sugar for the Australian and South African Colonies tended to keep the market at a remunerative figure by reducing stocks and diverting a considerable quantity of produce from the Indian consumer, practically the only other customer for Mauritius high class sugar.

The most noticeable feature in agriculture during the year has been the great increase in production of canes by small cultivators. These are almost entirely confined to the Indian classes, generally men who have worked out their indentures and who, having saved a little money, are able to purchase their own small patches of land. It is exceedingly difficult to estimate the total quantity of land under this kind of cultivation, as no official return is yet made of the area cultivated by what may be termed peasant proprietors. Such a return might also show the amount of land under canes on estates where there are no mills, and the quantity of sugar made from the produce of such lands, and, in the present transitory condition of the arable land in Mauritius, would be an important and an interesting document.

The Indian, having acquired his small patch of property, is able to turn his industrious habits to good account, for while on the large estates the labour force is carefully protected by Government and a system of task work has gradually been accepted which brings the effective labour to a minimum compared with the nominal labour force employed, the Indian peasant proprietor works early and late, and it is no uncommon sight to see men who have finished their task on estates working on their own patches after hours, assisted by every member of their families.

During the year 1895 much land has changed hands, and the "amorcellement," or sale in small lots, of estates affords the opportunity to the Indian to acquire property. That the movement will go on at an increasing pace is inevitable, and a significant fact is that many proprietors are increasing the power of their factories in view of buying the canes produced by these small planters. Thus the central factory system is within the sphere of practical economics, and, with large areas of land coming into the market, and the increasing scarcity of labour, it is more than ever probable that the process of manufacture will eventually be entirely separated from the production of the raw material. Such a division of labour will undoubtedly be for the benefit of the Colony in giving that profit which, under the existing system, is not sufficiently certain to have the effect of attracting capital.

For the rest, there is little progress to be recorded in the methods of cultivation. The Committee of Chemists of the Chamber of Agriculture laid themselves out to conduct a series of experiments with various fertilizers under the able guidance of Monsieur P. Boname, Director of the Station Agronomique, and every opportunity was afforded at that excellent institution to planters for increasing their knowledge and comparing various methods of cultivation. But there has been little response on the part of the planting community, who are slow to adopt systems novel to themselves and their forefathers. A return of two tons to the acre, which may be regarded as a good average crop, is not as much as might be expected from the generally fertile soil and favourable climate of Mauritius.

In mechanical appliances for the manufacture of sugar there are no improvements to be recorded during the year, and although, as stated above, many factories have been increased in power in view of the large purchases of canes from petty planters, no important additions have been made to the existing machinery.

It has been demonstrated that the cost of fuel deprives the diffusion process, at the one factory where it has been tried in the Colony, of the profit obtained by the greater extraction, and that unless coal can be obtained from India or Natal at a much lower price than is charged for that now imported from Australia or England, it is not likely that the system will gain ground or be substituted for the double crushing. The fuel question will, however, soon become an important one for the sugar industry generally, the supply of wood being alarmingly short, and the systematic planting of timber being to a great extent neglected.

PUBLIC HEALTH.

The Director of Medical and Health Department reports that on the whole the public health of the Colony was comparatively good during 1895. The disease most prevalent was, as usual, malarial fever with its various forms and complications, and those coming next in order were dysentery and phthisis.

During the latter part of the year many cases of measles, which is not endemic in the Island, occurred in different districts, the disease assuming an epidemic character.

C. A. KING HARMAN,
Acting Governor.

July 29, 1896.

RODRIGUES.

Rodrigues.
1894.

Sir H. E. Jerningham to Mr. Chamberlain.

Government House, Mauritius,
January 6, 1896.

Sir,

I have the honour to transmit the Report on the Rodrigues Blue Book by Mr. Colin, the Magistrate, for the year 1894.

I have, &c.
Hubert E. H. Jerningham,
Governor.

Report on the Rodrigues Blue Book for the Year 1894.

Taxation.

In 1894 the taxation on cattle was reduced to R.1 per head of cattle.

Revenue and Expenditure.

The revenue of the year amounted to Rs. 8,880·23 against Rs. 5,131·06 in 1893.

The payments amounted to Rs. 29,637·58 against Rs. 22,600·7 in 1893.

Forest revenue, land rent, dog tax, pasturage fees and licenses are the principal heads of revenue (Custom duties are collected in Mauritius).

The excess of payments is to be attributed to the new buildings, roads, jetty, water reservoir, and to extra salaries.

Exports and Imports.

The exports exclusive of specie amounted to Rs. 105,729·46 against Rs. 94,972·20 in 1893. The ratio of export per head was Rs. 40·90 in 1893 and Rs. 41·92 in 1894.

The imports show a total of Rs.137,133·55 against Rs.107,002·25 in the preceding year.

The ratio of import per head was Rs. 54·21 against Rs. 45·88 in 1893.

SHIPPING.

Under this head, the year 1894 compared with 1893 shows the following differences:—

—	Inwards.	Outwards.
1893 - - -	10	11
1894 - - -	10	9

The subventioned ship (s.s. "Touareg") was wrecked in the Port Mathurin creek on the 18th December 1894.

The subsidy for postal service is always paid in Mauritius.

POPULATION AND VITAL STATISTICS.

The population on the 31st December 1893 was composed of 2,322 souls, *i.e.*, 1,268 males and 1,054 females.

GENERAL REMARKS.

The crop of 1894 has been very poor, owing to the gale of the 23rd April last.

Tobacco plantations are increasing considerably. If the "Touareg" had not been wrecked, the exportation of tobacco would have amounted to about 20,331½ kilos.

By the wreck of the subventioned ship a loss of about Rs. 35,000 is incurred by the population.

A water reservoir has been constructed, and if pipes are sent in time the population of Port Mathurin will have pure water by the end of 1895.

A road leading to St. Gabriel has been begun, as well as a jetty to facilitate the discharging of cargo.

The Government surveyor has surveyed numerous lots of Crown lands, many of which will be sold in the course of the year 1895.

Several buildings have been repaired.

B. H. COLIN,
Magistrate of Rodrigues.

January 15, 1895.

RODRIGUES.

Rodrigues.
1895.

The Acting Governor to Mr. Chamberlain.

Government House, Mauritius,
August 29, 1896.

Sir,

I have the honour to transmit the report on the Rodrigues Blue Book by Mr. F. Robert, the Acting Magistrate, for the year 1895.

I have, &c.
C. A. King Harman,
Administering the Government.

Report on the Rodrigues Blue Book for the Year 1895.

Revenue.

	Rs.
The revenue of the year (exclusive of customs and sums received in Mauritius) amounted to - - - -	10,372·00
And the revenue of 1894 to - -	8,880·23
Showing an increase of - - -	1,491·77

Licenses, dog-tax, pasturage fees, land rent, forest produce, fines and land sales were the principal heads of revenue.

Expenditure.

	Rs.
The payments made in 1895, (not including sums paid in Mauritius and matters of account) amounted to - - -	23,092·00
And the expenditure of 1894 (not including sums paid in Mauritius and matters of account) to - - - -	29,637·58
Showing a decrease of - - -	6,545·58

JUDICIAL.

Criminal Side.

The most common charges were for breach of forest and fishery laws, disturbance, larceny, assault, abusive language, drunkenness, possession of stolen property, and refusing to lend assistance to quench fires.

—	1894.	1895.
No. of informations filed (including applications for search-warrants) - - - -	53	69
No. of adjudications - - - -	41	40
No. of cases abandoned - - - -	12	13
No. of persons convicted - - - -	43	37
No. of persons acquitted - - - -	9	11
No. of cases pending - - - -	1	18

Civil Side.

No. of cases entered - - - -	46	49
Applications for warrants to levy and provisional seizure warrants - - - -	—	6

Most of the plaints entered were for damages and claims for amounts due on goods sold and delivered.

Stipendiary Side.

—	1894.	1895.
No. of cases - - - - -	8	9
No. of engagements - - - -	25	6
No. of discharges - - - -	3	9

The total number of cases of all jurisdictions was 107 in 1894 and 133 in 1895. The amount of fines paid was Rs. 347·05.

The court revenue was Rs. 609·57 and the expenditure Rs. 128·53.

POST OFFICE.

The revenue collected in 1895 for postage labels sold, unpaid letters and money order commission was Rs. 248·41 against Rs. 195·16 in 1894.

RODRIGUES. 1895.

—	1894.	1895.
No. of inland letters received from Mauritius	1,190	1,304
Newspapers	785	889
Foreign letters	76	50
Total	2,051	2,243
No. of letters despatched to Mauritius	1,385	1,708
Foreign letters	39	63
Total	1,424	1,771

	Rs.
The money orders drawn on Mauritius in 1895 amounted to	26,084·82
And in 1894 to	17,205·95
Showing an increase of	8,878·87

	Rs.
The money orders drawn on Rodrigues in 1895 amounted to	4,455·16
And in 1894 to	4,350·62
Showing an increase of	104·54

CROWN LANDS AND FORESTS.

Land Rent.

	1894.	1895.
The number of acres leased to cultivators amounted to	617	666
The fishing posts numbered	42	54
The Islands were let for	Rs. 51·62	85
The town-lots leased were	11	12
The number of lessees was	316	356

The total revenue actually received under the heading of Land Rent, (including fishing-posts, town-lots, and Islands, and other leases) amounted to Rs. 1,903 against Rs. 1,525·12 in 1894.

Pasturage.

In 1895 there were 1,671 goats and 252 heads of cattle declared.

The pasturage dues received during the year amounted to Rs. 1,433·20 against Rs. 662·26 in 1894.

Forest Produce.

The revenue derived from forest produce amounted to Rs. 414·18 in 1895 against Rs. 377·26 in 1894.

LAND SALES.

In 1894, town-lot No. 31 was sold for Rs. 245.

In 1895 town-lots Nos. 30, 35, 36, 37, 39, 41, 42, 43, 45, 47, 70 to 77 (inclusive) 89, 97, 98, 100 and another lot opposite to No. 81 at Camp du Roi, were sold for Rs. 771·50; and numerous lots in different parts of the island have been sold for Rs. 1670·50, making a total sum of Rs. 2,422; one fourth of which has been paid cash in terms of the conditions of sale. One town-lot has been granted, free of charge, to the London Missionary Society for the erection of a chapel.

The amount received during the year under this heading was Rs. 1741·63 of which Rs. 183·75 were for balance of the land sold in 1894.

WIDOWS AND ORPHANS' FUND.

The sums paid by the subscribers during the year amounted to Rs. 476·97.

ECCLESIASTICAL.

There are two Roman Catholic chapels at Rodrigues; one at Port Mathurin and the other at St. Gabriel. The expenditure under this heading was Rs. 4,344·28 in 1895, against Rs. 2080·56 in 1894.

The catechist of the Church of England officiated at the Government School of Port Mathurin. He is paid by the London Missionary Society.

MEDICAL.

The number of patients maintained in the public hospital of Mount Lubin was 117 in 1894, and 63 in 1895.

In 1894, medical care was given to 2,092 persons at both dispensaries (Port Mathurin and Mount Lubin) and 2,617 in 1895.

In 1894, 11 deaths occurred at the hospital of Mount Lubin and 7 in 1895, due to Influenza.

In 1894, 130 children were vaccinated and 103 in 1895.

No hospital fee is exacted.

The total expenditure was Rs. 4,277·07 against Rs. 3,235·66 in 1894.

EDUCATION.

There are two Government schools; one at Port Mathurin and the other at St. Gabriel. The town school has been closed for about two months through the absence on leave of the schoolmaster (Mr. Dove).

RODRIGUES.
1895.

Books, &c. (sent from Mauritius) were sold to the pupils to the amount of Rs. 103·61 in 1895 against Rs. 86·32 in 1894.

The cost of both schools amounted to Rs. 2,327·37 in 1895 against Rs. 2,751 in 1894.

The annual cost to Government for each pupil inscribed in 1895 was 18·77.

With the exception of a few pupils, all are Roman Catholic. There are no Protestants in St. Gabriel school.

GAOL.

Twenty-five persons were committed to gaol in 1894 and 19 in 1895.

The Chief Officer of Police is the keeper of the gaol, and the constables act as prison guards.

WATER SUPPLY.

Under this item a sum of Rs. 483·35 has been spent specially for salary of a pipe-layer sent from Mauritius and for assistance given to him by different persons employed as masons, &c. The sum provided for water supply in the estimates having been exhausted, the works were stopped.

METEOROLOGICAL.

The Chief Officer of Police took daily observations, which have been transmitted to the Director of the Royal Alfred Observatory at Mauritius.

	N. Therm. F.	New. Barom.
	°	In.
1. Highest temperature (indoors), on the 19th February 1895 at 3 p.m. - - -	89·03	30·380
2. Lowest temperature 26th August 1895 at 9 a.m. - - - - -	68·57	29·784

3. The heaviest rainfall in 24 hours was from the 17th March, 9 a.m., to the 18th March, 9 a.m., viz.: 2 inches, 9 lines.

4. The month of August was the month in which there were the heaviest rainfalls, viz.: 9 inches, 68 lines.

No hurricane visited the island in 1895.

LEGISLATION.

The only law enacted for this dependency during 1895 was Regulation No. 1 of 1895, "To provide means to put a stop to "depredations in Tobacco plantations."

Rodrigues.
1895.

Poor Law.

Fifteen males and seven females were provided for in 1894 and fifteen males and eight females in 1895.

Population.

The population on the 31.12.95 was composed of 2,540 inhabitants, consisting of natives of this Island, of Mauritius, Madagascar, India, China, Europe, Seychelles, and Réunion, who are traders, agriculturists and fishermen.

The number of births was	- - -	140
„ deaths	- - -	109
„ arrivals	- - -	129
„ departures	- - -	142

The number of births is the same, but there is an increase of 68 deaths compared with 1894.

There were two still-births in 1895 and none in 1894.

Thirteen marriages were celebrated in 1895 and 15 in 1894.

There was one marriage in "articulo mortis" in 1895 and none in 1894.

Shipping.

The number of ships which arrived at and left Rodrigues during 1895 was 10.

The service between Rodrigues and Mauritius was performed in five trips by the subventioned British barque "Hattonburn."

The schooner "Earnest" made two trips for trading purposes.

H.M.S. "Bonaventure" and "Cossack" visited the island in August.

The s.s. "Bezwada" of the British India Company, chartered by Government, called here on the 25th January 1895, on her voyage from Colombo to Mauritius, to inquire about the loss of the "Touareg," and took the wrecked steamer's crew and passengers. She took also a mail to Mauritius.

Exports.

The exports (exclusive of specie) amounted to Rs. 105,729·46 in 1894 and to Rs. 169,449 in 1895. The ratio of export per head was Rs. 41·92 in 1894 and Rs. 66·71 in 1895.

Imports.

The imports amounted to Rs. 137,773·56 in 1895, against Rs. 137,138·55 in 1894.

The ratio of import per head was Rs. 54·24, against Rs. 54·21 in 1894.

General Remarks.

The crop of beans in 1895 has not been a good one, on account of too frequent and heavy showers.

The village of Port Mathurin is not yet supplied with water, the sum provided for in the Estimates of 1895 having been exhausted before the completion of the works. The want of a water supply is deeply felt by the inhabitants.

Great fires broke out in the course of November and destroyed a considerable extent of forests on Crown Lands.

An epidemic of influenza prevailed in this island in the course of the year and caused the death of many children.

Fred. Robert, Junior,
Acting Magistrate.

March 9, 1896.

No. 215.

MAURITIUS.

Mauritius. 1896.

(For Report for 1895, *see* No. 183 of this Series.)

GOVERNOR SIR CHARLES BRUCE to MR. CHAMBERLAIN.

Government House,
Mauritius,
20th August, 1897.

SIR,

I HAVE the honour to transmit to you copies of the Mauritius Blue Book for the year 1896, together with copies of the usual report thereon.

I have, &c.,
CHAS. BRUCE,
Governor.

REPORT ON THE MAURITIUS BLUE BOOK, 1896.

TAXATION.

Taxation remained unchanged until the close of the year, when an Ordinance was passed to restore to its former rate of one rupee and thirty-two cents the excise duty per litre on Rum issued from the Central Rum Warehouse for home consumption.

In the previous year the duty had been reduced to one rupee and twenty cents, believing that the consumer would benefit thereby, but it was found that by the establishment of an "Accord," the object in view was defeated, and the seller, and not the consumer, reaped the benefit of the reduction, so that the higher rate of duty was restored.

14901—750—10/97 Wt 20613 D & S—5 (B)

The Ordinance also provides for an increase from one rupee twenty cents to one rupee thirty-two cents a gallon on imported spirit of any strength not exceeding proof, according to Sykes's hydrometer, and a proportional duty for any greater strength.

REVENUE AND EXPENDITURE.

The Revenue of the Colony for the year 1896 amounted to Rs. 8,849,181, an increase of Rs. 575,559 on the Revenue of the previous year.

The following comparative table shows the actual Revenue derived from principal sources for the past two years, and the average Revenue for the five years 1890 to 1894 :—

—	1895.	1896.	Average for the Five Years 1890–1894.
	Rs.	Rs.	Rs.
Customs	2,829,516	3,069,745	2,699,156
Port, Harbour, Wharf, and Lighthouse Dues.	186,074	203,537	170,873
Licenses, Excise and Internal Revenue not otherwise classified.	2,240,184	2,411,477	2,521,534
Fees of Court of Office, Payments for Specific Services and Re-imbursements in Aid.	251,622	245,510	299,880
Post Office and Telegraphs ...	90,037	102,580	74,726
Government Railways	1,752,408	1,784,011	1,608,077
Rents of Government Property	58,319	68,872	54,948
Interest	544,998	538,930	325,473
Miscellaneous Receipts	318,864	422,899	135,698
Land Sales	1,600	1,620	6,008
Total	8,273,622	8,849,181	7,896,361

Of the increase of Rs. 240,229 on the Customs Revenue of the previous year, Rs. 120,542 is attributable to Import Duties, whilst Rs. 119,687 is derived from Export Duties. The total Customs receipts for the year being Rs. 2,562,276 for Import, and Rs. 507,469 for Export Duties.

Sugar, the produce of the Colony, pays an Export Duty of 30 cents.—equivalent at the present time to about 4*d*.—on every 100 kilos. exported ; an additional 2 cents is charged on every 100 kilos. of other sugars exported.

The increase of Rs. 12,000 in the Post and Telegraph receipts over those of the previous year is accounted for by an additional Rs. 10,000 on postage, mainly attributable to the increased rate of postage from the 1st September 1896 on foreign correspondence.

The postage rate was raised from that date from 15 cents to 18 cents the half-ounce, the equivalent of 2½*d*. with the exchange on the rupee at 80 per cent. premium.

The remaining sum of Rs. 2,000 is due to increased telegraphic business.

The large increase under Miscellaneous Receipts during the years 1895 and 1896 over the average receipts for the previous five years is due to the sum of Rs. 216,354, surplus investments of the Commissioners of Currency, having been carried to Revenue during the year 1895 ; whilst in 1896 a sum of Rs. 351,024 was brought to account in like manner. This latter sum was derived from the surplus balances of the sinking fund provided for the redemption of the 6 per cent. debentures under Ordinance No. 15 of 1864, which were paid off during the year.

The Expenditure of the Colony amounted to Rs. 8,544,736, an increase of Rs. 56,000 on the previous year, but Rs. 304,445 within the Revenue of the year.

Without the windfall of Rs. 351,024 just referred to, and brought to account under the head of Miscellaneous Receipts, the expenditure of the year exceeded the actual Revenue by Rs. 46,579.

The principal items of expenditure may be seen on reference to the following table, which shows the expenditure for the past two years, as well as the average expenditure for the period from the year 1890 to 1894 inclusive :—

—	1895.	1896.	Average for the Five Years 1890–1894.
	Rs.	Rs.	Rs.
Charge on account of Public Debt.	628,998	590,947	907,395
Pensions	343,004	362,773	398,696
Establishments	1,052,748	1,043,386	1 976,201
Post and Telegraphs	183,742	205,725	222,898
Judicial Departments	528,439	518,156	523,397
Ecclesiastical	136,954	139,305	140,171
Education	464,272	474,678	463,456
Medical, General Board of Health and Quarantine.	676,116	737,141	843,651
Poor Law	173,380	168,455	182,243
Police	538,641	548,999	478,864
Gaols	173,402	169.900	183,243
Immigration	130,773	122,982	144,345
Miscellaneous, Charitable Allowances, Interest, and Exchange.	451,913	417,147	638,696
Military Expenditure	291,056	388,623	262,483
Railways	1,061,002	1,069,407	1,051 543
Surveyor - General's Department and Public Works.	403,848	524,143	391,029
Loan Board Office and Mare-aux-Vacoas.	15,840	63,453	—
Exchange	1,234,608	1,006,516	—
Total	8 488,736	8,544,736	8,076,239

The Loan Board Office, attached to the office of the Colonial Secretary, was created in 1895 to administer the £400,000, being the portion of the loan of £600,000 guaranteed by the Imperial

Government, set aside to assist planters and householders in respect of damage done to their property by the hurricane of 1892.

The Mare-aux-Vacoas Water Works Staff was established for the first time and shown separately on the Estimates for 1896. Previously the staff and maintenance of the works had been charged to works in course of construction, and paid out of Loan Funds.

The item "Exchange" appearing for the first time in 1895 as a separate item of expenditure, is due to the circumstance that prior to that year the exchange was charged to the several items of the Estimates bearing the original cost of service; but under the present system, the *exchange* on all payments made in England, or in a country with a gold currency is brought to account under one head.

From the above table of Expenditure it will be seen that "Exchange" alone accounts for an eighth of the total expenditure of the Colony.

ASSETS AND LIABILITIES.

The year 1895 closed with an excess of Expenditure over Revenue to the sum of Rs. 215,114, which was met out of moneys in the Treasury and reduced those moneys to Rs. 1,254,403.

By excess of Revenue over Expenditure during the year 1896, the Treasury funds were increased again to the sum of Rs. 1,487,557, on the 1st January 1897.

Of this sum, Rs. 658,137 were immediately available in cash, the remaining amount representing the following liabilities :—

	Rs.
Miscellaneous Deposits	322,005·16
Family Remittances	18,607·81
Notaries' Deposits	45,971·08
Widows' and Orphans' Fund ...	347,178·07
Treasury Bills	1,420·97
Money Orders...	18,151·06
Hurricane Loan Funds	30,825·42
	Rs.784,159·57

Of the Rs. 347,178 belonging to the Widows' and Orphans' Fund, the sum of £14,300 (Rs. 230,945 at 61·50 per cent.) is invested in Colonial Securities.

The paper money in circulation in Mauritius, consisting of five rupee notes, ten rupee and fifty rupee notes, is alone in the hands of the Government, under the management of Commissioners of Currency.

On the 31st December 1896, the Assets and Liabilities of the Commissioners stood as follows :—

LIABILITIES.		ASSETS.	
	Rs.		Rs.
Notes in circulation	3,374,250	Specie in vault ...	1,830,000
Do. vault ...	998,865	Notes do. ...	998,865
	4,373,115	Investments in England, Rupees at par.	1,091,514·79
In favour of Comsioners.	218,546·38	Exchange at 61·50 on same.	671,281·59
Total ... Rs.	4,591,661·38	Total ... Rs.	4,591,661·38

PUBLIC DEBT.

The Public Debt of the Colony on the 31st December 1896, amounted to £1,239,301, a decrease of £37,234 on the previous year. On reference to the following table the original amount of the several loans, the year in which they were raised, and the outstanding debt on each loan on the 31st December, may be seen.

GOVERNMENT DEBENTURE DEBT ON 31ST DECEMBER 1896.

The reduction of the Public Debt by £37,234 is arrived at as follows :—

	£
Redemption of Mauritius Railway 6 per cent. Debentures under Ordinance No. 15 of 1864	36,900
Annual Drawings :—	
Savanne Railway $4\frac{1}{2}$ per cent Debenture	1,200
Moka " 4 " "	100
Consolidated 4 " "	1,400
Poor Law Comm. 5 " "	500
	£40,100
From which deduct on account of increase under Treasury Bills	2,866
Leaving	£37,234

as the net reduction of the Public Debt.

MUNICIPAL AND OTHER LOCAL BODIES.

The financial position of the Municipal Corporation of Port Louis, the only Port of Entry, and principal town of the Island, may be gathered from the following statement :—

—	1895.	1896.
	Rs.	Rs.
Balance on hand on 1st January ...	22,728·92	4,761·87
Revenue and Receipts on account ...	474,261·56	592,239·82

Colonial Loan, 1894	21,395	14,905
Total ... ... Rs.	269,351	261,468

MILITARY EXPENDITURE.

The strength of the garrison on the 31st December 1896, was 959 men, made up of—Staff Officers 8, Royal Artillery 365, Royal Engineers 69, 2nd Battalion York and Lancashire Regiment 496, Army Service 2, Ordnance Store 17, and Medical Staff Corps 10.

The total Military Expenditure was £63,906, of which the Colony contributed £20,250, compared with £53,859 and £14,906 respectively in 1895.

IMPORTS AND EXPORTS.

The Imports for the year, including charges and exchange, and also including Rs. 2,520,876 in specie and bullion, amounted to Rs. 32,194,409, an increase of Rs. 1,687,839 on the Imports of 1895.

The Imports for the years 1895 and 1896, valued with charges and exchange, were received from—

—	1895.	1896.
	Rs.	Rs.
United Kingdom...	5,854,226·26	7,412,771·36
British Possessions	17,725,453·14	18,055,073·65
Foreign Countries	6,926,891·56	6,726,564·59
Total ... Rs.	30,506,570·96	32,194,409·60

The following shows the classification of the total Imports for the past two years, exclusive of charges and exchange :—

—	1895.	1896.
	Rs.	Rs.
Live animals, Food, Drink and Narcotics.	13,643,669·03	12,824,595·24
Raw Materials :—		
1. Textile	1,474	8,127
2. Metal	4,074·20	2,070
3. Other	388,794·92	422,403·67
Manufactured Articles :—		
1. Textile	2,030,215·38	2,230,177·71
2. Metal	615,604·08	805,099·95
3. Other	3,441,570·42	3,671,962·47
	20,125,402·03	19,964,436·04
Coin, Bullion and Specie of all kinds.	662,250·30	2,537,026
Total ... Rs.	20,787,652·33	22,501,462·04

The average value of the Imports for the five years 1890 to 1894, less charges and exchange, is Rs. 19,980,956.

The Imports for 1895 and 1896, compared with those of the previous five years, were drawn from the following countries, the values being shown exclusive of charges and exchange :—

—	1895.	1896.	Average for the Five Years 1890–1894.
	Rs.	Rs.	Rs.
United Kingdom	2,802,316	3,855,229	3,984,474
British Possessions :—

EXPORTS.

The value of the total Exports of the Colony during 1896, exceeded the Exports of the previous year by over Rs. 2,420,000, whilst the value of the export of produce and manufacture of the Colony alone, exceeded the like export of the previous year by Rs. 4,310,000, as may be seen on reference to the following table :—

—	1895.	1896.
Produce and Manufacture of the Colony.	Rs. 24,751,037	Rs. 29,061,141
Shipping charges on same ...	1,732,987	2,055,839
British, Foreign, and other Colonial Produce and Manufacture.	2,496,598	2,408,874
Specie and Bullion	2,548,679	423,760
Total ... Rs.	31,529,301	33,949,614

The following table shows the total Exports, produce and manufacture of the Colony for last year, compared with 1895 and the average for the five years 1890-94. From this table it will be seen that products of sugar-cane represent 98·10 per cent. of the Exports :—

—	1895.	Per-centage of Exports.	1896.	Per-centage of Exports.	Average for the Five Years 1890-1894.	Per-centage of Exports.
	Rs.		Rs.		Rs.

Grand total ... Rs.	24,751,037	29,061,141	22,598,892

We have these results before us that whilst the Imports from the United Kingdom during 1896 were over Rs. 1,000,000 in excess of those of 1895, and show but little falling off compared with the average for the five years 1890-94, the Exports from Mauritius to the United Kingdom have decreased in value from Rs. 2,690,000, the average for the five years 1890-94, to Rs. 1,110,454 in 1895 and to the still lower figure of Rs. 270,000 during last year.

Continental India is the single market from which the bulk of our supplies is received, and to which a very large percentage of the produce of the Colony is shipped.

For convenient reference, the following table shows side by side the value of Imports from the United Kingdom, British Possessions and Foreign Countries, and Exports, produce and manufacture of the Colony, thereto for 1895, last year, and the average for the five years 1890-94.

—	IMPORTS.			EXPORTS.

SHIPPING.

As a result of the increase in Exports during 1896, the total shipping tonnage rose from 687,014 tons in 1895 to 782,827 during the past year, as compared with 633,751 the average tonnage for the previous five years.

The following table shows the number and tonnage of vessels, both steam and sailing, entered and cleared during the above periods. It will be seen from this table that the number of steamships is gradually on the increase, whilst that of the sailing vessels is on the decrease :—

—		1895.		1896.		Average for the Five Years 1890–1894.

VITAL STATISTICS.

With an area of no more than 705 square miles, the population of the Colony on the 31st December, 1896, was estimated at 375,955 (206,841 males and 169,114 females), a small increase of 5,367 on the population of the Island arrived at by the Census of 1891.

The general population numbered 60,120 males and 56,077 females—together 116,197; whilst the resident Indian population was 146,721 males, and 113,037 females—together 259,758.

The registered births numbered 11,518 during the year; general population 3,598—Indian 7,920—the rate on the total population being 30·5 per thousand, a decrease of 6·6 per thousand on the rate of the previous year.

The registered deaths numbered 15,843 during the year; 4,980 general population—10,863 Indian—giving the excessively high rate of 41·90 per thousand compared with 29·0 per thousand in 1894. The death rate last year is the highest since the great fever epidemic of 1868; its cause may be attributed to deaths from Diarrhœa, Dysentery, Fever alone accounting for 8,181, and Influenza.

The causes of death, as recorded, may be seen on reference to the following table:—

Causes.	Deaths.	Rate per 1,000 of Population.
Zymotic diseases	11,091	29·33
Parasitic	16	·04
Dietetic	15	·04
Constitutional	563	1·49
Developmental	191	·50
Local	2,638	6·98
Violent and accidental	125	·33
Ill-defined and unspecified ...	1,204	3·19
Total	15,843	41·90

MAURITIUS.
1896.

The average death rate of the Colony for the years 1871 to 1890 was 30·2.

The most unhealthy months of the year 1896 were March, April and May, when the deaths were over 100 per cent. more than during the three months September, October, and November.

SAVINGS BANK.

The savings deposited in the Government Savings Bank at 3½ per cent. interest amounted to Rs. 3,004,495 on the 31st December 1896, compared with Rs. 3,174,043 on the 31st December of the previous year. Although the sum total of deposits was Rs. 170,000 less than that of the previous year, there were exactly 600 more depositors, making 23,927 in all.

Of the number of depositors 10,527 were of the Indian population, with a sum of Rs. 1,439,224 standing to their credit,—the remaining depositors, of the general population.

Investments on account of the Bank in 2¾ Consols and Colonial and Indian inscribed Stock amounted on the 31st December 1896 to—

	Rs.
In Rupees at par (£242,594 18*s*. 4*d*.) ...	2,425,949
Exchange at 61·50 on same...	1,491,958
	3,917,907
To which add cash in hand	22,234
The total assets of the Bank amounting to Rs.	3,940,141

	Rs.
To the liabilities of the bank, in addition to the sum standing to the credit of depositors ...	3,004,495
must be added ready money advances made by the Colony	339,607
	Rs. 3,344,102

leaving a balance in favour of the Bank of Rs. 596,039 on the 31st December 1896.

EDUCATION.

There were 181 primary schools in operation during the year—82 Government Schools and 99 State-aided Schools. The average number of pupils on roll was, in the Government Schools, 9,336, and in the State-aided Schools 8,871, together 18,207 pupils, a decrease of 72 on the previous year. The cost to Government of each pupil on the roll was, in the Government Schools, Rs. 16·35 and in the Aided Schools, Rs. 11·61; the total cost of primary education amounting to Rs. 305,450 for the year.

The Royal College, at a cost of Rs. 204,739 for last year, provides for the secondary education of the Colony. To the Royal College are attached the two preparatory schools at Curepipe and Port Louis.

The average number of pupils attending the Royal College during 1896 was 209, whilst there were 220 on the books of the schools.

RAILWAYS, ROADS.

The Railway system of the Island—a single line 4 feet 8½ inches gauge, 105 miles, and constructed at a total cost of £828,656—is the property of the Government.

During the year the receipts were—Passenger Traffic Rs. 1,018,361, Sugar Rs. 352,239, Goods Rs. 317,133, and Miscellaneous receipts Rs. 36,278, making the total receipts Rs. 1,784,011; whilst the expenditure on account of working expenses amounted to Rs. 1,165,454, leaving a balance of Rs. 618,557 to meet expenditure on account of interest and sinking fund of the Railway Debenture Debt.

On the 1st January 1896 this Debenture Debt stood at £694,616, which was reduced to £657,716 by payment of the outstanding 6 per cent. Railway debentures under Ordinance No. 15 of 1864.

But on the 1st January 1897 the Railway Debenture Debt had been increased to £667,656 by further expenditure on account of the Moka line extension, and represented the total Railway Debenture Debt at that date.

The charge on account of interest and sinking fund during the year amounted to Rs. 565,224, leaving a surplus of Rs. 53,333 in favour of the Railway, which has been included in the general Revenue of the Colony for the past year.

The 370 miles of Main Roads in the Island were maintained by Government at a cost of Rs. 244,300. No new roads were constructed during the year.

METEOROLOGY.

During the past year the Island was visited by a cyclone in February, lasting three days, more remarkable, however, by the heavy rains which accompanied it than by the force of its winds.

On the 20th, when the wind rose to its greatest velocity of 51·3 miles an hour, rain fell to the extent of 17·34 inches in the 24 hours, causing damage to property, cultivation, roads and bridges.

The mean hourly velocity of the wind throughout the year was 11 miles, the average for the last twenty-one years.

At the Royal Alfred Observatory, which is about three miles from the West Coast of the Island, and stands on a plain 179 feet above sea-level, the recorded rainfall for the year was 68·17 inches, 18·58 inches above the average for the past twenty-one years. After the floods in February heavy rains fell again in May, followed by severe drought from September to December, when no more than 3·75 inches of rain fell, 6·18 inches less than the average during those months for the previous twenty years.

GENERAL.

The urgent representations from time to time made to the Secretary of State by the several sugar-growing Colonies in the British West Indies, as to their extremely critical condition owing to unremunerative prices caused by over-production of beet sugar, which led to the appointment last year of the West India Royal Commission to enquire into the cause of the depression in the cane-sugar industry, were not without similar representations from this Colony. The Report of the Royal Commission and the action Her Majesty's Government may take to ameliorate their lot are as anxiously awaited by this Colony as by any Colony of Her Majesty in the West.

The cause for that anxiety as far as this Colony is concerned is not far to seek. With a population of over 530 to the square mile—a veritable hive—dependent entirely on the agricultural resources of the Colony, with over 98 per cent. of those resources the produce of sugar-cane, and with no alternative industry in view, or, may be, possible, Mauritius may truly be said to be a garden of sugar; the market return for its sole product, the slender thread on which hang the life and future of the Colony.

Up to the present time it does not appear that it can be said that as a sugar-producing Colony, Mauritius has suffered to the extreme extent from the bounty fed sugars of some of the foreign countries, or that she has been brought to the brink of ruin from this or other causes, as have her sister sugar-producing Colonies in the West. The Colony has, without doubt, severely felt the depression in the sugar market, and although the Colony is not by any means out of the wood, yet it has so far enjoyed the advantage not only of the near and ready market of India, but also the somewhat hidden palliative in the low exchange on its silver currency. Agricultural labour being remunerated in rupee, depreciation of silver currency is not to the great disadvantage of the employer as might at first sight appear.

But last year the planter of the Colony was less fortunate than in previous years ; not only did he suffer by the further reduction in the price of sugar, but he had also to face the drop in the exchange on the rupee. On account of the rise in the value of the rupee in the course of the year, larger shipments of beet sugar were tempted to the Indian market, and at times so overstocked was that market, and so low the prices, that the trade of Mauritius with India became paralysed. Fortunately, however, the value of the rupee dropped again, the exchange rose and trade revived.

The activity of the Colony, threatened during the past year by the several adversities referred to, may, it is not out of place to remark, be considered as having been contributed to by the immigrant from the all but parent continent of India, who gradually, and year by year in number increasing, becomes possessed of lands parcelled out into lots, which the small proprietor is himself able to cultivate.

It is not an uncommon thing to find the labourer, after earning his wage on the sugar estate during the day, returning in the afternoon to his hut to turn to, in the cool of the evening, on the patch of land of which he has, by his own industry, become possessed and which he has under cultivation.

But a few years ago the whole of the sugar industry in Mauritius was owned and carried on by the large sugar estates of the Island ; estimates of to-day unfold figures showing that of the total crop of the Island for last year—outnumbering 152,000 tons of sugar—three-fourths belong to the estates of old, one-fourth the property of the small proprietor.

By some these figures are considered as underestimated. That of last year's crop—100,000 tons—represented the produce of the large sugar estates, whilst the small proprietors sent 50,000 tons to the mill. But no reliable information can be obtained on the subject, and it is sufficient to show the stake the small proprietor has acquired in the Island to be content by accepting the lower, and perhaps more accurate, estimate of one-fourth of last year's crop as his.

In a measure, therefore, may the unprecedented crop of 1896 be attributed not only to the more fruitful yield of the soil, but also to the result of acquisition of sugar lands by the Indian, who is ever thrifty, and who it cannot be said is blind to his own interest.

To trace this transitional state of the Colony, it can be foreseen that central factories are rapidly becoming necessities at no remote date, and that, whilst it is not improbable the greater portion of the cultivation of the Island may, in the near future, be transferred to the small proprietor, the manufacture of his crop will be at the central mill. So far has this already been realized that last year one of the larger sugar estates of the Island, an estate of 1,500 acres, finding it no longer sufficiently profitable to hold out against low prices, offered its lands for sale in small patches to suit the small man, retaining but a few acres and the factory for the manufacture of sugar cultivated in its neighbourhood. The lands have been readily taken up, and the estate, about to start its mill under the changed condition, commences a new era in the Colony's history.

Of other industries there is but little to record. Aloe-fibre, but a few years ago considered an industry of much promise, to-day has, by unremunerative prices, become reduced to a low ebb, so low that less than 1 per cent. of the Exports represents its position in the Colony's struggle.

The climate and soil of the Island are all that can be desired for the cultivation of vanilla. Turning to statistics of fifteen years ago, it will be seen that the average annual export of this product during the five years 1880 to 1884 was 39,900 lbs., valued at Rs. 366,500. But with an export of no more than 7,690 lbs., valued at Rs. 120,625 during last year, one is led to the conclusion that, notwithstanding its increased value, the cultivation of vanilla now only represents the investment of a few rather than a labour to be seriously classed amongst the industries of the Colony.

DOUGLAS YOUNG,
Acting Colonial Secretary.

Colonial Secretary's Office,
Mauritius, 13th August, 1897.

No. 223.

RODRIGUES.

(For Report for 1895, *see* No. 183 of this Series.)

GOVERNOR SIR CHARLES BRUCE to MR. CHAMBERLAIN.

Government House,
Mauritius,
14th October 1897.

SIR,

I HAVE the honour to transmit the Report on the Rodrigues Blue Book by Mr. Colin, the Magistrate, for the year 1896.

I have &c.,

CHARLES BRUCE, *Governor.*

REPORT ON THE RODRIGUES BLUE BOOK FOR THE YEAR 1896.

REVENUE.

The Revenue of the year (exclusive of Customs and sums received in Mauritius) amounted to Rs. 8,309·64, and the Revenue of 1895 to Rs. 10,372·00, showing a decrease of Rs. 2,062·36.

Licenses, Dog Tax, Pasturage Fees, Land Rent, Forest Produce, Fines, and Land Sales were the principal heads of revenue.

15224—750—12/97 Wt 20613 D & S—5 (B)

EXPENDITURE.

The payments made in 1896 (not including sums paid in Mauritius and matters of account) amounted to Rs. 24,469·63, and the expenditure of 1895 (not including sums paid in Mauritius and matters of account) to Rs. 23,092·00, showing an increase of Rs. 1,377·63.

The ratio of the revenue to the population of 1896 was Rs. 3·15 and a fraction per head. The ratio of the expenditure was Rs. 9·32 and a fraction per head.

JUDICIAL.

Criminal Side.

The most common charges were for breach of forest and fishing laws, larceny, assault, abusive language, and possession of stolen property.

—	1895.	1896.
Number of informations filed (including applications for search warrants).	69	65
Number of adjudications	40	37
" " cases abandoned	13	11
" " persons convicted	37	46
" " persons acquitted	11	15
" " cases pending	18	2

Civil Side.

—	1895.	1896
Number of cases entered	49	99
Applications for warrants to levy, and provisional seizure warrants.	6	7

Most of the plaints entered were for damages and claims for amounts due on goods sold and delivered.

Stipendiary Side.

—	1895.	1896.
Number of cases	9	9
„ „ engagements	6	8
„ „ discharges	9	4

The total number of all cases of all jurisdictions was 133 in 1895, and 173 in 1896. The amount of fines paid was Rs. 550·91.

The Court revenue was Rs. 959·38 and the expenditure Rs. 262·78.

The Chief Officer of Police is the usher of the Court.

POST OFFICE.

The revenue collected for postage labels sold, unpaid letters, and money order commission was Rs. 248·41 in 1895, and Rs. 323·18 in 1896.

The letters received were 2,265 in 1896, and 1,354 in 1895. Newspapers 750 in 1896, and 889 in 1895.

The money orders drawn on Mauritius amounted to Rs.26,084·82 in 1895, and to Rs. 29,894·40 in 1896.

Orders drawn on Rodrigues amounted to Rs. 5,017·77 in 1896, against Rs. 4,455·16 in 1895.

CROWN LANDS AND FORESTS.

Land Rent.

—	1895.	1896.
The number of acres leased at Rs. 2 to cultivators amounted to—	666	630
The fishing posts numbered	51	65
„ islands were let for ... ... Rs.	85	40·25
„ towns lots leased were	12	14
„ number of lessees was	356	408

The total revenue actually received under the heading of Land Rent (including fishing posts, town lots, and islands and other leases) amounted to Rs. 2,135·50, against Rs. 1,903 in 1895.

Pasturage.

In 1896, there were 1,942 goats and 160 head of cattle declared. The Pasturage Fees received during the year amounted to Rs.319·55, against Rs. 1,433·20 in 1895.

Forest Produce.

The revenue derived from forest produce amounted to Rs. 260·14 in 1896, against Rs. 414·18 in 1895.

LAND SALES.

The amount received during the year under this heading was Rs. 490·50.

WIDOWS AND ORPHANS' FUND.

The sums paid by the subscribers during the year amounted to Rs. 355·38.

ECCLESIASTICAL.

There are two Roman Catholic chapels at Rodrigues: one at Port Mathurin, and the other at St. Gabriel. The expenditure under this heading was Rs. 4,344·28 in 1895, against Rs.1,999·92 in 1896. The Catechist of the Church of England officiates at the Government School of Port Mathurin.

MEDICAL.

The number of patients maintained in the public hospital of Mount Lubin was 63 in 1895, and 93 in 1896.

In 1895 medical care was given to 2,617 persons at both dispensaries (Port Mathurin and Mount Lubin), and 2,484 in 1896.

In 1895 seven deaths occurred at the hospital of Mount Lubin, and nine in 1896.

The prevailing diseases were dysentery, worms, and rheumatism, bronchitis, influenza, abscesses, &c.

RODRIGUES.
1896.

In 1895 103 children were vaccinated, and 175 in 1896.

No hospital fee is exacted.

The total expenditure was Rs. 3,701·74 in 1896, against Rs. 4,277·07 in 1895.

The rice given to the hospital servant to complete his rations is sent from Mauritius.

EDUCATION.

In 1896 there were two schools in operation at Rodrigues. The expenses thereof are paid by Government.

Books &c. (sent from Mauritius) were sold to the pupils to the amount of Rs. 80·38 in 1896, against Rs. 103·61 in 1895.

The cost of both schools amounted to Rs. 2,500·81 in 1896, against Rs. 2,327·37 in 1895. The annual cost to Government for each pupil inscribed in 1896 was Rs. 18·12.

With the exception of a few pupils, all are Roman Catholic. There are no Protestants in St. Gabriel's School.

GAOL.

Thirty-eight persons were committed to gaol in 1896, and 19 in 1895.

The Chief Police Officer is the keeper of the gaol, and the constables act as prison guard.

WATER SUPPLY.

Under this heading a sum of Rs. 681·25 has been spent specially for salary of a pipe-layer sent from Mauritius, and for assistance given to him by different persons employed as masons, &c.

METEOROLOGICAL.

The Chief Officer of Police took daily observations, which have been transmitted to the Director of the Royal Alfred Observatory at Mauritius.

					n. Th.
Highest temperature (indoors)		15th March,	1896,	3 p.m.,	89. 08
Lowest	” ”	17th July,	1896,	9 a.m.,	67. 07
					n. Bar.
Highest barometer	”	27th Aug.,	1896,	9 a.m.,	30. 448
Lowest	” ”	25th Jan.,	1896,	11 a.m..	28, 574

Heaviest rainfall in 24 hours from 9 a.m. 9th to 9 a.m. 10th May 1896, 4 inches, 9 lines.

The month of January was the month in which there were the heaviest rainfalls—the rain gauge marked 18 inches, 88½ lines. A most violent hurricane visited the island in January 1896.

LEGISLATION.

Regulation No. 1 of 1896.—To make provision for the sale and lease of Crown lands and the lease of Pas Géométriques at Rodrigues.

2. Amended Regulation.—Money order business between Rodrigues and Mauritius.

3. Regulation No. 2 of 1896.—To prohibit the cultivation of gandia in Rodrigues.

4. Ordinance No. 4 of 1896.—To legalize certain acts of the Civil Status drawn up in Rodrigues, and to authorize the Chief Officer of Police to act as Civil Status Officer in certain cases.

5. Regulation No. 3 of 1896.—To provide for the maintenance of order and regularity amongst shipping at Rodrigues.

These were the only laws enacted during the year 1896.

POOR LAW.

15 males and 8 females were provided for in 1895, and 16 males and 8 females in 1896.

POPULATION.

The population on the 31st December 1896, was composed of 2,635 inhabitants, consisting of natives of this island, of Mauritius, Madagascar, India, China, Europe, Seychelles, and Réunion, who are traders, agriculturists, and fishermen.

Number of births in 1896	164
„ „ arrivals „	107
„ „ deaths „	38
„ „ departures „	138

The births number 24 more than in 1895, and the deaths 71 less.

Thirteen marriages were celebrated in 1895, and twenty in 1896.

SHIPPING.

The number of ships which arrived and left Rodrigues during 1896 was 11.

The service between Rodrigues and Mauritius was performed in six trips by the subventioned British schooner "Columbus." The barks "Lavina," "Ione," and the schooner "Venus" made five trips for trading purposes.

H.M.S. "Bonaventure" visited the Island in July 1896.

EXPORTS.

The exports (exclusive of specie) amounted to Rs. 169,449 in 1895, and to Rs. 103,181·25 in 1896.

The ratio of export per head was Rs. 66·71 in 1895, and Rs. 39·15 in 1896.

IMPORTS.

The imports amounted to Rs. 154,886·50 in 1896, against Rs. 137,773·56 in 1895.

The ratio of import per head was Rs. 58·78, against Rs. 54·24 in 1895.

GENERAL REMARKS.

The tobacco plantations have greatly decreased in 1896 on account of the tax imposed for the exportation thereof. The crops of beans and other plantations of the Island have greatly suffered on account of a cyclone which caused great damage in January 1896. There was another cyclone in February of the same year.

Although a good path has been made from Port Mathurin to St. Gabriel, much remains to be done to have proper roads in this Island.

The inhabitants of Port Mathurin have been able to enjoy the advantages of having good water about the middle of last year, but the works were not completed at the end of the year.

The jetty (although not constructed as recommended by the Government Engineer) has been extended, and proves a great advantage to the inhabitants.

Mr. Frederic Robert, Junior, replaced the titular magistrate from the 13th December 1895, to the 21st November 1896.

B. H. COLIN,
Magistrate.

1st April 1897.

No. 250.

MAURITIUS AND RODRIGUES.

MAURITIUS AND RODRIGUES, 1897.

(For Reports for 1896, *see* Nos. 215 and 223.)

GOVERNOR SIR CHARLES BRUCE to MR. CHAMBERLAIN.

Government House,
Mauritius,
26th August 1898.

SIR,

I HAVE the honour to transmit to you copies of the Mauritius Blue Book for the year 1897, together with copies of the usual summary.

2. I also transmit the Report on the Blue Book, to which the Rodrigues Report is appended.

3. In transmitting the Blue Book and the accompanying Summary and Report, it is my duty to add that, since the close of the financial year ending 31st December 1897, the causes which led to a serious reduction of the revenue for the year, dealt with in the Blue Book, have told with disastrous consequences on the revenue of the current year. These causes may be briefly stated as a short crop of sugar, low prices, and the abnormally high price of Indian foodstuffs. The first and last of these causes may be considered as temporary; there is every promise that the crop of the season 1898–99 will be abundant, and there is an appreciable reduction in the price of foodstuffs; but the low price of sugar has been the result of causes which threaten the sugar industry of Mauritius with the loss of its hitherto profitable markets—India and Australia. The Indian market has been largely affected by the operation of the artificial bounty system of foreign governments in aid of beetroot sugar. In 1887 the total quantity of beetroot sugar imported into India amounted to only 630 tons, valued at Rs. 150,000, as compared with an

importation of 85,000 tons, valued at Rs. 20,650,000. During the first nine months of 1897, no less than 52,000 tons of beetroot sugar, valued at Rs. 11,637,000, were imported into India, against 74,000 tons of cane sugar, valued at Rs. 17,000,000. As regards the Australian market, it is enough to record the fact that, whereas Australia 15 or 20 years ago took one-half of the produce of Mauritius, the extension of sugar cultivation in the Australian Colonies threatens permanently to close to this Colony that hitherto lucrative market.

4. I have endeavoured in numerous despatches to lay before you the present financial position of the Colony. If I have felt bound to draw attention to the subject in this despatch, it is because the publication of the Blue Book and the accompanying Report might naturally lead to an inference that they correctly define the position of the Colony at this date. Such an inference would be altogether misleading.

I have, &c.,

CHAS. BRUCE,

Governor.

MAURITIUS, 1897.

BLUE BOOK REPORT FOR THE YEAR 1897.

TAXATION.

1. Very little alteration was made in the items of existing taxation.

The bicycle, which, as I reported in the Blue Book Report on Barbados for 1896, had asserted itself in the West Indies, has now increased to taxable proportions in this Eastern Colony, and a license varying from Rs. 25 to Rs. 50 was imposed on dealers in bicycles.

A few other items of not sufficient importance to necessitate special remark appear in the amendments and alterations of items of such taxes.

REVENUE.

	Rs.
2. The estimated revenue for 1897 was	8,238,517
The actual receipts were	7,996,706
Showing a deficit of	241,811

	Rs.
The revenue for 1896 had been estimated at ...	8,427,338
And the actual receipts for that year were ...	8,849,181
Showing a surplus of	421,843

Allowing, therefore, for certain items, such as Licenses, Fees of Court, and Miscellaneous (to which a windfall of Rs. 368,074 had accrued in 1896), and for an increase under the other heads which showed a steady upward tendency, the estimates for 1897 were quite justifiable.

3. Unfortunately a disastrous drought, the low prices for sugar, the high prices for rice and grains in India, and the tightness of the money markets there, formed an overwhelming combination of untoward circumstances which upset all calculations, and went very nigh to produce a general financial disaster. With a solitary exception (a casual rise in the receipts for Crown land shooting leases) every head of revenue showed a considerable falling off.

4. The Customs, which had been estimated at Rs. 2,948,000 on a sugar crop of 140,000 tons, produced Rs. 2,769,889, against Rs. 3,069,745 in 1896; shipping, of course, followed suit; the receipts under both heads showing together a falling off of Rs. 313,543; excise fell from Rs. 1,279,215 to Rs. 1,245,869; railway receipts showed a decrease of Rs. 71,688; educational fees Rs. 4,495.

The net total decrease in the revenue for 1897 compared with 1896 was Rs. 852,476.

5. In 1896, however, the Colony got the benefit of what is very rightly called in the Blue Book Report a "windfall" of Rs. 368,074 (the figure given in that Report is Rs. 351,024, but the rate of exchange was only then estimated—the exact sum is Rs. 368,074), caused by the surplus balance of the Sinking Fund provided for the redemption of the 6 per cent. debentures of 1864 having been brought to credit of the revenue of that year.

If that sum be eliminated, the comparison between the revenue of 1896 and 1897 will be Rs. 8,481,107 against Rs. 7,996,706, or a decrease for 1897 of Rs. 484,401.

6. The remaining available balances to the credit of the Colony were required to meet the immediate necessities for current expenditure, and for making good the deficiency. It was possible to meet all obligations, but only by great care, and by abandoning—for the time only, it is to be hoped—much that might otherwise have been done for the welfare of the population.

EXPENDITURE.

7. The total expenditure for 1897 was Rs. 8,626,798, against an estimate of Rs. 8,738,137 and an actual expenditure of Rs. 8,544,736 in 1896.

	Rs.
Of this personal emoluments were ...	3,015,220
Other charges	5,611,578
	8,626,798
The revenue for 1897 was	7,996,706
Showing an excess of expenditure	Rs. 630,092

8. Although the falling off in revenue was due to the exceptional temporary disadvantage of short crop, low prices, no markets, and high cost of Indian foodstuffs, there is every reason to fear that the present establishment and expenditure of the Colony are beyond its resources, and that considerable reductions must be made if income and expenditure are at least to balance each other.

9. It is of interest to analyse briefly the current expenditure of the Colony, and for this purpose it has been divided under the following heads, showing the principal items of which they are made up :—

	Rs.
1. Annual Charges :—	
Public Debt, Pensions, Military Contribution, Telegraph Subsidy	1,960,664
2. The Executive Administration only :—	
Legislation, Executive, Police, Prison, Public Works (recurrent)	1,416,791
3. Revenue Making Departments proper :—	
Inland Revenue, Customs, Shipping, Registration, Railway, Post Office, Water Works	2,227,637
4. Departments partially recouped by Fees, &c. :—	
Judicial, Education, Medical, Forests, Poor Law, Immigration, Crown Land ...	2,266,373
5. Ecclesiastical	141,321
6. [*]Annual Grants :—	
Sciences, Agriculture, Homes, Races, Local Boards, Fire Brigade, &c.	113,724
Carried forward	Rs. 8,126,510

---

[*] This item is susceptible of considerable reduction.

Brought forward	Rs. 8,126,510
7. Miscellaneous :—	
Interest on Deposits, Crown Agents, Exchange on Remittances, Loan Office, Dependencies	339,858
8. Special Expenditure :—	
Queen's Jubilee, Medical Mission to India, Depreciation of Currency Commissioners' Securities, Public Works (Extraordinary), New Edition of Laws, &c.	160,430
Total	Rs. 8,626,798

10. The revenue (say Rs 8,000,000) was absorbed (and in fact exceeded) by those heads of expenditure in the following proportion :—

	Approximate percentage.
1. Annual Charges	25
2. Executive Expenditure ...	18
3. Revenue Departments... ...	28
4. Departments partially recouped	28
5. Religion	2
6. Annual Grants...	1
7. Miscellaneous	2
8. Special Expenditure	4

	Rs.
11. The provision for the Education, Religion, Health, and Relief in sickness and old age of the Community was	1,559,453
and of the maintenance of Law and Order, and punishment of crime	1,313,432
Total ...	Rs. 2,872,885

The first represented Rs. 4·12 per head of the population, and the second Rs. 3·47.

The whole is about covered by the Customs receipts.

It is interesting to remark that in Barbados, an Island so far resembling this that it entirely depends on one and the same staple industry, sugar, and has a large agricultural labouring population (though very differently composed), the expenditure under these two heads bears about the same proportion to one another, and is defrayed by the Customs revenue.

MUNICIPALITIES, &c.

	Rs.
12. The total revenue of the Corporation of Port Louis in 1897 was	457,180
exclusive of a credit balance in hand on 1st January...	9,510
Total	Rs. 466,690
The total expenditure was	513,816
Leaving a deficit of ...	Rs. 47,126

13. The Debenture Debt at the end of the year stood as follows :—

—	1896.	1897.
	Rs.	Rs.
Conversion Loan	133,400	132,300
Colonial Loan, 1889	106,470	93,600
Government Hurricane Loan, 1892 ...	140,093	130,491
Colonial Loan, 1894	14,905	7,125
Government Overflow Loan, 1896... ...	—	45,833
Total ... Rs.	261,468	277,049

14. The Accounts of the District Boards of Commissioners show :—

	Rs.
Total Revenue	91,542
Expenditure	89,508
Debt to Government	20,000

PUBLIC DEBT.

15. The Public Debt of the Colony stood as follows on 31st December 1897 :—

	£	£
Unconverted Debentures 4 to 4½ per cent....	176,100	
Bonds paid	57,700	
		118,400
Converted Inscribed Stock 4 per cent. ...		480,750
Hurricane Loan Imperial Guarantee 3 per cent.		600,000
Treasury Bills redeemable		38,339
		£1,237,489

CURRENCY NOTES.

		Rs.
16. The amount of Treasury rupee currency notes in circulation on the 31st December was		3,114,250
	Rs.	
The specie in hand of Commissioners of Currency	1,570,000	
Investments	1,722,405	
		3,292,405
Balance in favour of Commissioners ...		Rs. 178,155

MILITARY EXPENDITURE.

17. The total military expenditure of the Colony was Rs. 418,272.

The Colonial contribution was calculated on five and a half per cent. on the gross receipts of revenue generally (exclusive of land sales), and on the net receipts of certain specified items, in addition to which about Rs. 20,000 is at present paid in lieu of Customs Rebate.

The total strength of the garrison on 1st January 1898 was 1,078 (of all ranks), against 939 on 1st January 1897. In that year the expenditure was £63,906.

The increasing importance of Mauritius as a fortified coaling station on the direct route from the Cape of Good Hope to the East is likely to lead to an augmentation of the benefits it derives from the presence of Imperial troops.

MAURITIUS, 1897.

LEGISLATION.

18. Out of 42 Ordinances passed during the year, only one requires notice in this report, No. 38, "To consolidate and amend the Laws relating to Quarantine."

19. "Quarantine at Mauritius" had, it is no exaggeration, a wide-world reputation. The provisions of the existing law on the subject was by no means in consonance with the modern scientific views of the incubation period of germ diseases, and of the greater efficacy of medical inspection and isolation of actual, or observation of suspected cases, and of disinfection, than of prolonged detention in quarantine.

The rigid enforcement of the Quarantine Laws against vessels coming to Mauritius and its dependencies had become, to use the honest phrase, intolerable. Government troopships, ocean liners, mail and trading steamers were liable, and often subjected, to delays and the passengers to detention, in some cases for long periods on the ground of maladies, some of them not usually the subject of quarantine, existing at the ports or places from which they had sailed or at which they had called on the voyage here.

Grave complaints were received from the Government of India and from private companies, and it is more than probable that the abandonment of this route by one of the largest ocean services running between Europe and Australia via the Red Sea was due to the delays and difficulties experienced by their steamers when calling here.

In one case at least the Government had to pay heavy compensation for the detention of a steamer in quarantine beyond the maximum limit allowed by law.

20. It needs no argument to show how in these days of keen marine and mercantile competition the adherence, however well meant, to obsolete principles must result in a deadlock with shipping and trade interests, and re-act on the progress of the Colony. It was therefore decided to submit to the Legislature a measure which, while safeguarding the Colony as much as possible against the introduction of dangerous diseases, would, by adopting the principles of the International Sanitary Conferences of Dresden and Venice, substitute reduced periods of quarantine, coupled with medical inspection and active precautionary measures, for the prolonged detention and delays which were so much complained of.

21. The Ordinance was very fully considered and debated at several meetings of the Council of Government before it was finally passed.

It provides for :—

(1) Inspection by the Health Officer of all vessels arriving here.

(2) Prompt admission to pratique of healthy vessels.

(3) Temporary detention in quarantine of observation of suspected vessels.

(4) Quarantine for specified periods for the following diseases :—

Disease.	Period.	Old Period.
	Days.	Days.
1. Plague	15	15 to 21
2. Cholera	10	21
3. Small-pox	15	16 to 21
4. Yellow fever	10	15 to 21
5. Typhus	10	15 to 21

calculated from the date of sailing of the vessel from the port of departure or termination of last case on board or in quarantine.

(5) Prohibition and exclusion of certain articles from importation in the Colony.

22. The detail working of the law is effected by regulations to be made by the Quarantine Committee, and approved by the Governor in Executive Council.

Steps will be taken by the Government to establish a properly equipped disinfecting station in addition to the present one and other means at their disposal.

The above measure will afford much better facilities for dealing with the subject generally, and minimising the conflict with other interests, which is so liable to have an injurious effect on the prospect of the Colony.

POLITICAL FRANCHISE.

23. The number of electors registered was ... 6,230

The number who voted at the last General Election (quinquennial) 4,566

In two districts, however, there being only one candidate nominated, there was no polling.

In 1896 there were 6,468 electors registered, and 4,566 voters at the elections.

MAURITIUS,
1897.

COUNCILS.

24. No remarks.

ESTABLISHMENTS.

25. The principal changes in the Public Service of the Colony were :—

Governor—His Excellency Sir C. Bruce, K.C.M.G., late Governor of the Windward Islands, succeeded Sir Hubert E. H. Jerningham, K.C.M.G., appointed Governor of Trinidad.

Supreme Court—Mr. J. Rouillard, 1st. Puisne Judge, died on the 21st October.

Colonial Secretary—Mr. G. R. Le Hunte, late Colonial Secretary of Barbados, succeeded Mr. C. A. King-Harman, C.M.G., appointed Administrator of St. Lucia.

Receiver-General—Mr. J. J. Brown, Collector of Customs, replaced Mr. L. E. Schmidt, retired.

Director of Forests and Gardens—Mr. W. Scott died on the 3rd October, and was succeeded by Mr. J. Vankeirsbilck (acting), the Assistant Director.

Collector of Customs—Mr. G. Lumgair, Storekeeper-General, succeeded Mr. J. J. Brown, appointed Receiver-General, and was succeeded as Storekeeper-General by Mr. L. S. R. du Vergé.

PENSIONS.

26. The pension list amounted to Rs. 364,655.68, against Rs. 362,773.29 for 1896.

POPULATION AND VITAL STATISTICS.

27. The total population is given at ... ... (over 536 to the square mile, about half the proportion of Barbados or Malta).	377,856
In 1896 it was	374,942
Increase ...	2,914

This increase is almost entirely a natural increment from excess of births over deaths. The increment from immigration excess of arrivals over departures is only 323.

28. The total Indian population was 260,540; the total Chinese 3,389; being an increase of 1,538 over 1896.

MAURITIUS, 1897.

The Indian population may be classified under three heads :—

1. Resident (Indo-Mauritians) ...	184,775
2. Immigrants	69,115
3. Other Indians	6,650
Total ...	260,540

representing about $\frac{7}{10}$ths of the total population of the Colony.

The general proportion of males to females in the total population is, approximately, 1,200 males to 1,000 females.

Births.

29. There were 13,657 births in 1897, or 2,139 more than in 1896 (but that year the birth-rate was abnormally low).

The birth-rate for the total population is 36·4 per 1,000, and in the Indian population 36·5 per 1,000.

The birth-rate varies in different districts, from the minimum 27·5 in Black River to the maximum 41·3 in Moka.

The birth-rate of Port Louis is below that of Madras, Cairo, and Alexandria, and above that of Bombay.

The proportion of illegitimate births was nearly 65 per cent. of the whole (lower, however, than for 1896 = 67·7).

30. There is a great difference in the percentage of illegitimate births acknowledged by the father. In the general population 21 per cent. were not acknowledged, in the Indian section only 3 per cent., showing that amongst the latter there exists a *bona fide* recognition of the responsibilities of paternity and solicitude for the care of their offspring.

Deaths.

31. There were 11,066 deaths in 1897 = 29.5 per thousand, against 15,843 deaths in 1896 = 42 per thousand, which, however, was an abnormally high rate.

The death-rate was lower and the birth-rate higher amongst the Indo-Mauritians, and they are increasing much more rapidly than any other group of the population.

The death-rate varies very much according to locality, from 40·4 per 1,000 in Port Louis (town) to 22·0 in Riviere du Rempart on the North-Eastern part of the Colony.

A very great improvement is noticeable in every district.

More than 50 per cent. of the deaths are due to zymotic diseases.

12 deaths were registered amongst the troops (1,014), 5 of enteric fever, 1 to remittent fever, and 6 to other non-climatic causes.

32. The report of the Medical Inspector of Immigrants, Dr. Lorans, with reference to the sanitary condition of the estates was generally satisfactory. Referring to the diminished death-rate amongst the labourers for 1897 against 1896, Dr. Lorans says:—

"This diminution is easily accounted for by the difference in the climatic condition of these two years. It is a common saying in the Island that a good sugar crop is accompanied by a heavy fever rate. The correctness of the statement was well exemplified in 1896, and though the converse may not be always true, the contrast was well marked in 1897. The drought, which in the latter year did so much harm to the sugar industry, especially in the northern districts of the Colony, was accompanied by a corresponding reduction in the fever prevalence in those districts."

The death-rate varied greatly on estates in different localities, the highest being 40·7, and the lowest 5·4 in Pamplemousses, 5·5 in Grand Port.

33. Speaking of the great increase, however, of the death-rate on certain estates in 1897 as compared with 1896, in one case 75 per 1,000 against 37 in the previous year, in another 59 against 27, in a third 36 against 9, Dr. Lorans makes a very interesting remark:—

"These four estates comprised in the valley of Cent Gaulettes have suffered from no special unsanitary condition which can account for the unhealthiness which prevailed there last year. The villages of the region have suffered similarly, and it seems probable that fluctuations in the level of the subsoil water brought on conditions favourable to the multiplication of the hematozoon of Laveran and of the germs causing dysentery. It should be remarked that the increased mortality on these estates was principally due to these two complaints, while diarrhœa was a frequent complication of the fatal fever cases."

It is satisfactory to observe that Dr. Lorans states that careful analytical examination completely exonerates the Mare-aux-Vacoas from any suspicion in the production of typhoid fever or dysentery.

34. Dr. Lorans draws very serious attention to the absence of any legislation for the compulsory notification of infectious diseases, and gives a grave warning that "unless steps be promptly taken to cause all cases of contagious diseases to be brought to the notice of the sanitary authorities, and powers granted them to ensure proper isolation and disinfection, when dealing with infectious disorders, it is to be feared that typhoid fever will, at no distant date, prove a terrible enemy to combat. Circumstances more favourable to the spread of this disease can hardly be imagined than those which obtain in Mauritius."

The subject is receiving the attention of the Government, and an Ordinance on the subject is in course of preparation for the Legislature.

Dr. Lorans also draws attention to the necessity for a Lying-in Institution, where some intelligent and suitable matrons could be trained in midwifery.

FRIENDLY SOCIETIES.

35. There is a Government Widows and Orphans' Fund, to which all members of the Civil Service contribute 4 per cent. per annum of their salaries (Ordinance No. 2 of 1886).

The number of associates of the fund on the 31st December 1897 was 1,447, and the balance in the hands of the Government on that date was Rs. 435,617.

The fund receives from Government 6 per cent. on the mean monthly balance to the credit of the fund during the year.

The only other society assisted by Government grant is the Mutual Aid Society of Government Workmen for assisting members and their families in cases of sickness or death.

The number of members is 44, with 42 relatives and 105 children. The balance on 31st December was Rs. 1,505.

36. There is an excellent society among the Civil Servants, "The Mauritius Civil Service Mutual Aid Association," established under Ordinance 22 of 1894. Its object is to afford pecuniary assistance to Civil Servants going on leave to recruit their health, furnishing or repairing their houses, and in times of sickness or death in their families, when a sudden call on insufficient resources would entail great hardship or distress, and in many cases lead to the officers resorting to money lenders or other undesirable means of raising money to meet it.

The Act under which this society is formed allows an officer to voluntarily delegate a portion of his salary to the fund, which is deducted by the Receiver-General from his monthly salary. All other delegations of salary are expressly forbidden by the rules of the Service in this Colony.

The total number of members on 31st December was 1,037, and the balance in hand was Rs. 66,450.

There are seven other friendly societies, comprising altogether 3,108 members, with total funds Rs. 4,862.

EDUCATION.

1. *Royal College (Boys).*

(Affiliated to the University of London.)

37. The average number of scholars at the Royal College proper was 207, and at the two branch schools in Port Louis and Curepipe it was 69 and 154 respectively. Total average 361.

The expenditure altogether amounted to Rs. 148,600, and the receipts from fees and sale of books to Rs. 35,730.

The net expenditure represented Rs. 313, or rather over £20 per pupil, a large amount when compared with some other Colonies.

Two scholars are sent to the Universities in England every year, with a grant of £200 per annum for four years and passage to and from. This is not included in the above.

There are 23 private schools under managers associated with the Royal College. They receive a grant collectively of Rs. 7,000.

There is no college or public high school for girls in this Colony. The Government gives a grant of Rs. 7,000 for the higher education of girls. They are educated privately, and they enter for local examination; they also share in the prizes given by the Royal College.

2. *Government Schools.*

38. There are 49 first grade and 32 second grade Government Schools, 16 for boys alone and 15 for girls, or girls-infants, the remaining 50 being mixed.

The average attendance in the first grade school was 4,838 out of 7,719 on the roll, and in the second grade 1,293 out of 2,212.

Total average attendance 6,131 out of 9,931.

The total expenditure was Rs. 195,154.

3. *Aided Schools.*

39. The total vote for grants to Aided Schools is Rs. 100,000, which was distributed as follows:—

Denomination.	Number of Schools.	Number on Roll.	Average Attendance.	Grants Earned.
				Rs.
Roman Catholic ...	64	6,882	4,459	73,454
Church of England ...	32	2,090	1,332	22,530
Presbyterian	2	222	173	2,105
Mahomedan	1	162	109	1,612
Totals ...	99	9,356	6,073	99,701
Not included in the vote of Rs. 100,000:—				
(*a*) Grant for training of teachers				2,934
(*b*) Grant for drawing				300
Total ... Rs.				102,935

Receipts for sale of books ... ... Rs. 5,673

The re-establishment of a training institution is a much needed requirement. This Colony would do well to follow the example of the Leeward Islands in this respect, where the employment of certificated teachers, trained in the Mico Institution, has had such excellent results in the progress of education in these Islands.

The total cost of elementary education comes to nearly Rs. 25, or about £1 12*s*. per pupil, an excessive amount when measured by the results.

Industrial Education.

40. Five apprentices are annually selected by the School Committee for the Government Railway Works for five years' training, and two for the Botanical Station for four years. They are paid daily wages by Government.

The expenditure under this head for 1897 was Rs. 3,949.

It would be more satisfactory if these apprentices made more use of these opportunities afterwards. Very few of them appear to follow up the profession of mechanical engineering which the private apprentices do in many cases with great success, obtaining posts as engineers in the Mercantile Marine, &c.

Summary.

41. The net total educational expenditure was as follows :—

	Rs.
Higher Education	193,197
Elementary Education	298,089
Industrial Education	3,949
Total ...	Rs.495,235

IMPORTS AND EXPORTS.

1. *Imports.*

42. The total value of the imports for the year 1897 amounted to Rs. 27,056,008 (inclusive of charges and exchange), against Rs. 32,194,410 in 1896 and Rs. 30,506,571 in 1895.

43. In the Report on the Blue Book for 1896 and 1895, the figures on which the averages have been struck and comparisons made have, no doubt for some good reason, been taken "*Exclusive of Exchange*," that is at the value of the article at the port of shipment in rupees calculated at Rs. 10 to the £1 sterling. This will give a total value of imports of Rs. 18,948,234 in 1897, against Rs. 22,501,462 in 1896 and Rs. 20,787,652 in 1895 ; the averages for the five years being in round numbers Rs. 20,000,000.

This method of calculation is, however, possibly misleading to any one not acquainted with the real value of the factor "Exchange" in financial transactions between countries with a gold and rupee silver currency.

For instance, the total value of the imports from the United Kingdom for 1896 is given at Rs. 3,855,229 as the equivalent of £385,523, whereas as a matter of fact that sum in sterling was represented by Rs. 7,412,771, a very serious difference when it comes to paying for them.

Again, with the Indian trade, where the currency is the same in both countries, the item "Exchange" very materially alters the figures.

The imports from India in 1896 are given at Rs. 13,749,974, which with exchange come to Rs. 16,109,221.

In fact it may be summed up as follows, that in 1897 it took Rs. 27,000,000 in Mauritius to pay for the Rs. 19,000,000 debited to the Colony as its accounts for imports.

In order to preserve the comparison of the returns, however, the figures in this Report are given *Exclusive of Exchange.*

44. The fluctuations in specie movements to and from India, which are included in the return of imports-exports, require some explanation. They depend almost entirely on the facility of remitting money through the banks to India. If at any time the position of the banks, with regard to their available funds outside the Colony (from causes such as the withdrawal of capital invested in the Colony), do not admit of their issuing bank drafts to the public for remittances abroad, except at rates which make it cheaper to export specie in payment of Indian accounts, instead of a transaction on paper which would not figure in the trade returns, a quantity of specie is sent away which figures in the exports. Should money continue to be "hard" this movement of specie will continue until funds outside are available for the banks and draft remittances can be resumed. Meanwhile the circulating medium in the Colony is reduced below its requirements for agriculture and retail trade purposes, and the banks have to obtain fresh supplies of specie for the planters and local traders, which will figure as an "import."

45. As this ebb and flow of coin is purely accidental at any particular time, it should be taken into account separately when dealing with the actual trade statistics over any given period. The movement will also be intensified when the markets for sugar are abnormally bad, for although there may be a large quantity of export produce manufactured and ready for shipment, it may be difficult to obtain bills against it on account of the uncertainty of finding a sale for it in India, and in such cases it will be to the advantage of the Indian traders to remit specie. When money is hard at the banks, and markets bad in India, the greater will

be the amount remitted in specie in payment of the rice bills. Specie shipments in fact actually show whether the Colony is paying its way with its produce or not.

46. In 1897 the balance of trade was against the Colony, owing to the low prices of sugar, high prices for rice and grain. In addition to this, owing to the exchange being nearly 1*s.* 4*d.* the rupee, a considerable amount of European capital was withdrawn from the Island.

47. The following comparative return shows the imports from the several countries :—

—	1896.	1897.
	Rs.	Rs.
1. United Kingdom ...	3,855,229	3,750,780
2. British Possessions :—		
India	13,749,974	10,405,578
Australia	578,324	334,385
Singapore	177,635	175,417
Seychelles	190,295	149,946
Miscellaneous ...	241,409	319,636
Total ...	14,937,637	11,384,962
3. Foreign Countries :—		
France	2,154,651	1,727,261
Pondicherry... ...	193,477	241,560
Madagascar and Reunion	331,315	314,168
United States ...	318,191	426,379
China	243,446	435,902
Germany	108,810	89,114
Miscellaneous ...	358,706	578,108
Total ...	3,708,596	3,812,492
Grand total ... Rs.	22,501,462	18,948,234

48. It will be seen from the above that while the slight alterations in the trade with the United Kingdom and foreign countries almost balance each other, the decrease of three and a half millions of rupees falls on that with British Possessions, and it is found to occur entirely in the Indian trade.

The short crop in Mauritius consequent on the drought, and the low prices in India under the influence of plague, tight money, and bounty fed sugars, are sufficient causes for this without the additional rise in the price of rice and grains caused by the Indian famine and short supplies.

49. An analysis of the Indian trade shows a serious shrinkage in all items of ordinary consumption and use.

	Rs.
Foodstuffs decreased by	1,621,000
(There were 950 tons less rice imported, the staple article of food.)	
Soft goods	285,000
Hardware	68,000
Wood and woodenware	20,500
Narcotics	19,000
Chemical manure	139,500

If we eliminate specie (Rs. 1,275,728 less than in 1896), the returns show a falling off in all articles of general consumption and use, from India alone, of over two millions and a quarter of rupees.

50. Turning to the general imports the returns show that the imports per head of the population were Rs. 85.86 in 1896 and Rs. 71.60 in 1897. Apart from the articles above mentioned in the Indian trade, a considerable falling off occurred in those principally imported from other countries, amongst which are noticeable :—

	Rs.
Guano	101,000
Jewellery	21,000
Olive oil	19,700
Boots	19,000
Beer	15,000
Kerosine oil	13,500

51. The classification summary gives the following result :—

—	Values Exclusive of Charges and Exchange.		Increase + Decrease —.
	1896.	1897.	
	Rs.	Rs.	Rs.
1. Live animals, food, drinks, and narcotics.	12,824,595	11,253,567	—1,571,028
2. Raw materials :—			
I. Textile	8,127	12,540	+ 4,413
II. Metal...	2,070	—	— 2,070
III. Others	422,404	907,829	+ 485,425
3. Manufactured articles :—			
I. Textile	2,230,178	2,027,132	— 203,046
II. Metal...	805,100	754,299	— 50,801
III. Others	3,671,962	2,730,832	— 941 130
	19,964,436	17,686,199	—2,278,237
4. Coin bullion and specie ...	2,537,026	1,262,035	—1,274,991
Total ... Rs.	22,501,462	18,948,234	—3,553,228

Exports.

52. The total value of the exports for 1897 (Rs. 81.12 per head of the population, against Rs. 90.55 in 1896) was Rs. 30,654,007, against Rs. 33,949,614 in 1896, showing a decrease of Rs. 3,295,607. But of this Rs. 2,522,109 was specie exported in excess of the amount in 1896.

Eliminating specie for both years the real decreases in the exports of produce and manufacture of the Island was Rs. 5,637,729.

Decrease.		Increase.	
	Rs.		Rs.
Sugar	5,955,248	Molasses	174,445
Rum	190,210	Vanilla	15,986
Aloe fibre	10,819	Hides	26,729
Coconut oil	8,314	Soap	36 112
		Miscellaneous ...	273,590
	6,164,591		526,862
	526,862		
Net decrease ...	5,637,729		

53. The decrease in the export of sugar was due (1) to the short crop consequent on the drought, (2) to the bad state of the Indian markets; a large amount of sugar remained in the warehouses at the end of the year and specie was remitted instead.

54. The preferential duty imposed in Madagascar in favour of French rum (from Bourbon) had the following effect on the exports of rum and molasses from here to that country:—

Export to Madagascar—

—	1896.	1897.
Rum	259,117 gallons.	52,448 gallons.
Molasses ...	18,318 cwt.	1 cwt. 16 lbs.

India, however, took 235,461 cwt. of molasses in 1897, against 54,537 in 1896.

55. The total quantities of sugar, rum, and molasses—about 98 per cent. of the total exports—were—

—	1896.	1897.
Sugar ...	153,575 tons.	138,079 tons.
Rum	506,560 gallons.	142,288 gallons.
Molasses ...	152,733 cwt.	243,505 cwt.

56. The following comparison shows the produce export to the several markets of the world :—

—	1896.	1897.
	Rs.	Rs.
1. United Kingdom ...	270,740	382,538
2 British Possessions :—		
India and Ceylon ...	16,443,173	12,429,346
South Africa... ...	4,965,493 (Natal—Nil)	4,854,913 (Natal—343,503)
Australasia	4,085,345 (New Zealand-671,210)	2,623,985 (New Zealand—Nil)
Hong Kong	341,885	224,900
Miscellaneous ...	160,659	158,051
Total ...	25,996,555	20,291,195
3. Foreign Countries :—		
United States ...	1,784,419	1,795,179
France	252,689	200,620
Madagascar	332,967	176,778
Delagoa Bay... ...	275,648	372,967
Zanzibar	Nil	15,864
Miscellaneous ...	148,123	188,271
Total ...	2,793,846	2,749,679
Grand total ... Rs.	29,061,141	23,423,412

57. Apart from the Indian trade, which has been separately dealt with, it will be seen that there was an increase in trade with the United Kingdom, South Africa, and Zanzibar, while there was a decrease in Australia, France, and Madagascar.

The Colony is losing in the Australian and Madagascar markets, and gaining in Natal, Delagoa Bay, and Zanzibar.

The sugar crop for 1898 promises to be a very large one, which will no doubt materially alter the figure for that year compared with 1897. Unfortunately the prospect of prices is not so promising.

MAURITIUS,
1897

SHIPPING.

58. The shipping returns show the following comparison between 1896 and 1897 :—

Nationality.	Entered.		Cleared.	
	Number.	Tonnage.	Number.	Tonnage.
Sailing Vessels :—				
British	113	59,329	121	64,766
French	18	4,795	19	5,322
German	29	7,836	28	7,412
Norwegian	11	4,855	12	5,442
Danish	7	3,584	7	3,584
Various	5	2,972	4	2,441
1897—				
Total Sailing Vessels ...	183	83,371	191	88,967
Steamers :—				
British	80	155,680	82	160,059
French	59	78,606	59	78,606
German	8	7,994	8	7,994
Norwegian	2	3,057	2	3,057
1897—				
Total Steamers ...	149	245,337	151	249,716
Total Sailing Vessels ...	183	83,371	191	88,967
Total—1897 ...	332	328,708	342	338,683
Total—1896 ...	391	394,371	387	388,456
Decrease in 1897 ...	59	65,663	45	49,773

The falling off is due to the short sugar crop. The shipping figures for 1897 are, however, in excess of the average of the previous five years.

AGRICULTURE.

59. The return of agriculture shows that out of a total area of 473,760 acres, 83,392 were under cultivation, 4,425 being cultivated in the Métairie system, *i.e.*, let to tenants on shares of the crop.

69,000 acres are returned as under sugar cane ; 100 in tea ; 50 in vanilla ; 10 in coffee ; 269 in maize.

A considerable extent of land, 3,221 acres, is returned as under aloes for fibre, but the production of this article is now very small.

The remainder of the land included in estate lands, 72,799 acres, is under "catch crops," pasturage, or wood.

60. There were 147 cane mills (all steam), 58 of which are fitted with the "Triple Effect ;" 31 fibre machines ; 40 manure manufactories ; 30 distilleries (of which 12 were working). No new machinery of any kind was erected.

A great discouragement to the distillers here was suffered by the imposition of an import duty of 80 francs per hectolitre against all rum other than the export of French Colonies, in Madagascar this year, thus closing that market to Mauritius in favour of Réunion (Bourbon).

61. The average rates of wages were—

—	Per day.	Per task or job (one day's work).
	Rs.	Rs.
1. Agricultural ...	0.50 to 0.75	0 60
2. Domestic ...	0 75	
3. Tradesman ...	1.00 to 1.50	1 50

62. The following table shows the average prices of ordinary articles of consumption in the Colony :—

Article.		Price.			Article.		Price		
		£	s.	d.			£	s.	d.
Flour... ...	per lb.	0	0	1½	Butter (fresh)	per lb.	0	2	5
Bread ...	"	0	0	1½	" (salt)	"	0	1	0½
Milk ...	... per quart.	0	0	2	Cheese ...	"	0	0	10½

Article.	Price.			Article.	Price.		
	£	s.	d.		£	s.	d.
Beef ... ... per lb.	0	0	3½	Sugar... ... per lb.	0	0	1⅛
Mutton ... „	0	0	8½	Salt ... ... per 3 lbs.	0	0	0½
Pork ... ... „	0	0	7¼	Beer ... ... per doz.	0	9	6
Rice per bag of 165 lbs.	0	16	8	Wine, per cask (49½ galls.)	6	17	10
Tea ... ... per lb.	0	1	1	Tobacco ... per lb.	0	2	0
Coffee ...	0	0	7¼				

63. The following extracts from the report of the President of the Chamber of Agriculture are of great interest :—

"1897 opened badly for the Sugar Industry. A drought had already afflicted the Northern and Central Districts for the last two months of 1896, after a few showers in January, gained in severity, and was persistent through the year up to 5th December, when it broke with a cyclone of exceptional character as regards the early date of its appearance and the violence of the wind during its short duration. Considerable damage to buildings was occasioned by this storm, and some to canes; but the crop was for the most part reaped, and the canes for the next year were not sufficiently forward to suffer very severely. The damage by the wind was nothing in comparison with the benefit brought by the rains for the coming crop. Unhappily the drought had been more or less severe over the whole of the Island; least felt in the South, but in the Northern and Eastern quarters it was disastrous, many estates experiencing the loss of 50 per cent. up to 75 per cent. of an average yield. The total production of the Colony is estimated at about 115,000 against over 150,000 tons in 1896. Prices have shown very little improvement, owing partly to the immense production of beetroot sugar and the fact that a rise in the value of the rupee in India has permitted large importations of European granulated beetroot sugar into that market; and to aggravate the planters' difficulties the prices of all provisions, especially rice, has been 50 per cent. higher than before.

"Parcelling out land amongst Indians proceeds on a large scale; in the majority of cases no money passes for the first year or two, except the value of the canes if there be any ripe enough to cut in the first year. It is impossible to predict what will be the effect of this great settlement of labouring Indians upon the land; it will undoubtedly lead to a great increase in the production of sugar canes, raise the value of the land, and must ultimately lead to the establishment of central factories and the division of labour.

"The cultivation of tea has been extended, and produce of excellent quality has been put on the market in limited supplies. While the quality is sufficiently good to enable it to compete on the English market, the scale on which it has been produced has not been sufficiently large to show whether the cost of manufacture will permit of exporting it profitably."

CROWN LAND RETURN.

64. Practically no Crown lands were sold during the year.

The total area of the Crown lands of Mauritius at the present date is 79,285 acres, of which 5,895 acres are leased for periods of ten and twenty years. The total number of leases was 791.

The amount of Crown land rent for 1897 was Rs. 26,684 out of Rs. 41,657 due for the year.

The total amount of arrears of rent on 31st December 1897 was Rs. 19,161, of which Rs. 1,135 is struck off as irrecoverable.

PRISONS.

65. The total number of admissions were—

Year.	Males.	Females.	Total.
1896	6,118	385	6,503
1897	7,374	380	7,754
	Increase. 1,256	Decrease. 5	Net increase. 1,251

The above increase is found amongst the offences classified as under :—

Offences.	Total Number of Admissions.
Wounding	64
Larceny	636
Minor offences	374
Road cases	87
Vagrancy	374
Labour Law	125
	1,660

66. The Superintendent of Prisons in his report says : "I attribute the large increase in convictions to the extreme mildness of prison discipline, and to poverty and want of employment among the working classes."

Offences against prison discipline, except for very trifling matters, are dealt with by the Prison Board.

There were 18 escapes (17 recaptured), against 22 in 1896.

The average number of prisoners was as follows :—

Port Louis Prison (Town)	367
Central Prison (Beau Bassin)... ...	733
Total	1,100

The sick and death rate this year was unusually high.

—	Average in Hospital.	Deaths.	Rate per 1,000
Port Louis (Town) ...	81·05	12	33
Central Prison		44	60
Total	81·05	56	46

67. The alarming high sick and death rate at the Central Prison led to the appointment of a Special Committee to enquire into its causes. They found that the majority of cases occurred amongst the short-sentenced prisoners who are taken from the poorest and physically weakest classes of the population. The causes of sickness and death were principally from malarial fever and its complications, phthisical complaints, and dysentery. The situation and sanitary arrangements of the large New Central Prison at Beau Bassin, and the prison diet, are to all appearances excellent, and the Committee did not attribute the effect to local causes ; but it is to be feared that at certain seasons of the year the whole locality is not as healthy as it used to be, and the cases of fever amongst the prison officers who reside in the vicinity of the prison was very large. At the same time no large increase of sickness was found amongst the inmates of the Lunatic Asylum or the Barkly Poor Law Asylum, which are close to.

But it is a significant fact that the prison at Port Louis (Town), which an Inspector of Prisons in England would probably at once condemn, is coming to be looked on by the prison officers and prisoners as the "Sanatorium" for the Central Prison, which is built on the latest principles.

Certain suggestions and recommendations of the Committee on the Central Prison are being carried out, which it is hoped may effect some improvement.

68. The cost of the prison for 1897 was Rs. 161,702, against Rs. 165,546 in 1896.

The total value of the prisoners' work was calculated at Rs. 133,846, against Rs. 115,402 in 1896, but the Superintendent remarks that the value of manufactured goods supplied and work performed for Government purposes shows a large decrease of Rs. 10,195.

REFORMATORY.

69. The number of boys sent to the Reformatory was 412: 310 for purpose of penal imprisonment, and 102 for non-payment of fine and costs.

The Superintendent remarks: "It is to be noted that 306 of these boys were committed on sentences varying from two days to three months only."

It is quite evident from the use to which this institution has come to be put that its title is a misnomer. No system of temporary detention of juveniles for non-payment of fine and costs, or for such sentences as those mentioned, can for a moment be associated with the idea of a reformatory, and it is useless to treat it as one until a complete change is made in the conception of its purposes.

70. The expenditure was Rs. 20,760. The earnings of the institution were calculated at Rs. 4,600, less by Rs. 325 than in 1896; and the Superintendent again remarks: "This is to be attributed to less indents (Government) for 'carpentering' and 'tinsmith's work' having been drawn on the institution this year."

The punishment returns show a marked improvement in discipline.

The health of the boys was good; no death occurred.

The number of boys on 31st December 1897 on the penal side of the institution was 64, and in the industrial school 18.

71. A committee has been appointed to report on the Reformatory, and this report will be presented during the year 1898. No doubt some beneficial changes will follow upon it.

CRIMINAL STATISTICS.

72. The following table is compiled from Police Statistics for five years 1893–1897 :—

Year.	Total Number of Cases Reported to Police.	Number of Cases Enquired into but not Prosecuted.	Number of Persons Prosecuted.	Number of Persons Charged				Amount of Property Recovered.
				Serious Offences.	Minor Offences.	Labour Law.	Vagrancy.	
								£
1893	21,457	8,788	15,072	3,664	8,532	1,041	1,739	28,238
1894	24,024	10,352	16,150	3,560	10,117	1,025	1,412	24,326
1895	24,592	10,706	16,461	3,179	10,904	977	1,341	25,212
1896	26,915	10,858	19,123	3,277	13,851	905	979	23,005
1897	26,963	10,341	19,710	3,858	12,986	920	1,835	26,753

It will be seen that there was an increase under nearly every head of offence. The prolonged drought and the scarcity of employment were probable factors in this, especially under the heading of vagrancy, which in this Colony is practically synonymous with " out of work."

Of the 1,835 persons arrested for vagrancy 877 were committed to prison, 21 to the Reformatory, and the rest otherwise dealt with.

HOSPITALS.

Civil Hospital.

73. Number of persons treated ...	5,121
Number of deaths	320
Number of patients discharged ...	4,690
Nationality of cases admitted :—	
Creoles	3,020
Indians	1,950
Europeans	135

The Medical Superintendent remarks on the frequency of tubercular affection of the lungs, which he attibutes to poverty, disregard of sanitary rules, alcoholism, and influenza "which very easily opens the door to the specific microbe."

Barkly Asylum Hospital (Poor Law).

74. Number of patients treated 2,454, 470 less than in 1896.

Death-rate 54 per thousand, against 73 in 1896.

There were 21 public dispensaries open in 1897, and the number of patients who obtained gratuitous medical assistance and medicine from them was 59,751.

75. *Lunatic Asylum.*

—	Males.	Females.	Total.
Number of inmates on 1st January 1897.	232	134	366
Admissions during the year	56	34	90
Total number	288	168	456
Discharges	52	34	86
Died	6	6	12
Number of inmates on 31st December 1897.	230	128	358
Daily average 361.			
Average number employed daily	100	52	152

Of the 358 patients on the 31st December 1897 :—

Males.	Females.	—
139	52	= 191 were from the Indian population.
91	76	= 167 were from the general population.
230	128	= 358.

The average number of lunatics in the asylum for the ten years 1888–1897 was 391, the number varying from a maximum of 440 in 1892, the year of the last great cyclone, to a minimum of 358 in 1897.

The population in 1888 was 369,302, lunatic 1·01 per thousand.

" " 1897 " 377,856, " 1·06 "

The total expenditure of the lunatic asylum was in 1897 Rs. 81,645, giving an average cost per patient of R. 0·619 per diem.

CHARITABLE INSTITUTIONS.

1. *Religious Institutions.*

76. The religious societies, with a certain amount of assistance from Government, provide for the instruction and care of a large number of the young and others.

The Roman Catholic Church has 90 institutions, convents, schools, orphanages, &c., providing for	8,275	persons
The Church of England, an orphanage and 41 schools	2,487	"
The Church of Scotland, two schools ...	222	"
Total religious institutions	10,984	"

2. *Government Relief.*

77. Medical.—Persons treated in hospital	... ...	13,872
" " in private infirmaries		574
" " at dispensaries	...	61,505
" " in lunatic asylum	...	429
" " in leper asylum	...	215
		76,595
Out-door relief.—Alimentary and pecuniary	...	1,857
Total ...	...	78,452

METEOROLOGICAL.

78. The Report of the Director of the Royal Alfred Observatory (on a plain 179 feet above sea-level, 3 miles from the sea, long. 12° 6′ E., lat. 20° 5′ S.) shows that the mean rainfall for the Colony was 27·26 inches, being 21·37 inches below the average for the last 23 years, and the lowest on record, being 2·48 inches less than in 1886, hitherto the year of least rainfall.

The mean temperature was 74° as against an average of 73·5° for the last 23 years.

The maximum temperature in the sun (on 9th February) was 155·2° F.; in a room in the shade (on 18th January) 88° F.; in a screen on lawn (on 30th November) 92·6° F.

The minimum temperature in a room in the shade (21st May) 57·4° F.; in a screen on lawn (21st May) 53·1° F.

The mean dew-point 64·6°, maximum (14th January) 76·6°, minimum (21st May) 48·9°.

The mean barometrical pressure (sea-level) was 30·066 ins., maximum (7th September) 30·400 ins., minimum (5th December) 28·922 ins.

Storm warnings were issued on January 26, February 17, 18, 19, 22, 27, and 28, December 5, 6, and 19–25.

The tracks of five tropical cyclones in the South Indian Ocean were determined; one of these passed over Mauritius on the evening of the 5th December, but fortunately without doing much serious damage.

MAURITIUS
1897.

RAILWAYS AND ROADS.

Railways.

79. The receipts for the railways (105 miles), exclusive of Government traffic (Rs. 57,357), were—

	Rs.	Rs.
Passenger traffic	969,511	
Sugar „	390,889	
Goods „	351,922	
		1,712,322
The total expenditure was		1,166,440
Balance in favour of receipts ...		Rs. 545,882

Roads.

80. The cost of maintenance of roads (370 miles), bridges, and ferries was Rs. 192,170.

POST OFFICE AND TELEGRAPHS.

Post Office.

81. The Report of the Colonial Postmaster shows the following work of the Department in 1896 and 1897 :—

—	Letters.	Post-cards.	Newspapers.
Mail packets ...	293,998	1,701	430,536
Private ships ...	79,996	406	34,129
Inland post... ...	860,329	23,689	940,638 [°]
Total	1,234,323	25,796	1,405,303
„ 1896 ...	1,226,357	25,608	1,301,558
Increase 1897 ...	7,966	188	103,745

[°] It may be noted that local newspapers pay no postage fee. There was an increase in the circulation of 100,000 in 1897.

Postal Parcels.

Year.	United Kingdom.	France and other Countries
1896	1,856	5,986
1897	2,093	6,898
Increase in 1897 ...	237	912

The sale of postage stamps, &c., realized Rs. 72,586, against Rs. 69,555 in 1896.

82. *Money Orders.*

Country.	Issued in the Colony.	Paid in the Colony.
	£	£
United Kingdom ...	3,539	2,000
South Africa ...	208	5,745
Australia	221	102
Total... £	3,968	7,847
	Rs.	Rs.
India and Ceylon ...	98,243	6,845
Dependencies ...	4,101	30,239
Total ... Rs.	102,344	37,084

Inland, Rs. 157,651.

Telegraph Department.

83. The gross revenue of the Telegraph Department was Rs. 97,153 in 1897, against Rs. 96,915 in 1896, showing an increase of Rs. 238.

MAURITIUS, 1897.

The total cost of the Postal and Telegraph Department, including payment for conveyance of mails, &c., was as follows :—

		Rs.	Rs.
1896—Establishments	...	87,516	
Other charges	...	136,856	
			224,372
1897—Establishments	...	86,136	
Other charges	...	98,967	
			185,103
Decrease in 1897 ...		...	Rs. 39,269

GENERAL.

84. There is very little to be added to what has been said already in dealing with financial and agricultural matters in this Report.

The sudden and unforeseen crisis into which the Colony was thrown threatened at one time to produce most serious and immediate disaster. The means by which that was averted will form a very interesting page in the financial history of the Colony, and will no doubt be dealt with in the Report for 1898, to which year it belongs ; but it will take long before the effects of 1897 are neutralized, and although the Government is taking every possible opportunity of reducing expenditure—which can only be economically effected, as far as establishments are concerned, gradually, as vacancies occur—and of revising and improving the collection of revenue, it will be a difficult, if not impossible, task to make its finances balance without recourse to some new source of income.

85. Fortunately towards the end of the year the drought ended, and the prospects of a large crop in 1898 are excellent. But the prices obtainable for sugar are now so low that the future is very uncertain. The planters are aware that there is only one way to face the struggle, by improving their sugar machinery so as to obtain the best result at the least cost of production.

86. Too much importance cannot be given to the subject of sanitation, and especially of providing a good water supply to the Island. This excellent work has been begun in part, and should be continued at all costs.

G. RUTHVEN LE HUNTE.

July 31st, 1898.

REPORT ON RODRIGUES FOR THE YEAR 1897.

Rodrigues, 1897.

TAXATION.

No change has been made in the taxation of this Dependency during 1897.

REVENUE.

	Rs.
The revenue of the year (exclusive of Customs and sums received in Mauritius), amounted to ...	8,007
and the revenue of 1896 to	8,310
showing a decrease of	Rs. 303

EXPENDITURE.

	Rs.
The payments made in 1897 (not including sums paid in Mauritius) and matters of account, amounted to	23,502
and the expenditure of 1896 (not including sums paid in Mauritius) and matters of account, to	24,469
showing a decrease of	Rs. 967

The ratio of the revenue to the population of 1897 was Rs. 2.88 and a fraction per head. The ratio of the expenditure was Rs. 8.47 and a fraction per head.

LEGISLATION.

The only law enacted for this Dependency during 1897 was Ordinance No. 16 of 1897, imposing a tax on land cultivated in tobacco at Rodrigues, and abolishing the import duty on it when imported into Mauritius.

JUDICIAL.

—	1896.	1897.
Criminal Side.		
Number of informations filed, including applications for search warrants	65	84
Number of adjudications	37	65
" cases abandoned	11	3
" persons convicted	46	76
" " acquitted	15	8
" cases pending	2	—
Civil Side.		
Number of cases entered	99	101
Stipendiary Side.		
Number of cases	9	4
" engagements	8	5
" discharges	4	9

The total number of cases of all jurisdictions was 173 in 1896 and 194 in 1897. The amount of fines paid was Rs. 221.54.

The Court revenue was Rs. 531.35, and the expenditure Rs. 248.

POPULATION.

The population on the 31st December 1897 was composed of 2,772 inhabitants, consisting of natives of this Island, of Mauritius, Madagascar, India, China, Europe, Seychelles, and Reunion, who are traders, agriculturists, and fishermen.

The number of births was	165
" " deaths	39
" " arrivals	85
" " departures	74

RODRIGUES, 1897.

The birth-rate shows an increase of one birth in 1897, if compared with the previous year, and the death-rate a similar increase.

Eight marriages were celebrated in 1897, against twenty in 1896.

ECCLESIASTICAL.

There are two Roman Catholic chapels at Rodrigues: one at Port Mathurin and the other at St. Gabriel. The expenditure under this heading was Rs. 1,999.92 in 1897.

EDUCATION.

In 1897 there were two schools in operation at Rodrigues, the cost of which is paid by Government. Total cost, Rs. 2,596.

EXPORTS.

The exports (exclusive of specie) amounted to Rs. 103,181.25 in 1896 and to Rs. 127,687.75 in 1897. The ratio per head was Rs. 39.15 in 1896 and Rs. 46.02 in 1897.

IMPORTS.

The imports amounted to Rs. 96,263 in 1897, against Rs. 154,886 and 50 cents in 1896. The ratio of import per head was Rs. 34.72 in 1897, against Rs. 58.78 in 1896.

SHIPPING.

The number of ships which arrived at and left Rodrigues was 8 in 1897, against 11 in 1896.

The service between Rodrigues and Mauritius was performed by sailing vessels under contract with the Government of Mauritius, which pays a subsidy of Rs. 7,500 for five trips in the year between April and December.

H.M.S. "Eclipse" and "Melpomene" visited the Island in July and August.

CROWN LANDS AND FORESTS.

Land Rent.

The total revenue actually received under the heading of land rent (fishing posts, town lots, and islands and other leases included) amounted to Rs. 2,198.25, against Rs. 2,135.50 in 1896, showing an increase of Rs. 62.75.

Pasturage.

In 1897 the pasturage fees received during the year amounted to Rs. 502.50.

Forest Produce.

The revenue derived from forest produce amounted to Rs. 267.01, against Rs. 260.14 in 1896.

Land Sales.

The amount received during the year under this heading was Rs. 231.37.

GAOL.

42 persons were committed to gaol in 1897, against 38 in 1896.

MEDICAL.

The number of patients maintained in the public hospital of Mount Lubin was 69 in 1897, against 93 in 1896.

In 1896 medical care was given to 2,484 persons at both dispensaries (Port Mathurin and Mount Lubin), and 2,497 in 1897.

In 1896 nine deaths occurred at the hospital of Mount Lubin, and eight in 1897.

The prevailing diseases were asthma, fever, anæmia, dysentery, debility, cramps, ulcers, disease of the heart, apoplexy, diarrhœa, tuberculosis, and rheumatic fever.

In 1896, 175 children were vaccinated, and 80 in 1897. No hospital fee is exacted as the persons treated are destitute.

The total expenditure for the medical branch was Rs. 3,734.63 in 1897, against Rs. 3,701.74 in 1896.

METEOROLOGICAL.

Thermometer.

	Degrees.
Maximum, 6th February	88·04
Minimum, 22nd August	68·00

Barometer.

	Inches.
Maximum, 7th September ...	30·500
Minimum, 27th January	29·734

No hurricane visited the Island this year.

POLICE AND FOREST RANGERS.

The expenses for those two branches amounted to Rs. 5,207.04 in 1896 and 5,019.00 in 1897.

POOR LAW.

24 persons received relief in 1897.

PUBLIC DEBT.

Outstanding on 31st December 1897 Rs. 1,486.50.

GENERAL REMARKS.

The Governor of Mauritius, Sir Charles Bruce, K.C.M.G., and His Lordship the Bishop of Port Louis visited Rodrigues in 1897. His Excellency arrived on H.M.S. " Melpomene " on the 15th August and landed on the 16th at Port Mathurin.

RODRIGUES, 1897.

The British ship "Traveller," from Java, put in for assistance on the 4th February and was thrown ashore during the next night, and became a total wreck.

The crops of beans and other plantations have been good in 1897. They were nearly double the amount exported in 1896.

The inhabitants have, at the latter end of the year, begun planting out lands with tobacco. This is the result of the suppression by Ordinance 16 of 1897 of the Custom dues which were imposed in Mauritius on the tobacco imported from Rodrigues.

It is anticipated that the revenue from the tax on lands planted with tobacco will be from Rs. 4,000 to Rs. 6,000.

G. RUTHVEN LE HUNTE,

Colonial Secretary.

August 1898.

COLONIAL REPORTS—ANNUAL.

No. 279.

MAURITIUS AND RODRIGUES.

REPORTS FOR 1898.

MAURITIUS AND RODRIGUES.

MAURITIUS, 1898.

(For Reports for 1897, *see* No. 250.)

GOVERNOR SIR CHAS. BRUCE to MR. CHAMBERLAIN.

Government House,
Mauritius,
29th August 1899.

SIR,

I HAVE the honour to transmit herewith the Blue Book of Mauritius for the year 1898, together with copies of the usual summary.

2. I also enclose the report by Sir Graham Bower, K.C.M.G., Colonial Secretary, on the Blue Book.

3. The year 1898 was, for the Colony of Mauritius, a period of exceptional stress and strain. The value of the sugar crop of 1897–98, as compared with the crop of 1896–97, showed a shortage of some Rs. 500,000, while the cost of provisionment of the Colony with rice and imported food stuffs showed a very large excess owing to the unprecedentedly high prices prevailing in the Indian markets, the result chiefly of plague and famine. The Colony thus suffered from a serious contraction of the purchasing power of the community, while the cost of provisionment to which their purchasing power must of necessity be largely devoted was increased beyond all previous record. These difficulties were made still more grave by the stringency of the Indian money market. The Indian banks were in consequence compelled to restrict their operations and the facilities given for the transaction of business between Mauritius and India, and our local traders found the resources of their correspondents in India limited to an extent which forced them to meet their obligations in India by the export of specie. It became necessary, therefore, to take exceptional measures to avert the public calamity which threatened the community, and the crisis was averted by

Government coming forward to assist the financial institutions of the Colony to secure the regular course of commercial transactions, and the regular payment of wages and pecuniary obligations in the Colony. The measures adopted included the issue by the Government of drafts on Bombay, the temporary suspension of the law requiring the redemption of currency notes in specie, a loan to the Commercial Bank, and a loan to planters. These measures were entirely successful, and the crisis was fortunately followed by a bumper sugar crop, the export of sugar for the season 1898–99 exceeding the highest previous record by over 30,000 tons. Only an insignificant part of the crop derived any advantage from the rise of prices resulting from the countervailing duties Act passed by the Government of India, and the average prices realized were probably the lowest on record. But the crop of the season now commencing is of exceptional promise, and will realize the full benefit of the Act, for the passing of which this Colony has reason to be profoundly grateful.

4. The financial crisis of the year, or rather the causes that brought it about, affected every branch of the public revenue, and it became necessary not only to reduce the expenditure of the year to the lowest possible amount consistent with the efficient administration of the public service, but to impose additional sources of taxation. The expenditure of the year was reduced below the expenditure of 1897 by very nearly Rs. 500,000, while the additional taxation imposed was estimated to increase the revenue of an average year by about the same amount. Notwithstanding these measures the revenue of the year 1898, amounting to Rs. 7,620,318, or Rs. 376,386 less than that of the preceding year, fell short of the expenditure, amounting to Rs. 8,131,465, by Rs. 511,147. This deficit was met out of Treasury balances.

5. The necessity for the measures adopted to bring about an equilibrium of revenue and expenditure may be easily shewn. The average revenue of the Colony for the five years preceding 1898 was Rs. 8,351,569, and the average expenditure Rs. 8,423,881, showing a considerable excess of expenditure over revenue. The defect of equilibrium was concurrent with the falling fortunes of the Colony as indicated by a statement in the Blue Book Report, showing that while the value of imports in 1894 was Rs. 32,852,313, it fell in 1898 to Rs. 26,326,007. During the same period the value of the exported produce of the Colony, amounting in 1894 to Rs. 29,497,248, fell in 1897 to Rs. 23,423,412. These figures throw light on the causes of the financial depression of 1898. The superior fortunes of the sugar industry during the last part of that year, however, raised the value of the exported produce of the Colony to Rs. 26,013,061, but the realization of the sugar crop was too late to affect, to any considerable extent, the revenues of the year. It has, however, had a marked influence on the revenue of the current financial year.

MAURITIUS, 1898.

6. The direction of commerce during the year 1898 is sufficiently indicated by the following figures:—

British Possessions.

—	Imports.	Exports.
	Rs.	Rs.
United Kingdom	5,443,343	1,097,872
Continental India	11,879,590	10,185,267
Cape Colony	197,928	4,726,613
Ceylon	23,125	3,619,783
Australasia	942,414	1,516,787
Other British Possessions	326,307	538,232
Total	18,812,707	21,684,554

Foreign Countries.

—	Imports.	Exports.
	Rs.	Rs.
France	1,962,176	647,503
United States	896,365	3,574,210
Other Foreign Countries	1,658,404	1,413,162
Total	4,516,945	5,634,875

The above figures are exclusive of specie, the movement of which was as follows:—

—	Imports.	Exports.
	Rs.	Rs.
Silver	4,756,780	1,598 640
Gold (inclusive of exchange)	2,630	1,200

The proportion of trade between Mauritius and other parts of the British Empire was, as regards imports, 84 per cent., and as regards exports, 81 per cent. of the whole volume.

7. As sugar constitutes about 95 per cent. of the entire exports of the Colony, and as the Blue Book figures embracing the calendar year do not very accurately indicate the comparative crop of successive seasons, the following table will be found interesting. It shows the export of sugar, in tons, of the last three seasons, and the principal markets to which it was sent:—

Export of Sugar in Tons.

Crop.	India.	Africa.	United States.	Australia.	England.	France.
1896-97	77,285	30,288	12,369	23,486	1,884	None.
1897-98	62,187	31,465	12,291	10,836	1,918	About 500
1898-99	93,390	27,800	44,574	6,493	6,772	2,100

8. It is worthy of special remark that the exports of the last season to the United States more than trebled the exports of the previous season. This was undoubtedly the consequence of the United States countervailing duties on bounty-fed sugar aided by the low prices of Mauritius sugars, the result of large imports of bounty-fed sugar into India. It is probable that the effect of recent legislation in India will be to transfer to the Indian market a large share of the export diverted last year to the United States.

9. The effect of the protective policy of the Government of Madagascar on the Colonial rum trade has been to reduce the export of rum to Madagascar from 2,459,461 litres in 1895 to 6,474 litres in 1898.

10. I have on several recent occasions drawn attention to the rapid acquisition of land in the Colony by the Indian population, and the parcelling out of great estates into small holdings. Notwithstanding the financial depression of the year, real property to the extent of 14,792 acres, of the value of Rs. 2,087,837, was acquired by 1,427 East Indians, of whom 485 were immigrants originally introduced at the expense of the Colony. During the four years 1895 to 1898 East Indians acquired property to the value of Rs. 7,048,776. Although I am unable to obtain any definite statistics on the subject, I am assured by well informed persons that about one-third of the sugar crop is now grown by small proprietors.

I have, &c.,

CHAS. BRUCE,
Governor.

REPORT ON THE MAURITIUS BLUE BOOK FOR THE YEAR 1898.

MAURITIUS,
1898.

I.—FINANCIAL.

The following are the heads of revenue for the years 1897–98:—

REVENUE.

Heads of Revenue.	1897.	1898.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Customs	2,769,889.25	2,723,834.24	—	46,055.01
Port, harbour, wharf, and lighthouse dues.	189,850.49	180,378.33	—	9,472.16
Licenses, excise, and internal revenue not otherwise classified.	2,399,304 37	2,159,345.06	—	239,959.31
Fees of court or office payments for specific services, and reimbursement in aid.	213,484.97	235,325.50	21,840.53	—
Post Office and telegraphs.	102,028.89	125,951.64	23,922.75	—
Government railways ...	1,712,322.86	1,568,389.48	—	143,933.38
Rent of Government property.	71,760.65	69,243.20	—	2,517.45
Interest	489,731.01	481,870.34	—	7,860.67
Miscellaneous receipts...	47,518.53	69,687.91	22,169.38	—
Land sales	814.62	6,293.26	5,478.64	—
Total ...	7,996,705.64	7,620,318.96	73,411.30	449,797.98

Deduct increase 73,411.30

The receipts of 1898 show a decrease of Rs. 376,386.68

MAURITIUS, 1898.

The above figures are clearly indicative of a period of financial depression. The decreases under customs and railways are indicative of a bad crop, due to drought, and show a decrease of exports and imports, as well as a decrease in the amount of sugar carried by the railways.

On the other hand the increases are equally indicative of "hard times," for the increases in fees of court and mortgage fees speak for themselves.

The following is a comparative statement of the heads of expenditure for the years 1897 98:—

Heads of Service.	1897.	1898.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Public debt	584,888.53	584,807.59	—	80.94
Pensions	364,655.68	349,769.97	—	14,885.71
Governor and Legislature.	69,570.36	69,386.42	—	183.94
Colonial Secretary ...	56,468.95	61,443.53	4,974.58	—
Receiver-General ...	146,565.53	128,710.55	—	17,854.98
Auditor-General ...	56,075.44	55,671.85	—	403.59
Customs	225,526.47	225,346.65	—	179.82
Port and marine ...	200,510.71	166,460.03	—	34,050.68
Observatory	17,242.52	18,412.87	1,170.35	—
Museum...	4,650.09	4,686.56	36.47	—
Registrar-General ...	21,731.66	21,077.94	—	653.72
Receiver of registration dues.	58 671.31	56,888.71	—	1,782.60
Post Office	190,327.29	200,262.58	9,935.29	—
Botanical gardens ...	17,621.24	16,821.03	—	800.21
Woods and forests ...	105,183.35	97,696.20	—	7,487.15
Judicial Departments...	530,774.99	505,798.39	—	24,976.60
Ecclesiastical	141,320.93	139,006.66	—	2,314.27
Education	473,365.32	471,333.06	—	2,032.26
Medical and Health Department.	672,946.47	641,066.35	—	31,880.12

Heads of Service.	1897.	1898.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Quarantine	43,814.99	25,010.84	—	18,804.15
Poor Law Commission	182,081.30	196,444.17	14,362.87	—
Police	596,953.30	581,147.33	—	15,805.97
Prisons	168,532.14	165,870.19	—	2,661.95
Storekeeper-General ...	32,531.89	32,481.40	—	50.49
Immigration	124,576.21	121,787.21	—	2,789.00
Dependencies	47,076.01	44,415.00	—	2,661.01
Crown Agents	4,186.04	4,185.09	—	.95
Writers and copyists ...	6,180.91	5,941.59	—	239.32
Transport	8,923.56	6,751.60	—	2.171.96
Miscellaneous	297,608.81	261,855.12	—	35,753.69
Charitable allowances ...	13,468.61	14,057.48	588.87	—
Interest	125,226.22	123,720.06	—	1,506.16
Military contribution ...	418,272.75	366,358.53	—	51,914.22
Railways	1,166.438.77	1,192,887.27	26,448.50	—
Surveyor-General ...	62,709.41	59,377.34	—	3,332.07
Public works (recurrent)	306,940.96	255,428.11	—	51,512.85
ditto (extraordinary)	104,250.04	40,293.92	—	63,956.12
Loan Commission ...	15,296.62	14,659.47	—	637.15
Mare-aux-Vacoas Water Works.	51,691.95	37,711.85	—	13,980.10
Exchange	911,940.95	766,434.55	—	145,506.40
Total ...	8,626,798.28	8,131,465.06	57,516.93	552,850.15

The decreases are indicative of economy in the administration, necessitated by the decrease in the revenue, whilst the increase under the head of Poor Law Commission proves that, apart from the fixed charges, there are branches of expenditure which cannot be diminished in times of financial distress.

But the expenditure, even when reduced, seems large for so small a Colony. This is due to the fact that Mauritius possesses a highly centralised system of government, and many duties which in other countries fall on the Municipalities, or are left to private or charitable enterprise, are in Mauritius undertaken by the central Government. Thus the Railway vote, the vote for Water-Works, the Ecclesiastical vote, the vote for Education, and the vote for the Medical and Health Department and Poor Law Commission, as well as charitable allowances, absorb large sums which swell the expenditure. Then, too, such votes as Public Debt, Pensions, Military expenditure, Interest, and Exchange, are entirely beyond the control of the Government.

The revenue and expenditure for the preceding five years were :—

—	Revenue.	Expenditure.
	Rs.	Rs.
1893	8,103,922	7,872,096
1894	8,534,427	8,587,039
1895	8,273,612	8,488,736
1896	8,849,181	8,544,736
1897	7,996,705	8,626,798
Total	41,757,847	42,119,405
Average ...	8,351,569	8,423,881

It is evident from these figures that for the preceding five years the average expenditure exceeded the average income.

The averages compared with the year 1898 stand as follows :—

—	Revenue.	Expenditure.
	Rs.	Rs.
Average	8,351,569	8,423,8
1898...	7,620,318	8,131,465
Less than average	731,251	292,416

showing a marked decrease on the average revenue and expenditure.

The excess of expenditure over revenue was Rs. 511,146.

The deficit was met out of Treasury balances.

The changes in taxation were :—

1. An alteration in the mode of assessing Customs duties by which the duties and the revenue were increased. (Ordinance No. 5 of 1898.)

2. A surcharge of 10 per cent. on existing Customs duties. (Temporary) Ordinance No. 52 of 1898.

3. An increase in the Excise of Spirits. (Ordinance No. 33 of 1898.)

4. Increases in Stamp duties, Registration dues and Stamps on Customs certificates and on Contracts. (Ordinances Nos. 6 of 1898, 16 of 1898, 21, 24, 28 and 46 of 1898.)

5. Increased duties on salt and on petroleum oil. (Ordinance No. 51 of 1898.)

6. An increase in the rent levied on the lessees and proprietors of the Oil islands. (Ordinance No. 62 of 1898–99.)

7. A license duty on the manufacture of vinegar and an excise duty on vinegar manufactured in the Colony.

8. Licenses to be paid by Government contractors not already licensed under existing laws. (Government Notice No. 196.) Addition of certain licenses to schedule. (Government Notices Nos. 24, 81, and 152.) Addition of traction engines and trucks to schedule of direct taxes. (Ordinance No. 49 of 1898.)

In a Colony situated as Mauritius is, it is difficult to devise new sources of taxation that will not involve hardship.

Almost the sole industry of the Island is the sugar industry and many sugar estates have, partly through a scarcity of capital which prohibits the improvement in machinery so necessary to economical production, and partly through the low price of sugar, been brought perilously near to the margin of profitable production.

It would be imprudent, therefore, to increase the burdens on the sugar industry to any material extent.

On the other hand there are large numbers of persons who have barely sufficient income to sustain life.

The rate of wages is low and the habit of life is necessarily frugal, a frugality imposed by penury ; to tax the lower classes would therefore mean to increase still further the distress which prevails amongst many of them and to fill the hospitals, the infirmaries, and the gaols.

The increased taxation has, therefore, been so arranged as to fall on the general community, without pressing unduly on the sugar industry or the poorest class of the population.

Balances.

The year 1898 closed with an excess of expenditure over revenue of Rs. 511,146, which was met out of the Treasury balance, which was reduced thereby to Rs. 438,866.

At the close of the preceding year it amounted to Rs. 899,336 and at the close of 1896 it was Rs. 1,487,557, thus showing a steady exhaustion of the reserve fund.

Currency.

The notes in circulation, consisting of notes for five rupees, for ten rupees, and for fifty rupees, amounted to Rs. 3,404,250, represented as follows :—

	Rs.
Specie in hands of Commissioners	1,360,000
Investments and securities held by trustees in England	2,166,244
Total assets	3,526,244
Deduct notes in circulation	3,404,250
Leaves a balance in favour of Commissioners of ...	121,994

Public Debt.

The public debt of the Colony on the 31st December 1898 amounted to £1,195,690 16*s*. 0*d*., as follows :—

	£	£
Unconverted 4 per cent. debentures	164,200	
Less bonds redeemed	51,400	
		112,800
Converted inscribed stock, 4 per cent.		482,390
Poor Law Commission 5 per cent. debentures, issued in 1873	10,000	
Bonds redeemed	9,500	
		500
Hurricane loan (Imperial Guarantee 3 per cent.) ...		600,000
Total		£1,195,690

The public debt at the close of 1897 was	1,237,489
It was at the end of 1898	1,195,690
It has been reduced therefore by	£41,799

due chiefly to the repayment of Treasury bills and to bonds redeemed during the year 1898.

The foregoing statement gives an idea of the money assets and liabilities of the Colony. But this statement in no way corresponds with the form of statement that would be presented by a commercial company. A commercial statement would include amongst the assets, the railway and rolling stock, the public lands and forests, public buildings, &c., which, if they were included in assets would more than counterbalance the liabilities.

Curatelle.

The amount due to Vacant Estates at the close of the year was Rs. 425,198, of which investments represent Rs. 272,455, the balance represented by cash in bank being Rs. 152,743.

The public debt is secured on the general revenue of the Colony.

A financial crisis took place in the early part of 1898, which had to be met by exceptional measures. The crisis was caused partly by the short sugar crop of 1897–98—a short crop due to continued drought during the year—partly also by a steady fall in the price of sugar, and partly by the export of silver to India—an export necessitated by the obligations incurred by merchants, which could not, as in ordinary years, be met by the balance of trade.

The export of specie for the four years preceding 1897 had shown a balance of Rs. 1,500,000 over imports. The balance of imports and exports in 1897 to the middle of December showed a balance against the Colony of Rs. 1,940,000. From the middle of December 1897 to the beginning of February 1898 another sum of Rs, 500,000 was exported, showing a total net export of Rs. 3,940,000.

The Colony was in fact being rapidly drained of its rupee currency.

The banks had in 1898 raised their drawing rate to 5 per cent. premium, an unprecedented rate. Unfortunately, too, the banks, owing to the strain on their realisable resources, were unable to afford the necessary financial support to the sugar growers, and the industry was threatened with commercial disaster.

The measures taken were :—

(1) An Ordinance empowering the Governor to suspend the operation of Article 5 of Ordinance No. 28 of 1876 (the Currency

Act), which made it obligatory on the Commissioners of Currency to issue on demand silver rupees of India to the holders of Mauritius Currency Notes, and wherever the Governor in Council considered it urgently necessary to suspend the provisions of Articles 2 and 14 of the Currency Act, and by his warrant to authorize the issue of currency notes, payable on demand by the said Commissioners, to the total amount specified in the warrant, in exchange for securities to be transferred to the account of the Trustees of the Commissioners in England.

In virtue of this law a Proclamation was issued, No. 8 of 8th February 1898, temporarily suspending the Currency Act, and under the Governor's warrant Rs. 1,000,000 in currency notes were issued to the financial officers against securities transferred to the Trustees of the Commissioners of Currency, and were lent to the Mauritius Commercial Bank on the security of dock warrants on sugar in the Dock Companies' stores in Port Louis, and of the Treasury bills held by the bank.

The loan was made repayable on or before the 15th August 1898, with interest at 4 per cent., and the sum so advanced was refunded before the date fixed.

While suspending the Currency Act, the Governor issued a Government notice, stating that the Government would, as far as possible, endeavour to meet the requirements of small holders of currency notes by the issue of limited amounts of specie for purposes of change, and was prepared to deal with the banks to meet the requirements of the holders of larger amounts who might desire to make remittances in India by the issue of drafts on the Crown Agents or on Bombay in exchange for currency notes.

Instructions were given to the Commissioners, which were carried out so as to avoid inconvenience to the public while discouraging speculators.

The effect of these measures was such that whilst the drain of silver was checked the credit of the currency notes was not impaired.

For though theoretically the Colony possessed for a time an inconvertible paper currency, still the facilities for foreign payments were such that no depreciation took place.

The Commissioners of Currency received from the local banks in February and March Rs. 1,250,000 in notes in exchange for drafts on Bombay. These drafts were honoured by the National Bank of India, and to repay the bank the Crown Agents lent the Colony £83,500 at bank rates. On this transaction a sum of Rs. 6,250 was paid to the Government by the banks in the shape of premium. The banks also undertook to issue their drafts at an amount not exceeding 1¼ per cent. premium, and to discourage the wholesale export of rupees by speculators.

Further, the Currency Commissioners, under the Governor's warrant, issued to the financial officers a sum of Rs. 1,120,000 in notes, the financial officers being authorized to lend this sum to the Mauritius Commercial Bank on the guarantee of rupees in transit, the specie being shipped from Bombay to the order of the Receiver-General in March, May, and June 1898.

The Government received Rs. 5,928 as interest on this transaction.

(2) Ordinance No. 2 of 1898 was passed to facilitate the raising of money on loan by owners and others carrying on the cultivation of land in the Colony, to enable them to carry on such cultivation and to realise their crops.

The Commissioners of Currency lent the financial officers Rs. 1,250,000 in notes, which enabled the Government to make loans to the extent of about a million and a half of rupees to planters on the guarantee of first-rank mortgages on their estates, and on the produce thereof consigned to agents in Port Louis, approved by the Government. These loans, bearing interest at 8 per cent., were made in sterling at the Bombay rate of the rupee at the time of the advances, and were repayable at the same rate on or before the 30th April 1899.

All these loans have been fully repaid, and the profit realised was a little over Rs. 20,000.

The measures taken were exceptional, but they were successful. They illustrate the dangers of a small Colony dependent on a single industry and separated by long distances from a strong financial support. The drain of specie, which in England is controlled by the bank rate and the bank reserve, has no such control here. The financial support offered by the Bank of England as the bank of the banks is absent, and duties which in other countries would naturally devolve on the National Bank had to be undertaken by the Government.

The Proclamation suspending the Currency Act was repealed early in 1899 (Proclamation No. 10 of 5th March 1899).

Towards the close of 1898 rupees began to flow back into the Colony and specie is now abundant everywhere.

Municipalities and Boards.

The only elective Municipality in Mauritius is that of Port Louis.

The following is a statement of the revenue and expenditure of this Municipality for five years. The revenue is derived partly from a Government contribution in lieu of quay dues, amounting to Rs. 90,000 annually, the remainder being collected by the

MAURITIUS, 1898.

Municipality from rates, licenses, rents, water rates, dog tax, and other miscellaneous sources of revenue :—

—		Revenue.	Expenditure.
		Rs.	Rs.
1894...		439,418.79	486,352.12
1895...		425,327.09	451,573.11
1896...		459,301.13	457,090.35
1897...		457,180.12	513,628.56
1898...		455,157.96	478,187.79
Receipts on account, 1894-98 (New Oriental Bank Corporation in liquidation and arrears of accounts, viz., rent of markets, &c.).		13,631.46	—
Loans :—			
1894—Mauritius Government deficit.	Rs. 28,500		
1897— Do. do. (over-flood).	50,000		
1898—Debentures issued, Grand River Bridge.	26,000		
		104,500.00	—
1895—Government subsidy for upkeep of Fire Brigade.	5,000		
Subsidies from Insurance	2,709.69		
		7,709.69	—
Total		2,362,226.24	2,386,831.93

The following is a statement of the debts of the Municipality of Port Louis, showing the terms of repayment:—

—	Original Debt.	Amount Repaid.	Balance due on December 31, 1898.	Terms of Repayment.
	£	£	£	
Conversion Loan	140,000	8,700	131,300	In 49½ years by annual drawings conformably to Ordinance No. 33 of 1881 and 16 of 1884–85.
	Rs.	Rs.	Rs.	
Colonial Loan	156,000	70,200.00	85,800.00	By annual drawings of 78 debentures (Ordinance 42 of 1888).
Government Hurricane Loan ...	150,000	23,890.67	126,109.33	By annuity in 25 years (Ordinance 24 of 1892 and 26 of 1893).
Government Special Loan... ...	28,500	28,500.00	—	In 4 equal instalments (Ordinance 19 of 1894).
Government Overflood Loan ...	50,000	8,333.32	41,666.68	In 12 yearly instalments (Ordinance 31 of 1896).
Grand River Bridge Loan... ...	26,000	—	26,000.00	By annual drawings of 20 debentures from 1899 (Ordinance 31 of 1897).
Total	410,500	130,923.99	279,576.01	

There are three Boards of Commissioners for the government of the townships under their control, namely :—

The Board of Curepipe ;
The Board of Beau Bassin and Rose Hill ;
The Board of Quatre Bornes.

All these Boards are nominated by the Governor.

Their revenue is collected partly by the Commissioners, as in the case of local rates on houses, &c., and partly by Government, as regards licenses and taxes, under Ordinances Nos. 6, of 1878, and 24, of 1895.

The following is the table of receipts and expenditure of the three Boards :—

Curepipe.

Year.	Receipts.	Expenditure.
	Rs.	Rs.
1894	51,461	49,282
1895	51,493	48,884
1896	52,600	49,601
1897	59,024	55,531
1898	59,863	57,550

Beau Bassin and Rose Hill.

1896	26,540	22,410
1897	26,618	24,584
1898	24,743	20,439

Quatre Bornes.

1896	3,638	2,647
1897	9,223	9,748
1898	9,655	9,306

The Board of Rose Hill and Beau Bassin owes Rs. 18,000 to the Government. This amount is refunded by annual instalments of Rs. 2,000. The other Boards have not contracted any debts.

Grants or moneys collected for and paid to the Municipalities appear as part of the general revenue of the Colony.

Fines and law charges received and paid to the Municipality of Port Louis appear as matter of account.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following statements show the total value of the imports and exports of Mauritius during the past five years. They also show in comparative form the value of the principal imports during the years 1894, 1896, 1897, and 1898, as well as the chief articles of export during the years 1897 and 1898 :—

Imports.

—	1894.	1895.	1896.	1897.	1898.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imports	21,096,011	20,125,402	19,964,436	17,944,886	16,701,778
Exchange and Charges	10,917,054	9,718,918	9,692,947	8,107,774	6,854,994
Specie and Bullion	839,248	662,250	2,537,026	1,003,348	4,769,235
Total	32,852,313	30,506,570	32,194,409	27,056,008	28,326,007

Exports.

—	1894.	1895.	1896.	1897.	1898.
Produce and Manufacture of the Colony ...	29,497,248	24,751,037	29,061,141	23,423,412	26,013,061
Shipping Charges	1,731,071	1,732,987	2,055,839	2,461,332	2,940,568
British, Foreign, and other Colonial Produce and Manufacture.	1,731,371	2,496,598	2,408,874	1,823,394	1,314,167
Specie and Bullion	430,982	2,548,679	423,760	2,945,869	1,598,640
Total	33,390,672	31,529,301	33,949,614	30,654,007	31,866,436

The increase is chiefly under the following heads :—

1. Fibre-aloe	Due principally to increased demand from England, France, and Germany.
2. Hardware	Increased demand from Reunion.
3. Millwork	Sent to Reunion.
4. Oil-cocoanut ...	Sent to England especially.
5. Molasses and sugar..	Due principally to the excellent crop (the heaviest on record) and to the American anti-bounty tariff, which created a demand for a low quality of granulated sugar for refining purposes.
6. Rum	Increased demand from England.
7. Tea...	Madagascar was the principal market to which our tea was sent. (Rs. 10,586.)

The rate of imports and exports per head of population was as follows :—

—	1897.	1898.
	Rs.	Rs.
Imports	71.61	74.76
Exports	81.12	84.10

Imports.

Excluding specie and bullion, exchange, and other charges, the statement shows that there has been a gradual but decided decrease since 1894. The difference between that year and 1898 being nearly 21 per cent., as compared with 1897 the decrease is nearly 7 per cent.

Including specie and bullion, exchange, and other charges, the year 1898 is 13·80 per cent. under 1894, but is nearly 4½ per cent. over 1897.

Exports.

The total value of exports, including shipping charges on local produce and specie and bullion, was Rs. 31,866,436 in 1898, as against Rs. 33,390,672 in 1894 and Rs. 30,634,007 in 1897, being a reduction of 4½ per cent. and an increase cf nearly 4 per cent. respectively.

The returns show generally a large reduction in value of imports in 1898 as compared with 1894 and 1896, although with few exceptions the United Kingdom has retained her hold on our trade.

Apothecary wares from France show a large increase as compared with 1894, while the United Kingdom shows a reduction. There is, however, an increase when compared with 1896.

Beef, salted.—The United States of America are becoming the chief supplier, and thus superseding the United Kingdom and Australia.

Brassware.—The United Kingdom shows a large increase, while France has decreased.

Butter—Denmark and the United States now provide our market with this article. The imports from the United Kingdom, France, and Italy being diminished in consequence.

Cheese.—Holland and New Zealand show large increases.

Clocks and watches.—The United Kingdom shows a decrease; France and the United States an increase.

Coffee.—Indian and Ceylon markets have been supplanted by Java, Arabia, and Pondicherry. Even the United Kingdom sends coffee in increasing amounts.

Barley.—The United States supplied a large quantity in 1898, interfering with the supply from India.

Oats.—The United States and Australia increased their supplies.

Fish, pickled.—The United States seem to be suppressing supplies from the United Kingdom.

Haberdashery.—Germany in this line has made large strides, while the United Kingdom, France, and India fell off.

Hosiery.—Germany is gaining largely in this line, to the gradual exclusion of the United Kingdom, France, and India.

Hardware shows an increase from the United Kingdom and decreases from France and India.

Lard.—France and the United States show an increase, the United Kingdom a falling off.

Matches.—Japan and Sweden have nearly driven English matches from the Mauritius market. From enquiries made amongst merchants, there seems to be no reason why the ground lost should not be recovered. The English wax match is probably the best in the world, but an idea has become prevalent that they are not damp proof, that the heads stick together, and that they are not suited to the Mauritius climate

This is probably an unfounded belief, for the wax matches imported by the King's Royal Rifles and used by them at Curepipe, the dampest place in the Island, answered perfectly. In regard, however, to wooden safety matches, there is a reason which might be noticed by British manufacturers. The ordinary safety match is large, and made up in boxes unsuited to the smoker's pocket. The Japanese and Swedish matches are in more convenient sizes. The duty is R. 1.10 levied per gross on boxes containing each not more than 100 matches, and a proportional duty on boxes containing more than 100 matches. If, then, the British match makers were to make small matches put up in boxes containing not more than 100 matches, they might recover the place which the superiority of their matches entitles them to.

Provisions.—American goods are on the increase.

Shooks.—America is supplanting India.

Woollen, mixed with cotton and silk.—Increase in German importations, decrease, United Kingdom and France.

Vacoa bags, aloe fibre, and soap have increased.

Hides and Rum have diminished.

Sugar has attained a record in 1898. There has been a record export in quantity, but a decline in value.

Tea is now beginning to show as export.

Vanilla has declined in quantity while increasing in value.

The following return of the trade with Madagascar for the last five years shows clearly the effect of the duties now levied in that island :—

TRADE WITH MADAGASCAR FOR THE FIVE YEARS 1894–98.

Inclusive of Charges and Exchange.

IMPORTS.

1894.	1895.	1896.	1897.	1898.
Rs.	Rs.	Rs.	Rs.	Rs
502,028	383,003	460,666	464,518	481,801

Produce and Manufacture of the Colony.

EXPORTS

1894.	1895.	1896.	1897.	1898
Rs.	Rs.	Rs.	Rs.	Rs
432,422	401,882	332,967	176,778	110,226

[NOTE.—The above figures show that whilst the imports from Madagascar have been increasing yearly, the exports thereto have decreased to one-fourth the value of exports in former years. The decrease is due to the imposition at the end of 1896 of a duty of Fcs. 120 per hectolitre on foreign spirits imported into Madagascar.]

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius, and though there are workshops, there are none that could be dignified with the title of manufactories. Nevertheless, vinegar and rum are made and exported, and soap, which is made from cocoanut oil, is beginning to show on the list of exports.

There are also workshops for the repair of machinery, and small coasting vessels are frequently built in Mauritius.

The fisheries are protected by special Ordinances and by the creation of Crown reserves which are strictly preserved, as well as by the establishment of private barachois, by the creation of a close season, and by the prohibition of the capture of an illegal size of fish, and the prohibition of illegal nets.

Salted fish is becoming an article of export, and the industry shows signs of expansion.

The following are the laws in force in the Colony for the protection of the reserves :—

Ordinances 42 of 1881, 11 of 1883, and 16 of 1892.

These laws regulate the size of fish to be caught, the time during which they may be caught, and the size of the nets to be used in the capture of fish.

Certain parts of the coast of Mauritius are set apart which are called reserves, and in which no fishing can take place,

MAURITIUS, 1898.

except by rod and line, or by basket net. These reserves are watched by the Internal Revenue Guards, who have boats to patrol the spots selected.

There is a Fishing Committee appointed by the Governor, whose duty it is to advise the Government on all questions which may be referred to it.

The following are the fish reserves :—

1. Black River Bay.
2. Tamarind Bay.
3. Petite Riviere Bay.
4. Grand River N. W. Bay.
5. Tombeau Bay.
6. Arsenal Bay.
7. La Mare La Raie.
8. The inner part of Flacq Bay.
9. Trou d'eau douce.
10. Grand River, S. E. Bay.
11. Mahebourg Harbour.
12. Le Chaland Bay.
13. Grand Gaube Bay.
14. Poudre d'Or Bay.
15. Souillac Bay.

The protection of the reserves is left to the Inland Revenue Branch of the Receiver-General's Department, consisting of one superintendent, five inspectors, and twenty-five guards.

The police have also concurrent jurisdiction in detecting contraventions under the Fishery Laws.

The following gives the close season for crabs, camarons, rougets, sardines, and sprats, all dates inclusive :—

Crabs, female	16th September to 14th April next following.
Camarons, female ...	1st October to 1st March following.
Rougets	10th November to 10th December.
Sardines and sprats ...	1st August to 31st January following.

The sizes of the different kinds of fish, 32 in number, that may be taken range from above 8 centimetres to above 28 centimetres, the prohibition varying with different species.

Oysters, mussels, and crabs called "petite espèce" must measure 5 centimetres, homards 23 centimetres, shrimps 8 centimetres. The size of nets is regulated by Ordinance No. 16 of 1892; they consist of:—

1. Large net.
2. Sprat net.
3. Mosquito net.
4. "Canard" net.
5. Shrimp net.
6. Basket net.

Any other device or instrument differing from the above and made use of for fishing is illegal.

Private Barachois.

There are ten private barachois or enclosures communicating with the sea, duly registered under Ordinance No. 42 of 1881.

The private barachois are practically walled ponds or "fish paddocks," which, by permission, may be replenished from Government reserves.

AGRICULTURAL INDUSTRIES AND BOTANICAL STATIONS.

There are two botanical gardens properly so called in Mauritius, one being a branch of the other, but, in addition, the extensive grounds of the Government House at Reduit are used as an experimental plantation, and there is a Station Agronomique which devotes itself to the experimental growth and study of sugar canes and other productive plants, as well as to their chemical analysis. The botanical gardens at Pamplemousses, which are amongst the most famous, as they are also amongst the most beautiful, in the world, are used partly as a public garden, but also as a nursery and acclimatisation garden. Plants and seeds are supplied to the public, and most of the economic plants, fruit trees, &c., grown in the Colony were originally cultivated in one or other of the botanical gardens.

The varieties of canes known in Mauritius came chiefly from Pamplemousses Gardens. But the Gardens also devote attention to cultivating varieties of aloe fibre, hemp, spices, and indiarubber. They also act as nurseries for reafforestation purposes.

The climate of Mauritius varies at different altitudes and in different districts. The force of the wind varies also with the locality, and there is great variety in the rainfall; all these factors point to the necessity of constant experiment to ascertain the varieties of economic plants best suited to the different districts, and the subject is carefully considered by the officers of the Department.

The aloe fibre industry, which was declining for some years, shows signs of reviving, but the main industry of the Colony is, and must continue to be, the sugar industry. Experiments as to the most profitable variety of cane are thus most likely to give advantageous results, and new varieties have been imported from the West Indies and elsewhere. Tea, which is a young and growing industry, is capable of improvement. It is the subject of study both at the Gardens and at the Station Agronomique.

LAND GRANTS.

Lands are granted by the Government by lease and by sale. Lands which are situated on the sea coast beyond the limits of Port Louis, known as *Pas Géométriques*, can only be leased by public auction, except those forming part of villages which have been proclaimed such. The sales are invariably made by public auction, the purchase price being paid, if so desired, by the purchasers in four instalments, the first on the day of the sale, and the others at intervals of eight months. There is an exception to this rule in cases where lands are desired for charitable, religious, or educational purposes. The rent derived from Crown lands in 1898 was Rs. 43,047 for 5,678 arpents. The sales realised Rs. 1,924 for 12.98 arpents. The average rental value of Crown land is, therefore, Rs. 7.58 per arpent, and the average value of lands sold Rs. 148.23 per arpent.

SHIPPING.

The following returns show:—A.—The shipping inwards and outwards for the last five years. B. and C.—The number and tonnage of vessels entered and cleared in the years 1897 and 1898, distinguishing nationalities.

There has been an increase of shipping and tonnage under the British flag, while vessels under foreign flags have on the whole diminished.

It is not easy to give a satisfactory explanation of the increase, but the tendency of trade is towards the British possessions and to follow the lines on which British companies have already established a regular service of steamers.

It is to be regretted that the absence of proper facilities in the harbour of Port Louis causes undue delay to the large steamers now frequenting the port; but it is hoped that a scheme of harbour improvement may be devised shortly which will give more rapid despatch to shipping and permit a considerable reduction in the port charges.

MAURITIUS,
1898.

III.—LEGISLATION.

The legislation for the year 1898 may be divided under four heads :—

1. Financial.
2. Consolidation and Codification.
3. Sanitary and Quarantine.
4. Miscellaneous.

The chief financial measures have already been described in previous sections of this Report.

The codifications of the laws by a series of consolidated Ordinances was begun during the session.

The first measure was the Interpretation and Common Form Ordinance No. 8. By this measure a number of principles, common to all legislation, were settled on the lines indicated by the Imperial Interpretation Act of 1889. Article 15 of this Ordinance defines the effect of disallowance of a local Ordinance by the Queen. Article 24 settles the language by which cumulative or alternative punishments are imposed, and Article 26 permits the use of French equivalents to English expressions, in certain cases allowing those expressions to be interpreted by French law.

A consolidated Ordinance was passed dealing with the Savings Bank, No. 45, and three Ordinances, 40, 41, and 42, dealt with the Penal Code. Great progress was made in the amendment of the law of 1838. Attempts to commit certain misdemeanours, larceny being the most important, are made punishable. The general tendency of the amendments is, however, to make the law more merciful.

The charges to which the Colony was exposed from the spread of plague caused the passing of two Ordinances, one, No. 44, to amend the Quarantine Laws by allowing the Governor to proclaim certain ports or districts as infected, and another, No. 47, to provide for the notification of infectious and contagious diseases to the Sanitary Authorities, and for the prevention and mitigation of such diseases. This latter Ordinance was based almost entirely on the English Public Health Statutes.

The miscellaneous Ordinances dealt with the constitution of the Benches of Magistrates, an amendment of the Petroleum Ordinance, and an Ordinance to transfer to the Supreme Court the jurisdiction in insolvency, bankruptcy, and winding up of companies.

There were also other miscellaneous Ordinances of purely local interest.

IV.—EDUCATION.

PRIMARY EDUCATION.

Public primary education is imparted to two classes of schools, the Government Schools and the State-aided Schools. In 1898 the number of pupils on the roll was :—

Government Schools	9,826
Roman Catholic Aided Schools... ...	6,674
Church of England Aided Schools ...	2,017
Presbyterian Mission	203
Mahommedan	153
	18,873

The Government Schools are entirely supported by Government. The State-aided Schools are under the control of private persons styled managers, and receive a liberal grant from the Government.

The Government Schools are divided into non-result and result schools. All the State-aided schools are result schools.

There are no industrial, technical, or agricultural schools. The only training of this kind consists in the instruction given to five boys who are sent yearly to the Government railway workshops and to two others who are sent yearly to the Botanical Gardens. The workshop boys are apprenticed for five years and the Botanical Garden boys for four years. Four girls are sent yearly to learn millinery and dressmaking for three years.

Education is not compulsory, and is gratuitous. Less than a fourth of the estimated number of children of school age attend school.

The total expenditure for 1898 was Rs. 302,319.42.

There can be no doubt that the weak point in the system is the absence of sufficient and suitable technical and industrial education.

SECONDARY EDUCATION.

Secondary education is under the control of the Council of Education, and more immediately of its College Committee.

Provision is made for the education of boys by means of :—

1. The Royal College.
2. The Royal College Schools.
3. The Associated Schools, *i.e.* aided schools affiliated to the Royal College.

In 1898 the number of pupils attending the Royal College and its two schools was 428.

The Associated Schools are not subject to inspection, but they are expected to submit all their pupils annually for examination.

In 1898 there were 24 Associated Schools in the Island. The total number of pupils presented for examination was 449.

The Royal College has a classical and a modern side. Two leaving scholarships of £200 a year, tenable in Europe for four years, are awarded annually, one on the classical side, the other on the modern side.

Eleven scholarships and exhibitions open to all youths of the Colony are annually offered for competition. Sixteen more are limited to pupils of the Primary Schools, three to pupils of Associated Schools, and three to pupils of the Royal College.

Grants of free tuition are frequently made to poor scholars, and there are twenty-six eleemosynary scholarships and exhibitions in the Governor's gift.

In 1898, out of 428 boys, 142 were non-paying pupils. The fees are Rs. 12 per month in the Royal College and Rs. 5 in the Royal College schools.

The cost of the Royal College and its two schools was Rs. 184,516.

For the encouragement of the higher instruction of girls a scheme of annual examination was started in 1884. There are four standards for girls under 11, 12, 15, and 17 respectively. Medals, books, and money prizes are awarded to the successful candidates, and result grants rising from Rs. 25 to Rs. 100 are paid to the managers of schools. A sum of Rs. 7,000 is voted annually for this purpose. An Education Ordinance is now (1899) under consideration to remedy some defects in the system, but looking at the educational system generally, it is hardly to be doubted that there are few countries in the world that offer to the children of the poor a higher class of scholastic instruction on more liberal terms. There is no reason why the clever son of a day labourer should not receive a first-class public school education, and eventually proceed to an English University without costing his father a single rupee.

But the system, like the system of primary education, is weak on the strictly technical and industrial side. The clever boy may become a lawyer, a doctor, or an engineer, but his less talented comrades, who are left behind, find the market for clerks overstocked.

V.—GOVERNMENT INSTITUTIONS.

HOSPITALS.

There were nine public hospitals in Mauritius in 1898, including the Lunatic Asylum. The following is a return of patients treated:—

—	1897.	1898.
Indoor patients	18,207	20,464
Outdoor "	59,751	54,521
Total	77,958	74,985

There were also 21 dispensaries.

The most important of the hospitals is the Civil Hospital of Port Louis. In the year 1898 there were 4,467 males and 1,221 females admitted into the Civil Hospital, and the daily average was 148 males and 57 females. Of these, 4,225 males and 1,143 females were cured. 256 males and 100 females died in 1898.

There were 1,394 cases of malarial fever and 276 of malarial cachexia. There were 311 cases of phthisis, 187 of dysentery, and 183 of pneumonia. There were also 507 cases of bronchitis. There were also 143 cases of syphilis and 45 of Bright's disease. The other diseases do not need to be mentioned particularly.

In the Lunatic Asylum there were 296 males and 174 females, making a total of 470 inmates under treatment in 1898. Of these, 7 were cured and 21 died during the year. The patients are employed in gardening, in masonry work, and at various trades, such as blacksmith, carpenter, making mattresses, straw hats, &c.

ASYLUMS AND POOR HOUSES.

There is one general asylum, called the Barkly Asylum, which contains:—

(*a*) A hospital for the treatment of the sick poor.

(*b*) An asylum for the reception and maintenance of old and infirm paupers.

(*c*) An asylum for the reception of harmless pauper lunatics transferred to the lunatic asylum.

(*d*) An orphanage.

During the year 1898, the Barkly Asylum received 3,949 pauper patients for treatment. 418 old and infirm people were admitted into the asylum proper, and 123 harmless lunatics were admitted into the lunatic branch. 166 orphan children were admitted into the orphanage. Light work is required from the pauper inmates of the Barkly Asylum.

In addition to the Barkly Asylum, there are six poor houses throughout the Colony. 702 paupers were admitted into these six poor houses in the year 1898.

There is also a Leper Asylum, St. Lazare, into which 219 pauper lepers were admitted in 1898.

Eighty-four orphan children have been admitted into private institutions at the expense of the Poor Law Commission.

Rice, money, medical assistance, medicine, and medical comforts are also given to the poor. Charitable grants are also made by the Governor from a special fund voted for the purpose. 4,350 persons were relieved during the year 1898.

The following is a table showing the persons who received indoor and outdoor relief in 1898 :—

1. Sick in Civil Hospital, Port Louis ...	3,848
2. „ Canal Street Convent Hospital ...	297
3. „ District Hospitals	11,100
4. Infirm, Barkly Asylum	418
5. „ the Convents	702
6. Lepers, St. Lazare Asylum	219
7. Insane patients, Lunatic Asylum ...	438
8. „ „ Barkly Asylum ...	123
9. Orphans, Barkly Asylum	166
10. „ private institutions	84
11. Alimentary and pecuniary aid	2,314
12. Sick at dispensaries (medical)	64,852
Total	84,561

The Poor Law Commissioner reports that poverty is gradually increasing in the Colony, and more especially in Port Louis.

REFORMATORY.

The following return shows the working of the Reformatory for the year 1898. The total cost of maintaining and guarding the boys in 1898 was Rs. 13,583, against Rs. 19,082 in 1897. The average cost per boy was Rs. 181, as against Rs. 236 in 1897. The earnings in 1898 amounted to Rs. 4,432, as against Rs. 4,599 in 1897.

COMPARISON of ADMISSIONS, CHARGES, &c., for the YEARS 1898 and 1897.

Year.	Admissions.	Discharges.	Daily average number of admissions.	Daily average nnmber of boys unlocked.	Escapes and Recaptures.		Admissions to hospitals.	Daily average admitted to hospital.	Daily average of sick in hospital.	Number of deaths.	Cost of guarding and maintaining of boys.	Total cost per head on average number of boys.	Earnings.	Earnings per head.
					Escapes.	Re-captures.								
1898	420	405	1·15	102·67	4	3	61	·16	5·33	Nil	Rs. 18,583.08	Rs. 181	Rs. 4,483.99	Rs. 43.67
1897	416	393	1·14	80·97	5	5	159	·44	5·97	Nil	19,082.79	236.20	4,599.35	56.93
	+ 4	+12	+·01	+21·70	—1	—2	—98	—·28	—·64	Nil	—499.71	—55.20	—115.36	—13.26

+ Increase. — Decrease.

The working of the Reformatory is admittedly defective. It is in fact a boys' prison rather than a reformatory. Trades are taught, and the boys are visited and instructed by the clergymen of the denominations to which they belong. Scholastic instruction is given, and the report of the Inspector of Schools states that progress has been very satisfactory as a whole; but the boys are not reformed. Fifty-seven ex-reformatory boys passed through the prison in the year 1898.

The period of detention, which in the case of 316 boys varied from two days to three months, is too short to make any impression on the character of the boys. Moreover, a more complete subdivision and classification of the boys, which will prevent the corruption of the more hopeful cases by the incorrigible and wholly bad boys, is desirable. This is a matter which will doubtless be considered when the state of the finances permit.

GOVERNMENT SAVINGS BANK.

The savings deposited at the bank at 3½ per cent. interest amounted to Rs. 2,701,292 on the 31st December 1898, compared with Rs. 2,834,978 on 31st December 1897. Although the total sum of deposits was Rs. 130,000 less than that of the previous year there were 223 more depositors in 1898, making 24,226 in all, of which 10,373 were of the Indian population with a sum of Rs. 1,253,795 standing to their credit, against 10,381 in 1897 with a balance of Rs. 1,333,119 to their credit. The remaining depositors belong to the general population. The financial position of the bank at the close of the year was as follows :—

Investments	Rs. 2,888,333.87
Cash in hand	26,497.48
Receiver-General	113,500.75
	3,028,332.10
Liabilities due to depositors ...	2,701,292.03
Balance in favour of bank ...	327,040.07

VI.—JUDICIAL STATISTICS.

POLICE, PRISON, AND CRIMINAL.

The following table shows the number of offences reported to the police or to the magistrates in 1898 :—

Total No. of Offences.	Offences against the Person.	Prædial Larceny.	Offences against Property other than Prædial Larceny.	Other Offences.
33,803	6,152	509	5,582	21,560
Number of above proceeded with.				
24,687	983	491	2,879	20,334

Prædial larceny in the above table means robbing provision grounds or homesteads or cane fields.

Of the above, 3,367 were discharged for want of prosecution by complainant or for want of evidence, 1,998 cases were dismissed on the merits, and 21,851 were summarily convicted. 89 were committed for trial at the assizes.

The returns show a marked falling off in prosecutions for offences against the person. Many of the cases reported were of so harmless a nature as not to warrant prosecution at public expense.

There is an increase in the number of prosecutions for prædial larceny, due to increased vigilance on the part of sugar estates guardians, who succeeded in many cases in arresting the offenders in the act of stealing sugar canes.

The general tendency of the figures in the Blue Book is to show that, whilst the number of offences known to the police has not greatly varied during the last four years, the number of convictions during the last two years has considerably increased.

At the same time it cannot be said that the number of convictions for offences against property, other than prædial larceny, have yet reached a satisfactory proportion. This is partly due

MAURITIUS, 1898.

to the great facilities for theft which the mode of life in the Island affords. Houses and grounds are open, and there are great facilities for the disposal of stolen goods. Property was stolen to the value of Rs. 21,011; of this amount the police recovered Rs. 10,542. 230 fires formed the subject of investigation by the police. There were 18 persons charged and 13 convictions for arson.

To deal with the above offences the strength of the police was 742, composed as follows :—

42	Europeans.
520	Natives of Mauritius.
166	Indians.
1	Arab.
2	Americans.
2	Australians.
2	Natives of Cape Colony.
2	Natives of Madagascar.
1	Native of Trinidad.
4	Natives of Reunion Island ;

a very composite force.

245 sub-officers and constables of police were in possession of the silver and bronze good conduct medals.

PRISONS.

There were 10,531 persons committed to prison in 1898; of these, 1,490 had one previous conviction, 675 had two, and 1,322 had three or more previous convictions.

The daily average was 1,168, and the daily average on sick list was 78. There were 56 deaths in prison during 1898.

The gross cost of housing, maintaining, and guarding the prisoners was Rs. 165,870. There were 26 escapes and 25 recaptures.

In Port Louis the prisoners are employed as printers, carpenters, tailors, shoemakers, basket and rattan makers, mat and mattress makers, also at stone breaking; at Beau Bassin at gardening and building work and at stone breaking.

The prevailing diseases in the prisons were pneumonia, malarial fever, dysentery, and diarrhœa.

VII.—VITAL STATISTICS.

MAURITIUS, 1898.

On the 31st December 1898 the resident population of Mauritius consisted of 378,872 men, women, and children of different races and nationalities. The troops stationed in the Island are excluded, so are the crews of all non-Colonial ships temporarily in the harbour of Port Louis.

The last census, which was taken on the 6th of April 1891, indicated a population of 370,588 persons, excluding the military and shipping, so that the population of the Colony has increased by 8,284 during the last eight years—that is to say, by an average of a little over 1,000 yearly.

This excess is mainly due to an excess of births over deaths. The general population, including Chinese, numbered 117,650 at the end of 1898. The Indian population numbered 261,222, the Indo-Mauritians numbered 189,416, the immigrants 65,147, and the other Indians 6,659. Other Indians are Indians who have settled in the Colony after their term of service has expired.

There were 13,704 births in 1898, or 47 more than in the previous year. The birth-rate in the total population was 36·3 per 1,000. In the general population it was 33·0, and in the Indian section 37·7 per 1,000. The proportion of illegitimate births was 64·4 per cent. of the whole, being 36·3 in the general population, and 74·9 per cent. in the Indian population. Twenty-one per cent. of the illegitimate births in the general population were not acknowledged by the fathers. In the Indian section only 4 per cent. were not so acknowledged.

There were 12,064 deaths in 1898, or an increase of 998 deaths on the previous year; a death-rate of 31·9 per thousand against 29·5 in 1897. The death-rate was lower in the Indian (31·7) than in the general population (32·4).

This, when compared with births, shows a steady proportional increase of the Indian population as compared with the general population.

The death-rate of Port Louis is always the highest, and far above that of the whole Island.

Sixty-eight per cent. of the total number of deaths in 1898 were due to zymotic diseases.

The mortality of 1898 was relatively low, though higher than that of 1897. In 1896 the death-rate was 41·9, the highest but one since the epidemic of fever of 1867.

The favourable climatic conditions which obtained in 1897 were absent in 1898, which was a comparatively rainy year—hence both the good crop and the high death-rate.

The rainfall in inches was 47·76 as against 27·26 in 1897, but was slightly below the general average for twenty-four years, nevertheless, when the humidity (81·6 in the month of February, a month in which the rain was below the average) is reckoned the effects of rain and damp are apparent, for in the month of March the largest number of cases of fever were under treatment.

There was a cyclonic disturbance in the month of February. There was also a cyclone from the 17th to the 21st December. Neither of these cyclones were violent.

Annexed is a diagram showing the number of cases of fever in each month, and of intermittent fever in particular.

There were 736 cases of influenza.

The first suspected case of plague, though not diagnosed as such at the time, occurred on the 26th December 1898.

In the opinion of the medical officers phthisis is on the increase.

The sanitary conditions of Port Louis have not materially improved. Overcrowding was as bad as, or worse than, ever, and the increase of poverty in the town has naturally contributed to bad sanitary conditions.

The following table shows the mean temperature at the Botanical Gardens, Pamplemousses :—

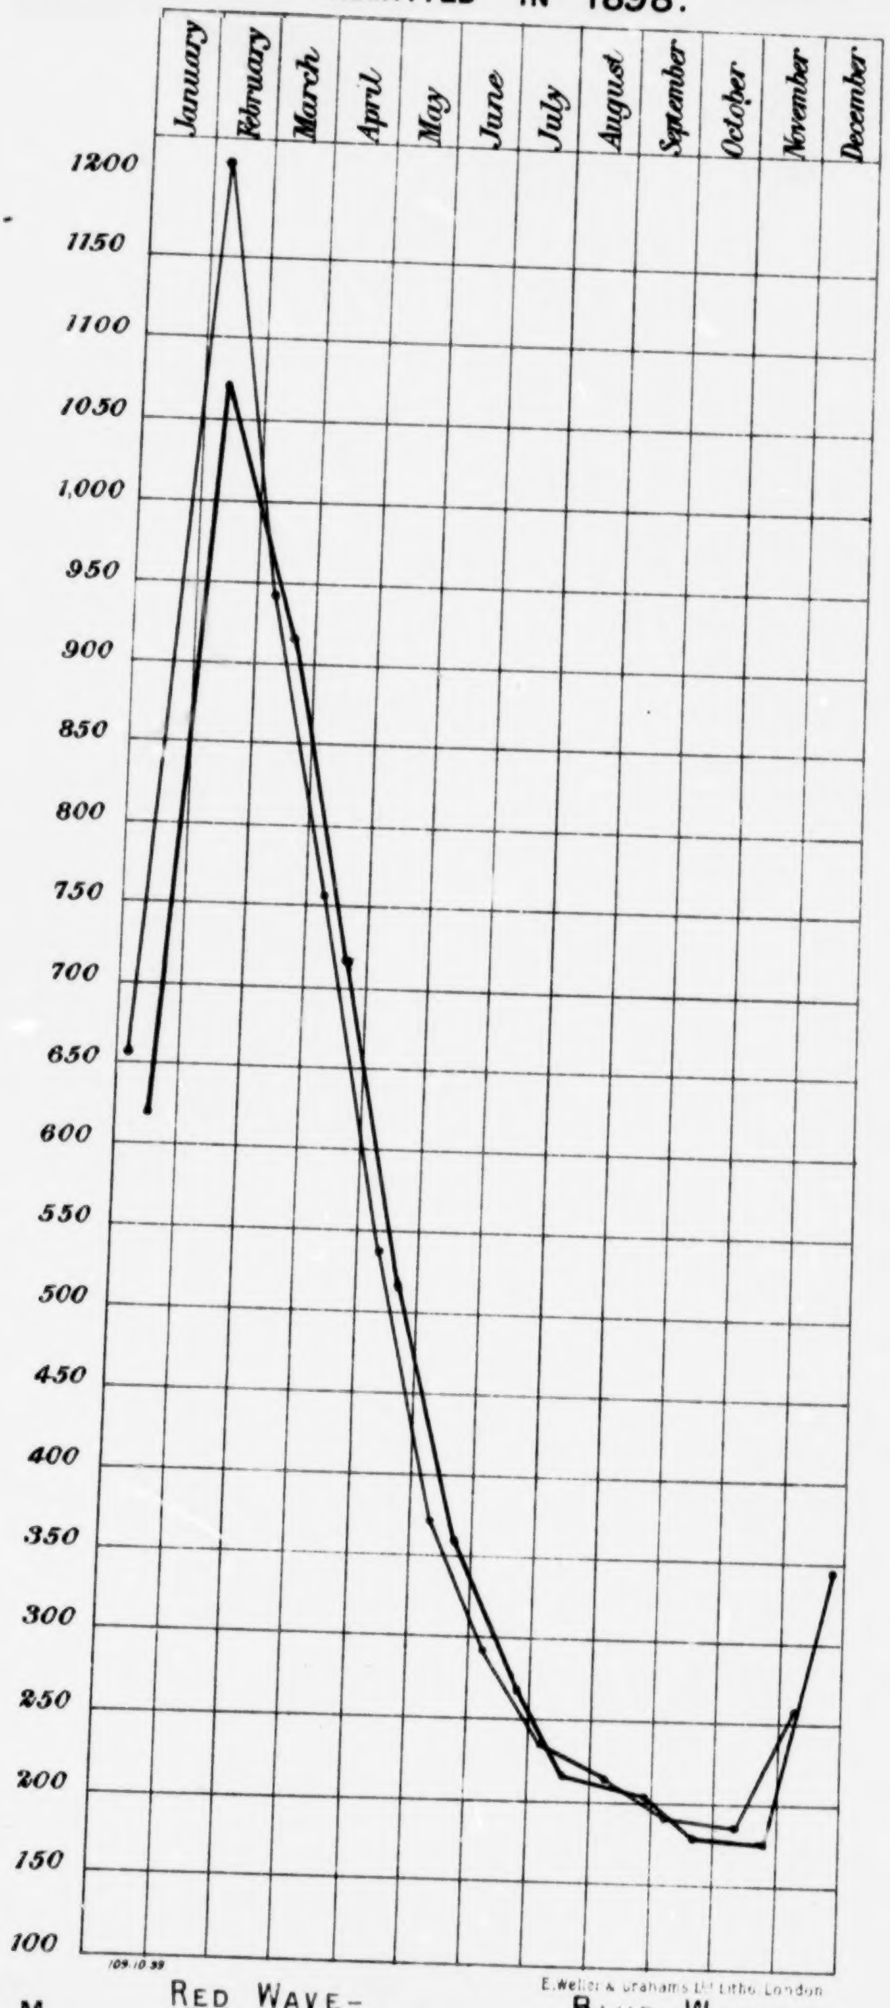
——	1898.	——	
Mean temperature	74·7	Average	74·0
" maximum temperature ...	82·9	"	81·6
" minimum " ...	66·5	"	66·5

It will be observed, therefore, that, on the whole, 1898 was a hot year.

The greatest rainfall in 24 hours was 3·76.

The mean direction of the wind was E. b. S. ½ S., and the mean velocity 11·0 miles an hour.

DIAGRAM SHEWING NUMBER OF CASES MALARIAL FEVER ADMITTED IN 1898.



109.10.99
E. Weller & Grahams Ltd Litho. London

VIII.—POSTAL AND TELEGRAPH SERVICES.

RAILWAY.

The revenue of the Post Office was Rs. 125,951, including Rs. 17,476 for telegrams.

In 1898 the Post Office dealt with 1,296,408 letters, 51,444 post cards, 1,432,114 newspapers, 9,246 parcels, and 62,552 telegrams.

Twenty-nine and a half miles of additional telegraph wire were erected in 1898.

The telephones are the property of a private company. There are also 17 fire alarms, which are rented from the Telephone Company.

The Railway Department showed a marked improvement in goods traffic. The figures are 248,371 tons for 1897 and 302,639 tons for 1898—an increase due to a good sugar crop.

There was, however, a decrease in passenger traffic of Rs. 61,118, due to the financial distress that prevailed.

IX.—MILITARY EXPENDITURE.

The Imperial military garrison of Mauritius numbered 2,096 of all ranks.

The Colonial contribution to the military expenditure was Rs. 366,358.

X.—GENERAL OBSERVATIONS.

It will be evident from what has already been written, that a steady but absolutely sure change is taking place in the population of Mauritius, a change which is likely to have important social, political, and economic consequences.

Thirty years ago Port Louis was to all intents and purposes a European town. Now the greater part of Port Louis has passed into Asiatic hands, either Indian or Chinese.

Nor does the change stop at the town. A process of "morcellement" is being carried out on sugar estates, and many

MAURITIUS, 1898.

of the old French sugar planters are parting with their lands, which are passing into the hands of Indians. In 1898 land to the value of Rs. 2,087,837 was purchased by Indians.

The economic effect of this change has yet to be ascertained. It may be inferred that a peasant proprietor is, as a rule, less able to bear the vicissitudes incidental to agriculture than a capitalist proprietor employing labourers at fixed wages.

When disaster comes it is probably more widespread with a peasant than with a capitalist proprietor, and disaster is always possible in a country so frequently visited by hurricanes. Moreover, the financial support of a peasant proprietor rests, as a rule, with the small and not over scrupulous money-lender rather than with respectable banks.

But whatever the economical problem may be the political and social consequences are apparent. The old French creole population, which has in its isolation preserved the manners and grace of the *ancien régime*, is being slowly but surely pushed to the wall. This is a deplorable fact and it is to be hoped that, by improved educational and technical training, something may yet be done to save a race which has counted for so much in the history and literature of Mauritius.

GRAHAM BOWER,

Colonial Secretary.

10th August 1899.

REPORT ON THE RODRIGUES BLUE BOOK FOR THE YEAR 1898.

RODRIGUES, 1898.

I.—FINANCIAL.

Revenue and Expenditure.

The receipts of the year 1898, exclusive of customs dues, matters of account, and sums received in Mauritius, amounted to Rs. 13,645 against Rs. 8,006 received in 1897, showing an increase of Rs. 5,639.

Licenses, dog tax, land rent, pasturage fees, forest produce, and tobacco tax were the principal heads of revenue.

The payments made in 1898, not including sums paid in Mauritius, and matters of account amounted to Rs. 24,058 against Rs. 23,502 in 1897, showing an increase of Rs. 556.

The ratio of revenue was Rs. 4.75 per head, and that of expenditure Rs. 8.38.

Exports and Imports.

The exports, exclusive of specie, amounted to Rs. 84,973 against Rs. 72,296 in 1897, showing an increase of Rs. 12,677.

The imports amounted to Rs. 104,353 against Rs. 100,040 in 1897, showing an increase of Rs. 4,313.

The ratio of exports per head of population was Rs. 29 in 1898 against Rs. 25 in 1897.

The ratio of imports shows the following differences :—

Rs. 36.3 against Rs. 34.8 in 1897.

II.—EDUCATION.

The expenditure for the two Government Schools at Rodrigues was Rs. 2,701 against Rs. 2,621 in 1897.

The total number on the roll of both schools was 108 boys and 102 girls. The average attendance was 70 boys and 70 girls.

III.—GOVERNMENT INSTITUTIONS.

Medical.

The total expenditure was Rs. 4,700 against Rs. 3,743 in 1897.

In 1898 there were 123 admissions into the hospital, and 8 deaths. In 1897 there were 93 admissions and 8 deaths.

The consultations at Port Mathurin and Mont Lubin dispensaries amounted to 3,215 against 2,497 in 1897.

The sanitary expenditure amounted to Rs. 600.

Poor Law.

Eighteen men and seven women received assistance from Government. They each received 500 grams of rice per day; a suit of clothes and R. 1 were given to each of them at the end of the year.

IV.—JUDICIAL STATISTICS.

Police and Prisons.

Thirty-six persons were committed to gaol in 1898, and 42 in 1897.

V.—VITAL STATISTICS.

The population on the 31st December 1898 was 2,870 souls, being 1,595 males and 1,275 females. The population is composed almost entirely of persons of African descent. There are about 20 Indians on the Island.

The births in 1898 were 92 males and 74 females. The deaths in 1898 were 21 males and 23 females.

RODRIGUES,
1898.

METEOROLOGICAL.

Highest barometric reading	30·422 on 5th July, 1898.
Lowest „ „	29·574 on 7th February, 1898.
Highest temperature	90·03 on 16th February, 1898.
Lowest „	67·02 on 24th July, 1898.
Heaviest rainfall	660 lines on the 6th February.

There was no cyclone in 1898.

VI.—GENERAL REMARKS.

Taxes are paid with difficulty on account of the truck system adopted by the traders of Rodrigues.

(For Reports for 1898, *see* No. 279.)

ACTING GOVERNOR SIR GRAHAM BOWER to MR. CHAMBERLAIN.

Government House, Mauritius,
13th July, 1900.

SIR,

I HAVE the honour to transmit herewith the Blue Book of Mauritius for the year 1899.

2. I also enclose my Report on the Blue Book.

I have, &c.,

GRAHAM BOWER,
Administering the Government.

6591—800—8/1900 Wt 24600 D & S—5

MAURITIUS, 1899.

REPORT ON THE MAURITIUS BLUE BOOK FOR THE YEAR 1899.

I.—FINANCIAL.

The following are the heads of Revenue for the year 1899, as compared with the year 1898 :—

Heads of Revenue.	1898.	1899.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Customs	2,723,834.24	3,465,082.58	741,248.34	—
Port, harbour, wharf, and lighthouse dues.	180,378.33	193,026.90	12,648.57	—
Licenses, excise, and internal revenue not otherwise classified.	2,159,345.06	2,505,974.39	346,629.33	—
Fees of court or office, payments for specific services, and reimbursements in aid.	235,325.50	202,705.32	—	32,620.18
Post Office and telegraphs.	125,951.64	134,403.25	8,451.61	—
Government railways...	1,568,389.48	1,876,302.95	307,913.47	—
Rent of Government property.	69,243.20	56,895.46	—	12,347.74
Interest...	481,870.34	539,429.46	57,559.12	—
Miscellaneous receipts	69,687.91	90,165.64	20,477.73	—
Land sales	6,293.26	2,327.44	—	3,965.82
Total ...	7,620,318.96	9,066,313.39	1,494,928.17	48,933.74
Deduct decrease...			48,933.74	

The receipts of 1899 show an increase on 1898 of Rs. 1,445,994.43

The increases mentioned in this statement are due to the improved condition of the Colony in 1899, consequent on a good sugar crop, to the imposition of countervailing duties in America, Canada, and India on bounty-fed sugar, and to increased taxation.

MAURITIUS, 1899.

EXPENDITURE.

The following is the Expenditure for the year 1899, as compared with the year 1898 :—

Heads of Service.	1898.	1899.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Public debt	584,807.59	837,232.30	252,424.71	—
Pensions	349,769.97	463,872.45	114,102.48	—
Governor and Legislature.	69,386.42	70,043.45	657.03	—
Colonial Secretary ...	61,443.53	65,652.75	4,209.22	—
Receiver-General ...	128,710.55	140,325.05	11,614.50	—
Auditor-General ...	55,671.85	54,769.90	—	901.95
Customs	225,346.6	213,325.04	—	12,021.61
Port and marine ...	166,460.03	177,060.53	10,600.50	—
Observatory	18,412.87	19,450.58	1,037.71	—
Museum...	4,686.56	4,874.12	187.56	—
Registrar-General ...	21,077.94	19,291.61	—	1,786.33
Receiver of Registration Dues.	56,888.71	55,281.54	—	1,607.17
Post Office	200,262.58	174,413.37	—	25,849.21
Woods and forests ...	114,517.23	116,273.81	1,756.58	—
Judicial Departments...	505,798.39	469,870.64	—	35,927.75
Ecclesiastical	139,006.66	143,460.91	4,454.25	—
Education	471,333.06	478,496.26	7,163.20	—
Medical and Health Department.	641,066.35	608,969.01	—	32,097.34
Quarantine	25,010.84	615,672.09	590,661.25	—
Carried forward ...	3,839,657.78	4,728,335.41	998,868.99	110,191.36

EXPENDITURE—*continued.*

Drainage works ...	—	30,029.69	30,029.69	—
Total ...	8,131,465.06	8,407,227.10	1,195,034.13	919,272.09

The increase is mainly due to the expenditure incurred on account of the plague, to increased charges on account of the Public Debt and pensions. The increase under the head of quarantine, an increase which was either directly or indirectly caused by the plague, amounted to Rs.590,661. Had it not been for this heavy but unavoidable item, the expenditure would have shown a net decrease.

The financial condition of the Colony greatly improved during the year 1899. But it is to be feared that the charge for plague, which appears for the first time as an item in the accounts, must be recurrent.

The plague has arrived in Mauritius, and, for reasons which will be more fully set forth in another portion of this Report, it is to be feared that it has come to stay—and that it will not only cause a heavy expenditure for an increased medical staff, sanitary guards, special constables, disinfecting staff, &c., but also many charges for compensation.

Compensation for the poorer classes of houses, which cannot be disinfected and must be burnt, cannot, consistently with justice or humanity, be evaded.

It follows that the Colony, though fortunate in the benefits it has derived from good harvests and the friendly legislation of India, Canada, and America, cannot but be anxious as to the burdens which would be imposed by a bad year, which, by causing financial depression and an increase of poverty, would promote the conditions most favourable to the spread of plague, whilst it would leave the Colony less able to bear the burden of the necessary expenditure.

It becomes necessary therefore to husband carefully the surplus gained during a good year, to meet the possible requirements of bad years. This is a measure dictated not only by ordinary prudence but by the conditions of the island, whose staple industry is at the mercy of any chance hurricane.

At the same time, if we put aside the natural anxiety caused by the plague—an anxiety which must always weigh when considering any future estimate—the financial condition of the Colony, as will be seen from the following statement of the position of the Colony at the close of the year 1899, is full of hope:—

POSITION OF THE COLONY AT THE CLOSE OF THE YEAR 1899.

At the close of the year 1898 the balance in favour of the Treasury amounted to Rs.438,866·00, at the close of 1899 it was Rs.1,077,715·00, showing an increase of Rs. 638,849·00.

MAURITIUS, 1899.

The Revenue and Expenditure and the Treasury balances of the previous five years, at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.
	Rs.	Rs.	Rs.
1894	8,534,427	8,587,039	1,551,046
1895	8,273,622	8.488,736	1,254,403
1896	8,849,181	8,544,736	1,487,557
1897	7,996,705	8,626,798	899,336
1898	7.620,318	8,131,465	438,866

The Revenue of 1899 compared with 1898 shows an increase of Rs.1,445,994, the principal increases being:—

Customs and Harbour	Rs.753,896
Licenses and Excise, &c.	346,629
Railways	307,913

The Expenditure of the year 1899 was in excess of that of 1898 by Rs.275,762. This was caused by the extraordinary expenditure on account of the plague in 1899, amounting to Rs.562,413. There was also an increase of quarantine expenditure due to the same cause.

From the above return for the five years preceding 1899, it will be seen that the Revenue is the largest the Colony has realised during the last six years, and if we look further back still, we find that the only Revenue year exceeding it was 1882, when the Revenue was Rs.9,551,635, and the Expenditure Rs.8,280,107, leaving a surplus of Rs.1,271,528.

The prospects of the coming crop are exceedingly favourable owing to the absence of hurricanes or droughts this year, and thanks to an exceptionally good season. It is expected that under a continuation of these favourable circumstances the crop for 1900 to 1901 will be in excess of that of 1898-99.

The cultivation of small holdings, chiefly by the Indian population, is steadily increasing, and this, with the good harvests, is the explanation of the large increase in the sugar crops of late years. These small cultivators receive remunerative prices from the mill-owners, who crush their canes. There is keen competition among the mill-owners, which will probably result in an enhanced price being given for canes during next crop. With these altered conditions of culture and with improved machinery, capable of extracting the maximum quantity of sugar from the cane, Mauritius will, it is to be hoped, be able to hold its own in the sugar markets of the world.

TAXATION.

The principal changes introduced in the laws relating to taxation in 1899 were as follows:—

1. Customs duties Ordinance No. 10 of 1899.—The surcharge of customs duties, 10 per cent., imposed by Ordinance No. 52 of 1898 was increased to 20 per cent. from 12th July. This surcharge was to provide additional ways and means for meeting the public expenditure of the Colony in connection with the plague.

2. Excise Ordinance No. 11 of 1899.—An equivalent duty to the surcharge on customs duties imposed by Ordinance No. 10 of 1899 was, by this Ordinance, imposed on spirits and wines manufactured in the Colony. The two last-mentioned Ordinances were temporary, and were not extended beyond 31st December, 1899.

3. Bonded Warehouse Ordinance No. 17 of 1899.—By this Ordinance a duty of Rs.5, per six calendar months, for each warehouse or part of a warehouse under Crown lock, appointed and approved by the Collector of Customs under the provisions of Article 57 of Ordinance 28 of 1892, was added to the License Tariff (Schedule A of Ordinance 24 of 1895), the duty being payable in advance from date of notification of approval of the Collector in the Gazette.

4. Ordinance 49 of 1899.—By this Ordinance a surcharge of 10 per cent. is levied on all sums paid as customs duty on goods imported into Mauritius on or before the 31st December, 1900. This Ordinance was to come into force on 1st January, 1900, and to lapse on 31st December, 1900.

5. Ordinance No. 50 of 1899—Customs and Excise Duties.—This Ordinance repealed Item 159 of Schedule B to Ordinance No. 29 of 1895, as amended by Ordinance No. 30 of 1896, and replaced it by an enactment showing the following modifications:—The duty of Rs.7·65, and the further duty of Rs.1·32 per degree of alcohol, per hectolitre, was made applicable to all wines contained in vessels other than bottles of one litre and less, the duty of 8c. per litre on wines in any vessel, not being a cask or bottle, of one litre or less, being abolished, and the additional duty was made payable proportionately per fraction of a degree, instead of the whole duty being payable per degree or fraction of a degree.

The duty on champagne or other sparkling wines has been increased from Rs.2·40 per dozen bottles, exceeding one litre but not exceeding two litres, to Rs.5, and a new item has been introduced, *i.e.*, not exceeding one litre each per dozen bottles Rs.2·50, and not exceeding half a litre each per dozen bottles R.1·25.

The following new item is added to Schedule B of Ordinance No. 29 of 1895:—

"Carcases of all animals, each R.0·10." This is a reduction, the former duty being *ad valorem* of 10 per cent., Item 160 of the Tariff.

The duty on tea imported was raised from R.0·10 per kilogram to R.0·40.

The first paragraph of Article 5 of Ordinance No. 30 of 1897 was repealed and replaced by a provision raising the duty on wines manufactured in the Colony from Rs.7·65 to Rs.8·42 per hectolitre, and the further duty of R.1·32 per degree or fraction of a degree of alcohol per hectolitre, and a proportional duty per fraction of a degree above 16 degrees, according to Gay Lussac's alcohometer, contained in such wines, was raised to R.1.45. This measure was taken to equalise the duties on colonial manufactured wines and on wines imported.

Ordinance No. 50 of 1899 came into force on 26th December, 1899, date of its publication.

REVENUE AND EXPENDITURE.

The Revenue of 1899 was Rs.9,066,313, showing an increase of Rs.1,445,995, as compared with the Revenue of 1898, which was Rs.7,620,318.

The Expenditure of 1899 was Rs.8,407,227, showing an increase of Rs.275,762 on the Expenditure of 1898, which was Rs.8,131,465.

The ratio of the Revenue to the population was Rs.23·88 per head, and that of the Expenditure Rs.22·12 per head.

ASSETS AND LIABILITIES ON 31ST DECEMBER, 1900.

(1.) *Commissioners of Currency.*

Assets	Rs.4,704,885·42
Liabilities	4,699,250·00
Balance in favour of Commissioners ...	Rs.5,635·42

(2.) *Government Savings Bank.*

Assets	Rs.2,999,800
Liabilities	2,885,966
Balance in favour of the Bank ...	Rs.113,834

(3.) *Curatelle.*

Assets	Rs.432,296·65
Liabilities	432,296·65

(4.) *Treasury Proper.*

Assets	Rs.2,230,372·29
Liabilities	1,152,657·11
Balance in favour of Treasury ...	Rs.1,077,715·18

PUBLIC DEBT.

The Public Debt stood as follows on 31st December:—

	£	s.
Savanne Railway 4½ per cent debentures, payable by annual drawings ...	46,693	10
Moka Railway 4 per cent. debentures, payable by annual drawings in and from 1884	600	0
Consolidated 4 per cent. debentures, payable by annual drawings from 1882...	62,500	0
Mauritius Inscribed Stock 4 per cent., under Ordinances 1 & 22 of 1887 (including the loan made for the Mare-aux-Vacoas £36,000)	482,390	16
Hurricane Loan, 1892, 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892	600,000	0
	£1,192,184	6

For the redemption of the debentures and inscribed stock the several sinking funds and cash balances in the hands of the Trustees on the 31st December, 1899, amounted to £111,524 15*s.*, the amount duly provided by law.

The sum to the credit of the sinking funds on the 31st December, 1899, showed an increase of £10,872 11*s.* 9*d.* on the previous year.

MAURITIUS, 1899.

CURRENCY.

Amount of currency notes in circulation on 31st December, 1899:—

	£	s.	d.
Issue of 1848 & 1849 (dollars & cents) ...	483	16	5
Issue of 1860 (sterling)	3,639	0	0
	4,122	16	5

Rupee notes issued under Ordinance No. 28 of 1876:—

1. In the Financial Officer's vault ...	Rs.294,250
2. In the hands of the public, including the banks	3,606,000
	Rs.3,900,250

MUNICIPALITIES AND BOARDS.

The following is a comparative statement of the total revenue and expenditure of the Municipality of Port Louis for the last five years:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1895	435,305	453,823
1896	460,242	459,390
1897	508,079	510,666
1898	*433,597	482,134
1899	†432,998	424,442

---

* Including Rs. 50,000 raised by a loan on account of overflood expenses.

† Including Rs. 26,000 raised by a loan for repairs to Grand River Suspension Bridge.

LOCAL BOARDS.

The following are the statements of revenue and expenditure of the Local Boards of Curepipe, Quatre Bornes, and Rose Hill and Beau Bassin for the last five years:—

Curepipe.

Year.	Receipts.	Expenditure.
	Rs.	Rs.
1895	51,493.79	48,884.83
1896	52,600.51	49,601.24
1897	59,024.04	55,531.87
1898	59,863.74	57,550.88
1899	61,568.61	59,085.14

*Quatre Bornes.**

1896	3,900.10	2,957.24
1897	9,895.44	10,210.76
1898	9.191.79	8,838.71
1899	9,831.74	9,689.68

*Beau Bassin and Rose Hill.**

1896	26,540.00	22,410.26
1897	26,618.87	24,584.76
1898	24,743.98	20,439.04
1899	27,603.50	23,626.60

* NOTE.—These Boards have only been in existence for four years.

MAURITIUS, 1899.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following is a comparative statement of the value of the chief articles of Imports and Exports for the years 1898–99 :—

Articles	Imports.		Exports.			
			1898.		1899.	
	1898.	1899.	Home Produce.	Foreign.	Home Produce.	Foreign.
	Rs.	Rs.	Rs	Rs.	Rs.	Rs.
Animals	213,468	245,127	1,791	13,705	110	1,200
Apothecary wares	143,266	127,615	60	3,256	—	3,905
Brass and copper wares	54,607	66,359	—	24,150	—	29,772
Corn, grain, flour, &c.	8,935,049	8,935,396	413	471,576	75	91,416

Soap	39,795	115,842	66,048	2,691	6,062	97

---

* Tea is included.

MAURITIUS, 1899.

IMPORTS AND EXPORTS—*continued*.

Articles.	Imports.		Exports.			
			1898.		1899.	
	1898.	1899.	Home Produce.	Foreign.	Home Produce.	Foreign.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stationery	110,898	105,836	—	742	—	280
Sugar...	—	—	24,727,688	—	23,044,657	—
Timber and wooden wares	247,414	538,931	1,943	11,745	3,661	[illegible],664
Tobacco	210,832	190,257	—	3,735	—	804
Toys	17,084	24,708	—	140	—	16
Umbrellas and parasols	21,732	23,792	—	144	—	10
Vanilla	—	—	140,096	—	133,946	—
Miscellaneous	1,746,544	2,744,186	10,569	214,359	56,876	98,216
Total	21,471,013	20,189,110	26,013,061	2,912,808	24,440,609	344,734

The rate of imports and exports per head of population was as follows:—

—	1898.	1899.
	Rs.	Rs.
Imports	74.76	74.23
Exports	84.10	72.12

Excluding specie and bullion, exchange and charges, the statement* shows that there has been a falling off on imports during the years 1896, 1897, 1898 as compared with 1895, whilst the year 1899 shows an increase of nearly two and a half millions of rupees as compared with 1898, or 14·34 per cent., and a decrease of one million rupees as compared with 1895, or 5·11 per cent., when the value of the imports amounted to the large sum of Rs.20,125,402.

Including specie and bullion, exchange and charges, the year 1899 shows a slight falling off as compared with 1898, owing to the large quantities of rupees imported from India that year, amounting to Rs.4,769,235, as against Rs.1,092,397 imported in 1899.

The proportion of specie and bullion with regard to the value of goods imported in 1899 is in the ratio of nearly one to 18.

Acid Carbolic.

There has been a large increase in the importation of this disinfectant, due entirely to the prevalence of plague in the Colony. The United Kingdom was the chief supplier, whilst France furnished us with the drug to the extent of 4,752 kilos., of a declared value of Rs.1,148, against 15,956 kilos., of Rs.2,159 in value, of British manufacture.

A fact worthy of notice is that the quantity imported in 1899 in connection with the plague epidemic is double that which was received in 1894, during the small-pox epidemic.

Acid Phosphoric.

The enhanced prices of the article from the United Kingdom may, to a certain extent, be responsible for the decreasing importation of the British article. The effect of the cost price upon the importation appears when comparing the quantity received from the United Kingdom, which was 286,213 kilos. in 1894, as compared with 118,177 in 1899.

---

* *Vide* statement on page 23.

Belgium made its appearance on the market of 1899 with 10,000 kilos., at an intrinsic cost price of nearly 30·4 per cent. below English prices.

Apothecary Wares.

In consequence of large demands and use of patent French medicines in the Colony, France shows a vast increase in the value of apothecary wares ever since 1895, when the imports reached Rs.25,646.

During 1899 the importation reached Rs.81,285, exclusive of charges and exchange, as against Rs.36,545, imported from the United Kingdom in that year. In 1895 the importation from the United Kingdom was about 50 per cent. in excess of the value of French goods received in Mauritius, whilst in 1899 it is almost the reverse in favour of goods from France.

Beef, Salted.

The United States of America supplied the market with nearly 75 per cent. of the whole quantity imported during the year 1899. The importation from the United Kingdom, which had fallen in 1898 to the figure of 9,513 kilos., of a value of Rs.3,424, showed signs of increase during the past year, when the quantity received amounted to 21,667 kilos., of a declared value of Rs.6,857.

Butter.

An increase in the supply from the United Kingdom took place during 1899 as compared with the quantity of the previous year.

The weight of this article from Denmark—whence the importation is the largest—has increased 33 per cent., and has more than doubled in value during 1899.

Decreases are shown in the importation from the United States.

Coals.

Coals do not offer any special point of interest, with the exception that the largest supplies are still derived from the United Kingdom. In 1899 32,558,408 kilos. were imported from the United Kingdom, or 200 per cent. more than the aggregate quantity of 15,590,319 kilos. from other competitive countries, which stand in the following order for their supplies:—

Australia, India, Natal, China, France.

Coffee.

On the whole, the quantity imported in 1899 compares very poorly with the stock received in previous years. Decreases have occurred in receipts from Java, whose exportation to this Colony fell by 50 per cent. as compared with 1898. Slight increases, however, have taken place from India, Algeria, and the United States.

Rice.

China and Hong Kong, which supplied a certain quantity of this article previous to 1899, have hardly sent any in that year. This decline is due to the low prices obtained for Chinese and Hong Kong rice as compared with Indian rice.

Cotton Goods.

There has been a large advance made in the importation of these goods from the United Kingdom in 1899. The value shipped to this port has risen by nearly 50 per cent. when compared with 1898. This may be accounted for by the importation of greater quantities of cheaper goods, which are exclusively used by the poorer classes of the people of Mauritius.

Irons of all Sorts.

The advantageous position over other countries is still maintained by the United Kingdom in the trade of irons of all sorts.

Lard.

China, the United States, and Continental India are the chief suppliers.

There has been a large reduction in the quantities imported during 1899 when compared with 1895 and 1897, as follows:—

1895	1,049,212 kilos.
1897	596,343 „
1899	357,179 „

The falling off in the consumption of hog's lard is to be attributed to the high price demanded for this commodity in the European markets, which is beyond the reach of the poorer classes, who have recourse to cheaper articles for culinary purposes, such as mustard oil, pistacchio nut oil, &c.

Leather-Boots and Shoes.

Larger quantities of inferior and cheaper qualities for the poorer classes have been received from Continental India during 1899, thus competing with the United Kingdom. France stands, with regard to value, second in rank to India, the importation from France having been of Rs.20,301 worth in 1899, showing a decrease of nearly 30 per cent. when compared with the importation of 1898, which amounted to Rs.27,299 worth.

The importation from the United Kingdom is valued at Rs.2,407, as against Rs.7,281 for the previous year.

The quality and make of the articles are not generally appreciated by the well-to-do classes of the inhabitants, who prefer the foreign article to the more substantial British boot.

Matches.

One-tenth of the total quantity of matches imported into Mauritius in 1899 was from countries other than Japan and Sweden. The last-mentioned countries have supplied this market with cheaper matches, and they will undoubtedly long retain their hold on this industry.

Pork, Salted.

The importation from the United States has remained nearly stationary during 1899, when the imports were 19,984 kilos.

The importation from the United Kingdom, which was 26,515 kilos. in 1895, fell to 12,269 in 1897. This is due to the competition of the United States, the prices of pork, salted, imported therefrom being lower than that of the British market.

In 1899 the importation from the United Kingdom was 14,473 kilos., against 11,115 kilos. received in 1898.

Silk, Satin, and Ribbons.

There has been a large increase in the importation of silk goods from the United Kingdom and France during 1899. These two countries have supplied goods of a declared value of Rs.20,539 during the last year, whilst in 1898 the imports were only Rs.8,218. This is due to the more prosperous state of the Colony in 1899. There has been a falling off in the supplies from China, India, and Pondichery since 1895. The disease called "pebrine," reported by Handels as having attacked the silkworms in China in past years, may have influenced the production of this article in such a way as to increase the market value of the silk to such an extent as to lessen the export from these countries.

Spirits—Brandy.

Our chief supplies are of French manufacture in this line. Germany has appeared on the market in 1899 with a total quantity of 431 litres of Rs.500 in value.

Spirits—Whisky.

There has been an increase of 6,000 litres from the United Kingdom. This increase advantageously replaces a decrease in the importation of brandy from the United Kingdom in 1899 as compared with 1898.

The United Kingdom is our chief supplier.

Tobacco—Manufactured.

The United States of America, on account of the cheapness of this article, which is much prized by the poorer classes, has maintained the first rank for past years.

The quantity imported from America in 1894 was 27,967 kilos., as compared with 25,933 kilos. from Reunion Island. Whilst the importation from Reunion in 1899 was 31,698 kilos., the American produce reached the large figure of 85,555 kilos., representing more than half of the total quantity imported into the Colony that year.

EXPORTS.

Aloe Fibre.

There has been a decidedly large increase in the manufacture and exportation of this article, consequent upon the war going on in Manilla. Nearly all the fibre mills here have been very active in the production of this textile.

The quantity exported in 1895 was 1,311,838 kilos., of a declared value of Rs.406,736. In 1898 it increased to 1,494,928 kilos., of the value of Rs.427,112, and in 1899 the quantity exported has reached the high figure of 2,249,809 kilos., of the value of Rs.566,030. The difference in favour of 1899 is 754,881 kilos., of the value of Rs.138,918. Nine-tenths of our produce has been exported to the United Kingdom, the remainder has been distributed among Germany, France, India, and Holland.

MAURITIUS, 1899.

Molasses.

The quantity exported in 1899 was 12,681,205 kilos. of the value of Rs.275,534, as compared with 12,967,400 kilos. of the value of Rs.335,580 for 1898. The exportation has been entirely to India, except 125 kilos. to America.

Hides, Tanned.

Show a decrease in value when compared with 1898. The figures stood thus:—

1898	Rs.55,318
1899	Rs.32,821

Soap.

The closing of the Madagascar ports and of Reunion on account of plague was the cause of the great falling off in the exportation of our Colonial-made soap. The following figures will explain this:—

1897 ...	266,455	kilos. of the value of	Rs.65,890
1899 ...	26,532	„ „ „	Rs.6,061

Rum.

The exportation, which had fallen off in 1898 on account of the Madagagscar ports being practically closed to our rum by the prohibitive duties imposed thereon, revived last year, when 1,468,104 litres of the value of Rs.154,812 were exported. More than nine-tenths of the total quantity was exported to the United Kingdom.

Sugar.

The exportation during 1898 reached 155,000 tons, but this high figure has been surpassed in 1899, when the exportation amounted to above 164,911 tons, an increase of over 9,000 tons, or 6·39 per cent.

India, the United States, the Cape, and Australia receiving the bulk of our produce.

The exportation of foreign goods from Mauritius to Reunion and other neighbouring islands was almost nil during the last year, owing to the existence of plague here.

The following is a statement of the value of imports and exports during the five years 1895-99:—

IMPORTS.

—	1895.	1896.	1897.	1898.	1899.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imports	20,125,402	19,964,436	17,944,886	16,701,778	19,096,213
Charges and exchange	9,718,918	9,692,947	8,107,774	6,854,994	7,991,869
Specie and bullion	662,250	2,537,026	1,003,348	4,769,235	1,092,897
Total	30,506,570	32,194,409	27,056,008	28,326,007	28,180,979

EXPORTS.

Produce and manufacture of the Colony ...	24,751,037	29,061,141	23,423,412	26,013,061	24,440,609
Shipping charges	1,732,987	2,055,839	2,461,332	2,940,568	2,595,818
British, foreign, and other Colonial produce and manufacture.	2,496,598	2,408,874	1,823,394	1,314,167	304,420
Specie and bullion	2,548,679	423,760	2,945,869	1,598,640	40,314
Total	31,529,301	33,949,614	30,654,007	31,866,436	27,381,161

The following table shows the trade with Madagascar for the five years 1895-99, and is interesting as showing the effect of the protectionist tariff on the export trade of Mauritius:—

Inclusive of Charges and Exchange.

IMPORTS.

1895.	1896.	1897.	1898	1899.
Rs. 383,003	Rs. 460,666	Rs. 464,518	Rs. 481,801	Rs. 461,008

Produce and Manufacture of the Colony.

EXPORTS.

1895.	1896.	1897.	1898.	1899.
Rs. 401,882	Rs. 332,967	Rs. 176,778	Rs 110,226	Rs. 51,752

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in the Colony, and the fisheries produce barely sufficient for the wants of the inhabitants.

There is a decreasing export of fish, dry and salted. Salted and dried fish are imported in considerable quantities from the outlying Dependencies of St. Brandon and Rodrigues, from India and South Africa, and occasionally from Muscat. Reunion, which in the year 1898 imported salt fish from Mauritius of the value of Rs.3,280, did not import any, and the export to Singapore has greatly fallen off.

The principal manufactures are rum, aloe fibre, tea, soap, vinegar, and wine. Vanilla is also grown and prepared in the Colony for export.

Rum.

The quantity of rum consumed in the Colony in 1899 was 978,128 litres; in 1898 it was 801,488 litres; showing an increase in favour of 1899 of 176,640 litres

The quantity exported in 1899 was 1,468,104 litres, chiefly to the United Kingdom, which took 1,336,918 litres. Madagascar, formerly our principal market, took none, owing to a prohibitive duty of 120 francs per hectolitre, imposed by the French Government. In 1898 the export was 828,783 litres, of which 366,262 litres to the United Kingdom and 400,008 litres to France; this latter amount due to exceptional circumstances, a special shipment, owing to a decrease in potato spirit produced in Russia in 1899; showing an increase in favour of 1899 of 639,421 litres.

The excise duty on rum in 1899 amounted to Rs.1,359,677; in 1898 it was Rs.1,067,604; showing an increase on 1898 of Rs.292,073.

The export of rum is free.

There were 29 distilleries in the island capable of being worked in 1899, of which only eight were under licence and working during the year.

Fibre.

This manufacture, owing to the war in the Philippine Islands, which paralysed the fibre industry there, and to a consequent rise in prices in the British market, took a considerable extension in 1899; there were 60 factories working against 30 in the previous year.

The whole of this produce is exported. The average selling price in the Colony in 1899 was Rs.375 a ton.

The exports in 1899 amounted to 2,249,809 kilos.; in 1898 the exports were 1,494,928 kilos.; showing an increase in 1899 of 754,881 kilos.

Tea.

There are four factories in the Colony and several plantations, covering approximately 200 acres. The tea made is nearly all consumed in the Colony. In 1898 there were five factories and 367 acres under cultivation. The average selling price in 1898 and 1899 was R.1.20 per kilo.

The approximate quantity manufactured in 1899 was 27,000 kilos., of which only 2,585 were exported, chiefly to the United Kingdom. In 1898 it was 40,000 kilos., of which 7,266 kilos. were exported, chiefly to Madagascar. The year 1899 shows an approximate decrease of 13,000 kilos.

The coming crop is estimated to exceed that of 1899.

The aloe fibre and tea factories pay no licence, and no precise statistics are obtainable; the information is as approximate as possible.

Soap.

There are three small factories in the island, which produced in 1899, 416,712 kilos.; in 1898, 502,044 kilos.

The exports in 1898 were 292,356 kilos.; in 1899 only 26,532 kilos.; showing a decrease in 1899 of 265,824 kilos.

The decrease in 1899 is due to the closing of the Madagascar market, owing to prevalence of plague in this Colony.

Vinegar.

This is a new industry. There is only one factory, which produced 51,605 litres. A licence of Rs. 50 per half-year is paid for this industry. The excise duty amounted to Rs.475. The excise duty is equivalent to the import duty.

The vinegar is manufactured from rum, issued free of duty, and the manufacture is carried on in a special warehouse, approved by the Receiver-General, under the supervision of an Inspector of Distilleries, at the expense of the manufacturer. The export is free, and the quantity exported in 1899 amounted to 242 litres; this was a trial shipment, and will lead to future shipments.

Wine.

This is also a new industry. The wine (claret) is made from the dried raisins. There is only one factory. There is a licence of Rs.120 per half-year on this industry, and an excise duty equivalent to the import duty on wines is imposed. The quantity produced in 1899 was 6,467·60 litres. The revenue derived from the excise duty was Rs.593·71.

Vanilla.

Vanilla is prepared in the island at two or three factories; the whole quantity is exported.

In 1899 the amount exported was 3,709 kilos.; in 1898, 4,042 kilos. There is a decrease in 1899 compared with 1898 of 303 kilos.

There are several other small manufactures scarcely worth mentioning carried on in the Colony, such as brick-making, pottery, woodenwares, and jewellery; this last is, however, taking a greater extension, especially in Indian jewellery. The imports from India have declined by 58·19 per cent. in 1899 as compared with 1898.

In 1899 the total imports from India were valued at Rs.3,112, and in 1898 at Rs.8,458; increase Rs.5,346.

It appears that, bullion being allowed to enter free of duty, Indian jewellers import silver and gold bullion, mix it with alloy and manufacture Indian jewellery in the Colony, instead of importing it.

They thus escape the *ad valorem* duty. No Indian jewellery has been imported since the beginning of the year 1900.

BOTANICAL GARDENS.

The Botanic Gardens are divided into three sections, viz.:—

1. The Pamplemousses Gardens, situated at about 250 feet above sea level.

2. The Reduit Gardens, situated at 1,000 feet above sea level.

3. The Curepipe Gardens, situated at 1,800 feet above sea level.

The most important of these are the old Pamplemousses Gardens, which are 65 acres in extent.

Large numbers of useful plants, fruit, and timber trees are propagated there, and sent all over the island; amongst these the following are the most important:—

Economic Plants and Fruit Trees.

Coffee, litchis, nutmegs, cloves, different varieties of citrus, kola, coca, aegle marmelos, pine-apple, bananas, cacao, cocoanut, manihot, &c.

Fibres.

Sanseviera, different varieties of agave, China grass, New Zealand flax, &c.

Rubber.

Ceara, para, cryptostegia, vahea.

Fodder Plants.

Teosinte, desmodium tortuosum.

Canes.

A collection of 97 varieties.

A certain number of School Board apprentices, selected by the Schools' Committee, are sent yearly to the gardens to be trained. After a certain time, those that have given satisfaction are promoted in the Department or recommended for employment in private gardens.

REDUIT GARDENS.

These form part of the Reduit domain, His Excellency the Governor's residence.

Part of the ground is under forest; extensive plantations of timber trees have lately been made there. These produce every year a large quantity of seeds, which are used for re-afforestation purposes.

CUREPIPE GARDENS.

This garden is chiefly used as a nursery for economic plants and timber trees that cannot be successfully grown at Pamplemousses, owing to the climate.

Large numbers of seedling exotic plants are raised yearly, namely, juniperus, pinus sinensis, eucalyptus, which are either sold to the public or used for planting upon the Government lands all over the Colony.

LAND GRANTS.

The transactions in Crown land in an old country like Mauritius are insignificant.

Ten arpents of Crown land were sold in the year 1899, and fetched Rs.775.

But if the sale of town land is insignificant the purchase of fixed property by the Indian population is most significant. The following return shows the purchases of land by the Indian population for four years:—

Year.	Value of Purchases.
	Rs.
1896	2,401,878
1897	1,346,042
1898	2,087,837
1899	1,268,320
Total	7,104,077

This means that the land is passing from the hands of Creoles of either European or mixed blood into the hands of Indians, and, taken in conjunction with the unboubted tendency towards the centralisation of the sugar mills, it means the elimination of the middle-class proprietor of moderate means. He is being gradually squeezed out by the limited liability company on one side and the Indian peasant proprietor on the other.

From the point of view of the economic production of sugar this may be, and possibly is, inevitable or even desirable, but from the social and moral point of view it means the extinction or expatriation of an intelligent, cultivated, and graceful people, and the substitution of Asiatics for European thought and culture.

In a word, if the present movement continues, Mauritius must in a few generations become a purely Indian island, governed and administered by a few English officials, some factory managers, and a military garrison.

SHIPPING.

The following are statements of the shipping entered and cleared in 1899:—

Statement of number and tonnage of British and foreign sailing vessels and steamers entered and cleared for 1898-99 :—

Entered.

—	1898.		1899.		Difference.	
	No.	Tonnage.	No.	Tonnage.	No.*	Tonnage.*
Sailing vessels	166	78,361	136	73,780	— 30	— 4,581

* + Increase. — Decrease.

There has been an increase of 13,271 tons in British steamers. This is due to the number of steamers that have put into this port, principally during the last quarter of 1899, for coals and for cargoes of sugar for Indian ports and Australia.

The falling off in French steamers is owing to the messageries boat, "Djemnah," not arriving with the mail in the last quarter of the year, and also to the steamer under French flag employed in the transport of cattle from Madagascar having been replaced by a vessel under the Austrian flag. A break has also occurred in the voyages of the French steamer transporting cattle from Madagascar.

The falling off in the tonnage of sailing vessels is, I believe, due to the closing of the ports of Reunion and Madagascar to goods from this port, on account of the prevalence of plague in this island. The trade with the above-named ports was principally carried on by small crafts under British flag.

The unsettled state of South Africa has also much contributed to the reduction in the number and tonnage of sailing vessels.

III.—LEGISLATION.

The legislation for the year 1899 dealt mainly with sanitary and other measures rendered necessary for the purpose of dealing with the plague epidemic. The tendency of these Ordinances was to increase the powers of the Medical Director, and to make his Department practically despotic, with power to enter any house during the day or night and order such measures as they might think fit.

An important Education Ordinance (No. 33) was passed, which completely remodelled the system of education in the Colony. A Director of Public Instruction is to be appointed—the Council of Education is to be abolished, together with its Committees.

Advisory Committees of primary and secondary education are to be nominated.

The system of State-aided schools was put on a sounder basis and the financial arrangements improved.

The effect of the new Ordinance will probably be greater efficiency and closer supervision of the denominational schools, as well as improved technical education.

Some Ordinances were passed, mainly of a patch-work character, amending previous laws, the most important being "The Public Officers' Guarantee Ordinance," which establishes a guarantee fund for public officers.

Another important law was "The Divorce and Judicial Separation Amendment Ordinance," which introduces the English system of divorce by petition, allows damages to be claimed, and abolishes the French system of imprisonment for adultery.

Some Ordinances were passed for increasing taxation. These were necessitated by the increased expenditure due to plague.

IV.—EDUCATION.

PRIMARY EDUCATION.

Primary education in Mauritius is carried on by means of Government schools and State-aided schools. The Government schools are practically undenominational, though the clergy have access to scholars of their own faith. The State-aided schools are practically denominational, though, as will be seen from a table given lower down, they accept all religions.

There are also two Royal College schools which are preparatory schools for the Royal College.

At the end of 1899 there were 176 primary schools in operation, divided as follows:—

Government and secular schools ...	78
Aided and denominational	98
	176

In all primary schools the teaching of the English and French languages is obligatory.

The number of pupils under instruction last year was 19,181 on roll, and 11,945, or 62·27 per cent., in average attendance. The low percentage of attendance is to be accounted for by the plague, the inoculation scare, and quarantines enforced by planters on their estates.

The Government schools include the following categories:—

1. First grade first division in which no result payments are made.

2. First grade second division 3. Second grade full time 4. Second grade half time	in which teachers are paid fixed salaries and result grants.

In 1899 there were:—

Thirteen first grade first division schools with 2,598 pupils on roll and 1,482 in average attendance. In these 1,585 pupils were presented for examination, 821 or 51·79 per cent. of whom passed.

Thirty-five first grade second division schools with 5,069 pupils on roll and 3,149 in average attendance. These presented 3,117 pupils for examination, 2,128 of whom or 68·27 per cent. passed.

Twenty-four second grade full time schools with 1,724 pupils on roll and 1,031 in average attendance. 882 pupils were presented for examination in these schools, and 565 or 64·05 per cent. passed.

Six second grade half time schools with 386 pupils on roll and 222 in average attendance. These sent up for examination 174 pupils, of whom 102 or 58·62 per cent. passed.

The denominational-aided schools stood as follows in 1899:—

Roman Catholic.—64 schools, educating 6,844 scholars on roll and 4,433 in average attendance. In these schools 3,477 pupils were presented for examination, 2,484 or 71·44 per cent. of whom passed.

Church of England.—31 schools with 2,195 pupils on roll and 1,387 in average attendance. 1,167 pupils were presented for examination and 760 or 65·12 per cent. passed.

Presbyterian Mission.—Two schools, which had 170 pupils on roll and 121 in average attendance. 119 were examined and 74 or 62·18 per cent. passed.

Mahomedan.—One school with 195 pupils on roll and 120 in average attendance. This school presented 104 pupils for examination and 42 or 40 per cent. passed.

With regard to their race the scholars attending the primary schools last year are to be classified as follows:—

Government schools:—

Children of European or African descent ...	6,781
Indians and Indo-Mauritians	2,996

Aided schools:—

Of European or African descent	6,277
Indians or Indo-Mauritians	3,127

With reference to Creed, they stood as hereunder in 1899:—

In Government schools:—

Roman Catholics	6,703
Church of England	276
Other Christian Sects	106
Mahomedans	878
Hindoos	1,764

MAURITIUS,
1899.

In the Roman Catholic aided schools:—

Roman Catholics	5,975
Church of England	24
Other Christian Sects	27
Mahomedans	226
Hindoos	608

In the Church of England schools:—

Roman Catholics	541
Church of England	283
Other Christian Sects	6
Mahomedans	310
Hindoos	1,035

In the Presbyterian Mission Schools:—

Roman Catholics	81
Church of England	7
Other Christian Sects	63
Mahomedans	15
Hindoos	15

In the Mahomedan school:—

Roman Catholics	40
Church of England	6
Mahomedans	62
Hindoos	100

The foregoing tables are certainly curious, especially the last, and furnish evidence of a very liberal tone in regard to religious questions.

Exclusive of the cost of administration, maintenance of Government buildings, scholarships, and books and stationery for sale to the schools, and of industrial apprenticeships, Government expended in 1899 on primary schools a sum of Rs.292,125·28.

The cost per pupil was:—

In Government schools	Rs.15·86
In Aided schools	10·93

With regard to industrial, technical, and agricultural schools, there are none properly so-called. The only attempt towards technical and industrial education in the Colony lies in the yearly selection, after examination, of seven lads, coming from any school, five for training at the Plaine Lauzun workshops, and two at the Botanical Gardens. At Plaine Lauzun these apprentices are taken on for five years, and at the Botanical Gardens for four years, each set receiving wages which increase yearly. At the end of 1899 there were 20 apprentices at Plaine Lauzun, and eight at the Botanical Gardens.

The teaching staff in the primary schools in 1899 comprised:—

In the Government schools:—

- 63 Masters.
- 15 Mistresses.
- 75 Assistants.
- 120 Monitors and monitresses.

In the Aided schools:—

- 96 Head teachers.
- 94 Assistants.

The weak point in the system is that many of the teachers are not properly qualified as such, and that the possession of a certificate is not always a guarantee of competence as a teacher.

SECONDARY EDUCATION.

The Royal College provides secondary education for boys, and with its two schools, as well as with the associated schools, aims at providing a higher class of primary education than is attainable at the Government schools, or the ordinary State-aided schools. The headquarters, which were formerly situated in Port Louis, have, on account of the plague epidemic, been temporarily moved to Curepipe.

The College itself is affiliated to the University of London.

There are 24 schools associated with the Royal College and two Royal College schools.

The average attendance for the year 1899 was as follows:—

Royal College proper	203
Royal College school, Port Louis	61
Royal College school, Curepipe	156

The revenue from school fees and sale of books was Rs.30,729, and the total expenditure, including salaries, was Rs.182,411.

Two English scholarships, *i.e.*, scholarships intended to maintain the successful competitors at English universities or technical colleges, are granted every year, and reports are regularly received as to the progress of the successful scholars.

The new Education Ordinance passed in 1899 is likely, when the newly-constituted Director of Public Instruction assumes office, to introduce modifications in the educational system pursued at the Royal College. It is not necessary therefore to waste space on further description of details which may soon become obsolete.

A fairly full account will be found in the Report for the year 1898.

But it may be observed that the weak points of the Mauritius Educational system are:—

1. Deficient technical education. The average Mauritian boy is in poor circumstances, and his first requirement is to be taught how to earn his living.

They cannot all become doctors or lawyers, and a purely scholastic training, however desirable from the point of view of general culture, is practically a drug in the market.

2. The second defect is the absence of school life, with all that it means at an English public school. It is not necessary to dwell at any length on the training, both physical and moral, afforded by English public school life, nor of its effect on the formation of character. It will be sufficient to say that, owing to local conditions, the Royal College lacks facilities for this training, and that there are, owing to climatic and social conditions, great difficulties in the way of supplying it.

But the problem is fully recognised as one requiring solution, and there need be no fear that the matter will escape consideration.

All classes are beginning to recognise that, owing to the increase of population, their boys may have to fight the battle of life outside the island of Mauritius, and that they must be fully equipped mentally, morally, and physically for the struggle of competition in other countries or colonies.

V.—GOVERNMENT INSTITUTIONS.

HOSPITALS.

Including the civil, prison, and reformatory hospitals, there are ten hospitals in Mauritius, supported and controlled by the Government. During the year 1899 there were 15,147 patients treated in these hospitals.

These figures do not include plague hospitals or plague patients, which will be dealt with separately.

The mortality in the public hospitals for the year 1899 was was as follows:—

1st Quarter	219
2nd "	361
3rd "	263
4th "	221
Total	1,064

The largest number of malarial fever cases far exceeded those of any other illness, the numbers being:—

Intermittent	3,969
Remittent	134
Pernicious	49

But it will be readily understood that malarial fever is answerable for many more cases of illness than are brought to account under that heading—for anæmia, debility, and other diseases are often traceable to attacks of malarial fever. There were 322 cases of anæmia and 504 of general debility, probably traceable to poverty or previous attacks of malaria.

There were 1,902 cases of disease of the respiratory system, and the Medical Superintendent of the Port Louis Civil Hospital reports a great increase of pulmonary phthisis amongst the lower classes of the population.

The patients of the Civil Hospital of Port Louis, owing to the discovery of plague-infected rats in the linen room of the hospital, were transferred in April 1899 to the Royal College buildings, a much healthier site. The Medical Superintendent in charge reports very favourably of the change.

Some deficiencies have been reported in the hospitals, which have been remedied. Proper lying-in wards are being provided where possible, and the drainage and water supply are receiving attention.

Altogether, it may be said that the hospitals have benefited by expenditure on improved sanitation, brought about by the plague epidemic. There has been a determination, not only to set our houses, but our hospitals in order.

POOR HOUSES AND ASYLUMS.

Poor Law relief is under the administration of a Poor Law Commissioner, a Government officer, assisted by a regular staff and Poor Law officers. The principal asylum is the Barkly Asylum, situated at Beau Bassin.

The Barkly Asylum is divided into four branches, namely, (*a*) the hospital for the treatment of the sick poor; (*b*) the asylum proper, for the reception and maintenance of old and infirm paupers; (*c*) the lunatic branch wards, for the reception and maintenance of harmless, insane paupers from the General Lunatic Asylum; and (*d*) the orphanage.

During the year 1899 the Barkly Asylum Hospital received 2,827 pauper patients for treatment; 2,499 were discharged, 246 died, and the number remaining on the 31st December amounted to 82.

The number of infirm paupers admitted into the asylum amounted to 370; 248 were discharged, four died, and the number remaining on the 31st December, 1899, amounted to 118.

The number of harmless lunatics admitted amounted to 122; six were discharged and 16 died, the number remaining on the 31st December, 1899, amounted to 100.

The number of pauper orphan children admitted amounted to 131; 88 were discharged and one died, the number remaining on the 31st December, 1899, amounted to 42 (exclusive of 14 of them, who were under treatment in hospital).

The expenditure incurred for the Barkly Asylum (exclusive of the hospital, which is under the management of the Medical and Health Department) for the year 1899, including every item of expense, amounted to Rs.40,164·16.

Those pauper inmates of the Barkly Asylum who are able to do some light work, such as cleaning the garden, sewing, &c., are bound by the regulations to do so. (*Vide* Part V. of the Poor Law Commissioners' Annual Report for 1899.)

POOR HOUSES.

(1.) *The Convent Branch Infirmaries.*

In addition to the Barkly Asylum there are throughout the Colony six Convent branch infirmaries or asylums, namely:—

(*a*) One at Rempart Street, into which 151 old and infirm paupers were admitted in 1899; 39 were discharged, 62 died, and the number remaining on the 31st December amounted to 50.

(*b*) The second at Belle Rose, Quatre Bornes, into which 156 infirm paupers were admitted; of these 40 were discharged, 29 died, and the number remaining on the 31st December amounted to 87.

(*c*) The third at Pamplemousses, into which 101 infirm paupers were admitted; of these 17 were discharged and 44 died, the number remaining on the 31st December amounted to 40.

(*d*) The fourth at Calebasses, into which 206 infirm paupers were admitted in 1899; of these 51 were discharged and 43 died, the number remaining on the 31st December, 1899, amounted to 112.

(*e*) The fifth at Chemin Grenier, Savanne, in which 12 infirm paupers were maintained during the year 1899; of these two were discharged and none died, and the number remaining on the 31st December, 1899, amounted to 10.

(*f*) The sixth at St. Julien, Flacq, at which 11 infirm paupers were maintained during the year 1899; of these none were discharged and one died, and the number remaining on the 31st December, 1899, amounted to 10.

The cost of maintenance of these branch infirmaries for 1899 amounted to Rs.40,499·23.

(2.) *The St. Lazare Leper Asylum.*

There is also the leper asylum (St. Lazare) in the district of Port Louis, into which 202 pauper lepers were maintained in 1899; 29 were discharged, 24 died, and the number remaining on the 31st December amounted to 149.

The amount paid by the Government for the maintenance and treatment of pauper lepers at St. Lazare during the year 1899 was Rs.36,141·44.

(3.) *Convent Orphanages.*

Pauper orphan children are also maintained in the several Convent orphanages at the expense of the Poor Law Commission.

(*a*) At Rempart Street, 43 were admitted in 1899; 14 were discharged, one died, and 28 were at the institution on 31st December.

(*b*) At La Paix Street, seven were admitted, of whom none were discharged or died.

(*c*) At Canal Street, 20 were admitted; two were discharged, one died, and 17 were remaining on 31st December, 1899.

(*d*) At Grand Port six were admitted, of whom none were discharged or died.

(*e*) At Moka seven were admitted, of whom none were discharged or died.

The sum paid by the Government for the maintenance of pauper orphans in these several Convent orphanages during 1899 amounted to Rs.4,966·51.

POOR LAW RELIEF AND CHARITABLE GRANTS.

Poor Law relief is granted by the Poor Law Commissioner, as follows:—

1. To the sick poor and their families.
2. To old and infirm paupers and their families.
3. To pauper lunatics and their families.
4. To children whose parents are paupers.
5. To orphan children.

Such relief consists of rice, money, medical assistance, medicine, and medical comforts (fresh beef, bread, wine, milk, &c.).

The sum expended for relief in cash and rice for the year 1899 amounted to Rs.29,082·54.

Small pecuniary grants are also made from the Governor's charitable allowance fund, through the Poor Law Commissioner, and these grants constitute a great boon to the poor, who are thus afforded the means of buying clothes, paying arrears of house rent, &c.

The sum paid for these charitable grants during the year 1899 amounted to Rs.2,609·65.

The total expenditure of the Poor Law Department for the year 1899 amounted to Rs.193,166·31, against Rs.202,421·87 for the preceding year, showing a decrease of Rs.9,255·56.

There has been a total decrease of 14,168 persons relieved during the year 1899 as compared with the preceding year.

INCREASE OR DECREASE OF POVERTY.

Poverty is, nevertheless, tending gradually to increase in Mauritius, and more especially in Port Louis.

The system of Poor Law Relief adopted is, however, open to criticism, as the labour test is rarely applied. The effect being that pauperism is in many cases encouraged, and that persons who are undeserving receive relief. But the extreme poverty of the lower classes in Mauritius and their debilitated condition, a condition promoted by poverty and malaria, renders it extremely difficult to apply the labour test on a large scale. The whole question of Poor Law relief is at present under the consideration of the Government.

REFORMATORY.

MAURITIUS, 1899.

During the year 1899 there were altogether 301 boys in the reformatory. The daily average was 81·4, and amongst these there was an average of 5·21 sick. There were no deaths. The occupation and instruction of the boys was the same as in the year 1898, and the same remarks apply. The reformatory is a boys' prison rather than a reformatory. The boys do not stay long enough to permit of any genuine work in the way of reform, whilst the classification and separation of the hopeful cases from the more vicious and hopeless cases is not possible under the existing system. It is hoped that under the new Education Ordinance, which will take practical effect after the arrival of the new Director of Public Instruction, this matter will receive attention.

SAVINGS BANK.

The amount deposited in 1899 was Rs.1,000,142. This amount compared with the deposits of 1898 shows an increase of Rs.131,368, the deposits in 1898 being Rs.868,774.

The amount withdrawn in 1899 was Rs. 988,628, showing a decrease on the preceding year of Rs.108,119, the sum withdrawn in 1898 being Rs.1,096,747.

The total sum standing to the credit of depositors, at the end of 1899, including the interest due to them, was Rs.2,885,942·01.

Of this sum Rs.1,297,969 belonged to the Indian population, showing an increase of Rs.44,176 on the preceding year.

The number of depositors increased from 24,226 in 1898 to 24,784 in 1899; of these 10,454 were of the Indian population, being an increase of 81 on the previous year.

VI.—JUDICIAL STATISTICS.

POLICE.

The total effective strength of the police force, as allowed by Government, was 709 on the 31st December, 1899; the actual strength, however, was 706 (the force having been reduced to the strength laid down in Schedule A of Ordinance No. 16 of 1893, *i.e.*, 708, plus one 1st class constable taken on).

The nationalities of these 706 men were 18 in number, and composed of 41 Europeans, 493 natives of Mauritius, 159 Indians, one Arab, two Americans, one Australian, one New Zealander, one native of British Guiana, two of Cape of Good Hope, one of Madagascar, and four of Reunion Island.

Eighty-one constables were enlisted during 1899, of whom 11 were dismissed as unlikely to make efficient constables. The total number of dismissals during the year was 27.

Two hundred and thirty-one sub-officers and constables were in possession of the silver and bronze good-conduct medals on the 31st December, 1899.

PRISONS.

There are two prisons in Mauritius, which are distinct from the police "lock-ups."

The Port Louis prison is used for prisoners waiting trial and for prisoners after sentence waiting transfer to the central prison at Beau Bassin.

Of the two, the Port Louis prison, though the older and inferior prison, is the healthier.

The Beau Bassin prison, though an admirable prison, built on the best English model, with spacious yards and grounds, all well kept, has hitherto proved to be unhealthy. The prevailing diseases being dysentery and malarial fever.

Efforts have been made to trace these diseases to their cause and various improvements have been effected. The surface drainage has been put in thorough repair, verandahs have been added to the prison hospitals, and shelter sheds have been erected to protect the prisoners whilst at work.

But nevertheless the sickness continues, and orders have been given to fill in all holes in the neighbourhood of the prisons that hold water after rain. The bush or jungle in the neighbourhood of the prisons is being cleared, and orders have been issued to take greater precautions in regard to the drinking water used by the prisoners whilst working on the roads.

Additional precautions are being enforced to prevent the contamination of the Mare aux Vacoas water in the prison itself. This water supply if not contaminated is perfectly healthy and free from all injurious matter.

The following is a return of Admissions, Discharges, total Aggregate of Prisoners, Daily Average under Detention, Deaths, and Percentage of Deaths on average daily number in the Mauritius Prisons:—

Prison.	1899.															No. of Deaths.	Ratio per cent. of Deaths.

CRIMINAL STATISTICS.

The following are the Criminal Statistics for the year 1899:—

(1.) *Offences.*

Table showing the number of offences reported to the Police or to the Magistrates during 1899:—

Total No. of Offences reported.	Offences against the Person.	Prædial Larceny.*	Offences against Property other than Prædial Larceny.†	Other Offences.
21,585	1,428	288	2,723	17,146

* By "Prædial larceny" is meant the offences, prevalent in sugar-growing and coolie-importing colonies, of robbing provision grounds and homesteads.

† Including both offences against rights of property and injuries to the subjects of property.

(2.) *Apprehensions and Summonses.*

Table showing the number of persons brought before the Courts of the District and Stipendiary Magistrates of Mauritius, by arrest or summons, for offences, and how their cases were disposed of in the Magistrates' Courts during 1899:—

—	Number discharged for want of prosecution by party complaining, or for want of evidence.	Number of persons whose cases were dismissed on the merits.	Number of persons summarily convicted.	Number of persons committed for trial at the Assizes.
Offences against the person	263	390	817	48
Prædial larceny	10	41	252	—
Offences against property* other than prædial larceny.	1,095	343	1,326	17
Offences against the law relating to masters and servants, including Acts relating to indentured coolies.	881	113	1,867	—
Other offences	835	778	13,554	—
Total number of persons summoned or apprehended.	3,084	1,665	17,816	65

NOTE.—Purely civil cases in which Magistrates exercise jurisdiction are not included in this table.

* Including both offences against rights of property and injuries to the subjects of property.

(3.) *Summary Convictions.*

Table showing the number of convictions by the District and Stipendiary Magistrates of Mauritius for various classes of offences, and the punishments inflicted during 1899 :—

Punishment.	Total number of offences.	Assault and other offences against the person.	Malicious injuries to property.	Prædial larceny.	Offences against property other than malicious injuries to property or prædial larceny.	Offences against the laws relating to revenue, highway, health, and other laws relating to the social economy of the Colony.	Offences against the law relating to masters and servants, including acts relating to indentured coolies.	Other offences.
Fine and conviction for non-payment of wages ...	12,094	396	4	150	61	9,554	256	1,673
Imprisonment in lieu of fine or surety	1,580	118	5	19	17	1,224	48	149
Detention at reformatory in lieu of imprisonment ...	178	5	1	6	86	28	16	36
Peremptory imprisonment	3,741	277	87	77	1,065	54	1,345	836
Prolongation and cancellation of contracts	202	—	—	—	—	—	202	—
Bound over with or without sureties to keep the peace	21	21	—	—	—	—	—	—
Total	17,816	817	97	252	1,229	10,860	1,867	2,694

NOTE.—Where there has been an appeal from the Magistrate's decision, the case is entered as finally decided, and not necessarily according to the Magistrate's original decision.

MAURITIUS, 1899.

2. In the Supreme Court ...	3	19	4	13

VII.—VITAL STATISTICS.

POPULATION.

On the 31st December, 1899, the resident population of the Colony was 379,659. The troops of the garrison here have, however, been excluded, as well as the crews of all non-Colonial ships temporarily anchored in the harbour.

When the last census was taken, *i.e.*, on the 6th April, 1891, the total population, not including military and shipping, was estimated at 370,588 persons, so that the population of the Colony has increased by 9,071 during the last nine years, or an average of a little over 1,000 yearly. This increase is mainly—if not solely—due to an excess of births over deaths.

The total population is divided into two section:—The "General" and the "Indian."

The General population numbered 117,920; the Chinese residents, numbering 3,079, have been included therein.

The Indian population numbered 261,739, or over two-thirds of the total population of the island.

The Indian population is classified under two heads, viz., Immigrants" and "Indo-Mauritians."

"Immigrants" comprise all Indians who have emigrated to this Colony under contract of service, and are either still under engagement or have settled here.

"Indo-Mauritians" include Indians born in this Colony and all Indians other than immigrants.

The immigrants numbered 62,387, and the Indo-Mauritians 199,352.

In the whole population, without distinction of race, the males predominate, the proportion being 1,133 males to 1,000 females.

PROPORTION OF BIRTHS AND DEATHS.

Births.—There were 13,889 births in 1899, or 185 more than in the previous year.

The birth rate in the total population was 34·1 per 1,000. In the general population it was 34·14, and in the Indian population 37·79 per 1,000.

The birth rate of Port Louis in 1899 was below that of Madras, but above that of Bombay.

The birth rate varied in the different districts of the island from a minimum of 29·9 per 1,000 in the district of Black River to a maximum of 42·0 per 1,000 in the district of Riviere du Rempart.

The proportion of illegitimate births was 64 per cent. of the whole number of births. This high rate is due to the existing laws, which provide that, unless the Indian population marry legally, their children are declared as illegitimate.

In the general population 36·1 per cent. and in the Indian population 75·7 per cent. were illegitimate; 22·8 per cent. of the illegitimate births in the general population were not acknowledged by the father, and only 4·5 per cent. in the Indian population.

The proportion of still births to live births in 1899 was 75·8 per 1000.

Deaths.—There were 13,222 deaths in 1899, or an increase of 1,158 on the previous year.

This gives a death rate of 34·8 per 1,000, as against 31·9 in 1898. The difference being due to plague.

The death rate was lower in the Indian population (34·2) than in the general (36·0) population, and the death rate of the male population (35·8) was slightly higher than that of the female (33·6).

The death rate of Port Louis in 1899 (65·7) was below that of Bombay (68·6), but above that of Madras (38·3).

There is considerable variation in the death rates of the Colony with reference to the localities. The mortality in Port Louis is always the highest, and far above that of the whole island, and, in this year, the plague has much increased its average rate.

The death rates of the different districts for 1899 and for the preceding year were as follows:—

Districts.	1898.	1899.
Port Louis	48·5	65·7
Pamplemousses ...	34·1	36·9
Riviere du Rempart ...	25·1	26·7
Flacq	31·1	27·9
Grand Port	29·9	29·5
Savanne	20·7	27·9
Plaines Wilhems ...	30·9	31·0
Moka	26·8	25·8
Black River	29·9	33·3

The only districts in which an improvement is noticeable are Flacq and Moka.

Forty-seven per cent. of the total number of deaths in 1899 were due to zymotic diseases, a reduction of 21 per cent. as compared with the preceding year.

Fifty-five deaths were registered as having occurred amongst the troops stationed here.

In 1898 there were only 18 deaths, but during the year under review the strength of the garrison was increased from 1,710 to 2,550.

Estimated population on the 1st January, 1900, compared with figures of last census:—

Districts.	Census of 1891.	Population on 1st January, 1900.	Increase.	Decrease.
Port Louis	62,169	52,517	—	9,652
Pamplemousses ...	38,547	37,559	—	988
Riviere du Rempart ...	24,151	27,648	3,497	—
Flacq	56,734	60,154	3,420	—
Grand Port	48,169	51,042	2,873	—
Savanne...	34,977	37,154	2,177	—
Plaines Wilhems ...	57,591	62,195	4,604	—
Moka	32,552	36,138	3,586	—
Black River	15,698	15,252	—	446
Total	370,588	379,659	20,157	11,086

Net increase, 9,071.

Showing a migration from Port Louis, Black River, and Pamplemousses, the unhealthy districts, to the more healthy districts.

GENERAL STATE OF PUBLIC HEALTH.

As the plague epidemic is a matter of very general interest and was the most important event of the year, it will be dealt with under a separate heading of this Report, and the space usually devoted to "General Observations" will be assigned to an account of the plague in Mauritius.

But apart from plague the Colony was free from any epidemic disease during 1899. Influenza, formerly epidemic, is now endemic to the Colony, and showed a slight increase, the figures being 783 for 1899, as against 726 for 1898. Malaria and dysentery showed a slight decline. Tuberculosis is gradually increasing. Poverty, which is, unfortunately, widespread, and the insanitary conditions incidental to poverty, favour the spread of this disease.

Were it not for the poverty prevailing among the lower classes, congregating in certain quarters of Port Louis and in large villages, the sanitary conditions of these places would not, by themselves, cause half the recorded mortality.

The drainage of our principal towns remains exceedingly defective. In Port Louis, a great improvement has been effected in the eastern suburb by the completion of the canalization of a filth-carrying open sewer, called the Ruisseau La Paix.

Sanitary measures, having in view improved surface drainage, have also been carried out in different sections of the town of Port Louis, concurrently with other measures of sanitation, undertaken to check the spread of plague, but a great deal yet remains to be done in that direction.

In the western suburb the underground drainage works have been continued, and several large establishments, such as the new Civil Hospital, Central Railway Station, and some private premises, have already been connected with the underground pipes, which carry the sewage out to sea.

The drainage of the other chief townships (Curepipe, Beau Bassin, Rose Hill, and Quatre Bornes) and other populous places is still very far from satisfactory, in spite of the yearly sums expended for that object. The solution of this sanitary question, which has long engaged the attention of the Sanitary Department, is becoming more and more pressing.

The water supply of all chief towns and populous localities, with the exception of those provided for by the Mare aux Vacoas, cannot be described as satisfactory. Indeed, in certain places, it is harmful, as being one of the chief factors in the propagation of all water-borne diseases.

In the dry season it is frequently deficient in many localities, while in the rainy season dilute sewage is supplied to some, among which may be included the principal town, Port Louis.

River waters of the description available in this Colony are specially polluted. Even the palliative—in the shape of sewage pollution being got rid of by the length of flow, by oxidation and

MAURITIUS, 1899.

other combined agencies—is but freely present, inasmuch as points of contamination may be said to exist all along their course.

Two filters of the Magnien type have lately been provided for by the Municipal Corporation of Port Louis. They are erected in public squares, but the water yielded is, in the first place, of far too limited quantity to serve the needs of a population of 54,000 souls, while, in the second place, the filtered water is but sparingly made use of by the population in whose immediate vicinity the filters exist.

This is not to be wondered at, having in view the mode of life of Orientals, and of a population which has still to be educated in sanitary matters.

The public mind in this Colony has yet to grasp the fact that disease is largely preventable.

Poverty and debility tend to produce a state of mind which may be described as one of resignation, but may also be described as apathetic.

Enteric fever is extending its area, and attacks the better class, especially newly-arrived Europeans.

* *Absolute* not *mean* values.

† Mean of 6 + 15 h.

Cyclones occurred on January 4 to 9, March 3 to 9, and December 9 to 22.

CLIMATE.

(1.) *Rainfall.*

The rainfall at Mauritius varies from about 150 inches at Midlands in the district of Plaines Wilhems to 35 inches at some coast stations in the Black River district. It is much greater on the eastern side of the central watershed than at stations of the same altitude on the western side.

At the Observatory (181 feet above sea level) the total rainfall in 1899 was 42·82 inches, or 3·54 inches below the average for the last 25 years, while at Curepipe (1,840 feet above sea level) it was 124·94 inches, or 4·20 inches below the average for the last 16 years. The mean rainfall, from observations at 68 stations, was 76·80 inches, against an average of 79·23 inches.

(2.) *Temperature.*

The mean annual temperature varies from 67° on the high grounds of Plaines Wilhems to 76° at sea level. The following table gives the means and extremes at the Observatory and Curepipe for 1899:—

—	Observatory.	Curepipe.
Temperature in shade:—		
Mean	73·7	67·4
Mean maximum...	79·3	73·4
Mean minimum...	68·8	61·4
Absolute maximum	92·0	83·0
Absolute minimum	54·7	44·3
Temperature in sun's rays:—		
Mean maximum...	139·2	135·4
Absolute maximum	158·2	155·2
Relative humidity:—		
Mean	75·0 °/₀	89·0 °/₀
Maximum	96·2 °/₀	100·0 °/₀

(3.) *Wind.*

The prevailing direction of the wind at the Observatory is from east by south, with an annual variation of nearly 29°; it is most southerly in June—south-east by east, nearly—and most northerly in December, blowing in this month from due east.

There is also a diurnal variation of 19°.

The mean velocity of the wind is 11·2 miles per hour, with an annual variation of 2·4 miles; the greatest mean hourly velocity occurs in August—12·4 miles—and the least in March—10·0 miles. The mean diurnal variation is 7·7 miles.

In 1899 the mean direction of the wind was east by south; the mean hourly velocity 11·0 miles; the greatest hourly velocity 43·5 miles, on March 6th.

VII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL SERVICE.

The postal service is carried on at the General Post Office in Port Louis, and at 59 offices in the districts.

The mails are conveyed from town, and between the district offices, chiefly by rail.

At seven of the offices foot-messengers and conveyance carry the mails between the district office and the nearest railway station.

Inland money orders are issued at all district offices.

The delivery of letters to their addresses is made by letter carriers in all the sections of the town, and at all the principal district offices, viz., Curepipe, Curepipe Road, Forest Side, Vacoas, Quatre Bornes, Rose Hill, Beau Bassin, Mahebourg, Souillac, Pamplemousses, Argy, Moka, and St. Pierre. In these localities the correspondence is delivered within a radius of one mile from the office.

TELEPHONE SERVICE.

The telephone service is in the hands of a private company.

TELEGRAPH SERVICE.

The telegraph system of the Colony covers 102 miles of ground and consists of 314 miles of wire.

There are 52 telegraph offices, worked by post office telegraphists, and two offices by military operators on their own ground, but in communication with the post office wires.

The central telegraph office is in Port Louis. Besides the ordinary postal telegrams for Government, the military, and the public, the post office transmits all railway telegrams.

The cost of wiring a message from any station to another is 25 cents for 20 words, exclusive of the addresses of the sender and receiver, which are free up to 10 words.

The delivery of telegrams is either by foot-messenger and costs 25 cents for one mile and under for distances up to two miles, or at 38 cents per mile by conveyance if beyond two miles.

The number of telegrams transmitted in 1899 was as follows:—

For the public	22,317
For the Government, including military ...	10,779
For the railway	24,524
For the telegraph service	4,932
Total	62,552

IX.—MILITARY EXPENDITURE.

The Imperial military garrison of Mauritius numbered 2,547 of all ranks on the 31st December, 1899.

The European regiment, the 2nd King's Own Yorkshire Light Infantry, was despatched to South Africa in H.M.S. "Powerful" on the 6th October, 1899.

The total cost of the garrison was £132,168, to which the Colony contributed £20,855.

X.—MISCELLANEOUS.

PLAGUE.

In view of the universal importance of the plague question, it has been thought well to devote the space usually allotted to miscellaneous subjects to a brief account of the plague epidemic in Mauritius. A full and scientific account of the plague epidemic will be found in the Annual Report of the Acting Medical Director, Dr. Lorans, and persons desirous of acquiring complete information on the subject are referred to that Report. The space available does not permit of more than the briefest possible summary from the popular and unscientific point of view.

The first suspected case of plague in Mauritius—a case which was not diagnosed as such at the time—occurred on the 26th December, 1898.

The first recognised case of plague was detected on the 27th January, 1899, and there were altogether 1,416 cases of plague diagnosed as such during the year. A considerable number of cases, probably about 300 altogether, must have escaped diagnosis, but it is impossible to give more than a very rough estimate of the unrecognised cases. It may be, however, observed that, from the point of view of preventive measures, the unrecognised cases are of the highest importance, and that from the first the necessity of accurate diagnosis in the case of all suspected cases of illness or death was present to the mind of the officers who were conducting the plague campaign.

The first question that suggests itself is, "How was the plague introduced into Mauritius?" Very careful enquiries have been made with a view to supplying an answer to this question, but without any satisfactory result. All that can be said is that it was probably introduced from Madagascar, where it had existed for several weeks in 1898 before it was recognised.

The plague began in Mauritius, in a part of the town of Port Louis, known as Camp Yoloff, and amongst people who were known to have dealings with Madagascar. From there it spread gradually over the town—the progress resembling an irregular wave of disease spreading slowly but steadily outwards, and leaving as it passed a healthy space behind it.

It also invaded the country districts following the main lines of trade and communication. That is to say, the ports that were infected were probably infected by coasters, whilst the sugar estates and townships probably received the infection either from goods received from the ports by road or from the town of Port Louis by rail.

Rats were, as is usual, the principal plague carriers, but the disease was also carried by dirty clothing, dirty linen, &c. There were not, so far as is known, any cases of direct infection from the persons of plague patients, and no case of plague occurred amongst the nurses or doctors who were in constant attendance on the plague patients.

A remarkable illustration of the non-contagious character of the disease is afforded by the fact that one of the sisters of mercy employed in nursing the plague patients was actually bitten in the hand by a delirious plague patient, receiving a wound about an inch long, but she did not contract plague.

The measures taken to combat the disease were:—

1. Evacuation of infected houses, at first accompanied by segregation, but segregation, except in the case of contacts, was subsequently abandoned as useless.

2. Complete disinfection of all infected houses with their contents, and incineration of houses that were incapable of proper disinfection.

3. Destruction of rats—a rat fence was tried, but was useless. It was probably tried too late, *i.e.*, after the disease had already crossed the line chosen for the fence.

4. Inoculation with Haffkine's liquid. Captain Stevenson, I.M.S., reports that the results of inoculation with Haffkine's liquid gave a case incidence protection of over 70 per cent., and a mortality incidence protection of over 20 per cent.

These figures must be regarded as approximate only, for the conditions were not favourable for the collection of exact data.

5. General sanitation and a cleaning up of all towns, villages, and houses. Over 1,500 houses were cleaned in one way or another in Port Louis alone.

6. The enactment of special laws to guard against the dangers of mistaken diagnosis and to secure a verification of the cause of death. The disinfecting staff and the medical officers, as well as all other officers who visited the infected localities, were disinfected either on the spot or immediately on their return from the duty on which they had been engaged, and special constables were employed to guard infected localities and to prevent the entrance of any person not on plague duty.

The plague hospitals were kept clean and well ventilated. All possible precautions were observed, and the plague hospitals were never at any time sources of infection.

The treatment consisted in complete rest, with stimulants and tonics, including alcohol, digitalis, cafeine, &c. Yersin's serum was tried with doubtful results as a curative, though it seems to have given admirable results as a prophylactic.

The epidemic was at its height during the months of July, August, September, and October, and began to die down in November and December.

Sporadic cases have occurred in 1900, but the disease has not as yet (July, 1900) assumed an epidemic form. In any case, the island is better prepared to deal with an epidemic than in 1899, for the experience already gained by the medical profession and the public has been most valuable.

An incidental result of the measures adopted to combat plague has been an improvement in the general health of the population. This improvement is very marked, especially in Port Louis.

GRAHAM BOWER,
Colonial Secretary.

9th July, 1900.

RODRIGUES, 1899.

RODRIGUES.

The island of Rodrigues is a dependency of Mauritius, administered by a magistrate. In 1899 the Revenue amounted to Rs.18,658 and the Expenditure amounted to Rs.25,357.

The Revenue is mainly derived from direct taxation, such as licences, lease of Crown lands, &c.

The island is policed by two non-commissioned officers and six constables, at a cost of Rs.4,040. In 1899 27 persons were committed to prison. There are two Government schools on the island, which cost Rs.2,701. The average attendance was 80 boys and 78 girls.

Eighteen men and seven women received Poor Law relief.

The total population consisted of 1,595 males and 1,275 females, giving a total of 2,870 souls.

The births were 81 males and 88 females.

The deaths were 19 males and 12 females.

Sixty-two marriages were celebrated.

Nearly all the population are of African descent, though there are a few Indians and Chinamen on the island. Tobacco is a growing industry, but the tobacco cannot be said to be well cured.

The place is healthy, and were it not for its distance and isolation, would furnish attraction to sportsmen. At present the deer and Guinea fowl are left to the poachers, on account of the want of superintendence.

Rodrigues will shortly become important as a telegraph station.

GRAHAM BOWER,
Colonial Secretary.

9th July, 1900.

The Revenue of 1900, compared with 1899, shows an increase of	Rs. 113,661

The principal increases in 1900 being on Railways and Excise duties, and the principal decreases on Customs, Post Office, Telegraphs, Interest, and Miscellaneous Receipts.

The Expenditure of the year 1900 was in excess of that of 1899 by Rs. 161,710. The principal items of ordinary Expenditure affected by the increase being item 32, Military Contribution, and item 33, Railways.

The plague expenditure of the year showed a decrease of Rs. 223,373.65 as compared with that of the previous year.

In 1899 it was	Rs. 562,413.53
In 1900 it was	339,039.88
Decrease	223,373.65

From the above return, for the five years preceding 1900, it will be seen that the Revenue realized in 1900 is the largest, it is also the largest since 1882, when it was Rs. 9,551,635; this is due to the large crops realized in 1898 to 1899, and 1899 to 1900, and 1900 to 1901; the crop of 1900 to 1901 being one of the largest ever reaped in the island.

The prospects of the coming year 1901 to 1902 are favourable, owing to abundant rains having fallen in the beginning of the year. Though not so good as last crop, it is expected that, owing to the larger extent of land brought under cultivation by small peasant proprietors, which will be harvested this year, the crop will yield at least 170,000 tons, and the estimates for 1901-1902 have been based on that expectation.

TAXATION.

The principal changes introduced in the laws relating to taxation in 1900 were as follows:—

1. The Branch Roads Ordinance No. 9 of 1900, by which Ordinance a fund was created in each district, exclusive of Port Louis and townships, and placed under the administration of a District Board of Commissioners for the making, altering and repairing of branch roads.

This Ordinance provides for a local tax in each district of 10 per cent. to be levied in each year in each district, exclusive of Port Louis and townships, as an addition to the direct taxes on vehicles and animals.

This tax may, on the recommendation of the Branch Roads Boards, and with the approval of the Governor in Executive Council, be raised by additional percentages up to 25 per cent. of such direct taxes.

MAURITIUS AND RODRIGUES, 1900.

EXPENDITURE—*continued.*

Heads of Service.	1899.	1900.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Brought forward ...	5,751,535.30	5,254,094.96	172,287.23	669,727.57

Drainage works ...	30,029.69	28,257.67	—	1,772.02
Secret Service	—	10,650.00	10,650.00	—
Plague Services ...	—	339,039.88	339,039.88	—
Total ...	8,407,227.10	8,568,943.91	837,115.00	675,398.19

The main increases are due to the purchase of a new steam tug, and to the expenditure on railway material and maintenance.

The railways of the Colony, which have necessarily been starved during the years of financial distress, claimed the first attention as soon as the finances permitted the disbursement of the necessary expenditure. They cannot yet be said to be in a completely satisfactory condition, but when all outstanding indents have been executed they will be in an efficient condition and able to deal with the increasing traffic.

EXPENDITURE.

The following is a Comparative Statement of the Expenditure for the years 1899–1900:—

MAURITIUS
AND
RODRIGUES,
1900.

REPORT ON THE MAURITIUS BLUE BOOK FOR THE YEAR 1900.

I.—FINANCIAL.

The following is a Comparative Statement of the heads of Revenue for the years 1899-1900:—

Heads of Revenue.	1899.	1900.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Customs	3,465,082.58	3,399,514.96	—	65,567.62
Port, harbour, wharf, and lighthouse dues.	193,026.90	191,145.52	—	1,881.38
Licenses, excise, and internal revenue not otherwise classified.	2,505,974.39	2,672,059.43	166,085.04	—
Fees of court or office, payments for specific services, and reimbursements in aid.	202,705.32	215,276.64	12,571.32	—
Post Office and telegraphs.	134,403.25	114,660.85	—	19,742.40
Government railways...	1,876,302.95	1,995,015.87	118,712.92	—
Rent of Government property.	56,895.46	54,769.75	—	2,125.71
Interest...	539,429.46	484,875.75	—	54,553.71
Miscellaneous receipts	90,165.64	51,054.77	—	39,110.87
Land sales	2,327.44	1,601.76	—	725.68
Total ...	9,066,313.39	9,179,975.30	297,369.28	183,707.37

Deduct decrease 183,707.37

The receipts of 1900 show an increase on 1899 of Rs. 113,661.91

The increases in the foregoing table are mainly due to increased prosperity due to a good sugar crop. The decreases are, in respect to the largest item, Customs, due to reduced taxation on imports.

MAURITIUS AND RODRIGUES, 1900.

POPULATION.

7. The summary results of the recent census show the population to be as follows:—

Population.	1891.	1901.
General	114,668	118,904
Indo-Mauritian ...	156,591	190,027
Other Indians ...	99,329	71,109
Total	370,588	380,040

The transition of property into the hands of the Indian population, to which I have often invited attention, is steadily progressing. During the year 1900 they acquired real property to the value of Rs. 1,980,413, including property to the value of Rs. 358,222 in the town of Port Louis and Rs. 1,622,191 in the country districts. During the quinquennial period 1896 to 1900 inclusive they acquired real property to the value of Rs. 9,084,490, including property to the value of Rs. 1,705,369 in Port Louis and Rs. 7,379,121 in the country districts. The Protector of Immigrants estimates the value of the real property acquired by Indians since the year 1864 at Rs. 24,159,945, of which amount sales to the value of Rs. 8,519,676 were registered during the period 1888 to 1894 and Rs. 10,297,509 during the period 1895 to 1900. In addition to their large investments in real property, the Indian population held deposits in the Savings Bank, at the end of the year 1900, to the amount of Rs. 1,363,708, an increase of Rs. 65,740 over the deposits held by them on the 31st of December, 1899.

I have, &c.,

CHAS. BRUCE,

Governor.

MAURITIUS AND RODRIGUES, 1900.

The decreased value of imports under the head of Live Animals, Food, Drink, and Narcotics is chiefly due to a decrease of 20,895,222 kilos. of rice, of the declared value of Rs. 1,872,104, as compared with 1899. This was the consequence of the rice supply having been allowed to run very short during the last months of the year; and the imports of the current year will show a corresponding increase. The importation of live animals has been seriously affected by the diminished imports of cattle from Madagascar, hitherto our main source of supply. Arrangements for the establishment of cold storage to insure the regular supply of meat have been for some time under consideration, and will, it is hoped, be very shortly completed. The trade relations between this Colony and Madagascar and Réunion have of late been seriously disturbed. To the difficulties opposed to the trade of Mauritius by the protective policy of the Government of Madagascar, the epidemic of plague has added a fresh obstruction, and Madagascar ports are practically closed to our local produce. An outbreak of cattle plague in Réunion has reduced our imports from that Colony.

PRISON POPULATION.

6. In the year 1898 I had occasion to inform you of the grave anxiety I entertained respecting the enormous prison population of the Colony, and especially the prisoners convicted by the Stipendiary Courts under the provisions of the labour laws. It is, therefore, with satisfaction that I extract the following figures from the prison statistics for the year:—

CONVICTED PRISONERS RECEIVED from the DIFFERENT COURTS.

Year.	Supreme Court.	District and Police Courts.	Stipendiary Courts.	Other Courts.	Total.
1896	26	4,131	2,282	64	6,503
1897	42	4,872	2,805	35	7,754
1898	50	4,843	3,069	24	7,986
1899	24	3,247	2,202	13	5,486
1900	20	3,011	1,816	48	4,895

I regret, however, to have to add that the prisons have supplied a new source of anxiety in a large increase of sickness and mortality. This is forming the subject of an exhaustive enquiry.

SANITATION.

4. Following on the series of adverse circumstances which a few years ago affected the Colony, and culminated, in 1898, in an acute financial crisis, from the consequences of which the Colony had hardly recovered, came a visitation of plague, which broke out early in 1899, and having attained its maximum energy in the month of October, 1899, remained nearly dormant during the months of February to July, 1900. In August, however, a fresh outbreak occurred, and continued to the end of the year. The pressure of immediate financial difficulties having been happily overcome, the visitation of plague, followed, unfortunately, by a recrudescence of malarial fever, has made the question of sanitation the first concern of the Government. During the year 1899 various tentative measures of legislation to meet emergencies provoked by the plague were enacted, and in 1900 these measures were consolidated and amended in accordance with the knowledge acquired by practical experience. The Sanitation Consolidating Ordinance, 1900, was the principal act of legislation of the year, and it is mainly to purposes of sanitation that the Government is devoting all the resources made available by the improved financial position of the Colony, so far as they can prudently be disposed of. In accordance with the recent discoveries of scientific enquiry into the agencies of the propagation of disease, particular attention is now being devoted to the measures best adapted to combat the propagation of plague by rats, and of malaria by mosquitoes.

TRADE.

5. The natural consequence of the abundant sugar crops of the last two years has been that the trade returns for 1900 show an increase in the aggregate, as compared with 1899, both in the value of exports and imports. The declared value of the produce and manufactures of the Colony exported in 1900 was Rs. 30,982,673, against a declared value of Rs. 24,440,609 in 1899. The value of imports for 1900, compared with 1899, is shown in the following table:—

Items.	1899.	1900.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
Live animals, food, drink, and narcotics.	11,919,260	10,186,061	—	1,733,199
Raw material	1,011,947	787,508	—	224,439
Manufacture and miscellaneous articles.	6,165,006	7,302,791	1,137,785	—
Coin, bullion, and specie...	1,092,898	4,534,418	3,441,520	..
Total	20,189,111	22,810,778	4,579,305	1,957,638

MAURITIUS
AND
RODRIGUES,
1900.

No. 335.

MAURITIUS AND RODRIGUES.

(For Report for 1899, *see* No. 302.)

GOVERNOR SIR CHAS. BRUCE to MR. CHAMBERLAIN.

Government House,
Mauritius,
August 19th, 1901.

SIR,

I have the honour to transmit herewith the Blue Book of Mauritius for the year 1900, together with the usual Report of the Colonial Secretary, Sir Graham Bower, K.C.M.G.

2. That which is of principal local or general interest in the record of the year may be briefly summarised.

FINANCIAL.

3. The Revenue of the year amounted to Rs. 9,179,975, and the Expenditure to Rs. 8,568,943. The Revenue exceeded the Expenditure by Rs. 611,032, and exceeded the Revenue of the year 1899 by Rs. 113,661, *notwithstanding that* an emergency tax, in the shape of a surcharge of 10 per cent. imposed on all duties on Customs during the year 1899, ceased to be collected from the 1st January, 1900. The surplus funds of the Colony amounted on the 31st December, 1900, to Rs. 1,704,424, as compared with Rs. 1,077,715 at the close of the year 1899, and Rs. 438,866 at the close of the year 1898. This satisfactory position of the Colonial finances, administered since 1897 with rigid economy, reflected the fortunes of the sugar industry. In 1897 the export of sugar amounted to 138,080 tons, of the declared value of Rs. 22,310,483; in 1898 to 154,549 tons, of the declared value of Rs. 24,727,688; in 1899 to 164,912 tons, of the declared value of Rs. 23,044,656; and in 1900 to 174,766 tons, of the declared value of Rs. 28,836,354.

The surplus funds of the Colony are liable for a contingent charge for renewal of railway plant and rolling stock, and it has been decided to appropriate a part of the balances to harbour improvements.

COLONIAL REPORTS.

The following, among other, reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

ANNUAL.

No.	Colony.	Year.
314	Hong Kong	1899
315	Southern Nigeria...	1899–1900
316	Grenada	1899
317	Jamaica	1899–1900

COLONIAL REPORTS—ANNUAL.

No. 335.

MAURITIUS AND RODRIGUES.

REPORT FOR 1900.

(For Report for 1899, see No. 302.)

Presented to both Houses of Parliament by Command of His Majesty.
October, 1901.

LONDON:
PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY DARLING & SON, LTD., 34-40, BACON STREET, E.

And to be purchased, either directly or through any Bookseller, from
EYRE & SPOTTISWOODE, EAST HARDING STREET, FLEET STREET, E.C.,
and 32, ABINGDON STREET, WESTMINSTER, S.W.;
or OLIVER & BOYD, EDINBURGH;
or E. PONSONBY, 116, GRAFTON STREET, DUBLIN.

1901

[Cd. 788-5.] *Price 3d.*

EXPORTS (exclusive of shipping charges).

Sugar.

In 1900 sugar was kilos. 174,765,785, of the declared value of Rs. 28,836,355, as against kilos. 164,911,833, of the value of Rs. 23,044,657, in 1899, or an increase of kilos. 9,853,952, and value of Rs. 5,791,698.

Rum.

The exports of rum in 1900 amounted to litres 1,970,226, of the value of Rs. 224,087, as against litres 1,468,104, and value Rs. 154,812. Increase in quantity 502,122, and in value Rs. 69,275, in 1900.

Oil—Cocoa-nut.

In 1900 the exports of cocoa-nut oil amounted to hectolitres 2,644, of the value of Rs. 46,480, as against hectolitres 1,265, and value Rs. 28,360, in 1899, or an increase of hectolitres 1,379, and value Rs. 18,120.

Hides.

53,410 kilos. of hides, of the value of Rs. 21,938, were exported in 1900, as compared with 73,369, and value Rs. 32,821, in 1899; the discontinuance of the bullock trade with Madagascar being the principal cause of the difference.

Fish—Dried or Salted.

The exports of fish (dried or salted) in 1900 were kilos. 68,816, valued at Rs. 21,078, and, in 1899, kilos. 28,013, valued at Rs. 10,806, or an increase of 40,803 kilos., and value Rs. 10,272.

Machinery.

The exports of machinery amounted to the value of Rs. 293,655 in 1900, as against Rs. 6,305 in 1899, the increase being chiefly due to machinery being supplied to Reunion.

Amongst the minor products of the Colony, vacoa bags, cows and oxen, cocoa-nuts, onions and garlic, and shell (tortoise) show a decided increase, while there is a large decrease in tea, skins, and soap in 1900 as compared with 1899.

The prevalence of plague has continued to interfere with exports to Reunion and Madagascar ports.

salted (Rs. 45,842); fish, pickled (Rs. 9,200); lard (Rs. 53,005); preserved provisions (Rs. 20,733); sago (Rs. 4,956); salt (Rs. 19,585); vermicelli and macaroni (Rs. 1,573); while the following items have declined: Butter; margarine; cheese; coffee; ghee (Rs. 53,365); onions and garlic (Rs. 14,890); pork (Rs. 2,356); tea (Rs. 27,683).

Beer and Ale.

The imports in 1900 show a decrease of 23,109 litres over 1899. Brandy increased from litres 46,240, of the value of Rs. 54,212 in 1899, to litres 52,400, of the value of Rs. 61,461. Whisky slightly decreased and champagne increased. Claret was 2,346,138, of the value of Rs. 483,585, as against 1,891,400 litres, of the value of Rs. 389,069, in 1899. Vermouth shows an increase of litres 39,128, and value Rs. 10,663.

Gandia.

Gandia decreased by kilos. 130 in weight and Rs. 600 in value in 1900 as compared with 1899.

Opium—Crude.

Opium (crude) decreased by kilos. 237 in weight, and Rs. 9,100 in value.

Coals.

Coals increased from kilos. 48,148,727 in weight, and value of Rs. 273,352, in 1899, to kilos. 56,370,045, and value Rs. 405,757.

Sulphate of Ammonia.

Sulphate of ammonia increased from kilos. 3,536,368 in weight, and value of Rs. 351,103, in 1899, to kilos. 5,152,668, and value Rs. 612,151, in 1900.

Guano and Manure of all sorts.

The value of guano and manure of all sorts in 1900 was Rs. 291,865, as compared with Rs. 221,730 in 1899

Iron and Steel.

Iron and steel show, in 1900, a substantial increase as compared with 1899, as well as hardware and cutlery, painters' and dyers' colours, fireworks, leather (wrought and unwrought), stationery and paper wares.

These values are exclusive of charges.

GENERAL IMPORTS AND EXPORTS.

The Trade Returns for 1900 show an increase in the aggregate as compared with 1899, both in the value of the imports and exports.

Excluding exchange and charges, specie and bullion, the returns for 1900 show a decrease as compared with 1899 in the total value of the imports, and an increase in the value of exports.

Imports.

The imports from the United Kingdom in 1900, exclusive of charges and exchange, were valued at Rs. 4,959,943, as against Rs. 4,390,308 in 1899, or an increase of Rs. 569,635, about 13 per cent.

Imports from British Possessions increased in value from Rs. 12,830,168 in 1899 to Rs. 14,334,129 in 1900, and from Foreign Countries from Rs. 2,968,634 in 1899 to Rs. 3,516,709 in 1900.

Live Animals.

The total imports of live animals in 1900 show a decrease in value of Rs. 2,693 as compared with 1899. Cows and oxen have decreased by 1,992 in number and Rs. 18,600 in value; sheep have fallen off; swine have slightly increased, also dogs; horses have augmented by 589, of the value of Rs. 50,960; and mules are 25 less in number, and Rs. 29,520 in value declared.

Articles of Food and Drink and Narcotics.

The imports of rice in 1900 show a decrease of kilos. 20,895,822 in quantity, and Rs. 1,872,104 in value, as compared with 1899; wheat flour was also less by kilos. 1,132,193, and value Rs. 120,271; wheat increased to kilos. 503,250, of the value of Rs. 59,136, as against kilos. 323,958, of the value of Rs. 31,685 in 1899; Bran shows a small increase of kilos. 75,106, and value Rs. 13,361; Barley exhibits a large increase, amounting to kilos. 355,054, and value Rs. 36,673. Oats decreased by kilos. 1,432,528 in weight, and Rs. 126,560 in value; gram decreased by kilos. 2,686,527 in weight, and Rs. 170,284 in value; maize, oatmeal, pollard, and peas show a substantial increase.

Provisions—Preserved.

The declared total value in 1900 was Rs. 1,074,406, as against Rs. 1,043,445 in 1899, or an increase of Rs. 30,961. The following items show increases: Bacon and hams (Rs. 3,941); beef,

MAURITIUS AND RODRIGUES, 1900.

Debenture Debt—*continued.*

—	Original Debt.	Amount repaid.	Remarks.
Provision for the payment of Annuities is made in Ord. 20 of 1892 and Ord. 26 of 1893.	Rs. 150,000	Rs. 33,188	Government Hurricane Loan payable within the term of 25 years from 1st November, 1893, by Annuities of Rs. 9,601.80.
Provision for the payment of Instalments is made in Ord. 31 of 1896.	50,000	16,667	Government Overflood Loan payable by 12 instalments of Rs. 4,166.66 each, the first being due on 31st December, 1897.
Provision for the payment of Principal and Interest is made in Ord. 35 of 1897.	26,000	4,000	Grand River Bridge Loan payable within 13 years by yearly drawings by lot of 20 Debentures.
	382,000	139,655	

The Government has under consideration an Ordinance for amending the present constitution of the Municipality and increasing its usefulness as well as its efficiency.

It is probable that both will be attained by a reduction in the number of Councillors and a more stringent definition of responsibilities.

MAURITIUS AND RODRIGUES, 1900.

MUNICIPALITIES AND BOARDS.

The only elective Municipality in Mauritius is that of Port Louis. The following is a statement of their Revenue and Expenditure for the five years 1896-1900:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1896	460,242	459,290
1897*	508,079	510,666
1898†	483,397	482,134
1899	432,998	424,442
1900	436,299	433,660
Total	2,321,015	2,310,292

The following is a statement of the debt of the Municipality at the close of the year 1900:—

Debenture Debt of the Municipal Corporation on 31st December, 1900.

—	Original Debt.	Amount repaid.	Remarks.
Provision for the payment of Interest and Sinking Fund is made in Ord. 33 of 1881, amended by Ord. 16 of 1884-85.	£ 140,000	£ 11,100	Conversion Loan payable within the term of 49 years and 6 months from the 31st December, 1889.
Provision for the payment of Interest and Principal is made in Ord. 42 of 1888.	Rs. 156,000	Rs. 85,800	Colonial Loan payable within the term of 20 years from the year 1890 by yearly drawings by lot of 78 Debentures.

---

* Including Rs. 50,000 raised by a loan on account of overflood expenses.

† Including Rs. 26,000 raised by a loan for general repairs to Grand River Suspension Bridge.

MAURITIUS AND RODRIGUES, 1900.

	£	s.	d.
Mauritius Inscribed Stock, 4 per cent., under Ordinances 1 and 22 of 1887 (including the Loan for the Mare-aux-Vacoas, £3,600)	£482,390	16	0
Hurricane Loan, 1892, 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892	600,000	0	0
	£1,189,284	6	0

For the redemption of Debentures and Inscribed Stock the several sinking funds and cash balances in the hands of the Trustees amounted to £125,827 18*s.* 8*d.*

This is exclusive of the balance due by the Loan Office amounting to £346,336.

The sum to the credit of the sinking funds on the 31st December, 1900, showed an increase of £14,301 on the previous year.

CURRENCY.

Amount of currency notes on 31st December, 1900:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents)	£483	16	5
Issue of 1860 (sterling)	3,639	0	0
	4,122	16	5

Rupee notes under Ordinance 28 of 1876:—

1. In the Financial Officer's vault ... Rs.	78,950
2. In the hands of the public (including the banks)	4,756,250
	4,835,200

It is desirable to point out that the foregoing statements are not presented in the form that would be used by a commercial company. The words Assets and Liabilities must be taken in their official and not their commercial sense. For the Colony possesses valuable assets such as railways, forests, public buildings, Crown lands, &c., which would properly appear as marketable Assets in the report of a commercial company but find no place in an official report of a Colony.

MAURITIUS AND RODRIGUES, 1900.

Reduit Gardens.

These form part of the Reduit Domain, His Excellency the Governor's residence.

Part of the ground is under forest. Extensive plantations of timber trees have lately been made there; these produce every year a large quantity of seeds which are used for re-afforestation purposes.

Curepipe Gardens.

This garden is chiefly used as a nursery for economic plants and timber trees that cannot be successfully grown at Pamplemousses owing to the climate.

Large numbers of seedling exotic plants are raised yearly—juniperus, pinus sinensis, eucalyptus—which are either sold to the public or used for planting up the Government lands all over the Colony.

LAND GRANTS.

There are no Crown lands in Mauritius available for settlement. The Pas Geometriques, that is to say, a strip of land round the coast, is inalienable, and can only be leased by public auction.

The forests, though a valuable asset, are strictly preserved, and legislation will be introduced during the current session (1901) for increasing their area by a general scheme of land purchase and reafforestation.

The remaining Crown lands are of small area or value; 4·65 English acres, of an aggregate value of Rs. 3,052, were sold during the year 1900.

SHIPPING.

The following returns give a comparative statement of the shipping that entered and cleared during the last five years, as well as statements of the shipping entered and cleared, showing the numbers and tonnage as well as the nationalities of the shipping that entered and left.

It will be noticed that the tendency is towards an increase of British shipping.

Jewellery.

The quantity of Indian jewellery manufactured in the Colony appears to be on the increase. The imports of bullion in 1899 and 1900 were respectively valued at Rs. 6,240 and Rs. 33,427, showing an increase of Rs. 27,187 in 1900, in spite of an *ad valorem* duty of 10 per cent. imposed on bullion on 28th July, 1900, by Ordinance 17 of 1900 (*see* Taxation).

The Indian jewellery imported in 1900 was valued at Rs. 9,826, and in 1899 it was valued at Rs. 1,574, showing an increase in 1900 of Rs. 8,252.

The manufacturing jewellers' license is Rs. 40 per half year, and the number of six months' licenses issued in 1899 was 177, against 216 in 1900, showing an increase of 39 in 1900.

INFLUENCE OF BOTANICAL STATIONS ON DEVELOPMENT OF MINOR INDUSTRIES.

No alterations were made during the year to the Botanic Gardens sections—Pamplemousses, Curepipe, and Reduit.

As usual, large numbers of economic and ornamental plants, forest trees, and fruit trees have been propagated and sent all over the island. The most important ones are the following:—

Coffee, litchis, nutmegs, cloves, different varieties of citrus, kola, coca, aegle marmelos, pine-apple, bananas, cacao, cocoanut, manihot, &c.

Sansevieras, different varieties of agave, China grass, New Zealand flax, &c.

Ceara, para, cryptostegia, vahea.

Teosinte, desmodium tortuosum, lucerne.

A collection of 97 varieties of canes.

Three new varieties of sugar canes received from the Commissioner of Agriculture, East Indies, were added to the collection and are being propagated for distribution amongst the planters.

A certain number of School Board apprentices, selected by the Schools' Committee, are sent yearly to the gardens to be trained. After a certain time, those that have given satisfaction are promoted in the Department or recommended for employment in private gardens.

MAURITIUS AND RODRIGUES, 1900.

Tea.

In 1900 the number of acres under cultivation for tea was about 225, against 200 in 1899. The quantity of tea manufactured in 1900 was about 31,000 kilos., against 27,000 in 1899. The exports in 1900 amounted to 281 kilos., against 2,685 kilos. in 1899, showing a decrease of 2,404 kilos., and the average selling price of tea manufactured was R. 1.20; almost the whole crop was consumed in the Colony.

Soap.

The produce of soap of the Colony in 1900 was kilos. 263,100, compared with in 1899 416,712 kilos., it showed a decrease of kilos. 153,612.

The exports in 1900 (3,911 kilos.), against 26,532 kilos. in 1899, showed a decrease of 22,621 kilos.

The export of soap was, as in 1899, chiefly to Madagascar, and the continued decrease is due to the protective duties imposed in Madagascar on British goods.

The general imports of soap were, in 1900, kilos. 678,184, against kilos. 826,841 in 1899, showing a decrease of kilos. 148,657.

Vinegar.

In 1900 the production of vinegar was 32,732 litres, showing a decrease of 18,873 litres compared with 1899. The excise duty, however, amounted in 1900 to Rs. 52,849, showing an increase of Rs. 5,349 on 1899. The export was merely nominal, the vinegar being consumed in the Colony.

Wine.

The wine is made from raisins. The production was 10,041 litres, against 6,467 in 1899, and the amount of duty received was Rs. 530 on 6,305 litres only, issued for home consumption during 1900, against Rs. 593 for duty in 1899, showing a decrease of Rs. 63 in the amount of excise duty received.

Vanilla.

The whole production of vanilla was exported.

In 1900 it amounted to kilos. 4,552, valued at Rs. 169,821, against kilos. 3,709, valued at Rs. 133,946 in 1899, an increase in production and in value over 1899 of 743 kilos. and Rs. 25,875 respectively.

The exports of fish and fishing products are restricted to the "Bambara," or sea slugs, which are not consumed in the Colony but sent to Hong Kong and Singapore (this industry is chiefly in the hands of the Chinamen), and to tortoise and pearl shells. The exports for 1900, compared with 1899, are as follows:—

—	1899.		1900.	
	Rs.	Rs.	Rs.	Rs.
Bambara, or sea slugs, dried fish ...	28,013	10,086	68,816	21,078
Tortoise shells and pearl shells ...	251	6,178	423	8,088

The legislation in regard to fisheries will be found in the report for 1898, and it is only necessary to remark that it is doubtful whether the policy of creating reserves or protected waters does not result in creating preserves for the benefit of carnivorous fish. Fish are naturally prolific, and if the ova and the young could be protected against their enemies the increase of fish would be enormous. But it is a question whether the breeding grounds and the young can be so protected. The question is one calling for careful study.

The principal manufactures show the following results in 1900 as compared with 1899:—

Rum.

Year.	Consumption	Exported.*	Rate Duty.	Excise Duty.
	Litres.	Litres.	Rs.	Rs.
1899	978,128	1,468,004	1.32 & 1.45†	1,359,677
1900	1,004,902	1,917,081	—	1,462,485
Increase ...	26,774	449,077	—	102,808

Aloe Fibre.

Year.	Exports.	Value.
	Ks.	Rs.
1899	2,249,809	566,030
1900	3,105,341	940,432
Increase ...	846,532	374,402

---

* The export of rum is free.

† R. 1.32 c. per litre to 11th July and 1.45 per litre to the close of the year.

In addition to the foregoing remarks it is necessary to notice a change in the character and tendency of trade. Importers have shown a tendency to trade on small stocks. This has been attributed to two causes:—

1. The general rise in prices, which has been assigned to the demands caused by the South African war. Importers have anticipated that there will be a fall in prices at the close of the war and have therefore kept small stocks. It is not necessary to criticise the justice of this expectation, but it may be noted that the increase in prices may be equally attributed to the world's increased output of gold and the consequent cheapening of gold.

2. There is also a tendency to a quick turn-over. This tendency is caused by the natural desire to avoid keeping capital locked up in reserve stocks.

The policy of importers is outside the limits of criticism permissible in an official report, and it has the justification that deficiencies can speedily be supplied by the use of the submarine cable. But it is, perhaps, permissible to remark that while small stocks of ironmongery or manufactures need cause no anxiety, as a purchaser of such articles is not exposed to any great hardship by having to wait a few weeks whilst the order which may be given by cable is being executed, the same cannot be said of foodstuffs; an accident to a steamer bringing food would cause a serious scarcity so long as stocks are kept as low as they have been kept of late years.

MANUFACTURES AND FISHERIES.

The fisheries of the Colony, in so far as the food supply is concerned, have in no wise improved during the year. The island is still tributary to the islands, dependencies of the Colony, and to British and Foreign Countries and Colonies for the supply of salted fish, and the supply by importation in 1900, compared with 1899, shows a considerable decrease. The figures are as follows:—

—	1899.		1900.	
	Rs.	Rs.	Rs.	Rs.
Dried and salted from exterior ...	935,236	243,502	513,169	156,367
Pickled " " ...	51,505	11,424	90,728	26,307
From Islands Dependencies of Mauritius.	548,761	61,620	366,779	60,262
Total	1,535,502	316,546	970,666	242,936

Aloe Fibre.

The United Kingdom took of aloe fibre in 1900 kilos. 2,456,205, as against kilos. 1,970,779 in 1899. France is credited with kilos. 273,356 in 1900 and kilos. 42,250 in 1899, Holland with kilos. 166,650, as compared with kilos. 60,000 in 1899.

Oil—Cocoa-nut.

Our exports of cocoa-nut oil to Natal in 1900 are 2,400 litres, as against nil in 1899. To the United Kingdom there was an increase of 141,768 litres.

Vanilla.

The export of vanilla to the United Kingdom has increased from kilos. 3,237 in 1899 to kilos. 4,417 in 1900; while to France there is a falling off of kilos. 353 in 1900.

GENERAL REMARKS.

The amount of duty collected in 1900 on imports was Rs. 2,836,155, and on exports Rs. 563,360, total Rs. 3,339,515, as compared with Rs. 2,934,574 and Rs. 530,508, total Rs. 3,465,082, in 1899. The surcharge of 20 per cent. levied in 1899, and not continued in 1900, is accountable, to some extent, for the shrinkage.

The rate of imports and exports per head of population was as follows:—

—	1899.	1900.
	Rs.	Rs.
Imports	74.12	82.01
Exports	72.27	87.58

The continued prevalence of bubonic plague has again interfered with the shipping trade of the Colony during the past year. Madagascar has remained practically closed against our local produce, and our meat supply has diminished owing to the quarantine regulations and the enhanced prices of cattle.

The cattle plague in Reunion has caused a reduction in the value of our imports from that Colony in 1900 to the extent of Rs. 16,892 as compared with 1899. Exports, however, are of a value of Rs. 292,495 in 1900, as against Rs. 100,744 in 1899, consisting almost exclusively of machinery and mill work supplied by the engineering establishments of this Colony for use in Reunion.

Whisky.

There is a slight increase in whisky from the United Kingdom in 1900. France decreased from 1,211 litres in 1899 to 139 litres in 1900, while none was received from the United States, as against 137 litres in 1899. The whisky imported from France is supposed to have been manufactured in Germany.

Stationery.

There is a large increase in stationery from the United Kingdom, and a small increase from France and Germany, while Continental India and Belgium have supplied less.

Tobacco—Manufactured.

Increases occur under this head from China, France, Reunion, and the United States, and small decreases from the United Kingdom and Continental India.

Woollen Goods.

There is an increase in woollen goods from the United Kingdom from 161,576 metres in 1899 to metres 249,174 in 1900, and from France the increase was 27,038 metres. From Germany there was a decrease of 6,540 metres.

EXPORTS.

Sugar.

Of the total quantity of sugar (kilos. 174,765,785) exported during 1900, the United Kingdom took kilos. 9,300,962, as against kilos. 6,415,260 in 1899. To the Cape Colonies, Continental India, and Seychelles the increase is marked. To France the exports increased to kilos. 1,964,796 in 1900 from kilos. 986,813 in 1899. Exports to the United States of America decreased to kilos. 16,289,215 in 1900 from kilos. 33,928,421 in 1899.

Rum.

During the past year our rum shows an increase to the United Kingdom and Aden as compared with 1899. There is a slight decrease to Seychelles.

Soap.

This article represents kilos. 25,935 exported to Madagascar in 1899, as against kilos. 3,710 in 1900.

Molasses.

The total exports of molasses in 1900 were to Continental India, except 507 kilos. to the United Kingdom. The increase to India amounts to 2,247,570 kilos. in 1900.

Coals.

The imports of coals, both from the United Kingdom and India, have largely increased in 1900, to meet the requirements of passing steamers.

Machinery.

Germany supplied machinery in value Rs. 10,000 in 1900, as against nil in 1899. There was a large reduction both from the United Kingdom and France in 1900.

Guano.

Of guano Seychelles furnished kilos. 1,421,608 in 1900, as compared with kilos. 875,000 in 1899.

Margarine.

Margarine from the United Kingdom has diminished from kilos. 5,565 in 1899 to kilos. 212. There has been an increase of over kgs. 3,000 from Holland.

Packing Paper.

This article shows an increase in value from the United Kingdom and a decrease from France.

Salt.

The imports of salt from the United Kingdom decreased over kgs. 200,000. From India we received kilos. 762,972 in 1900 against nil in 1899.

Provisions—Preserved.

Increases are observed in preserved provisions from France, Germany, and the United States, and decreases from the United Kingdom, China, and Portugal.

Silk Manufactures.

The quantities of silk manufactures from Continental India and Germany have increased. From the United Kingdom, China, and France there are decreases in 1900.

Brandy.

Brandy from the United Kingdom increased in 1900 to 1,215 litres from 71 litres in 1899. From France there was an increase of about 5,447 litres. From Germany the imports were nil in 1900, as against 432 litres in 1899.

MAURITIUS AND RODRIGUES, 1900.

GENERAL STATE OF PUBLIC HEALTH.

There was no improvement in the sanitary condition of the island in 1900, as the following figures will show:—

Death-rate.

Year.	Death-rate per 1,000.
1897 ...	29·5
1898 ...	31·9
1899 ...	34·8
1900 ...	35·7

The diseases which gave rise to the highest mortality were:—

Disease.	Percentage on Total Deaths.
Malarial fever	34·5
Debility (sic)	8·9
Phthisis (including consumption and tuberculosis)	6·1
Pneumonia	5·7
Bronchitis	5·2
Dysentery	5·0
Plague	4·4
Whooping cough	3·2
Diarrhoea and enteritis	2·7
Influenza	1·7
Child-birth and sequelae	1·24

PREVAILING DISEASES.

The plague outbreak of 1899 abated about the middle of April, and assumed an epidemic form again in July, which ex-

VII.—VITAL STATISTICS.

POPULATION.

The estimated total population, on the 31st December, 1900, was 383,084, as against 370,588 at the census of 1891. The males were estimated to number 208,677, as against 206,038 at the last census; and the females 174,407, as against 164,550, showing that the males have increased by 2,639 and the females by 9,819. Dividing the population into general population and Indian population, the former are estimated at 117,921, as against 114,668 at the last census; the latter are estimated at 265,163, as against 255,920, showing a steady proportional increase of the Indian population as compared with the Creole population.

The following table gives a detailed statement of the changes in the various classes of the population during the year 1900:—

Return of the Statistics of Population for 1900.

—	General Population: Europeans, Whites, Africans, Mixed and Coloured.	Indians.	Chinese.

* *i.e.*, Five or more than five in number.

MAURITIUS AND RODRIGUES, 1900.

cells of the prisons, and that the chills predispose to malaria and dysentery whilst they promote tuberculosis.

Practically, at least three-fourths of the population of Mauritius have malaria in their system, and it is well known that chills have a great influence in developing malaria.

Measures are being taken to guard against chills. Mattresses are supplied and a large supply of blankets, but it is probable that other measures will have to be taken, and the question is receiving the attention of the Government.

The neighbourhood of the prison will require to be more thoroughly drained, and arrangements may have to be made for fitting gauze mosquito windows to the cells and for admitting more sunlight to the central corridors of the prisons, as well as for guarding the prisoners from draughts whilst at work.

Prison Returns.

The admissions show a decrease of 561 males and 28 females.

The discharges a decrease of 476 males and 32 females (convicted prisoners).

A decrease of 1·54 males is reckoned in the daily average number of admissions.

The average number of convicted and unconvicted prisoners unlocked each day decreased by 123 males and three females.

Twenty-one escapes of prisoners took place in 1899 and 25 in 1900, but of these one recapture was effected in 1899 and three in 1900.

The admissions to hospital *increased* by 111 males, and decreased by 42 females in 1900.

Thirty-nine deaths took place in 1899 and 70 in 1900.

The percentage on the average number of prisoners was 4·38 for Port Louis and 4·64 for Beau Bassin in 1899, and 4·63 for Port Louis and 11·83 for Beau Bassin in 1900.

The total cost of housing, guarding, and maintaining the prisoners was Rs. 127,992.72 in 1889, against Rs. 126,653.84 in 1900.

The total cost per head was Rs. 145.28 in 1899, against Rs. 167.95 in 1900.

The earnings amounted to Rs. 120,158.66 in 1899, against Rs. 100,236.05 in 1900.

The total earnings per head was Rs. 168.28 in 1899, against Rs. 158.10 in 1900.

CRIMINAL STATISTICS.

The following table gives the judicial statistics for the year 1900. The only remark that it is necessary to make, in respect of this table, is that the decrease of serious crime, which has been so marked a feature of the judicial statistics since 1897, was continued during 1900:—

The cases and persons are classified in the following return:—

Nature of Offences.	Number of Cases.	Number of Persons Charged.
Serious offences reported to, or detected by the Police, in which persons were charged.	2,038	2,582
Serious offences reported to, or detected by the Police, which formed the subject of enquiries, and in which no persons were charged.	7,622	*217
Minor offences reported to, or detected by the Police, in which persons were charged.	6,336	8,668
Minor offences reported to, or detected by the Police, which formed the subject of enquiries, and in which no persons were charged.	4,311	—
Other offences against the Labour Law ...	595	597
Vagrancy	922	922
Total	21,824	12,986

The total number of fires which formed the subject of police investigation in 1900 was 277. The total estimated value of property destroyed was Rs. 182,461. There were three lives lost at these fires, all Indians.

Incendiarism still exists, but it has been reduced, and every detected and convicted case tends to discourage this form of personal revenge or commercial gain.

PRISONS.

There are two prisons in Mauritius, the central prison at Beau Bassin, and the Port Louis prison, which is used for untried prisoners as well as for certain prisoners whom it is considered desirable to retain in town either for sanitary or other reasons.

The central prison at Beau Bassin, which is a fine large prison built on the best English model, has proved to be unhealthy, and every effort is being made to trace the cause of the unhealthiness. The latest explanation, and one that seems probable, is that the prisoners, who are accustomed to live crowded together in small huts, experience a chill in entering the cool

---

* Arrested on suspicion.

MAURITIUS AND RODRIGUES, 1900.

The total sum standing to the credit of depositors at the end of 1900, including the interest due, was Rs. 2,940,811. Of this sum Rs. 1,363,708 belonged to the Indian population, showing an increase of Rs. 65,740 on the preceding year.

The number of depositors increased from 24,784 in 1899 to 25,060 in 1900, showing an increase of 276 over 1899.

VI.—JUDICIAL STATISTICS.

POLICE.

The total effective strength of the Police Force, as authorised by Government, was 709 on the 31st December, 1900; the actual strength was 702.

This force contained no less than 21 nationalities, composed of:—

- 42 Europeans of various nationalities.
- 479 Natives of Mauritius.
- 168 Indians.
- 1 Arab.
- 1 American.
- 1 Australian.
- 1 New Zealander.
- 1 Native of Trinidad.
- 4 Natives of Reunion.
- 1 Native of Madagascar.
- 2 Natives of the Cape of Good Hope.
- 1 Native of British West Indies.

The force has necessarily the defects of its qualities.

It is not a homogeneous body, and its military value is, therefore, nil. At the same time it must be stated that it is probably a fairly representative force, as the population of Mauritius is of a very mixed character.

Considerable improvements have been made in the organisation and training of the force. Drill has been introduced. A khaki uniform has been issued, and the bearing and appearance of the men have been improved.

Two hundred and sixteen sub-officers and constables were in possession of the silver and bronze medals for good conduct.

The total number of offences of every description reported to the police in 1900 was 21,824, in connection with which 12,986 persons were apprehended or summoned.

MAURITIUS AND RODRIGUES. 1900.

shown in the nosological returns, there were 8,352 out-door patients who received care and advice at the public dispensaries.

The year 1900 was on the whole a good year, and poverty was less felt than at ordinary times, but there can be no doubt that pauperism is on the increase in Mauritius, especially amongst the creole population.

Government Reformatory.

The Reformatory cannot be described as a success. About 50 per cent. of the boys become criminals, and the Reformatory cannot therefore be said to attain its main object, namely, the reformation of the character of the boys.

Under the new Education Ordinance, the Reformatory has been placed under the control of one of the Committees of Education, and it is to be hoped that such amendments may be introduced into the system as to make the Reformatory what it ought to be—an institution for the reformation and education of boys who have unfortunately acquired criminal habits or instincts.

The following are the returns for the Reformatory:—

The admissions show a decrease of 56, and the discharges a decrease of 76 compared to the year 1899.

Thirteen escapes took place, against six in 1899, showing an increase of seven. They were all recaptured.

The total number of admissions to hospital shows an increase of 25, and, therefore, an increase of ·07 in the daily average number of admissions.

No death took place in 1899 or 1900.

The total cost of maintaining and guarding the boys was Rs. 15,256.11, against Rs. 15,967.61 in 1899, showing, therefore, a decrease of Rs. 711.50 compared to 1899.

The total cost per head on average number of boys was Rs. 228.93, against Rs. 196.11 in 1899, showing, therefore, an increase of Rs. 32.82 per head for 1900.

The earnings amounted to Rs. 2,700.72, against Rs. 4,418.84 in 1899. The decrease is, therefore, of Rs. 1,718.12.

Savings Bank.

The amount deposited in 1900 was Rs. 1,048,813. This amount, compared with the deposits of 1899, shows an increase of Rs. 48,671

The amount withdrawn in 1900 was Rs. 1,076,694, showing an increase on the preceding year of Rs. 88,066.

TECHNICAL EDUCATION.

There exists in the Colony no industrial, technical, or agricultural schools. The only approach to technical education consists:—

For girls, of four needlework apprenticeships, each tenable for three years, and of the annual value of Rs. 100, which are given every year, by competitive examination, to girls in the primary schools between 14 and 17 years of age.

For boys, (1) of five apprenticeships, each tenable for five years, at the Government Plaine Lauzun Railway workshops, awarded every year, by competitive examinations, to lads under 16 years of age. (2) Of two apprenticeships, each tenable for four years, at the Botanical Gardens, and awarded every year, by competitive examinations, to boys between 14 and 17.

The number of apprentices last year was 11 girls and 20 boys, at a total cost of Rs. 5,012.77.

The weak points of the educational system of Mauritius are probably:—

1. The Royal College is a mere day school, resembling a French lycée rather than an English public school.

There is a total absence of school life and of all the moral and physical training which school life affords.

2. There is a great deficiency in technical or specialised training. The schools turn out annually a large supply of youths with a certain amount of literary education but without special aptitudes or special qualifications.

3. In the aided schools the teachers are not in all cases competent to teach or to train the children. It is assumed that persons who are acquainted with the elementary subjects are competent to teach them and to train children. It is needless to say that the manner and method of imparting knowledge are perhaps the most important part of any educational system.

V.—GOVERNMENT INSTITUTIONS.

PUBLIC HOSPITALS AND DISPENSARIES.

There has been no change in the number of institutions in Mauritius during the year.

The work of the Port Louis civil hospital compares favourably with that of the previous year. A small laboratory has been fitted up whereby microscopical and bacteriological examinations are facilitated.

The work done at the other public hospitals has also been on a par with those of previous years. In addition to 16,272 cases

Royal College School, Curepipe.

On roll	131
In average attendance	116

The sum expended by Government in 1900 on the Royal College and its two schools was Rs. 151,639.67; the total sum expended on secondary education being Rs. 163,639.67, in which are included Rs. 7,000 for grants to associated schools, and Rs. 5,000 for grants to girls' schools.

The cost per pupil at the Royal College in 1900 was:—

—	Rupees.
On roll	379.09
In average attendance	447.31

With regard to the staff employed, there were 16 teachers at the College proper, 11 at the Curepipe school, and eight at the Port Louis school. In addition to these, there were the rector, the secretary, four teachers of religious instruction, teachers of drawing, gymnastics, Hindustani, and book-keeping, four ushers, and 16 servants, making a total of 65 individuals.

Associated Schools.

In 1900 there were 27 schools in association with the Royal College, 25 in Mauritius and two at Seychelles. These presented 489 candidates to be examined on the Curriculum of Studies at the Royal College school. Of these, 200 passed the examinations creditably. The sum of Rs. 7,000 was distributed as result grants among the Managers of these schools.

HIGHER EDUCATION OF GIRLS.

This is effected by grants being paid to Managers of girls' schools who submit their pupils every year to be examined on a graduated Curriculum of Studies approved by Government. Last year 28 girls' schools applied for examination. 251 candidates were presented, of whom 101 passed the examinations with credit. The sum expended last year on this item was Rs. 4,796.75.

MAURITIUS AND RODRIGUES, 1900.

The Royal College.

The Royal College is a public school affiliated to the London University. It comprises (1) the Royal College proper, temporarily situated at Curepipe, preparing its pupils for the London University Intermediate in Arts and Matriculation Examinations, and for the Senior and Junior Cambridge Local Examinations. (3) Two schools, one at Curepipe and the other in Port Louis.

The Royal College has a classical and a modern side, in the highest form of each of which there is a competition for a scholarship of £200, tenable for four years, enabling the holder to complete his education in the United Kingdom. For these scholarships there were, in 1900, ten candidates on the classical and eight on the modern side. The reports of the Examiners appointed by the Cambridge Syndicate were of a commendatory character.

The College presented no candidate last year for the London University Intermediate in Arts Examination.

For the London University Examination 14 students were presented, nine of whom passed.

For the Senior Cambridge Local Examinations 58 candidates were presented, of these 23 passed.

For the Junior Cambridge Local Examinations 17 candidates were sent up, four of whom passed.

In the lower forms of the College proper, and in the school classes, the results were satisfactory.

The number of pupils at the Royal College and its two schools was as follows:—

Royal College proper.

—	Number.
On roll	202
In average attendance	169

Royal College School, Port Louis.

—	Number.
On roll	67
In average attendance	54

With regard to their creed they stood as follows:—

—	Government Schools.	Aided Schools.
Roman Catholics	6,620	7,037
Church of England	274	300
Other Christian Denominations ...	101	92
Mahomedans	878	661
Hindoos	1,732	1,795

Including the cost of administration, Government expended on primary education in 1900 the sum of Rs. 298,870.

The cost per pupil on roll was:—

In Government schools ... ... Rs. 17.58

In aided schools 12.00

The cost per pupil in average attendance was:—

In Government schools ... ... Rs. 29.07

In aided schools 18.06

The teaching staff in the primary schools in 1900 comprised:—

In Government Schools.

Sixty-two masters, 14 mistresses, 77 assistants, and 117 monitors and monitresses.

In Aided Schools.

Ninety-six head teachers and 98 assistants.

These 194 represent the teachers whose salaries were paid by Government in accordance with the Code, the monitorial staff in aided schools being paid by the Managers.

SECONDARY EDUCATION.

The work of secondary education in the Colony is carried out:—

1. By the Royal College and its two schools.
2. By private schools for boys in association with the Royal College.
3. By private schools for girls presenting their pupils for examination under a scheme approved by Government.

MAURITIUS AND RODRIGUES, 1900.

In 1900 the attendance and examination results in these four classes of schools were as follows:—

School.	Number of Schools.	Number on Roll.	Average Attendance.	Number Examined.	Number Passed.	Percentage of Passes.
1st Grade, 1st Division	12	2,595	1,524	1,559	960	61·56
1st Grade, 2nd Division ...	35	5,066	3,151	3,072	2,166	70·5
2nd Grade, Full time	23	1,759	1,046	856	575	67·17
2nd Grade, Half time	6	427	234	191	106	55·49

The denominational aided schools stood as follows:—

—	Number of Schools.	Number on Roll.	Average Attendance.	Number Examined.	Number Passed.	Percentage of Passes.
Roman Catholic	64	7,146	4,658	3,713	2,572	69·
Church of England	31	2,105	1,350	1,130	747	66·
Presbyterian Mission	2	175	133	131	70	53·74
Mahomedan	1	209	139	118	74	62·71

With regard to their race the children attending the primary schools last year are to be classified as follows:—

Government Schools.

Children of European, African, or Chinese descent	6,697
Indians and Indo-Mauritians	2,908

Aided Schools.

Creoles of European, African, or Chinese descent	6,736
Indians or Indo-Mauritians	3,150

MAURITIUS
AND
RODRIGUES,
1900.

RODRIGUES.

Rodrigues is a dependency of Mauritius with a population of 3,163 souls, composed of 1,746 males and 1,417 females.

The climate is, on the whole, healthy, and the causes of death are registered as rheumatism, dysentery, bronchitis, influenza, old age, cramps, dropsy, and diarrhœa.

Almost the whole population is of African descent.

The highest temperature was 88°, on 31st January, at 3 p.m.

The lowest temperature was 68·6°, on 27th August, at 9 a.m.

The heaviest rainfall was in February.

The Revenue was	Rs. 19,601.80
The Expenditure was	25,357.53
Showing a deficit of	5,755.73

Rodrigues is likely to become more important in the future as it has been chosen as a station for the telegraph cable connecting South Africa and Mauritius with Australia. It is expected that this cable will be laid before the close of the current year, 1901, and, apart from its commercial and strategical importance, it will afford valuable meteorological information to Mauritius, especially during the hurricane months.

GRAHAM BOWER,
Colonial Secretary.

19th July, 1901.

MAURITIUS AND RODRIGUES, 1900.

Towards the maintenance of that force, the total cost of which was £176,117, the Colony contributed £31,753, as under:—

—	Amount.
	£
Colonial contribution	24,750
Adjusting balance for 1899	4,062
Payment in lieu of exemption from Customs Duty ...	2,941
Total	£31,753

X.—MISCELLANEOUS.

The general condition of the Colony from the financial point of view may be described as sounder than it has been for several years. The banks are overstocked with coin, and have more money than they can invest safely and profitably. They have reduced their rate of interest on fixed deposits, and money may be said to be "easy." The planters and estate owners have reduced their mortgages and invested considerable sums in the improvement of their machinery.

In view of the foregoing statement it may seem like a contradiction to say that the chronic disease of the Mauritian community is poverty. Nevertheless, the statement is true. For although the planters are prosperous as compared with their condition in recent years, it must be remembered that the planters form only a small section of the population, and that the poverty of the general population does not affect them, except in so far as it tends to keep down the price of labour. The creole population, who form a third of the whole population, are poor, and are becoming poorer.

They are disinclined to undertake field work, and the market for writers or clerks is overstocked. In the labour market they have to face Indian and Chinese competition, and they lack the enterprise and energy of the purely Asiatic races. It can hardly be doubted that the competition of the Asiatics must be keener as time goes on, and that the creole population, especially those of mixed blood, must find the struggle for existence press more heavily on them. Even amongst the families of pure European blood there are many in very humble employments, and were it not for the strong family affection, and abundant family charity, it is to be feared that many women of pure European blood, and of European culture, would be put to great straits to secure the barest necessaries of life.

following. In these months the warm, damp sea air of the trades is carried into the higher regions of the island. The dew point is reached, and the rain is deposited in what may be called a Scotch mist.

VIII.—POSTAL AND TELEGRAPH SERVICES.

There are 60 post offices, 60 money order offices, and 51 telegraph offices in Mauritius.

An annual subsidy of £8,000 is paid to the Eastern and South African Telegraph Company in respect of their submarine cable from Mauritius to Seychelles, and Seychelles to Zanzibar. Of this sum £7,000 is borne by Mauritius and £1,000 by Seychelles.

IX.—MILITARY EXPENDITURE.

The following was the strength of the garrison of Mauritius at the close of the year 1900:—

Return showing the strength of the Troops serving in Mauritius on the 31st December, 1900.

—	No.
Staff	3
No. 8 Company W.D. Royal Garrison Artillery	150
No. 26 " " "	147
No. 4 Company Ceylon-Mauritius Battalion R.G.A.	101
Mauritius Submarine Mining Company R.E.	46
43rd Company Royal Engineers	43
2nd Battalion K.O. Yorkshire Light Infantry...	34
Army Service Corps	4
Royal Army Medical Corps	16
Army Ordnance Corps	12
Army Pay Corps	1
1st Bengal Infantry	776
27th Madras Infantry	786
Total	2,139*

* Exclusive of 172 native followers.

(2) *Temperature*—continued.

At Curepipe (in a large Stevenson screen) 1886–1900.

In the Thermograph Screen.

Temperature of the Air.	1900.	1875–1900.
Mean	68·1	67·9
Mean maximum	75·1	74·2
Mean minimum	61·2	61·5
Absolute maximum	84·5	87·2
Absolute minimum	46·5	44·0

(3) *Direction and Force of Wind.*

At the Observatory (as deduced from the records of a self-registering Beckly anemometer).

Wind.	1900.	1876–1900.	Mean daily range.
Mean direction	S. 7° E.	S. 74° E.	19°
Mean velocity, miles per hour ...	9·6	11·1	7·7
Maximum velocity, miles per hour	26·0	103·3	—

When the velocity of the wind is small its direction varies considerably in different parts of the island, but no systematic observations are made except at the Royal Alfred Observatory.

(4) *Special Features.*

The hottest season in Mauritius is between December and April, the remainder of the year being comparatively cool. The temperature on the highlands is always lower by several degrees than in Port Louis and the coast districts. The climate at Curepipe (from 1,700 to 1,900 feet above the sea) resembles that of the south of France or Italy. The hurricane season extends from December to April, and cyclones range from about 8° to 30° south latitude. During the hurricane months the greater part of the rain falls, although the remaining months are by no means dry; July and August, during which the S.E. trade winds reach their maximum velocity, showing a marked increase on the months immediately preceding and

Meanwhile, steps are being taken to drain pools and other breeding places of the anopheles mosquito.

Enteric fever is, unfortunately, making slow but sure progress in the higher and healthier localities of the island.

Dysentery occurred in a sporadic form, and at one time assumed an epidemic character. The saline treatment continues to give satisfactory results in the acute form of the disease. Tuberculosis is on the increase. Poverty, and overcrowding consequent upon poverty, seem to be the predisposing causes.

The inhabitants may be said to be tolerably well protected by vaccination.

CLIMATE.

The following is the meteorological report for 1900:—

(1) *Rainfall.*

In the year 1900 the rainfall was considerably below the average in all parts of the island; the mean rainfall at ten stations being 53·04 inches, or 30 per cent. below the average for the last 30 years, the least on record, except in 1886, when it was 44·89, or 41 per cent. below the average. The greatest fall was 115·63 inches at Mare-aux-Vacoas, and the least 17·14 inches at Port Louis.

The wettest month was March and the driest September.

On the average, March is the wettest and October the driest month.

(2) *Temperature.*

At the Observatory.

In the Thermograph Screen.		
Temperature of the Air.	1900.	1875–1900.
Mean	73·6	73·5
Mean maximum...	81·8	81·2
Mean minimum...	66·9	67·2
Absolute maximum	94·8	94·8
Absolute minimum	50·8	50·8

tended till the month of January, 1900. A fresh outbreak occurred in August, 1900, and continued during the rest of the year.

There were 796 cases in the Colony in 1900 with 593 deaths.

As a suggestion has been made in Hong Kong that there is some connection between the rainfall and the period of dormancy, a diagram showing the curves of rainfall, temperature, and plague cases has been kindly prepared by the Director of the Observatory and Dr. Bolton of the Medical Department.

In so far as the curves suggest anything, they appear to suggest a connection between the period of abatement or dormancy and temperature rather than rainfall.

At the same time, it is probable that the heavy tropical rains drown many rats, and it is reasonable to suppose that sick rats would be the first to be drowned. The suggestion, therefore, deserves consideration, and the comparison will be made in future years.

A brief account of the measures taken to prevent the spread of plague, as well as the treatment adopted in plague cases, will be found in the report for 1899.

There is little to add to that report, except that confidence in Yersin's serum as a prophylactic for contacts has been strengthened by experience.

Malaria.

There are two species of anopheles mosquito in Mauritius. The smaller, the anopheles costalis, inhabits the coast districts, the larger species, the anopheles mauritianus, inhabits the higher inland districts.

During the year 1900, malarial fever, which has hitherto spared the inland districts, appeared in an epidemic form at Moka, a district hitherto free from fever, and soon spread to Curepipe and districts hitherto immune.

The question arises, therefore, whether this spread of malaria was due to a migration of the smaller species of mosquito, or whether the larger species, or rather the female of the larger species, has become a poison carrier. A committee has been appointed to investigate this question, and careful microscopical and possibly physiological experiments will be made. It is, of course, to be hoped that the epidemic was due to a migration of the smaller species caused by an exceptionally hot season, for in that case the higher districts may hope to recover their immunity during the normal and cooler years; but, up to the present time (July, 1901), nothing definite has been determined.

No. 379.

MAURITIUS.

(For Report for 1900 see No. 335.)

Governor Sir Chas. Bruce to Mr. Chamberlain.

Government House,
Mauritius,
15th November, 1902.

Sir,

I have the honour to transmit, herewith, the Blue Book of Mauritius for the year 1901 together with the usual Report of the Colonial Secretary.

2. The statistics of the year which form the staple of Colonial Blue Books present nothing of exceptional importance in the records of the year 1901. In the peaceful annals of local history, three events overshadowed all other interests: the passing away of Her late Majesty Queen Victoria, the accession of His Majesty King Edward VII., and the visit paid to the Colony by Their Royal Highnesses the Prince and Princess of Wales. All minor and personal interests, all partialities of race and language in the heterogeneous community of the Colony were during the year absorbed in a common sentiment of attachment to the Throne and Person of the Sovereign, and it may well be doubted whether, during the period, approaching a century, of British dominion in Mauritius, the fortunes of the Empire have ever been so intimately associated in the hearts of the people of every race and creed, with the human sympathies that give a colour to patriotism and to loyalty an animating personal incentive. For years to come, however excited may be men's minds by the accident of discordant local interests, it is certain that their hearts will beat in unison when touched by the names of Queen Victoria, of King Edward and Queen Alexandra, of the Prince and Princess of Wales.

3. The delay in the publication of the Blue Book, for reasons pointed out by the Colonial Secretary, have brought us so far into the year 1902 that I cannot conclude this despatch without

mentioning that the current year has been marked by events likely to exercise a large influence on the fortunes of the Colony. The signature of the Brussels Convention having for its aim to secure the abolition of sugar bounties was of the happiest omen for the future, but it was inevitable that some time should elapse between the signature of the Convention and the date of its coming into operation. The fear of a probable rush into the Indian market of bounty and cartel-fed sugar paralysed for a time the local market until the prompt action of the Government of India in passing measures to countervail the cartel as well as the bounty system restored confidence to our commercial community. Unfortunately a new source of danger began early in the year to threaten our fortunes, the disease known as Surra having broken out among cattle, horses, and mules. Although prompt and energetic action was taken to combat this disease it continues to rage, especially among mules, with results affecting most disastrously the sugar interest by the want of means of transport. In order to meet the emergency, steps were at once taken to substitute mechanical for animal transport on the estates and roads of the Colony; and it may be hoped that in the long run the interests of the planters may derive permanent advantages by the introduction of cheaper methods of transport free from the risk of diseases that have more than once imperilled their fortunes.

4. In the meantime, however, the staple industry of Mauritius is passing through a period of crisis which cannot fail to jeopardise enterprises that do not rest on the stable foundation of adequate capital, but which does not, in my opinion, justify a despondent or gloomy view of the future of the Island.

I have, &c.,

CHAS. BRUCE,

Governor.

REPORT ON MAURITIUS BLUE BOOK FOR 1901.

INTRODUCTORY.

During the year 1901 a change was introduced in the system of dating the Financial Year. Previously to 1901, the Financial Year had synchronised with the Calendar Year. But as the harvest begins in August and the sugar crop is not wholly realised before February or March the system had the effect of introducing the partial realisation of two harvests into one Financial Year. As the realisation of the crop depends on the state of the market and the expectations of the sugar planters respecting an early rise or fall in the market, the system did not give a fair or accurate account of the financial results of the year. In other words, the Financial Year of the industrial and commercial classes did not coincide with the Financial Year of the Government.

The defect has now been remedied. The first six months of the year 1901 was treated as the first financial period, and the period from the 1st July, 1901, to the 30th June, 1902, was treated as the second financial period. For the future, the Financial Year in Mauritius will, therefore, commence on the 1st July of one year and will end on the 30th June of the following year.

It was originally intended to make the period covered by the Blue Book and by this Report coincide with the first period, *i.e.*, with the first six months of 1901, but owing to delays in printing caused by the sequestration of the estate of the Government printer, the preparation of the Returns has been delayed until the Returns for the second period have in some cases been received.

It has been thought best, therefore, to include in this Report the later returns where practicable, though this involves the sacrifice of symmetry.

In the following table the Statement of Revenue and Expenditure is given for the period from the 1st January, 1901, to the 30th June, 1901, and from the 1st July, 1901, to the 30th June, 1902.

The latter period being a whole Financial Year under the new system is compared with the year 1900 a Financial Year under the old system, *i.e.*, a Calendar Year.

STATEMENT of REVENUE for FIRST HALF YEAR, 1901, and COMPARATIVE STATEMENT of the REVENUE for 1901–1902 and 1900.

Result—Net Increase of 1901–1902 over 1900. **Rs.** 474,122.45.

The Revenue for 1901-1902, compared with that of 1900. shows a decrease of Rs. 39,000, chiefly due to a reduction in the price of sugar and to a smaller crop.

The Expenditure of 1901-1902, compared with that of 1900, shows an excess of Rs. 474,000, in which the renewal of railway rolling stock enters for Rs. 200,000. The other items of expenditure affected by the surplus are:—

Item 7.—Customs refund to merchants of Customs dues paid by them on timber supplied to the War Department for the construction of new barracks.

Item 13.—Post Office. Payment of arrears due for sea and territorial transit of letters and parcels.

Item 18.—Medical Department. Special sanitary works for the prevention of malaria.

Item 20.—Extra provisions and outdoor relief to paupers.

Item 29.—Miscellaneous. Expenditure in connection with the visit of Their Royal Highnesses the Prince and Princess of Wales. Coronation Festivities. Rodrigues Enquiry Commission. The Census and special grants to the relief funds of Martinique and St. Vincent.

Items 35 and 36.—Public Works. Excesses caused by repairs of damages caused by a hurricane, by the improvement of the Customs Shed, by the expenditure on a new hospital at Long Mountain, and by improvements on the Government houses which formed part of the preparation for the Royal visit.

The revenue and expenditure for the last five years was as follows :—

Year.	Revenue.	Expenditure.	Treasury Balances.
	Rs.	Rs.	Rs.
1897	7,996,705	8,626,798	899,336
1898	7,629,318	8,131,465	438,866
1899	9,066,314	8,406,227	1,077,715
1900	8,568,943	9,179,975	1,704,424
1901–02	9,043,066	8,568,943	1,834,669

ASSETS AND LIABILITIES ON 30TH JUNE, 1902.

1. Commissioners of Currency:—

	Rs.
Assets	5,715,322.25
Liabilities	5,663,270.00
Balance in favour of Commissioners ...	**52,052.25**

2. **Government Savings Bank:—**

	Rs.
Assets	3,070,455.60
Liabilities	2,833,243.05
Balance in favour of the Bank	237,212.55

3. Curatelle:—

Assets	468,103.85
Liabilities	468,103.85

4. Treasury proper:—

Assets	3,074,448.79
Liabilities	1,239,779.47
Balance in favour of Treasury	1,834,669.32

5. Public Debt:—

	£	s.	d.
The Public Debts stood as follows on the 30th June, 1902—			
(1) Savanne Railway 4½ per cent. Debentures payable by annual drawings	42,193	10	0
(2) Moka Railway 4 per cent. Debentures payable by annual drawings...	600	0	0

(4) Mauritius Inscribed Stock under Ordinance 1 & 22 of 1887—including loan made for Mare-aux-Vacoas, £36,000	482,390	16	0
(5) Hurricane Loan, 1892, 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892	600,000	0	0
	£1,182,984	6	0

For the redemption of the debentures and inscribed stock, the several Sinking Funds and Cash Balances in the hands of the Trustees on the 30th June, 1902, amounted to £146,492 9*s.* 9*d.*, the amount duly provided as required by law. This is exclusive of the balance due by the Loan Office amounting to £331,673 5*s.*

The sum at the credit of the Sinking Funds on 30th June, 1902, showed an increase of £14,659 0*s.* 7*d.* on the previous year.

CURRENCY.

Amount of Currency Notes in circulation on 30th June, 1902:—

	£	s	d.
Issue of 1848 and 1849 (dollars and cents)	483	16	5
Issue of 1860 (sterling)	3,639	0	0
	£4,122	16	5

Rupee notes issued under Ordinance No. 28 of 1876—Rs. 3,990,250.00—in the hands of the Public, including the banks.

CURATELLE.

(Administration of Vacant Estates.)

The Deposits amounted to Rs. 468,103.85. The Assets consisted of the following sums:—

	Rs.
a. Cash in Bank	207,443.72
b. Investments in England ...	173,773.42
c. Exchange at 50 per cent. ...	86,886.71
	Rs. 468,103.85

SAVINGS BANK.

The amount deposited in 1901-1902 was Rs. 984,492.

This amounts compared with the deposits in 1900 shows a decrease of Rs. 64,321. The amount deposited during the period being Rs. 1,048,813.

The total sum standing to the credit of depositors on the 30th June, 1902, including the interest due to them was Rs. 2,797,256.72. Of this sum, Rs. 1,184,380.00 belonged to the Indian population.

MUNICIPALITIES.

The Municipality of the town of Port Louis is the only elective Municipality in the Island.

A Bill is now before the Council of Government to amend the constitution of the Municipality. The principal provisions of this Bill contain proposals for substituting the election of the Councillors by the *scrutin d'arrondissement* instead of the *scrutin de liste.*

There are also provisions for a more searching audit in the accounts.

The following statement shows the financial condition of the Municipal Corporation of Port Louis at the end of the year 1901:—

	Rs.
Balance on hand on 1st January, 1901	21,331.40
Revenue, Loan and Receipts on Account for year 1901	592,781.42
	Rs. 614,112.82
Expenditure, Payments and Payments on Account for 1901	568,816.63
Balance on hand on 31st December, 1901	Rs. 45,296.19

Debenture Debt of the Municipal Corporation on 31st December, 1901:—

	Principal.
Conversion Loan, 1884	£127,600

	Rs.
Colonial Loan, 1889	62,400
Hurricane Government Loan, 1892	111,883
Government Overflood Loan, 1896	29,166
Grand River Bridge Loan, 1898	20,000
Manure Factory and Night Soil Service Loan (16th September, 1901)	30,000
	Rs. 253,449

Debenture Debt of the Municipal Corporation.

Debts.	To whom due.	Rate of Interest.	When incurred and for what cause.	State Provisions for Payment of Interest or Sinking Fund, and refer to Enactments by which it is made.	Amount of Original Debt.	Amount repaid.	Remarks.

1900	59,759.18	57,108.48	—
1901	(*a*) 115,590.13	(*b*) 88,426.58	—

(*a*) Including Rs. 50,250 proceeds of Debentures issued in 1901.

(*b*) Including purchase price of "La Malmaison" country residence (Rs. 25,000), and advance to contractors (Rs. 8,000).

TRADE, AGRICULTURE AND INDUSTRIES.

The trade of Mauritius is dependent on its agriculture, and the agricultural industry of Mauritius is the sugar industry.

Practically this is the main if not quite the sole industry of the Island, and it depends for its prosperity on the price of sugar. As the price of sugar during the present transitional period is a matter of general interest, it has been thought well to introduce the section on Trade Agriculture and Industries by giving the monthly prices of sugar in Mauritius for two years. This Return does not form a part of the Blue Book, but from the point of view of trade and agriculture it is probably more important than any in the Blue Book.

Hereunder, therefore, is shown, for the period 1st October, 1900, to 30th September, 1902, the market quotations (mean sale prices) of sugar in Mauritius.

The prices given are for the quality of sugar called "medium" being similar to the standard quality of sugar on the Bombay market, for which weekly quotations are cabled to Mauritius.

Year.	Amount.		
1900.	Rs.		Rs.
October	9.50		
November...	10.00		
December	11.00		
1901.			
January	11.00		
February	10.00	to	11.00
March	10.00	to	11.00
April	10.40	to	10.50
May	10.10	to	10.20
June	10.10	to	10.20
July	9.60	to	10.00
August	10.00		
September	9.60		
October	9.10	to	9.25
November	8.80	to	9.00
December	9.00		
1902.			
January	8·65		
February	8.65		
March	8.65		
April	8.50		
May	8 50		
June	9.00		
July	9.00		
August	8.90	to	9.00
September	8.05	to	8.10

In connection with the above return it is well to explain that the Indian countervailing duties came into force on the 24th May, 1902.

But the return clearly shows a diminishing profit which cannot fail to influence imports. It is to be hoped for the sake of the sugar industry that prices have reached low water-mark and that the tide has at last turned.

The following returns give the total imports and exports classified under the headings, live animals and food, raw materials, manufactured articles, coin, bullion and specie, and the distinction has been drawn between home and foreign produce.

These returns are prepared for the Calendar year as, indeed, are all the returns relating to imports, exports, and shipping. This arrangement, though it destroys the symmetrical character of the present Report, has been necessitated by the extensive nature of the calculations which have to be made. But it may perhaps be excused, as the arrangement in Calendar years is not without convenience for the purpose of comparison with other countries.

VALUE of IMPORTS (exclusive of Charges and Exchange) and EXPORTS (exclusive of Shipping Charges) classified according to CIRCULAR of DECEMBER, 1901, of the SECRETARY of STATE.

The total value of imports and exports from and to the Dependencies per coast sufferances is recorded thus:—

—	1901.	1900.
	Rs.	Rs.
Imports	474,750.15	568,186.32
Exports	322 988.10	342,472.91
Total	797,738.25	910,659.23

The aggregate value of trade is therefore as follows:—

—	1901.	1900.
	Rs.	Rs.
Imports	31,621,510.37	31,995,588.04
Exports	29,316,055.40	31,917,749.32
Grand Total ...	60,937,565.77	63,913,337.36

Excluding the value of imports and exports from the Dependencies, the rate per head of population was as follows:—

—	1901.	1900.
	Rs.	Rs.
Imports (including charges and exchange)	83.49	84.25
Exports (exclusive of shipping charges on local manufactures).	75.68	82.42

Deducting specie and bullion, the values of the imports and exports mentioned in paragraph 1 were as follows:—

—	1901.	1900.
	Rs.	Rs.
Imports	31,087,870.83	26,892,983.39
Exports	27,859,929.30	31,403,286.41
Total...	58,947,800.13	58,296,269.80

The amount of duty collected was as follows:—

—	1901.	1900.
	Rs.	Rs.
Imports	2,850,884.22	2,836,155.06
Exports	504,583.29	563,359.90
Total...	3,355,467.51	3,399,514.96

The following return is a comparative statement of the value of the chief articles of import and export for the years 1901 and 1900.

This return includes postal parcels imported, but does not include the value of the parcels despatched by the Post Office, which should be shown as part of the trade of the Colony, and arrangements will be made in future to so include it.

From a return received from the Colonial Postmaster, the declared value of the postal parcels despatched during the past five years is as under:—

Postal Parcels.

1897.	1898.	1899.	1900.	1901.
Rs. 12,417.48	Rs 13,178.92	Rs. 14,584.42	Rs. 18,940.26	Rs. 19,388.42

Dealing with the articles and their value, as shown in the foregoing table, according to the entries (where the differences are over Rs. 5,000) the following results are arrived at:—

Acids. (Phosphoric.)

Which was exclusively imported from the United Kingdom shows a shrinkage of 32,092 kilos., and in value Rs. 7,698 in 1901 over the imports of the preceding year.

Sulphate of Ammonia.

The imports decreased from kilos. 5,152,668, of the value of Rs. 1,007,341 in 1900, to kilos. 4,754,695, of the value of Rs. 949,485 in 1901; the imports from the United Kingdom in the last year, however, showing a substantial increase.

Animals. (Cows and Oxen.)

In 1900, our imports, 3,590 in number, valued at Rs. 342,493, were exclusively from Madagascar. In 1901, Madagascar only provided 758 of the value of Rs. 65,827; India supplied 364 of the value of Rs. 47,775.

Horses.

Show a large diminution in 1901, both in number (327) and value (Rs. 16,647) over 1900.

Mules.

Increase in number from 536 and value Rs. 107,200, to 1,030 in number and Rs. 459,907 in value in 1901.

Apothecary Wares.

The increase under this head in 1901 amounts to Rs. 62,958. French produce exhibits an increase of Rs. 76,029, while British and German produce show a decrease of Rs. 7,719 and Rs. 3,306, respectively, as compared with 1900.

Wearing Apparel.

Compared with the imports of 1900 there was a decrease of Rs. 35,274 in the imports of 1901. The United Kingdom shows a diminution of Rs. 20,015; Continental India of Rs. 14,324; Pondicherry of Rs. 3,638, while the following increases are noticed—France, Rs. 2,895; Germany, Rs. 908.

Areca Nuts.

Have decreased from kilos. 61,936, of the value of Rs. 20,187 in 1900, to kilos. 27,356, valued at Rs. 7,473 in 1901.

Automobiles.

Two were imported from France in 1901 of the declared value of Rs. 7,016, as a trial for the transport of sugar, canes, &c., on sugar estates.

Bags. (Gunny.)

There has been an increase of 554,133 bags and value Rs. 11,471 over the imports of 1900. These bags are principally used for the shipment of sugar as a cover for the vacoa bags.

Bags. (Straw.)

Show the large decrease of 402,180 in number and Rs. 10,543 in value in 1901 over the imports in 1900.

Bags. (Vacoa.)

There was a substantial decrease of this article in 1901 as compared with 1900.

Beef. (Salted.)

The quantity imported in 1901 is less than in 1900, a decrease in value of Rs. 19,421. Increases both in weight and value from the United Kingdom and Australia while the imports from the United States show a substantial decrease.

Beer and Ale. (In cask.)

This item shows a shrinkage of 466 hectolitres in quantity and Rs. 26,619 in value in 1901, as compared with the imports in the previous years.

Beer and Ale. (In bottles.)

Under this head, in 1901, the importations were likewise less than in the previous year, the United Kingdom exhibiting a decrease in value to the extent of Rs. 18,712.

Blacking.

The value of this article decreased in 1901 by Rs. 7,582, as compared with 1900. There is a large decrease on imports from the United Kingdom and a slight one in the imports from France.

Books. (Printed.)

The value of books shows an increase in 1901 of Rs. 6,035 over the imports of 1900.

Bran.

Compared with 1900, the imports of 1901 show a total decrease in value of Rs. 7,978. There is an increase in quantity and value from Australia and Argentine Republic, while the imports from India show a large decrease. Urugay, which provided kilos. 17,325, of the value of Rs. 2,495, in 1900, sent none to the Colony in 1901.

Brassware.

Shows a large increase in 1901 over 1900 both in quantity and value. The increase in value of imports from the United Kingdom amounts to Rs. 105,170. There is also a slight increase in the imports from France. The imports from India have fallen off to the extent of Rs. 4,315 in value, while the quantity shows an increase.

Brick and Tiles.

Under this head there is a decrease in value of Rs. 5,094 in 1901, as compared with 1900.

Bullion.

Decrease of Rs. 6,062 in 1901 as compared with 1900. The decrease arises from less imports from India.

Butter.

There is a slight increase in quantity and Rs. 4,881 in value in imports in 1901 as compared with 1900. Increases are noted under the United Kingdom, Australia, Canada, Belgium, Holland, Italy, and Switerland; while, Denmark, France, and the United States show distinct decreases.

Bicycles.

The value of imported bicycles in 1901 is less by Rs. 26,298 than in 1900; the decrease applying to each exporting country.

Cabinet and Upholstery Wares.

Increases in 1901 over 1900 amount to Rs. 5,583. Austrian, French, and American goods showing increases, while the value of imports from the United Kingdom is Rs. 2,293 less.

Camphor. (*Crude.*)

The increase in value under this head in 1901 is Rs. 5,051, principally from India.

Candles. (*Composition.*)

Exhibit a large decrease both in quantity and value in 1901 as compared with 1900. The value of imports from Belgium has increased by Rs. 1,549, while the value of imports from France is Rs. 41,472; from Germany, Rs. 446; and from Holland, Rs. 1,850 less. Imports from the United Kingdom are kilos. 460 less in weight and Rs. 132 in value.

Caoutchouc and India Rubber Manufacturers.

The increase in 1901 under this head in weight is kilos. 1,739, and in value Rs. 9,202. The United Kingdom provides the increase.

Cement.

This article shows an increase both in quantity and value over 1900. The increase in the United Kingdom amounts to Rs. 68,216. From France there is a decrease of Rs. 1,063, and Belgium, which supplied 25,890 kilos. in 1900, sent none in 1901.

Cheese.

There is a large increase both in quantity and value in 1901. The increase from Holland amounts to Rs. 12,099. From the United Kingdom, 4,756. From France, Rs. 3,582. Italy supplied 2,270 kilos. of the value of Rs. 3,908 in 1901 against nil in 1900.

Coals.

The quantity imported in 1901 was kilos. 79,165,606, of the value of Rs. 2,224,833, as against 56,370,045 kilos. of the value of Rs. 1,024,889 in 1900. The increases refer to the imports from the United Kingdom, Australia, and India. France and Natal, from which a small quantity was imported in 1900, sent none in 1901. The increased imports are ascribable to steamers calling at this port for coals, owing to troubles in South Africa.

Coffee.

Increased from kilos. 213,805 and value Rs. 89,791 in 1900 to kilos. 375,420 of the value of Rs. 207,639 in 1901, the principal increase being from Aden, India and Java.

Confectionery.

Under this head there is a total decrease of Rs. 10,431 in 1901 as compared in 1900. United Kingdom shows a decrease of Rs. 12,285, while France shows an increase of Rs. 1,865, and Belgium, Rs. 825.

Copper. (Sheets and Nails.)

As compared with 1900, the imports show an increase in value to the extent of Rs. 16,236 in 1901. There is a large increase from the United States, while the French goods have decreased in value to the extent of Rs. 6,581.

Cordage. (Hemp.)

Increase in 1901 over 1900 of Rs. 19,229 in value, principally from the United Kingdom and Hong Kong.

Corks and Bungs.

Show a decrease of Rs. 11,389 in 1901 from France and Spain, and a slight increase both in quantity and value from the United Kingdom.

Corn, Grain, Meal. (Barley.)

The total *decrease* in 1901 in weight is 386,441 kilos., and in value Rs. 45,974, as compared with 1900. Imports from Continental India and the Argentine Republic have largely decreased. From Australia the value of imports is Rs. 4,708 against nil in the previous year.

Beans.

This article has also largely decreased in 1901 both in quantity and value Rs. 18,406; the decreases being from every country except the United Kingdom, which shows a small increase.

Lentils.

Increased from kilos. 776,769, of the value of Rs. 87,684, in 1900, to kilos. 1,171,263, of the value of Rs. 143,344 in 1901, The entire quantity was imported from India in 1901.

Oats.

Show a total increase in value of Rs. 14,697 in 1901, the principal increase coming from Australia, Continental India, and the United States. From the Argentine Republic there is a *decrease* in value amounting to Rs. 16,384.

Wheat.

Decrease in value of Rs. 23,955. Australia shows imports kilos. 83,696, of the value of Rs. 7,210, against nil in 1900. India shows a decrease in value of Rs. 31,165.

Wheat Flour.

This article shows a total increase in value of Rs. 463,034 in 1901. Rs. 447,666 from Australia, Rs. 65,575 from India, and Rs. 4,290 from the United Kingdom.

Cotton Manufactures. (Coloured.)

As compared with 1900 the value of imports in 1901 shows decreases under this item of Rs. 215,101. Decreases are, from the United Kingdom, Rs. 192,844; from India, Rs. 18,507; France Rs. 13,069; Germany, Rs. 3,541; Pondicherry, Rs. 11,609; Belgium shows an increase of Rs. 5,664; Holland Rs. 14,472; and Switzerland, Rs. 3,646.

Hosiery.

This article also shows a large increase amounting to Rs. 18,302 in 1901. German goods show a shortage in value of Rs. 15,307, and the United Kingdom a shrinkage of Rs. 3,105. The value of the French goods increased by Rs. 273.

Plain Hosiery.

There is a decrease in value of Rs. 270,884 in 1901, of which Rs. 218,441 is from the United Kingdom, Rs. 52,589 from India, and Rs. 1,552 from Germany. The value of the imports from Austria, France, Italy and Switzerland have slightly increased.

Thread for Sewing.

Total decrease in 1901 in value is Rs. 14,525, of which Rs. 14,511 from the United Kingdom and Rs. 493 from France. Switzerland shows a slight increase.

Wick.

The United Kingdom shows in 1901 a decrease of 5,527 kilos. in quantity and Rs. 6,433 in value as compared with the previous year. The imports from France and India show slight increases.

Earthenware and Chinawares.

Show a decrease in 1901 over 1900 amounting to Rs. 18,232, of which Rs. 15,189 is due to less imports from the United Kingdom and, to a small extent, from China, France, and Germany.

Fish, Pickled.

Increase in 1901 of Rs. 26,891; from the United Kingdom, Rs. 22,422 and from the United States Rs. 5,364; there being small decreases from Seychelles, Madagascar and France.

Flowers, Artificial.

The value of this article decreased from Rs. 5,614 in 1900 to Rs. 381 in 1901. The difference being under the United Kingdom, Rs. 2,049; France, Rs. 1,726; and China Rs. 1,107.

Fruits, Dried. (Cocoanuts.)

Total decrease in 1901, Rs. 8,347, less imports from Seychelles.

Gandia.

There is an increase of 321 kilos. in the imports, but a decrease of Rs. 9,839 in the declared value as compared with the preceding year.

Ghee.

Shows a decrease of 16,359 kilos. under imports of 1901, but an increase of Rs. 7,224 as against 1900.

Groceries.

Show a decrease of Rs. 5,115 in 1901; of this decrease Rs. 4,400 come under the United Kingdom.

Haberdashery.

The value of the imports declared in 1901 is Rs. 79,413 less than in 1900. Decreases are shown under the following countries:—United Kingdom, Rs. 16,048; France, Rs. 61,195; Germany, Rs. 16,678; Holland, Rs. 9,042. Increases are shown—India, Rs. 12,085; Austria Rs. 2,104; Switzerland, Rs. 7,116.

Hardware and Cutlery.

Increase of Rs. 235,699 in 1901 over 1900. The United Kingdom yielded Rs. 218,700; France, Rs. 10,590; Belgium, Rs. 2,638; and the United States, Rs. 2,232.

Hats. (*Straw.*)

Increase amounting to Rs. 19,196 in 1901 and 6,542 in number. France produced an increase of Rs. 10,789; the United Kingdom, Rs. 7,610.

Hides. (*Tanned.*)

Increase of Rs. 8,042 in 1901, principally in goods from India, Rs. 9,018; France, Rs. 5,850. From Pondicherry the value shows a decrease of Rs. 6,975.

Hulls of Vessels Abandoned.

Valued at Rs. 9,230, as against nil in 1900.

Iron Bars.

Total decrease in value in 1901 as compared with 1900, Rs. 113,566, of which Rs. 118,288 is ascribed to the United Kingdom. Belgian goods show an increased value of Rs. 4,794.

Sheets.

Declared value decreased by Rs. 28,153 in the imports. From the United Kingdom Rs. 27,719 and from India Rs. 1,295. Belgian goods show a slight increase of Rs. 1,295.

Wrought of other sorts.

Increase in imports in 1901 of Rs. 11,112, of which Rs. 10,453 are goods from the United Kingdom.

Jewellery.

The declared value in 1901, Rs. 12,487, is more than in the previous year; the United Kingdom showing an increase of Rs. 9,231, and France Rs. 9,287. The imports from India have diminished in value by Rs. 2,863; from Pondicherry by Rs. 1,155; from Switzerland by Rs. 1,382.

Lard.

As compared with 1900 there is a decrease of kilos. 208,562, and in value of Rs. 102,049. The United Kingdom shows a decrease of Rs. 1,502; India, Rs. 5,208; France, Rs. 30,147; the United States, Rs. 71,345; Hong Kong and China show increases of Rs. 2,100 and Rs. 4,504, respectively.

Leather. (*Boots and Shoes.*)

32,208 pairs less were imported in 1901 than in 1900, and the decrease in value amounted in Rs. 24,973; the decreases are under the United Kingdom, Rs. 8,548; India, Rs. 9,673; France, Rs. 17,105. There are small increases from Austria, Germany, and Pondicherry.

Sole.

Imports in 1901 show a decrease in value of Rs. 7,164, and in weight of kilos. 3,216 as compared with 1900. The decrease is due to less imports from Australia.

Wrought of other sorts.

The imports of 1901 are Rs. 58,217 less than in 1900. From the United Kingdom the shrinkage is Rs. 6,147; from France, Rs. 53,032; from Germany, Rs. 1,041. Indian imports have increased by Rs. 1,293. There are also slight increases from Australia, Pondicherry, China, and Switzerland.

Phosphate of Lime.

The quantity imported in 1901 has increased by kilos. 1,046,805; but the value has decreased by Rs. 29,716, as compared with the previous year. The value of imports from the United Kingdom increased by Rs. 6,731; from Belgium by Rs. 6,565; while France shows a falling off to the extent of Rs. 43,012.

Superphosphate of Lime.

As compared with 1900, there is an increase in quantity of kilos. 537,277, and a decrease in value of Rs. 47,804. Imports from the United Kingdom and from Germany are Rs. 55,295 and Rs. 3,008, respectively, less. From France and Belgium the value has increased by Rs. 6,094 and Rs. 4,405, respectively.

Linen Manufactures. (Canvas.)

Increase in value of Rs. 5,196, as compared with 1900. From the United Kingdom Rs. 10,393. France shows a decrease of Rs. 4,603, and Norway Rs. 773.

Machinery and Millwork.

This item shows a substantial increase in value of Rs. 134,905 over 1900. The United Kingdom is credited with Rs. 99,000; Continental India with Rs. 71,998. The value of imports from France shows a diminution of Rs. 18,092, and Germany of Rs. 18,000.

Manure of other sorts.

Total decrease in quantity, kilos. 363,005, and in value Rs. 69,099 in 1901. The United Kingdom shows in increase in value of Rs. 55,270; Argentine Confederation, Rs. 16,835;

Belgium, Rs. 5,296; and Seychelles Rs. 29,364. Imports from Australia are Rs. 161,169; from France Rs. 3,610, and from Singapore Rs. 4,320 less in value.

Margarine.

The quantity imported in 1901 is kilos. 66,431, and in value Rs. 65,185 in excess of imports in 1900. The principal increase Rs. 44,973 comes from Holland; from the United States, Rs. 18,234; from Germany, Rs. 3,754; from the United Kingdom, Rs. 1,025.

Danish margarine shows a decrease of Rs. 3,893.

Military Articles.

Show an increase in value of Rs. 326,705 as compared with 1900, from the United Kingdom and Continental India.

Castor Oil.

Imports have increased in 1901 by 128,294 kilos., and in declared value by Rs. 33,919. From the United Kingdom 478 kilos. against Nil in 1900; and from Continental India 410,257 kilos. as compared with 282,441 kilos. in the previous year.

Cocoanut.

An increase of hectolitres, 1,199, and value of Rs. 8,337 in 1901 over 1900 from Seychelles.

Gingelee.

This article shows a decrease in quantity of 35,432 kilos., and in value of Rs. 11,573 in 1901 as compared with 1900, the decrease being in the imports from Continental India.

Linseed.

The increase under this head is 460 hectolitres in quantity and Rs. 24,463 in value over 1900. The increase being the produce of the United Kingdom.

Petroleum.

The imports in 1901 show an increase of hento. 13,885 and in value of Rs. 156,887 over 1900 from the United States and the produce of Russia.

Pistachio.

The quantity imported in 1901 is 290,491 kilos., of the value of Rs. 113,959, as against 347,277 kilos. of the value of Rs. 117,851 in 1900.

Other Sorts.

This item shows a large increase in quantity and in declared value, Rs. 290,247, as compared with 1900. The produce of the United States shows an increase in value of Rs. 287,576, and the United Kingdom, Rs. 4,958. The produce of France has diminished in value by Rs. 2,821.

Opium. (Crude.)

As compared with the imports and value of 1900 there is an increase in 1901 of 324 kilos., and value Rs. 15,262.

As Drugs.

Increase in quantity by 480 kilos. and in value by Rs. 11,720 as compared with the imports of 1900. The value of the produce of Turkey is Rs. 11,481, as against nil in the previous year. The produce of the United Kingdom and India have slightly increased in value while the imports from France are nil against 86 kilos. of the value of Rs. 1,217 in 1900.

Paper Manufactures.

Shows an increase in value of Rs. 6,673 in 1901 over 1900. The produce of the United Kingdom increased by Rs. 4,527; of France, Rs. 3,803; of the United States, Rs. 1,585. There is a decrease in German goods of Rs. 2,237.

Paper Packing.

Increase in value in 1901 Rs. 10,105; from France, Rs. 11,995; from the United Kingdom, Rs. 471; and a decrease of Rs. 2,361 in German goods.

Plague Serum.

Increase in value by Rs. 6,854 in 1901.

Pockets. (Empty.)

The number imported in 1901 increased by 154,514 and the value by Rs. 38,067, as compared with the previous year, principally from Continental India.

Nitrate of Potash.

There is a decrease in quantity in 1901, but an increase in value of Rs. 114,052 as compared with 1900. The value of the imports from India are Rs. 115,984 higher, while the United Kingdom shows a decrease of Rs. 1,932.

Sulphate of Potash.

The total increase in value in 1901 amounts to Rs. 32,867; Rs. 39,673 from the United Kingdom; and Rs. 3,119 from France. Germany shows a decrease of Rs. 9,925.

Provisions. (Preserved.)

Value increased by Rs. 95,797. The increase comes from the United Kingdom, Rs. 35,010; France, Rs. 37,148; Portugal, Rs. 23,437; Spain, Rs. 2,777; Switzerland, Rs. 9,315; Germany shows a decrease of Rs. 5,439; Belgium, Rs. 7,102.

Rattans.

The imports of 1901 over 1900 show an increase in weight of 85,347 kilos., and in value Rs. 20,629. Increases from Continental India, China, and Singapore.

Saddlery and Harness.

An increase in the value of imports in 1901 of Rs. 11,708, as compared with 1900, of which Rs. 10,134 from the United Kingdom.

Salt.

The imports in 1901 show an increase in quantity of 563,736 kilos., and a decrease in value of Rs. 41,161, as compared with 1900; the increased quantity coming from France, Aden, and Muscat.

Seeds. (Aniseed.)

The quantity imported in 1901 is only 5,898 kilos., as against 37,250 kilos. in 1900. There is, however, an increase of value of Rs. 8,018, chiefly on Indian goods.

Mustard.

Increase in 1901 of 29,968 kilos., and of value Rs. 5,845 over 1900 from Continental India.

Soap. (Ordinary.)

The imports in 1901 show an increase in weight of 71,272 kilos., and in value of Rs. 20,029. Imports from the United Kingdom show an increase in value of Rs. 12,985, and the United States, Rs. 9,561. From France, the value has decreased by Rs. 1,266; and from Seychelles by Rs. 1,226.

Soda. (Caustic.)

Shows a decrease in quantity of 56,160 kilos., and in value of Rs. 9,654 in 1901 over 1900. The United Kingdom shows a shortage in value of Rs. 11,260, and France an increase of Rs. 1,606.

Nitrate of Soda.

The imports in 1901 are 2,424,642 kilos., of the declared value of Rs. 251,492, as against 2,396,423 kilos. of the value of Rs. 229,458. Chili shows a large increase in value, and the United Kingdom a slight augmentation.

Specie. (Gold.)

Shows a decrease in value of Rs. 29,739 in 1901.

Silver.

The value of imports under this head is Rs. 4,670,523 less in 1901 than the imports of the previous year.

Spices. (Black Pepper.)

Increased in value by Rs. 8,327 in 1901, as compared with 1900 from India. The imports from Singapore show an increase in value of Rs. 2,241.

Spirits. (Brandy.)

Decrease in quantity of only 261 litres, but the value is decreased by Rs. 13,603, of which Rs. 12,494 is under France.

Whisky.

Has increased in quantity by 12,587 litres, and in value by Rs. 19,234 in 1901 from the United Kingdom.

Stationery.

Imports in 1901 show a decrease in value of Rs. 8,368, principally from France Rs. 6,427; Germany, Rs. 2,835; Austria and Belgium. There is an increase in the value of imports from the United Kingdom of Rs. 2,413.

Steel. (Unwrought.)

Increase in weight of 4,155 kilos., and in value of Rs. 6,977 in 1901 from the United Kingdom, and, to a small extent, from the United States.

Sulphur. (Common.)

Imports increased in quantity by 66,543 kilos., and in value by Rs. 37,749 in 1901, as compared with 1900; the principal increase being in imports from France.

Tin. (Plates.)

Show a decline in 1901 in weight of 57,789 kilos., and in value of Rs. 21,540 from the United Kingdom and Continental India.

Tobacco. (Manufactured.)

The imports in 1901 amount to 114,646 kilos., of the declared value of Rs. 224,172, as against 129,604 kilos., of the declared value of Rs. 232,714 in 1900.

Reunion exhibits a large increase and the United States a decrease.

Cigars.

The imports in 1901 are 9,225 kilos., of the value of Rs. 33,410, as compared with 6,627 kilos., of the declared value of Rs. 19,958 in 1900. The principal increases are under the following heads — United Kingdom, Rs. 2,126; India, Rs. 11,126.

Unmanufactured.

The imports in 1901, as compared with 1900, declined in weight by 3,568 kilos., and in value by Rs. 12,065.

Umbrellas and Parasols. (Cotton.)

In 1901 the number has diminished by 17,169, and the value by Rs. 20,971. The smaller imports from the United Kingdom and from France account for the decrease.

Wax. (Bees.)

Increased in 1901 in quantity, 3,077 kilos., of the declared value of Rs. 6,317, as compared with 1900.

Wine. (Claret in casks.)

Measured by the imports of 1900 the year 1901 shows a decrease of 5,577 hectolitres, and in value of Rs. 143,793.

Vermouth in casks.

As compared with the imports of 1900, there is a reduction in 1901 in quantity of 132 hectolitres, and in value of Rs. 5,102.

Vermouth in bottles.

Shows a decrease of 18 hectolitres in measurement, and Rs. 16,266 in declared value in 1901.

Wood, Boards and Planks

The item exhibits an increase of 1,498 cubic metres in quantity, and Rs. 52,346 in value, as compared with the imports of 1900. A large quantity of timber has been employed in the erection of the military camp at Phœnix.

Shooks.

The imports in 1901 show an increase over the imports of 1900 of 8,456 bundles, and in value of Rs. 22,171, as compared with the imports of 1900. Each bundle is to form a cask in which principally molasses are exported.

Timber.

This item also shows a substantial increase in 1901, both in quantity and in value, and is also attributable to construction of military quarters at Phœnix.

Woodenware.

The declared value of exports in 1901 has declined by Rs. 73,606, as compared with 1900; the imports from the United Kingdom having decreased by Rs. 80,276; the imports from other countries show a total increase of Rs. 8,625.

Woollen Manufactures (Mixed with Cotton and Silk).

The imports in 1901, as compared with 1900, show a decrease in quantity of 97,208 metres, and in declared value of Rs. 52,268. The imports from France have decreased in value by Rs. 61,148; from India by Rs. 4,327; from the United Kingdom by Rs. 1,162; and from Switzerland by Rs. 1,270. The imports from Germany show an increase of Rs. 10,647; from Italy, Rs. 2,090; from Holland, Rs. 1,802; and from Belgium, Rs. 1,181.

EXPORTS.

The principal articles exported from Mauritius are sugar, rum, molasses, cocoanut oil, aloe fibre, and vanilla, the produce of the Colony. The quantities and values exported in the last five years are shown in the following table:—

Articles.	1897.	1898.	1899.	1900.	1901.
Sugar—					
Kilos	138,079,700	154,548,657	164,911,833	174,765,785	157,016,976

MINES, MANUFACTURES AND FISHERIES.

There is practicaly nothing to add to the information given under this head in previous reports, and the space usually devoted to this heading will be appropriated to other subjects.

BOTANIC GARDENS.

The Botanical Gardens are divided into three sections, viz., The Pamplemousses, Le Réduit, and Curepipe Gardens.

The most important is the Pamplemousses Gardens, which is 65 acres in extent. Large numbers of useful plants, fruit, and timber trees are propagated there, namely:—

Forest trees.—Eucalyptus, teak, casuarina, mahogany, cedrela, grevillea, terminalia, guazama camphor, &c.

Economic plants and fruit trees.—Coffee, litchis, nutmegs, cloves, different varieties of citrus, kola, coca ægle marmelos, pine apple, bananas, cacao, cocoanut, &c.

Fibres.—Sanseviera, different varieties of agaves, China grass, New Zealand flax, musa textilis, &c.

Canes.—New varieties of sugar canes introduced from other countries are propagated and distributed to the planters.

Réduit Gardens.

These form part of the Réduit domain. Part of the ground is under forest plantation. The trees produce a good supply of fuel and large quantities of seeds.

Curepipe Gardens.

This garden is chiefly used for nursing plants that cannot be successfully grown at Pamplemousses owing to the climate. Large numbers of seedlings are raised yearly, viz., juniperus, pinus, sinensis, eucalyptus, and scattered all over the Island.

These three gardens are at different elevations, and have three distinct climates. They are well suited, therefore, to the purposes of experimental acclimatation.

But distinct from the Government Gardens, Mauritius possesses the station, Agronomique, a subsidised experimental and scientific sugar plantation, where agricultural, chemical, and other experiments likely to be of use to planters are made under skilled supervision.

LANDS GRANTS AND GENERAL VALUE OF LAND.

There are practically no land grants in Mauritius, as almost all the alienable Crown Land has already been alienated, and the remaining land which consists of forest land and Pas Geometriques, *i.e.*, the land adjoining the foreshore, will always be retained by the Government in the public interest.

SHIPPING.

The aggregate tonnage of vessels entered at Port Louis from the United Kingdom, British Possessions, and foreign countries during the twelve months ended 31st December, 1901, amounted to 401,406 tons, and the tonnage cleared, to 397,592 tons, as against 337,834 tons entered and 333,106 tons cleared in 1900.

The above table shows a decided increase of both vessels and tonnage in 1901 over 1900.

CLASSIFICATION OF VESSELS.

Statements B and C exhibit the vessels classified according to their nationality and their tonnage, together with the difference between the past and previous year.

The figures show that the trade of the Colony has been carried to a larger extent during 1901 than in 1900 under the British flag.

Of French steamers there is a decrease of 14 in number and 6,904 in tonnage in 1901, which is accounted for by the withdrawal of the "Druentia" from the Madagascar bullock trade.

Other nationalities show, on the whole, slight increases.

Statement D is a summary of the British and foreign vessels entered and cleared during the five years ended 31st December, 1901.

With regard to the coasting trade (included in the previous figures) the following comparative statement is submitted:—

—	Entered.						Cleared.					
	Sailing Vessels.		Steamers.		Total.		Sailing Vessels.		Steamers.		Total.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No	Tons.	No.	Tons.
1900.												
Cargo ...	31	6,630	1	183	32	6,813	33	7,026	1	183	34	7,209
Ballast ...	—	—	—	—	—	—	—	—	1	875	1	875
Total ...	31	6,630	1	183	32	6,813	33	7,026	2	1,058	35	8,084
1901.												
Cargo ...	30	6,524	—	—	30	6,524	29	6,357	1	4,055	30	10,412
Ballast ...	—	—	1	27	1	27	—	—	1	27	1	27
Total ...	30	6,524	1	27	31	6,551	29	6,357	2	4,082	31	10,439

These figures differ but in a small degree, except in the case of a steamer in 1901 with plant for the electric cable establishment at Rodrigues.

Exclusive of the shipping above mentioned, 13 transports and vessels of war with a tonnage of 47,862 tons entered the harbour during 1901, as compared with 8 in number and 33,225 tons in 1900.

Statement of number and tonnage of British and foreign sailing vessels and steamers entered and cleared for 1900-1901.

SUEZ CANAL.

The number and tonnage of steamers entered at this port passing through the Suez Canal during the year 1901 was 38, of 74,012 tons, respectively, as against 37 in number and 72,122 tons in 1900.

In 1901 the declared value of goods imported by these steamers was Rs. 3,868,349.66, and in 1900 the value amounted to Rs. 3,659,280.29.

The number cleared in 1901 was 24, representing a tonnage of 49,040 tons, while in 1900 the number was 28 and tonnage 51,780 with exported goods, valued in the former at Rs. 892,312.39 and in the latter year at Rs. 1,851,135.16.

The following summary exhibits the figures more fully:—

Entered.

Year.	No.	Tonnage.	Value of goods.
1900	36	68,863	3,659,280.29
1901	38	74,012	3,868,349.66

Cleared.

Year.	No.	Tonnage.	Value of goods.
1900	28	51,780	1,851,135.16
1901	24	49,040	892,319.39

In 1901, 3 steamers of 6,264 tons cleared for Réunion, although proceeding to Marseilles *viâ* the Suez Canal, and 2 steamers of 3,894 tons, without entering or clearing at this port, left for Marseilles *viâ* Réunion and the Suez Canal from the roadstead.

These steamers are not included in the above statement.

The number and tonnage of steamers which called at this port for the purpose of coaling are as follows for 1901:—

Number.	Tonnage.
20	36,937

LEGISLATION.

Twenty-four Ordinances were passed during the session of 1901, mostly of local interest. But the following Ordinances may be mentioned as having an interest outside the Island.

Ordinance No. 10 of 1901.—To amend the law relating to the survey and detention of unseaworthy ships. This law is based on the Merchant Shipping Act of 1897 (60 & 61 Vict. cap. 59), and extends the law relating to the survey and detention of unseaworthy ships to undermanning. The Ordinance applies both to British and foreign ships.

Ordinance No. 13 of 1901.—To facilitate the investment of trust and other funds in the United Kingdom in Mauritius Government securities. This Ordinance is intended to fulfil the conditions required by the Lords Commissioners of the Treasury for the investment of Trust Funds, and the effect will be to include Mauritius Government securities in the application of the Colonial Stock Act of 1900.

Ordinance No. 17 of 1901.—To amend Ordinances No. 28 of 1892 and No. 29 of 1895 (Customs), and the Schedules to the Customs Ordinances. This Ordinance introduces some amendments in the Customs Tariff, chiefly in connection with machinery and apparatus imported for local manufactures, and manure fertilizers and other substances imported for the use of agriculturists. The item III. of Schedule II. of Ordinance No. 28 of 1892—Table of articles prohibited to be imported—was amended so as to include indecent, obscene, seditious, or inflammatory prints and books.

Ordinance No. 22 of 1901.—To amend the Penal Code. Recasts the whole of the articles of the Penal Code on offences against morality and religion by words or writing, and with regard to libel and defamation.

EDUCATION.

Primary education in Mauritius is carried on by means of Government and Aided Schools. The Aided Schools are maintained by—

1. Fixed salaries to teachers.
2. Result grants.
3. Maintenance grants.

The Government Schools are supposed to be undenominational schools, but clergymen have access to them to teach pupils of their own creed. The Aided Schools are supposed to be denominational schools. In actual practice, however, the denominational schools are not denominational, as the following figures which give the religious creeds of the children attending the denominational schools tend to show:—

The Roman Catholic Schools were attended by—
6,241 Roman Catholic pupils,
19 Church of England pupils,
30 pupils of other Christian denominations,
294 Mahommedans, and
724 Hindoos.

The Church of England Schools were attended by—
453 Roman Catholics,
325 Church of England pupils,
6 of other Christian denominations,
354 Mahommedans, and
871 Hindoos.

The Presbyterian School was attended by—
73 Roman Catholics,
7 Church of England pupils,
72 of other Christian denominations.
20 Mahommedans, and
7 Hindoos.

The Mahommedan Aided School was attended by—
72 Roman Catholics,
7 Church of England pupils,
54 Mahommedans, and
67 Hindoos.

There were 166 Primary Schools in Mauritius in 1901 of which 72 were Government Schools and 94 Aided Schools.

The number on roll was—

For Government Schools	9,352
For Aided Schools	9,668
Total	19,020

The average attendance was—

Government Schools	5,584
Aided Schools	6,374
Total	11,958

The cost to Government for each pupil was—

	Rs.
For Government Schools	**16.02**
For Aided Schools	**10.53**

Secondary education is provided by the Royal College and two schools.

The following was the attendance:—

—	1900.	1901.
Royal College	169	171
Port Louis School	54	68
Curepipe School	116	102
Total	339	341

Of these 150 were free scholars.

Technical or industrial education is provided by three sets of apprenticeships, namely, engineering, horticultural, and needle-work apprenticeships.

Five apprenticeships, each tenable for five years, at the Government workshops, are awarded every year by competitive examination to boys under 16 years of age.

Two apprenticeships, each tenable for four years at the Botanical Gardens, are awarded every year by competitive examination to boys between 14 and 17.

Four needle-work apprenticeships, each tenable for three years and of the annual value of Rs. 100, are given every year by competitive examination to girls between 14 and 17 years of age.

The holders must follow the trade approved by the Needlework Committee.

The question of education in Mauritius is at present engaging the attention of the Government, and special arrangements are being made for improving the training of teachers by Normal Schools, and for the development of technical and industrial training.

HOSPITALS.

The following is a return showing the number of patients admitted and discharged in the various hospitals of Mauritius during the year 1901. It should be explained that the year was an unhealthy one, and that the sharp fall in the sick returns, which is generally well marked in September, was not well defined in 1901.

HOSPITALS.

Hospitals.	Number remaining in hospital at the beginning of the year 1901.	Number admitted during the year 1901.	Daily average in hospital during the year 1901.	Attendants.					Patients discharged.			Number who died in 1901.	Average stay of those			The largest time for which any inmate has stayed.
				Nurses doing no other duty.		Servants partially or not at all employed as nurses.										
				Day nurses.	Night nurses.	Not nurses.	Partial day nurses.	Partial night nurses.	Cured.	Relieved.	Not improved.		Dead in 1901.	Discharged.	Remaining at the end of 1901.

(*a.*) Female prisoners are treated at the civil hospital.

(*b.*) There is no nurse in the civil hospital. There are only warders, Sisters of Charity, and male and female servants. Male servants 34, females eight.

(*c.*) Night duty is performed by day nurses, two working every second night.

The annual recrudescence of malaria occurred early in March, and the epidemic was more severe than is customary during the two following months. The number of patients admitted in the various hospitals for malaria in 1901 was over four thousand, which represents an excess of 1,334 over the number of the previous year. The distribution of malaria was also wider than in previous years, and some districts previously considered healthy were attacked.

Dysentery also showed a considerable increase, and the return shows 799 cases of dysentery, with 143 deaths. The case mortality, it is satisfactory to note, has been considerably reduced, and excellent results have been obtained from the saline treatment.

There were 1,093 detected cases of plague in the Island. With the exception of a doubtful case at the Lunatic Asylum, no patient contracted the disease in any of the hospitals or institutions of the Colony. No connection has been found to exist between the recurrence of plague and meteorological or other conditions.

Fourteen cases of enteric were admitted into hospital, and there is no doubt that the disease is spreading.

Tuberculosis is also on the increase, and is much favoured by the condition of extreme poverty to which a large section of the people are necessarily condemned.

The months of March, April, and May are the months of the greatest mortality in the Island, but the unhealthy season extends from January to May. These months are favourable to the breeding of mosquitoes, and the early months of the year being the hottest tend to produce a condition of general debility which renders the body favourable to the reception of disease germs.

The population of Mauritius is fairly well protected by vaccination.

On the whole it may be said that whilst the Government and the Medical Department have striven so far as their limited financial resources permitted to improve the condition of the Island, disease and the condition which produce diseases have been on the increase. This is especially the case with poverty, one of the main causes of insanitary life and disease.

LUNATIC ASYLUM.

The Lunatic Asylum is situated at Beau Bassin at a height of 750 feet above sea level. The following are the statistics for the year:—

General Statistical Table.

—	Number admitted during 1901.	Daily average number during 1901.	Number of Attendants.				Discharged.			Number of Patients who died in 1901.	Average stay of those		
			Residents.		Non-residents.								
			Employed in attendance on Patients	Employed as Servants or partially as Attendants.	Employed in attendance on Patients.	Employed as Servants or partially as Attendants.	Cured.	Relieved.	Not improved.		Died in 1901.	Discharged.	Remaining at end of 1901.
Male	81	245·83	2	1	34	12	9	35	25	17	1,084·00	1416·85	2,528·88
Female	46	154·05	4	—	12	2	1	18	15	13	2,127·23	1394·63	2,615·08
Total	127	399·88	6	1	46	14	10	53	40	30	1,556·06	1409·08	2,744·06

By far the greater number of admissions are due to mania. In fact, the numbers given for mania exceed the whole number classified under the heads idiocy, melancholia, dementia, and delusional insanity taken together.

POOR LAW RELIEF.

The Poor Law relief in Mauritius consists of both indoor and outdoor relief.

The indoor relief is given at the various hospitals, at the Leper Asylum, at the Barkly Asylum for the aged and infirm poor, and at the various convents as well as at the various dispensaries.

The outdoor relief consists in grants of food, money, and clothes.

Altogether there were 78,013 persons who received Poor Law relief in 1901.

Poverty and pauperism are on the increase in Mauritius, especially amongst the creole population. The habits of dependency engendered by the family system, and by the paternal and socialistic system which has so largely crept into the Administration tend to weaken the habits of self-help and self-reliance of the creole population. The Indian population are slowly but surely pushing the creole population to the wall, and with their habits of industry and self-reliance they must ultimately prevail. Unfortunately, the creole population have learnt to look to the Government in all times of Colonial, family, or personal misfortune or distress. Individualism has been destroyed by State interference and State aid, with results that are likely to be calamitous to the race.

The only resource remaining is apparently emigration, and as there are many good workmen amongst the creole population who by their intelligence and ability are capable of earning a good livelihood in South Africa, it is to be hoped that they may avail themselves of openings in that country.

POLICE.

The total effective strength of the Police Force on the 31st December, 1901, was 709. This total comprised 20 different nationalities.

207 were in possession of the good conduct medal, and 25 were dismissed during the year.

The following table gives the result of Police work in 1901, in the repression and detection of crime:—

Nature of Offences.	No. of cases.	No. of persons charged.
Serious offences reported to or detected by the Police, in which persons were charged.	2,049	2,532
Serious offences reported to or detected by the Police which formed the subject of inquiries, and in which no persons were charged.	7,956	282
Minor offences reported to or detected by the Police in which persons were charged.	5,474	7,326
Minor offences reported to or detected by the Police which formed the subject of enquiries, and in which no persons were charged.	3,917	—
Other offences against the Labour Law ...	750	750
Vagrancy	1,008	1,008
	21,154	11,898

The amount of property declared to have been stolen was valued at Rs. 19,316.47, of which Rs. 13,098.75, or 67 per cent., was recovered by all agencies, and Rs. 11,748, or 61 per cent., by the Police only.

PRISONS.

The total number of persons admitted to prison after conviction was 4,555 males and 235 females.

The following table shows a decreasing number of admissions:—

Year.	Males.	Females.
1897	7,374	380
1898	7,541	455
1899	5,237	249
1900	4,677	221
1901	4,555	235

The diminution is due to the working of Ordinance No. 38 of 1898, an Act equivalent to the First Offenders Act.

The number of persons under detention was 704 on the 31st December. But there is a large increase in the number of released prisoners reconvicted.

There was an increase of 1,325 in the number of prisoners sentenced in 1901 who had previously been convicted.

This shows that prison has not acted as a sufficient deterrent, and the Prison Regulations and Prison discipline are now under consideration with a view to amendment.

Of the prisoners convicted, 1,517 were sentenced for serious crimes, and 3,288 for minor offences.

Comparative table showing the number of offences, apprehensions, convictions, and acquittals for the last four years:—

—	1901.	1900.	1899.	1898.
The number of offences known to the Police or the Magistrates.	19,259	19,753	21,585	33,803
The number of persons apprehended by the Police or summoned before the Magistrates.	20,233	22,529	24,244	28,945
The number of convictions in Inferior Courts :—				
1. For offences against the person	651	826	817	694
2. For prædial larceny	255	250	252	547
3. For offences against property other than prædial larceny.	1,506	1,381	1,326	1,768
4. For other offences	13,465	15,062	15 421	18,842
The number of convictions in the Supreme Court :—				
1. For offences against the person	12	11	13	21
2. For prædial larceny	—	—	—	—
3. For offences against the property other than prædial larceny.	7	7	11	31
4. For other offences	2	1	—	—
The number of persons acquitted :—				
1. In the Inferior Courts ...	1,581	1,641	1,665	1,998
2. In the Supreme Court ...	12	34	3	19

The death-rate in the prison was 6·27 per cent. These figures show an improvement, but are still far above the figures that could be held to be satisfactory.

The question of the improvement in the health of the prisoners is engaging the constant attention of the Government, and it is hoped that reforms now in course of execution will have a beneficial effect.

The cost of housing the prisoners averaged Rs. 7.68 per head in 1901. The cost of feeding averaged Rs. 45.95, and the hospital charges, Rs. 9.66 per head.

The average cost of each prisoner, including clothing, but excluding guarding, was Rs. 75.45 per head.

The average cost of each prisoner, including guarding, &c., and all charges, was Rs. 170.85 per head.

The delicate and difficult question of prison labour was considered, and the proposal to introduce the Indian carpet industry received careful attention, but had to be abandoned as impracticable. At present, prison labour is confined to stone-breaking, to certain trades, such as basket-making, carpentering, and to gardening, or road-making.

REFORMATORY.

There were 208 boys sent to the Reformatory in 1901, which still retains its character of a boys' prison rather than a Reformatory. Some progress has been made in the Industrial Branch of the training. This is due to an increased amount of Government work. That the Reformatory does not reform the boys is evidenced by the fact that during the year 1901 131 ex-Reformatory boys passed through the prisons.

The trades taught are carpentering, tinsmith, basket-making, shoemaking, and gardening.

VITAL STATISTICS.

The year 1902 was the Census year throughout the Empire, and the Census of Mauritius was taken on the morning of Monday, the 1st April. This date corresponded with that of the Census in the United Kingdom, and probably with that adopted throughout a greater part of the Empire.

The result of the Census shows that the population of Mauritius on the 1st April was 373,336, and of the dependencies, 4,859; making a total of 378,195.

The following table compares the present Census with previous Censuses, and divides the population into two great classes—General and Indian—distinguishing the males and females of each class, but excluding the military and the crews of the shipping in harbour.

Dates of Censuses.	Year.	General Population.			Indian Population.			Total.		
		Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
August	1846	55,663	46,554	102,217	48,935	7,310	56,245	104,598	53,864	158,462
20th November... ...	1851	55,059	47,768	102,827	64,282	13,714	77,996	119,341	61,482	180,823
8th April	1861	61,346	56,070	117,416	141,615	51,019	192,634	202,961	107,089	310,050
11th April	1871	51,771	48,013	99,784	141,804	74,454	216,258	193,575	122,467	316,042
3rd April	1881	57,303	53,578	110,881	151,352	97,641	248,993	208,655	151,219	359,874
5th April	1891	58,539	56,129	114,668	147,499	108,421	255,920	206,038	164,550	370,588
1st April...	1901	56,452	55,485	111,937	143,100	115,986	259,086	199,552	171,471	371,023

From the above figures it will be seen that the population has increased during the last ten years by 435 only. That the General population (exclusive of Indians) has decreased by 2,731 (the males by 2,087 and the females by 644); while in the Indian population there has been an increase of 3,166, the males having decreased by 4,399, whilst the females increased by 7,565.

The death-rate in Mauritius is generally speaking quite as high as the birth-rate, and, in some cases, surpasses it. This it did in the years 1900 and 1901.

The death-rate among the Europeans, whites, mixed and coloured population compares less favourably with the birth-rate than among the Indian population.

In the Indian population the Indo-Mauritians have a highest birth-rate and lower death-rate than the other Indians.

It will be clear, therefore, that the population of Mauritius as a whole is becoming more and more Indian.

The Chinese population of Mauritius numbers 3,515, of whom 3,457 are males and only 58 females.

In the class of Indo-Mauritians the males and females are nearly equal, though there is an excess of males.

In the class of other Indians there are two males to one female.

But the Indianisation of Mauritius must be greatly accelerated as the proportion of Indian females increases.

Taking the whole population of the Colony, including Dependencies, the population was divided as follows:—

Males	204,540
Females	173,655

But the excess of the males over the females which was due to the importation of coolies is steadily decreasing.

In the matter of distribution it may be said that the population are leaving the unhealthy coast districts, including the unhealthy town of Port Louis, and migrating to the higher districts of the interior.

The population may be broadly divided into those employed on sugar estates and those not so employed. Of the total population, 144,505 were employed on sugar estates, and 215,369 not on sugar estates. The number living on estates is returned as being 23,811 less than at the previous Census; but this does not mean that fewer persons are engaged in sugar production, which has, as a matter of fact, largely increased. The explanation is that large portions of sugar estates and, in some cases, whole estates, have been sold to the Indians, who are cultivating sugar as peasant proprietors.

This tendency to "morcellement," or towards an Indian peasant proprietorship is further illustrated by the fact that whilst in 1881 there were 171 estates, in 1891 the number had been reduced to 131, and in 1901 it was further reduced to 115.

The average number per house of the whole population was 4·2. But it must be understood that the word house must, in this connection, be held to include such buildings as a shelter made of paraffin tins.

The density was 204 to the square kilometre, or 527 to the square mile.

There were 1,235 marriages performed by the Civil Status in 1901, and it is necessary to explain that with the exception of marriages "*in articulo mortis,*" the Civil Status marriage is the only legal marriage. But large numbers of Indians are married in accordance with Indian customs and by means of the ceremonial and religious rites traditional to their caste. These marriages, though recognised morally as such by the Indians, are not recognised by the law. It is well to keep this point in mind when criticising the percentage of illegitimate births in Mauritius.

The marriage rate per thousand gives 6·6 for 1901, as against 7·6 for 1900. To illustrate this figure it is as well to mention that the marriage rate for the United Kingdom for 1899 was 15·7.

But Jamaica for 1899 had a rate of only 5·0 per thousand.

There were 12,910 births in Mauritius in 1901. Of these, 6,614 were males and 6,296 females. The birth-rate for the General population was 34·0 and for the Indian population 35·1 per thousand.

Of these there were 8,187 illegitimate births, as against 9,553 in 1900. This gives a percentage of 63·4 as against 66 for 1900. But, as already explained, the statistics of illegitimacy must not be taken as any index of the morality of the people, at all events so far as the Indian population is concerned.

The mortality for the last five years is given below:—

Year.	Mortality.	Rate per 1,000.
1897	11,066	29.5
1898	12,064	31.9
1899	13,222	34.8
1900	13,691	34.8
1901	14,971	40.3

showing a steadily increasing death-rate.

To understand these figures, it is as well to compare them with the figures for the United Kingdom for 1899, which were 18·3 per 1,000, or those for Jamaica which were for the year 1900, 22·8.

The following is the death-rate of three towns during the last quarter of the year:—

Calcutta	33·6
Cairo	35·4
Port Louis (Mauritius)	85·7

It would be difficult to find a more eloquent argument in favour of sanitary reform in Port Louis than is given in the above figures.

During the year 1901 a disease appeared in Mauritius which has since been identified as Surra. It is still ravaging the estates on the southern side of the Island, but it has during the time that it has been on the Island devastated the stables and the herds of the planters. It is estimated that about one-third of the draught cattle have died and that nearly two-thirds of the mules have died. Attempts are being made to introduce mechanical instead of animal traction, but it is impossible to doubt that the sugar industry of Mauritius has received a fresh blow at a time when there were many other troubles to contend against.

CLIMATE.

The climate of Mauritius varies greatly in different localities. Broadly speaking, it is damper and cooler on the windward side of the Island than on the leeward, and it is most damp in the higher districts of the interior.

The Trade wind which is saturated with moisture is, when it reaches the higher levels, cooled down to the dew point, thus producing rain and mist.

The Royal Alfred Observatory is situated on the north-west or dry side of the Island, and the mean humidity for the year was observed to be 75 per cent. at the Observatory.

Two cyclones visited the Island in 1901, on January 12 and 13, and on February 25 and 26. The highest velocity of the wind recorded at the Observatory was 72·2 miles an hour, but from the damage done in other parts of the Island it is apparent that the velocity was not as high as that reached in the Moka District.

So far as is known there were four cyclones in the Indian Ocean in 1901.

The Island was visited by Mr. Maunder of the Royal Observatory, Greenwich, who took fifty-three photographs of the total solar eclipse. The staff of the Observatory, aided by a volunteer staff from the Colony, co-operated to the best of their ability in their effort to make Mr. Maunder's observations a success.

POSTAL.

The contract entered into, for one year, with the British India Steam Navigation Company in 1900, and which ceased in April, 1901, for a regular four-weekly mail service between Mauritius and Colombo direct, and Colombo to Seychelles and thence to Mauritius and from here to Europe *viâ* Seychelles and Aden has not been renewed, but the British India continues performing the usual four-weekly service between Mauritius and Colombo, and back. In the interval other steamers of that Company arrive here from India with mails.

The Messageries Maritimes Mail Packets continued as heretofore, running between Marseilles and Mauritius and back twice a month. Since October, 1901, they call at Seychelles, once a month, to and fro.

The mails from South Africa were brought for the most part by the Clan Line steamers, not by the Castle Line. The service between the Cape, Natal, and Mauritius was very irregular on account of the war.

Postal parcels from England for Mauritius are now sent both by the British and French Packets, since October, 1901, but no parcel posts from Mauritius, prior to that date, were sent by the French Packets, either for England or France; this is now done. In 1901, a Postal Commission was appointed by His Excellency the Governor to suggest improvements in the working of the Post Office and Telegraph Department. The report of the Commission has been sent to the Secretary of State for the Colonies, whose sanction is necessary before the suggestions made are carried out.

Since the latter end of 1901 we received, every day, weather telegrams from Rodrigues, through the Eastern and South African Telegraph Company, Limited. These cablegrams are retransmitted, daily, by the Telegraph Department here to the Director of the Observatory at Pamplemousses.

TELEGRAPH.

There was no interruption in the telegraph service during the year 1901, notwithstanding the numerous cases of illness which prevailed amongst the staff.

The cyclones did not interfere with the wires.

The telegraph wires on the Midland, North, Savanne, Moka, and Moka-Flacq lines continued to work properly.

The leading in wires at several stations had to be renewed, especially in the wet districts.

The number and length of the telegraph wires were the same as in 1900, and are given in the following tables:—

TELEGRAPH WIRES.

The following are the telegraph wires in Mauritius:—

	miles.
Two wires start from Port Louis northwards, pass through all the stations on the north line, and terminate at Grand River, S.E.	31
Making the length of the two wires	62
A third wire, the Observatory wire, from the Signal Mountain, Port Louis, to the Observatory, Pamplemousses	12
At Mapou, on the North line, ten miles from Port Louis, two wires leave the station, one of them runs to Cannoniers' Point ...	7
And the other to Butte-aux-Sables	9
These two wires communicate direct with Port Louis by means of a switch.	
On the Midland line two wires extend from Port Louis to Mahebourg (36 miles) ...	72
A third wire to Savanne terminates at Chemin Grenier	41
Two Moka line wires from Port Louis through Rose Hill to Riviere Seche ...	72
Direct communication from the Moka line and Moka-Flacq line is established through Rose Hill.	
At Petite Riviere, 5 miles from Port Louis, a wire goes to Bambous	5
This also communicates direct with Port Louis and all the stations on the Midland Line.	
Total ...	280

The telegraph office at the Central Railway Station was removed by the railway authorities from the main building of the Central Station to a separate outhouse.

There is a telephonic service in Port Louis which is the property of a private company.

RAILWAYS.

Exclusive of sidings, there are 105 miles of railway of 4 feet 8½ inches gauge. The steepest gradient is 1 in 27. The sharpest curve is 720 feet radius. The railway, exclusive of the Government traffic, earned Rs. 2,116,047. The working expenditure amounted to Rs. 1,340,617, being a decrease of Rs. 44,463 on the previous year.

One new locomotive, 50 12-ton waggons and 12 30-ton bogie waggons were received from England during the year.

6,300 yards of line were relaid with new rails and sleepers.

Nine bridges were repaired. The bridges are calculated for a weight of 275 tons, and the heaviest engine was 54 tons weight.

Seven new sidings were constructed, whilst the stations and buildings and platforms received additions and repairs in nearly all cases.

MILITARY.

The troops in the Colony at the end of 1901 numbered 2,314, and were composed as follows:—

——	No.
Staff	1
Royal Artillery	273
Ceylon Mauritius Company's R.G.A. ...	210
Royal Engineers	121
Army Service Corps	3
Army Ordnance Corps	13
Royal Army Medical Corps	16
Army Pay Corps	1
19th Madras Infantry	839
18th Bengal Infantry	837
Total	2,314

To assist the maintenance of this garrison the Colony paid £29,054 to the military authorities.

MISCELLANEOUS.

GENERAL OBSERVATIONS.

It is difficult to find anything new to say of Mauritius. Year after year sees the same fight with disease, hurricanes, and declining prices. The difficulties of the people and the condition of the country have been set forth in previous Reports.

There is nothing to add, and it would be wearisome to reiterate the dismal statistics of hospital reports, the technical speculation of the law of storms, or the melancholy record of a falling market.

But the year 1901 was an exceptional year in the history of Mauritius. The monotonous record was interrupted by an unusual event which calls for notice in this Report.

That year was the year of the visit of their Royal Highnesses the Prince and Princess of Wales. The story of the tour and the visit has been told in books and journals more widely read than official publications, and it would be difficult at this date to find anything that could give fresh interest to or throw new light on the subject. But it may be safely affirmed that in no country that they visited did Their Royal Highnesses find a stranger mixture of races and languages than in Mauritius; in no country did they find a community more sorely tried by the anxieties of sickness and poverty.

But during the few short days of the Royal visit the sickness and poverty were forgotten, the various languages expressed but one thought, the various races were united by a common sentiment, the sentiment of loyalty to the kindly and courteous Prince, and of reverence and admiration for the gracious and stately Princess who brought a gleam of sunshine and sympathy into the hard struggle for existence which is the daily life of the Mauritian people.

The years in Mauritius are, for the most part, noted for the calamities they have brought. There is the hurricane year of 1892 when the Island was devastated and houses blown down. There is the year of the great fire, the plague year, the year of the drought and the years of the low prices and hard times. Their Royal Highnesses have broken the tradition and have named a year when the anxieties were forgotten in a happy memory. They have given us the year 1901 as the Prince's year.

About 100,000 people witnessed the arrival of Their Royal Highnesses, and about 6,000 children marched past them. Deputations representing all races and classes attended the Levee.

A convent was visited, and a sugar mill, for Their Royal Highnesses were interested in both the charities and industries of the Island. In return, the people tried to show the Island at its best, and by their cheerfulness and good humour proved that there is a silver lining to the cloud that has so long hung over Mauritius.

GRAHAM BOWER,

Colonial Secretary.

1st November, 1902.

RODRIGUES.

The Island of Rodrigues is a dependency of Mauritius, administered by a magistrate. It has recently become important as one of the stations of the Eastern Telegraph Company.

The revenue of the year 1901 was Rs. 19,549, as against Rs. 19,601 in 1900.

The expenditure was Rs. 22,402 in 1901, as against Rs. 22,425 in 1900.

The population consists of 1,820 males and 1,525 females, making a total of 3,345, mostly of African descent.

The spiritual needs of the population are supplied by a Roman Catholic priest, with a salary of Rs. 2,000; and the health of the population is cared for by a Government Medical Officer.

There is a hospital and two dispensaries.

The climate is healthy and the population tends to increase.

The industries are tobacco growing, cattle raising, and fishing.

There was formerly good deer shooting, but the deer have been greatly reduced in number by the inhabitants.

GRAHAM BOWER,
Colonial Secretary.

1st November, 1902.

COLONIAL REPORTS—ANNUAL.

No. 412.

MAURITIUS.

REPORT FOR 1902.

(For Report for 1901, *see* No. 379.)

Presented to both Houses of Parliament by Command of His Majesty.
December, 1903.

No. 412.

MAURITIUS.

(For Report for 1901, *see* No. 379).

GOVERNOR SIR CHARLES BRUCE to MR. LYTTELTON.

Government House, Mauritius,
17th October, 1903.

SIR,

I HAVE the honour to transmit, herewith, the Blue Book of Mauritius for the year 1902, together with a report by Sir Graham Bower, K.C.M.G., Colonial Secretary.

2. The year 1902 must long remain a year of melancholy interest by an epizooty of surra, which not only threatened the ruin of the sugar industry but seriously prejudiced every public and private interest in the Colony. The history of the disease and its consequences have formed the subject of a long series of despatches, but its consequences have so materially modified the operations of the year in nearly every Department of Government that a despatch on the Blue Book would be wholly inadequate without a brief summary of the more important consequences to which it has led. The appearance of the Blue Book on the eve of my departure from the Colony must be my excuse for reproducing what I have already said on the subject on another occasion, and, indeed, I do not know that with more time and leisure I should be able to give a more concise and intelligible record of the measures adopted to avert financial disaster and the imminent peril of the sugar industry.

3. My address to the Council of Government, in opening the present Session, of necessity dealt largely with the matter, and

I reproduce from it the following extract which may, I trust, be found of general interest. It records, at least, the heroic struggle of a community, sorely tried by a long period of adversity, to overcome, in a spirit of self-help and without appealing for foreign aid, a visitation not less calamitous, although it may appeal less forcibly to sentiment, than the disasters which have recently befallen other tropical islands.

The months that have elapsed since the Prorogation of Council in December last have been months of labour and anxiety. Never perhaps in the history of the Colony has its immediate agricultural prosperity been so dependent on the meteorological influences that affect it. These influences have been most favourable, and by God's mercy we may now look forward with reasonable hope to an abundant crop; but the work of transporting the canes and carrying the sugar has to be undertaken in the face of difficulties unprecedented in the history of the Colony. Experience has perfected, on all the greater estates, economical and well organised arrangements for transport by animal draught, while the requirements of the small planters have been met, and the general business of carters and carriers has been carried on by the independent but intelligent industry of a laborious class of men drawn chiefly from the Indian population. Within a year the disease known as surra everywhere dislocated, and in districts destroyed, the established system. The consequences have affected not only the sugar industry and business more or less directly connected with it, but every department of public and private activity. In particular serious difficulties have obstructed the work of sanitation both in urban and rural districts. The imperative task of creating a new system of transport in substitution for the established methods was all the more formidable inasmuch as at the moment when the disease of surra appeared the financial prosperity of the sugar industry had been checked by other causes. In these circumstances the havoc caused by the disease produced a twofold difficulty; funds were urgently required for the cultivation of the land for the coming crop; and not less urgently required for the establishment of means of transport without which the crop could not be realised.

So far as concerns the cultivation of the land during the critical period extending from December 1st to March 31st, the peril was averted by the operation of the Sugar Estates (Advances in Aid) Ordinance, which provided for advances to estates and *Bailleurs de fonds* out of a loan of £200,000 raised in England. There can be no doubt that the ready sanction given by the Secretary of State to this measure and the prompt and indefatigable energy of the Loan Board Commissioners in respect of the distribution of the loan saved the Colony from imminent disaster. Nor was the action of the Government free from anxiety and difficulty, for the needs to be met were most pressing and at the outset we were faced by the problem of how to make the proceeds of the loan raised in London immediately available in Mauritius. This difficulty had not presented itself in connection with the advances made to planters in 1898 because at that time specie payments were suspended and advances were made in currency notes. I was naturally averse to resorting to so extreme a measure as the temporary suspension of specie payments, and fortunately it was not necessary. The uninterrupted cultivation of the crop during the critical period of the hurricane season was thus secured.

In the meantime the substitution of mechanical for animal transport had been vigorously undertaken, and the amount of advances in aid of this work authorised by Ordinance No. 34 of 1902 was increased from £70,000 to £220,000. The advances approved under this Ordinance provide for the purchase of about 450 kilometres of superficial tramway lines; about 40 kilometres of aerial wire tramways; and 25 automobiles. In addition the Government has assisted estates by the construction of 17 sidings of a total length of about 14,000 feet in accordance with the terms of a resolution passed by the Council on the 17th June, 1902. The special expenditure incurred during the year in order to meet the increased traffic diverted to the railway has been very large ; it includes :

	Rs.
Four Locomotives	186,000.00
Enlargement to goods sheds	12,000.00
Eight miles rails	225,000 00
Fifty open wagons for canes	157,500.00
Traffic overtime from September to January, 1903 ...	16,913.39
Locomotive overtime from September to January, 1903	12,961.08
Crop expenses	14,480.00

It is hoped that what has been done will go far to meet the requirements of the larger estates and will enable them to assist to a considerable extent the small planters having contiguous holdings, but in order to meet the wants of areas occupied by small planters not in proximity to the mills of the larger estates it has been decided to proceed at once with the construction of the projected Long Mountain Railway at an estimated cost of about Rs. 110,000, as well as with the construction of a light railway line in the district of Savanne, designed to provide for the needs of a large area of land occupied by small planters. The estimated approximate cost of this light line is Rs. 60,000. The cost of these lines it is proposed to charge partly to the revenue of the current year and partly to the revenue of 1903–1904. I have asked the Secretary of State to sanction a loan for the construction of the projected Black River Line, and further schemes of railway extension will be submitted to you.

The foregoing measures provide chiefly for the wants of the rural districts. For the transport of grain and other merchandise from the quays to the railway station in Port Louis, three sidings are being constructed. It has been necessary also to make special provision for additional quay accommodation for the landing of tramway materials, and this has been effected by the removal of the workshops and other buildings at Caudan Basin to Plaine Lauzun, where all the railway works are now concentrated. Three additional sidings have also been constructed for the sanitary requirements of Port Louis and another is being constructed for the same purpose.

The events of the year have, of course, materially affected the estimated Revenue and Expenditure. Nevertheless, I am glad to be able to assure you that our financial position, though demanding prudence, need cause no anxiety.

I have, &c.

CHAS. BRUCE,

Governor.

INTRODUCTORY.

The delay caused by the printer must again be the apology for the late presentation of this Report. The printing contract, which lapsed owing to the failure of the Government contractor, has been divided amongst several establishments, which have also private work to attend to, and the arrangement cannot be pronounced satisfactory. It is probable that the Government will ultimately be compelled to do its own printing, but in the meanwhile, the delays, however vexatious, must be endured.

In accordance with instructions contained in the Secretary of State's despatch of the 23rd December, 1902, the returns of revenue and expenditure for the financial year 1902-3, though, owing to the delay caused by the printers, they have been received before the completion of the Report, have not been included. The Report, therefore, except in the case of a return relative to Tramways, and one relative to the Public Debt, does not go further than the end of December, 1902.

The Revenue and Expenditure for the year 1902 was given in the Report for last year, but it will be convenient to reproduce from it the Revenue and Expenditure for the last five years, which was as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.
	Rs.	Rs.	Rs.
1897	7,996,705	8,626,798	899,336
1898	7,629,318	8,131,465	438,866
1899	9,066,314	8,406,227	1,077,715
1900	8,568,943	9,179,975	1,704,424
1901-02	9,043,066	8,568,943	1,834,669

The Public Debts stood as follows on the 30th June, 1902:—

	£	s.	d.
1. Savanne Railway 4½ per cent. Debentures, payable by annual drawings ...	42.193	10	0
2. Moka Railway 4 per cent. Debentures, payable by annual drawings ...	400	0	0
Carried forward	42,593	10	0

	£	s.	d.
Brought forward	42,593	10	0
3. Consolidated 4 per cent. Debentures, payable by annual drawings... ...	57,800	0	0
4. Mauritius Inscribed Stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas—£34,000	482,390	16	0
5. Hurricane Loan, 1892, 3 per cent. Imperial Guaranteed Stock under Ordinance 4 of 1892	600,000	0	0
	£1,182,984	6	0

The following table, extracted from a Minute of His Excellency the Governor, shows the Debt of Mauritius classified in productive and unproductive loans on the 5th September, 1903. The return speaks for itself, and shows that the Colonial Government is financially in a strong position:—

PUBLIC DEBT OF MAURITIUS.

Loans.	Amounts.					
	£	s.	d.	£	s.	d.

MUNICIPALITIES.

The Town Council of Port Louis is elective, being the only purely elective institution in the Island. The following statement shows the financial position at the end of 1902:—

	Rs.
Balance in hand	45,296.19
Revenue and receipts	574,727.70
Total	620,023.89
Expenditure	592,893.09
Balance carried forward on 31st December	Rs. 27,130.80

The following is a comparative statement of the Revenue and Expenditure of the last five years:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1898	455,157.96	478,183.17
1899	432,911.00	424,385.92
1900	435,264.53	433,351.95
1901	442,854.46	448,214.52
1902	*442,825.20	472,875.39
Total ...	2,209,013.15	2,257,010.95

* Not including a loan of Rs 30,000 for Municipal Night Soil Service and Manure Factory.

The following is a statement of the debts of the Municipal Corporation of Port Louis on 31st December, 1902, showing provision for payment in 1903:—

Loan.	Amount.	Repayment to be made in 1903.
	£	£
Conversion Loan	126,400	1,400
	Rs.	Rs.
Colonial Loan	54,600	7,800
Grand River Bridge Loan	18,000	2,000
Manure Establishment Loan	28,000	2,000
Government Hurricane Loan	106,756.36	5,331.55
Overflood Loan	25,000.04	4,166.66
Total	—	21,298.21

Provision for payment of principal and interest on the above loans is included in the Budget of the Corporation, Item IV.

The following statements relate to the Boards of Curepipe, Beau-Bassin and Rose-Hill, and Quatre Bornes. These Boards are all nominee Boards:—

BOARD OF BEAU BASSIN AND ROSE HILL.

Comparative Statement of Revenue and Expenditure for the Years 1898–1902.

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1898 ...	22,709.87	20,439.04
1899 ...	23,298.56	23,626.60

Total ...	30,938,059.62	2,138,048.27	5,265,587.66	38,341,695.55[†]

[°] Inclusive of amount of specie and bullion imported, Rs. 1,434,738.42.

[†] Inclusive of amount of specie and bullion exported, Rs. 4,403,260.00.

TRADE OF MAURITIUS.

1. **The total** value of imports into, and exports from, the Colony (exclusive of duty-free goods to and from the Dependencies)

for the year ending 31st December, 1902, compared with 1901, is as follows:—

—	1901.	1902.
	Rs.	Rs.
Imports (including charges and exchange)	31,679,842.99	30,738,778.11
Exports (exclusive of shipping charges on local produce and manufacture).	29,134,452.71	36,203,647.28
Total	60,814,295.70	66,942,425.39

Accounted as under:—

—	Imports.		Exports.	
	1901.	1902.	1901.	1902.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	9,607,926.11	8,224,250.06	3,223,952.95	4,365,353.41
British Possessions.	15,645,021.27	16,923,006.23	24,582,123.22	31,215,080.49
Foreign Countries.	6,426,895.61	5,591,521.82	1,328,376.54	623,213.38
Total ...	31,679,842.99	30,738,778.11	29,134,452.71	36,203,647.28

2. The total value of imports and exports from and to the Dependencies, per Coast Sufferances, is recorded thus:—

—	1901.	1902.
	Rs.	Rs.
Imports	474,750.15	435,529.29
Exports	322,988.10	367,482.90
Total	797,738.25	803,012.19

3. The aggregate value of trade is, therefore, as under:—

—	1901.	1902.
	Rs.	Rs.
Imports	32,154,593.14	31,174,307.40
Exports	29,457,440.81	36,571,130.18
Total	61,612,033.95	67,745,437.58

4. The figures in No. 1 and No. 3 include the value of exported postal parcels despatched by the Post Office; they have not in previous years been shown as part of the trade of the Colony. The imported postal parcels have, as hitherto, been included in the imports. The import and export value of parcels is given further on.

5. Excluding the value of exports to and imports from the Dependencies, the rate of trade per head of population was as follows:—

—	1901.	1902.
	Rs.	Rs.
Imports (including charges and exchange)	83.83	81.34
Exports (exclusive of shipping charges)...	77.09	95.80

The difference in the rate of trade for exports is attributable to the larger amount of specie exported in 1902, as compared with 1901.

6. The value of specie and bullion, imported and exported, is as follows:—

—	1901.		
	Value.	Charges.	Total.
	Rs.	Rs.	Rs.
Imported	47.889.39	12,625.81	60.515.20
Exported	1,133,138.00	—	1,133,138.00
Total	1,181,027.39	12,625.81	1,193,653.20

—	1902.		
	Value.	Charges.	Total.
	Rs.	Rs.	Rs.
Imported	1,434,738.42	70,689.10	1,505,427.52
Exported	4,403,260.00	—	4,403,260·00
Total	5,837,998.42	70,689.10	5,908,687.52

7. Deducting specie and bullion, the value of the imports and exports mentioned in paragraph 1 is as follows:—

—	1901.	1902.
	Rs.	Rs.
Imports	31,619,327.79	29,233,350.59
Exports	28,001,314.71	31,800,387.28
Total...	59,620,642.50	61,033,737.87

8. The amount of duty collected (including for 1902 the surcharge of 4 per cent. on imports, levied from 1st August, 1902, and amounting to Rs. 35,998.42), was as follows:—

—	1901.	1902.
	Rs.	Rs.
Imports	2,850,884.22	2,611,411.70
Exports	504,583.29	485,235.10
Total...	3,355,467.51	3,097,645.71

9. Return B is a comparative statement of the value of the chief articles of imports and exports for the years 1901 and 1902.

In this return, automobiles and tramway materials were, according to entries in the Blue Book for 1902, included under the heading "Machinery." Orders have been given to enter such goods under their proper heading in future.

POSTAL PARCELS.

10. The declared value of the postal parcels imported and exported during the past five years is as under:—

—	1898.	1899.	1900.	1901	1902.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imported ...	125,633.85	184,625.50	183,425.50	214,534.60	231,993.73
Exported ...	13,178.92	14,584.42	18,940.26	19,388.42	20,628.64
Total ...	138,812.77	199,209.92	202,365.76	233,923.02	252,622.37

IMPORTS AND EXPORTS.

11. The total value of imports and exports for the last five years, 1898-1902, is as under:—

Year.	Imports Including Charges and Exchange.	Exports Including Shipping Charges.
	Rs.	Rs.
1898	28,326,008.29	31,866,437.07
1899	28,180,979.14	27,381,160.50
1900	31,427,401.72	33,550,973.94
1901	31,679,842.99	30,842,305.66
1902	30,738,778.11	38,341,695.55

IMPORTS.

12. Detail of the Articles.—Dealing with the articles and their value according to the entries (where the differences are over Rs. 5,000), the following results are to be noted:—

Acid-Phosphoric.

Which was exclusively imported from the United Kingdom, shows a decline in quantity of kilos. 4,307 in 1902, but an increase in value of Rs. 8,480 over the imports of the preceding year.

Ammonia Sulphate.

The imports decreased from kilos. 4,754,695, of the value of Rs. 949,485 in 1901, to kilos. 2,547,670, of the value of Rs. 535,917, in 1902; the whole quantity for the past year being imported from the United Kingdom, while Australia supplied none last year, against kilos. 285,288, of the value of Rs. 54,837, in 1901.

Animals.

Cows and Oxen.—In 1901 the imports amounted to 1,124 head, of the value of Rs. 113,695; Continental India and Madagascar supplying 364 and 758 head, of the value of Rs. 47,775 and Rs. 65,827, respectively.

In 1902, Madagascar provided 5,369 head, of the value of Rs. 521,352, showing an increase of 4,611 in number, and Rs. 555,525 in value, for the past year.

Horses.—The total number imported in 1901 amounted to 366, valued, Rs. 120,952, against 768, valued, Rs. 120,952, against 768, valued, Rs. 213,760, imported in 1902; the imports from Australia and Sandalwood showing respective increases of

218 and 126 in number, and Rs. 111,746 and Rs. 15,951 in value for 1902.

Mules decreased in number from 1,030, of the value of Rs. 459,907, in 1901, to 687, of the value of Rs. 174,498, in 1902.

Sheep and goats increased in number from 171, of the value of Rs. 3,341, in 1901, to 457, of the value of Rs. 8,314, in 1902; Argentine Confederation provided a surplus in 1902 of 326 head in number and Rs. 4,973 in value over 1901.

Swine decreased in number from 120, of the value of Rs. 3,565, in 1901, to 94, valued, Rs. 11,506, in 1902, but with an increase of Rs. 7,951 in value over 1901; the imports being chiefly from Argentine Republic.

Apothecary Wares.

The decrease under this head in 1902 is Rs. 45,311. British and French produce show a decrease of Rs. 9,667 and Rs. 35,251 respectively, as compared with 1902.

Wearing Apparel.

The imports in 1902 show an increase of Rs. 35,390, as compared with imports of 1901. Continental India, France, Pondicherry show respective suplus of Rs. 24,970, Rs. 9,032, and Rs. 7,133 over 1901; while a decrease of Rs. 4,711 is noticed for the United Kingdom. A large quantity is now received by postal parcels.

Areca Nuts.

Have increased from kilos. 27,356, of the value of Rs. 6,446, in 1901, to kilos. 47,115, of the value of Rs. 12,404; the increase being chiefly from Continental India.

Asphaltum.

The imports for 1902 amounted to kilos. 9,144, of the value of Rs. 515, against kilos. 71,374, of the value of Rs. 6,136, for 1901, showing a decrease of Rs. 5,621 in value, and kilos. 62,230 in weight; the article being exclusively imported from the United Kingdom.

Bacon and Hams.

The imports in 1902 show a decrease of kilos. 17,926 in quantity, and Rs. 30,910 in value, as compared with 1901. The produce of the United Kingdom exhibit the substantial decrease of Rs. 22,981.

Luggage.

Dutiable articles increased in value from Rs. 47,712 in 1901 to Rs. 56,243 in 1902.

Bags.

Gunny.—There has been a decrease of 878,579 in number and Rs. 146,537 in value, as compared with imports of 1901.

Straw.—The imports for 1902, as compared with 1901, show a decrease of Rs. 22,246 in value, but an increase of 8,000 in number.

Vacoa.—Increased from 9,425 bags, valued, Rs. 1,763, in 1901, to 20,750 bags, valued, Rs. 3,362, in 1902.

Bark and Dyewood.

The imports from Australia increased from kilos. 59,922, of the value of Rs. 7,495, in 1901, to kilos. 81,814, of the value of Rs. 12,985, in 1902.

Beef (Salt).

The quantity imported in 1902 shows a substantial decrease, Rs. 68,898, as compared with 1901. Kilos. 270,066, of the value of Rs. 133,849, were imported in 1901, against kilos. 110,125, of the value of Rs. 64,951, in 1902. British, Australian, and American produce exhibit decreases of Rs. 3,544, Rs. 4,993, and Rs. 67,655.

Beer and Ale.

In casks.—This article exclusively imported from the United Kingdom, shows for 1902 an increase of 987 hectolitres in quantity and Rs. 8,723 in value over the imports of 1901.

In bottles.—Increased from 77,200 litres, of the value of Rs. 31,878, in 1901, to 116,441 litres, of the value of Rs. 50,074, in 1902.

The chief increases are noticeable specially under United Kingdom and Germany, and amount to Rs. 10,485 and Rs. 6,922 respectively.

Blacking.

Increased from Rs. 7,370 in 1901 to Rs. 15,661 in 1902. United Kingdom and France showing increases of Rs. 6,574 and Rs. 8,718 respectively.

Books, Printed.

The value of books shows an increase of Rs. 12,190 over the imports of 1901. The chief increases being from the United Kingdom, Continental India, and France.

Bran.

Compared with 1901, the imports of 1902 show a total decrease in value of Rs. 11,187. There is an increase in quantity, kilos. 224,324, and value, Rs. 43,299, from Continental India, while the imports from Australia and Argentine Republic show the large decrease of Rs. 17,993 and Rs. 20,087 respectively. These decreases are accountable to the less number of animals which were imported in 1902 from these places.

Brassware and Brass Ornaments.

These two items were amalgamated in 1901. They are entered under separate headings for 1902. The aggregate value of the imports amounted in 1902 to Rs. 22,544, against Rs. 129,055 in 1901, showing a decrease of Rs. 106,511—the United Kingdom, Continental India, and France showing decreases of Rs. 100,403; Rs. 6,007, and Rs. 597 respectively. Austria, Germany, and China supplied brass ornaments for a small value in 1902, against no supply of brassware in the previous year.

Bricks and Tiles.

Increased from 122,228 in number and Rs. 11,495 in value in 1901 to 299,568 in number and Rs. 33,219 in value in 1902, the United Kingdom showing an increase of 33,932 over the imports of 1901; while a decrease of Rs. 2,208 is noted from France.

Butter.

There is, for 1902, an increase in quantity, of kilos. 10,507, and in value of Rs. 23,587, over the imports of 1901. Increases are noticed under Australia, Denmark, France, and Holland, while the United Kingdom and the United States exhibit decreases. Canada, Belgium, and Switzerland supplied none in 1902, while a small quantity was supplied by Nova Scotia.

Bicycles.

This item for 1902 exhibits a decrease of 12 in number, as compared with 1901, while an increase of Rs. 5,276 in value is to be noted.

Cabinet and Upholstery Wares.

The increase in 1902 over 1901 amounts to Rs. 64,094. Goods from United Kingdom show an increase of Rs. 11,907, while decreases are noticed from the United States, France, Germany, and Austria.

Camphor.

Crude.—The increase in value under this head is Rs. 4,518. The imports from the United Kingdom in 1902 amount to Rs. 3,381, against Rs. 9 in 1901, and from Holland, Rs. 1,119, against none for 1901.

Candles.

Composition.—Exhibit a surplus both in weight and value, *i.e.*, Rs. 16,962, in 1902 in excess of 1901. The value of imports from the United Kingdom, Belgium, France, and Continental India has increased by Rs. 3,574, Rs. 11,926, Rs. 11,327, and Rs. 6,476 respectively, while Germany supplied none in 1902, against the value of Rs. 731 in 1901. Holland supplied kilos. 6,127 of the value of Rs. 4,115 in 1902, against none in 1901.

Caoutchouc, India-Rubber Manufactures.

The decrease in 1902 in weight is kilos. 2,141, and in value, Rs. 12,586, as compared with 1901. This article is exclusively supplied by the United Kingdom.

Carts and Waggons.

None supplied in 1902. In 1901, the Government Railways imported from the United Kingdom 20 waggons of the value of Rs. 49,653.49, and the United States supplied one cart, valued, Rs. 158.39.

Casts of Statues and Busts.

Increased in value from Rs. 913, for 1901, to Rs. 13,694 for 1902. The articles were imported chiefly from France and the United Kingdom.

Cement.

The imports for 1902 show a decrease in weight of kilos. 381,813 and of Rs. 75,720 in value. The United Kingdom and France show decreases of Rs. 72,171 and Rs. 3,560 respectively.

Cheese.

Decreased in 1902, as compared with imports, 1901, of kilos. 14,626 in weight and Rs. 27,607 in value, the United Kingdom, Germany, and Holland showing distinct decreases.

Choorah.

Decreased in weight from kilos. 63,210, valued, Rs. 9,701, in 1901, to kilos. 29,921, valued, Rs. 4,218, imported in 1902.

Coals.

The quantity imported in 1902 was kilos. 49,016,577, of the value of Rs. 1,422,401, as against kilos. 79,165,606, of the value of Rs. 2,224,833, in 1901. The United Kingdom, Australia, and Continental India show decreases in weight of kilos. 21,649,492, kilos. 3,385,956, and kilos. 5,113,581, and in value, of Rs. 606,535, Rs. 36,819, and Rs. 158,278 respectively. The decreases are attributable to fewer steamers calling for coal since the cessation of the South Africa War.

Coffee.

Increased in weight of kilos. 375,420, in 1901, to kilos. 393,986 in 1902, but decreased in value from Rs. 207,639 to Rs. 176,118, the principal decrease in the value of the coffee being from Continental India, Ceylon, Singapore, Java, Pondicherry, Aden, and the United States. Arabia supplied none in 1902.

Copper.

Bars (red).—The imports in 1902 amounted to kilos. 4,903, valued, Rs. 3,975, as against kilos. 6,534, valued, Rs. 10,708, for the past year, showing a decrease in value of Rs. 6,733, as compared with 1901.

Bars (yellow).—Increased from kilos. 4,253, of the value of Rs. 4,553, in 1901, to kilos. 7,222, of the value of Rs. 9,552, this article being chiefly imported from the United Kingdom.

Bars (old).—The imports from the United Kingdom decreased from kilos. 8,840, of the value of Rs. 9,026, in 1901, to kilos. 7,412, valued, Rs. 4,685, in 1902, showing a decline in value of Rs. 3,341.

Sheets and Nails (red).—Decreased from kilos. 34,761, valued, Rs. 56,443, in 1901, to kilos. 11,809, valued, Rs. 13,224, showing a falling off of Rs. 45,219 for 1902. France, Belgium, and the United States, which supplied in 1901 for Rs. 39,032, Rs. 14, and Rs. 8,779 respectively, sent none in 1902.

Sheets and Nails (yellow).—Increased in weight from kilos. 24,109, in 1901, to kilos. 32,924 in 1902, with a decrease in value of Rs. 11,962.

Cordage.

Coir.—The imports for 1902 show an increase of kilos. 30,568 in weight, and of Rs. 5,060 in value over those in 1901.

Hemp.—Decreased from kilos. 49,595, of the value of Rs. 33,377, in 1901, to kilos. 20,717, of the value of Rs. 13,026. Net shortage in weight of kilos. 28,878, and decrease in value of Rs. 20,351. Hong Kong supplied none in 1902, against kilos. 13,972, valued, Rs. 16,467, for 1901.

Oiled.—Increased from kilos. 692, of the value of Rs. 602, in 1901, supplied by the United Kingdom only, to kilos. 9,902, of the value of Rs. 5,474, in 1902, the United Kingdom and

Continental India providing for the value of Rs. 3,204 and Rs. 2,270 respectively.

Cordials and Liquors.

Decreased from 8,606 litres, of the value of Rs. 21,400, in 1901, to 4,498 litres, of the value of Rs. 12,722, in 1902. Net decrease, Rs. 8,224, French produce showing a decrease of Rs. 7,896.

Corks and Bungs.

The imports for 1902 show an increase of 2,912,650 in number and of Rs. 6,717 in value, as compared with 1901—an increase of Rs. 7,356 to be noticed under France.

Corn Flour.

The imports for 1902 show an increase of kilos. 110,713 in weight, and of Rs. 22,040 in value over 1901. Continental India supplied in 1902 kilos. 102,350, valued, Rs. 15,123, against none in 1901.

Corn, Grain, Meal, &c.

Barley.—The total decrease in 1902 in weight is kilos. 260,758, and in value Rs. 35,418, as compared with 1901. Continental India provided only Rs. 2,303 in 1902, against Rs. 11,245 in 1901, while Australia and Argentine Confederation supplied none in 1902, against Rs. 4,078 and Rs. 22,411 respectively in 1901.

Dholl.—This article has also largely decreased in 1902, both in quantity and in value, the imports being short of kilos. 1,879,049 and of Rs. 305,551, as compared with 1901.

Gram.—Shows for 1902 a decrease in weight of kilos. 2,559,419, and in value of Rs. 45,206, as compared with 1901.

Lentils show for 1902 a decrease in weight of kilos. 225,403, and in value of Rs. 39,336, as compared with 1901.

Oats show a total decrease in weight (for 1902) of kilos. 4,663,215, and in value of Rs. 56,610, as compared with 1901. Australian produce decreased by Rs. 84,060. The Argentine Republic sent none in 1902, against Rs. 19,691 in 1901. Continental India shows an increase of Rs. 49,396 in value.

. . . .

The decrease in the import of barley, husks, oats, gram, and dholl is mainly due to the effects of surra upon the beasts of burden. The enormous loss of animals has naturally resulted in a decreased importation of forage.

Peas.—The imports for 1902 amounted to kilos. 304,219 of the value of Rs. 57,448, showing a surplus over 1901 of kilos.

112,639 in weight, and of Rs. 23,261 in value. Continental India shows a shortage of Rs. 11,117, while Madagascar shows a surplus of Rs. 34,271.

Rice.—Compared with 1901, the imports for 1902 show a decrease in weight of kilos. 1,843,084, but an increase in value of Rs. 511,263. Straits Settlements provided kilos. 225,000, valued, Rs. 35,845, against none in 1901; while Cochin China supplied none in 1902, against kilos. 150,150, valued, Rs. 18,093, in 1901. Continental India supplied kilos. 64,193,968, of the value of Rs. 6,937,161, for 1901, against kilos. 61,935,279 of the value of Rs. 7,373,644, for 1902, showing thereby a decrease in weight of kilos. 2,258,689, but an increase in value of Rs. 336,483. China provided, for 1901, kilos. 198,323, of the value of Rs. 23.284, against kilos. 494,844, of the value of Rs. 74,705, in 1902, showing an increase in weight of kilos. 296,521, and in value of Rs. 51,421.

Wheat.—Decreased from kilos. 351,446 in quantity, valued, Rs. 447,599, in 1901, to kilos. 307,025, valued Rs. 35,688. Nett decrease, Rs. 11,911.

Wheat Flour.—This article shows a decrease both in quantity, kilos. 3,428,587, and in value, Rs. 355,653. The decrease is in the importation from Australia and China of Rs. 428,357 and Rs. 6,967 respectively. The United Kingdom and Continental India show slight increases.

Cotton Manufactures.

Coloured.—As compared with 1901, the value of imports shows an increase of Rs. 120,357. Increases are from the United Kingdom, Rs. 116,510, Continental India, Rs. 5,816, and Belgium, Austria, China, France, Rs. 10,380, Germany, Rs. 17,784, United States, and Italy. Decreases are to be noted from Pondicherry, Rs. 5,204, and Switzerland, Rs. 13,165; Holland supplied Rs. 14,472 in 1901, against none for the past year.

Hosiery.—This article also shows a large increase, amounting to Rs. 11,142 in 1902. German goods show an increase of Rs. 11,773, while a shortage is to be noticed under British and French goods.

Plain.—This item shows in value a surplus of Rs. 273,610 in 1902. The increases are chiefly from the United Kingdom, France, Germany, and Continental India.

Thread for Sewing.—Total increase in value of Rs. 20,851, of which Rs. 21,668 from the United Kingdom, and Rs. 1,187 from France; but Belgium shows a shortage of Rs. 2,004.

Waste.—Decreased in value from Rs. 4,192; United Kingdom and Continental India showing slight decreases.

Fish.

Dried or Salted.—Increased in 1902, amounting to Rs. 17,167. Decreases are noticed from the United Kingdom, Rs. 16,034, Cape Colony, Rs. 7,851, France, Rs. 2,108, and Continental India, Rs. 16,586, Muscat, Rs. 16,024; while increases arise from the surplus supplied from Madagascar, Rs. 30,069, Nova Scotia, Rs. 20,667, Newfoundland, Rs. 7,188, and the United States, Rs. 14,757.

Pickled.—Increased in 1902, amounting to Rs. 27,336. Small increases are noticeable from the United Kingdom and the United States; Nova Scotia supplied in 1902 kilos. 59,895 of the value of Rs. 18,838, against none in 1901.

Ghee.

The imports for the past year amounted to kilos. 172,233 of the value of Rs. 133,923, against kilos. 99,041, of the value of Rs. 112,998, for 1901, showing an increase in the value of Rs. 20,924. This article is exclusively supplied from Continental India.

Glass.

Looking and Mirrors.—Decreased in number from 17,793 in 1901 to 16,855 in 1902, but increased in value from Rs. 8,446 to Rs. 15,025. Nett increase in value, Rs. 6,581. The increase arises specially from France.

Glassware.

Increase of Rs. 12,000 in 1902, arising from Continental India and France principally.

Groceries.

Increase of Rs. 4,716 in 1902, of which Rs. 3,359 from the United Kingdom.

Haberdashery.

The value of the imports declared in 1902 is Rs. 27,861 less than in 1901. Decreases are shown principally under the following countries:—United Kingdom, Rs. 3,161, Continental India, Rs. 4,482, France, Rs. 43,467, Switzerland, Rs. 3,114. A large increase is noticeable under Germany, Rs. 13,735. Belgium, Italy, Japan, China, Austria, and Hong Kong show also slight increases.

Hardware and Cutlery.

The imports for 1902 show a surplus of Rs. 8,670, as compared with 1901. The United Kingdom supplied Rs. 8,710 less than in 1901. The United States, Rs. 4,889, and Austria, Rs. 893; while France and Germany provided a surplus of Rs. 16,659 and Rs. 7,802 respectively.

Hats.

Felt.—Decreased in 1902 by Rs. 10,550; principally from the United Kingdom, Austria, France, and Germany. Italy shows a slight increase.

Straw.—Decreased in 1902 by 9,586 in number and Rs. 9,277 in value. France shows a shortage of 11,094 in number, and of Rs. 13,890 in value. The United Kingdom shows a shortage of 2,057 in number, but a surplus of Rs. 5,279 in value.

Of other sorts.—Decreased in number from 2,356 in 1901 to 4,040 in 1902, but with an increase in value of Rs. 5,573 for the past year. Decreases arise chiefly from the United Kingdom, France, and Italy, while Continental India supplied 2,501, valued, Rs. 6,313 in 1902, against none in 1901.

Hides.

Tanned.—Decreased from 7,989 in number, valued, Rs. 20,685, in 1901, to 3,789, valued, Rs. 11,956, for 1902. Continental India and France supplied none in 1902, against 3,773, valued, Rs. 10,071, and 1,403, valued, Rs. 5,850, respectively for 1901, while Pondicherry shows a slight increase.

Hulls of Vessels.

Abandoned.—Nil in 1902, against Rs. 9,230 in the previous year.

Iron.

Bars.—The imports for 1902 amounted to kilos. 509,424 of the value of Rs. 64,053, showing a decrease of kilos. 409,332 in weight and of Rs. 42,155 in value, as compared with 1901. Decreases arise from the United Kingdom and Belgium, the latter country supplying none in 1902.

Nails.—Decreased from kilos. 276,141, of the value of Rs. 72,813, in 1901, to kilos. 253,310, of the value of Rs. 66,778, in 1902. The decreases arise from the United Kingdom, Continental India, and Belgium; while France shows a slight increase.

Sheets.—Increase of kilos. 13,837 in weight, and of Rs. 10,527 in value for 1902, the United Kingdom providing the surplus.

Wrought of other sorts.—The imports of 1902, as compared with 1901, show a decrease of kilos. 129,889 in weight, and of Rs. 41,253 in value; the decrease from the United Kingdom amounting to Rs. 40,761, and in weight to kilos. 23,163.

Jewellery.

The declared value in 1902 is Rs. 7,565 less than in the previous year, the United Kingdom and France showing respective decreases of Rs. 6,872 and Rs. 4,175; while Continental India and Switzerland give a surplus of Rs. 1,163 and Rs. 3,220 respectively.

Lard.

The imports for 1902 show the large increase of kilos. 230,144 in quantity, and of Rs. 69,313 in value, as compared with the previous year, the United Kingdom, Continental India, China, and France showing increases of Rs. 6,611, Rs. 31,930, Rs. 93,851, and Rs. 24,786 rsepectively; while the United States show a decrease of Rs. 19,391.

Lead.

Sheets and pipes.—Decrease of kilos. 43,117 in weight, and of Rs. 14,427 in value, as compared with 1901, the decrease being chiefly from the United Kingdom.

Leather, Sole.

The imports in 1902 show an increase in value of Rs. 6,346, and in weight of kilos. 4,195 over 1901. The increase is due to more imports from Australia.

Wrought of other sorts.—This item shows an increase of Rs. 19,470 for 1902, as compared with 1901. From the United Kingdom and Continental India there is a shrinkage of Rs. 5,606 and Rs. 769 respectively; while France provides an increase of Rs. 27,503 for the past year.

Lime.

Phosphate of Lime.—The quantity imported in 1902 is kilos. 50,000, valued, Rs. 6,233, against kilos. 1,352,144, valued, Rs. 117,689, in 1902, showing a large decrease of kilos. 1,302,144 in weight, and of Rs. 111,456 in value. The United Kingdom and Belgium sent in 1901 kilos. 1,012,144, valued, Rs. 77,078, and kilos. 100,000, valued, Rs. 10,572, respectively, against 1,000 in 1902. France shows for the past year a decrease of kilos. 190,000 in weight, and of Rs. 23,167 in value as compared with 1901.

Superphosphate of Lime.—The imports in 1902 amounted to kilos. 628,001 in weight, and to Rs. 52,819 in value, against kilos. 1,792,715 and Rs. 79,258, as compared with 1901, showing also a decrease of kilos. 1,164,714 in weight, and of Rs. 26,439 in value. The United Kingdom shows a shrinkage of kilos.

759,129 in weight, and of Rs. 2,434 in value, while Belgium and France sent none in 1902, against kilos, 33,092, valued, Rs. 6,565, and kilos. 372,494, valued, Rs. 17,440, respectively, in 1901.

Linen Manufacture.

Canvas.—Decrease in value, Rs. 6,127, as compared with 1901. From the United Kingdom the decrease is Rs. 6,160; while Continental India shows a slight increase.

Machinery and Millwork.

The imports under this item amounted, for 1902, to Rs. 948,281 in value, including therein, tramway materials, Rs. 210,637, and traction engines and automobiles, Rs. 256,157, and wire rope, Rs. 20,567. For 1901, the imports amounted to Rs. 413,331 in value, plus, Rs. 7,016 for two automobiles from France, giving the aggregate value of Rs. 420,347. The total increase over 1901 is therefore Rs. 527,914. From the United Kingdom, Rs. 364,134; Continental India provided for Rs. 71,998 in 1901, against nil for the past year, while Germany, Belgium, and the United States provided for 1902, Rs. 29,440, Rs. 46,913, and Rs. 3,903, respectively, against none in 1901. France supplied Rs. 162,538, against Rs. 7,016 for 1901. The whole increase under this item is attributable to the traction engines and automobiles, tramway, and wire rope materials of the aggregate value of Rs. 487,361 imported in 1902 by the planters to replace the draught animals on the sugar estates. Owing to the heavy loss sustained by the Colony through the acute prevalence of surra upon the beasts of burden, the duty on traction engines, tramways, &c., imported for sugar estates was, under resolution of the Council of Government, dated 17th June, 1902, remitted.

Manure.

Guano.—This article, exclusively imported in 1902 from Seychelles, amounted to kilos. 3,419,295 in weight, and to Rs. 144,463 in value, showing an increase of kilos. 1,223,401 in weight, and of Rs. 48,342 in value over the imports of 1901, provided by Seychelles, the United Kingdom, Glorieuse Island, and Madagascar. The three last-named countries sent none in 1902, against, for 1901, kilos. 24,758, valued, Rs. 3,119, kilos. 60,960, valued Rs. 2,025, and kilos. 436,880, valued, Rs. 20,121, respectively. Seychelles shows for the past year the large increase of kilos. 1,645,999 in weight, and of Rs. 73,606 in value.

Of other sorts.—Total increase in quantity, kilos. 66,518, and in value, Rs. 48,071. The United Kingdom shows an increase in value of Rs. 44,883, Australia, Rs. 32,479, Continental India, Rs. 5,575. Imports from Argentine Republic and Seychelles are Rs. 5,041 and Rs. 29,363 respectively less in value.

Margarine.

The quantity imported in 1902 is kilos. 50,623, and in value, Rs. 63,925, less than the imports in 1901. The principal decrease comes from Holland, Rs. 61,107, United States, Rs. 4,882, Germany, Rs. 3,754, France and Switzerland; while increases are shown under the United Kingdom, Rs. 1,813, and Denmark, Rs. 5,529.

Matches.

The imports in 1902 amounted in value to Rs. 57,295, against Rs. 50,285 for 1901, showing an increase of Rs. 7,010. Japan provides an increase of Rs. 8,638, while Sweden shows a shortage of Rs. 1,815.

Mathematical and Optical Instruments.

Increase of Rs. 6,845 over the imports of 1901. The United Kingdom shows an increase of Rs. 9,137, while France shows a shortage of Rs. 2,285.

Meat (Fresh).

Frozen.—This is a new item added this year. The importation was from Australia. The carcases received are hereunder enumerated:—

			Kilos.		Rs.
796	cows and oxen,	weighing	253,000,	valued,	127,772
7,212	sheep,	„	167,220	„	82,653
351	swine,	„	15,745	„	14,700
4,528	poultry (fowls, turkeys, geese, &c.),			„	17,596
4,968	rabbits			„	2,604

Military Articles.

The imports for 1902 amounted to Rs. 1,343,621, against Rs. 1,294,442 for 1901, showing an increase of Rs. 49,179 over 1901. The United Kingdom and Continental India provided for 1902, Rs. 1,130,371 and Rs. 210,696, against Rs. 1,150,281 and Rs. 144,162 respectively for 1901. Ceylon provided for the past year Rs. 2,554, against nil in 1901.

Musical Instruments.

Increase of Rs. 7,069 over 1901, United Kingdom and France showing respective increases of Rs. 4,964 and Rs. 4,650 respectively; Germany, China, and Switzerland show slight decreases. Belgium provided for Rs. 1,005 in 1901, against nil in 1902.

Oil.

Castor.—Increase of kilos. 68,985 in weight, and of Rs. 4,251 in value, over the imports of 1901. Continental India provided the increase.

Cocoanut.—Increase of 717 hectolitres in quantity, and of Rs. 12,082 in value, over the imports of 1901. Seychelles provides the increase.

Gingely.—The imports for 1902 amounted to kilos. 207,586 of the value of Rs. 55,709, against kilos. 59,787 of the value of Rs. 19,939, showing an increase of kilos. 147,799 in weight, and of Rs. 35,770 in value. Continental India shows an increase in value over 1901 of Rs. 39,190, while a decrease of Rs. 3,425 is noticeable from Pondicherry.

Linseed.—Decrease of 631 hectolitres in quantity, and of Rs. 25,237 in value, as compared with the imports of 1901. The decrease is in the importation from the United Kingdom.

Mustard.—Exclusively imported from Continental India, this article shows an increase of kilos. 240,742 in weight, and of Rs. 80,839 in value, as compared with the imports of 1901.

Petroleum.—The imports decreased from hectolitres 27,133 of the value of Rs. 281,480, in 1901, to hectolitres 11,372 of the value of Rs. 133,586, showing a decrease of hectolitres 15,761 in quantity, and of Rs. 147,894 in value. Decreases are from the United States, which show a shortage of Rs. 110,495 in value, and Russia supplied none for the past year, against hectolitres 3,610 of the value of Rs. 37,396 for 1901.

Painters and Dyers' Colours and Materials.

Decrease of Rs. 27,382, as compared with the imports of 1901. Decreases are from the United Kingdom, Rs. 22,817, Germany, Rs. 4,800, the United States, Pondicherry, and Belgium, while Continental India, France, Switzerland, China, and Austria show slight increases.

Paper.

Cigarette.—Increase of Rs. 7,528 in value over 1901. This article is exclusively imported from France.

Packing.—Increase of Rs. 15,939 over the imports of 1901. France and Germany show increases of Rs. 15,835 and Rs. 360 respectively, but the United Kingdom shows a slight decrease.

Stained, for hanging.—The imports show an increase of Rs. 4,395. This increase is from the United Kingdom, while France shows a small shortage.

Pictures.

Oil Paintings.—24 in number, valued, Rs. 6,106, were imported in 1902, against 2 from France, valued, Rs. 330, in 1901. The 24 pictures imported in 1902 were from the following countries:—9 from the United Kingdom, valued, Rs. 876, 5 from France, valued, Rs. 4,094, and 6 from Japan, China, and Continental India of the aggregate value of Rs. 137.

Pockets.

Empty.—The quantity imported in 1902 amounted to 892,000, of the value of Rs. 160,052, against 1,044,555 of the value of Rs. 195,194, showing a decrease of 152,155 in number, and of Rs. 35,142 in value. The articles are almost exclusively imported from Continental India.

Postal Parcels.

The value of imported parcels for 1902 shows an increase of Rs. 17,459, as compared with 1901, and an increase of Rs. 48,569 over 1900. Every year the postal parcels imported show a substantial increase over the previous period; the reason being that the community at large derive benefit in taking advantage of the cheap rate of transport for minor articles by postal parcels. By indenting directly upon leading wholesale stores in Europe, articles are thereby obtained at a cheaper rate than on the local market. The articles specially thus indented are, haberdashery, millinery, wearing apparel, and jewellery.

To prevent unscrupulous persons from defrauding the Revenue by postal packets, Government is considering the question of using the X-rays to detect fraud.

Potash.

Nitrate.—Increase of kilos. 478,270 in weight, and of Rs. 16,212 in value. The United Kingdom shows an increase in value of Rs. 34,955, while a shortage is noticed from Continental India of Rs. 18,742.

Sulphate of Potash.—Decrease of kilos. 150,188 of the value of Rs. 19,884, as compared with 1901. The United Kingdom shows a falling off of kilos. 119,588 in weight, and in value of Rs. 24,227. France sent none in 1902, against kilos. 30,000, valued, Rs. 5,657, in 1901.

Potatoes.

The imports for 1902 amounted to kilos. 425,947 of the value of Rs. 45,105, against kilos. 290,062 of the value of Rs. 32,251 for 1901, showing an increase of kilos. 135,885 in weight, and of Rs. 12,854 in value. Réunion provided kilos. 188,828 of the value of Rs. 20,999 in 1902, against nil in 1901. Australia shows an increase of kilos. 42,008 of the value of Rs. 4,433, but from France and Continental India respectively, decreases are noticed in weight of kilos. 35,992 and kilos. 59,540, and in value of Rs. 9,170 and Rs. 3,503, as compared with 1901.

Prints and Engravings.

Increase of Rs. 1,688 in value over 1901. A substantial increase is noticeable from the United Kingdom amounting to Rs. 5,251. France and Germany show decreases.

Provisions, Preserved.

The imports for 1902 show a decrease of Rs. 83,057, as compared with those of 1901. Decreases are noticeable under the United Kingdom, Rs. 18,565, Seychelles, Denmark, Italy, France, Rs. 42,366, Germany, Rs. 2,453, Portugal, Rs. 17,878, Spain, Rs. 3,180, Switzerland, Rs. 6,320, and the United States, Rs. 3,812, but Continental India, Australia, China, and Holland show slight increases.

Rattans.

The imports for 1902 show a decrease both in quantity and in value, as compared with 1901. Continental India and Singapore show decreases in value of Rs. 4,228 and Rs. 6,244 respectively, but China shows a surplus of Rs. 8,705.

Salt.

The imports for 1902 amounted to kilos. 1,831,965 of the value of Rs. 90,674, against kilos. 3,080,598 of the value of Rs. 80,311 for the previous year, showing a decrease in quantity of kilos. 1,248,633, but a surplus in value of Rs. 10,453. The United Kingdom and France supplied in 1901, kilos. 878,219, valued, Rs. 27,395, and kilos. 1,209,625, valued, Rs. 37,146, against for 1902, kilos. 1,428,749, valued, Rs. 70,382, and kilos. 401,000, valued, Rs. 20,218 respectively. Muscat supplied kilos. 44,344 of the value of Rs. 4,467 in 1901, against nil for 1902.

Seeds.

Aniseeds.—Increase of kilos. 17,805 in quantity, but decrease in value of Rs. 10,829, as compared with 1901. The difference arises chiefly from Continental India.

Coriander.—Decrease both in quantity, kilos. 31,769, and in value, Rs. 12,672, as compared with the previous year. The article is exclusively imported from Continental India.

Mustard.—Decrease both in quantity, kilos. 37,455, and in value, Rs. 7,957, as compared with the previous year. The article is almost exclusively imported from Continental India.

Silk Manufactures.

Decrease both in quantity, metres 28,623, and in value, Rs. 20,414, as compared with 1901. Decreases are from the United Kingdom, Rs. 11,750, Continental India, Rs. 5,824, France, Rs. 1,672, Italy, Japan, and Hong Kong. China, Germany, and Pondicherry show slight increases.

Skin.

Sheep and Goats', tanned.—The imports for 1902 show a decrease of kilos. 3,946 in weight, and of Rs. 10,185 in value, as compared with 1901. Continental India, France, and Singapore supplied for Rs. 7,413, Rs. 660, and Rs. 436 respectively in 1901, against nil for 1902, and Madagascar for Rs. 1,352 in 1902, against nil in the previous year.

Soap.

Increased from kilos. 749,456 of the value of Rs. 169,065 in 1901 to kilos. 1,028,504 of the value of Rs. 254,554 in 1902, showing a surplus of kilos. 279,048 in quantity and of Rs. 85,489 in value. The United Kingdom shows an increase of kilos. 314,316 in weight, and of Rs. 91,624 in value; the United States, a decrease of kilos. 40,787 in weight, and of Rs. 8,048 in value. France supplied in 1901, kilos. 5,196 of the value of Rs. 1,306, against nil in 1902. Seychelles and Continental India provided small quantities in 1902, against nil for the previous year.

Soda.

Nitrate of Soda.—The imports for 1901 amounted to kilos. 2,424,642 of the value of Rs. 251,492, of which the United Kingdom supplied kilos. 10,399 of the value of Rs. 1,808, and the remainder from Chili, against kilos. 1,236,700 of the value of Rs. 170,059, exclusively, from Chili for 1902. The decrease is, therefore, kilos. 1,187,942 in weight, and of Rs. 81,433 in value, as compared with the imports of the previous year.

Specie.

Gold.—The United Kingdom supplied specie to the value of Rs. 31,300 in 1902, against Rs. 25,206 in 1901, showing a surplus of Rs. 6,094.

Paper Currency.—The United Kingdom and Seychelles forwarded in 1902, Rs. 5,826 and Rs. 24,960 respectively, giving an aggregate amount of Rs. 30,786, against Rs. 5,715 in 1901 from the United Kingdom. The surplus is, therefore, of Rs. 25,071 over 1901.

Silver.—In 1902, Continental India and France supplied to the value of Rs. 1,409,705 and Rs. 2,520 respectively, amounting to the aggregate value of Rs. 1,412,225, against Rs. 2,228, of which Rs. 1,248 from Continental India, and Rs. 980 from France in 1901. Surplus over the previous year is Rs. 1,409,997.

Spices.

Chillies.—The imports for 1902 show an increase of kilos. 30,269 in weight, but a decrease in value of Rs. 9,141, as compared with the previous year. The article is almost exclusively supplied by Continental India.

Spirits.

Brandy.—The imports for 1902 measured litres 49,263, valued, Rs. 121,548, against litres 52,138, valued, Rs. 93,954 in 1901, showing a decrease of litres 2,875 in measure, but an increase in value of Rs. 27,594. The United Kingdom supplied litres 461, valued, Rs. 671 in 1901, against litres 2,700, valued, Rs. 4,224 in 1902, showing an increase both in measure of litres 2,239, and in value of Rs. 2,029. France supplied in 1901, litres 51,573, valued, Rs. 93,190, against, for 1902, litres 46.563, valued Rs. 117,324, showing a decrease in quantity of litres 5,010, but an increase in value of Rs. 24,134. Algeria sent a few litres in 1901, against nil for 1902.

Whisky.—Decreased both in quantity, litres 11,611, and in value, Rs. 19,423, as compared with 1901. The decrease is chiefly from the United Kingdom.

Starch.

Decrease of kilos. 13,928 in weight, and of Rs. 4,433 in value, as compared with 1901. Continental India shows in value a decrease of Rs. 10,373; Singapore shows a surplus of Rs. 1,057. China provided in 1902 for Rs. 4,953, against nil for the previous year.

Stationery.

Decrease in value of Rs. 10,200, as compared with 1901. Decreases are from the United Kingdom, Rs. 7,539, Continental India, Ceylon, Austria, Hong Kong, France, Rs. 3,910, Germany, and the United States. Slight increases are noted under Belgium, China, and Switzerland. Holland, Pondicherry, and Singapore supplied small quantities in 1902, against nil for the previous year.

Sulphur.

Common.—The imports for 1902 show a decrease of kilos. 420,273 in weight, and in value of Rs. 51,588, as compared with the previous year. Decreases arise from the United Kingdom and France of kilos. 35,293 and kilos. 384,980 in weight, and of Rs. 4,464 and Rs. 47,125 in value respectively.

Tamarinds.

Decrease of kilos. 36,391 in weight, and of Rs. 24,755 in value, as compared with the previous year. The article is exclusively supplied by Continental India.

Tapioca.

Increase from kilos. 397, valued, Rs. 256, in 1901, to kilos. 11,963, valued, Rs. 5,324, in 1902, showing an increase of kilos. 11,566 in weight, and of Rs. 5,068 in value. The increase is in imports from Continental India, which supplied in 1902, kilos. 11,250, valued, Rs. 4,931, against nil in 1901. Both the United Kingdom and France show slight increases over their supply of 1901.

Tarpaulins.

In 1901, the United Kingdom supplied 115 in number of the value of Rs. 4,880, against nil in 1902.

Tea.

The imports for 1902 show an increase of kilos. 16,978 in weight, and of Rs. 14,072 in value over 1901. The increase is from Ceylon, which supplied in 1902 a surplus of kilos. 20,055 in weight, and of Rs. 16,101 in value over the supply of 1901. China shows a small surplus. Small decreases are noticed under Continental India and Hong Kong.

Tin-Slabs.

Decrease of kilos. 12,780 in weight, and of Rs. 6,082 in value, as compared with 1901. The United Kingdom, China, and Singapore show decreases in value of Rs. 963, Rs. 14,145, and Rs. 1904 respectively. Continental India and Straits Settlements show increases of Rs. 3,445 and Rs. 699 respectively.

Tobacco.

Manufactured.—The imports for 1902 amounted to kilos. 191,209, valued, Rs. 391,760, against for 1901, kilos. 114,646, valued, Rs. 224,172, showing an increase both in weight of kilos. 76,563, and in value of Rs. 67,588. The United Kingdom, China, Réunion, the United States provided a surplus of kilos. 4,163, kilos. 143, kilos. 7,128, and kilos. 64,892 in weight, and of Rs. 7,376, Rs. 4,446, Rs. 24,358, and Rs. 135,156 in value respectively. Seychelles and Algeria supplied kilos. 244 of the value of Rs. 272 and kilos. 319 of the value of Rs. 1,227 respectively, against nil in the previous year. Slight decreases are noticed under Continental India, Hong Kong, and France.

Cigars.—Decreased from kilos. 9,225 of the value of Rs. 33,410 in 1901, to kilos. 8,014 of the value of Rs. 22,205, showing a decline both in weight of kilos. 1,211 and in value of Rs. 11,205 in 1902. Decreases are from the United Kingdom, Continental India, the United States, and Egypt. France, Canary Islands, Germany, Holland, Philippine Islands, and Spain supplied small quantities in 1901, against nil in 1902. Italy, Réunion, Denmark, Algeria, and Aden provided each a few kilos. in 1902, against nil in the previous year.

Toys.

The imports for 1902 show a decrease of Rs. 14,380, as compared with 1901. Decreases are noted under the United Kingdom, Rs. 4,155, France, Rs. 4,815, Germany, Rs. 4,601, and Seychelles. Continental India, China, United States, and Hong Kong show also slight decreases. Pondicherry and Japan supplied a small quantity in 1902, against nil in the the previous year.

Turmeric.

Decrease of kilos. 2,434 in weight, and in Rs. 10,877 in value, as compared with 1901. Continental India shows a falling off of kilos. 15,584 in weight, and of Rs. 9,885 in value. Pondicherry shows a small increase, and Cochin China supplied in 1902 a small quantity against nil in the previous year.

Umbrellas and Parasols.

Increase of 3,214 in number and in value of Rs. 4,125. The increase is from the United Kingdom, which provided a surplus of 6,221 in number, and of Rs. 8,537 in value. Decreases are noticeable under France, Continental India, and Japan.

Vanilla.

Seychelles provided in 1902, kilos. 1,450 of the value of Rs. 12,354, against kilos. 1,449 of the value of Rs. 20,092 in 1901, showing a decrease in value of Rs. 7,738, which is due to the inferior quality of goods supplied.

Vinegar.

Increase of hectolitres 217 in quantity, and Rs. 4,240 in value over 1901. The increase is almost entirely from France.

Wine.

Champagne.—The imports for 1902 amounted to litres 8,973 of the value of Rs. 25,333, against litres 17,065 of the value of Rs. 36,964 in 1901, showing a falling off of litres 8,092 in quantity, and Rs. 11,531 in value. The decreases are from the United Kingdom and France, which show declines of litres 816 and litres 7,612 in quantity, and of Rs. 2,936 and Rs. 9,101 in value respectively.

Claret, in casks.—A decrease of hectolitres 2,037 in quantity, and of Rs. 93,627 in value, as compared with 1901. France shows a falling off of hectolitres 2,671 in quantity, and of Rs. 121,932 in value. Spain shows a surplus of hectolitres 688 in quantity, and of Rs. 14,751 in value. Portugal supplied hectolitres 42, valued, Rs. 945, in 1902, against nil in 1901. Algeria supplied hectolitres 7 of a small value in 1901, against nil in 1902.

Claret, in demi-johns.—Hectolitres 283, of which 190 from France, and 93 from Spain, were supplied in 1902. The aggregate declared value was Rs. 12,881. None supplied in 1901 in such packages.

Claret, in bottles.—2,155 litres less were supplied in 1902, and a shortage of Rs. 1,938 in value is noticeable under this head. France is accountable for the shortage.

Port in bottles.—3,361 bottles less were supplied in 1902, and a shortage of Rs. 5,986 in value is noticeable. The deficiency is from Spain and Portugal.

Timber.

The imports for 1902 amounted to 6,642 cubic metres of the value of Rs. 501,282, against 4,382 cubic metres in 1901, valued, Rs. 540,213, showing a falling off of 2,260 cubic metres in quantity, and Rs. 38,931 in value. Continental India, Singapore, Madagascar, Norway, and the United States show decreases of Rs. 260,037, Rs. 657, Rs. 5,653, Rs. 2,608, and Rs. 1,627 respectively. Australia shows an increase of Rs. 43,191.

Woollen Manufactures.

Blankets.—4,493 less were imported in 1902, and the shortage in value amounts to Rs. 10,787. Imports have decreased in value from France by Rs. 7,415, Holland by Rs. 3,018, and the United Kingdom by Rs. 948. Small increases are noticeable under Continental India and China.

Mixed with Cotton and Silk.—The imports for 1902, as compared with 1901, show a decrease in quantity of 131,528 metres, and in value of Rs. 67,316. Imports from the United Kingdom have decreased in value by Rs. 43,826, Continental India by Rs. 7,418, Italy by Rs. 2,020, Holland by Rs. 1,773, and Germany by Rs. 12,294. Austria, Belgium, Switzerland, and Singapore supplied small quantities in 1902, against nil for 1901. France shows an increase of Rs. 1,146, and Pondicherry provided for Rs. 971 for the past year, against nil in 1901.

Woollen Shawls.—The imports under this head show an increase of 4,489 in number, and of Rs. 4,681 in value. The increase is in the importation from the United Kingdom, Switzerland, France, and Germany.

EXPORTS.

13. The principal articles exported from Mauritius are sugar, rum, molasses, cocoanut oil, aloe fibre, and vanilla, the produce of this Colony. The quantities and values exported in the last five years are shown in the following table:—

Articles.	1898.	1899.	1900.	1901.	1902.
Sugar—

British vessels show a shrinkage of one in number and 4,921 in tonnage, as compared with 1901, while foreign vessels have increased by two in number. The tonnage, however, is 538 tons less.

Vessels with Cargoes.

The tonnage of vessels entered at this port from foreign countries and the British possessions with cargoes during the year 1902 amounted to 317,488 tons, and the tonnage cleared, 255,128 tons, as against 318,288 tons entered, and 241,580 tons cleared in the year 1901.

With regard to the coasting trade (Dependency), the tonnage entered with cargoes during 1902 amounted to 5,632 tons, and the tonnage cleared to 5,899 tons, as against 6,524 tons entered and 10,412 tons cleared in 1901.

Transports and Men-of-War.

The undermentioned vessels of war and transports called at this port in 1902:—

Vessels of War.	Transports.	Tonnage.
	"The Tagus" ...	3,056
	"Englishman" ...	4,708

Portuguese Man of War—"Liberal"	—	558
Total	—	34,786

Suez Canal.

The value of the imports during the year 1902 is the highest of the five years, and is nearly Rs. 20,000 more than the previous year. The shipment of goods for mechanical transports accounts for the increase over 1901.

The value of exports is also the highest of the five years ended 1902. Sugar, shipped by steamers passing through the Canal, is valued at Rs. 754,135, and aloe fibre at Rs. 691,004 more than in 1901.

6. Number and tonnage of steam vessels which entered and cleared from and to all countries, *viâ* Suez Canal, and value of goods (including bullion and specie) imported and exported by that route into and from Mauritius:—

Years.	Vessels Entered.		Vessels Cleared.		Value of Imports.	Value of Exports.
	No.	Tonnage.	No.	Tonnage.	Including Bullion and Specie.	
					Rs.	Rs.
1898	38	70,028	32	57,070	178,644	66,635
1899	36	68,863	25	48,860	283,510	44,991
1900	37	72,122	28	51,780	365,928	185,114
1901	38	74,012	24	49,040	386,835	89,232
1902	26	50,849	27	52,242	388,761	218,998

The first table has been prepared in accordance with the Annual Imperial Statistical Abstract, and includes all vessels entered and cleared, exclusive of vessels to and from the Dependencies, while the second table exhibits the shipping to and from the Dependencies exclusively.

In the first table, in the total of 1902, there is a reduction of 43 in the number, and 35,491 in the tonnage, as compared with 1901. Sailing vessels are 40 less in number, and 26,409 in tonnage, while steam vessels are only accountable for a shortage of 3 vessels and tonnage of 9,082.

British vessels show a falling of 32 and of 12,763 tons, while foreign vessels are 11 in number, and 22,678 in tonnage less than in the previous year.

Amongst the vessels entered and cleared during the year 1902, are included 21 steamers with a tonnage of 42,577, which called at this port exclusively for bunker coal, and 20 of 36,937 tons in 1901.

DEPENDENCIES.

(Coasting Trade.)

The number and tonnage of vessels entered and cleared from and to the Dependencies is in 1902 one more than the number in 1901, but the tonnage is 5,639 less.

There were no steam vessels recorded in 1902, as against 3 of 4,109 tonnage in 1901.

Sailing vessels show in 1902 an excess of 4 in number, but a diminution in tonnage of 1,330.

SHIPPING.

The following tables exhibit the shipping of the five years, 1898-1902:—

Exclusive of Coasting Trade (Dependencies).

Measles spread through the Island in 1902, and during the cool weather severe cases were observed. 540 cases were reported, but the figure is almost certainly inaccurate, as many cases of measles were diagnosed as German measles. 64 deaths were ascribed to measles.

The trying effect of a hot and damp summer are generally manifest on the health of the inhabitants of the Colony from January to April, and, besides these depressing influences, there is also at that period of the year the concourse of circumstances favourable to the spread of malaria, and the occurrence of dysentery and intestinal complaints. The incidence of these diseases at that period has already been referred to in previous reports, and attention has been called to the occurrence of respiratory diseases from July to October, when the cold season is felt.

The performance of the scavenging and night soil service has been much hampered owing to the mortality among the draught animals due to "surra," and, although not a cause of disease, nevertheless, the unsatisfactory performance of this service must have affected the resisting power of the population. The disease now recognized as surra broke out in an epizootic form in the northern districts of the Island in March, and gradually extended to the other districts. The mortality was first noticed amongst bullocks, but the equines were shortly afterwards affected. The nature of the sickness was attributed to various causes, and at one moment, thought to be due to anthrax, but the microscopical evidence of the bacillus being wanting, further researches were made, and Dr. Aime Lesur, of Flacq, recognised the existence of a worm-like parasite in the blood of a sick mule in April. A slide having been sent to the Sanitary Department, the organism was recognised to be a trypanosoma, and the diagnosis surra was then made. The discovery of the same parasite in the blood of sick cattle in the District of Plaines Wilhems was shortly afterwards made by Mr. Deixonne, Veterinary Surgeon, and the existence of the protozoon in the alimentary canal of a fly stomoxys was demonstrated by Mr. A. Daruty de Grandpré, whose subsequent experiments proved that the insect was an active agent in the transmission of the disease. The disease was subsequently investigated by Dr. Edington of the Cape Colony, who was specially asked to visit the Island for that purpose.

It may be of interest to state that the direct loss to the Colony owing to surra, is estimated at over three million rupees.

There are nine hospitals in the Island, exclusive of the Prison Hospitals and the Leper Asylum, and seventeen dispensaries. These have been described in previous reports. It will be sufficient to say that a new hospital has been opened at Long Mountain, and that a small bacteriological laboratory has been installed at the Civil Hospital of Port Louis. A matron has been appointed to the Civil Hospital, and one of her principal duties will be the training of nurses.

The same measures have been carried out as in previous years, and may be summarised as the killing of rats, disinfection, evacuation, the use of Yersin's serum as a prophylactic and its use as a curative.

The following return, which shows the separation between these two periods, may be of interest:—

„ Percentage of deaths ...	—	—	78·6		—	—	74·5		—	--	72·9		—	—	74·9	

The year 1902 was, for Mauritius, a healthy year. The death-rate was 34 per thousand, that is to say, 5·8 less than that of the previous year, and 1·7 less than that of 1900.

The number of admissions into hospitals amounted to 17,874, being 668 less than in 1901.

The case mortality, exclusive of still-births, was 5·57 per cent., against 6·96 the previous year.

Malarial fever was as usual answerable for a large proportion of the admissions. The number was, however, smaller than for 1901. The figures being 4,182 for 1901, and 3,360 for 1902.

Measures have been taken to combat malaria, and in the Moka District the admissions to hospital from malarial fever show a reduction of 25 per cent.

As might be expected from the reduced number of malarial cases, there has been a reduction in the number of cases of dysentery. There were 673 cases of this disease admitted into the hospitals, against 799 in 1901. The case mortality was reduced from 17·6 in 1901 to 12·17 in 1902.

Enteric fever is, however, increasing. There were 36 admissions on this account in 1902, against 14 in 1901. The case mortality was 24·3 per cent. The number of cases notified was 157, and the total mortality 44, or 28·02 per cent.

As the total death-rate is somewhat in excess of the hospital death-rate, the inference is, that only the more severe cases have come under notice of the Medical Authorities.

Typhoid in the tropics is often far from typical, and is sometimes known as typho-malaria, whilst, again, it may appear as a mild continued fever.

The plague was less prevalent than in previous years, as the following table will show:—

PLAGUE.

Year.	No. of Cases.	No of Deaths.	Death-rate.
			Per cent.
1899...	1,416	1,117	78·9
1900...	796	593	74·5
1901...	1,093	805	73·6
1902...	506	386	76·3

The disease has practically been limited to the Districts of Port Louis and Plaines Wilhems.

Plague in Mauritius, as elsewhere, has its period of dormancy and of activity.

Poisons	7	—	—	—	3	—	—	—	—	—	1	—
Other Diseases	169	—	—	—	—	—	—	—	—	—	1	—
Total	6,165	418	1,123	3	449	36	1,154	31	1,525	77	1,770	95

GIRLS' SCHOOLS.

The number of schools working in connexion with the Department and earning grants from Government on the results of the examinations, was 31, the examinations being, however, open to all the girls in the Colony, except those attending Government and Aided Primary Schools.

The numbers of girls competing in the various standards, and the successes obtained, are shown in the following table:—

Standard.	Number examined.	Number who obtained Pass Certificates.
I.	56	4
II.	33	9
III.	50	0
IV.	20	6
V.	38	1
VI.	23	0
VII.	19	0
Totals ...	239	20

Both French and English are taught in the Schools. But experience seems to show that whilst the men, especially those engaged in business or seeking Government employment, cultivate their English, the girls do not speak English in after life, and seem to forget what they have learnt.

table gives the staff, which has since been increased by a professor of Mechanical Drawing, and a professor of Chemistry:—

Establishment.	Salaries paid in 1902.
	Rs.
Director of Public Instruction	12,000.00
Refund of actual travelling expenses	82.00

Total	119,878.43

—	Pupils.
Royal College proper—	
Average for the year	229
December	208
Royal College School, Port Louis—	
Average for the year	61
December	69
Royal College School, Curepipe—	
Average for the year	119
December	113

The birth-rate in the general population, exclusive of Indians, was 33·4, and in the Indian population, 37·3. The rates for the preceding five years were:—

General Population.	Year.	Indian Population.
35·5	1897	36·8
33.0	1898	37·7
34·1	1899	37·8
33·7	1900	40·2
34·0	1901	35·1
33·4	1902	37·3

It will be noticed that the Indian population are maintaining a higher birth-rate than that which exists among the general population.

DEATHS.

The mortality for 1902 is less than that for 1901, and lower than for the previous years.

The figures since 1897 are:—

Year.	Mortality.	Rate per 1,000.
1897	11,066	29·5
1898	12,064	31·9
1899	13,222	34·8
1900	13,691	34·8
1901	14,971	40·3
1902	12,716	34·0

The following table derived from the Report of 1899 of the Registrar-General of England, gives the death-rate in certain European countries, the rates given in the Colonies being taken from the Annual Reports of the Registrars-General of those Colonies:—

DEATHS to 1,000 LIVING.

Years.	United Kingdom.	England and Wales.	Scotland.	Ireland.	Denmark.	Norway.	Sweden.	Austria.
Average— 1874–1898 ...	19·3	19·4	19·7	18·1	18·6	16·7	17·2	29·0
Rate for 1899 ...	18·3	18·3	18·6	17·6	17·5	16·8	17·6	25·4

Brought forward ...		373,823
Arrivals in the Island	8,676	
Departures from the Island	6,239	
Difference in favour of arrivals		2,437
Total civil population		376,260
Military stationed in the Island		2,291
Total population of the Island		378,551
Estimated population of Dependencies and outlying Islands (excluding Seychelles) ...		4,859
Estimated total population of the Colony ...		383,410

The crews of non-Colonial shipping in the harbour have not been included in the above estimate.

The Indian population, included in the above, numbered 263,971, showing an increase of 2,047 over the previous year. The steady and progressive increase in the Indian population is one of the most important facts connected with the vital statistics of the Island.

The Chinese numbered 5,009, but there were only 40 Chinese females in the Island.

MARRIAGES.

By the law of the Colony, no marriage is legal (except those performed *in articulo mortis*) unless it be celebrated by a Civil Status Officer, either at a Civil Status Office, or, by special arrangement, at the houses of the contracting parties.

There were 1,240 marriages celebrated during the year by the Civil Status, as against 1,235 in 1901, being an increase of 5.

Of these marriages, 665 belonged to the general population (exclusive of Indians), and 575 to the Indian population.

In 1901, the figures were 627 and 608 respectively.

The marriage-rate gives 6·7, as against 6·6 for 1901.

By the law of the Colony, parents may, by their subsequent marriage legitimate their children born prior to their marriage.

Ministers of any Christian religion and Civil Status Officers may under certain conditions celebrate marriages between persons, one of whom is *in articulo mortis*, without any previous formalities or publication.

It may be interesting to compare the marriage-rate of Mauritius with that of other countries. In 1901, the rate in Mauritius was 6·6 per thousand; in Jamaica, in 1900, it was 5·0 per thousand; in Trinidad, for the year 1901, it was 8·3 per thousand; and in the United Kingdom, the rate for 1899 was 16·7 per thousand.

REFORMATORY.

The condition of the reformatory is admitted to be unsatisfactory, and a committee has been appointed to consider a scheme of reorganisation. The place is at present a boys' prison and a school for criminals. According to official returns, 68 ex-reformatory boys passed through the prisons during the year 1902. This is a smaller number than that of previous year, when 131 ex-reformatory boys passed through the prisons; but it is evident that the majority of the boys who pass through the reformatory are not reformed, but join the criminal classes.

There were 235 admitted to the reformatory in 1902, as against 208 in 1901. The Superintendent of Prisons reports 112 offences against discipline, and that the conduct of the boys was not good.

The Director of Public Instruction reports that the educational results were inferior to those of last year, when compared with the number examined, but better when compared with the number on the roll, but that very little blame can be attached to the teachers on account of the short stay of the boys.

The institution is frequently visited by Catholic and Protestant Clergymen, and the boys attend Divine Service on Sundays.

Technical instruction is given; but, as the whole system, including the duration of the sentences, the nature of the training, and the influence on the daily life of the boys, must be reformed, it would be useless to describe the system, which, it is hoped will soon be obsolete.

VITAL STATISTICS.

The population on the 1st January, 1902, was		373,044
The number of births registered in 1902 was	12,196	
The number of births unregistered, owing to death intervening before registration was made, was	1,299	
Total births	13,495	
Number of deaths registered was	12,716	
		779
Carried forward ...		373,823

The total number of prisoners admitted after conviction was 5,537 males and 267 females. These numbers show an increase of 982 males and 32 females, as compared with the return for 1901, and is the largest for the last three years.

There is an increase of 1,080 prisoners previously convicted. There is a decrease in the sentences from three months to five years, and an increase in sentences of three months or less.

The average daily number under detention shows an increase of 62·23, accounted for by the increased number of admissions.

The death-rate shows a decrease, being as follows:—

—	1901.	1902.
Port Louis... ...	2·30	1·02
Beau Bassin ...	8·46	2·19

This is satisfactory evidence of the result of the sanitary improvements carried out in the prisons.

The principal diseases remain as before, namely, malaria, dysentery, and pulmonary complaints, including tuberculosis.

The total expenditure for housing, maintaining, and guarding, was in—

	Rs.
1901	119,645.27
1902	120,958.86
Total increase ...	Rs. 1,313.59

or taking the expenditure per head per annum for the two years—

	Rs.
1901	163.16
1902	152.02

showing a decrease in the cost per head of prison population of Rs. 11.14.

The net cost per head for each prisoner taking credit for cash receipts and value of work done for Government was Rs. 98.20.

The statistics therefore show an improvement in prison management and sanitation.

Prison Statistics—cont.

Name and Nature of Prisons (whether Common Gaol, Penitentiary, &c.).	Number of Persons (at Col. 5) committed to Penal Imprisonment.				Daily average number in Prison.	Number of admissions to Hospital during the year 1902.	Daily average on the sick list.	Number of Deaths during 1902.
	For five years or more.	For one year or more, but less than five years.	For more than three months but less than one year.	For three months or less.				
Port Louis and Beau Bassin—								
Central Common Gaol and House of Correction.	18	42	672	5,072	795·52	1,886	37·02	14
Reformatory for Boys (Penitentiary)	4	18	34	105	66·70	82	3·54	1
Total	22	60	706	5,177	862·22	1,968	40·56	15
District Prison of Rodrigues	—	—	—	24	2·4	2	—	—
For the whole Colony except Rodrigues—								
Men	16	41	659	4,821	777·76	1,802	34·70	14
Women	2	1	13	251	17·76	84	2·32	—
Juveniles—								
Males	4	18	34	105	66·70	82	3·54	1
Females	—	—	—	—	—	—	—	—
Total	22	60	706	5,177	862·22	1,968	40·56	15

By "Penal Imprisonment" is meant imprisonment (Col. 5) inflicted as a substantive punishment in pursuance of a sentence of a Court of Justice, as distinguished from imprisonment for safe custody, &c.

PRISONS.

The following are the Prison Statistics for the year 1902:—

Name and Nature of Prisons (whether Common Gaol, Penitentiary, &c.).	Number of persons committed in 1902.	Number committed for				Number of those committed who have been previously convicted.		
		Debt.	Non-payment of Fines and Costs.	Safe custody till trial or want of Security.	Purposes of Penal Imprisonment	Once	Twice.	Thrice or more.
Port Louis and Beau Bassin—								
Central Common Gaol and House of Correction.	7,630	6	1,616	1,826	4,182	1,477	1,412	1,255
Reformatory for Boys (Penitentiary)...	235	—	75	—	160	35	19	23
Total	7,865	6	1,691	1,826	4,342	1,512	1,431	1,278
District Prison of Rodrigues	27	—	3	8	24	18	6	3
For the whole Colony except Rodrigues—

Women	334	—	174	67	93	44	43	85
Juveniles—								
Males	235	—	75	—	160	35	19	23
Females	—	—	—	—	—	—	—	—
Total	7,865	6	1,691	1,826	4,342	1,512	1,431	1,278

CASES of CRIMES in which PERSONS were CHARGED.

Offences.	Number of Cases.	Number of Persons Charged.	Number of Persons Convicted or Committed to Assizes.	Amount of Property Stolen.	Amount of Property Recovered.	
					By all Agencies.	By Police Only.
				Rs. c.	Rs. c.	Rs. c.
Murder, including parricide, infanticide, wife murder, &c., and poisoning causing death.	11	29	19	—	—	—
Attempt at foregoing murder and poisoning not causing death	11	12	6	—	—	—
Manslaughter, including wounds and blows causing death	5	6	3	—	—	—
Rape, including attempt upon chastity	20	31	11	—	—	—
Larceny at night by breaking, or with violence to the person	86	127	80	7,106.12	1,586.13	1,416 71
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	28	37	23	—	362.27	362.27
Prædial and other larcenies, including cheating, embezzlement and swindling.	1,228	1,469	1,114	16,434.59	7,442.79	6,171.4
Removing, receiving, or possessing stolen property by foregoing larcenies	305	358	233	—	5,320.84	4,936.45
Arson and other malicious injuries to property	15	15	9	—	—	—
All other offences not included above	579	769	529	—	—	—
Total	2,288	2,853	2,027	23,540.71	14,712.03	12,786.91

It will be observed that of serious offences reported to or detected by the police, there were 2,288 cases for which 2,853 were charged and 2,027, or 71·5 per cent., either convicted or committed to Assizes.

ASYLUMS.

There are no poorhouses, in the English sense, in Mauritius, but there are infirmaries, asylums, and orphanages, as well as a system of out-door Poor Law relief, which is, unfortunately, much needed.

The following is a list of the charitable institutions, with their inmates:—

The Barkly Asylum	207
The Calebasses Infirmary	132
The Convent Infirmaries—	
Rempart Street	42
Belle Rose	122
Pamplemousses	51
Chemin Grenier	18
St. Julien	19
The Barkly Asylum Orphanage	44
The Convent Orphanages—	
Rempart Street	17
La Paix Street	6
Canal Street...	17
Mahebourg	5
Moka	6
Church of England Orphanages—	
Plaisance	63
Rose Belle	60
Leper Asylum, St. Lazare	99
Total	908

POLICE.

The total nominal strength of the Police Force in December, 1902, was 709, but the actual effective strength was 694.

This force comprised ten nationalities, but 574 were Mauritius Creoles. 119 men were enlisted during the year, and 38 were dismissed.

Other extensions are under consideration; but it may be safely prophesied that if the surra continues in the Island, the necessity for feeders to the main lines will become more and more pressing, while the traffic on the main lines will increase enormously.

A good tramway, of 60-centimetre gauge and German materials, is being built in Port Louis, from funds taken from Revenue, and sidings have been constructed to meet the various requirements of the planters, the merchants, and the docks.

MILITARY EXPENDITURE.

The following is a statement of the military expenditure for the year 1902:—

Particulars.	Amount.
	£
Pay, &c., of the Army	61,920
Medical Establishments	3,867
Transport and Remounts	10,867
Provisions, Forage, &c.	36,447
Clothing Services	2,138
Warlike and other Stores	2,930
Works, Buildings and Repairs	10,964
Military Works Loan...	46,346
Establishments for Military Education	320
Miscellaneous Effective Services	890
Army Non Effective Services	[illegible]
Total	177,141

Paid by the Colony.

Particulars.	Amount.
	£
Colonial Contribution under Ordinance No. 33 of 1897 towards Military Expenditure for 1902.	25,047
Adjusting Balance for 1901...	153
Payment to Military Authorities under Ordinance No. 6 of 1900 in lieu of exemption on Customs duties for 1902.	2,333
Total	27,533

These figures confirm the information derived from other sources, which tends to show that the Mauritian Creoles are seeking to better their fortunes by emigrating to South Africa, whilst the Indian population are replacing them in Mauritius.

The gross receipts of Post and Telegraph Offices for 1902 were Rs. 148,433.49; the gross expenditure for Post and Telegraphs for 1902 was 158,591.26: showing a deficit of Rs. 10,157.77.

The telephone service in Mauritius is a private enterprise.

RAILWAY DEPARTMENT.

The railways increased their earnings in 1902, the figures being for 1901, Rs. 2,012,720.41; for 1902, Rs. 2,065,295.89.

But, in fairness, the Government traffic, which is not paid, should be added; if this be done, the earnings were Rs. 2,171,848.36; the working expenditure was Rs. 1,273,535.03; showing a profit of Rs. 898,313.33.

The percentage of working expenses to the earnings was for 1901, 63·35 per cent., for 1902, 58·63 per cent.; showing a decrease in the proportion of working expenses to increase of 4·72 per cent. Owing to the epidemic of surra, the traffic on the railway has greatly increased, and the following railway extensions have been sanctioned:—

Terre Rouge to Montagne Longue—being a branch line to the entrance of the Long Mountain Valley. The length of this extension is 17,800 feet, and the gauge, 4 feet 8½ inches. This line is being built from funds taken from the Revenue.

The Black River Railway—being a branch line from the Midland line to the sugar estates in the Black River Valley. The length of this extension is about 13 miles, and the gauge, 4 feet 8½ inches. A loan is being floated to meet the cost of construction of this line.

The Riviere du Poste, Bois Cheri and Mexico Light Railway Branch. This is a light narrow gauge railway, about 10 miles long, of 75 centimetres gauge, with German rails and rolling stock, which leave a point close to Riviere du Poste Railway Station and runs to the Colville Bridge, where it divides into two forks going in opposite directions. The one tapping the small planters in the direction of Bois Cheri on the west, the other tapping the small planters in the direction of Mexico and Nouvelle France on the east. This line, the cost of which is estimated at Rs. 40,000 is being built with funds taken from Revenue.

Mapou to Cannoniers Point, 7 miles.

Wires to Military Camps, 18⅝ miles.

Time ball wire from Observatory, 10 miles.

Terre Rouge and Montagne Longue, 4½ miles.

Poudre d'Or Branch, 2 miles.

Argy to Centre de Flacq, 1¼ mile.

Two other lines are in course of construction, from Mahebourg to Grand Port, and from Richelieu to Chamarel, total length, 35 miles.

The amount collected by the Post Office during the year 1902 on account of the sale of postage stamps, postcards, envelopes, &c., was Rs. 115,325.37, against Rs. 89,947.54 in the preceding year.

The return of money orders is interesting, as showing the Colonies in which the Mauritian community possess relatives or friends:—

—	Issued in the Colony.			Paid in the Colony.		
	£	s.	d.	£	s.	d.
United Kingdom	4,809	14	4	4,254	3	0
Cape of Good Hope	185	13	3	2,868	18	3
Natal	107	16	2	7,430	10	7
New South Wales	277	14	2	176	14	7
Victoria	25	0	10	33	4	6
Western Australia	60	12	5	43	17	0
South Australia	5	0	0	4	2	0
Hobart, Tasmania	0	6	0	37	0	0
Queensland	15	15	6	17	2	2
Total	5,487	12	8	14,865	12	1

—	Issued in the Colony.	Paid in the Colony.
	Rs.	Rs.
India	136,156.60	17,364.31
Ceylon	1,134.23	1,338.03
Rodrigues	20,004.35	61,188.30
Seychelles	7,264.92	3,474.57
Total	164,560.10	83,365.21

It will be noticed that Mauritians receive considerable remittances from friends or relatives in South Africa, and that the Indian community transmit considerable sums to their friends and relatives in India.

6. Cheaper telegrams.
7. Bicycle telegraph boys.
8. More pillar boxes.
9. Posting late letters in the railway guard van.
10. Money Orders on foreign countries issued at the chief inland offices.

These improvements have been effected; and the red bicycles, with their riders dressed in red jackets, are now a common feature in the streets of Port Louis.

The following statement shows the total number of letters, postcards, and newspapers posted in the Colony in the years 1901 and 1902:—

—	Letters.	Postcards.	Newspapers.
1901	1,488,837	116,689	1,450,926
1902	1,495,114	126,917	1,412,306
Increase	6,277	10,228	...
Decrease	—	—	38,620

The Money Order Department has been divided into three branches—

1. Foreign Branch—gold currency countries.
2. Foreign Branch—silver currency countries.
3. Inland money orders.

TELEGRAPHS.

The following are the telegraph wires in the Colony:—

Two Midland lines:—

One for the public, length, 36 miles.

One for the railway, length, 36 miles.

Two North line wires:—

One for the public, length, 31 miles.

One for the railway, length, 31 miles.

Two Moka line wires:—

One for the public, length 37 miles.

One for the railway, length, 37 miles.

One Savanne line, length, 41 miles.

Petite Riviere to Bambous, 5 miles.

Mapou to Butte aux Sables, 9 miles.

MAGNETIC OBSERVATIONS.

The absolute values of the magnetic elements for the year 1902, were as follows:—

		°	′	″
Mean declination west	... ...	9	17	78
Mean dip south	... ...	54	5	06
Mean horizontal force (c.g.s. units)	...	0·23753		
Mean vertical force (c.g.s. units)	...	0·32794		
Mean total force (c.g.s. units)...	...	0·40492		

Fifteen magnetic disturbances were recorded during the year, none of which were remarkable. The largest occurred on January 24th, April 11th, May 8th to 10th, August 21st to 22nd, October 31st to November 1st, November 23rd to 24th.

SEISMOLOGICAL OBSERVATIONS.

During the year 1902, earthquakes were recorded by the Milne seismograph, the largest of which occurred on April 19th, when the town of Guatemala was destroyed.

METEOROLOGICAL OBSERVATIONS.

Watch was kept on the nights of November 13th and 14th, and 14th and 15th, but no records were observed. The sky was generally clear on both nights, with occasional fragments of light cloud; but full moon occurring on the evening of November 15th, it is possible that some small meteors passed unnoticed.

POST AND TELEGRAPH DEPARTMENT.

During the year 1902, a Commission was appointed to consider the improvements that could be introduced into the Post and Telegraph Department.

The improvements recommended are now being gradually introduced; but they may be summarised as follows:—

1. An increased and better paid staff.
2. Express delivery of letters, with an express delivery stamp.
3. Better and quicker sorting.
4. Private boxes.
5. Quicker and more efficient delivery of letters and telegrams.

Month.	Atmospheric Pressure.	Temperature of the Air.	Relative Humidity.	Rainfall.	Wind Velocity.

For Year	29·858 — ·023	74·0 + 0·5	74 0	47·98 — 1·83	10·1 — 0·9

showers. The rainfall is very variable in different parts of the Island; the wettest station is Cluny, in Grand Port, with a mean annual fall of 145 inches; and the driest, Albion, on the west coast, with a mean annual fall of only 31 inches. The mean monthly rainfall for the whole Island decreases from 12 inches in March to 2·6 inches in September and October.

In addition to the annual variations, there is a marked diurnal variation in all elements. The atmospheric pressure undergoes a double oscillation with maxima near to 9 a.m. and p.m., and minima, near to 3 a.m. and p.m. The mean variation is 0·048 inches from 3 a.m. to 9 a.m., 0·069 inches from 9 a.m. to 3 p.m., 0·068 inches from 3 p.m. to 9 p.m., and 0·047 inches from 9 p.m. to 3 a.m. The mean diurnal range of temperature increases from 12° in April to 16·9° in November. The diurnal range of relative humidity is very variable, its mean value is 25 per cent., but ranges of 50 per cent. in one day occasionally occur. The hourly velocity of the wind increases, in the average, 7·6 miles between 5 a.m. and Noon, and the direction shows a retrograde motion of 20° in the same interval. The rainfall, like the atmospheric pressure, shows a double oscillation with maxima near to 4 a.m. and p.m., and minima, near to 9 a.m. and p.m. The extent of the oscillation is 0·070 inches per month.

SPECIAL FEATURES IN 1902.

The beginning of the year was characterised by temperature, rainfall, wind velocity, and humidity, below the average, with pressure above the average. Except in February, when it was 0·035 inches below, owing to the passage of four cyclones, the first over Rodrigues on February 3rd, the second, about 50 miles to the north of Mauritius, on February 5th, the third over Mauritius on February 9th, the fourth between Mauritius and Rodrigues on February 17th. In the second cyclone the wind attained a velocity of 78·5 miles per hour, and in the third, a velocity of 53·5 miles per hour; in the first and fourth, the velocity was never excessive. In the month of May, a wave of relatively low pressure, high temperature, and little wind set in, lasting until the end of the year, as will be seen in the following table, in which are given the monthly means and departure from average of the principal elements for 1902:—

The foregoing table explains the exodus from Port Louis to the country districts. All those who are not compelled, either by poverty or by the nature of their occupations or professions, to live in town, migrate to the country.

The statistics of death, sickness, and marriage are greatly affected by the poverty or ease of the population. Poverty means insufficient food, insufficient clothing, and insanitary conditions.

The better health, therefore, of the Indian population may be partly ascribed to their frugal and saving habits. The deposits standing to the credit of the Indian population in the Savings Bank, on the 30th June, 1902, were Rs. 1,123,442, and they purchased real property during the year to the value of Rs. 1,131,141. It is inevitable that these figures should be reflected in the vital statistics, and that the Indians should show a steady advance on the Creole population.

CLIMATE.

Mauritius lies between the Meridian of 57° 18', and 57° 49' East Longitude, and the Parallels of 19° 58' and 20° 32' South Latitude. To the North, extends the equatorial belt of calms, with its hot, damp, and rarified atmosphere; and to the South, a belt of high pressure from which a current of air blows nearly continuously towards the Equator, but deflected somewhat by the rotation of the Earth on its axis.

The migration of these belts North and South with the Sun, produce the seasonal variations of weather at Mauritius. With the system in its most southerly position, the Island is under the influence of the belt of low pressure, and in its most northerly position, the influence of the high pressure belt is felt, so that in the summer months, December to April, the atmospheric pressure is below the average, and the weather is hot and sultry with occasional very heavy rain, produced principally by the cyclones which form on the North-East of Mauritius, and travel usually on a south-westerly course, passing sometimes to the eastward and sometimes to the westward, but seldom immediately over the Island. The mean velocity of the wind is also below the average during the summer, and its mean direction is due East.

In winter, the mean temperature in the lowland falls to 72°, while at Curepipe, a town situated on the central plateau at an altitude of 1,800 feet above the sea, it falls to 62°. The midday heat is tempered by the trade winds which become relatively strong from July to September, and bring refreshing

STATEMENT showing the NUMBER of DEATHS from all CAUSES during EACH MONTH, 1902.

Total	908	768	808	858	1,082	1,118	1,309	1,298	1,155	1,108	1,143	1,163	12,716

Deaths to 1,000 Living—continued.

Years.	Hungary.	Switzerland.	German Empire.	The Netherlands.	Belgium.	France.	Italy.
Average— 1874–1898	33·2	20·9	24·6	20·9	20·3	22·0	27·1
Rate for 1899	27·0	17·6	21·5	17·1	18·8	21·1	22·1

The death-rates in certain Colonies per 1,000 were:—

Cape Colony, 1899	22·5
British Guiana, 1901	23·6
Jamaica, year ended 31st March, 1900 ...	22·8
Trinidad, 1901...	25·0
Mauritius, 1902	34·0

DEATH RATES in CERTAIN FOREIGN TOWNS and in CALCUTTA, BOMBAY, and MADRAS.

Towns &c.	1st Quarter.	2nd Quarter.	3rd Quarter.	4th Quarter.
Calcutta	43·9	51·3	25·0	—
Bombay	95·2	61·0	43·9	49·2
Madras	47·5	37·6	40·1	44·6
Cairo	—	37·4	—	—
Alexandria ...	—	31·9	—	—
Port Louis (Mauritius).	44·4	45·6	61·0	61·6

The average death-rate in Mauritius for the period 1873-1901 was 32·6.

The high mortality shown in Bombay is, of course, due to plague, which is far more destructive to human life in Bombay than in Mauritius, but comparing the death-rate in Mauritius with that of other European and tropical countries, it will be seen that Mauritius is, by comparison, distinctly unhealthy.

Nevertheless, in Mauritius the death-rate varies greatly in different districts, as the following table shows:—

RODRIGUES.

The Revenue of Rodrigues for the year 1902 was Rs. 12,303, as against Rs. 19,569, showing a decrease of Rs. 7,266.

The expenditure was Rs. 26,277 in 1902, as against Rs. 22,406 in 1901, showing an increase of Rs. 3,870.

The ratio of Revenue to population is Rs. 3.50 per head, and the expenditure, Rs. 7.55 per head.

Rodrigues is a dependency of Mauritius, governed by laws and regulations passed in Mauritius, and administered by a magistrate.

A Government medical officer resides in the Island, and there is a small hospital and two dispensaries.

There are also two Government Schools. The attendance in 1902, was as follows:—

—	Boys.	Girls.
Port Mathurin School	68	60
St. Gabriel School	78	102

A Catholic Priest, paid by the Government, cares for the spiritual needs of the community.

The population is of mainly African origin, with a mixture of European blood, but there are about 30 Indians and 12 Chinamen on the Island. The climate, though hot in summer, may be described as healthy.

The deer, which were at one time plentiful, are now very scarce, having been poached by the inhabitants.

MISCELLANEOUS.

The year 1902 was, on the whole, a dry year for Mauritius, and as usually happens, a dry year is a comparatively healthy year for the inhabitants, but a bad year for the sugar crop. Unfortunately, the shortage in the crop was accompanied by the loss of the majority of the draught animals, and by low prices. These misfortunes coming together threatened, at one time, to bring on a serious financial crisis. Had the Government not come to the assistance of the planters, the disaster must have been widespread involving the ruin of the sugar industry in Mauritius.

Whatever theories may be held or general principles as to the proper limits of Government interferences, there can be no doubt that there were special reasons affecting Mauritius which left the Government practically no choice in the matter.

The revenue and finances of the country are dependent on the sugar industry, and a bankrupt industry means no revenue, but an equally imperative consideration is that there are 96,083 Indians employed on sugar estates. Had these estates gone into sequestration, the Government would have been morally responsible for the food and salary of the Indian employees.

In many cases the Government is the mortgage creditor of the sugar estates, and might be forced to become the owner. Now the Government has, it is needless to say neither the machinery nor the capacity to manage sugar estates.

The measures taken were, therefore, not only beneficent to the planters, but were also measures of self-protection, so far as the Government were concerned. The alternative of a financial crisis would have involved contingencies which the Government were not prepared to face, and no reasonable administration could face, with a light heart.

Government assistance was regulated by two Ordinances, Nos. 34 and 43 of 1902, and provided under Ordinance 43 for advance to meet what is known as the *faisance valoir*, that is to say, the expenditure necessary to cultivate and reap the crop; and under Ordinance No. 34, for the mechanical means of transport necessary to bring the crop to the mills.

The Island is now a spider's web of tramways and wire ropes, whilst traction engines of nearly all forms are constantly seen on the roads. These tramways are a permanent benefit to the Island, and a great economy in the cost of transport. Moreover, they provide a security which is not furnished by stables of draught animals, which may be swept off any day by some chance epizootie which may visit the Island.

The anxiety is expressed by some planters that the soil may deteriorate from the absence of animal manure, but the chemical properties of soils are now so well known, and so easily ascertained, that there ought to be no difficulty in supplying any deficiencies in the chemical composition of the soils of the different estates.

The smaller engines and tramways have, for the most part, come from Germany and Belgium, and have not only been delivered quickly from stocks in hand, but have given great satisfaction in working. The engines are strong, the working parts are all easily accessible, and the finish is quite as good as can be desired for practical work.

The year 1903 finds the Colony not only more hopeful than it has been for years, but the hopes have a solid foundation. The planters have the promise of a record crop, the certainty of material wherewith to gather it, and a reasonable prospect of better prices than during the year 1902. The year 1902 represents a dark cloud in the history of Mauritius, but, in passing, it showed that it had a silver lining, and the silver lining is likely to be made more manifest during the year 1903.

Mauritius has still her difficulties, plague and malaria. Tuberculosis and dysentery are still with us but if the poverty which has proved the chief provocative and fore-runner of diseases can be relieved, if the people can live in more sanitary conditions, and if the Government can find the money so necessary for sanitary improvements, even disease may be diminished and cease to become a danger.

The greater prosperity which all now confidently look forward to may yet bring not only happiness but health to the sorely tried people of Mauritius.

The Report for 1901 gave the price of sugar in Mauritius up to and including September, 1902. The following table brings these prices up to date:—

		Rs.
1902—	October	8.50
	November	8.75
	December	8.90
1903—	January	9.25
	February	9.30
	March	9.00
	April	9.00
	May	9.50
	June	9.30
	July	9.30
	August	9.40
	September	9.50

5,000 bags were sold early in October at Rs. 9.25, the next day a further consignment of 2,000 bags was sold at Rs. 9, an offer has been made since to purchase at Rs. 8.50, but has been refused, and the brokers are holding at Rs. 8.75. The Sugar Convention came into force on the 1st September. No explanation can be given of the fall in October, other than the somewhat unsatisfactory supposition that the supply in Bombay probably exceeds the demand.

It is unnecessary to say that the universal hope in Mauritius is that the fall is purely accidental.

GRAHAM BOWER,

Colonial Secretary.

No. 430.

MAURITIUS.

(For Report for 1902, *see* No. 412).

ACTING-GOVERNOR SIR GRAHAM BOWER to MR. LYTTELTON.

Government House,
Mauritius,
27th July, 1904.

SIR,

I HAVE the honour to enclose, for your information, the Report on the Mauritius Blue Book for the year 1903, which has been prepared by Mr. Gibson, the Acting Colonial Secretary.

2. I am glad to be able to report that the delays in the preparation of the Blue Book, mainly caused by difficulties with the printers, are now being overcome, and it is hoped that the report will, in future, be ready at a reasonable date after the close of the year.

3. The financial condition of the Colony during the past year has been the subject of grave anxiety; a reduction of expenditure has become an absolute necessity if the Government is to continue to pay its way without an undue increase of the burden of taxation.

4. The population of Mauritius is poor and must, I fear, continue to be poor. The estate owners have, for the most part, to bear a heavy burden of debt which has been borrowed at a high rate of interest, whilst the labouring classes can never hope to earn a high wage, even if the employers could afford to pay it, for the standard of wage is necessarily governed by the facilities for the introduction of Indian labour.

875 Wt 22378 10/04 D & S 5 19144

5. A further cause of poverty is found in the prevalence of plague, malaria, tuberculosis and other diseases. These diseases, though not caused by poverty, are encouraged and promoted by the conditions of life which are incidental to poverty. They in turn cause the disablement of the wage earner—further poverty and further disease. Poverty and disease are in fact working in a vicious circle in Mauritius, and although the Government spends all it can afford in the attempt to eradicate the causes of disease, nevertheless the conditions are such that the medical authorities have hitherto been fighting an unsuccessful battle.

6. The hard case of the unfortunate inhabitants who are struggling with disease and adversity may well excite sympathy, and I am glad to report that the officers of the Government have done all that lay in their power to aid the people in the difficulties with which they have had to contend. I would especially bring to notice the good work of the Railway Department and the Medical Department.

I have, &c.,

GRAHAM BOWER,

Administering the Government.

REPORT ON MAURITIUS BLUE BOOK FOR THE YEAR 1903.

I.—FINANCIAL.

The following is a comparative statement of the Heads of Revenue for the year 1902-3:—

Heads of Revenue.	1901–02.	1902–03.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Customs	3,309,996	2,980,574	—	329,422
2. Port, Harbour, Wharf, and Lighthouse Dues.	229,598	201,134	—	28,464
3. Licences, Excise and Internal Revenue, not otherwise classified.	2,637,929	2,606,777	—	31,152
4. Fees of Court or Office, Payments for Specific Services and Reimbursements in Aid.	209,133	237,865	28,732	—
5. Post Office and Telegraphs	120,066	148,151	28,085	—
6. Government Railways ...	1,927,273	2,377,494	450,221	—
7. Rent of Government Property	57,857	50,824	—	7,033
8. Interest	523,276	518,697	—	4,579
9. Miscellaneous Receipts...	123,966	99,664	—	24,302
10. Land Sales	1,655	416	—	1,239
Total	9,140,753	9,221,600	507,038	426,191

The increases in the foregoing table are mainly due to a large sugar crop. The decreases are, in respect of the largest item, "Customs," due to reduced taxation on Imports.

The following is a comparative statement of the expenditure for the years 1901-2, 1902-3:—

No.	Heads of Expenditure.	1901-1902.	1902-1903.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Public debt	836.703.74	836,940.22	236.48	—
2	Pensions	520,233.50	540,185.87	19,952.37	—
3	Governor and Legislature	96.840.52	96,618.67	—	221.85
4	Colonial Secretary... ...	62,071.90	60,660.59	—	1,411.31
5	Receiver General	126.694.41	136,357.61	9,663.20	—
6	Auditor General	55,792.63	58,683.70	2,891.07	—
7	Customs	262.849.28	260,901.83	—	1,947.45
8	Port and Marine	204,050.82	246,303.18	42,252.36	—
9	Observatory...	19.504.04	21,886.86	2.382.82	—
10	Museum	7.946.54	10,597.01	2,650 17	—
11	Registrar General	25,267.81	23,609.76	—	1,658.05
12	Receiver of Registration Dues.	54,104.01	53,133.31	—	970.70

Expenditure—cont.

No.	Heads of Expenditure.	1901-1902.	1902-1903.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
13	Post Office	154,007.79	159,595.69	5,587.90	—

36	Do., Extraordinary ...	137,471.32	100,721.25	—	36,750.07
37	Loan Commission	14,631.42	14,194.93	—	436.49
38	Mare-aux-Vacoas Water Works.	53,748.88	50,878.76	—	2,870.12
39	Drainage Works	20,015.65	19,537.57	—	478.08
40	Secret Service	10,500.00	7,450.00	—	3,050.00
41	Plague Services	288,323.34	197,221.20	—	91,102.14
		9,043,066.36	9,575,182.13	771,137.08	239,021.31

The main increases in expenditure are due to the putting into force of a New Educational Code which provides for more liberal grants to the Schools; to the construction of a narrow gauge light railway, extending from Rivière du Poste Station on the Savanne Line to Bois Chéri on the west, and Mexico and Nouvelle France on the east; to the extension of the North Line of Railway from Terre Rouge Station to the Long Mountain Valley—a portion of the cost of which extensions has been met out of Treasury balances—and to the additional public works undertaken by the Surveyor General's Department.

POSITION OF THE COLONY AT THE CLOSE OF THE YEAR 1902-3.

	Rs.
At the close of the year 1902-3, the balance in favour of the Treasury was	1,263,430
At the close of 1901-2, it was	1,834,669
Showing a decrease in 1902-3 of ...	571,239

The revenue and expenditure for the last five years, and the Treasury balances at the close of last year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.
	Rs.	Rs.	Rs.
1898	7,620,318	8,131,465	438,866
1899	9,066,314	8,407,227	1,077,715
1900	9,179,968	8,568,923	1,704,424
1901–02	9,140,754	9,043,066	1,834,669
1902–03	9,221,600	9,575,182	1,263,430

The difference between the revenue and expenditure of 1902-3 —Rs. 353,582—was met from Treasury balances.

Assets and Liabilities on 30*th June*, 1903.

1. Commissioners of Currency:—

	Rs.
Assets	6,010,181
Liabilities	5,911,250
Balance in favour of Commissioners ...	98,931

2. Government Savings Bank:—

	Rs.
Assets	3,134,996
Liabilities	2,825,858
Balance in favour of Bank	309,138

3. Curatelle:—

	Rs.
Assets	462,947
Liabilities	462,947

4. Treasury proper:—

	Rs.
Assets	4,196,027
Liabilities	2,932,597
Balance in favour of the Treasury ...	1,263,429

5. Public Debt:—

The Public Debt stood as follows on the 30th June, 1903:—

	£	s.	d.
(1) Savanne Railway 4½ per cent. Debentures, payable by annual drawings ...	40,693	10	0
(2) Moka Railway 4 per cent. Debentures, payable by annual drawings ...	600	0	0
(3) Consolidated 4 per cent. Debentures, payable by annual drawings	56,100	0	0
(4) Mauritius Inscribed Stock under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas (£34,000)	482,390	16	0
(5) Hurricane Loan 3 per cent. Imperial Guaranteed Stock under Ordinance 4 of 1892	600,000	0	0
(6) Planters 4 per cent. Loan under Ordinance No. 34 of 1902	200,000	0	0
	£1,379,784	6	0

For the redemption of the debentures and inscribed stock, the several sinking funds and cash balances in the hands of the trustees on the 30th June, 1903, amounted to £167,234 16*s.* 8*d.*, the amount duly provided as required by law. This is exclusive of the balance due to the Loan Office, amounting to £321,623 9*s.*

The sum at the credit of the sinking funds on 30th June, 1903, showed an increase of £20,742 6*s.* 11*d.* on the previous year.

Currency.

Amount of currency notes on 31st December, 1903:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents) ...	483	16	5
Issue of 1860 (sterling)	3,639	0	0
	£4,122	16	5

Rupee notes under Ordinance 28 of 1876:—

	Rs.
1. In the Commissioner's vault	1,063,000
2. In the hands of the public (including the banks and financial officers) ...	4,848,250
	5,911,250

MUNICIPALITIES.

The Municipality of the town of Port Louis is the only elective institution in the Island. The following statement shows the financial position at the end of 1903:—

	Rs.
Balance in hand on 1st January, 1903 ...	27,130.80
Revenue and receipts during the year ...	551,965.93
	579,096.73
Expenditure	552,574.44
Balance in hand on 31st December, 1903	26,522.29

The following is a comparative statement of the revenue and expenditure of the last five years:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1899	432,911.00	424,385.92
1900	435,264.53	433,351.95
1901	412,854.46	448,214.52
1902	442,825.20	472,875.39
1903	*422,351.45	451,345.77

* Not including a loan of Rs 30,000 for the purchase of the buildings of the Gas Company and of a traction engine for scavengering purposes.

The following is a statement of the debts of the Municipal Corporation of Port Louis on 31st December, 1903, showing provision for payment in 1904:—

Loan.	Amount.	Repayments to be made in 1904.
	£	£
Conversion Loan	125,000	1,450
	Rs.	Rs.
Colonial Loan	46,800	7,800
Grand River Bridge Loan	16,000	2,000
Manure Establishment Loan	26,000	2,000
Government Hurricane Loan	101,424.78	5,544.81
Overflood Loan	20,833.38	4,166.66
Municipality Loan	30,000.00	2,000
Total	241,058·16	23,511.47

Provision for payment of capital and interest on the above loans is included in the annual budget of the Corporation.

The following statements relate to the townships of Curepipe, Beau Bassin and Rose Hill, and Quatre Bornes. These townships are governed by Nominee Boards of Commissioners.

BOARD OF COMMISSIONERS FOR CUREPIPE.

Comparative Statement of Revenue and Expenditure.

—	1899.	1900.	1901.	1902.	1903.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	61,568.61	59,759.18	115,590.13	121,322.70	85,477.51
Expenditure...	59,085.14	57,108.48	88,426.58	120,286.57	77,023.39

Debts of the Board of Curepipe.

	Rs.	Rs.
1. Amount of debentures issued in 1901 and 1902 for the construction of the Town Hall in virtue of Ordinance No. 39 of 1900 ...	70,000	
Amount paid off in 1902 and 1903 ...	5,000	
		65,000
2. Balance of sale price of a piece of land purchased by the Board		4,000
Total ...		69,000

This sum is to be paid out of the General Revenue of the Board. Article 9 of Ordinance No. 39 of 1900 enacts that 25 of the debentures issued shall be repayable in every year.

BOARD OF COMMISSIONERS FOR BEAU BASSIN AND ROSE HILL

Comparative Statement of Revenue and Expenditure.

—	1899.	1900.	1901.	1902.	1903.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	23,298.56	22,905.09	28,252.08	29,442.81	32,516.10
Expenditure...	23,626.60	25,377·09	27,520·54	33,133.34	29,235.29

Debt.—A loan of Rs. 20,000 was made to the Board by Government on its creation to permit of the works of repairing and draining the streets and lanes of the township being undertaken without delay. This amount is refunded by annual instalments of Rs. 2,000 and the debt is now reduced to Rs. 6,000.

BOARD OF COMMISSIONERS FOR QUATRE BORNES.

Comparative Statement of Revenue and Expenditure.

—	1899.	1900.	1901.	1902.	1903.
	Rs.	Rs	Rs.	Rs.	Rs.
Revenue ...	10,054.90	10,060.70	12,827.14	13,627.55	15,460.80
Expenditure ...	9,189.68	11,418.02	10,148.32	13,454.95	14,000.25

Debt—Rs. 615. This represents the share to be paid to Government by the Board for remetalling a main road in the township. Provision has been made in this year's estimates to pay off this debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following returns give the total imports and exports, classified under the headings, live animals and food, raw materials, manufactured articles, coin, bullion and specie, and the distinction has been drawn between home and foreign produce.

VALUE of IMPORTS (exclusive of charges and exchange) and EXPORTS (exclusive of shipping charges).

—	Imports.		Exports					
			Home Produce.		Foreign Produce.		Total.

CUSTOMS.

The following statements show the value of goods imported into and exported from Mauritius during the year 1903:—

IMPORTS.

Countries.	Value in Rupees of the Total Imports, exclusive of Charges and Exchange.	Charges and Exchange.	Total.
	Rs.	Rs.	Rs.
United Kingdom	5,617,021.46	4,690,560.66	10,307,582.12
British Possessions	15,034,345.35	3,389,695.55	18,424,040.90
Foreign Countries	5,959,247.27	4,578,976.95	10,538,224.22
Grand Total... ...	26,610,614.08°	12,659,233.16	39,269,847.24

° Inclusive of amount of specie and bullion imported, Rs. 3,243,365.10.

EXPORTS.

Countries.	Produce and Manufacture of the Colony.	Shipping Charges on Produce and Manufacture of the Colony.	British, Foreign and other Colonial Produce and Manufactures.	Total.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	4,247,926.81	259,927.88	100,934.22	4,608,788.91
British Possessions.	29,118,284.36	1,843,392.10	1,693,836.47	32,655,512.93
Foreign Countries	313,730.18	20,349.35	195,885.38	529,964.91
Total ...	33,679,941.35	2,123,669.33	1,990,656.07	37,794,266.75*

* Inclusive of amount of specie and bullion exported, Rs. 1,532,526.71.

TRADE OF MAURITIUS.

1. The total value of imports into and exports from the Colony (exclusive of duty-free goods to and from the Dependencies) for the year ending 31st December, 1903, compared with 1902, is as follows:—

—	1902.	1903.
	Rs.	Rs.
Imports (including charges and exchange)	30,738,778.11	39,269,847.24
Exports (exclusive of shipping charges on local produce and manufacture).	36,203,647.28	35,670,597.42
Total	66,942,425.39	74,940,444.66

Accounted for as under:—

—	Imports.		Exports.	
	1902.	1903.	1902.	1903.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	8,224,250.06	10,307,582.12	4,365,353.41	4,348,861.03
British Possessions.	16,923,006.23	18,424,040.90	31,215,080.49	30,812,120.83
Foreign Countries.	5,591,521.82	10,538,224.22	623,213.38	509,615.56
Total ...	30,738,778.11	39,269,847.24	36,203,647.28	35,670,597.42

2. The total value of imports and exports, from and to the Dependencies, per Coast Sufferances, is recorded thus:—

—	1902.	1903.
	Rs.	Rs.
Imports	435,529.29	489,999.14
Exports	367,482.90	443,813.09
Total	803,012.19	933,812.23

3. The aggregate value of trade is, therefore, as under:—

—	1902.	1903.
	Rs.	Rs.
Imports	31,174,307.40	39,759,846.38
Exports	36,571,130.18	36,114,410.51
Total	67,745,437.58	75,874,256.89

4. Excluding the value of exports to and imports from the Dependencies, the rate of trade, per head of population, was:—

—	1902.	1903.
	Rs.	Rs.
Imports (including charges and exchange)	81.34	103.30
Exports (exclusive of shipping charges on local produce and manufacture).	95.80	93.59

The difference in the rate of trade for imports is accountable to the large amount of specie and bullion imported in 1903, showing a surplus of Rs. 2,039,016 over 1902, and also to tramway materials, &c., amounting to Rs. 5,007,809, imported duty free.

5. The value of specie and bullion imported and exported is as follows:—

—	1902.			1903.		
	Declared Value.	Charges.	Total.	Declared Value.	Charges.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Imported	1,434,738.42	70,689.10	1,505,427.52	3,243,365.10	230.389.46	3,473,754.56
Exported	4,403,260.00	—	4,403,260.00	1,532,526.71	—	1,532,526.71
Total	5,837,998.42	70,689.10	5,908,687.52	4,775,891.81	230,389.46	5,006,281.27

6. Deducting specie and bullion, the declared values of imports and exports, mentioned in paragraph 1, were as follows:—

—	1902.	1903.
	Rs.	Rs.
Imports	29,233,350.59	35,796,092.68
Exports	31,800,387.28	34,138,070.71
Total...	61,033,737.87	69,934,163.39

7. The amounts collected as duty during the years (1st January to 31st December) 1902 and 1903 are as under:—

—	1902.	1903.
	Rs.	Rs.
Imports	2,611,411.70	2,638,370.89
Exports	485,235.01	546,835.20
Total...	3,097,645.71	3,230,206.09

The 4 per cent. surcharge levied on imports to meet the Sinking Fund and interest on a loan to be raised for reafforestation purposes produced Rs. 102,875.06 in 1903.

8. The following return is a comparative statement of the value of the chief articles of imports and exports for the years 1902-3, exclusive of charges and exchange.

Articles.	Imports.		Exports.			
			1902.		1903.

POSTAL PARCELS.

9. The declared value of the parcels, despatched and imported, during the past five years is as under:—

—	1899.	1900.	1901	1902.	1903.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imported ...	184,625.50	183,425.50	214,534.60	231,993.73	224,885.17
Exported ...	14,584.42	18,940.26	19,388.42	20,628.64	28,624.83
Total ...	199,209.92	202,365.76	233,923.02	252,622.37	253,510.00

IMPORTS AND EXPORTS.

10. The total value of imports and exports for the last five years, 1899-1903, is as follows:—

Year.	Imports, including Charges and Exchange.	Exports, including Shipping Charges.
	Rs.	Rs.
1899	28,180,979.14	27,381,160.50
1900	31,427,401.72	33,550,973.94
1901	31,679,842.99	30,842,305.66
1902	30,738,778.11	38,341,695.55
1903	39,269,847.24	37,794,226.75

The imports show a considerable increase in 1903 as compared with 1902. This is due to the large quantity of tramway materials and to the number of traction engines and automobiles imported to meet the requirements of the planters. There is, however, a deficiency in the exports of Rs. 547,468.80, due to delay in the shipment of sugars.

IMPORTS.

11. Dealing with the articles and their values according to the entries (where the differences are over Rs. 5,000) the following results are to be noted:—

Ammonia Sulphate.

3,983,785 kilos., of the value of Rs. 897,383, were imported in 1903, against kilos. 2,547,567, of the value of Rs. 535,917, during the previous year, showing an increase in weight of kilos. 1,436,218, and in value of Rs. 261,466 This article is exclusively imported from the United Kingdom.

Animals.

Asses.—301 in number and valued Rs. 28,096 were imported in 1903, as compared with 11 imported in 1902 from Seychelles valued Rs. 1,638, showing an increase of 290 in number and of Rs. 26,458 in value; the increase comes chiefly from the Argentine Confederation, Aden, and Continental India.

Cows and Oxen.—4,081 head were imported during 1903, as compared with 5,369 in 1902, showing a decrease in number of 1,288, and in value of Rs. 104,432. Oxen were almost exclusively imported from Madagascar.

Horses.—2,219, valued Rs. 1,394,343, were imported in 1903, against 768, valued Rs. 213,760, in the previous year; the surplus is, therefore, of 1,551 in number, and of Rs. 1,180,583 in value. Increases are from Australia, Continental India, Argentine Confederation and Sandalwood, which supplied respectively 244, 409, 529, and 268 more head than in 1902, with a surplus in value of Rs. 77,356, Rs. 755,899, Rs. 295,476, and Rs. 51,145.

Mules.—774 in number and of the value of Rs. 337,903 were imported in 1903, against 687 of the value of Rs. 174,498 in 1902, showing an increase of 87 more head, and of Rs. 163,405 in value. The Argentine Republic provides for the increase.

Sheep and Goats.—Decreased in number from 457, of the value of Rs. 8,314, in 1902, to 265, of the value of Rs. 3,253, in 1903, showing a decrease in value of Rs. 5,061.

Swine.—Only one, valued Rs. 7, was imported in 1903 from Seychelles, against 94, of the value of Rs. 11,506, in 1902, supplied by the United Kingdom, Argentine Republic, Seychelles and Norway, to the amount of 2, 83, 8 and 1 respectively.

Apparel, Wearing.

The value of the imports for 1903 amounted to Rs. 128,646, against Rs. 134,028 for 1902, showing a decrease of Rs. 5,382. The United Kingdom shows an increase of Rs. 8,279, but a decrease of Rs. 17,376 is noticed from Continental India.

Gunpowder, Blasting.

The United Kingdom supplied in 1903, kilos. 9,988, of the value of Rs. 7,060, against kilos. 3,682 in 1902, of the value of Rs. 2,706, showing an increase of kilos. 6,306 in weight and of Rs. 4,354 in value.

Automobiles.

France supplied seven automobiles of the value of Rs. 10,648 in 1903, against nil in the preceding year.

Bacon and Hams.

The imports for 1903 amounted to kilos. 35,781, of the value of Rs. 48,365, against kilos. 22,180, of the value of Rs. 29,719, in 1902, showing an increase in weight of kilos. 13,601 and in value of Rs. 18,646. The increase comes from the United Kingdom and Australia, which supplied a surplus of kilos. 12,483 and kilos. 1,025 in weight, and of Rs. 17,023 and Rs. 1,347 respectively in value over the imports of the preceding year.

Baggage.

Dutiable articles decreased in value from Rs. 56,243 in 1902 to Rs. 37,908 in 1903, leaving a shortage of Rs. 19,335.

Bags.

Gunny.—130,707 more bags were received in 1903, giving an increase in value of Rs. 57,713 over the imports for 1902. The bags were imported principally from Continental India.

Straw.—Madagascar supplied 225,000 bags more than in the preceding year, with an increase of Rs. 38,354 in value.

Bark and Dyewood.

Australia supplied kilos 81,814, valued Rs. 12,185, in 1902, against kilos 48,768, valued Rs. 7,394, in 1903, giving a shortage of kilos 33,046 in weight and of Rs. 4,791 in value.

Beef, Salted.

The imports for 1903 amounted to kilos. 285,083, of the value of Rs. 168,278, against kilos. 110,125, of the value of Rs. 64,951, in 1902, showing an excess of kilos. 174,958 in weight and of Rs. 103,327 in value. The increase comes chiefly from the United Kingdom and from the United States, which supplied an excess of kilos. 43,647 and kilos. 131,524 in weight, and of Rs. 23,021 and Rs. 80,583 in value respectively.

Beer and Ale.

In casks.—The United Kingdom exclusively supplies this article. 1,058 hectolitres more were imported in 1903, and the value increased by Rs. 19,312 accordingly.

In bottles.—The imports for last year show a decrease of litres 12,899 in measure, but an increase of Rs. 1,014 in value. The United Kingdom and France supplied an excess of litres 1,382 and litres 8,961, with a surplus value of Rs. 7,679 and Rs. 3,335 respectively, as compared with the preceding year, but from Germany there is a decrease of 21,562 litres with a less value of Rs. 9,304.

Books, Printed.

The value of books imported in 1903 shows an increase of Rs. 8,350 as compared with 1902. The increase is chiefly from the United Kingdom.

Bran.

Kilos. 2,094,558, of the value of Rs. 358,317, were imported in 1903, against kilos. 1,664,289, of the value of Rs. 175,301, in the previous year, showing an increase of kilos. 430,269 in weight and of Rs. 183,016 in value. The increases are noticeable specially under Continental India and the Argentine Republic.

Brass Ornaments.

A decrease of Rs. 5,572 is noticed for 1903, due specially to less imports from Continental India.

Bricks and Tiles.

Decreased from 299,568, of the value of Rs. 33,219, in 1902, to 147,961, of the value of Rs. 18,228, in 1903, accountable to less imports from the United Kingdom.

Bullion—Silver.

Continental India supplied in 1903 kilos. 410 less than in 1902, giving a decrease in value of Rs. 17,330.

Butter.

The imports for 1903 amounted to kilos. 36,057, of the declared value of Rs. 76,040, against, for 1902, kilos. 44,119, of the value of Rs. 101,503, showing a decrease of Rs. 25,463 in value and of kilos. 8,062 in weight. The decrease comes from Denmark, which supplied, in 1903, for a less value of Rs. 30,380. An increase of Rs. 9,095 is noticeable under Australia.

Bicycles.

155 bicycles, valued Rs. 24,100, were received in 1903, against 146, valued Rs. 32,256, in 1902, showing an increase of nine in number, but a decrease of Rs. 8,156 in value, consequent upon the importation of cheaper articles from the United Kingdom.

Cabinet and Upholstery Wares.

The declared value of the articles imported in 1903, as compared with the imports in 1902, shows an increase of Rs. 5,662.

The increase comes specially from France, which provided for Rs. 17,977 more than in the previous year. From the United Kingdom a decrease of Rs. 9,956 is noted.

Camphor.

Crude.—Decrease of kilos. 17,029 in weight and of Rs. 6,643 in value, chiefly from Continental India.

Candles.

Composition.—Decrease of kilos. 15,546 in weight and of Rs. 11,352 in value as compared with previous year. Decreases are noted from the United Kingdom, Belgium, Continental India, and Holland.

Cement.

The imports for 1903 amounted to kilos. 597,465, valued Rs. 24,919, against, for 1902, kilos. 460,120, valued Rs. 16,055, showing an increase of kilos. 137,345 in weight and of Rs. 8,864 in value. The increases to be noted are from the United Kingdom (Rs. 5,065), France, Germany, and Belgium.

Cheese.

Increase of kilos. 7,408 in quantity and of Rs. 15,031 in value over the preceding year. The increases are from the United Kingdom (Rs. 6,279), Australia (Rs. 1,920), France (Rs. 1,734), Germany, Holland (Rs. 4,883).

Chocolate and Cocoa.

Decrease in weight of kilos. 3,401 and in value of Rs. 5,079. The decreases are noticeable from the United Kingdom and France.

Clocks and Watches.

Decrease of 999 in number and of Rs. 4,749 in value. The decrease comes chiefly from France and Switzerland.

Coals.

Increase of 6,993 tons in quantity and of Rs. 881,990 in value as compared with the previous year. The United Kingdom and Australia supplied an excess of 9,533 tons and 1,173 tons in weight, and of Rs. 88,802 and Rs. 33,318 in value respectively. Continental India supplied 3,929 tons less in weight, but with a surplus of Rs. 39,635 in value.

Coffee.

Compared with the imports for 1902, there is a decrease in weight of kilos. 2,704, but an increase in value of Rs. 2,468. Continental India and Singapore show an excess of kilos. 62,134 and kilos. 19,046 in weight, with an increase in value of Rs. 39,904 and Rs. 10,585 respectively. From Aden, kilos. 26,583 more were imported, but with a shortage in value of Rs. 10,750. Brazil, the Argentine Republic, and Natal provided for Rs. 39,006, Rs. 1,579, and Rs. 2,753 in 1902, against nil in 1903.

Confectionery.

Decrease of Rs. 5,238. The United Kingdom shows a falling off of Rs. 8,753, but France a surplus of Rs. 3,324.

Copperah or Poonac.

Kilos. 200, valued Rs. 38, were received from Seychelles in 1902, against kilos. 306,977, valued Rs. 12,393, imported in 1903 from Continental India. The increase is, therefore, of kilos. 306,777 in weight and of Rs. 12,355 in value.

Copper.

Yellow.—This article, exclusively imported from the United Kingdom, shows an increase of kilos. 6,260 in weight and of Rs. 8,215 in value, as compared with the imports for the previous year.

Sheets and Nails (red).—Increase of kilos. 7,143 in weight and of Rs. 7,345 in value—exclusively imported from the United Kingdom.

Sheets and Nails (yellow).—Increase of kilos. 21,781 in weight and of Rs. 11,469 in value—almost exclusively imported from the United Kingdom.

Cordage.

Coir.—Increase in weight of kilos. 56,426 and of Rs. 9,023 in value, due to imports from Continental India.

Hemp.—Decrease in weight of kilos. 29,796 and in value of Rs. 12,170, due to less imports from Continental India and Hong-Kong.

Oiled.—The United Kingdom and Continental India supplied in 1903 kilos. 3,543 and kilos. 6,359, of the declared value of Rs. 3,204 and Rs. 2,270 respectively, against, in the former year, kilos. 610, valued Rs. 220, supplied from Continental India.

Corks and Bungs.

Increase of 4,498,015 in number and of Rs. 13,523 in value, principally due to more imports from France to the value of Rs. 14,064.

Corn Flour.

Increase of kilos. 110,473 in weight and of Rs. 17,594 in value, specially due to more imports from Continental India, which provided for Rs. 15,123 in 1903, against nil in the previous year.

Corn, Grain, Meal, &c.

Barley.—Decrease of kilos. 94,599 in weight and of Rs. 8,730 in value.

Dholl.—Increase of kilos. 1,502,379 in weight and of Rs. 186,271 in value.

Gram.—Decrease of kilos. 1,840,991 in weight and of Rs. 367,518 in value.

Lentils.—Increase of kilos. 543,065 in weight and of Rs. 56,812 in value.

Barley, dholl, gram, and lentils are almost exclusively imported from Continental India.

Oats.—Decrease of kilos. 764,807 in weight and of Rs. 73,178 in value. Continental India and Australia provided for a less value of Rs. 70,641 and Rs. 10,638 respectively. The Argentine Republic provided for Rs. 8,252 in 1903, against nil in 1902.

Peas.—Decrease of kilos. 184,037 in weight and of Rs. 21,156 in value. The decrease is due to no supply in 1903 from Madagascar, against kilos. 267,217, valued Rs. 53,173, in 1902.

Rice.—Increase of tons 2,322 in weight, but decrease of Rs. 408,302 in value. Compared with 1902, the imports for 1903 give the following result:—

From Continental India.—Excess of 1,239 tons, but with a shortage in value of Rs. 399,756.

From China.—Shortage both in weight of 188 tons and in value of Rs. 44,059.

From Cochin China.—A supply of 337½ tons, of the value of Rs. 50,692, against nil in the preceding year.

From Singapore.—Surplus of 256 tons in weight and of Rs. 19,909 in value.

From Straits Settlements.—No supply in 1903, against 225 tons, of the declared value of Rs. 35,845, in 1902.

Wheat.—Decrease of 106 tons with a short value of Rs. 11,661, due to less imports from Continental India.

Wheat Flour.—The imports for last year show an increase of 533 tons in weight and of Rs. 38,015 in value, as compared with 1902, and the following is noticeable:—

From the United Kingdom.—Shortage of 44 tons with a falling-off of Rs. 7,892 in value.

From Australia.—Shortage of tons 1,338, with a decline in value of Rs. 98,407.

From Continental India.—An increase of 1,797 tons in weight and of Rs. 219,468 in value.

From China.—Excess of 43 tons in weight and of Rs. 8,531 in value.

From the United States.—42 tons, valued Rs. 9,920, were supplied in 1902, against only kilos. 87 for last year.

Cotton Manufactures.

Coloured.—Increase of Rs. 17,814 in value, with the following result:—

United Kingdom, shortage of Rs. 10,688; Continental India, surplus of Rs. 13,224; Belgium, surplus of Rs. 9,199; Germany, surplus of Rs. 7,684; Switzerland, shortage of Rs. 5,070.

Plain.—A large decrease of Rs. 243,258 is noted, and is due to less imports from the United Kingdom, France, and Germany, which show decreases of Rs. 258,380, Rs. 1,709, and Rs. 1,229 respectively, while from Continental India there is an increase of Rs. 16,843.

Thread for sewing.—Decreased both in weight, kilos. 8,089, and in value, Rs. 29,189; from the United Kingdom a falling off of Rs. 26.387 is noticeable.

Earthen and China Wares.

A decrease of Rs. 10,363 in value, chiefly from the United Kingdom (Rs. 6,411), Austria (Rs. 2,658), and Germany (Rs. 2,472).

Fish.

Dried or Salted.—Decrease in weight of kilos. 111,921, but with an increase in value of Rs. 40,275, with the following result:—

United Kingdom.—Surplus in weight of kilos. 10,640 and in value of Rs. 3,954.

Cape Colonies.—154,106 kilos., valued at Rs. 101,373, imported in 1903, against nil in the previous year.

Continental India.—A falling off of kilos. 203,761 in weight and of Rs. 33,270 in value.

Nova Scotia.—A falling off of kilos. 46,525 in weight and of Rs. 18,719 in value.

Madagascar.—An increase of kilos. 38,384 in weight and of Rs. 16,805 in value.

United States.—A decrease in weight of kilos. 45,481 and of Rs. 20,062 in value.

Newfoundland.—A decrease of kilos. 19,405 in weight and of Rs. 8,874 in value.

Pickled.—Decrease of Rs. 11,526 in value. The United Kingdom and Nova Scotia provide for a surplus of Rs. 2,559 and Rs. 7,280 respectively. A decrease of Rs. 19,448 is noted under the United States.

Glass.

Looking and Mirrors.—Decrease of Rs. 5,311 in value, principally from France, which shows a shortage of Rs. 7,217, while Germany, Continental India, and the United Kingdom show small increases.

Glassware.

Decrease of Rs. 22,801 in value, due to short imports from the United Kingdom (Rs. 5,907), Austria, Belgium, China, France (Rs. 9,665), and the United States (Rs. 5,425). A slight increase is noted under Continental India and Germany.

Haberdashery.

The imports for 1903 amounted to Rs. 560,495, against Rs. 587,275 for 1902, showing a decline of Rs. 26,780. Decreases are noted under the United Kingdom (Rs. 41,475), Continental India (Rs. 18,223), Austria, China, Japan, and the United States; while increases are shown from France (Rs. 5,745), Germany (Rs. 15,679), Holland (Rs. 10,338), Italy, Pondicherry, and Switzerland (Rs. 5,375).

Hardware and Cutlery.

The imports show a surplus of Rs. 251,354 as compared with last year. Increases are noticeable under the United Kingdom (Rs. 148,344), Ceylon, Continental India, Belgium (Rs. 20,224), China, Germany (Rs. 100,330), and Pondicherry. Decreases are from Holland, Austria, France (Rs. 6,240), Sweden, Switzerland, and the United States (Rs. 11,847).

Hats.

Felt.—Decrease of 9,030 in number and of Rs. 8,855 in value, due to less imports from the United Kingdom, France, and Italy.

Of other sorts.—Decrease of 3,360 in number and of Rs. 8,855 in value, due to less imports from the United Kingdom and from no supply from Continental India, which provided for Rs. 6,313 in 1902.

Hull of Vessels Abandoned.

Only one, of the value of Rs. 450, in 1903, against five, of the value of Rs. 31,644, in the previous year. A short difference of Rs. 31,194 is accordingly noted.

Iron.

Bars.—The imports for 1903 amounted to kilos. 1,237,241, of the value of Rs. 139,895, as compared with kilos. 509,424, of the value of Rs. 64,053, in 1902, showing an increase of kilos. 727,817 in weight and of Rs. 75,842 in value, due to more imports from the United Kingdom.

Nails.—Decrease of kilos. 119,873 in weight and of Rs. 29,987 in value. Decreases are from the United Kingdom (Rs. 26,935), Continental India, and France.

Sheets.—Decrease of kilos. 338,104 in weight and of Rs. 88,215 in value, specially due to less imports from the United Kingdom.

Wire netting and galvanized.—Decrease of kilos. 25,961 in weight and of Rs. 8,188 in value, accountable to less imports from the United Kingdom.

Wrought of other sorts.—Decrease of kilos. 72,527 in weight and of Rs. 14,833 in value. The United Kingdom provided for Rs. 14,558 less as compared with the imports for 1902.

Jewellery.

Decreased from Rs. 81,326 in 1902 to Rs. 45,899 in 1903. The shortage is, therefore, of Rs. 35,427. The United Kingdom, Continental India, France, and Switzerland show respective decreases of Rs. 212, Rs. 612, Rs. 24,787, Rs. 11,064.

Lard.

Decreased both in weight (kilos. 140,949) and in value (Rs. 100,494). The United Kingdom, Continental India, China, France, and the United States provided for a less value of Rs. 7,286, Rs. 17,741, Rs. 50,843, Rs. 19,573, and Rs. 24,529 respectively. Australia supplied for Rs. 3,923 in 1903, against nil in the preceding year.

Leather.

Wrought. Boots and Shoes.—27,782 pairs more were received in 1903 and the value increased by Rs. 36,971 accordingly.

Increase is noticeable under the United Kingdom (Rs. 9,648), Continental India (Rs. 16,450), France (Rs. 8,955), and the United States.

Wrought of other sorts.—Decrease of Rs. 21,604 in value. France and the United Kingdom provided for a less value of Rs. 17,315 and Rs. 4,178 respectively.

Lime.

Superphosphate of Lime.—The United Kingdom supplied kilos. 374,001 less, with a shortage in value of Rs. 34,831, as compared with 1902.

Machinery and Millwork.

The value of machinery and millwork imported in 1902 (excluding tramway and railway materials, automobiles, traction engines, wire ropes, &c., entered under a separate heading) amounted to Rs. 460,900, against Rs. 256,738 in 1903. The decrease is, therefore, of Rs. 204,162.

Tramway materials, traction engines, automobiles and accessories, wire rope.—The imports for 1902 aggregated in value Rs. 487,361, including tramway materials Rs. 210,637, traction engines and automobiles Rs. 256,157, and wire rope Rs. 20,567.

The following statement shows the importation for 1903:—

Countries whence Imported.	Tramway Materials.		Traction Engines, Automobiles, &c. and Accessories.			Wire Rope.	
	Quantity.	Value.	Number.	Quantity.	Value.	Quantity.	Value.
	Kilos.	Rs.		Kilos.	Rs.	Kilos.	Rs
United Kingdom	1,605,838	155,271	71	755,219	430,504	76,653	25,289
France	1,001,689	128,442	3	29,109	23,386	1,219	597
Belgium	13,442,279	1,171,443	13	81,393	62,679	64,322	4,150
Germany	4,626,139	623,805	6	242,950	73,389	—	—
Holland	410,922	40,950	1	6,687	7,104	—	—
Total	21,086,937	2,119,911	94	1,115,358	597,062	142,194	30,036

giving the following percentage as to weight and value:—

	Per cent.	Per cent.		Per cent.	Per cent.	Per cent.	Per cent.
United Kingdom	7·62	7·32	—	67·71	72·10	53·91	84·20
France	4·75	6·06	—	2·61	3·92	0·86	1·99
Belgium	63·74	55·26	—	7·30	10·50	45·23	13·81
Germany	21·94	29·42	—	21·78	12·29	—	—
Holland	1·95	1·94	—	0·60	1·19	—	—

Almost the whole lot of those materials were imported to cope with the requirements of the railway extension lines and for agricultural purposes, and were entered free of duty under resolution of the Council of Government.

Aggregating the different headings of those materials the amount imported from each country, with the rate of importation, is as hereunder, British goods having been superseded by those from Belgium and Germany:—

—	Value.	Rate of Importation.
	Rs.	Per cent.
Belgium	2,257,371	45·6
Germany	1,270,984	25·3
United Kingdom	1,113,970	22·2
France	277,870	5·4
Holland	87,613	1·5

Manure.

Guano.—Decrease of kilos. 2,539,290 in weight and of Rs. 92,363 in value. The imports for 1902 were exclusively from Seychelles, which provided last year for a less value of Rs. 108,098, while some guano, valued Rs. 15,733, was received from Glorieuse Island.

Other sorts.—Decrease of Rs. 60,562 in weight and of Rs. 33,530 in value. Decreases are noted under the United Kingdom (Rs. 7,903), Australia (Rs. 68,829). An increase is under Continental India, Rs. 13,779. Belgium provided for Rs. 5,385 in 1902, against nil in the past year.

Margarine.

Decrease of kilos. 16,538 in weight and of Rs. 16,245 in value. Decreases are from the United Kingdom, Denmark, Holland, and the United States (Rs. 10,153).

Meat—Fresh, Frozen.

This article is exclusively supplied from Australia, and its importation during the two years 1902 and 1903 is as under:—

—	Value.		Increase—I. or Decrease—D.
	1902.	1903.	
	Rs.	Rs.

Swine	14,700	21,071	I.— 6.371
Poultry	17,596	—	D.— 17,596
Rabbits	2,604	—	D.— 2,604

Military Articles.

The importations for 1903 amounted to Rs. 1,312,314, against Rs. 1,343,621 for 1902, showing a decrease of Rs. 31,307. The United Kingdom provided for a surplus value of Rs. 23,271, but Continental India shows a falling off of Rs. 53,774.

Musical Instruments.

Increase of Rs. 91,967 in value, due to more importations from France, which provided for a surplus value of Rs. 92,267. Small decreases are noticeable under the United Kingdom, Germany, and Continental India.

Oil.

Castor.—Increase of kilos. 65,416 in weight and of Rs. 14,148 in value.

Cocoanut.—Decrease of 396 hectolitres less in measure and of Rs. 13,043 in value, due to less imports from Seychelles.

Gingely.—Decrease of kilos. 26,178 in weight, but with an increase in value of Rs. 8,906—exclusively supplied from Continental India.

Linseed.—Decrease of 53 hectolitres in quantity and of Rs. 8,540 in value—exclusively imported from the United Kingdom.

Mustard.—Increase of kilos. 125,330 in weight and of Rs. 5,023 in value—exclusively imported from Continental India.

Olive.—Increase both in quantity and in value and exclusively supplied from France, which provided for a surplus value of Rs. 11,514 in 1903.

Petroleum.—11,245 hectolitres more were received in 1903, with a surplus value of Rs. 261,793. The United States supplied in 1903 786 hectolitres less than in the past year, but for a more value of Rs. 41,401. In 1903 Russia supplied 12,031 hectolitres, of the value of Rs. 220,404, against nil in the previous year.

Pistachio.—Increase of kilos. 133,651 in weight and of Rs. 47,013 in value. Increases are noted under Continental India (Rs. 44,747) and China (Rs. 6,818), but Pondicherry shows a decrease of Rs. 4,552.

Other sorts.—Increase of 916 hectolitres in quantity and of Rs. 54,261 in value. The United States and France provided for a surplus value of Rs. 57,538 and Rs. 2,806 respectively. Germany provided for Rs. 5,445 last year, against nil in 1902. The United Kingdom and Continental India show respective decreases of Rs. 9,666 and Rs. 2,103.

Onions and Garlic.

Kilos. 422,675, valued Rs. 43,616, were received in 1903, against kilos. 164,655, valued Rs. 20,854, in the former year. Increase both in weight (kilos. 258,020) and in value (Rs. 22,762). The increase arises from Ceylon, Continental India, France, and Réunion, while a decrease is noted from China.

Opium

Crude.—15 kilos. more were received in 1903, with a surplus in value of Rs. 6,953. This article is exclusively imported from Continental India.

Painters', Dyers', Colours and Materials.

Decrease in value of Rs. 29,891. Less importations are noted, specially from the United Kingdom (Rs. 29,382) and also from Austria, France, Continental India, and Germany.

Paper, Cigarette.

Decrease both in weight (kilos. 2,739) and in value (Rs. 11,239). This article is exclusively imported from France.

Paper Manufactures.

Decrease in value of Rs. 6,743. Less imports were received from Continental India, Hong-Kong, Japan, Singapore, China, and France (Rs. 10,816). Increases are noted under the United Kingdom (Rs. 3,569), Australia, Germany, the United States, and Switzerland.

Perfumery.

Increase of Rs. 13,543 in value—from the United Kingdom, Continental India, and France (Rs. 10,440).

Pictures.

Oil Paintings.—24 pictures, valued Rs. 6,106, were received in 1902 against nil in 1903.

Plague Serum.

The United Kingdom provided for Rs. 6,107 in 1903, against Rs. 557 in 1902, or an increase of Rs. 5,550.

Pockets, Empty.

Continental India supplied in 1903 for a less value of Rs. 74,130 and 342,000 bags less.

Pork, Salted.

Decrease both in weight and in value (Rs. 55,557). The United States provided for Rs. 6,527 less in 1903, but small increases are noted under the United Kingdom and France.

Potash.

Nitrate of.—Decrease of kilos. 633,418 in weight and of Rs. 272,178 in value. The United Kingdom provided for Rs. 51,530 in 1902 and none in 1903. From Continental India there is a decrease of kilos. 519,058 in weight and of Rs. 220,649 in value.

Sulphate of.—Less imports were received in 1903 from the United Kingdom. Decrease of kilos. 83,877 in weight and of Rs. 43,607 in value.

Potatoes.

Increase of kilos. 181,963 in weight and of Rs. 21,069 in value, as compared with 1902. Continental India, France, and Réunion show increases in weight and in value of Rs. 5,632, Rs. 5,587, Rs. 7,248 respectively.

Provisions, Preserved.

Decrease of Rs. 27,823 in value. Decreases are under the United States (Rs. 15,680), France (Rs. 8,869), the United Kingdom, Australia, Continental India, and China. Small increases are noted under Seychelles, Portugal, and Switzerland.

Rattans.

Increase of kilos. 76,986 in weight and of Rs. 10,766 in value; China and Singapore provide the increase.

Saddlery and Harness.

The imports show for 1903 a decrease of Rs. 11,374, principally due to less supply from the United Kingdom.

Sago.

Decrease of kilos. 37,726 in weight and of Rs. 31,856 in value —due to less supply from Continental India, Singapore, and China.

Salt.

Increase of kilos. 700,972 in weight, but decrease in value of Rs. 49,937. The United Kingdom supplied kilos. 1,428,749, of the value of Rs. 70,382, in 1902, and only kilos. 316,862, valued Rs. 16,882, in 1903. From France kilos. 401,000, valued Rs. 20,218, were received in 1902, against nil in the past year. Aden supplied kilos. 2,216,000, of the value of Rs. 23,938, in 1903, against nil in the previous year. The difference in the value of the imports is accountable to salt of a cheaper price being obtained from Aden.

Seeds.

Aniseeds.—Increase both in weight of kilos. 28,562 and in value of Rs. 6,647.

Coriander.—Increase of kilos. 26,881 in weight and of Rs. 6,348 in value.

Mustard.—Increase of kilos. 23,658 in weight and of Rs. 5,188 in value.

Aniseeds, coriander, and mustard seeds are almost exclusively imported from Continental India.

Silk Manufactures.

Increase of 4,295 metres, with a surplus in value of Rs. 5,629, imported in 1903. France and Germany provided for a less supply of Rs. 5,813 and Rs. 1,593 respectively. Increases are from the United Kingdom (Rs. 3,978), Continental India (Rs. 2,326), Japan (Rs. 3,125), and Pondicherry. Belgium provided for Rs. 2,372 in 1903, against nil in the previous year.

Skin.

Sheep and Goats tanned.—Kilos. 2,436, with a surplus in value of Rs. 14,925, were received in 1903. Kilos 3,950, valued Rs. 15,569, were imported in 1903 from Pondicherry, against, in 1902, kilos. 736, valued Rs. 1,991; from Madagascar kilos. 1,371, of the value of Rs. 1,350, were received in 1902, against nil in the past year; and from Continental India kilos. 593, valued Rs. 2,697, were supplied in 1903, against nil in the preceding year.

Soap.

Ordinary.—Kilos. 36,652 more were received in 1903, and the value of the imports increased by Rs. 40,768. The United Kingdom provided for a surplus value of Rs. 41,253. The United States and Seychelles show small decreases.

Soda, Nitrate of.

Decrease both in weight (kilos. 503,384) and in value (Rs. 63,959). This article is exclusively imported from Chili,

Specie.

Gold.—The United Kingdom supplied in 1903 for a greater value of Rs. 77,060, as compared with the preceding year.

Paper Currency.—The United Kingdom forwarded in 1903 paper currency of the value of Rs. 201,240, against Rs. 5,826 in 1902. Rs. 24,960 were received from Seychelles in 1902, but nothing in 1903.

Silver.—In 1903 Continental India and France supplied for the value of Rs. 3,151,200 and Rs. 167 respectively, amounting to the aggregate value of Rs. 3,151,367, against Rs. 1,412,225, of which Rs. 1,409,705 from Continental India and Rs. 2,520 from France, in 1902. Surplus value of imports for 1903 is, therefore, Rs. 2,741,662.

Spirits.

Brandy.—The imports for 1903 measured 38,006 litres, valued Rs. 76,479, against 49,263 litres, valued Rs. 121,548, in 1902, showing a decrease of litres 11,257 in measure and of Rs. 45,069 in value. The United Kingdom supplied in 1903 889 litres, valued Rs. 1,028, against 2,700 litres, valued Rs. 4,224, in 1902, showing a decrease both in quantity of 1,811 litres and in value of Rs. 3,196. France supplied in 1903 37,025 litres, valued Rs. 75,332, against 46,563 litres, valued Rs. 117,324, in 1902, showing a decrease in quantity of 11,538 litres and in value of Rs. 41,992. Australia and Spain supplied a few litres in 1903, against nil in the previous year.

Whisky.—Decrease both in quantity (6,735 litres) and in value (Rs. 12,992), due chiefly to less imports from the United Kingdom.

Starch.

Increase of kilos. 57,760 in weight and of Rs. 9,086 in value, due to more imports from Singapore and China.

Stationery.

Increase in value of Rs. 24,476, as compared with 1902, due to more imports from France (Rs. 14,760), the United Kingdom (Rs. 4,010), Austria, Belgium, Continental India, and Switzerland.

Steel.

Unwrought.—Decrease in weight (kilos. 4,670), but with an increase in value of Rs. 4,560, as compared with 1902. The United Kingdom shows a decrease in weight of kilos. 5,339 and in value of Rs. 1,736. France supplied in 1903 kilos. 2,478 valued Rs. 6,555, against nil in the previous year.

Sulphur.

Common.—Increase of kilos. 529,454 in weight and of Rs. 169,293 in value, as compared with the preceding year. France and the United Kingdom provided for Rs. 28,591 and Rs. 5,699 in 1902, against, in 1903, Rs. 193,395 and Rs. 10,189 respectively. The large increase is due, therefore, to more importations from France.

Tallow.

Increase both in weight (kilos. 21,870) and in value (Rs. 11,876). The increase arises from Australia and the United Kingdom.

Tamarinds.

Kilos. 62,306 more were received in 1903, and the value of imports increased by Rs. 5,817. This article is exclusively imported from Continental India.

Tapioca.

In 1903, kilos. 840, valued Rs. 292, were received from the United Kingdom (kilos. 796), France and Réunion, against kilos. 11,963, valued Rs. 5,324, in 1902, from the United Kingdom (kilos. 600), France (kilos. 113), and Continental India (kilos. 11,253).

Tin

Plates.—Decrease of kilos. 17,656 in weight and of Rs. 9,948 in value as compared with 1902. The United Kingdom shows a shortage both in weight and in value, while a small increase is noted from Continental India.

Tobacco.

Manufactured.—The imports for 1903 show, as compared with those of 1902, a falling off of kilos. 54,427 in weight and of Rs. 74,077 in value. The United Kingdom, Continental India, Algeria, Hong-Kong, China, and the United States provided for a less supply of Rs. 9,096, Rs. 191, Rs. 663, Rs. 172, Rs. 241, and Rs. 89,999 respectively. From Réunion an increase of Rs. 36,350 is noticeable.

Cigars.—Only an increase of kilos. 3 in weight as compared with 1902, but a surplus in value of Rs. 3,783. From Continental India there is a falling off of kilos. 330 in weight and of Rs. 2,140 in value, while from the United States there is an increase of kilos. 629 in weight and of Rs. 5,096 in value.

Unmanufactured.—The imports for 1903 amounted to kilos. 39,362, valued Rs. 27,002, against, for 1902, kilos. 53,895, valued Rs. 32,095, showing a shortage both in weight of kilos. 14,533 and in value of Rs. 5,093. Kilos. 12,062 less were imported from Continental India, and the shortage in value amounts to Rs. 513. In 1902 Réunion supplied kilos. 2,686, valued Rs. 4,684, against nil in the following year.

Toys.

Increase in value of Rs. 7,843. United Kingdom, France, and Germany show increases of Rs. 4,136, Rs. 1,411, and Rs. 2,001 respectively.

Turmeric.

Increase in weight of kilos. 22,223 and in value of Rs. 13,042. Continental India supplied for a less value of Rs. 10,670.

Turpentine.

Decrease of 361 hectolitres in measure and of Rs. 27,609 in value. The decrease is from the United Kingdom.

Twine.

Decreased both in weight (kilos. 11,486) and in value (Rs. 6,194). The decrease is due principally to less imports from Continental India.

Umbrellas and Parasols.

Cotton.—The imports for 1903 amounted to 41,945 umbrellas, of the value of Rs. 45,814, against, for 1902, 27,083, of the value of Rs. 35,929, showing an increase both in number of 14,862 and in value of Rs. 9,885. The United Kingdom provided for a less value of Rs. 2,514, but from Continental India and France the increases are of Rs. 1,738 and Rs. 10,725 respectively.

Vanilla.

Seychelles supplied in 1902 kilos. 1,450, of the value of Rs. 12,354, against nil in 1903.

Varnish.

Fifty hectolitres more were received in 1903, with an increase in value of Rs. 9,413. The United Kingdom and France supplied for a greater value of Rs. 5,753 and Rs. 3,680 respectively.

Wax, Bees.

Decrease of kilos. 9,988 in weight and of Rs. 6,595 in value. The decreases are from France and Continental India. Madagascar provided for Rs. 3,215 in 1902, against nil last year.

Wine.

Claret in Casks.—376 hectolitres more were received in 1903, with a surplus of Rs. 14,482 in value. France supplied in 1903 426 hectolitres less, with a shortage in value of Rs. 12,217, while from Spain there is an increase of 828 hectolitres, with a surplus in value of Rs. 27,243.

Claret in demijohns.—283 hectolitres, of the value of Rs. 12,881, were received in 1902. From France 190 hectolitres and from Spain 93 hectolitres, against none in 1903.

Claret in Bottles.—Compared with 1902—3,944 litres less, with a shortage in value of Rs. 4,505, were received in 1903—from France there is a falling off of Rs. 4,833 and of 4,244 litres.

Pontac in Casks.—Decrease of 42 hectolitres in measure and of Rs. 6,644 in value—exclusively received from Cape Colony.

Port in Bottles.—Increase of 1,821 litres, with a surplus in value of Rs. 4,160. France and Portugal show decreases, but an increase is noted from Spain.

Sherry in Casks.—Shortage of 150 hectolitres, with a less value of Rs. 11,343. Portugal shows a falling off of Rs. 12,281 and from Spain there is a slight increase.

Vermouth in Casks.—Shortage of 11 hectolitres, with a less value of Rs. 7,184, chiefly from France.

Vermouth in Bottles.—Increase of 16,963 litres, with a surplus in value of Rs. 15,844, from France.

White, in Casks.—Decrease both in measure of 630 hectolitres and in value of Rs. 20,681. France and Spain provided for a less value of Rs. 19,896 and 1,184 respectively. A few hectolitres were received from Australia, Cape Colonies, and Algeria in 1903. The United Kingdom and Germany supplied a small quantity in 1902, against nil in 1903.

Wood.

Board and Planks.—Decrease of 1,621 cubic metres in quantity, but with an increase in value of Rs. 1,158. The United Kingdom provided for a more value of Rs. 91,673. Decreases are noted from Continental India (Rs. 30,644), Singapore (Rs. 68,713), Seychelles, United States, and Sweden (Rs. 46,651). Australia provided in 1903 for Rs. 59,704, against nil in the previous year.

Shingles.—Decrease of 698,675 in number, with a shortage in value of Rs. 36,261. Continental India shows a decrease of Rs. 37,766, and from Singapore there is a slight increase.

Shooks.—Shortage of 15,062 bundles with a decline in value of Rs. 71,246. From the United Kingdom there is a decrease of Rs. 80,067, and from Continental India an increase of Rs. 8,821.

Timber.—The imports for 1903 show the large decrease of 5,641 cubic metres, with a shortage of Rs. 394,973 in value. The decreases are from the United Kingdom, Cape Colonies, Singapore, Australia, Continental India, United States, to the amount of Rs. 86,464, Rs. 29,646, Rs. 8,564, Rs. 47,982, Rs. 217,629, and Rs. 6,233 respectively. From the Argentine Confederation a supply amounting to Rs. 1,146 was received in 1903, against nil in the previous year.

Woodenware.

Decrease in value of Rs. 4,882, chiefly from the United Kingdom, France, and Seychelles, and from Germany there is a slight increase.

Woollen Manufactures.

Mixed with Cotton and Silk.—Compared with 1902, the imports for last year measured 9,725 metres less, with a falling off of Rs. 3,749 in value. Decreases are from the United Kingdom (Rs. 11,015) and from France. Increases are noted from Germany (Rs. 6,936), Continental India, and Belgium.

Woollen Shawls.—The imports under this head show a shortage of 5,254 in number and a falling off of Rs. 6,623 in value.

Decreases are noted from the United Kingdom, Continental India, Switzerland, France, and Germany.

POSTAL PARCELS.

Decreases from Rs. 231,994 in 1902 to Rs. 224,885 in 1903. The shortage is, therefore, Rs. 7,109.

EXPORTS.

12. The principal articles exported from Mauritius are sugar, rum, molasses, cocoanut oil, aloe fibre, and vanilla—the produce of the Colony. The quantities and values exported in the last five years are shown hereunder:—

Articles.	1899.	1900.	1901.	1902.	1903.

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius, and although there are workshops there are none that could be properly called manufactories. Nevertheless, rum, vinegar, and soap are made in the Colony. There are tea and aloe fibre factories, and a large quantity of fibre is exported annually to Great Britain and France.

The fisheries are protected by special laws and by the creation of Crown reserves as well as by the establishment of private barachois, by the creation of a close season and by the prohibition of the capture of an illegal size of fish and the prohibition of illegal nets.

There are 11 private barachois or enclosures communicating with the sea, duly registered under Ordinance No. 42 of 1881. These private barachois are walled ponds or "fish paddocks" which, by permission, may be replenished from Government reserves.

Certain parts of the coast are set apart which are called "reserves," and in which no fishing can take place except by rod and line or by basket net. The protection of these reserves is left to the Inland Revenue Branch of the Receiver General's Department, consisting of one superintendent, five inspectors, and twenty-five guards. The police have also concurrent jurisdiction in detecting contraventions under the Fishery Laws.

The fisheries of the Colony, in so far as the food supply is concerned, have in no way improved during the year. Mauritius is still almost entirely dependent on the islands, dependencies of the Colony, and on British and foreign countries and Colonies for the supply of dried, salted, and pickled fish.

The exports of fish and fishing products are chiefly restricted to the "Bambara" or sea slugs, which are not consumed in the Colony, but sent to Hong Kong and Singapore. This industry is chiefly in the hands of Chinamen.

The imports in 1903 amounted to kilos. 913,950 of a value of Rs. 207,012 (exclusive of charges and exchange), and the exports to kilos. 18,526 of the value of Rs. 5,030.

BOTANIC GARDENS.

The Botanical Gardens are divided into three sections, viz., the Pamplemousses, the Curepipe, and Le Réduit Gardens.

The most important are the Royal Botanical Gardens, Pamplemousses, which are used not only as public gardens but also as a nursery and acclimatization garden. Large numbers of forest and fruit trees as well as economic and ornamental plants are propagated there and sent all over the Island. The most important ones are the following:—

Casuarina equisetifolia, eucalyptus, camphor, mahogany, ficus, vitex, &c.

Letchis, artocarpus, spondias dulcis, avocado pear, mangoes, citrus, &c.

Coffee, nutmegs, cocoa, kola, coca, allspice, rhea, ceara rubber, pandanus, &c.

Palms, roses, crotons, aralia, canna, ipomea, cissus, &c.

Réduit Gardens.

These form part of the Réduit domain, the residence of the Governor of the Colony. Part of the ground is under forest plantation and the trees provide a large quantity of seeds, which are used for reafforestation purposes.

Curepipe Gardens.

These gardens are a very important forest nursery for plants that cannot be successfully grown at Pamplemousses owing to the climate.

These three gardens are at different altitudes and have distinct climates. They are well suited, therefore, to the purposes of experimental acclimatization.

Large numbers of seedling exotic plants are raised yearly at the Curepipe Gardens, such as juniperus, pinus sinensis, eucalyptus, eugenias, &c., which are either sold to the public or used for planting up the Government lands all over the Colony.

LAND GRANTS.

Lands are granted by the Government by lease and by sale. Lands which are situated on the sea coast beyond the limits of Port Louis, known as Pas Géométriques, can only be leased by public auction, except those forming part of villages which have been proclaimed such. The sales are invariably made by public auction. There is, however, an exception to this rule in cases where lands are desired for charitable, religious, or educational purposes.

No sales of Crown land took place during 1903. Two free grants were made to the War Department for military purposes, and a grant, at a nominal price, of a small portion of land at Rodrigues to the widow of a public servant.

The following is a return showing the Crown lands and barachois in Mauritius and its dependencies, except Seychelles and Rodrigues, in charge of the Public Works Department under lease for one year or more during 1903 or paying rent without lease, with rents due or amount received; also arrears of rent for 1903 and previous years still outstanding on the 31st December, 1903.

Total No. and Tonnage of Steam Vessels ...	—	—	3	1,241	3	4,109	—	—	1	195

The first table is a return of all vessels entered and cleared, excluding the Coasting Trade vessels, *i.e.*, vessels trading with the Dependencies, which are exclusively dealt with in the second table.

The number of vessels entered and cleared during 1903 shows a reduction of 27 in number but an increase in tonnage of 21,460, as compared with the figures for 1902.

Compared with 1902 the following differences are exhibited: Sailing vessels—shortage of 33 in number and of 23,649 in tonnage; steam vessels—increase of 6 in number and of 45,109 in tonnage; British vessels—shortage of 18 in number and of 6,613 in tonnage; Foreign vessels—shortage of 9 in number but an excess of 28,073 in tonnage.

Of the 442 vessels which entered and cleared during 1903, 5 steamers, with an aggregate tonnage of 10,784, called at this port exclusively for the purpose of coaling, showing a difference of 16 less in number and of 31,793 less in tonnage as compared with 1902.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the Dependencies during 1903 is 63, the same number as for 1902 but with an excess of 451 in tonnage.

Only one steam vessel of 195 tons cleared for the Dependencies in 1903, whilst there were none in 1902.

British vessels show an increase of 6 in number and of 1,081 in tonnage as compared with 1902.

No foreign vessels entered from, or cleared for, the Dependencies in 1903, against 6 of an aggregate tonnage of 810 for 1902.

VESSELS WITH CARGOES.

The tonnage of vessels entered at this port with cargoes during the year 1903 amounted to 343,983 and the tonnage cleared to 273,094, as against 317,488 entered and 255,128 cleared for 1902.

The aggregate tonnage of the Coasting Trade—Dependencies —amounts to 5,839 tons entered and 5,963 tons cleared, against 5,632 tons entered and 5,899 tons cleared in 1902, showing slight increases.

The nationality and description of the vessels are shown in the following statements:—

SUEZ CANAL.

The number and tonnage of steam vessels which entered and cleared from and to all countries, *viâ* Suez Canal, and the value of goods (including Bullion and Specie) imported and exported by that canal into and from Mauritius are shown in the following table:—

Years.	Vessels Entered.		Vessels Cleared.		Value of Goods (including Bullion and Specie).	
	No.	Tonnage.	No.	Tonnage.	Imports.	Exports.
					Rs.	Rs.
1899	36	68,863	26	48,860	1,786,440	666,351
1900	37	72,122	28	51,780	2,835,100	449,911
1901	38	74,012	24	49,040	3,868,350	892,320
1902	26	50,849	27	52,242	3,887,611	2,189,981
1903	32	65,515	27	53,431	6,542,071	2,483,481

The value of goods imported through the Suez Canal in 1903 amounts to Rs. 6,542,065, showing Rs. 2,655,064 in excess of the value for 1902. This large difference is due to the importation of tramway materials.

Goods exported from Mauritius through the said canal amount to Rs. 2,483,480 against Rs. 2,189,980 for 1902, an increase of Rs. 293,500.

TRANSPORTS AND MEN OF WAR.

The number of Transports and Men of War which visited the Island in 1903 amounts to 13 vessels of an aggregate tonnage of 47,193, all being His Majesty's vessels.

No Foreign Man of War called at this port during 1903 against one in 1902.

III.—LEGISLATION.

There were 54 Ordinances passed during the 1903 Session of the Council of Government. Many of them were of an unimportant nature introducing small amendments in existing legislation. The Ordinance which occupied the greatest attention was the Municipality Consolidation Ordinance No. 23 of 1903. The principal provisions of this Bill are the division of the town into Wards, the substitution of the election of the Councillors by the scrutin d'arrondisement instead of the scrutin de liste, the lowering of the franchise and the exclusion of the salaried class, and the audit by the Government of the accounts of the Municipality.

The other Ordinances which require to be noticed are:—

Nos. 3, 6, and 15 of 1903, providing for the construction of the Bois Chéri, Nouvelle France Light Railway, the Black River Railway, and the Port Louis Tramway.

No. 2 of 1903—To regulate the giving of Boiler Certificates.

No. 8 of 1903—To amend the law relating to the exportation of arms, ammunition, and military stores.

No. 16 of 1903—To declare Victoria Day a Bank and Office Holiday.

No. 17 of 1903—To amend the Law of Quarantine.

No. 26 of 1903—To amend Ordinance No. 12 of 1878 relative to Immigration and the Labour Law.

No. 33 of 1903—To regulate the erection and use of stations and machinery for the purpose of wireless telegraphy.

No. 49 of 1903—To authorise the raising of a loan of £40,500 to meet the costs of Drainage and Water Works.

This last Ordinance was introduced by the authority of the Secretary of State for the Colonies to raise a loan of £40,500 of which £17,000 is to provide plant and to execute other works for the purification of the Mare-aux-Vacoas Water Supply and £23,500 for the execution of further drainage works in the town of Port Louis.

IV.—EDUCATION.

PRIMARY EDUCATION.

There were 155 Primary Schools in Mauritius in 1903. The annual average number of pupils on roll was 16,759, and the average number in attendance 11,588.

In the Primary Government and Grant-in-Aid Schools, pupils are taught in six standards in the subjects, English, French, and arithmetic; many of the schools take besides one extended programme in some or all of the subjects English, French, arithmetic, geography, elementary science (for boys), needlework (for girls).

Examinations are conducted annually by the Inspectors of Schools, who besides pay frequent visits to the schools during the year.

All the schools are open, without payment of any fee, to pupils of all classes and creeds between the ages of 5 and 16, or in some cases 18.

Religious instruction is imparted to the pupils in both Government and Grant-in-Aid Schools, at hours specially set apart in the curriculum of each school for the purpose by the clergy of their various denominations.

The number of Government Schools was 68.

The number of Grant-in-Aid Schools was 87. Of these, 66 were Roman Catholic, 18 were Church of England, 2 were Presbyterian, 1 was Mahomedan.

SECONDARY EDUCATION.

Royal College and Schools in connexion.

Secondary Education is given at the Royal College with its two preparatory schools, the schools associated to the Royal College and the girls' schools working under the scheme for the Higher Education of Girls.

The numbers of pupils at the Royal College and its two schools in December were:—

College Proper	190
Curepipe School	105
Port Louis School	77
Total	372

There were 233 paying, and 139 free, pupils.

The free pupils belong to the following classes: —

(1) Indigent pupils whose fees have been paid for two years (Art. 13 of the Regulations)	11
(2) Holders of Eleemosynary Scholarships ...	26
(3) Scholars and Exhibitioners from Primary Schools	45
(4) Scholars and Exhibitioners from Primary Schools whose free tuition has been extended	26
(5) Holders of Scholarships and Exhibitions won at the College and Associated Schools ...	31
Total	139

In the Royal College pupils are prepared for the London Matriculation and the Cambridge Senior Local Examinations, the passing of which examinations qualifies them for entering the highest classes of the College on the Classical and Modern Sides respectively.

For the London Matriculation Examination 9 pupils were presented, of whom 2 passed in the First Division and 4 in the Second Division. For the Senior Cambridge 79 pupils presented themselves, of whom 12 were outsiders; 39 passed, including 2 outsiders.

In each of the highest classes a scholarship is annually given of the value of about £1,000 to enable students to follow some special course of study in general at some institution in the United Kingdom.

Numerous small scholarships, exhibitions, and other rewards are given in the other classes.

The preparatory schools of the College and the associated schools, of which there are 25 in number, prepare students for the classes of the College proper.

Religious Instruction is imparted in the College and its two preparatory schools, and annual examinations held in it.

GIRLS' SCHOOLS.

The Girls' Schools in the scheme for the Higher Education of Girls provide a course of study suitable for girls of age from about 11 to 17. The subjects mainly taught are English, French, history, geography, mathematics, latin, music, needlework, religious instruction.

Annual examinations are held in all these schools, on the results of which prizes and certificates are awarded and grants are paid to the Managers of the Associated and Girls' Schools.

The number of schools working in connexion with the Schools Department and earning grants from Government on the results of examination was 32, the examinations being, however, open to all the girls in the Colony, except those attending the Government and Aided Primary Schools.

The number of girls competing was 260 of whom 148 obtained Honours and Pass Certificates.

INDUSTRIAL, TECHNICAL, AND AGRICULTURAL SCHOOLS.

Under this head several new schemes were put into operation in 1903.

Provision has been made for the establishment of Government and Grant-in-Aid Training Schools for Teachers, and a Government School for men was opened in January and one for women in October.

Three of the men obtained certificates at the August examinations. The women have not yet competed.

A scheme for the training of mechanical engineers in the theory and practice of their work in connection with the Government railway works was put into operation in January, 1903. The scheme seems to be working well. Many of the students appear to be interested and steady and show promise.

A similar scheme for horticultural apprentices, started at the same time, has not so far given equal satisfaction.

Arrangements were made to establish Civil Engineering Scholarships in connexion with the Surveyor General's Department. At the examination held in 1903, the first in connexion with the scheme, no scholar was elected as no one succeeded in satisfying the examiners.

A scheme for the teaching of Agricultural Science at the Station Agronomique has been prepared and submitted to the Committee of that Institution. The scheme is now before that Committee.

Regulations were made for teaching handicrafts in the Primary Government and Grant-in-Aid Schools, and at a few of the schools carpentry classes were started in 1903. There has hardly been time so far to judge of the success of this scheme

V.—GOVERNMENT INSTITUTIONS.

HOSPITALS.

The number of hospitals and asylums has remained unchanged during 1903.

The following statement gives the number of patients admitted, treated, who died, and who were discharged in each of them:—

Hospitals.	Remaining on January 1st, 1903.	Admitted.	Treated.	Died.	Discharged.
Civil Hospital ...	175	6,062	6,237	520	6,095
Port Louis Prisons	16	1,121	1,137	11	1,130
Long Mountain ...	10	761	771	38	752
Poudre d'Or ...	20	1,194	1,214	48	1,187
Flacq	49	1,966	2,015	105	1,983
Mahebourg... ...	23	1,523	2,323	133	2 295
Savanne	33	2,300	1,556	92	1,516

Lunatic Asylum ...	31	481	512	30	487
Beau Bassin Prisons	8	1,009	1,017	23	1,004
Reformatory ...	—	104	104	—	101
Moka	18	711	729	31	722
Total ...	489	20,867	21,356	1,277	20,912

The sanitary state of the Island cannot be said to have been as satisfactory as in 1902. Malaria, influenza, dysentery, and worst of all, plague, have been on the increase; but few cases of measles were detected and typhoid fever showed a marked decrease.

The death rate has risen from 34·0 in 1902 to 39·9 per mille in 1903, giving an increase of 5·9.

The number of admissions in the different hospitals and asylums of the Colony amounted to 20,867, showing an increase of 2,993 over the figure for 1902. The case mortality was 5·98 per cent. against 5·57 per cent. for the previous year.

38,420 different pauper patients applied at the dispensaries for medical care and comfort.

Malarial fever accounts for the greater number of admissions into the various hospitals; 4,833 patients were treated for that complaint in 1903 against 3,387 in 1902, showing an increase of 1,446. The disease at the same time assumed a more virulent character, as the case mortality, 1·94 per cent., will show when compared with that of 1902, which stood at 1·03 per cent., and that of 1901, which was 1·64 per cent. The non-occurrence of cyclones, an equally distributed rain-fall and a high and constant degree of humidity have favoured the multiplication of mosquitoes, and offered suitable conditions to which may be ascribed the high increase in the number of cases of malarial fever which have come under treatment.

834 cases of dysentery were admitted during the year under review. The increase over the figure of the previous year, viz., 161, once more proves that the incidence of dysentery is concomittant with that of malaria. It is, however, satisfactory to notice that the case mortality has been almost stationary, as this year it was 12·7 per cent. compared with 12·17 per cent., the rate for 1902.

The admission for influenza numbered 1,055 against 772 for 1902. The case mortality was 2·9 per cent. The increase above the preceding year is probably due to the greater number of rainy days, to a lower average temperature and to the increased humidity.

Enteric fever has been less prevalent in 1903 than in the previous year. The number of cases admitted into the hospitals was only 15, against 36 in 1902, the case mortality, 25 per cent., remaining almost the same.

Tuberculosis is answerable for 1,110 admissions, giving an increase of 23 over the number of the previous year. The spread of this disease is favoured in this Colony by the ignorance and fatalistic notions of a not inconsiderable part of the population, and above all by the increasing poverty of a large proportion of the inhabitants, who are not in a position to procure a substantial dietary, and are besides compelled to live in insanitary dwellings, where the evils arising from overcrowding are added to existing ones.

The epidemic visitation of plague has been more severe in 1903 than in any year since the first outbreak in 1899, as may be seen from the following table:—

Year.	Cases.	Deaths.	Death-rate.
			Per cent.
1899...	1,416	1,117	78·9
1900...	796	593	74·5
1901...	1,093	805	73·6
1902...	506	386	76·3
1903...	1,395	1,035	74·2

The epidemic began in July and was at its height in October when every district in the Island was attacked. The chief agent in the propagation of the scourge is the rat, and the number of these rodents found in town was considerable in 1903.

Surra, which was epizootic in 1902, continued to prevail through 1903; it again considerably hampered the regular performance of the night soil service, but happily a general collapse was avoided, the contractors having recourse to the railway and to traction engines as means of conveyance. The experiments which have been carried out in connection with this disease have demonstrated that it may remain latent for a long time, and that the period of infectivity among bullocks is a protracted one. These experiments have also confirmed the fact that bovines affected with Surra do, in a large proportion of cases and under favourable conditions, apparently recover from the disease and are able to render good services as draught animals.

POOR LAW RELIEF AND ASYLUMS.

There are no poor houses, in the English sense, in Mauritius, but relief, both indoor and outdoor, is extensively given to the poor. The indoor relief is given at the public hospitals of the Colony, at the Barkly Asylum, for the aged and infirm poor, and at various convents, infirmaries, and dispensaries. The outdoor relief consists of grants of food, money, clothes, and medicines.

The expenditure of the Poor Law Department for the year 1903 amounted to Rs. 195,303. The number of pauper patients treated at the several hospitals was 16,635, and the number of paupers who received outdoor relief was 2,417.

64 pauper orphans were maintained in convents at the expense of the Poor Law Commission, and 828 infirm paupers in infirmaries.

The number of sick paupers who applied at the public dispensaries and who received either medicines or medical treatment was 38,420.

The following table shows the total number of persons who received indoor and outdoor relief in 1903:—

(*a*) Recipients of indoor relief—	
Sick in Country District Hospitals ...	11,921
Sick in Civil Hospital	4,481
Sick in Convent Hospital, Canal Street	233
Inmates of Barkly Asylum	892
Lepers at St. Lazare	146
Inmates of Lunatic Asylum	466
Orphans in Convents	64
Inmates of Branch Infirmaries... ...	828
(*b*) Recipients of outdoor relief—	
Alimentary and pecuniary	2,417
Medical (sick at dispensaries) ...	38,420
	59,868

There is also a Leper Asylum (St. Lazare) in Port Louis into which 146 pauper lepers were admitted last year, and a Lunatic Asylum at Beau Bassin where there were 237 males and 152 females, making a total of 390 inmates under treatment in 1903.

REFORMATORY.

There were 231 boys committed to the Reformatory in 1903, which shows a slight decrease on 1902, when 248 were admitted. The results in the Industrial School have been good during the year. This is due to an increased amount of Government work sent to the Reformatory in consequence of the trades at the prisons having been thrown open to the public. The trades taught are carpentering, tinsmith, basket making, shoemaking, and gardening. The earnings amounted to Rs. 5,472 against Rs. 4,145 in 1902, showing an increase of Rs. 1,326. The total cost of maintaining and guarding the boys in 1903 was Rs. 14,141 as compared with Rs. 15,643 in the previous year, and the average cost per boy was Rs. 228 against Rs. 234 in 1902.

SAVINGS BANK.

The savings deposited at the Government Savings Bank, at 3 per cent. interest, amounted to Rs. 2,723,594 on the 30th June, 1903, as compared with Rs. 2,797,380 on the same date in 1902, showing a decrease of Rs. 73,786.

The following return shows the number of depositors and the amount standing to the credit of the general and the Indian population at the end of the years 1901-2 and 1902-3:—

—	1901–2.		1902–3.	
	No. of Depositors.	Amount.	No. of Depositors.	Amount.
General Population	15,119	1,612,876	15,284	1,584,996
Indian Population	10,613	1,184,380	10,384	1,138,598
Total	25,732	2,797,256	25,668	2.723,594

The financial position of the bank on the 30th June, 1903, was as follows:—

	Rs.
Investments	3,127,295.37
Cash in hand	7,701.51
Receiver General	79,498.58
	3,214,495.46
Liabilities due to Depositors	2,905,357.41
Balance in favour of Bank	309,138.05

VI.—JUDICIAL STATISTICS.

POLICE, PRISONS AND CRIMINAL.

The total effective strength of the police force on the 31st December, 1903, was 714; the actual strength, however, was 710.

The force comprised ten nationalities, but 530 were natives of Mauritius. 118 constables were enlisted during the year and 17 were dismissed. Sixty-three sub-officers and constables resigned or were discharged on pension or gratuity.

Detection and Repression of Crime.

The total number of offences of every description known, or reported, to the police throughout the Colony in 1903 was 22,870, in connection with which 12,779 persons were apprehended by the police or summoned before the magistrates.

The following return shows the nature of the offences:—

Nature of Offences.	No. of cases.	No. of persons charged.
Serious offences reported to, or detected by, the Police, in which persons were charged.	2,336	3,003
Serious offences reported to or detected by the Police, which formed the subject of enquiries, and in which no persons were charged	9,477	370°
Minor offences reported to or detected by the Police, in which persons were charged.	4,475	6,640
Minor offences reported to, or detected by, the Police, which formed the subject of enquiries, and in which no persons were charged.	3,816	—
Other offences against the Labour Law . .	1,228	1,228
Vagrancy	1,538	1,538
Total	22,870	12,779

° Arrested on suspicion only.

CASES of CRIMES in which PERSONS were CHARGED.

Offences.	Number of Cases.	Number of Persons Charged.	Number of Persons Convicted or Committed to Assizes.	Amount of Property Stolen.	Amount of Property Recovered.	
					By all Agencies.	By Police Only.
				Rs. c	Rs. c.	Rs. c.

Larceny at night by breaking, or with violence to the person	91	148	97	4,594.55	686.22	578.55
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	31	37	27	—	685.07	620.02
Prædial and other larcenies, including cheating, embezzlement and swindling.	1,192	1,384	1,133	15,068.63	5,919.18	3,945.56
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	297	351	248	—	3,531.61	3,291.79
Arson and other malicious injuries to property	30	46	38	—	—	—
All other offences not included above	646	945	625	—	—	—
Total	2,336	3,003	2,235	19,663.18	10,822.08	8,435.92

It will be observed that of serious offences reported to, or detected by, the police there were 2,336 cases, for which 3,003 persons were charged and 2,235, or 74·43 per cent., either convicted or committed to Assizes.

The amount of property declared to have been stolen was Rs. 19,663.18, of which Rs. 10,822.08, or 55·04 per cent., was recovered by "All Agencies," including police, and Rs. 8,435.92, or 42·90 per cent., by "Police only."

The following return records all serious offences reported to, or detected by, the police, which formed the subject of enquiries, and in which no persons were charged:—

Offences.	No of cases.	No. of persons arrested on suspicion.	Amount of Property alleged to have been stolen.	Amount of Property recovered.	
				By all Agencies.	By Police only.
			Rs.	Rs.	Rs.
Murder, including parricide, wife murder, and poisoning causing death	—	—	—	—	—
Attempt at foregoing murder, and poisoning not causing death	4	2	—	—	—
Other offences against the person	5,790	30	—	—	—
Larceny at night by breaking, or with violence to the person	337	46	27,860.93	3,953.31	3,920.31
Prædial and other larcenies, including cheating, embezzlement and swindling ...	3,024	265	89,278.36	21,260.15	4,080.72
Removing, receiving, or possessing stolen property	28	12	—	119.33	70.11
Arson and other malicious injuries to property	41	12	—	—	—
Other offences against property...	238	3	—	—	—
All other offences not included above	15	—	—	—	—
Total	9,477	370	117,139.29	25,332.79	8,071.14

The total number of fires which formed the subject of police investigation in 1903 was 348, and the total estimated value of property destroyed was Rs. 99,026.

Prisons.

There are two prisons in Mauritius, the Central Prison at Beau Bassin and the Port Louis Prison, which is used for untried prisoners as well as for certain prisoners whom it is considered desirable to retain in town, either for sanitary or other reasons.

The total number of prisoners admitted to prison after conviction during the year was 5,643 males and 212 females. These numbers show an increase of 1,086 males and a decrease of 55 females as compared with the returns of 1902.

The number committed under the different headings compares with the previous year as follows:—

Year.	Debt.	Non-payment of fine and costs.	Safe custody till trial or for want of security.	Purposes of penal imprisonment.
1903 ...	4	1,503	2,409	4,348
1902 ...	6	1,616	1,826	4,182

The average daily number of prisoners under detention as compared with 1902 shows an increase of 110.

The total cost of housing, guarding, and maintaining the prisoners was Rs. 124,669 in 1903 against Rs. 120,958 in 1902.

The total cost per head was Rs. 137 as compared with Rs. 152 in 1902.

The gross earnings amounted to Rs. 122,726 in 1903 against Rs. 118,320 the year previous, and the total earnings per head were Rs. 137 against Rs. 152 in 1902.

The prisoners are employed as carpenters, tailors, shoemakers, basket and rattan makers, mat and mattress makers, also at stone breaking.

Criminal Statistics.

The following table gives the judicial statistics for 1903:—

Informations in the Supreme, District, and Stipendiary Courts of Mauritius.

How case tried ended.	Total.	Murder, other than wife and child murder.	Manslaughter.	Attempt at murder.	The numbers include attempt to commit the several offences.												
					Murder of wife, reputed wife or concubine.	Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injuries to property.	Robbery with violence.	Prædial larceny.	Other offences against property.	Vaccination.	Miscellaneous offences.

VII.—VITAL STATISTICS.

POPULATION.

The population on the 1st January, 1903, was ...		376,260
The number of births registered in 1903 was	12,306	
The number of births unregistered owing to death intervening before registration was made, was	1,305	
Total births	13,611	
The number of deaths registered was ...	15,034	
Showing a decrease of		1,423
		374,837
Arrivals in the Island	5,587	
Departures from the Island	5,780	
Difference in favour of departures		193
Total Civil Population		374,644
Military stationed in the Island		2,720
Total population of the Island		377,364
Estimated population of Dependencies and out-lying Islands		5,119
Estimated total population of the Colony ...		382,483

The crews of non-colonial shipping in the harbour have not been included in the above estimate.

The Indian population included in the above numbered 262,770, composed of 144,538 males and 118,232 females, showing an increase of 1,438 males and 2,246 females on the census of 1901.

The general population (excluding Indians) numbered 111,874, of which 56,946 are males and 54,928 females, thus showing a decrease of 494 males and 557 females.

It will be noticed that, while the Indian population of the Island is rapidly increasing, the general population shows a falling off year after year.

The following is an abstract of marriages, births, and deaths in 1903:—

Districts.	Birth Rate per 1,000.	Death Rate per 1,000.	Total Population.			General Population.			Indian Population.		
	On Population on 1st January, 1903.	On Population on 1st January, 1903.	Marriages	Births.	Deaths.	Marriages.	Births.	Deaths.	Marriages.	Births.	Deaths.
Port Louis	29.6	60.4	359	1,557	3,178	265	842	1,673	94	715	1,505
Pamplemousses ...	31.4	42.5	66	1,217	1,645	26	223	308	40	994	1,337
Rivière du Rempart	40.3	33.8	83	1,129	945	21	164	141	62	965	804
Flacq	39.0	38.1	93	2,206	2,154	40	499	417	53	1,707	1,737

Total	36.1	39.9	1,092	13,611	15,034	563	3,844	4,330	529	9,767	10,704

The following statement shows the different classes of occupations of the population*:—

Employments.	General Population.		Indo-Mauritians.		Other Indians.		Grand Total		
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Total.
Class I.— Professional	3,225	624	712	29	373	19	4,310	672	4,982
Class II.— Domestic	2,874	3,087	5,183	1,047	1,656	192	9,713	4,326	14,039
Class III.— Commercial	5,681	110	3,744	473	3,350	369	12,775	952	13,727
Class IV.— Agricultural	3,605	157	41,069	3,779	27,675	1,606	72,349	5,542	77,891
Class V.— Industrial...	18,211	3,269	1,824	227	756	33	20,791	3,529	24,320
Class VI.— Indefinite and Non-productive...	22,856	48,238	50,438	90,353	6,320	17,859	79,614	156,450	236,064
Total	56,452	55,485	102,970	95,908	40,130	20,078	199,552	171,471	371,023

* From the Census of 1st April, 1901.

Births.

There were 13,611 births registered during the year. The birth rate in the general population was 34·2 per 1,000 and in the Indian population 37·0.

Deaths.

15,034 deaths occurred during the year. The death rate was, in the general population, 38·5 per 1,000, and in the Indian population, 40·5. The deaths consequently exceeded the births by 1,423.

Marriages.

There were 1,092 marriages celebrated during the year. Of these mariages 563 belonged to the general population and 529 to the Indian population.

The sanitary condition of the Colony has been unsatisfactory. Malaria, influenza, dysentery, and plague have been on the increase and the mortality increased from 34·0 per 1,000 in 1902 to 39·5 in 1903.

The following return shows the mortality for the last five years:—

Year.	Mortality.	Rate per 1,000.
1899	13,222	34·8
1900	13,691	34·8
1901	14,971	40·3
1902	12,716	34·0
1903	15,034	39·5

The water supply has remained exactly the same during the past year. The management and supervision of the water works and supplies, except Port Louis and Plaines Wilhems District, have been entrusted, by Ordinance 35, of 1902, to District Boards and the Surveyor General's Department. Time enough has not elapsed for the results of this altered state of matters to show themselves, but it is expected that the change will prove beneficial to the inhabitants of the Colony.

CLIMATE.

General.

Mauritius lies between the meridians of 57°18′ and 57°49′ E. longitude, and the parallels of 19°58′ and 20°32′ S. latitude. To the north extends the equatorial belt of calms and variable winds with its hot, damp, and rarified atmosphere; and to the south the sub-tropical belt of high pressure from which a current of air blows nearly continuously, in a curved path, towards the equator, being deflected to the west by the rotation of the earth.

The migrations of these belts north and south with the sun produce the seasonal varitations of weather at Mauritius. With the system in its most southerly position the Island is under the influence of the belt of low pressure, and in its most northerly position the influence of the high pressure belt is felt; so that in the summer months—December to April—the atmospheric pressure is below the average, and the weather is hot and sultry with occasional very heavy rain, produced principally by the cyclones which form to the north east of Mauritius and travel usually on a south-westerly course, passing sometimes to eastward and sometimes to westward, but seldom immediately over the Island.

The mean atmospheric presure varies from 29·919 ins. in February to 30·202 ins. in August, and the mean temperature of the air from 79° in January to 68° in July. (At Curepipe, a town situated on the Central Plateau 1,800 feet above sea level, the temperature varies from 74° in January to 62° in July.) The mean wind direction varies from east in December and January to S.E. by E. in June; its velocity varies from 10 miles per hour in March to 12·4 miles per hour in August. The rainfall is very variable in different parts of the Island; the wettest station is Cluny, in Grand Port, with a mean annual rainfall of 145 ins.; the driest is Albion, on the west coast, with a mean rainfall of 31 ins. The mean monthly rainfall for the whole Island decreases from 12 ins. in March to 2·6 ins. in September and October.

In addition to the annual variation there is a marked diurnal variation in all elements amounting to 0·070 ins. in atmospheric pressure, from 12° in winter to 17° in summer in air temperature, from 25 to 50 per cent. in relative humidity, seven miles an hour in wind velocity, 20° in wind direction and 0·07 in. in rainfall

Special Features in 1903.

The atmospheric pressure showed a persistent increase, relatively to the normal; the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October December.
Ins. 0.042	Ins. 0.018	Ins. 0.011	Ins. 0.008

The return to normal in 1903 October completed the largest negative wave on record; the next largest occurred from 1875 August to 1876 February.

The air temperature showed a general decrease during the year, relatively to the normal; the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
+ 0.6°	+ 0.5°	0.0°	– 1.9°

The relatively cold months, September to December, depressed the mean annual temperature 0·2° below the average.

In relative humidity the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 3.5	Per cent. – 1.1	Per cent. – 3.7	Per cent. – 0.7

The wind velocity increased generally; relatively to the normal, from February to October, with, however, a marked interruption in March from cyclonic disturbances. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
M.p.h. – 2.0	M.p.h. – 0.7	M.p.h. 0.0	M.p.h. + 0.4

The corresponding departures from average on the wind direction, counting from south, were +3·7°, +2·7°, +0·7°, and –4·3°.

The rainfall was above the average in January, April, June, September, and October; in the remaining 7 months it was below. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. — 2.20	Ins. — 0.30	Ins. — 1.22	Ins. — 2.62

Means and Extremes of Meteorological Elements.

The means and extremes of the various meteorological elements for the year 1903 are given below:—

—	Mean.	Highest.	Lowest.
Atmospheric Pressure ...	Ins. 30.055	Ins. 30.358	Ins. 29.573
Air Temperature	73.3°	89.0°	55.1°
Relative Humidity ...	Per cent. 75	Per cent. 97.6	Per cent. 38.0
Wind Velocity	M.p.h. 10.4	M.p.h. 31.9	—
Wind Direction	S 74° E	—	—
Total Rainfall	—	Ins. 41.70	—

Results of Magnetic Observations.

The magnetographs were at work throughout the year and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1903:—

Declination (west)	9°15′95
Declination (south)	53°59′39
Horizontal Force (C.G.S. units) ...	0·23680
Vertical Force (C.G.S units)	0·32585
Total Force (C.G.S. units)	0·40281

The largest magnetic disturbances occurred on February 8, August 22, 26; October 11-14; October 29-November 1, December 13-14. The disturbance of October 29-November 1 was the largest on record since 1882.

MISCELLANEOUS WORK.

Actinometric observations were taken on those days on which the sky was free from cloud in the neighbourhood of the sun at or near apparent noon.

92 earthquakes were recorded by the Milne Seismograph during the year. The ordinates of the seismograms were measured at every hour of Greenwich civil time, for the study of diurnal changes of level.

The sun was observed on 306 days, on 86 of which no spots were seen; 498 photographs were taken.

Rainfall returns were collected from 50 stations in different parts of the Island. The mean rainfall for the whole Island during the year was 68·64 ins., as compared with an average of 77·08 ins.

Observations made on board vessels trading with Mauritius were tabulated and detailed accounts of gales and hurricanes recorded. From observations thus obtained daily synoptic charts were prepared for the hurricane months, from which it appeared that during the year, 1903, seven cyclones occurred in the South Indian Ocean, 3 in January, 3 in February, and 1 in March.

Daily normals of the principal meteorological elements were completed during the year, and copies of the results distributed to other Observatories.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL.

The gross receipts of the post and telegraphic offices in 1903 were Rs. 125,810.72; the gross expenditure was Rs. 155,718.86, showing a deficit of Rs. 29,908.14.

The contract with the British India Steam Navigation Company was renewed in 1903 for another year, for a four-weekly service between Mauritius and Colombo. There was also a four-weekly service by these steamers to and from South Africa. Besides the British India Steamers, our mails to and from the East were conveyed by other British and French steamers.

The Messageries Maritimes Company Mail Packets continued their bi-monthly voyages from Marseilles to Mauritius and *vice versâ*, calling at Aden, Zanzibar, Seychelles, Madagascar, and Réunion. The mails for, and from, South African ports were conveyed by the Union Castle Steamers, Clan Line Steamers, and British India Steamers.

The recommendations of the Postal Commission are in full working operation and, as was anticipated, the many reforms recommended have proved of advantage to the Colony.

The following statement shows the letters, post cards, newspapers, and parcels which passed through the Post Office during 1903.

—	Internal.	Mail packets.				Private ships.				Total.
		United Kingdom.		Other Places.		United Kingdom.		Other Places.		
		From.	To.	From.	To.	From.	To.	From	To

Postal Parcels	25	4,137	692	7,616	1,219	—	—	—	—	13,689

TELEGRAPH.

The wires, although some of them are very old (the Midland and North Line wires were put up by Mr. Eaton, the Electrical Engineer, in 1867), continued to work pretty satisfactory. Some delays in the transmission of messages were experienced, but, in many cases, the delays were unavoidable owing to the heavy traffic and the want of additional wires.

The telegraph system, in Mauritius, is along the railway lines and work both for the Railway and Postal Departments. One wire is given to the railway and one is affected to the public service—except on the Savanne Line, where there is one wire only for the whole work. An additional wire will be put up as soon as the finances of the Colony will permit of the expenditure.

The number and length of telegraph wires in 1903 were increased by 13½ miles, viz.:—

New Wires.	Length.
	Miles.
Terre Rouge to Montagne Longue	3¼
Poudre d'Or Railway Station to Poudre d'Or Village	2
Argy to Central Flacq	1¼
Mahebourg to Old Grand Port Telephone Line	7
Total	13½

The following are the telegraph and telephone wires in Mauritius:—

Wires.	Length.
	Miles
North Line (2 wires); 14 stations are connected on these wires and terminate at Grand River, S.E.—31 miles, making the length of both wires	62
A third wire from the Signal Mountain, Port Louis, passing through Central Railway Telegraph Office, Central Post Office Telegraph Office, direct to the Royal Alfred Observatory, Pamplemousses (1¼ miles from Railway Station at Pamplemousses)	12
At Mapou, on the North Line, 10 miles from Port Louis, two wires leave the Railway Station, one runs to Canonniers Point, passing through Grand Bay	7
And the other to Butte aux Sables Signal Station	9
(These two wires communicate direct to Port Louis, by means of a switch).	
On the Midland Line, two wires extend from Port Louis to Mahebourg (36 miles)	72

Telegraph and Telephone Wires—cont.

Wires.	Length.
	Miles.
One from Port Louis to Curepipe for the use of the Military Department	16
One from Port Louis to Chemin Grenier (Savanne)	41
Two Moka-Flacq Line wires from Port Louis through Rose Hill and terminate at Rivière Seche on the North Line	72
At Petite Rivière, 5 miles from Port Louis, a wire goes to Bambous	5
New lines	13½
Total	309½

Out of which seven miles of telephone wire.

There is also a telephonic service in Port Louis which is the property of a private company.

IX.—MILITARY EXPENDITURE.

The troops in the Colony at the end of 1903 numbered 2,720 of all ranks. The following statement shows the Military Expenditure during the year, towards which the Colony contributed £29,856 6*s.* 11*d.*:—

Particulars.	Amount.
	£
Pay, &c., of the Army	76,718
Medical Establishments	4,803
Transport and Remounts	10,148
Provisions, Forage, &c.	39,009
Clothing Services	2,823
Warlike and other Stores	1,822
Works, Buildings and Repairs	11,160
Military Works Loan...	17,274
Establishments for Military Education	392
Miscellaneous Effective Services	143
Army Non-Effective Services	643
Total	164,935

RAILWAYS.

There was an exceptional increase of traffic during the year due to the "Surra" epidemic and to an unprecedented sugar crop. Most of the draught animals in the Colony died and the result was that planters and traders who formerly found it cheaper and more convenient to use carts, had to depend, to a much greater extent than before, on the railway for the transport of their goods and produce.

The effects of the "Surra" were naturally much more felt in districts through which the railway did not pass, and in order to give all possible assistance to the inhabitants of places which were practically without means of communication with the other parts of the Island, the Government had to consider the construction of several branch lines and light railways as well as numerous sidings on the existing lines to facilitate the loading and unloading of goods.

Two branch lines have been constructed and are open to traffic, the Long Mountain extension passing through the Long Mountain valley and connecting with the North Line at Terre Rouge Station; and the Bois Chéri, Nouvelle France-Rivière du Poste extension, starting from Rivière du Poste Station, on the Savanne Line, to Bois Chéri with a branch line from Pont Colville to Nouvelle France. A third line—the Black River extension—branching off the Midland Line at Richelieu, half a mile from Coromandel Station, and terminating close to "Tamarin" Estate in the Black River valley, is also being constructed. This line was begun in July, 1903, and will probably be completed and opened to traffic at the end of August, in time for this year's crop. Schemes were brought forward for other branch lines, but they have been postponed.

The railway earnings for 1903 show a marked increase on those of the previous year. The comparative figures for 1902 and 1903 are as follows:—

	Rs.
1902	2,065,295.89
1903	2,380,143.00
giving an increase of ...	314,847.11, or 15·25%.

These figures do not include the Government traffic, which is not paid, and which amounts to Rs. 126,000.

The percentage of working expenses to the earnings was 58·63 per cent. for 1902 and 73·37 per cent. for 1903, showing an increase of 14·74 per cent., caused by the number of night trains which had to be run during the crop season.

RODRIGUES.

The Island of Rodrigues is a Dependency of Mauritius administered by a magistrate.

The revenue for 1903 was Rs. 12,122 as against Rs. 12,303 in 1902.

The expenditure was Rs. 33,580 as against Rs. 26,277 in 1902.

The population on the 31st December, 1903, consisted of 1,953 males and 1,665 females, making a total of 3,681, mostly of African descent.

The ratio of revenue to population is 3·35 per head and the expenditure 7·55 per head.

The spiritual needs of the population are supplied by a Roman Catholic Priest, and the health of the people is cared for by a Government Medical Officer.

There is a Hospital and two Dispensaries.

The industries are tobacco growing, cattle rearing, and fishing.

X.—MISCELLANEOUS.

The general observations contained in the report on the Blue Book for 1902 were written at such a late period of last year, *i.e.*, 12th October—in consequence of the delay of the printer in the publication of the Blue Book--that very little remains to be added.

As was anticipated, the crop has been a record one, the production being 225,000 tons, but owing to the fall in the price of sugar, the high cost of labour and the considerable expense to which the planters had been put in providing mechanical transport and in constructing the necessary earthworks where the plant had not been provided under the Mechanical Transport Ordinance, No. 34, of 1902, the profits on the year's transactions have been considerably reduced. In fact, except in a few cases, the planters have been unable to meet their liabilities to the Government and, with the approval of the Secretary of State for the Colonies, they have been allowed a delay of one year to pay the instalments of their loans under the Advances in Aid Ordinance, No. 43, of 1902. The delay thus granted affords further evidence of the kindly sympathy which His Majesty's Government entertains towards the sorely tried people of the Island.

Surra is still prevalent in the Colony and the larger number of the draught animals imported, from time to time, die after they have been at work for a few months; so the extension of the system of tramways on estates must be proceeded with, and additional rolling stock provided, if the canes are to be brought to the mill at a reasonable cost. Branch lines of railway have been constructed, or are in course of construction, in the rural districts, and a Commission has been appointed to consider what further assistance can be given to small planters. In the town of Port Louis a tramway has been built connecting the public quays with the docks, the Central Railway Station, and the stores of the merchants and traders of the place.

The report for 1902 gave the price of sugar up to September last. The folowing table brings these prices up to date:—

Year.	Month.	Price.
		Rs.
1903	September ...	9.50
"	October ...	8.60
"	November ...	8.15
"	December ...	8.10
1904	January ...	7.90
"	February ...	7.80
"	March	8.00
"	April	8.00
"	May	8.50

It will be noticed that since September there has been a gradual reduction in prices, which, in the month of February, fell as low as Rs. 7.80 per cwt.

This year has been, on the whole, a dry year and the crop will certainly not exceed 160,000 tons. If prices are good—and there is reasonable ground for hoping that a considerable rise will take place—the planters may be able to tide over their financial difficulties, otherwise I am afraid their position will not materially improve.

An important change has taken place in the administration of the Colony. Sir Charles Bruce, G.C.M.G., quitted the Government on the 29th October on the expiration of his term of office as Governor, which had been extended at the request of the Elected Members of the Council of Government. He received, on leaving, farewell addresses from every class of the community, in recognition of the services rendered by him to the Colony during his tenure of office as Governor.

Sir Cavendish Boyle, K.C.M.G., has been appointed by His Majesty the King to succeed Sir Charles Bruce. He is expected by the Messageries Maritimes Mail Steamer due on the 20th August next, and he will, I feel convinced, receive a hearty welcome from all classes on his arrival.

F. A. GIBSON,

Acting Colonial Secretary.

27th July, 1904.

COLONIAL REPORTS.

The following, among other, reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

MAURITIUS.

(For Report for 1903, *see* No. 430.)

GOVERNOR SIR C. BOYLE to MR. LYTTELTON.

Government House,
Mauritius,
August 18, 1905.

SIR,

I HAVE the honour to transmit, herewith, the Blue Book of Mauritius for the year 1904, together with a copy of the usual report thereon, prepared by the Acting Colonial Secretary.

I have, &c.,
CAVENDISH BOYLE.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1904.

I.—FINANCIAL.

The revenue for the financial year 1903-4 amounted to Rs. 9,473,112, as shown by the following comparative statement:—

Revenue.

	Heads of Revenue.	1902-3.	1903-4.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Customs	2,980,574.36	3,575,826.01	595,251.65	—
2	Port, Harbour, Wharf, and Lighthouse Dues.	201,134.18	236,528.32	35,394.14	—
3	Licenses, Excise and Internal Revenue, not otherwise classified.	2,606,777.82	2,624,936.45	18,158.63	—
4	Fees of Court or Office, Payments for Specific Services and Reimbursements in Aid.	237,865.79	238,865.86	1,000.07	—
5	Post Office and Telegraphs	148,151.07	140,971.41	—	7,179.66
6	Government Railways ...	2,377,494.64	1,890,104.18	—	487,390.46
7	Rent of Government Property.	50,824.94	57,088.36	6,263.42	—
8	Interest	518,697.44	634,660.99	115,963.55	—
9	Miscellaneous Receipts ...	99,664.12	74,041.88	—	25,622.24
10	Land Sales	416.00	88.84	—	327.16
	Total	9,221,600.36	9,473,112.30	772,031.46	520,519.52

The increase of revenue, as compared with the previous year, was mainly due to the operation of Ordinance 21 of 1904 (to provide additional ways and means); to an abundant sugar crop, and to the receipt of certain interest from planters under the Mechanical Transport Loan.

Expenditure.

The following is a comparative statement of the expenditure for the years 1902-3, 1903-4:—

	Heads of Expenditure.	1902-3.	1903-4.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Public Debt	836,940.22	945,578.76	108,638.54	—
2	Pensions	540,185.87	553,070.25	12,884.38	—
3	Governor and Legislature	96,618.67	80,653.44	—	15,965.23
4	Colonial Secretary... ...	60,660.59	69,063.77	8,403.18	—
5	Receiver General	136,357.61	146,944.71	10,587.10	—
6	Auditor General	58,683.70	59,256.67	572.97	—
7	Customs	260,901.83	228,675.19	—	32,226.64
8	Port and Marine	246,303.18	458,706.96	212,403.78	—
9	Observatory...	21,886.86	21,667.97	—	218·89
10	Museum	10,597.01	12,067.11	1,470.10	—
11	Registrar General	23,609.76	29,098.66	5,488.90	—
12	Receiver of Registration Dues.	53,133.31	52,227.28	—	906.03

Expenditure—cont.

No.	Heads of Expenditure.	1902-3.	1903-4.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
13	Post Office	159,595.69	167,851.37	8,255.68	—

30	Charitable Allowances ...	16,953.45	16,646.77	—	306.68
31	Interest and Exchange ...	209,913.72	204,723.89	—	5,189.83
32	Military Contribution ...	466,864.66	431,853.92	—	35,010.74
33	Railways	1,883,483.73	2,407,057.30	523,573.57	—
34	Surveyor General	63,214.21	73,228.20	10,013.99	—
35	Public Works, Recurrent...	520,446.95	549,713.86	29,266.89	—
36	Do., Extraordinary ...	100,721.25	144,206.75	43,485.50	—
37	Loan Commission	14,194.93	14,148.00	—	46.93
38	Mare-aux-Vacoas Water Works.	50,878.76	62,422.37	11,543.61	—
39	Drainage Works	19,537.57	23,488.03	3,950.46	—
40	Secret Service	7,450.00	805.00	—	6,645.00
41	Plague Service	197,221.20	342,146.20	144,925.00	—
		9,575,182.13	10,664,115.96	1,251,707.22	162,773.41

The increase in expenditure was due to a temporary addition to the public debt under Ordinance 43 of 1902 (Advances in Aid to Planters), to the payment of the first instalment of the cost of a new dredger to improve the harbour, the continuation of the light railway extensions undertaken the previous year, including the creation of a tramway in Port Louis consequent on a surrah epidemic, and to plague.

The expenditure of the year, therefore, exceeded the revenue by no less a sum than Rs. 1,191,003, and the Treasury balances at the end of the year had to be written down to Rs. 82,246. Further investigation, however, proved that even this calculation was a too sanguine one, and that at the close of the year 1903-4 a debit balance against the Treasury really existed. As on the estimates for 1904-5 a deficit of Rs. 418,251 had been budgeted for, the financial condition and prospects of the Colony became somewhat alarming in the early months of the new year. By transferring certain Public Works expenditure to Loan Account and increasing slightly the import and excise duties, measures were taken in December last to put the finances on a more satisfactory basis, and it is hoped that after providing a clean balance sheet, the accounts for 1904-5, when they are made up, will show a reconstitution of the Reserve Fund with a sum of about Rs. 250,000 to its credit.

POSITION OF THE COLONY AT THE CLOSE OF THE YEAR 1903-4.

	Rs.
At the close of the year 1903-4, the balance in favour of the Treasury was shown as ...	82,246
At the close of 1902-3, it was	1,263,430
Showing a decrease in 1903-4 of ...	1,181,184

The revenue and expenditure for the last five years, and the Treasury balances at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.	
	Rs.	Rs.	Rs.	c.
1899	9,066,314	8,407,227	1,077,715	00
1900	9,179,968	8,568,923	1,704,421	00
1901-2	9,140,754	9,043,066	1,834,669	00
1902-3	9,221,600	9,575,182	1,263,430	00
1903-4	9,473,112	10,664,115	82,246	62

the difference between the revenue and expenditure of 1903-4—Rs. 1,191,003—being met from Treasury balances.

Assets and Liabilities on 30*th June*, 1904.

1. Commissioners of Currency:—

	Rs.
Assets	7,000,136
Liabilities	6,876,250
Balance in favour of Commissioners ...	123,886

2. Government Savings Bank:—

	Rs.
Assets	3,141,650
Liabilities	2,832,512
Balance in favour of Bank	309,138

3. Curatelle:—

	Rs
Assets	468,866
Liabilities	468,866

4. Treasury proper:—

	Rs.
Assets	5,619,712
Liabilities	5,537,466
Balance in favour of the Treasury ...	82,246

5. Public Debt:—

The Public Debt stood as follows on the 30th June, 1904:—

	£	*s.*	*d.*
(1) Savanne Railway 4½ per cent. Debentures, payable by annual drawings ...	38,893	10	0
(2) Moka Railway 4 per cent. Debentures, payable by annual drawings	700	0	0
(3) Consolidated 4 per cent. Debentures, payable by annual drawings	53,800	0	0
(4) Mauritius Inscribed Stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas (£34,000)	482,390	16	0
(5) Hurricane Loan 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892	600,000	0	0
(6) Mechanical Transport Loan, under Ordinance No. 34 of 1902	200,000	0	0
	£1,375,784	6	0

For the redemption of the debentures and inscribed stock, the several sinking funds and cash balances in the hands of the trustees on the 30th June, 1904, amounted to £181,114, the amount duly provided as required by law.

The sum at the credit of the sinking funds on 30th June, 1904, showed an increase of £12,663 on the previous year.

Currency.

Amount of currency notes on 31st December, 1904:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents)...	483	16	5
Issue of 1860 (sterling)	3,639	0	0
	£4,122	16	5

Rupee notes, under Ordinance 28 of 1876:—

	Rs.
1. In the Commissioners' vault	2,714,000
2. In the hands of the public (including the banks and financial officers)	4,162,250
	6,876,250

CHANGES IN TAXATION.

1. On the 29th day of December, Ordinance 41 of 1903 was passed in Council to amend and consolidate the laws dealing with the imposition of licences. Certain of the more important licences were increased, and a number of small licences were reduced to R. 1 per annum each, the custom of granting free licences to poorer members of the Indian population, on the recommendation of the Protector of Immigrants, being abolished. A new feature in the Ordinance is a proviso levying a surcharge of 5 per cent. between the ninth and fifteenth day after fhe expiry of a licence—should the licencee not have renewed it before that period.

2. In December the duty on rum was raised from R. 1.45 to R. 1.67 per litre of 23 degrees strength (Cartier), with an additional duty of R. 0.08 per litre for every degree above 23 degrees (*i.e.*, an increase of .02c. per litre on the previous taxation).

At the same time, the duty of Rs. 8.42 per hectolitre of wine of local manufacture was raised to Rs. 9.18, the additional duty of R. 1.45 per degree or fraction of a degree of alcohol per hectolitre and a proportional duty per fraction of a degree above 16 degrees according to Gay Lussac's Alcoholometer contained in such wine, being raised to R. 1.67.

MUNICIPALITIES.

Statement of the revenue and expenditure of the Municipality of Port Louis for the year ended 31st December, 1904:—

	Rs.
Balance in hand 1st January, 1904 ...	26,522.29
Revenue during the year	*557,683.42
	584,205.71
Expenditure	*571,263.03
Balance in hand on 31st December, 1904	12,942.68

The following is a comparative statement of the normal revenue and expenditure for the last five years:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1900	435,264.53	433,351.95
1901	442,854.46	448,214.52
1902	442,825.20	472,875.39
1903	†422,351.45	451,345.77
1904	501,365.27	502,601.14

Statement of the debts of the Municipal Corporation of Port Louis on 31st December, 1904, showing provision for payment in 1905:—

Loan.	Amount.	Repayments to be made in 1905.
	£	£
Conversion Loan	123,500	1,500
	Rs.	Rs.
Colonial Loan	39,000.00	7,800.00
Grand River Bridge Loan	14,000.00	2,000.00
Manure Establishment Loan	24,000.00	2,000.00
Government Hurricane Loan	95,880.00	5,766.60
Flood Loan	16,666.72	4,167.00
Municipality Loan	28,000.00	2,000.00
Total	217,546.72	23,733.60

Provision for payment of capital and interest on the above loans has been duly made in the annual budget of the Corporation.

---

* Including advances, deposits, &c.

† Not including a loan of Rs 30,000 for the purchase of the buildings of the Gas Company and of a traction engine for scavenging purposes.

Besides the Municipal Council of Port Louis, which is an elective assembly, there are three township boards—

Curepipe,
Beau Bassin and Rose Hill,
Quatre Bornes,

appointed annually by the Governor to administer the affairs of those places.

BOARD OF COMMISSIONERS FOR CUREPIPE.

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	Half Year, 1st Jan. to 30th June, 1903.	New Financial Year, 1903-4. 1st July, 1903, to 30th June, 1904.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	59,759.18	115,590.13	121,322.70	35,536.20	82,771.72
Expenditure...	57,108.48	88,426.58	120,286.57	34,261.02	81,158.12

Debt of the Board of Curepipe.

	Rs.	Rs.
1. Amount of debentures issued in 1901 and 1902 for the construction of the Town hall, in virtue of Ordinance No. 39 of 1900	70,000	
Amount paid off in 1902, 1903, and 1904	7,500	
		62,500
2. Government special loan repayable in 10 annuities		25,000
3. Balance of sale price of a piece of land purchased by the Board		4,000
Total		91,500

Provision is made annually for repayment.

BOARD OF COMMISSIONERS FOR BEAU BASSIN AND ROSE HILL

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	1903.	1904.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	22,705.09	28,252.08	29,342.81	29,270.19	29,345.61
Expenditure...	25,377.09	27,520.54	33,133.34	29,235.29	26,260.19

Debt.—A loan of Rs. 20,000 was made by Government to the Board on its creation to permit of the work of repairing and draining the streets and lanes of the township being undertaken without delay. This amount is refunded by annual instalments of Rs. 2,000, and the debt is now reduced to Rs. 6,000.

A further loan of Rs. 5,000 was made to the Board in 1901 to be reimbursed after complete settlement of the loan of Rs. 20,000.

BOARD OF COMMISSIONERS OF QUATRE BORNES.

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	1903.	1904.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	10,060.70	12,827.14	13,627.55	15,460.80	12,724.51
Expenditure ...	11,418.02	10,148.32	13,454.95	14,000.25	13,274.16

Debt—Rs. 615.—This represents the share to be paid to Government by the Board for re-metalling a main road in the township. Provision has been made in the estimates to pay off this debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following statements show in a comparative form the value of the imports and exports for the year 1904.

VALUE of IMPORTS (exclusive of charges and exchange) and EXPORTS (exclusive of shipping charges), classified according to Circular of December, 1901, of the Secretary of State.

TRADE OF MAURITIUS.

The total value of imports into and exports from the Colony (exclusive of duty free goods to and from the Dependencies) for the year ending 31st December, 1904, compared with 1903, can be thus summarized:—

—	1903.	1904.
	Rs.	Rs.
Imports (including charges and exchange)	39,269,847.24	35,416,624.01
Exports (exclusive of shipping charges on local produce and manufacture).	35,670,597.42	42,005,674.06
Total	74,940,444.66	77,422,298.07

Accounted for as under:—

—	Imports.		Exports.	
	1903.	1904.	1903.	1904.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	10,307,582.12	11,108,713.75	4,348,861.03	6,288,850.19
British Possessions.	18,424,040.90	17,500,470.21	30,812,120.83	34,701,254.02
Foreign Countries.	10,538,224.22	6,807,440.05	509,615.56	1,015,569.85
Total ...	39,269,847.24	35,416,624.01	35,670,597.42	42,005,674.06

The total value of imports and exports, from and to the Dependencies, per coast sufferances, is as follows:—

—	1903.	1904.
	Rs.	Rs.
Imports	489,999.14	439,788.54
Exports	443,813.09	412,563.76
Total	933,812.23	852,352.30

The aggregate value of trade is, therefore, as under:—

—	1903.	1904.
	Rs.	Rs.
Imports	39,759,846.38	35,856,412.55
Exports	36,114,410.51	42,418,237.82
Total	75,874,256.89	78,274,650.37

Excluding the value of exports to and imports from the Dependencies, the rate of trade, per head of population (*i.e.*, for 1903, 379,763 souls, and for 1904, 383,864 souls) was:—

—	1903.	1904.
	Rs.	Rs.
Imports (including charges and exchange)	103.40	92.26
Exports (exclusive of shipping charges on local produce and manufacture).	93.95	109.42

The difference in the rate of trade for imports is due to less importation of bullion and specie and of tramway materials, to the amount of Rs. 1,840,049 and Rs. 4,577,746 respectively.

The value of specie and bullion, imported and exported, is as follows:—

—	1903.			1904.		
	Declared Value.	Charges.	Total.	Declared Value.	Charges.	Total.
	Rs.	Rs	Rs	Rs.	Rs.	Rs.
Imports	3.243,365.10	230,389.46	3.473,754.56	1,633,705.60	362,387.14	1,996,092.74
Exports	1,532,526.71	—	1,532,526.71	1,759,336.00	—	1,759,336.00
Total	4,775,891.81	230,389.46	5,006,281.27	3,393,041.60	362,387.14	3,755,428.74

Deducting specie and bullion, the declared value of imports and exports is as follows:—

—	1903.	1904.
	Rs.	Rs.
Imports	35,796,092.68	33,420,531.27
Exports	34,138,070.71	40,246,338.06
Total...	69,934,163.39	73,666,869.33

The amount of duty collected during the years (1st January to 31st December) 1903 and 1904 is as under:—

—	1903.	1904.
	Rs.	Rs.
On Imports...	2,683,370.89	3,146,871.92
On Exports...	546,835.20	636,041.64
Amount collected ...	3,230,206.09	3,782,913.56

The 4 per cent. surcharge produced:—

	Rs.
In 1903	102,897.06
„ 1904	119,613.26

The additional 16 per cent. surcharge levied from the 2nd December, 1904, produced (from 2nd to 31st December, 1904) Rs. 33,310.62.

POSTAL PARCELS.

The declared value of the parcels imported and exported during the past five years is as under:—

—	1900.	1901	1902.	1903.	1904.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imported ...	183,425.50	214,534.60	231,993.73	224,885.17	297,804.73
Exported ...	18,940.26	19,388.42	20,628.64	28,624.83	33,467.35
Total ...	202,365.76	233,923.02	252,622.37	253,510.00	331,272.08

IMPORTS AND EXPORTS.

The total value of imports and exports for the last five years is as under:—

Year.	Imports, including Charges and Exchange	Exports, including Shipping Charges.
	Rs.	Rs.
1900	31,427,401.72	33,550,973.74
1901	31,679,842.99	30,842,305.66
1902	30,738,778.11	38,341,695.55
1903	39,269,847.24	37,794,226.75
1904	35,416,624.01	44,545,320.23

Comparative statement of the value of the chief imports and exports (exclusive of charges and exchange):—

Articles.	Imports.		Exports.

IMPORTS.

Dealing with the articles and their values according to the entries for 1903 and 1904 the following results are noticeable:—

Acids.

Phosphoric.—This article is exclusively received from the United Kingdom, and the imports show an increase of kilos. 41,724 in weight and of Rs. 5,426 in value.

Ammonia Sulphate.

The imports for 1903 amounted to kilos. 3,983,785, valued at Rs. 897,383, exclusively received from the United Kingdom, against for 1904, kilos. 4,305,252, valued at Rs. 918,856, imported from the following countries:—

Countries.	Quantity.	Value.
	Kilos.	Rs.
United Kingdom	2,771,691	807,616
Australia	508,000	104,622
France	25,561	6,619

The total increase is, therefore, kilos. 321,467 in weight and Rs. 21,463 in value—the United Kingdom showing a falling off of kilos. 21,294 in weight and of Rs. 89,772 in value.

Animals.

Asses.—301 head of the value of Rs. 28,096 were received in the preceding year against 314 of the value of Rs. 41,423 in 1904. The increase in value is Rs. 13,327. Aden supplied 90, with a value of Rs. 3,267 in 1903, against nil in 1904. The Argentine Confederation provided 109 less, with a shortage in value of Rs. 7,236 in 1904. From Continental India 4, valued at Rs. 726, were imported in 1903, against 123, valued at Rs. 20,534 in 1904. Seychelles supplied 3 in 1903, against nil in the past year.

Horses.—661 less were imported in 1904, with a decrease in value of Rs. 481,065. The decrease in number is chiefly from Continental India, the Argentine Confederation, and the Sandalwood Islands, which supplied 345, 392, and 352 less head, with a decrease in value of Rs. 737,664, Rs. 266,073, and Rs. 39,957 respectively, as compared with the previous year.

Mules.—774, valued Rs. 337,903, were imported in 1903, against 1,216, of the value of Rs. 314,320 in 1904, showing an increase in number but a decrease in value. The Argentine Confederation supplied 228 head more in 1904, but with a shortage in value of Rs. 85,945. Continental India provided 43, valued at Rs. 30,326, in 1904, against 3, valued at Rs. 1,209 for the previous year. From Australia 174, of the value of Rs. 33,245, were received in 1904, against nil in the preceding year.

Sheep and Goats.—Only one sheep, valued Rs. 44, was received in 1904, against 192 sheep, valued Rs. 3,253, in 1903. This is due to the ports of India and South Africa being closed on account of the prevalence of the disease amongst animals in those countries.

Apothecaries Wares.

This item shows a decrease of Rs. 59,871, due chiefly to less imports from the United Kingdom (Rs. 8,085), France

(Rs. 64,384), and China. Small increases are to be noted from Australia, Continental India, Germany, and Spain.

Apparel, Wearing.

The value of the imports for 1903 amounted to Rs. 128,646, against Rs. 139,356 for 1904, showing an increase, therefore, of Rs. 11,110 in value. The increase is from the United Kingdom, China, France and Pondichery, although there is a decrease noticeable under Continental India, Germany, and Japan.

Areca Nuts.

Dry.—Kilos. 14,710, of the value of Rs. 3,691, were imported in 1904, against kilos. 67,551, valued Rs. 14,006, shewing a large decrease in weight of kilos. 52,841, and in value of Rs. 10,315, due principally to shortage in imports from Continental India.

Automobiles.

In 1904 four automobiles were received from the United Kingdom of the value of Rs. 31,131, and four from Germany of the value of Rs. 25,474, giving a respective average of Rs. 7,742 and Rs. 6,491 per machine. In 1903 seven, valued Rs. 10,648, were received exclusively from France, giving an average of Rs. 1,521 per machine. This low value is due to the articles being mostly second-hand ones.

Bacon and Hams.

Kilos. 3,866 more were received in 1904, with a shortage of Rs. 1,512 in value. This difference is due to increased imports from Australia of frozen supplies, thus causing a falling off from the United Kingdom.

Bags.

Gunny.—247,251 more bags were received in 1904, giving an increase in value of Rs. 88,228 over the imports for 1903. The bags were almost exclusively imported from Continental India.

Straw.—Madagascar supplied 72,000 bags less than in 1903, and a shortage in value of Rs. 19,115, due to the reduced crop.

Bark and Dyewood.

Australia supplied kilos. 110,701, valued at Rs. 14,577, in 1904, against kilos. 48,768, valued at Rs. 7,374, in 1903, showing an increase in weight of kilos. 61,933 and in value of Rs. 7,183. These articles are exclusively imported from Australia.

Beef, Salted.

The imports for 1904 amounted to kilos. 365,155, of the value of Rs. 164,892, against (for 1903) kilos. 285,083, of the value of Rs. 3,386. An increase is noticeable in the imports of the United States, and a falling off in those from the United Kingdom during 1904.

Beer and Ale.

In Casks.—Exclusively supplied from the United Kingdom, which provided hectolitres 2,921 more in 1904, with a corresponding surplus in value of Rs. 65,263.

In Bottles.—The imports for last year show a decrease, both in measure of 25,068 litres and in value of Rs. 16,086, due to less imports from the United Kingdom, France, and Germany.

Boats.

Six boats, valued Rs. 5,139, were received from the United Kingdom and Germany in 1904, against three from the United Kingdom, of the value of Rs. 877, in the previous year. An increase, therefore, of three in number, with a surplus in value of Rs. 4,262.

Books, Printed.

The imports for 1904 were valued at Rs. 45,492, against Rs. 56,327 in the previous year.

Bran.

Compared with 1903, the imports for 1904 show a substantial decrease of kilos. 274,996 in weight and of Rs. 221,935 in value, chiefly due to less imports from Continental India, and on account of the prevalence of surra.

Bricks and Tiles.

This article is exclusively supplied by the United Kingdom, and the imports for 1904 show an increase of 20,001 in number, but with a short value of Rs. 7,429.

Bullion.

In 1904 kilos. 515, of the value of Rs. 32,802, were received against, for 1903, kilos. 160.459 grs., of the value of Rs. 13,787. There is accordingly a surplus, both in weight of kilos. 354.541 grs. and in value of Rs. 19,015.

Imported exclusively from Continental India.

Butter.

The imports for 1904 amounted to kilos. 66,379, of the value of Rs. 122,900, against kilos. 36,057, of the value of Rs. 76,040, for the previous year, showing an increase both in weight of kilos. 30,322 and in value of Rs. 56,521. The increase is due to more supplies from Denmark (Rs. 42,201), France (Rs. 2,356), United Kingdom, Continental India and the United States. Small decreases are noticeable from Australia and Italy.

Bicycles.

In 1904, 107 bicycles, valued Rs. 14,962, were imported, against 155, valued Rs. 47,488, in 1903. There is a decrease of 48 in number and of Rs. 9,138 in value. The United Kingdom and France were represented by smaller imports to the value of Rs. 4,414 and Rs. 3,443 respectively. Germany supplied none in 1904, against 10, valued Rs. 1,535, in the preceding year.

Cabinet and Upholstery Wares.

The declared value of these articles imported in 1904 amounted to Rs. 77,165, against Rs. 47,488 in the previous year. There is an increase of Rs. 29,677, chiefly due to more imports from the United Kingdom, Austria, Continental India, and the United States. France and Germany show small decreases.

Candles.

Composition.—Increase of kilos. 29,350 in weight and of Rs. 6,741 in value as compared with the previous year, chiefly due to more imports from France, Rs. 9,057, and also from Belgium. Small decreases are noticeable under the United Kingdom, Continental India, China, and Holland.

Caoutchouc and India-rubber.

Manufactured.—The imports for 1904 amounted to kilos. 4,124, valued Rs. 22,610, against, for 1903, kilos. 2,347, valued at Rs. 15,138, showing an increase both in weight of kilos. 1,777 and in value of Rs. 7,472, chiefly due to more supplies from the United Kingdom.

Cement.

Kilos. 1,195,825, valued at Rs. 41,794, were received in 1904, against kilos. 597,465, valued at Rs. 24,919, in 1903. There is an increase both in weight of kilos. 598,360 and in value of Rs. 16,875, principally due to more imports from the United Kingdom (Rs. 8,929), and also from France, Belgium and Holland. Germany provided for Rs. 1,371 in 1903, against nil in the past year.

Cheese.

The imports for 1904 show an increase of kilos. 8,009 in weight and of Rs. 3,661 in value, as compared with 1903. The United Kingdom shows a falling off of Rs. 8,275, while from Australia and Holland respective increases of Rs. 6,718 and Rs. 5,608 are noted.

Chocolate and Cocoa.

The imports for 1904 amounted to kilos. 21,109, of the value of Rs. 30,433, against, for 1903, kilos. 11,979, of the value of Rs. 18,418, showing an increase of kilos. 9,130 in weight and of Rs. 12,015 in value, due principally to more imports from the United Kingdom, France, and Belgium.

Clocks and Watches.

The value of the imports for 1904 amounted to Rs. 30,644, against Rs. 20,817 for the preceding year. There is, therefore, an increase of Rs. 15,827 in value. Increases are from France (Rs. 8,317), Switzerland (Rs. 6,202), Germany, and the United Kingdom. Small decreases are noticeable from the United States, China, and Continental India.

Coals.

This item shows the large increase of 15,705 tons, with a surplus in value of Rs. 563,660, as compared with the imports for the previous year. The United Kingdom and Australia supplied an excess of 11,128 tons and 5,557½ tons in weight, with a surplus in value of Rs. 378,378 and Rs. 225,938 respectively. Continental India provided for a surplus of 235 tons, but with a falling off in value of Rs. 32,326. France and Belgium supplied none in 1904, against 80½ tons and 135 tons respectively for the previous year.

Coffee.

There is a decrease, both in weight of kilos. 181,313 and in value of Rs. 73,903. Decreases are principally from Aden, Ceylon, Brazil, Pondichery, Singapore, Natal, and the Argentine Confederation. Increases are noticeable from Continental India, Seychelles, and the United States.

Confectionery.

The value of the imports for 1904 amounted to Rs. 77,946, against Rs. 68,691 for the previous year. The increase is of Rs. 9,255. Australia and France show increases of Rs. 5,003 and Rs. 5,647 respectively, while the United Kingdom shows a decrease of Rs. 1,066.

Copperah or Poonac.

This article is exclusively supplied from Continental India, which supplied kilos. 295,727 less, with a shortage in value of Rs. 11,566 as compared with 1903.

Copper.

Sheets and Nails (*red*).—There is an increase both in weight of kilos. 3,774 and in value of Rs. 4,623, chiefly due to more imports from the United Kingdom.

Sheets and Nails (*yellow*).—These articles are exclusively received from the United Kingdom, which supplied kilos. 10,330 more, with a surplus in value of Rs. 17,660 as compared with 1903.

Cordage.

Hemp.—The imports for 1904 amounted to kilos. 36,801 of the value of Rs. 18,465, against kilos. 50,513 of the value of Rs. 25,196, showing a falling off of kilos. 13,712 in weight, and of Rs. 7,731 in value. The decrease is from Continental India and also from Hong Kong, the last port providing for Rs. 5,855 in the previous year, against nil in 1904. The United Kingdom shows a small increase.

Cordials and Liquors.

Compared with the preceding year, the imports for 1904 show a decrease of litres 948 in measure and of Rs. 4,313 in value, due to less imports, principally from France.

Corks and Bungs.

There is an increase of 5,314,541 in number and of Rs. 9,176 in value, principally due to more imports from France amounting to Rs. 9,269.

Corn, Grain, Meal.

Beans.—Compared with 1903, the imports for 1904 show an increase of kilos. 46,281 in weight and of Rs. 13,512 in value. The United Kingdom, China, France, and Réunion provided for surplus values of Rs. 1,566, Rs. 631, Rs. 17,832, and Rs. 1,686, respectively. Continental India and Madagascar show decreases of Rs. 4,509 and Rs. 3,948.

Dholl.—Decrease both in weight of kilos. 115,688 and of Rs. 27,840 in value as compared with 1903.

Gram.—Increase in weight of kilos. 225,039 and in value of Rs. 13,211.

Lentils.—Decrease of kilos. 539,200 in weight and of Rs. 62,001 in value.

Dholl, gram, and lentils are exclusively imported from Continental India.

Maize.—In 1904, this article was exclusively received from Continental India, which supplied kilos. 7,500 of the value of Rs. 582.50. In 1903, Continental India and the Argentine Confederation supplied kilos. 54,600 and kilos. 19,576 in weight valued Rs. 3,351 and Rs. 1,086, respectively. Aden and Natal also provided small quantities. The decrease is of kilos. 67,926 in weight and of Rs. 3,908 in value.

Oats.—Compared with the previous year the imports for 1904 show an increase in weight of kilos. 498,781, but with a falling off in value of Rs. 4,805. Australia, Continental India, and the Argentine Republic supplied kilos. 1,494, kilos. 2,848,674, and kilos. 140,976, of the value of Rs. 172, Rs. 264,029, Rs. 8,252 in 1903, against, in 1904, kilos. 1,321,151, kilos. 1,536,180, and kilos. 46,710, of the value of Rs. 84,430, Rs. 138,807, and Rs. 869, respectively.

In 1904 Cape Colony supplied kilos. 585,254, valued Rs. 43,545, against nil in the preceding year.

Rice.—Compared with 1903, the imports for the past year show an increase of kilos. 8,486,679 in weight and of Rs. 830,24[illegible] in value, with the following result:—

Continental India.—Excess of kilos. 7,327,784, with a surplus of Rs. 637,794.

China.—Shortage of kilos. 35,185, and of Rs. 10,005.

Cochin China.—None in 1904, against kilos. 337,500, valued Rs. 50,692, in 1903.

Madagascar.—Shortage of kilos. 2,670, and of Rs. 700.

Straits Settlements.—None in 1903, against kilos. 1,601,250, valued Rs. 243,522, for 1904.

Singapore.—Excess of kilos. 33,000, with a surplus in value of Rs. 10,327.

Wheat.—Compared with 1903, there is an increase of kilos. 145,392 in weight and of Rs. 9,931 in value, due principally to more imports from Continental India. Cape Colony provided for Rs. 3,977 in 1903, against nil in 1904, while supplies amounting to Rs. 2,133 were received from Australia in 1904, against nil in 1903.

Wheat Flour.—The imports for last year show an increase of kilos. 1,998,337 in weight and of Rs. 334,463 in value over 1903, with the following result as to weight and value:—

Value.

Australia.—Increase in weight of kilos. 1,046,898 and in value of Rs. 181,435.

Continental India.—Increase in weight of kilos. 1,112,557 and in value of Rs. 188,203.

Argentine Republic.—None in 1904, against kilos. 114,730, valued Rs. 20,069, in 1903.

China.—Shortage in weight of kilos. 44,715 and in value of Rs. 8,584.

Cotton Manufactures.

Coloured.—The imports for 1904 show a decrease in value of Rs. 7,335 as compared with 1903. The United Kingdom, Continental India, Belgium, Germany, Italy, Holland, and China show decreases of Rs. 34,332, Rs. 7,265, Rs. 6,695, Rs. 11,681, Rs. 861, Rs. 849, and Rs. 77, respectively. France, Pondichery and Switzerland show increases of Rs. 28,196, Rs. 3,928, and Rs. 19,129.

Cotton Hosiery.—Compared with 1903, the value of the imports for 1904 shows an increase of Rs. 5,335—principally due to Germany which provided for a surplus value of Rs. 7,878. Small decreases are noticeable under the United Kingdom and France.

Cotton, plain.—There is an increase in value of Rs. 170,904 as compared with 1903, chiefly due to more imports from the United Kingdom and France to the amount of Rs. 151,765 and Rs. 25,477, respectively. Continental India shows a falling off of Rs. 6,146.

Cotton thread for sewing.—Increase both in weight of kilos. 1,861 and in value of Rs. 5,616, chiefly due to more supplies from the United Kingdom.

Cotton Wool.—The imports for 1903 amounted to the value of Rs. 5,724, and were provided by the United Kingdom (Rs. 2,277) and Continental India (Rs. 3,447). For 1904, the United Kingdom provided for Rs. 1,074, none being received from Continental India.

Earthen and China Wares.

Compared with 1903, the imports for 1904 show an increase in value of Rs. 28,850. The increase is from the United Kingdom (Rs. 8,111), Continental India (Rs. 1,891), Austria (Rs. 2,254), China (Rs. 1,005), France (Rs. 6,135) and Germany (Rs. 9,170).

Fireworks.

The imports for 1904 show an increase of Rs. 6,452, due chiefly to supplies from China which provided for a surplus value of Rs. 4,004, and to small increases from the United Kingdom, Germany, and Singapore.

Fish.

Dried or salted.—There is an increase both in weight of kilos. 222,219 and in value of Rs. 82,030. The increase is from Cape Colony (Rs. 105,660), Continental India (Rs. 46,156), Seychelles (Rs. 2,579), and China (Rs. 1,873); but decreases are noted under the United Kingdom (Rs. 9,756), Madagascar (Rs. 62,298), and Canada (Rs. 563).

Pickled.—There is a decrease both in weight of kilos. 158,441 and in value of Rs. 37,075. The United Kingdom and Nova Scotia show a shrinkage of Rs. 26,235 and Rs. 22,135, respectively. From Canada kilos. 69,840, valued Rs. 11,300, were received in 1904 against nil in 1903.

Fruit.

Cocoanuts.—302,672 cocoanuts less were received in 1904, with a shortage in value of Rs. 6,896, due to less imports from Seychelles.

Glass.

Window.—Metres 5,209 more with a surplus in value of Rs. 7,974 were received in 1904. Belgium provided for a surplus value of Rs. 8,391, but France shows a small decrease.

Glassware.

The imports for 1904, compared with 1903, show that 113,669 pieces more with a surplus in value of Rs. 13,623 were received in 1904. The United Kingdom, France, and Germany provided the surplus.

Grease.

Cart.—This article is almost exclusively supplied from the United Kingdom, and the imports for 1904 show a decrease both in weight of kilos. 24,546 and in value of Rs. 6,302 as compared with the imports for the previous year.

Haberdashery.

The value of the imports for 1904 amounted to Rs. 747,963, against Rs. 560,495 for 1903, showing a surplus of Rs. 187,468. The United Kingdom, Continental India, Austria, Belgium, France, Italy, Japan, and Switzerland provided for surplus values of Rs. 107,644, Rs. 13,343, Rs. 3,489, Rs. 2,680, Rs. 457, Rs. 728, Rs. 1,052, and Rs. 1,994, respectively. Decreases are noticeable under Germany (Rs. 7,487), Holland (Rs. 8,779), and Pondichery.

Hardware and Cutlery.

The imports show a falling off of Rs. 157,455 as compared with last year. The decrease is chiefly from the United Kingdom (Rs. 19,854), Belgium (Rs. 18,455), France (Rs. 31,970), and Germany (Rs. 91,189). Small increases are noticeable under Ceylon, Continental India, and the United States.

Hats.

Felt.—The imports for 1904 amounted to 23,126 in number and to Rs. 30,747 in value, against 12,333 in number and Rs. 15,640 in value for the past year, showing an increase of 10,793 in number and of Rs. 15,107 in value. The United Kingdom, Austria, France, and Italy provided for surplus values to the amount of Rs. 4,726, Rs. 2,018, Rs. 3,065, and Rs. 5,021, respectively.

Hay and Straw.

There is an increase of Rs. 5,469 in value as compared with 1903, due principally to more imports from Australia.

Hemp.

Undressed.—Kilos. 6,600 more were imported in 1904, with a surplus in value of Rs. 5,872, due to more imports from the United Kingdom.

Hides.

Tanned.—The imports for 1904 show an increase of kilos. 4,100 in weight and of Rs. 5,294 in value. The United Kingdom provided for a surplus value of Rs. 2,469. Pondichery supplied hides to the value of Rs. 17,248 against nil in 1903, and from Continental India imports amounting to Rs. 2,784 were received in 1903 against nil in 1904.

Hulls of Vessels.

Abandoned.—There is an increase of Rs. 4,000 as compared with last year—one valued Rs. 450 in 1903 against two valued Rs. 4,450 for the last year.

Iron.

Bars.—There is a notable decrease of kilos. 605,637 in weight and of Rs. 64,231 in value. The United Kingdom shows a falling off of Rs. 74,612, while an increase of Rs. 10,383 is noticeable from Belgium.

Nails.—Increase both in weight of kilos. 55,128 and in value of Rs. 13,189 as compared with the previous year. The increase is from the United Kingdom (Rs. 9,199), Continental India, Belgium, and Germany. There is a slight decrease from France.

Sheets.—Increase both in weight of kilos. 311,649 and in value of Rs. 48,136—due principally to more imports from the United Kingdom. Belgium supplied kilos. 1,580 of the value of Rs. 227 in 1904 against nil for the previous year.

India-rubber Wares.

The imports for 1904 amounted to Rs. 18,210 in value against Rs. 10,918 for 1903, showing an increase of Rs. 7,308. The United Kingdom shows an increase of Rs. 10,817, but from France there is a falling off of Rs. 3,678.

Jewellery.

The imports for 1904 amounted to Rs. 72,819 in value against Rs. 45,899 for 1903, showing an increase of Rs. 26,920. The United Kingdom, Austria, Continential India, China, France, Pondichery, Germany, and Switzerland provided for surplus values of Rs. 989, Rs. 818, Rs. 1,837, Rs. 12, Rs. 18,906, Rs. 2,992, Rs. 1,773, and Rs. 165, respectively.

Lard.

Decrease both in weight of kilos. 3,810 and in value of Rs. 7,172. The United Kingdom, Continental India, and China provided for less values of Rs. 720, Rs. 16,701, and Rs. 21,014, respectively. France and the United States provided for surplus values of Rs. 4,628 and Rs. 13.003. Austria and Denmark sent kilos. 21,320 and kilos. 998 of the value of Rs. 16,497 and Rs. 1,058, respectively, in 1904, against nil in the previous year.

Leather.

Wrought. Boots and Shoes.—The imports for 1904, as compared with those for the preceding year, show that 20,699 pairs less were received, giving a shortage in value of Rs. 20,277. The decreases are in respect of imports from Continental India (Rs. 26,799) and France (Rs. 11,710). The United Kingdom, however, supplied 3,794 pairs more with a surplus in value of Rs. 19,931.

Sole.—Increase both in weight of kilos. 3,899 and in value of Rs. 7,519. The increase is chiefly from Australia, which supplied an increased value of Rs. 8,856. Singapore supplied kilos. 1,425 of the value of Rs. 1,260 in 1903, against nil in 1904.

Wrought. Other sorts.—The imports for 1904 show an increase in value of Rs. 22,875, principally due to France, the United Kingdom and Australia, which exported surplus values of Rs. 19,866, Rs. 3,771, and Rs. 740, respectively.

Lime.

Phosphate.—60,000 kilos., valued Rs. 7,919, were received in 1903 against none in 1904 from the United Kingdom. From France kilos. 50,000, valued Rs. 6,800, were received in 1904 against nil in the previous year.

Superphosphate.—The imports for 1904 show an increase both in weight of kilos. 311,680 and in value of Rs. 14,269. From the United Kingdom kilos. 208,250 more were received, with a surplus in value of Rs. 9,200. France supplied in 1904 kilos. 103,400 of the value of Rs. 5,770, against nil in the previous year.

Linen Manufacture.

Canvas.—The imports for 1904, as compared with the previous year, show an increase both in weight of kilos. 6,485 and in value of Rs. 5,651. The increase is due to more imports from the United Kingdom.

Machinery and Millwork.

Machinery for mill work.—The imports for 1904 amounted to kilos. 540,344 of the value of Rs. 294,831, against, for 1903, kilos. 507,661 of the value of Rs. 256,731, showing an increase in weight of kilos. 32,683 and in value of Rs. 32,093.

The rates of importation for British and French goods under this head with regard to weight and value for the two years 1903 and 1904 are as follows:—

—	1903.		1904.	
	Weight.	Value.	Weight.	Value.
	Per cent.	Per cent.	Per cent.	Per cent.
British	64·97	66·44	97·14	94·09
French	28·42	29·11	2·15	4·22

Machinery, consisting of Locomobiles, Tramway materials, Wire rope, &c., for Agricultural purposes.

The imports, consisting of tramway materials, locomotives, traction engines, accessories for tramways, wire rope, &c., for agricultural purposes, amounted in 1903 to kilos. 22,344,489, of the value of Rs. 5,007,809, against, for 1904, kilos. 2,833,885, of the value of Rs. 430,063. There is accordingly a noticeable decrease, both in weight of kilos. 19,460,604 and in value of Rs. 4,577,746. The material imported in 1903 was principally for the construction of the new branch railways and for the light railways on the estates, and a falling off in the succeeding year was to be expected. It should also be noted that material for the latter purpose was admitted free of Customs duty in 1903 after the outbreak of surra among the beasts of burden. As beasts of burden have since been imported in sufficient quantity to supply agricultural requirements, machinery is not in such demand as in 1903, the quantity required being only for repairs and for slight extensions on estates.

The following table is a comparative statement of the amount imported from each country, with the rate of importation for the two years 1903 and 1904.

In 1903 the importation was mainly from Belgium; in 1904 German goods head the list.

Comparative Statement.

—	1903.		1904.	
	Value.	Rate.	Value.	Rate.
	Rs.	Per cent.	Rs.	Per cent.
Belgium	2,257,371	45·6	67,347	15·7

Varnish.

The imports for 1904 amounted to hectolitres 74, valued Rs. 9,622, against hectolitres 19 of the value of Rs. 2,380 for 1903. The increase is, therefore, of hectolitres 55 in measure and of Rs. 6,742 in value. The United Kingdom and France provided for surplus values of Rs. 1,157 and Rs. 6,084, respectively.

Wine.

Claret in casks.—Increase of hectolitres 2,425 in measure and of Rs. 82,040 in value. France supplied hectolitres 3,075 more with a surplus in value of Rs. 100,132; from Spain, hectolitres 1,211 less were received, with a shortage in value of Rs. 35,117. Algeria supplied hectolitres 576 of the value of Rs. 17,389 in 1904, against nil in the previous year.

Pontac in casks.—Hectolitres 5 more, with a surplus in value of Rs. 3,117 were received in 1904. This article is exclusively supplied from Cape Colony.

Port in casks.—Hectolitres 30 more, with a surplus in value of Rs. 2,507 were received in 1904. Portugal provided 68 hectolitres more, with a surplus in value of Rs. 4,484. Spain, hectolitres 45 less, with a shortage in value of Rs. 2,749. France supplied in 1904 hectolitres 52 of the value of Rs. 4,182, against nil in the preceding year.

Port in bottles.—2,531 litres more, with an excess in value of Rs. 3,579 were received in 1904. Portugal provided litres 168 more, with an excess in value of Rs. 5,384. Spain supplied 487 litres less, with a shortage in value of Rs. 1,427.

Sherry in casks.—Hectolitres 54 more, with a surplus in value of Rs. 3,089 were received in 1904. Spain supplied 12 hectolitres less, with a shortage in value of Rs. 275, but from Portugal there is an excess both in measure of hectolitres 70 and in value of Rs. 3,232.

Vermouth in casks.—Hectolitres 80 more, with a surplus in value of Rs. 3,787 for 1904.

Vermouth in bottles.—Litres 27,196 more, with a surplus in value of Rs. 25,228.

Vermouth is exclusively imported from France.

White Wine in bottles.—The imports for 1904 show an increase in measure of litres 11,198, and in value of Rs. 3,867—from France 1,350 litres more, with a surplus in value of Rs. 4,092, were received in the past year.

China provided a surplus value of Rs. 4,711, while slight decreases are shown under the United Kingdom, Continental India, and Hong Kong.

Tin

Slabs.—Increase both in weight of kilos. 3,920 and in value of Rs. 10,607 as compared with 1903. Increases are from the Straits Settlements (Rs. 7,957), the United Kingdom, Continental India, and Singapore.

Tobacco.

Manufactured.—Compared with the imports for the previous year there is a shrinkage of kilos. 2,859 in weight, and of Rs. 18,676 in value. From the United States there is a falling off of kilos. 8,415 in weight, and of Rs. 18,911 in value. Réunion exhibits an increase of kilos. 5,833 in weight, and of Rs. 1,015 in value.

Cigars.—Kilos. 866 more with a surplus in value of Rs. 5,745 were imported in 1904. The increases are from Continental India, the United States, and the United Kingdom.

Unmanufactured.—Decrease both in weight of kilos. 4,822 and in value of Rs. 11,292 as compared with 1903. Continental India provided a less value of Rs. 11,262.

Toys.

The value of the imports for 1904 amounted to Rs. 77,212, against for 1903, Rs. 45,840, showing an excess of Rs. 31,372. The United Kingdom, Continental India, China, France, and Germany provided surplus values of Rs. 4,177, Rs. 1,282, Rs. 657, Rs. 8,472, and Rs. 16,673, respectively.

Umbrellas and Parasols.

Twelve thousand eight hundred and seventeen less were received in 1904, giving a shortage in value of Rs. 10,718. Decreases are seen under the United Kingdom (Rs. 5,540), Continental India (Rs. 788), and France (Rs. 4,422).

Vanilla.

Kilos. 748.453 grs. of the value of Rs. 12,230 were received in 1904, against nil in the previous year. From Seychelles the imports amounted to kilos. 748.203 grs. of the value of Rs. 12,229.

Stationery.

The value of the imports for 1904 amounted to Rs. 137,437, against for 1903 Rs. 133,610, showing an increase of Rs. 3,827, due to more supplies from the United Kingdom (Rs. 8,469), Germany (Rs. 3,006), and Belgium. Decreases are noticeable under France (Rs. 3,914), Continental India (Rs. 1,958), Ceylon, Austria, Belgium, Switzerland, and the United States.

Sulphur.

Common.—There is a large decrease amounting to kilos. 42,543 in weight and of Rs. 118,320 in value. France shows a shrinkage of Rs. 119,674, while a small increase is noticeable under the United Kingdom.

Tallow.

Decrease both in weight of kilos. 12,993 and in value of Rs. 7,977, due to the United Kingdom and Australia, which provided less values of Rs. 1,339 and Rs. 9,229, respectively. There is a slight increase from Continental India. France provided for Rs. 1,072 in 1904, against nil in 1093; while imports amounting to Rs. 164 were received in 1903 from Natal, against nil for the past year.

Tamarinds.

This article is exclusively received from Continental India, which supplied kilos. 56,223 less, with a shortage in value of Rs. 7,916, as compared with the previous year.

Tarpaulins.

Sixty-five, valued Rs. 6,996, were received in 1904 from the United Kingdom, against nil in the preceding year.

Tea.

The imports for 1904 amounted to kilos. 45,113 of the value of Rs. 56,500, against for 1903, kilos. 52,864 of the value of Rs. 44,013, showing a decrease in weight of kilos. 8,851, but with an overvalue of Rs. 12,457. This excess in value is due to the higher price of the tea imported from Ceylon in 1904.

Soda.

Nitrate of.—Exclusively received from Chili, which supplied kilos. 1,578,151 more, with a surplus in value of Rs. 245,198, as compared with the previous year.

Specie.

Gold.—The United Kingdom supplied in 1904 a less value of Rs. 28,371, as compared with the previous year.

Paper Currency.—The United Kingdom forwarded in 1904 Rs. 831,325, against Rs. 201,240 in 1903, difference Rs. 630,085.

Silver.—In 1904 Continental India, Singapore, and Straits Settlements supplied us with silver to the value of Rs. 1,040,000, Rs. 2,076, and Rs. 9,901, aggregating Rs. 1,051,977, against for 1903 Rs. 3,151,367, of which Rs. 3,151,200 were from Continental India and Rs. 167 from France. The imports for 1904 show, therefore, a falling off of Rs. 2,099,390 in value.

Spices.

Chilies.—The imports for 1904 show a decrease both in weight of kilos. 32,015 and in value of Rs. 6,340. This article is exclusively supplied from Continental India.

Spirits.

Brandy.—In 1903, litres 38,006 of the value of Rs. 76,479 were imported, against, for the year 1904, litres 51,546, of the value of Rs. 94,541. The increase is of litres 13,540 in measure and of Rs. 42,995 in value. The United Kingdom and France supplied in 1903 litres 890, valued at Rs. 1,028 and litres 37,026 valued Rs. 75,332, against for 1904 litres 2,624 valued Rs. 4,413 and litres 48,832 valued Rs. 90,014, showing increases of litres 1,734 and litres 11,806, with surplus values of Rs. 3,385 and Rs. 15,682 respectively.

Rum.—There is an increase in measure of litres 55,305 and in value of Rs. 16,626, principally due to more imports from Réunion, which supplied litres 55,162 more, with a surplus in value of Rs. 16,125.

Whisky.—This article is exclusively received from the United Kingdom, which supplied litres 11,431 more, with a surplus in value of Rs. 13,801.

Starch.

There is a decrease both in weight of kilos. 82,338 and in value of Rs. 14,658, chiefly due to short supplies from China and Singapore, which provided for less values of Rs. 9,110 and Rs. 4,599 respectively.

chiefly due to more imports from the United Kingdom, Continental India, China, and France (Rs. 8,136).

Plague Serum.

An increased importation, to the extent of Rs. 14,031 in 1904, from the United Kingdom.

*Pockets.**

Empty.—Continental India supplied 1,482,000, of the value of Rs. 274,075 in 1904, against 555,000, of the value of Rs. 90,255 in 1903, showing a large increase of 932,000 in number and of Rs. 183,820 in value.

Pork, Salted.

Compared with the previous year, the imports for 1904 show an increase of kilos. 7,137 in weight and of Rs. 3,792 in value. From the United Kingdom there is a decrease in value of Rs. 2,120, but from the United States there is an increase of Rs. 5,488.

Postal Parcels.

The value of dutiable articles imported from various countries amounted in 1904 to Rs. 297,805, against Rs. 224,885 in 1903, showing an increase of Rs. 72,920.

Potash.

Nitrate of.—There is a decrease in weight of kilos. 23,511, but with a surplus in value of Rs. 83,195, as compared with 1903, due chiefly to imports from Continental India.

Sulphate of.—Compared with 1903, there is an increase both in weight of kilos. 119,850 and in value of Rs. 22,140. The United Kingdom supplied an excess of kilos. 89,450 in weight and of Rs. 16,463 in value, and from France kilos 30,400, of the value of Rs. 5,677, were received in 1904, against nil in the previous year.

Potatoes.

The imports for 1904 show an increase both in weight of kilos. 356,547 and in value of Rs. 33,423. Australia, Continental India, and France provided surplus values of Rs. 5,429, Rs. 16,094, and Rs. 36,513 respectively. Réunion shows a falling off of Rs. 26,696.

Prints and Engravings.

There is an increase in value of Rs. 4,778, due principally to more imports from France and Germany.

---

* Small sugar bags.

Of other sorts.—347 hectolitres more with a surplus in value of Rs. 26,097 were received in 1904. The increase is chiefly from the United States and Continental India. Germany shows a decrease of Rs. 5,430.

Onions and Garlic.

The imports for 1904 show a decrease of kilos. 151,661 in weight and of Rs. 13,113, in value chiefly due to less imports from France (Rs. 9,874) and Continental India (Rs. 9,914). Small increases are noted from China, Réunion and Australia.

Opium.

Crude.—Kilos. 751.286 grs. more were received in 1904, with a surplus in value of Rs. 18,039, exclusively received from Continental India.

Painters', Dyers', Colours and Materials.

Compared with the previous year, the imports for 1904 show an increase in value of Rs. 5,036; the increase is from the United Kingdom, Continental India, France, Germany, Austria, and the United States. Small decreases in respect of Switzerland and China.

Paper, Cigarette.

The imports for 1904 amounted to kilos. 5,417 in weight and to Rs. 29,342 in value, against kilos. 4,222 and value Rs. 25,133 for 1903, showing an increase in weight of kilos. 1,195 and in value of Rs. 4,211. Comparing the imports for 1903 and for 1904 with those for 1902 the decrease in weight is kilos. 2,739 and kilos. 1,644 respectively.

Paper.

Packing.—There is a decrease in value of Rs. 15,605, accountable to less imports from France (Rs. 13,917). Belgium provided for Rs. 1,892 in 1903, against nil in the past year.

Printing.—Compared with 1903, the value of the imports for 1904 shows a decrease of Rs. 9,848, due principally to less supplies from the United Kingdom to the amount of Rs. 6,057. Belgium and Germany supplied goods to the value of Rs. 1,997 and Rs. 1,509 respectively in 1903, against nil in the previous year.

Perfumery.

The value of the imports for 1904 amounted to Rs. 93,299, against Rs. 81,974 for 1903, showing an increase of Rs. 11,325,

Goods Imported by the Military Authorities.

The imports for 1904 amounted to Rs. 1,663,811, against Rs. 1,312,314 for 1903, showing an increase of Rs. 351,497, due chiefly to more supplies from the United Kingdom and especially from Continental India.

Musical Instruments.

There is a large decrease of Rs. 90,234, as compared with the previous year. The decrease is apportioned to France (Rs. 89,572), the United Kingdom, and Germany. There is a small increase from the United States.

Oil.

Castor.—Decrease both in weight of kilos. 140,191 and in value of Rs. 33,896, principally from Continental India, which provided a less value of Rs. 33,677.

Cocoanut.—868 hectolitres more were received in 1904, but with a decrease in value of Rs. 5,758; from Seychelles there is a falling off both in measure of 878 hectolitres and in value of Rs. 30,031; from Continental India, hectolitres 1,905 of the value of Rs. 24,277 were received in 1904, against 15 litres in 1903.

Gingeley.—A decrease both in weight of kilos. 41,880 and in value of Rs. 17,055 is noted for 1904. The decrease is from Continental India (Rs. 16,517) and Pondichery.

Mustard.—This article is exclusively received from Continental India, and the imports for 1904 show an increase both in weight of kilos. 140,716 and in value of Rs. 37,223.

Olive in Cases.—Decrease both in quantity and in value. France exclusively supplied this article, and provided 429 cases less, with a shortage in value of Rs. 6,070.

Petroleum.—The imports for 1904 amounted to 29,583 hectolitres of the value of Rs. 513,824, against, for 1903, hectolitres 22,617 of the value of Rs. 395,379, showing an increase both in measure of hectolitres 6,966 and in value of Rs. 118,445. The United States provided a surplus value of Rs. 68,788. Russia shows a shrinkage of Rs. 69,051. Sumatra supplied in 1904 hectolitres 7,481, of the value of Rs. 151,353, against nil in the previous year.

Pistachio.—There is a decrease both in weight of kilos. 335,812 and in value of Rs. 126,362, due to less imports from Continental India (Rs. 97,269), Pondichery (Rs. 21,428), and China (Rs. 7,666).

Manure.

Guano.—The imports for 1904 show an increase in weight of kilos. 586,345 and in value of Rs. 10,840. Seychelles provided a surplus value of Rs. 19,600. Glorieuse Island supplied in 1903 guano to the value of Rs. 15,733 against nil in 1904, and the Argentine Republic guano to the value of Rs. 6,975 against nil in the previous year.

Of other sorts.—Increase in weight of kilos. 1,064,936 and in value of Rs. 97,945. Increases are from Australia (Rs. 2,975), France (Rs. 40,708), Continental India (Rs. 35,207), Ceylon (Rs. 15,537), and Germany (Rs. 4,488). Belgium supplied kilos. 50,490, of the value of Rs. 8,321, against nil in 1903. Decreases are noted from the United Kingdom (Rs. 4,501) and the Argentine Republic (Rs. 5,190).

Margarine.

The imports for 1904 show an increase both in weight of kilos. 11,245 and in value of Rs. 12,980, principally due to more imports from Holland. Small decreases are noticeable under the United States, France, and Denmark.

Matches.

8,759 gross less were imported in 1904, with a short difference in value of Rs. 7,803. Japan shows a decrease of Rs. 16,615. A small increase is noted from Sweden, and Germany provided for Rs. 6,903 in 1904, against Rs. 345 in 1903.

Meat.

Fresh-Frozen.—This article is exclusively supplied by Australia, and the imports for 1904 show a decrease of Rs. 192,311, detailed as hereunder:—

—	Value.		Increase=I., or Decrease=D.
	1903.	1904.	
	Rs.	Rs.	Rs.
Carcasses of Cows and Oxen ...	286,208	23,739	D. 262,469
Sheep	832	68,322	I. 67,490
Swine	21,071	23,739	I. 2,668

Now that a regular supply of live oxen is obtainable from Madagascar, frozen meat is not in great demand.

TRANSPORTS AND MEN-OF-WAR.

Six British transports and men-of-war visited this port during the past year:—

The	"Assaye"	of	a	registered tonnage of	7,376
"	"Clive"	"	"	"	1,701
"	"Crescent"	"	"	"	7,700
"	"Brighton"	"	"	"	2,273
"	"Clive"	"	"	"	1,701
"	"Forte"	"	"	"	4,360

One French gun-boat, the "Capricorn," of 485 tons, touched at this port but did not enter.

III.—LEGISLATION.

Thirty-nine Ordinances were passed during the Session of 1904, most of them being short amending Ordinances.

The following, however, deserve to be mentioned:—

Nos. 1, 21, and 25 amend the Customs tariff with a view to increase the import duties on certain articles.

No. 2 was passed in view of the depressed state of the sugar industry, to authorise a postponement of the re-payment of the advances made to planters and others, under Ordinance No. 43 of 1902.

No. 4 deals with the administration of the lesser Dependencies.

No. 13 is the last of a series of Ordinances passed within the last few years for the correction of errors in the text of our local laws.

No. 18 has for its object to give immediate effect to resolutions of the Council of Government relating to Customs and Excise duties, in anticipation of the passing of the necessary Ordinance.

No. 20 contains some important amendments in the provisions of the Pension laws relating to the manner in which the pensions of certain officers are to be computed.

No. 22 amends the law as to oaths administered in Courts of Justice to persons who are Hindus or Mahomedans or whose religious belief prevents them from taking the ordinary oath.

No. 23 enables the shareholders of anonymous companies and others to obtain copies of the articles of association and of the list of shareholders of anonymous companies.

Four steamers, of an aggregate tonnage of 780, entered and cleared from and to the dependencies in 1904, against one of 195 tons, which cleared for the dependencies in the previous year.

The coasting trade was exclusively performed by British vessels during 1903 and 1904.

SUEZ CANAL.

The value of goods imported through the Suez Canal in 1904 amounts to Rs. 3,149,917.43, showing a shortage of Rs. 3,392,148 as compared with 1903. This large difference is accountable for the large importation of tramway materials in 1903.

Goods exported from Mauritius through the said canal amount to Rs. 234,010 for 1904, against Rs. 2,483,480 for the previous year, a decline of Rs. 2,249,470.

VESSELS WITH CARGOES.

The tonnage of vessels entered with cargoes during 1904 amounted to 345,514, and the tonnage cleared to 271,353, as against 343,983 entered and 273,093 cleared for 1903.

The aggregate tonnage of the coasting trade—dependencies—amounted to 6,639 tons entered and 6,206 tons cleared, against 5,839 tons entered and 5,963 tons cleared for the previous year.

VESSELS TOUCHING AT THIS PORT WITHOUT ENTERING THE HARBOUR.

Ten British steamers, with an aggregate tonnage of 23,454, three French steamers, with an aggregate tonnage of 1,099, and one Italian sailing vessel of 521 tons touched at this port without entering the harbour during the year 1904.

Statement showing number and tonnage of British and foreign sailing vessels and steamers entered and cleared for 1903 and 1904:—

Entered.

—	1903.		1904.		Difference. + Increase. — Decrease.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.
Sailing vessels	81	38,539	77	40,338	— 4	— 1,799
Steamers ...	171	352,998	167	367,826	— 4	— 14,828
Total ...	252	391,537	244	408,164	— 8	+ 16,627

The number and tonnage of steam vessels which entered and cleared from and to all countries *viâ* the Suez Canal, and the value of goods (including bullion and specie), imported into and exported by that canal into and from Mauritius are shewn in the following table:—

SUEZ CANAL.

Years.	Vessels Entered.		Vessels Cleared.		Value of Goods (including Bullion and Specie).	
	No.	Tonnage.	No.	Tonnage.	Imports.	Exports.
					Rs.	Rs.
1900	37	72,122	28	51,780	2,835,100	449,911
1901	38	74,012	24	49,040	3,868,350	892,320
1902	26	50,849	27	52,242	3,887,611	2,189,981
1903	32	65,515	27	53,541	6,542,071	2,483,481
1904	32	71,428	20	42,717	3,149,920	234,010

The first table is a return of all vessels entered and cleared, excluding the coasting trade vessels, *i.e.*, vessels trading with the dependencies which are exclusively dealt with in the second table.

In the table I, the total number of vessels entered and cleared during 1904 show a falling off of 17 in number but an excess of 33,177 in tonnage, as compared with the figures for 1903.

Compared with 1903 the following differences are noted:—

Sailing Vessels.—Shortage of 5 in number, but an excess of 1,141 in tonnage.

Steam Vessels.—Shortage of 12 in number, but an excess of 32,036 in tonnage.

British Vessels.—Shortage of 16 in number, but an excess of 33,898 in tonnage.

Foreign Vessels.—Shortage of 1 in number, but an excess of 279 in tonnage.

Of the 425 vessels which entered and cleared during 1904, five steamers, with an aggregate tonnage of 13,866, called at this port exclusively for the purpose of coaling, showing a difference of 3,082 less in tonnage as compared with 1903.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the dependencies during 1904 was 60, with a tonnage of 12,845, against, during 1903, 63, with a tonnage of 11,802, showing a shortage of three in number but a surplus of 1,043 in tonnage.

SHIPPING.

The shipping for the five years 1900-1904 can be thus summarised:—

Exclusive of Coasting Trade (Dependencies).

—	1900.		1901.		1902.		1903.		1904.

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius. Sugar, of course, rum, vinegar, and soap are manufactured in the Colony. There is a small quantity of tea grown, and there are several factories for the extraction of fibre from the aloe plant, which grows abundantly in the Colony. There does not appear to have been any special incident of interest in connection with local manufactures during the year under review.

The fisheries are protected by special laws and by the creation of Crown reserves, as well as by the establishment of private barachois, by the creation of a close season, and by the prohibition of the capture of an illegal size of fish and the prohibition of illegal nets.

There are 11 private barachois or enclosures communicating with the sea, duly registered under Ordinance No. 42 of 1881. These private barachois are walled ponds or "fish paddocks,"

The following is another classification of the offences reported:—

Offences against the person	8,954
Prædial larceny	271
Offences against property other than prædial larceny	4,380
Other offences	10,391
	23,996

Prisons.

At the end of the year there were three prisons in Mauritius, the Central Prison at Beau Bassin, the Port Louis Prison, and a District Prison at Souillac in the District of Savanne.

Beau Bassin and Port Louis.

The total number of prisoners admitted to prison after conviction during the past year was 4,629 males and 215 females.

These numbers show a decrease of 1,014 males and an increase of 3 females as compared with the returns for 1903, and is for males the lowest on record for the past two years.

2. The numbers committed under the different headings, compare with the previous year as follows:—

Year.	Debt.	Non-payment of fine and costs.	Safe custody till trial or for want of security.	Purposes of penal imprisonment.
1904 ...	8	1,438	2,113	3,398
1903 ...	4	1,503	2,409	4,348

3. There is a decrease of 158 prisoners previously convicted as compared with the number so convicted in 1903.

Under the classification of "Duration of Sentences," a decrease is to be noticed under all headings except:—

Under sentences of five years or more—

1904	22
1903	19
Increase of	3

compared with 1903.

It will be observed that of serious offences reported to, or detected by, the police, there were 2,121 cases, for which 2,682 persons were charged, and 1,894, or 70·62 per cent., either convicted or committed to Assizes.

The amount of property declared to have been stolen was Rs. 19,328.24, of which Rs. 10,332.89, or 53·46 per cent., was recovered by "All Agencies," including police, and Rs. 8,659.30, or 44·81 per cent., by "Police only."

The following return records all serious offences reported to, or detected by, the police, which formed the subject of enquiries, and in which no persons were charged:—

Offences.	No of cases.	No. of persons arrested on suspicion.	Amount of Property alleged to have been stolen.	Amount of Property recovered.	
				By all Agencies.	By Police only.
			Rs.	Rs.	Rs.
Murder, including parricide, wife murder, and poisoning causing death ...	1	2	—	—	—
Attempt at foregoing murder, and poisoning not causing death	8	44	—	—	—
Other offences against the person	6,252	67	—	—	—
Larceny at night by breaking, or with violence to the person	310	58	26,783.29	566.80	216.75
Praedial and other larcenies, including cheating, embezzlement and swindling ...	2,546	274	82,409.25	12,158.89	5,056.22
Removing, receiving, or possessing stolen property	23	8	—	205.56	68.25
Arson and other malicious injuries to property	30	14	—	—	—
Other offences against property...	270	4	—	—	—
All other offences not included above	25	2	—	—	—
Total	9,465	473	109,192.54	12,931.25	5,341.22

The total number of fires which formed the subject of police investigation in 1904 was 298, and the total estimated value of property destroyed was Rs. 54,025.86.

The results in the Industrial School have been, unfortunately, very unsatisfactory in comparison with 1903. This was almost entirely due to an insufficiency of orders for the carpenters, tinsmiths, and basket makers, the shoemakers alone being constantly employed. The trades taught were the same as in 1903. The earnings amounted to Rs. 3,561, against Rs. 5,472 in 1903, showing a decrease of Rs. 1,911. The total cost of maintaining and guarding the boys in 1904 amounted to Rs. 13,563, as compared with Rs. 14,141 in the previous year, and the average cost per boy was Rs. 263, against Rs. 228 in 1903, showing an increase of Rs. 35 per head for 1904.

SAVINGS BANK.

The savings deposited at the Government Savings Bank, at 3 per cent. interest, amounted to Rs. 2,886,780 on the 30th June, 1904, as compared with Rs. 2,723,594 on the same date in 1903, showing an increase of Rs. 163,186.

The following return shows the number of depositors and the amount standing to the credit of the general and the Indian population at the end of the years 1902-3 and 1903-4:—

—	1902-3.		1903-4.	
	No. of Depositors.	Amount.	No. of Depositors.	Amount.
		Rs.		Rs.
General Population	15,284	1,584,996	15,946	1,664,198
Indian Population	10,384	1,138,598	10,545	1,222,582
Total	25,668	2,723,594	26,491	2,886,780

The financial position of the bank on 30th June, 1904, was as follows:—

	Rs.
Investments	3,127,295.37
Cash in hand	14,354.57
Receiver-General (interest due by Treasury for 1903-4)	79,911.93
	3,221,561.87
Liabilities due to depositors	2,912,423.82
Balance in favour of Bank	309,138.05

POOR RELIEF.

There is one alms house in the Colony (the Barkly Asylum) and several infirmaries and orphanages. Indoor relief is given at the public hospitals, at the Barkly Asylum (for the aged and infirm poor, and at several convents, infirmaries, and dispensaries. Outdoor relief is given in money, food, clothes, and medicines.

The expenditure of the Poor Law Department for the year 1904 amounted to Rs. 208,256. The number of pauper patients treated at the several hospitals was 14,175, and the number of paupers who received outdoor relief was 2,933. The number of pauper orphans maintained in convents at the expense of the Poor Law Department was 58, and 754 infirm persons were maintained in the several branch infirmaries.

The number of sick paupers who applied at the public dispensaries and who received either medicines or medical treatment was 39,317.

The following table shows the total number of persons who received indoor and outdoor relief in 1904, namely:—

(a.) Recipients of indoor relief:—	
Sick in Country District Hospitals	9,752
Sick in Civil Hospital	4,229
Sick in Convent Hospital, Canal Street, Port Louis	194
Inmates of the Barkly Asylum	725
Lepers at St. Lazare...	146
Inmates of the Lunatic Asylum	479
Orphans in Convents	58
Inmates of Branch Infirmaries	754
(b.) Recipients of outdoor relief:—	
Alimentary and Pecuniary	2,933
Medical (Sick at Dispensaries)	39,317
	58,587

There is a leper asylum in one of the suburbs of Port Louis into which 41 pauper lepers were admitted during 1904, 104 remaining there on the 31st December of the same year; and a lunatic asylum, adjacent to the Barkly Asylum of Beau Bassin, in which 388 patients were under treatment at the end of the year.

REFORMATORY.

There were 154 boys committed to the Reformatory in 1904, which shows a large decrease on 1903, when 231 were admitted.

however, follow, the Medical Director writes, that the disease is on the decrease, as the lower number of admissions is due no doubt to the less severe meteorological conditions which prevailed during the year. The spread of the disease will continue so long as the present conditions hold, *i.e.*, widespread poverty, want of sanitary education, deficiency of adequate lodging accommodation for the poor, besides racial and social prejudices, which tend to aggravate these factors.

A few remarks are desirable on the occurrence of an epidemic of tropical ulcers. Towards the end of 1903 the disease, which had existed in a sporadic form, invaded all the low-lying districts of the island, the outbreak reaching its maximum in March, when 620 cases were recorded. A rapid subsidence followed, and few case of the affection were to be met with towards the end of 1904. Only two cases proved fatal out of the 2,890 cases which were treated in the various hospitals and dispensaries.

Plague, as usual, assumed an epidemic form in the second half of the year. Its spread combated by the usual measures—disinfection, evacuation of the premises, isolation of the sick—the disease did not assume such a virulent character as it did in 1903. The following tables gives the course of the disease since its outbreak in 1899:—

Year.	Cases.	Deaths.	Death-rate.
			Per cent.
1899...	1,416	1,117	78·9
1900...	796	593	74·5
1901...	1,093	805	73·6
1902...	506	386	76·3
1903...	1,395	1,035	74·2
1904...	568	449	77·3

Special attention was given to rat destruction during the year, with the result that 30,000 rats were caught and killed in Port Louis alone, the figures for the period May to December standing at 27,620.

Surra.—The 1904 epidemic was less severe than the 1903 one. It did not give rise to nearly so much difficulty in regard to transport, and the sanitary services, on account of which the employment of draught animals is necessary, were not appreciably interfered with. The experiments at Grand River North West were continued, and confirmed the opinion already expressed last year as regards the resistance of cattle and their natural recovery from trypanosomiasis.

Malaria, influenza, and dysentery accounted for fewer admissions, while the plague epidemic has been, next to that of 1902, the lowest recorded hitherto.

The number of admissions in the different hospitals of the Colony amounted to 17,492, showing a diminution of 3,375 in the figures of 1903.

The case mortality, 5·42 per cent., also shows a decrease of ·56 as compared with 1903.

Thirty-seven thousand one hundred and sixty-two (37,162) pauper patients applied at the 28 dispensaries for medical care and comfort.

Malarial fever, as usual, was answerable for the greatest number of admissions to hospital. The figure for 1904 stands at 3,039, against 4,788 in 1903, showing a decrease of 749. The case mortality was 1·20, against 1·94 per cent.

During the year two cyclones were felt at Mauritius. The first was not accompanied by the usual amount of rain, while the rainfall due to the second (in March) was very high. On the other hand, the rainfall was not as equally distributed as in 1903, a large number of dry days being recorded in January, February, April and May, so that, with the higher average temperature and lower humidity prevailing, pools quickly dried and mosquitoes did not consequently propagate as rapidly as in 1903, with the good result already noticed.

Five hundred and five (505) cases of dysentery were admitted during 1904. The decrease on the figures for 1903 is 329. The case mortality, however, increased from 12·7 to 17·2, accountable probably by the fact that only the worst cases resorted to hospital for treatment. The lesser prevalence of the disease is due to the meteorological conditions which prevailed, less manured soil finding access to the water supplies owing to the comparatively less heavy rains.

Enteric fever shows an incidence similar to that for 1903 (15), the case mortality being 33·33 per cent. Five patients died, of whom three had been practically admitted "in articulo mortis."

Besides the 15 cases referred to, there occurred in the general population of the island 128 cases (an increase of 62 over 1903). Of these, 26 proved fatal. This total does not, it is feared, represent the extent of the prevalence of typhoid in the island.

Influenza, next to malaria, accounts for the greatest number of admissions, *i.e.*, 1,036 for 1904, against 1,055 for 1903. The case mortality has also decreased from 2·9 to 2·31.

Tuberculosis.—The number of admissions for that complaint, 1013, shows a decrease of 97 over that for 1903. It does not,

SECONDARY EDUCATION.

Royal College and Schools in connexion.

Secondary education is given at the Royal College with its two preparatory schools, the schools associated with the Royal College and the girls' schools working under the scheme for the higher education of girls.

The number of pupils at the Royal College and its two schools in December were:—

College Proper	260
Curepipe School	74
Port Louis School	43
Total	377

Of these, 255 were paying and 122 free pupils.

The free pupils belonged to the following classes:—

(1) Indigent pupils whose fees have been paid for two years	11
(2) Holders of eleemosynary scholarships ...	25
(3) Scholars and Exhibitioners from primary schools	32
(4) Scholars and Exhibitioners whose free tuition has been extended	21
(5) Holders of scholarships and exhibitions won at the College and associated schools ...	33
Total	122

In the Royal College pupils are prepared for the London Matriculaltion and the Cambridge Senior Local Examinations.

The passing of these examinations qualifies the successful candidates for entrance to the highest classes of the College on the classical and modern sides, respectively.

For the London Matriculation, 8 pupils were presented and 3 passed in the first and 3 in the second division. For the Cambridge Senior, 66 College pupils and 12 outsiders entered; 28 College pupils and 3 outsiders passed.

In each of the highest classes a scholarship is annually given of the value of about £1,000 to enable students to follow some special course of study abroad, in general at some institution in the United Kingdom.

No. 27 determines the procedure to be followed in cases in which public officers have by law to furnish security by mortgage on immovable property for the due discharge of their functions.

No. 31 provides for the raising of a loan under the provision of the General Loan and Inscribed Stock Ordinance, 1887, to meet the cost of the Black River Railway Extension and certain drainage, water, and other public works.

No. 36 is an important piece of legislation. It consolidates and amends all our laws on distilleries.

No. 39 gives power to the Governor, on the advice of the Executive Council, to authorise the execution of military manœuvres in the Colony.

IV.—EDUCATION.

PRIMARY EDUCATION.

In the year 1904 there were 68 Government and 86 grant-in-aid schools in the Colony.

The average number of pupils on the roll for the year at the Government schools was 8,060, and at the grant-in-aid schools 9,088, the average numbers in attendance being 5,545 at the Government, and 6,568 at the grant-in-aid schools.

Of the grant-in-aid schools, 66 were Roman Catholic, 17 Church of England, 2 Presbyterian, and 1 Mahomedan.

In these schools pupils are taught, under six standards, English, French, and Arithmetic, the compulsory subjects for passes in the standards; in addition at the great majority of the schools an extended programme is taught in one or more of the subjects, English, French, Arithmetic, Geography, Elementary Science (for boys), and Needlework (for girls).

Examinations are conducted annually by the Inspectors of Schools, who also pay frequent visits of inspection to the schools during the year.

All the schools are open, without payment of fee, to children of all classes and creeds between the ages of 5 and 16, or in some cases 18.

Religious instruction is imparted to the pupils of Christian creeds in both Government and grant-in-aid schools at hours especially set apart in the curriculum of each school, by the clergy of their various denominations.

Means and Extremes of Meteorological Elements.

The means and extremes of the various meteorological elements for the year 1904 are given below:—

—	Mean.	Highest.	Lowest.
Atmospheric Pressure ...	Ins. 30·086	Ins. 30·356	Ins. 29·486
Air Temperature	72·6°	89·9°	50·9°
Relative Humidity ...	Per cent. 74·8	Per cent. 96·9	Per cent. 39·2
Wind Velocity	M.p.h. 9·6	M.p.h. 44·2	—
Wind Direction	S. 77° E.	--	—
Rainfall	Total. 43·11	—	—

Results of Magnetic Observations.

The magnetographs were at work throughout the year and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1903:—

Declination (west)	9° 14' 9"
Dip (south)	53° 54' 4"
Horizontal Force (C.G.S. units) ...	0·23633
Vertical Force (C.G.S. units) ...	0·32419
Total Force (C.G.S. units)	0·40119

The largest magnetic disturbances occurred on May 12th and 13th, June 15th and 16th, August 3rd and 4th, October 21st, and November 25th.

Miscellaneous Work at the Royal Alfred Observatory.

Actinometric observations were taken on those days on which the sky was free from cloud in the neighbourhood of the sun at or near apparent noon.

Sixty-five earthquakes were recorded by the Milne Seismograph during the year. The ordinates of the seismograms were measured at every hour of Mauritius civil time, for the study of diurnal changes of level.

The sun was observed on 328 days, on seven of which no spots were seen; 545 photographs were taken.

Wind Velocity.

The wind velocity decreased generally, relatively to the normal, from October, 1903, to August, 1904, and then increased; completing a minimum corresponding to the maximum in the abnormality curve of barometric pressure, indicating that the centre of action of the + pressure pulse has shifted northward, decreasing the gradient over Mauritius; the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
M.p.h.	M.p.h.	M.p.h.	M.p.h.
− 0·5	− 1·9	− 2·2	+ 1·0

The corresponding departures from the average of the wind direction, counting from south, were + 11·5°, − 4·1°, + 1·0°, + 6·2°.

Rainfall.

The rainfall abnormality curve rose to a sharp maximum in March and then fell generally to a minimum in December, after a slight rise in July: the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins.	Ins.	Ins.	Ins.
− 3·00	+ 1·24	− 1·85	− 0·97

Sky Glows.

The morning and evening sky glows were not so intense as in 1903.

Zodiacal Light.

The Zodiacal light has also been less noticeable than in former years.

of the year, with, however, a superposed negative wave, culminating in March, due to cyclones in the South Indian Ocean.

The pressure abnormality curve since the end of the year 1901 has been remarkable both for amplitude and regularity: it fell generally from + 0·042 in. in September, 1901, to − 0·090 in. in December, 1902; rose to + 0·062 in. in June, 1904, and then decreased to − 0·036 in. by January, 1905.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–August.	September–December.
Ins. 0·000	Ins. + 0·021	Ins. + 0·026	Ins. + 0·018

Air Temperature.

In the temperature abnormality curve, the gradual approach to a minimum was interrupted by the accentuated depression in October, November, and December, 1903, which created a secondary minimum, the principal minimum occurring in August, 1904.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
− 0·5°	− 1·0°	− 1·3°	− 0·5°

Judging from the curves alone, there is promise of a relatively warm winter in 1905 followed by a still warmer summer in 1905-6.

Relative Humidity.

The departure from normal relative humidity was small during the year, showing no marked wave as in 1902-3; the quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. − 0·2	Per cent. − 0·1	Per cent. − 0·1	Per cent. − 0·6

The daily average of prisoners was 95, and 97 remained in custody at the end of the year. There were 3 deaths from the following causes:—

Dysentery. Phthisis.
Bubonic plague.

The average cost per head during the eight months the prison was open was Rs. 138.51.

The prisoners are employed as follows:—

Outside the prison.—Carting stones for the Public Works Department, cleaning public cells and yards, District Court offices and yards.

Inside the prison.—White-washing cells, wards, and boundary walls, washing prison clothes, cleaning cells and yards, performing latrine services; also as cooks and hospital servants.

COLONIAL REPORTS.

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

ANNUAL.

No.	Colony.	Year.
442	Trinidad and Tobago	1903–1904

X.—GENERAL.

The sugar crop, the mainstay of the Colony, was a short one in 1904, but prices fortunately ruled higher than they have done for a considerable period. They ranged as follows:—

Year.	Month.	Prices.
		Rs.
1904	January ...	7.90
"	February ...	7.80
"	March	8.00
"	April	8.00
"	May	8.50
"	June	9.55
"	July	9.55
"	August ...	8.85
"	September ...	9.90
"	October ...	10.80
"	November ...	11.95
"	December ...	12.15
1905	January ...	12.15
"	February ...	13.30
"	March	13.35
"	April	13.35
"	May	11.10
"	June	11.10

The planter of Mauritius for several years past has had a hard struggle with adversity, his battle at times has been for very existence; but he has been brave in heart and ready in resource, and it is a great pleasure to be able to record now that, for a while at least, fortune smiles again, in a limited measure I may be told, on the sugar industry of the Colony. The crop of 1905, which we have just begun to reap, is an extremely abundant one, and if prices be fair—a question which now agitates the minds of all of us—the year in which I write should be one of prosperity and plenty.

D. C. Cameron,

Acting Colonial Secretary.

July 23rd, 1905.

RODRIGUES.

The Island of Rodrigues, the Magistrate in charge reports, was visited by a somewhat serious cyclone in April, 1904, which did considerable damage to the crops; a severe drought unfortunately followed the cyclone, and agriculture suffered to a large extent in the island during the year under review.

The following statements give in a comparative form the value of the imports and exports, and the revenue and expenditure of the Dependency for the last two years:—

Trade.

Year.	Exports.	Imports.
	Rs.	Rs.
1903	176,675	237,346
1904	201,861	226,190

The following were the principal exports:—

—	1903.	1904.
	Rs.	Rs.
Horned Cattle	4,380	11,160
Goats	22,020	49,188
Pigs	5,875	9,750
Salt Fish	120,345	97,933
Tobacco...	16,380	27,300

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1903	12,155	33,580
1904	12,122	30,706

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL.

The contract with the British India Steam Navigation Company was renewed in 1904 for another year, for a four-weekly service between Mauritius and Colombo. There was also a four-weekly service by these steamers to and from South Africa, which ceased on the 6th April, 1904. Besides the British India Steamers, our mails to and from the East were conveyed by the other British and French steamers.

The Messageries Maritimes Company mail packets, interrupted for some months by a strike at Marseilles, continued their bi-monthly voyages from Marseilles to Mauritius, and *vice versâ*, calling at Aden, Zanzibar, Seychelles, Madagascar, and Réunion. The mails for, and from, South Africa ports were conveyed by the Union Castle steamers and Clan Line steamers.

No. 506.

MAURITIUS.

(For Report for 1904, *see* No. 473.)

THE ACTING GOVERNOR to THE SECRETARY OF STATE.

Government House,
Mauritius,
30th August, 1906.

MY LORD,

I HAVE the honour to transmit herewith the Blue Book of Mauritius for the year 1905, together with a copy of the usual report thereon, prepared by the Acting Colonial Secretary.

2. In forwarding this report I desire to say that the financial situation, which is the result of a series of deficits, is now under control, and with a continuance of economical administration may even become prosperous.

3. The present crop promises to be most abundant, and if fair prices are realised, the position of the sugar industry, on which the revenue is dependent, is likely to become more prosperous than it has been for years.

4. The planters have had to contend with one calamity after another, but I am glad to say that the difficulties have been met in a spirit of confidence, and that the sugar industry is now sufficiently equipped to be almost independent of any recrudescence of the surra epizooty.

I have, &c.,

GRAHAM BOWER.

The Right Honourable
The Earl of Elgin, K.G.,
&c., &c., &c.

1125 Wt 23907 11/06 D & S 5 26061

REPORT ON THE MAURITIUS BLUE BOOK FOR 1905.

I.—FINANCIAL.

The revenue for the financial year 1904-05 amounted to Rs. 10,399,554 as shown by the following comparative statement:—

Revenue.

	Heads of Revenue.	1903-4.	1904-5.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Customs	3,575,826.01	3,567,495.72	—	8,330.29
2	Port, Harbour, Wharf, and Lighthouse Dues.	236,528.32	206,843.90	—	29,684.42
3	Licenses, Excise and Internal Revenue, not otherwise classified.	2,624,936.45	2,464,920.98	—	160,015.47
4	Fees of Court or Office, Payments for Specific Services and Reimbursements in Aid.	238,865.86	239,259.88	394.02	—
5	Post Office and Telegraphs	140,971.41	136,720.36	—	4,251.05
6	Government Railways ...	1,890,104.18	2,657,596.00	767,491.82	—
7	Rent of Government Property.	57,088.36	70,752.16	13,663.80	—
8	Interest	634,660.99	908,899.53	274,238.54	—
9	Miscellaneous Receipts ...	74,041.88	146,902.11	72,860.23	—
10	Land Sales	88.84	164.27	75.43	—
	Total	9,473,112.30	10,399,554.91	1,128,723.84	202,281.23

The increase of revenue as compared with the previous year was mainly due to certain repayments by planters under the "advances in aid" and the "mechanical transport" loans, and to the collection of large arrears of railway revenue.

Expenditure.

The following is a comparative statement of the expenditure for the years 1903-04 and 1904-05:—

	Heads of Expenditure.	1903-4.	1904-5.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
1	Public Debt	945,578.76	1,022,873.25	77,294.49	—
2	Pensions	553,070.25	560,432.73	7,362.48	—
3	Governor and Legislature	80,653.44	94,156.55	13,503.11	—
4	Colonial Secretary... ...	69,063.77	67,066.92	—	1,996.85
5	Receiver General	146,941.71	148,693.26	1,748.55	—
6	Auditor General	59,256.67	55,306.45	—	3,950.22

Expenditure—cont.

	Heads of Expenditure.	1903–4.	1904–5.	Increase.	Decrease.
		Rs.	Rs.	Rs.	Rs.
7	Customs	228,675.19	233,374.12	4,698.93	—
8	Port and Marine	458,706.96	421,132.17	—	37,574.79
9	Observatory...	21,667.97	23,557.13	1,889.16	—
10	Museum	12,067.11	10,571.08	—	1,496.03
11	Registrar General	29,098.66	20,746.46	—	8,352.20
12	Receiver of Registration Dues.	52,227.28	50.188.54	—	2,038.74
13	Post Office	167,851.37	147,637.23	—	20,214.14
14	Woods and Forests ...	133,505.29	143,258.44	9,753.15	—
15	Judicial Departments ...	500,167.23	495,660.43	—	4,506.80
16	Ecclesiastical	143,635.96	152,635.96	9,000.00	—
17	Education	573,356.55	595,299.19	21,942.64	—
18	Medical and Health Department.	735,855.13	750,569.28	14,714.15	—
19	Quarantine	18,435.84	61,948.43	43,512.59	—
20	Poor Law Commission ...	214,470.46	210,321.23	—	4,149.23
21	Police	540,309.21	533,882.01	—	6,427.20
22	Prisons	158,193.03	169,345.25	11,152.22	—
23	Storekeeper General ...	42,167.54	40,683.76	—	1,483.78
24	Immigration	109,997.63	142,376.74	32,379.11	—
25	Dependencies	52,791.93	70,295.14	17,503.21	—
26	Crown Agents	18.104.69	15,258.69	—	2,845.00
27	Writers and Copyists ...	6,716.70	5,855.22	—	861.48
28	Transport	13,257.60	7,925.98	—	5,331.62
29	Miscellaneous	307,848.74	814,182.10	506,333.36	—
30	Charitable Allowances ...	16,646.77	36,793.31	20,146.54	—
31	Interest and Exchange ...	204,723.89	246,252.45	41,528.56	—
32	Military Contribution ...	431,853.92	433,274.21	1,420.29	—
33	Railways	2,407,057.30	1,872,258.06	—	534,799.24
34	Public Works and Surveys	73,228.20	69,010.90	—	4,217.30
35	Public Works, Recurrent...	549,713.84	546,253.61	—	3,460.23
36	Do., Extraordinary ...	144,206.75	24,433.00	—	119,773.75
37	Loan Commission	14,148.00	14,278.98	130.98	—
38	Mare-aux-Vacoas Water Works.	62,422.37	44,733.29	—	17,689.08
39	Drainage Works	23,488.03	24,133.32	645.29	—
40	Secret Service	805.60	526.55	—	278.45
41	Plague Service	342,146.20	186,340.01	—	155,806.19
		10,664,115.94	10,563,521.43	836,658.81	937,253.32

The decrease in expenditure may be attributed to the fact that no railway extensions were undertaken in 1904-05, and also to reduction of expenditure under public works (extraordinary) and plague services.

The expenditure of the year, therefore, exceeded the revenue by Rs. 163,967, and as the Treasury balance on 1st July, 1904, amounted only to Rs. 82,247, a deficit balance of Rs. 81,720 was shown on the 30th June, 1905. Against this is to be set a sum of Rs. 881,961 spent on certain public works out of the general revenue in previous years, which is recoverable from the loan raised by the Crown Agents in London in December, 1905, under Ordinance 31, of 1904. By the transfer of this sum from loan account to the credit of revenue, the deficit will be made good, and the reserve fund will be reconstituted with a sum of fund Rs. 800,241 to its credit.

Position of the Colony at the Close of the Year 1904–5.

	Rs.
At the close of the year 1904-05, the balance in favour of the Treasury was shown as ...	82,247
As the expenditure of the 1904-05 exceeded the revenue by	163,967
A deficit balance of	81,720

is, therefore, shown on 30th June, 1905.

The revenue and expenditure for the last five years, and the Treasury balances at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.	Debit Balance.
	Rs.	Rs.	Rs.	Rs.
1900	9,179,968	8,568,923	1,704,424	
1901–2 ...	9,140,754	9,043,066	1,834,669	
1902–3 ...	9,221,600	9,575,182	1,263,430	
1903–4 ...	9,473,112	10,664,115	82,247	
1904–5 ...	10,399,554	10,563,521	—	81,720

The difference between the revenue and expenditure of 1904-05—Rs. 163,967—being met from Treasury balances, and the repayment from loan account as above explained.

Assets and Liabilities on 30*th June*, 1905.

1. Commissioners of currency:—

	Rs.
Assets	7,025,416
Liabilities	6,876,250
Balance in favour of Commissioners ...	149,166

2. Government savings bank:—

	Rs.
Assets	3,138,360
Liabilities	2,837,662
Balance in favour of bank	300,698

3. Curatelle:—

	Rs.
Assets	465,791
Liabilities	465,791

4. Treasury proper:—

	Rs.
Assets	7,276,578
Liabilities	7,358,298
Deficit	81,720

5. Public debt:—

The public debt stood as follows on the 30th June, 1905:—

(1) Savanne Railway 4½ per cent. Debentures, payable by annual drawings	£37,093	10	0
(2) Moka Railway 4 per cent. Debentures, payable by annual drawings	700	0	0
(3) Consolidated 4 per cent. Debentures, payable by annual drawings	52,000	0	0
(4) Mauritius inscribed stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacos (£34,000)	482,390	16	0
(5) Hurricane Loan 3 per cent. Imperial Guaranteed Stock, under Ordinance 4, of 1892	600,000	0	0
(6) Advances-in-aid Loan, under Ordinance No. 43 of 1902	98,800	0	0
	£1,270,984	6	0

For the redemption of the debentures and inscribed stock, the several sinking funds and cash balances in the hands of the trustees on the 30th June, 1905, amounted to £197,807, the amount duly provided as required by law.

The sum at the credit of the sinking funds on 30th June, 1905, showed an increase of £16,693 on the previous year.

Currency.

Amount of currency notes on 31st December, 1905:—

Issue of 1848 and 1849 (dollars and cents)	£483	16	5
Issue of 1860 (sterling)	3,405	0	0
	£3,888	16	5

Rupee notes, under Ordinance 28, of 1876:—

	Rs.
1. In the Commissioners' vault	...2,699,995
2. In the hands of the public (including the banks and financial officers)... ...	...4,176,250
	6,876,245

CHANGES IN TAXATION.

During the year the imports duties of Customs on tobacco were increased generally by 6 per cent. to cover an equivalent amount of duty levied on cigarette paper, the duty on the latter being converted into an *ad valorem* one.

MUNICIPALITIES.

Statement of the revenue and expenditure of the municipality of Port Louis for year ended 31st December, 1905:—

	Rs.
Balance in hand 1st January, 1905 ...	12,942.68
Revenue during the year	*746,334.88
	759,277.56
Expenditure	*681,563.67
Balance in hand on 31st December, 1905...	77,713.89

The following is a comparative statement of the normal revenue and expenditure for the last five years:—

Year.	Revenue.	Expenditure.
	Rs. c.	Rs. c.
1901	442,854.46	448,214.52
1902	442,825.20	472,875.39
1903	†422,351.45	451,345.77
1904	501,365.27	502,601.14
1905	‡548,138.80	492,785.18

---

* Including advances, deposits, loan of £10,000, &c.

† Not including a loan of Rs. 30,000 for the purchase of the buildings of the Gas Company and of a traction engine for scavenging purposes.

‡ Not including a loan of £10,000 for Electric Lighting plant of the town.

Statement of the debt of the Municipal Corporation of Port Louis on 31st December, 1905, showing provision for payment in 1906:—

Loan.	Amount.	Repayments to be made in 1906.
	£	£ s. d.
Conversion Loan	122,000	1,600 0 0
Electric Lighting Loan	10,000	333 6 8
	Rs.	Rs. c.
Colonial Loan	31,200	7,800.00
Grand River Bridge Loan	12,000	2,000.00
Manure Establishment Loan	22,000	2,000.00
Government Hurricane Loan	90,114	5,766.60
Flood Loan	12,500	4,167.00
Municipality Loan	26,000	2,000.00
Total	193,814	23,733.60

Provision for payment of capital and interest on the above loans has been duly made in the annual budget of the Corporation.

Besides the Municipal Council of Port Louis, which is an elective assembly, there are three township boards—

Curepipe,

Beau Bassin and Rose Hill,

Quatre Bornes,

appointed annually by the Governor to administer the affairs of those places.

BOARD OF COMMISSIONERS OF CUREPIPE.

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	Half-year 1903.	1903-04.	1904-05.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	59,759.18	115,590.13	121,322.70	35,536.20	82,771.72	68,933,62
Expenditure ..	57,108.48	88,426.58	120,286.57	34,261.02	81,158.12	67,729.06

Debt of the Board of Curepipe.

—	Amount.	
	Rs.	Rs.
1. Amount of Debentures issued in 1901 and 1902 for the construction of the Town Hall, in virtue of Ordinance No. 39 of 1900.	70,000	
2. Amount paid off in 1902, 1903, 1904 and 1905 ...	10,000	60,000
3. Government Special Loan repayable in 10 Annuities.	25,000	
Amount paid off in 1905	2,500	22,500
Total		82,500

Provision is made annually for repayment.

BOARD OF COMMISSIONERS OF BEAU BASSIN AND ROSE HILL.

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	1903.	1904.	1905.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	22,705 09	28,252.08	29,342.81	29,270.19	29,345.61	26,644.97
Expenditure ..	25,377.09	27,520.54	33,133.34	29,235.29	26,260.19	28,186.97

Debt.—A loan of Rs. 20,000 was made to the Board by Government on its creation to permit of the works of repairing and draining the streets and lanes of the township being undertaken without delay. This amount is refunded by annual instalments of Rs. 1,500, and the debt is now reduced to Rs. 4,500.

A further loan of Rs. 5,000 was made to the Board in 1901 to be reimbursed after settlement of the loan of Rs. 20,000.

BOARD OF COMMISSIONERS OF QUATRE BORNES.

Comparative Statement of Revenue and Expenditure.

—	1900.	1901.	1902.	1903.	1904.	1905.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	10,060.70	12,827.14	13,627.55	15,460.80	12,724.51	12,549.48
Expenditure ..	11,418.02	10,148.32	13,454.95	14,000.25	13,274.16	12,571.97

Debt. Rs. 615.—This represents the share to be paid to Government by the Board for re-metalling a main road in the township. Provision has been made in the estimates to pay off this debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following statements show in a comparative form the value of the imports and exports for the year 1905:—

VALUE of IMPORTS (exclusive of charges and exchange) and EXPORTS (exclusive of shipping charges), classified according to Circular of December, 1901, of the Secretary of State.

—	Imports.		Exports.					
			Home Produce.		Foreign Produce.		Total.

† Inclusive of amount of specie and bullion exported (Rs. 206,891.50).

TRADE IN MAURITIUS.

The total value of imports into, and exports from, the Colony (exclusive of duty-free goods to and from the Dependencies) for the year ended 31st December, 1905, compared with 1904, can be thus summarized:—

—	1904.	1905.
	Rs.	Rs.
Imports (including charges and exchange)	35,416,624.01	26,944,399.20
Exports (exclusive of shipping charges on local produce and manufacture).	42,005,674.06	34,728,022.20
Total	77,422,298.07	61,672,421.40

accounted for as under:—

—	Imports.		Exports.	
	1904.	1905.	1904.	1905
	Rs.	Rs.	Rs.	Rs.
United Kingdom	11,108,713.75	7,357,173.66	6,288,850.19	2,564,943.65
British Possessions.	17,500,470.21	13,541,654.69	34,701,254.02	31,264,272.53
Foreign Countries.	6,807,440.05	6,045,570.85	1,015,569.85	898,806.02
Total ...	35,416,624.01	26,944,399.20	42,005,674.06	34,728,022.20

2. The total value of imports and exports, from and to the Dependencies, per coast sufferances, is as follows:—

—	1904.	1905.
	Rs.	Rs.
Imports	439,788.54	433,702.42
Exports	412,563.76	473,071.48
Total	852,352.30	906,773.90

3. The aggregate value of trade is, therefore, as under:—

—	1904.	1905.
	Rs.	Rs.
Imports	35,856,412.55	27,378,101.62
Exports	42,418,237.82	35,201,093.68
Total	78,274,650.37	62,579,195.30

4. Excluding the value of exports to, and imports from, the Dependencies, the rate of trade per head of population (*i.e.*, for 1904—383,364 souls, and for 1905—382,787 souls) was:—

—	1904.	1905.
	Rs.	Rs.
Imports (including charges and exchange)	92.26	70.39
Exports (exclusive of shipping charges on local produce and manufacture).	109.42	90.72

5. The value of specie and bullion, imported and exported, is as follows:—

—	1904.			1905.		
	Declared Value.	Charges.	Total.	Declared Value.	Charges.	Total.
	Rs.	Rs	Rs	Rs.	Rs.	Rs.
Imports	1,633,705.60	362,387.14	1.996,092.74	740,568.00	46,968.10	792,936.10
Exports	1,840,336.00	—	1.840,336.00	206,891.50	—	206,891.50
Total	3,474,041.60	363,387.14	3,836,428.74	947,459.50	46,968.10	999,827.60

6. Deducting specie and bullion, the declared value of imports and exports, mentioned in paragraph 1, is as follows:—

—	1904.	1905.
	Rs.	Rs.
Imports	33,420,531.27	26,151,463.10
Exports	40,165,338.06	34,521,130.70
Total...	73,585,869.33	60,672,593.80

7. The amount of duty collected during the years (1st January to 31st December) 1904 and 1905 is as under:—

—	1904.	1905.
	Rs.	Rs.
On Imports...	3,146,871.92	2,918,695.84
On Exports...	636,041.64	526,717.49
Amount collected ...	3,782,913.56	3,445,413.33

	Rs.
(1) The 4 per cent. surcharge produced:—	
In 1904	119,613.26
In 1905	99,085.42
(2) The additional 16 per cent. surcharge produced:—	
In 1904 (2nd to 31st December)	33,310.62
In 1905	329,471.02

Postal Parcels.

8. The declared value of the parcels imported and exported during the past five years 1901 to 1905 is as under:—

—	1901.	1902.	1903.	1904.	1905.
	Rs.	Rs.	Rs.	Rs.	Rs.
Imported ...	214,534.60	231,993.73	224,885.17	297,804.73	263,198·86
Exported ...	19,388.42	20,628.64	28,624.83	33,467.35	42,286.27
Total ...	233,923.02	252,622.37	253,510.00	331,272.08	305,485.13

10. The total value of imports and exports for the last five years 1901 to 1905 is as under:—

Imports and Exports.

Year.	Imports, including Charges and Exchange.	Exports, including Shipping Charges.
	Rs.	Rs.
1901	31,146,760.00	30,617,204·43
1902	30,738,778.11	38,341,695.55
1903	39,269,847.24	37,794,266.75
1904	35,416,624.01	44,545,320.33
1905	26,944,399.20	36,843,046.15

IMPORTS.

11. Dealing with the articles and their values according to the entries for 1904 and 1905 the following results are noticeable. It may be said that there are indications that abnormally large stocks were brought over generally at the end of the year previous to that under consideration.

Acids.

Phosphoric.—The imports for 1905 show a decrease of kilos 42,307 in weight and of Rs. 10,990 in value, as compared with the previous year. The decrease is due to less imports from the United Kingdom.

Ammonia Sulphate.

Kilos 372,004 more were imported in 1905, giving a surplus in value of Rs. 75,283, due principally to imports from the United Kingdom, which provided for a surplus value of Rs. 175,829. Australia shows a shrinkage of Rs. 93,388, and France supplied nil, against Rs. 6,619 in 1904.

Animals.

Asses.—77 asses, valued Rs. 12,424, were imported from the Argentine Republic in 1905, against 314, valued Rs. 41,423, in 1904. Continental India and Australia supplied 96, valued Rs. 4,435, and 123, valued Rs. 20,530, respectively, in 1904, against nil in 1905. The Argentine Republic supplied 18 less in 1905, giving a shortage in value of Rs. 4,035.

Cows and Oxen.—3,276 head, of the value of Rs. 299,219, were received in 1904, against 7,316 head, of the value of Rs. 653,587, in 1905. There is therefore an increase of 4,040 in number and of Rs. 354,368 in value. Oxen are exclusively supplied from Madagascar.

Ponies.—Sandalwood supplied 384, of the value of Rs. 87,074, in 1905, against 191, of the value of Rs. 24,688, in the previous year, showing an increase of 193 in number and of Rs. 62,386 in value.

Horses.—Only three horses, of the value of Rs. 2,776, were imported in 1905, against 1,367, of the value of Rs. 340,108, in 1904. The decrease for this year is of 1,364 head and of Rs. 337,332 in value, arising from short importations from the following countries:—

Countries.	Number.	Value.
		Rs.
Australia	1,108	275,189
Continental India ...	65	19,022
Argentine Republic ...	191	43,121
Total	1,364	337,332

In 1904 a great number of horses were imported to replace those which died of surra, and the importations of 1905 suffered in consequence.

Mules.—1,334 mules, of the value of Rs. 434,918, were imported in 1905, against 1,216, of the value of Rs. 314,320, in 1904. The increase is of 118 in number and of Rs. 120,598 in value. The Argentine Republic shows an increase of 277 head and of Rs. 162,576 in value, while Australia shows a decrease of 116 head with a shortage of Rs. 11,652 in value.

Apothecaries' Wares.

This item shows an increase of Rs. 64,375 in value due chiefly to more imports from the United Kingdom and from France amounting to Rs. 21,247 and Rs. 42,875 respectively.

Apparel, Wearing.

The value of the imports for 1904 amounted to Rs. 139,536, against Rs. 150,899 for 1905, showing a surplus of Rs. 11,363. The increase is from the United Kingdom (Rs. 3,911), Continental India (Rs. 5,954), Austria, China, Pondicherry (Rs. 16,548). Decreases are noticeable under France (Rs. 13,729) and Germany.

Areca Nuts.

Kilos 47,964, valued Rs. 12,493, were received in 1905, against kilos 14,710, valued Rs. 3,691, in 1904, showing an increase both in weight of kilos 33,254 and in value of Rs. 8,802, due principally to more imports from Continental India. Ceylon supplied kilos 3,380, of the value of Rs. 1,153, in 1905, against nil in the preceding year.

Automobiles.

In 1904 four automobiles, of the value of Rs. 31,131, were received from the United Kingdom, and four others, of the value of Rs. 25,474, were received from Germany, aggregating eight in number and Rs. 56,605 in value. In 1905 only one automobile, valued Rs. 4,449, was received from the United Kingdom. There is therefore a decrease of seven in number and of Rs. 52,156 in value.

Bacon and Hams.

Kilos 30,380, of the value of Rs. 36,674, were imported in 1905, almost entirely from the United Kingdom, against kilos 39,647, valued Rs. 46,852, in 1904. This decrease is due principally to imports from Australia amounting to kilos 10,190, valued Rs. 9,839, in 1904, against nil in 1905. There is a small increase from the United Kingdom, while Denmark, Holland, the United States, and France supplied none in 1905, against small quantities imported in 1904.

Bags.

Gunny.—1,156,585 less bags were received in 1905, with a decrease of Rs. 314,173 in value. The decrease is chiefly from Continental India, which supplied 1,153,970 less bags with a smaller value of Rs. 313,765. Australia supplied 2,615 bags, valued Rs. 407, in 1904, against nil in 1905.

Straw.—Madagascar supplied 113,450 less bags, with a shortage in value of Rs. 10,751 compared with 1904.

Beef, Salted.

There is a large decrease both in weight, of kilos 286,734 and in value of Rs. 123,431, due principally to less imports from the United States, which supplied kilos 258,125 less with a difference in value of Rs. 116,338. The United Kingdom shows also a slight decrease both in weight and in value. From Canada kilos 13,550, of the value of Rs. 5,940, were imported in 1904, against nil in 1905. The decrease is principally due to the low price of fresh meat imported from Madagascar.

Beer and Ale.

In casks.—This article is exclusively supplied from the United Kingdom. There is a decrease of hect. 1,474, with a shortage in value of Rs. 30,017.

In bottles.—The imports for 1905 show an increase of litres 16,672, with a surplus in value of Rs. 9,048, due to more supplies from the United Kingdom, France, Germany, and Denmark.

Boats.

Three boats, valued Rs. 575, were received from the United Kingdom and Denmark in 1905, against six, valued Rs. 5,139, in 1904. There is a decrease therefore of three boats in number and of Rs. 4,564 in value.

Books, Printed.

The imports for 1905 were valued at Rs. 24,942, against Rs. 45,492 in the previous year. There is therefore a shortage of Rs. 20,550 in value, due chiefly to less supplies from the United Kingdom, Continental India, and France to the amount of Rs. 15,880, Rs. 2,310, and Rs. 2,632 respectively.

Bran.

The imports for 1905 amounted to kilos 2,096,015, of the value of Rs. 189,322, against kilos 1,819,562, of the value of Rs. 136,382, for 1904, showing an increase both in weight, of kilos 276,453 and in value, of Rs. 52,940, due to more supplies principally from Continental India.

Decreases are noticeable under Australia and the Argentine Republic.

Brassware.

Compared with 1904 the imports show a decrease of kilos 8,593 in weight and of Rs. 11,884 in value, due chiefly to smaller supplies from Continental India, amounting to Rs. 12,262 under the figures of the previous year.

Brass Ornaments.

Compared with 1904, the imports show an increase of Rs. 5,725 in 1905, due principally to supplies from Continental India, which provided for Rs. 8,425 more than in 1904, while slight decreases are noticeable under the United Kingdom and France.

Bullion.

Bullion to the value of Rs. 18,671 was received in 1905, against Rs. 32,802 in 1904. There is accordingly a decrease in value of Rs. 14,131. Bullion was exclusively imported from Continental India.

Butter.

The imports for 1905 amounted to kilos 74,670, of the value of Rs. 135,627, against kilos 66,379, of the value of Rs. 122,900, showing an increase both in weight, of kilos 8,291, and in value, of Rs. 12,727. The increase is from Australia, which provided a surplus of Rs. 47,396, while Denmark shows a substantial decrease of Rs. 29,536. Small decreases are noticed also under France, Italy, and the United States.

Bicycles.

In 1905, 92 bicycles, valued Rs. 10,431, were received, of which the United Kingdom supplied 87, valued Rs. 9,694. In 1904, 107 bicycles, valued Rs. 14,962, were received, of which 93, valued Rs. 13,684, came from the United Kingdom. There is therefore a decrease both of 15 in number and of Rs. 4,531 in value. There is also a decrease in imports from France and the United States.

Cabinet and Upholstery Wares.

The total value of the imports for 1905 amounted to Rs. 57,721, against Rs. 77,166 for 1904, showing a falling off of Rs. 19,445. Decreases are from the United Kingdom (Rs. 10,530), Austria (Rs. 4,957), Continental India, Germany, and the United States. Slight increases are noticeable in the imports from China, Singapore, and France.

Candles.

Composition.—The imports for 1905 amounted to kilos 90,973, of the value of Rs. 59,256, against kilos 93,770, of the value of Rs. 55,071, in 1904, showing a decrease in weight of kilos 2,797, but with an increase of Rs. 4,185 in value. The decreases are from the United Kingdom, Belgium, and France.

Caoutchouc and India-rubber.

Manufactured.—1,712 kilos, valued Rs. 10,528, were received in 1905, against kilos 4,124, valued Rs. 22,610 in 1904. There is a decrease of kilos 2,412 in weight and of Rs. 12,082 in value. This article is exclusively supplied from the United Kingdom.

Cement.

The imports for 1905 show a decrease both in weight of kilos 281,248 and in value of Rs. 10,637. Decreases are noticeable under the United Kingdom and France, amounting to Rs. 7,639 and Rs. 3,479 respectively. Belgium shows a slight increase, while Holland provided for Rs. 1,423 in 1904, against nil in 1905.

Cheese.

In 1905 the importation amounted to kilos 37,035, of the value of Rs. 39,311, against kilos 48,554, of the value of Rs. 46,470 in 1904, showing a decrease both in weight of kilos 11,519 and in value of Rs. 7,159—due principally to Australia which supplied, in 1904, kilos 10,413, of the value of Rs. 8,638, against nil in 1905. Small increases are noticeable under the United Kingdom, Germany, and Holland, while France shows a slight decrease.

Clocks and Watches.

The value of the imports for 1905 amounted to Rs. 27,593, against Rs. 36,664 in 1904, showing a decrease of Rs. 9,071. The decreases are from France, Germany, United States, and Switzerland, amounting to Rs. 4,188, Rs. 1,415, Rs. 1,544, and Rs. 1,638 respectively.

Coals.

The importation shows a decrease of 26,811 tons, with a shortage in value of Rs. 1,630,587 as compared with the imports for the previous year. The United Kingdom and Australia show short importations of tons 28,883 and tons 1,274 in quantity and of Rs. 1,484,371 and Rs. 108,413 respectively in value. The importations from Continental India are of Rs. 27,803 short in value, although 3,345 tons more were imported.

Coffee.

The imports for 1905 amounted to kilos 329,524, of the value of Rs. 169,392, against kilos 215,377, of the value of Rs. 99,748, for 1904, showing an increase both in weight of kilos 114,147 and in value of Rs. 69,644—due principally to more imports from Continental India (Rs. 42,504), Aden

(Rs. 4,779), Brazil (Rs. 20,560) and Java. The United States, however, show a slight decrease.

Confectionery.

The value of the imports for 1905 amounted to Rs. 80,279, against Rs. 77,946 for 1904, showing an increase of Rs. 2,333. The increases are from the United Kingdom (Rs. 16,464), Austria (Rs. 5,777), Continental India, Holland, and Belgium, whilst decreases are noted under France (Rs. 3,496) and China. Australia provided Rs. 6,624 for 1904, against nil for 1905. On the other hand, small quantities were imported from Switzerland and Seychelles in 1905, against nil in the previous year.

Copper Sheets and Nails.

Yellow.—The imports for 1905 show a decrease, both in weight (of kilos 15,321) and in value (of Rs. 19,931), due principally to the United Kingdom, which provided a less value of Rs. 21,070, as compared with 1904. France supplied Rs. 139 in 1905, against nil for the previous year.

Cordage.

Coir.—Kilos 118,925, of the value of Rs. 27,898, were imported in 1905, against kilos 67,398, of the value of Rs. 13,280, in 1904—there is an increase, therefore, of kilos 51,527 in weight and of Rs. 14,618 in value. The increase is principally from Continental India (Rs. 12,444) and also from the United Kingdom. Hong Kong provided Rs. 3,672 in 1905, against nil in the previous year.

Hemp.—Kilos 20,902, of the value of Rs. 15,601, were imported in 1905, against kilos 36,801, of the value of Rs. 18,465, for the previous year; there is a decrease both in weight of kilos 15,899 and in value of Rs. 2,864. The United Kingdom and Continental India show decreases of Rs. 5,531 and Rs. 1,253 respectively. Hong Kong provided Rs. 3,850 in 1905, against nil the previous year.

Cordials and Liquors.

The importations for 1905 show an increase both in quantity of litres 2,086 and in value of Rs. 9,817, due principally to more imports from France of Rs. 9,816 than in 1904.

Corks and Bungs.

The imports for 1905 show a decrease in number of 571,168, but a surplus in value of Rs. 4,452, due to the higher prices in 1905 in the importations from France.

Corn, Grain and Meal.

Barley.—The imports for 1905 show a decrease both in weight of kilos 10,337 and in value of Rs. 1,706, due to less importations from Continental India.

Beans.—The imports for 1905 amounted to kilos 118,159, of the value of Rs. 19,306, against kilos 177,746, of the value of Rs. 30,284, showing a decrease both in weight of kilos 59,587 and in value of Rs. 10,978, due principally to less importations from France of Rs. 16,460 in value as compared with 1904. The United Kingdom and China show slight decreases as well. Increases are noticeable from Réunion Island (Rs. 5,315), Australia, Continental India, and Madagascar.

Dholl.—Decrease both in weight of kilos 55,995 and in value of Rs. 2,644.

Gram.—Increase both in weight of kilos 284,023 and in value of Rs. 35,443.

Lentils.—Increase both in weight of kilos 271,245 and in value of Rs. 37,086.

Dholl, gram and lentils are exclusively imported from Continental India.

Maize.—Kilos 7,500, of the value of Rs. 583, were imported from Continental India in 1904. In 1905 the importations amounted to kilos 791, of the value of Rs. 56, from Continental India, and kilos 30,758, of the value of Rs. 2,864, from Madagascar. The increase in the importation amounts to kilos 24,049 in weight and of Rs. 2,337 in value.

Oats.—Compared with 1904, the imports for 1905 show an increase in weight of kilos 6,968 and of Rs. 72,929 in value. From Australia there is a falling off of kilos 550,877. Continental India and the Argentine Confederation show increases of kilos 2,277,539 and kilos 253,290 in weight and of Rs. 66,611 and Rs. 42,711 respectively in value. No imports were received from Cape Colony in 1905, against kilos 585,254, of the value of Rs. 43,543, in 1904.

Peas.—The imports for 1905 amounted to kilos 203,164, of the value of Rs. 33,584, against kilos 141,030, of the value of Rs. 16,299 for 1904. The increase is of kilos 62,134 in weight and of Rs. 17,285 in value. Decreases are noted from the United Kingdom and Continental India, amounting to Rs. 1,027 and Rs. 1,563 respectively. Madagascar shows an increase of Rs. 18,750.

Rice.—Compared with 1904, the imports for 1905 show a falling off of kilos 20,793,304 in weight and of Rs. 2,327,067 in value, explained as under:—

Continental India.

Shortage of kilos 19,107,639 in weight and of Rs. 2,084,988 in value.

China.

Excess of kilos 4,936 in weight and of Rs. 1,914 in value.

Madagascar.

Shortage of kilos 181 in weight and of Rs. 75 in value.

Straits Settlements.

Shortage of kilos 1,357,420 in weight and of Rs. 205,349 in value.

Singapore.

Supplied kilos 333,000 of the value of Rs. 35,742 in 1904, against nil in 1905.

Wheat.—In 1905 kilos 432,000, of the value of Rs. 46,382, were exclusively supplied from Continental India. In 1904, Australia and Continental India supplied kilos 15,707 and kilos 331,500 in weight, of the value of Rs. 2,133 and Rs. 31,824 respectively, being an increase of kilos 84,793.

Wheat Flour.—The imports for 1905 show a large shortage both in weight of kilos 3,392,204 and in value of Rs. 518,085, due to less imports from Continental India, which supplied kilos 3,931,061 less, giving a shortage in value of Rs. 547,216. From Australia there is an increase amounting to Rs. 29,370 in value.

Cotton Manufactures.

Coloured.—The imports for 1905 show a decrease of Rs. 72,805 in value as compared with 1904. Decreases are to be noted from the United Kingdom (Rs. 72,431), Continental India (Rs. 5,510), Austria (Rs. 996), Pondicherry (Rs. 15,686), and Switzerland (Rs. 13,923).

Belgium, France, Germany, and Italy show increases of Rs. 14,872, Rs. 8,086, Rs. 12,385, and Rs. 417 respectively.

Plain.—The imports for 1905 show an increase of Rs. 1,626. The United Kingdom shows a surplus of Rs. 29,001, while decreases are noted under Continental India and France amounting to Rs. 12,156 and Rs. 16,840 respectively. Belgium provided Rs. 1,659 in 1905, against nil in the previous year.

Thread for Sewing.—There is a decrease of kilos 26 in weight with a surplus of Rs. 5,787 in value, due to the difference in price in the thread imported from the United Kingdom.

Wool.—The value of the imports for 1905 amounted to Rs. 8,065, against Rs. 1,074, showing an increase of Rs. 6,991. The United Kingdom provided a surplus of Rs. 2,202. No cotton wool was received in 1904 from Continental India, whilst in 1905 the importation was of the value of Rs. 4,786.

Earthen and China Wares.

Compared with 1904 the imports show an increase of Rs. 13,603; the increase is from France (Rs. 28,998). Decreases are noted from the United Kingdom (Rs. 7,488), Germany (Rs. 4,498), Continental India, Austria, and China.

Fireworks.

The imports for 1905 show a falling off of Rs. 6,750, due principally to China, which provided a less value of Rs. 3,807. Decreases are also noted from the United Kingdom, Germany and Hong Kong.

Fish.

Dried or Salted.—There is a decrease both in weight of kilos 203,686 and of Rs. 183,240 in value, due chiefly to Cape Colony, which supplied kilos 30,702 less, giving a shortage of Rs. 206,763 in value as compared with 1904. Increases are noted under the United Kingdom (Rs. 7,837), Madagascar (Rs. 18,736), France, Newfoundland, the United States, and Zanzibar. Nova Scotia provided Rs. 1,284 in 1905, against nil in the previous year. Slight decreases are noted from Seychelles, China, and Canada.

Pickled.—Compared with 1904, the imports in 1905 show a decrease of kilos 28,349 in weight, but a surplus of Rs. 5,765 in value. Canada shows a falling off of kilos 58,230 in weight and of Rs. 8,798 in value. Nova Scotia shows a shrinkage of kilos 8,476 in weight, with an overvalue of Rs. 1,444. The United Kingdom and the United States show increases in weight of kilos 10,849 and kilos 31,158, and in value of Rs. 6,383 and Rs. 7,402 respectively.

Fruits, Dried.

Pistacchio Nuts.—The imports for 1905 show an increase of kilos 23,194 in weight and of Rs. 5,864 in value, due principally to Madagascar, which supplied kilos 29,737 more, giving a surplus in value of Rs. 6,434 as compared with the previous year.

Ghee.

This article is exclusively imported from Continental India, which supplied kilos 33,020 less, with a shortage in value of Rs. 22,288.

Glass.

Window.—5,816 metres less were imported in 1905, of the decreased value of Rs. 6,362. The decrease is due chiefly to less supplies from Belgium.

Glassware.—The value of the imports for 1905 amounted to Rs. 73,711, against Rs. 73,739 in 1904. The United Kingdom and Belgium show decreases of Rs. 8,729 and Rs. 2,630. Increases are noted under Austria, France, and Germany, amounting to Rs. 1,605, Rs. 4,100, and Rs. 5,812 respectively.

Haberdashery.

The value of the imports for 1905 amounted to Rs. 535,828, against Rs. 747,963 for 1904, showing a falling off of Rs. 212,135. The decreases are under the United Kingdom (Rs. 117,626), France (Rs. 72,150), Continental India (Rs. 10,751), China (Rs. 4,761), Austria, Japan, Pondicherry, and Switzerland. Slight increases are noticeable under Hong Kong, Belgium, Germany, Holland, Turkey, and the United States.

Hardware and Cutlery.

The imports for 1905 amounted to Rs. 564,804, against Rs. 998,372 for 1904, showing a large falling off of Rs. 433,568, due chiefly to less supplies of tramway material from the United Kingdom, which sent us goods to a smaller value of Rs. 432,976 in 1905. The United States show a falling off of Rs. 4,668 as well. France and Germany show slight increases of Rs. 4,161 and Rs. 2,079 respectively.

Hats.

Felt.—Compared with the previous year, the imports for 1905 show a decrease of 13,591 in number and of Rs. 15,101 in value. The United Kingdom, Austria, France, and Italy show decreases of Rs. 4,179, Rs. 1,624, Rs. 4,440, and Rs. 4,858 respectively.

Straw.—23,345 less hats were received in 1905, giving a less value of Rs. 33,783, due principally to less imports from the United Kingdom amounting to Rs. 37,502. From Madagascar 24,026 hats, of the value of Rs. 3,955, were received in 1905, against nil in the previous year.

Hay and Straw.

There is an increase in value of Rs. 17,925, as compared with 1904, due principally to the Argentine Republic, which provided a surplus value of Rs. 27,203, while Australia shows a shrinkage of Rs. 8,798.

Hemp, Undressed.

Kilos 4,712 less were imported in 1905, giving a shortage in value of Rs. 4,256, due principally to less imports from the United Kingdom.

Hides.

Raw and Salted.—5,807 of the value of Rs. 5,457 were imported from Madagascar in 1905, against nil in the previous year.

Hulls of Vessels.

Abandoned.—No hull was abandoned in 1905, against two, of the value of Rs. 4,450, for the previous year.

Iron.

Nails.—There is a decrease both in weight of kilos 29,738 and in value of Rs. 9,385, as compared with the previous year. The decrease is from the United Kingdom (Rs. 10,311), Continental India, France, and Germany. Belgium, however, shows an increase of Rs. 4,001.

Sheets.—The United Kingdom supplied kilos 755,913, of the value of Rs. 127,619, in 1905, against kilos 621,670, of the value of Rs. 100,886, in the previous year. There is therefore an increase of kilos 134,243 in weight and of Rs. 26,733 in value. From Belgium were received in 1904 kilos 1,580, of Rs. 22,742, against nil in 1905.

Wrought of other sorts.—The imports of 1905 show, when compared with 1904, a substantial increase both in weight of kilos 565,658 and in value of Rs. 86,696, due chiefly to more supplies from the United Kingdom, which supplied tons 514, valued Rs. 86,515, in the previous year, against tons 1,031, of the value of Rs. 167,764 in 1905. In 1905 Belgium supplied tons 45, of the value of Rs. 4,629, against nil in the previous year.

Jewellery.

The imports for 1905 amounted to Rs. 58,992, against Rs. 72,819 for 1904, showing a shrinkage of Rs. 13,827. The United Kingdom, Continental India, Germany, Pondicherry, and Switzerland show decreases of Rs. 3,666, Rs. 4,699, Rs. 1,511, Rs. 3,427, and Rs. 1,350 respectively.

Lard.

Kilos 389,706, of the value of Rs. 185,309 were imported in 1905, against kilos 348,888, of the value of Rs. 190,428, in 1904.

There is, therefore, an increase in weight of kilos 40,818 with a falling off in value of Rs. 5,119. The difference is due to more imports from China, which supplied kilos 100,812 in excess of 1904, with a surplus in value of Rs. 39,331 only. Denmark provided a surplus in value of Rs. 3,977. Australia supplied in 1905 kilos 10,983, of the value of Rs. 6,249, against nil in 1904, while from Austria kilos 21,320, of the value of Rs. 16,497, were imported in 1904, against nil in the previous year. Decreases are noted from France and the United States, amounting to Rs. 27,163 and Rs. 11,215 respectively.

Leather.

Wrought—Boots and Shoes.—40,888 pairs less were imported in 1905, giving a shrinkage in value of Rs. 15,279 as compared with 1904. Decreases are from the United Kingdom, Continental India, and France, amounting to Rs. 2,771, Rs. 4,463, and Rs. 5,581 respectively.

Of other sorts.—The value of the imports for 1905 amounted to Rs. 61,023, against Rs. 83,054 for 1904, showing a shrinkage of Rs. 22,031, due principally to France, which provided Rs. 18,667 less than in 1904. The United Kingdom shows also a decrease of Rs. 3,564.

Lime.

Phosphate of.—Kilos 50,000, of the value of Rs. 6,800, were imported in 1904, against kilos 127,397, of the value of Rs. 17,148 in 1905. There is an increase of kilos 77,397 in weight and of Rs. 10,348 in value in 1904.

Sulphate.—Kilos 30,000, of the value of Rs. 4,073, were received from France in 1904, against nil in 1905.

Superphosphate.—The United Kingdom supplied in 1905 kilos 201,600, of the value of Rs. 9,766. In 1904, the United Kingdom and France supplied kilos 462,280 and kilos 103,400, of the value of Rs. 27,188 and Rs. 5,770 respectively. The imports show, therefore, a decrease of kilos 364,080 in weight and of Rs. 23,192 in value, as compared with the imports for the previous year.

Linen Manufactures.

Canvas.—The imports for 1905 amounted to kilos 12,548, of the value of Rs. 22,364, against kilos 27,554, of the value of Rs. 36,253, showing a decrease both in weight of kilos 15,006 and in value of Rs. 13,889, due principally to less imports from Continental India.

Machinery and Millwork.

Machinery for Millwork.—The imports for 1905 amounted to kilos 535,721, of the value of Rs. 268,428, against kilos 540,344, of the value of Rs. 294,381, for 1904, showing a decrease of kilos 4,623 in weight and of Rs. 25,953 in value. The United Kingdom shows an increase of kilos 1,382 in weight but a falling off in value of Rs. 28,187, while France shows a decrease of kilos 4,620 in weight but with a surplus in value of Rs. 734. In 1904 Germany and Holland supplied kilos 1,316, of the value of Rs. 1,372, and kilos 2,456, of the value of Rs. 1,810, respectively, against nil in the previous year. Belgium and the United States supplied in 1905 kilos 1,659, of the value of Rs. 990, and kilos 782, of the value of Rs. 3,332, against nil in the previous year.

Automobiles, Tramway Materials, Accessories, Wire Rope, &c., for Agricultural Purposes.

The value of the imports for 1905 aggregated Rs. 256,821, which are as follows:—Rs. 44,466, value of four locomotives; Rs. 18,603, value of five motor cars; and Rs. 193,752, value of kilos 1,378,999 tramway material, accessories, wire rope, &c., for agricultural purposes; against for 1904 kilos 2,833,885, of the value of Rs. 430,063. There is, therefore, a decrease of Rs. 173,242 in the value of the importations.

The following table is a comparative statement of the amount imported from each country, with the rate of importation for the two years 1904 and 1905, during which period German goods head the list.

—	1904.		1905.	
	Value.	Rate.	Value.	Rate.
	Rs.	Per cent.	Rs.	Per cent.
Germany	258,866	60·2	151,488	59
Belgium	67,347	15·7	42,795	17
United Kingdom	33,712	7·8	25,914	13·5
France	7,240	1·7	26,816	10·5
Holland	62,897	14·6	—	—

Manure.

Guano.—Compared with 1904, the imports for 1905 show a shrinkage in weight of kilos 684,550, and in value of Rs. 1,922. From Seychelles, there is a falling off of kilos 836,880 in weight, and of Rs. 25,389 in value. The United Kingdom supplied kilos 277,330, valued Rs. 30,442 in 1905, against nil in the previous year, while from the Argentine Republic kilos 125,000, valued Rs. 6,975, were imported in 1904, against nil in 1905.

Of other sorts.—The imports for 1905 show, when compared with 1904, a decrease in weight of kilos 474,345, and in value of Rs. 32,822. Decreases are from the United Kingdom (Rs. 14.048), Continental India (Rs. 1,505), France (Rs. 12,661), and Ceylon (Rs. 16,462). Australia and Germany provided Rs. 14,104 and Rs 8,674, respectively, in 1904, against nil in 1905, while importations amounting to Rs. 8,407 were received from Holland in 1905 against nil in 1904. The Argentine Republic and Belgium show increases of Rs. 25,870 and Rs. 255, respectively.

Margarine.

The imports for 1905 show an increase both in weight of kilos 9,029 and in value of Rs. 6,451, due to more imports from the United Kingdom (Rs. 5,983), Denmark, Germany (Rs. 5,053), and the United States (Rs. 2,919). There is, however, a falling off of Rs. 8,336 from Holland.

Matches.

Eighteen thousand one hundred and nineteen gross more were imported in 1905, with a surplus in value of Rs. 13,844, due principally to imports from Japan, which provided a surplus value of Rs. 18,498. Decreases are from Sweden and Germany, amounting to Rs. 3,718 and Rs. 6,701, respectively. Imports valued Rs. 5,008 were received in 1905 from Austria against nil in the previous year.

Meat.

Fresh frozen.—The value of the imports for 1905 as compared with 1904 gives the following result:—

Cows and oxen.—Increase of Rs. 24,980.

Sheep.—Decrease of Rs. 35,741.

Swine.—None imported in 1905 against Rs. 23,739 for 1904.

Frozen meat is exclusively received from Australia.

Military Articles.

The imports for 1905 amounted to Rs. 1,062,000 against Rs. 1,663,811 for 1904, showing a decrease of Rs. 601,811 due chiefly to the United Kingdom, which provided Rs. 599,233 less. Arabia supplied Rs. 2,565 in 1904 against nil in 1905.

Musical Instruments.

Compared with the previous year the value of the imports for 1905 shows an increase of Rs. 8,713, due principally to more supplies from France.

Oil.

Castor.—A decrease is noticeable both in weight of kilos, 23,913, and in value of Rs. 8,347. This article is exclusively supplied from Continental India.

Cocoanut.—The imports for 1905 show a decrease both in quantity of hectolitres 1,962, and in value of Rs. 36,876. Seychelles supplied hectolitres 957 less, giving a shortage in value of Rs. 12,602. Hectolitres 1,005, of the value of Rs. 24,277, were imported from Continental India in 1904 against 20 litres in 1905.

Gingeley.—Kilos 50,648 more were received in 1905, giving a surplus in value of Rs. 12,740, due chiefly to more supplies from Continental India.

Mustard.—This article is exclusively imported from Continental India, and shows a decrease of kilos 382,221 in weight, and of Rs. 123,343 in value as compared with the previous year.

Petroleum.—The imports for 1905 amounted to hectolitres 7,684, of the value of Rs. 121,477, against, for 1904, hectolitres 29,583, of the value of Rs. 513,824, showing the large decrease of hectolitres 21,899 in quantity, and of Rs. 392,347 in value, due to short supplies from the United States and Russia, amounting to hectolitres 8,366 and hectolitres 6,061, giving shortage in value of Rs. 168,585, and Rs. 115,255 respectively. From Sumatra no supply was received in 1905, against hectolitres 7,481, of the value of Rs. 118,708, for the previous year.

Pistacchio.—Kilos 124,293 more, giving a surplus in value of Rs. 78,183, were received in 1905. Continental India and Pondicherry show increases amounting to Rs. 74,474 and Rs. 3,819, respectively, in value.

Of other sorts.—The value of the imports for 1905 shows a decrease of Rs. 57,882, due principally to short supplies from the United States, which provided Rs. 61,972 less than in 1904. Slight decreases are also noted under France and Continental India. From the United Kingdom there is an increase of Rs. 11,252. Imports amounting to Rs. 2,876 were received from West Africa in 1904 against nil in 1905.

Onions and Garlic.

Kilos 67,286 less, giving a short value of Rs. 8,329 were received in 1905. The decrease is from China and Réunion, which supplied, respectively, Rs. 4,426 and Rs. 3,580 less than in the previous year. Imports amounting to Rs. 1,012 and Rs. 1,021 were received in 1904 from Australia and Ceylon against nil in 1905.

Opium.

Crude.—There is a decrease both in weight of kilos 737·729 grs., and in value of Rs. 17,734, due principally to less imports from Continental India.

Painters' and Dyers' Colours and Materials.

The value of the imports for 1905 amounted to Rs. 87,502 against Rs. 80,062 for 1904, showing an increase of Rs. 7,560; the increase is from the United Kingdom (Rs. 9,529). Germany shows a falling off of Rs. 1,976 however.

Paper, Cigarette.

The imports for 1905 amounted to kilos 9,651·447 grs., of the value of Rs. 62,702, against kilos 5,417·099 grs., of the value of Rs. 29,342 in 1904, showing an increase in weight of kilos 4,234·348 grs., and in value of Rs. 33,360. This article is almost exclusively supplied from France.

Paper Manufactures.

Packing.—The value of the imports for 1905 shows a decrease of Rs. 5,340, due principally to less imports from Belgium, China, France, and Germany.

Printing.—The value of the imports shows a shrinkage of Rs. 11,924 as compared with the previous year, due principally to the United Kingdom, which provided Rs. 8,371 less. From Germany there is a decrease of Rs. 1,196. Supplies amounting to Rs. 1,997 and Rs. 729, respectively, were received from Belgium and France in 1904 against nil in 1905.

Perfumery.

There is a decrease of Rs. 28,345 for 1905, due to France, United Kingdom, Continental India and China, which provided Rs. 22,923, Rs. 3,304, Rs. 1,411 and Rs. 680 less, respectively, as compared with 1904.

Plague Serum.

Imports amounting to Rs. 20,138 were received in 1904 from the United Kingdom against Rs. 1,908 in 1905, showing a decrease of Rs. 18,230. From France imports amounting to Rs. 1,166 were received in 1905 against nil in the previous year.

Pockets (Sugar Bags).

Empty.—This article is exclusively supplied from Continental India, and shows a decrease in importation of 73,000 in number, and of Rs. 17,806 in value.

Pork, Salted.

Compared with 1904 there is a decrease of kilos 13,954 in weight, and of Rs. 10,982 in value. The United Kingdom and the United States show decreases of Rs. 3,614 and Rs. 6,366 respectively.

Postal Parcels.

The value of dutiable articles imported from various countries amounted in 1905 to Rs. 297,805 against Rs. 263,198 in 1904, showing an increase of Rs. 34,607.

Potash.

Nitrate of.—There is an increase of kilos 116,820 in weight, and of Rs. 118,981 in value, due principally to more imports from Continental India.

Sulphate of.—There is an increase in weight of kilos 18,986, and in value of Rs. 1,592. From the United Kingdom there is a decrease amounting to Rs. 16,654, while from France there is an increase of Rs. 5,742. Germany provided Rs. 9,320 in 1905 against nil in the previous year.

Potatoes.

Compared with 1905 the imports for the past year show a decrease of kilos 151,844 in weight, and of Rs. 14,967 in value. Australia, Continental India, China, the Argentine Confederation and Réunion show declines in importation of Rs. 6,286, Rs. 17,272, Rs. 226, Rs. 506, and Rs. 110, respectively. From France there is an increase of Rs. 10,709. The United Kingdom and Ceylon supplied small quantities in 1904 against nil in 1905, while the United States.provided Rs. 290 in 1905 against nil in the previous year.

Provisions, Preserved.

The value of the imports for 1905 shows a decline of Rs. 45,983 as compared with those for 1904, due to short supplies from the United Kingdom (Rs. 16,550), Australia, China (Rs. 3,969), France (Rs. 4,265), Portugal (Rs. 16,223), Spain, Switzerland and the United States (Rs. 3,056). Belgium provided Rs. 2,288 in 1904 against nil in 1905.

Rattans.

Only kilos 12,862, of the value of Rs. 3,358, were imported in 1905 against kilos 125,129, of the value of Rs. 27,614, in 1904. There is, therefore, a decrease of kilos 112,267 in weight, and of Rs. 24,256 in value. Singapore and Continental India supplied kilos 83,352, of the value of Rs. 20,076, and kilos 10,516, of the value of Rs. 1,883, in 1904 against nil in the past year. From China there is a shortage of kilos 19,399 in weight, and of Rs. 2,297 in value.

Salt.

Only kilos 421,430, of the value of Rs. 20,773 were received from the United Kingdom in 1905, against kilos 2,721,761 of the value of Rs. 91,810 imported in 1904 from the United Kingdom, Aden, and France, the two latter countries supplying, respectively, kilos 812,800, of the value of Rs. 10,630, and kilos 150,000, of the value of Rs. 3,313. The United Kingdom supplied kilos 1,337,481 less, giving a shortage of Rs. 57,090 in value.

Seeds.

Ani.—Exclusively imported from Continental India, which supplied kilos 7,937 more than in 1904, with a surplus in value of Rs. 3,966.

Silk Manufactures.

Satin and Ribbons.—Metres 73,047, of the value of Rs. 56,299, were imported in 1905 against metres 82,623, of the value of Rs. 60,149 in 1904; the decrease is of metres 9,576 in measure and of Rs. 3,850 in value. Decreases are from Continental India (Rs. 5,467), and China (Rs. 9,428) principally. The United Kingdom and France provided Rs. 5,031 and Rs. 4,963, respectively, more than in 1904.

Soap.

Ordinary.—The imports show a decrease in weight of kilos 42,552, and in value of Rs. 14,063, due principally to the United Kingdom, which provided Rs. 14,178 less than in 1904. France shows a small increase.

Soda.

Caustic.—Sixty-three thousand eight hundred and twelve kilos, of the value of Rs. 12,921, were imported in 1905 against kilos 17,543, of the value of Rs. 4,395 in 1904; the increase is of kilos 46,269 in weight, and of Rs. 8,526 in value. Kilos 34,944 of caustic soda, of the value of Rs. 7,184, were imported in 1905 to be used in local manufactures in 1905 at the lower rate of R. 0·30 cts per 1,000 kilos.

The article is exclusively supplied from the United Kingdom.

Nitrate.—Exclusively imported from Chili. The importation thereof shows a decline of kilos 1,047,924 in weight, and of Rs. 132,545 in value, as compared with the previous year.

Specie.

Gold.—Imports amounting to Rs. 79,989 were received from the United Kingdom in 1904 against nil in 1905.

Paper Currency.—Bank notes for a value of Rs. 831,325·30 in 1904 against Rs. 30,600 in 1905, were imported from the United Kingdom.

Silver.—The imports amounted to Rs. 738,265 in 1905, against Rs. 1,051,976 in 1904, showing a decrease of Rs. 313,711. From Continental India there is a decrease of Rs. 307,016. Singapore and Straits Settlements supplied Rs. 2,076 and Rs. 9,901 in 1904, against nil in the past year, while France supplied Rs. 5,282 in 1905 against nil in 1904.

Spices.

Chillies.—There is an increase in weight of kilos 9,177, and in value of Rs. 18,475, due principally to more supplies from Continental India.

Spirits.

Brandy.—Litres 10,362 less, giving a shortage in value of Rs. 20,781, were imported in 1905, due principally to France, which supplied litres 10,495 less, with a shortage in value of Rs. 21,824. Ninety litres, of the value of Rs. 114, were imported from Australia in 1904, against nil in 1905.

Geneva.—Shows a small shortage in the importation chiefly from Holland.

Rum.—Litres 41,077, of the value of Rs. 8,451, were imported in 1905, against litres 83,451, of the value of Rs. 21,804, in the previous year; the decrease is of litres 42,374 in measure, and of Rs. 13,353 in value, due principally to Réunion, which supplied litres 80,270 less, giving a shortage in value of Rs. 20,142; Jamaica shows a slight decrease, but China a small increase. Hong Kong supplied litres 38,182, of the value of Rs. 7,490, in 1905, against nil in the previous year.

Whisky.—Compared with 1904 there is a decrease of litres 4,802 in measure, and of Rs. 1,184 in value, due specially to short supplies from the United Kingdom.

Stationery.

The value of the imports for 1905 amounted to Rs. 119,080, against Rs. 137,437 for 1904, showing a shortage of Rs. 18,357, due to decreases from the United Kingdom (Rs. 7,615), France (Rs. 7,138), Germany (Rs. 3,217), Austria, and China. There are small increase from Continental India and Belgium.

Steel, Unwrought.

Almost exclusively supplied from the United Kingdom, this article shows a falling off in the importations for 1905 of kilos 8,308 in weight, and of Rs. 8,228 in value, as compared with the previous year.

Sulphur, Common.

Kilos 503,390, of the value of Rs. 44,150, were imported in 1905, against kilos 763,711, of the value of Rs. 85,264 in 1904. There is, therefore, a decrease of kilos 260,321 in weight, and of Rs. 41,114 in value. The United Kingdom and France show decreases amounting to Rs. 2,291 and Rs. 38,822 respectively, in value.

Tallow.

The imports for 1905 amounted to kilos 40,684, of the value of Rs. 19,076, against kilos 34,815, of the value of Rs. 18,477, in 1904, showing a surplus of kilos 5,869 in weight, and of Rs. 599 in value. Australia supplied kilos 12,352 more, giving a surplus of Rs. 4,729 in value. The United Kingdom and France show decreases amounting to Rs. 1,559 and Rs. 114 respectively, while Continental India provided Rs. 2,458 in 1904 against nil in 1905.

Tarpaulins.

The importations for 1905 show a decrease of 30 in number, and of Rs. 4,576 in value. This article is exclusively imported from the United Kingdom.

Tea.

The imports for 1905 amounted to kilos 54,675, of the value of Rs. 53,617, against kilos 45,113, of the value of Rs. 56,500 in 1904, showing an increase of kilos 9,562 in weight, but with a decrease in value of Rs. 2,883, due chiefly to difference in the market prices of Ceylon tea. That Colony supplied kilos 48,496, of the value of Rs. 48,941 in 1905 against kilos 34,269, of the value of Rs. 48,670 in 1904, giving an increase of kilos 14,227 in weight, with only Rs. 271 excess of value as compared with 1904. From China there is a decrease of kilos 6,247 in weight and of Rs. 4,384 in value.

Tin Slabs.

Compared with 1904 the imports for 1905 show a decrease of kilos 408 in weight, and of Rs. 3,896 in value. From the Straits Settlements there is a decrease amounting to Rs. 2,432. The Cape Colonies provided Rs. 2,038 in 1905 against nil in the previous year. From Continental India supplies amounting to Rs. 1,976 were received in 1904 against nil in 1905.

The United Kingdom supplied Rs. 297 in 1905 against Rs. 1,822 in 1904.

Tobacco.

Manufactured.—Kilos 37,509 less were imported in 1905, with a shortage in value of Rs. 54,155, due specially to short supplies from the United States.

Cigars.—Kilos 2,760 less were imported in 1905, with a shortage in value of Rs. 7,745. The decreases are specially from Continental India and the United States, amounting to Rs. 6,647 and Rs. 1,027 respectively.

Unmanufactured.—There is a decrease of kilos 9,282 in weight, and of Rs. 6,730 in value, due entirely to short supplies from Continental India.

Tortoise Shell.

The Seychelles supplied kilos 55, of the value of Rs. 1,248, in 1904; kilos 4,010, of the value of Rs. 14,046, were imported in 1905—from this quantity Madagascar supplied kilos 4,000, of the value of Rs. 14,040. The increase, as compared with 1904, is, therefore, of kilos 3,955 in weight, and of Rs. 12,798 in value.

Toys.

The value of the imports for 1905 amounted to Rs. 77,212 against Rs. 41,234 in 1904, showing an increase of Rs. 35,978. The increases are from the United Kingdom (Rs. 5,967), Continental India (Rs. 1,795), China (Rs. 857), France (Rs. 13,681), and Germany (Rs. 13,621).

Turpentine.

Compared with 1904 the imports for 1905 show a decrease of hectolitres 72 in measure, and of Rs. 3,918 in value, due specially to short supplies from the United Kingdom.

Umbrellas and Parasols.

Cotton.—Twenty-nine thousand one hundred and twenty-eight, of the value of Rs. 35,096, were imported in 1904 against 28,744, of the value of Rs. 35,650, showing a decrease of 384 in number, but with Rs. 554 surplus in value. Two thousand nine hundred and seventy-eight more umbrellas were received in 1905 from the United Kingdom, giving a surplus of Rs. 5,452 in value, while from France there is a shrinkage of 2,033 in number, with a shortage of Rs. 3,778 in value.

Vanilla.

Only kilos 13·600 grs., of the value of Rs. 253, were received in 1905 against kilos 748·453 grs., of the value of Rs. 12,230, in 1904. There is, therefore, a decrease of kilos 734·853 grs. in weight, and of Rs. 11,977 in value, due almost entirely to short supplies from the Seychelles Islands.

Varnish.

There is an increase of 81 hectolitres, but with a decrease of Rs. 749 in value. France supplied hectolitres 73 more, but with a shortage in value of Rs. 2,494, due to differences in the market price of this article.

Vermicelli and Macaroni.

Kilos 7,143 more, with a surplus in value of Rs. 3,618, were received in 1905, almost entirely from France.

Vinegar.

Hectolitres 342 more, with a surplus in value of Rs. 4,690, were received in 1905, due to more supplies from France.

Wine.

Claret in casks.—Decrease of hectolitres 939, and of Rs. 31,823 in value. France and Algeria supplied respectively hectolitres 1,058 and hectolitres 325 less, with a falling off in value of Rs. 34,907 and Rs. 9,842. From Spain hectolitres 441 more were received in 1905, giving a surplus in value of Rs. 12,831.

Pontac in casks.—The imports for 1905 show a decrease of two hectolitres, and of Rs. 2,854 in value.

Port in casks.—Hectolitres 65 more were received in 1905, with a surplus in value of Rs. 3,702. Portugal and Spain supplied, respectively, hectolitres 33 more, with a surplus in value of Rs. 2,931, and hectolitres 23 more, with a surplus in value of Rs. 436, as compared with 1904. From France hectolitres nine, of the value of Rs. 334, were received in 1905 against nil in the previous year.

Port in bottles.—There is a decrease of litres 2,030, and of Rs. 3,654 in value. Portugal shows a decrease of litres 1,753, and of Rs. 3,516 in value. Spain shows a decrease of 10 litres only, but with a surplus of Rs. 198 in value.

Sherry in casks.—There is a decrease of 13 hectolitres, with a falling off in value of Rs. 1,567. From Portugal there is a decrease of hectolitres 54, and of Rs. 2,319 in value, while from Spain there is an increase of hectolitres 40, with a surplus of Rs. 726 in value.

Vermouth in casks.—Compared with 1904 there is a decrease of hectolitres two only, with a shortage of Rs. 807 in value.

Vermouth in bottles.—Compared with 1904 there is a decrease of litres 37,847, with a shortage of Rs. 36,872 in value. Vermouth wine is exclusively received from France.

White wine in casks.—One hundred and twelve hectolitres less were received in 1905, giving a shortage in value of Rs. 7,994. From France there is a decrease of hectolitres 64, and of Rs. 5,660 in value. From Spain the decrease is of hectolitres 32, and of Rs. 1,599 in value.

White wine in bottles.—The imports for 1905 show a decrease of litres 110, and of Rs. 2,660 in value. From France litres 452 more were received in 1905, but there is a shortage of Rs. 1,737 in value, due to differences in the market price. Germany supplied 540 litres, of the value of Rs. 911, in 1904 against nil in the past year.

Wood.

Board and planks.—Compared with 1904 the imports for 1905 show a decrease of cubic metres 461, but with an increase of Rs. 151,453 in value. There were received cubic metres 2,092, of the value of Rs. 230,293 from Australia, and cubic metres 68, of the value of Rs. 3,369, from Madagsacar in 1905 against nil in the previous year, while from Sweden cubic metres 965, of the value of Rs. 34,216, were received in 1904 against nil in 1905. From Singapore the imports show a decrease of cubic metres 716, of the value of Rs. 47,733.

Masts and spars.—Compared with 1904 the imports for 1905 show a decrease of 28 in number, and of Rs. 5,409 in value, due chiefly to short supplies from the United Kingdom.

Shingles.—There is an increase of 69,875 in number, and of Rs. 17,946 in value. Continental India, Sweden, and the United States provided 15,000, 248,100 and 250,000, of the value of Rs. 637, Rs. 1,776, and Rs. 2,597, respectively, in 1904 against nil in 1905, while from Madagascar 55,500, valued Rs. 916 were received in 1905 against nil in 1904. There is an increase of 527,475 shingles, giving a surplus of Rs. 22,039 in the importation from Singapore.

Shooks.—This article is exclusively supplied from the United Kingdom, which provided 6,174 bundles less, although there is an increase of Rs. 14,062 in the value of the importations, due to higher prices prevailing at the port of shipment.

Timber.—The imports for 1905 amounted to cubic metres 1,752, of the value of Rs. 174,579, against cubic metres 3,653, of the value of Rs. 288,451 in 1904, showing a decrease of cubic metres 1,901 in quantity, and of Rs. 113,872 in value. There is a large decrease in the importation from the United Kingdom, which supplied, in 1905, only Rs. 197 in value against Rs. 49,885 in 1904, showing a falling off of Rs. 49,688. Australia and Continental India show decreases of Rs. 14,843 and Rs. 31,403 respectively. From Madagascar there is an increase of Rs. 11,600, while from the United States cubic metres 598, valued Rs. 29,258, were received in 1904 against nil in 1905.

Woollen Manufactures.

Blankets.—There is a decrease of Rs. 4,955 in value, due to less imports from Continental India. Small decreases are also noted from France and Holland.

Mixed with cotton and silk.—Metres 91,599 less, giving a shortage in value of Rs. 51,383, were received in 1905. The United Kingdom, Continental India, Belgium, France and Germany show decreases of Rs. 58,436, Rs. 834, Rs. 1,479, Rs. 10,814, and Rs. 3,453 respectively.

EXPORTS.

The principal articles exported from Mauritius are sugar, rum, molasses, cocoanut oil, aloe fibre, and vanilla, the produce of the Colony. The quantities and values exported in the last five years are shown hereunder:—

Articles.	1901.	1902.	1903.	1904.	1905.
Sugar—

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius. Sugar, of course, rum, vinegar, and soap are manufactured in the Colony. There is a small quantity of tea grown, and there are several factories for the extraction of fibre from the aloe plant, which grows abundantly in the Colony. There does not appear to have been any special incident of interest in connection with local manufactures during the year under review.

The fisheries are protected by special laws and by the creation of Crown reserves, as well as by the establishment of private barachois, by the creation of a close season, and by the prohibition of the capture of an illegal size of fish and the prohibition of illegal nets.

There are 11 private barachois or enclosures communicating with the sea, duly registered under Ordinance No. 42 of 1881. These private barachois are walled ponds or "fish paddocks," which, by permission, may be replenished from Government reserves.

Certain parts of the coast are set apart, which are called "reserves," and in which no fishing can take place except by rod and line or by basket net. The protection of these reserves is left to the Inland Revenue Branch of the Receiver-General's Department, consisting of one superintendent, five inspectors, and twenty-five guards. The police have also concurrent jurisdiction in detecting offences under the fishery laws.

The fisheries of the Colony, in so far as the food supply is concerned, have in no way improved during the year. Mauritius is still almost entirely dependent on the Island dependencies of the Colony, and on British and foreign countries and Colonies for the supply of dried, salted, and pickled fish.

The exports of fish and fishing products are chiefly restricted to the "Bambara," or sea slugs, which are not consumed in the Colony, but sent to Hong Kong and Singapore. This industry is chiefly in the hands of the Chinese.

AGRICULTURE AND BOTANY.

There are three botanical stations at different altitudes: the Royal Gardens, Pamplemousses, the Nursery Gardens, Curepipe, and the Réduit Gardens.

(a.) *The Royal Botanical Gardens, Pamplemousses.*

These gardens, dating from the French occupation of the Island, of an extent of 91 arpents, contain a rich flora of tropical and extra-tropical species. In 1905, 179,000 forest plants were sold to the public, and over 87,000 were sent to forest plantations in Crown lands and to public institutions. Also over 28,000 palm and ornamental plants were sent free to the latter. Considerable encouragement was bestowed on re-afforestation by public enterprise in the shape of free transport by rail of all planting material being allowed by the Government.

Sugar-canes selected in other Colonies were introduced. Sisal bulbils, which fell from plants imported 12 years ago from Central America, were sold at low rate to the public, and an interesting start was made in this new line of action by fibre-planters.

(*b.*) *The Nursery Gardens, Curepipe.*

These gardens, of an area of 56½ arpents, are a favourite resort of the public, although the object of the management centres round forest nurseries. Over 275,000 plants were sold to the public or sent to plantations in Crown lands and to public institutions.

Three horticultural apprentices were trained there in 1905, and gave satisfaction. These are selected amongst the best boys from the primary schools, and after a three-year course turn out useful overseers of gardens and plantations.

(*c*) *The Réduit Gardens.*

These form part of the Réduit domain, the residence of the Governor of the Colony. The forest plantations made here in former years supply seeds of useful species (eucalyptus, camphor, sandal, &c.) for propagation in other nurseries.

Statement of Revenue derived from Pas Géométriques leased under "Planting Conditions" of Ord. 19 *of* 1895.

Districts.	Annual Rents.
	Rs.
Pamplemousses	1,433.50

Grand Port	1,615.00
Savanne	1,207.00
Black River	1,704.93
Total	9,340.93

LAND GRANTS.

Lands are granted by the Government by lease and by sale. Lands which are situated on the sea coast beyond the limits of Port Louis, known as Pas Géométriques, can only be leased by public auction, except those forming part of settlements which have been proclaimed as villages. The sales are invariably made by public auction. There is, however, an exception to this rule in cases where lands are desired for charitable, religious, or educational purposes.

No sale of Crown land took place in 1905.

The following is a return showing the Crown lands and barachois in Mauritius and its Dependencies, except Rodrigues, in charge of the Public Works Department, under lease for one year or more during 1905, or paying rent without lease; with rents due or amount received, also arrears of rent for 1905 and previous years still outstanding on the 31st December, 1905.

Coasting Trade (Dependencies).

—	1901.		1902.		1903.		1904.		1905.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total No. and Tonnage of Vessels Entered and Cleared—	62	16,990	63	11,351	63	11,802	60	12,845	55	9,263
2. British Vessels	58	15,642	57	10,721	63	11,802	60	12,845	55	9,263
3. Foreign Vessels	4	1,348	6	810	—	—	—	—	—	—
4. Sailing Vessels	59	12,881	63	11,531	62	11,607	56	12,065	55	9,263
5. Steam Vessels	3	4,109	—	—	1	195	4	780	—	—

The number and tonnage of steam vessels which entered and cleared from and to all countries viâ the Suez Canal and the value of goods (including bullion and specie) imported into and exported by that canal into and from Mauritius are shown in the following table:—

Suez Canal.

Years.	Vessels Entered.		Vessels Cleared.		Value of Goods (including Bullion and Specie).	
	No.	Tonnage.	No.	Tonnage.	Imports.	Exports.
					Rs.	Rs.
1901	38	74,012	24	49,040	3,868,350	892,320
1902	26	50,849	27	52,242	3,887,611	2,189,981
1903	32	65,515	27	53,541	6,542,071	2,483,481
1904	32	71,428	20	42,717	3,149,920	234,010
1905	35	84,975	28	68,734	2,437,479	893,257

The first table is a return of all vessels entered and cleared, excluding the coasting trade vessels, *i.e.*, vessels trading with the Dependencies, which are exclusively dealt with in the second table.

The number of vessels entered and cleared during 1905 shows a falling off of 53 in number and of 69,684 in tonnage, as compared with the figures for 1904.

Compared with 1904, the following differences are noted:—

—	Shortage of		Excess of tonnage.
	No.	Tonnage.	
Sailing Vessels	23	15,978	—
Steam Vessels	30	53,706	—
British Vessels	45	82,062	—
Foreign Vessels	8	—	12,378

Of the 372 vessels which entered and cleared during 1905, one steamer of 2,277 tons called at this port on her voyage to Japan exclusively for the purpose of coaling, showing a difference of four in number and of 11,589 in tonnage short as compared with 1904.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the Dependencies during 1905 are 55 with a tonnage of 9,263, against during 1904, 60 with a tonnage of 12,845, showing a falling off of five in number and of 3,582 in tonnage.

No steamer entered and cleared from and to the Dependencies in 1905, against, in 1904, four of an aggregate tonnage of 780.

The coasting trade has been exclusively performed by British vessels during 1903, 1904, and 1905.

Suez Canal.

The value of goods imported through the Suez Canal in 1905 amounts to Rs. 2,437,478.93, against Rs. 3,149,917.43 in 1904, showing a decline of Rs. 712,438.50.

Goods exported from Mauritius through the said Canal in 1905 amount to Rs. 893,257.07, against Rs. 234,010 for 1904, showing an excess of Rs. 659,247.07.

Vessels with Cargoes.

The tonnage of vessels entered with cargoes during 1905 amounts to 332,236, and the tonnage cleared to 257,787, as against 345,514 entered and a tonnage of 271,353 cleared in 1904.

The aggregate tonnage of the coasting trade—Dependencies—amounts to 4,661 tons entered and 4,602 tons cleared in 1905, against 6,639 tons entered and 6,206 tons cleared for the previous year.

Vessels touching at this Port.

Ten British steamers with an aggregate tonnage of 22,759, one British sailing vessel of 1,733 tons, and one Russian sailing vessel of 973 tons touched at this port without entering the harbour during 1905.

Statement of number and tonnage of British and foreign sailing vessels and steamers entered and cleared for 1904 and 1905:—

TRANSPORTS AND MEN-OF-WAR.

Two British transports and men-of-war visited this port during the past year, viz., the "Sealark," of a registered tonnage of 900; the "Terpsichore," of a registered tonnage of 3,400.

III.—LEGISLATION.

During the session of 1905 forty-four Ordinances were passed, of which the following call for special mention:—

1. Ordinance No. 6 empowers the Medical and Health Director to order the destruction, subject to compensation, of huts infected or suspected to be infected by certain contagious diseases.

2. Under Ordinance No. 10 power is taken to prohibit by Proclamation the importation of any birds, reptiles, goods or articles specified in such Proclamation under pain of forfeiture or destruction of the animal or article illegally introduced.

3. The Lunacy Laws (which await consolidation) are by Ordinance No. 16 amended in certain respects bearing on questions of procedure.

4. Ordinances No. 17 and 27 amend the penalties under our Penal Code (No. 6 of 1883) in cases of attempt at murder, parricide, infanticide, or poisoning, and of assault upon and bribery of public functionaries.

5. By Ordinance No. 19 a harbour fee of two cents per ton of register per month is imposed on vessels abandoned or sold in the harbour and not broken up or fitted for sea within three months. Vessels used as cargo hulks or receiving ships are also subjected to a special duty.

6. The Labour Law of 1878 is amended by Ordnance No. 23 in respect of (1) the refund of expenses incidental to introduction of immigrants, (2) protection against fraud in respect of individual labour contracts, (3) "hospital" liabilities of employers.

7. Ordinance No. 34 vests the Superintendent of Prisons with the direct control of all district prisons, which formerly were under the management of Executive Committees now replaced by Advisory Boards.

8. The drainage system of the whole town of Port Louis is regulated under Ordinance No. 40, which provides for the necessary machinery; the sewerage authority being the responsible head, and the owners of premises within the urban area being liable to contribute towards the expenses and maintenance of the works.

IV.—EDUCATION.

PRIMARY EDUCATION.

In the year 1905 there were 66 Government and 88 Grant-in-Aid schools in the Colony.

The average number of pupils on the roll for the year at the Government schools was 8,510, and at the Grant-in-Aid schools 9,374, the average numbers in attendance being 4,798 at the Government, and 6,112 at the Grant-in-Aid schools.

Of the Grant-in-Aid schools, 66 were Roman Catholic, 19 Church of England, two Presbyterian, and one Mohammedan.

In these schools pupils are taught six standards, English, French, and arithmetic being the compulsory subjects for passes in the standards; in addition, at the great majority of the schools, an extended programme is taught in one or more of the subjects, English, French, arithmetic, geography, elementary science (for boys), and needlework (for girls).

Examinations are conducted annually by the Inspectors of Schools, who also pay frequent visits of inspection to the schools during the year.

All the schools are open, without payment of fee, to children of all classes and creeds between the ages of 5 and 16, or in some cases 18.

Religious instruction is imparted to the pupils of Christian creeds in both Government and Grant-in-Aid schools at hours especially set apart in the curriculum of each school, by the clergy of their various denominations.

SECONDARY EDUCATION.

Royal College, and Schools in connexion.

Secondary education is given at the Royal College with its preparatory schools, the schools associated with the Royal College, and the girls' schools working under the scheme for the higher education of girls.

The number of pupils at the Royal College and its two schools in December were:—

College proper	242
Curepipe School	70
Port Louis School	35
Total	347

Of these 255 were paying and 92 free pupils.

The free pupils belonged to the following classes:—

(1) Indigent pupils whose fees have been paid for two years	7
(2) Holders of eleemosynary scholarships ...	18
(3) Scholars and Exhibitioners from primary schools	14
(4) Scholars and Exhibitioners whose free tuition has been extended	20
(5) Holders of Scholarships and Exhibitions won at the College and associated schools ...	33
Total	92

In the Royal College pupils are prepared for the London Matriculation and the Cambridge Senior Local Examinations.

The passing of these examinations qualifies the successful candidates for entrance to the highest classes of the College on the classical and modern sides respectively.

For the London Matriculation, 12 pupils were presented and six passed.

For the Cambridge Senior, 76 College pupils and 11 outsiders entered; 30 College pupils and 1 outsider passed.

In each of the highest classes a scholarship is annually given of the value of about £1,000 to enable the successful student to follow some special course of study abroad, in general at some institution in the United Kingdom.

Numerous small scholarships, exhibitions, and other awards are given to students in the other classes.

The preparatory schools of the College and the 26 associated schools prepare students for the classes of the College proper.

Religious instruction is given at the College and its two schools, and annual examinations are held in this subject.

HIGHER GIRLS' SCHOOLS.

The girls' schools, in the scheme for the higher education of girls, provide a course of study suitable for girls between the ages of 11 and 17.

The principal subjects taught are English, French, history, geography, mathematics, Latin, music, drawing, needlework, and religious instruction.

Annual examinations are held for these schools, and on the results prizes and certificates are awarded and grants are paid.

The number of these schools working in connection with the Department and earning grants from Government was 30.

The examinations, however, are open to all the girls in the Colony, who are of age to compete, except those who are pupils of the Government and Grant-in-Aid primary schools.

The number of girls who competed was 287; of these 112 obtained certificates.

INDUSTRIAL, TECHNICAL, AND AGRICULTURAL SCHOOLS.

The Government training school for men teachers accommodates about 20 students in training, and that for women about 12 students. At the last examination for teachers six men and seven women from these schools obtained certificates.

Provision was made for the establishment of Grant-in-Aid training schools, but no such school has yet been established.

Eight mechanical engineering apprenticeships, tenable at the Government railway works, and two horticultural apprenticeships, tenable at the Government Botanical Gardens, are awarded every year on the results of competitive examinations.

Agricultural chemistry is taught at the Royal College to special classes of students.

Under the regulations in Code B for the teaching of handicrafts to pupils in the primary schools, seven classes, all in wood-work, were conducted at primary schools during the year.

In Code A, which has been completed (but has not been put in force) provision is made for the teaching of handicrafts by means of a system of apprenticeships to promising students.

A scheme exists, as part of Code A, for the yearly appointment of two students in civil engineering.

V.—GOVERNMENT INSTITUTIONS.

HOSPITALS.

No addition has been made to the number of hospitals and asylums during the year 1905.

The following statement shows the number of patients remaining in the different hospitals on 31st December, 1904, as well as the number of those who obtained admission, who died, who were treated and discharged during 1905, in each of these institutions:—

Hospitals.	Remaining on 31st Dec., 1904.	Admissions.	Deaths.	Total Cases Treated.	Discharged.
Civil	126	6,225	457	6,351	6,183
Port Louis Prisons	3	1,141	7	1,144	1,126
Long Mountain ...	13	594	69	607	592
Poudre d'Or ...	27	1,431	52	1,458	1,433
Flacq	40	1,971	119	2,011	1,974
Grand Port ...	28	2,374	134	2,402	2,376
Savanne	10	944	56	954	927
Barkly Asylum ...	82	3,668	258	3,750	3,646
Lunatic Asylum ...	28	475	36	503	479
Beau Bassin Prisons	18	1,020	30	1,038	1,023
Reformatory ...	—	72	—	72	72
Moka	13	820	49	833	820
Total ...	388	20,735	1,267	21,123	20,651

The number of inmates remaining in the lunatic asylum on the 31st December, 1904, amounted to 414, including one patient admitted on interim order, but subsequently found to be sane by the Commissioners in Lunacy.

The admissions into the institution numbered 116 during 1905. Of these, six were discharged, having been found to be of sound mind by the Board of Commissioners.

Taking into consideration the harmless imbeciles quartered in the Barkly Asylum, the lunatics discharged on probation during the year, and the number of inmates remaining in the lunatic asylum on the 31st December, 1905, the proportion of total insane to the population of the Colony may be estimated at 1·49 per mille, or 1 in 669, as compared with 1 in 655 in 1904.

The sanitary condition of the Colony has not been satisfactory during 1905.

The meteorological conditions which prevailed during that year, viz., an unusually high rainfall, a marked increase over the normal in the degree of humidity and a lower range of wind velocity, are, no doubt, answerable for the higher death-rate recorded, as well as for the large number of admissions into the different hospitals and attendances at the dispensaries.

The hospital records show a very high increase in the number of patients who obtain admission for malaria and dysentery; but it is gratifying to notice that the plague epidemic has been the lowest on record.

The admissions into the different hospitals number 20,735 during the year under review, against 17,492 in 1904.

The proportion of deaths to attacks has increased from 5·42 per cent. in 1904 to 5·52 per cent. in 1905.

Malarial fever accounts for 5,123 admissions, or about one-fourth of the total number of patients admitted, giving an increase of 2,084 over the figure of 1904.

Dysentery is answerable for 1,013 admissions, against 505 in 1904. This high increase in the number of dysentery cases which came under notice might have been anticipated from the high incidence of malaria above referred to.

Enteric fever has given rise to 151 notifications, which number is about the same as that recorded in the previous year, when 143 cases were notified. Thirty-five deaths were reported as due to that disease.

Only eight patients suffering from typhoid fever resorted to the hospitals for relief. Of these, three died.

Influenza showed an incidence similar to that for 1904. It gave rise to 1,039 admissions during the year under review, against 1,036 for the previous year.

The epidemic of ulcers referred to last year, which had greatly subsided towards the latter part of 1904, continued into 1905; but the disease assumed a more sporadic character and its type was besides less severe.

Two hundred and twenty-three cases were admitted into the different hospitals for that ailment.

Tuberculosis is answerable for 1,008 admissions, giving a decrease of five in the number of the previous year, but those hospital figures cannot be taken as a sûre gauge of the prevalence of the disease, which otherwise shows no sign of reduced incidence.

The epidemic of plague in 1905 has been the lowest recorded since the introduction of the disease in 1899, as will be gathered from the following table:—

Epidemic of Plague in **1905.**

Year.	Cases.	Deaths.	Death-rate.
			Per cent.
1899...	1,416	1,117	78·9
1900...	796	593	74·5
1901...	1,093	805	73·6
1902...	506	386	76·3
1903...	1,395	1,035	74·2
1904...	568	449	79·0
1905...	308	251	81·5

The rate of mortality, however, 81·5 per cent., has been the highest on record.

The campaign undertaken by the Health Department against rodents, alluded to in the last report, has been carried on throughout 1905 with unabated vigour. 64,407 rats were destroyed in Port Louis alone, while the number of these animals killed or poisoned in the country districts amounted to 20,362.

The preventive disinfection of premises where plague cases had occurred in previous years was carried out on a large scale, a measure which so far seems to have been attended with most beneficial results.

The surra epizootic assumed a severer character in 1905 than it had done in 1904. The total number of equines reported dead during the year under review stands at 1,007, as against 826 in the previous year. The corresponding figures, so far as bovines are concerned, are 295 and 260.

During the year under review the Colony was visited by an epidemic of small-pox, which fortunately was rapidly got under. The existence of that disease was first established on the 26th of February, but the case detected on that date was not the initial one in the epidemic, as was subsequently ascertained. One hundred and thirty-seven cases were registered, with 16 deaths, or a case mortality of 11·68 per cent.

The epidemic reached its climax in April, when 43 cases occurred, but it gradually subsided, coming to an end in July, during which month the last cases were registered.

In spite of a very minute enquiry into the matter, no definite information could be obtained regarding the origin of the epidemic.

The spread of the disease was effectually checked by the immediate isolation of the patients and by the compulsory vaccination and segregation of the contacts and vaccination of persons inhabiting the contaminated areas. Steps were also taken to further the same object on a large scale by encouraging voluntary vaccination both in Port Louis and the country districts.

POOR RELIEF.

1. There are no poorhouses, in the English sense, in Mauritius, but relief, both indoor and outdoor, is extensively given to the poor.

The indoor relief is given at the public hospitals of the Colony, at the Barkly Asylum, for the aged and infirm poor, and at various convents, infirmaries and dispensaries. The outdoor relief consists of grants of food, money, clothes, and medicines.

2. The expenditure of the Poor Law Department for the year 1905, amounted to Rs. 203,458.11 c.

3. The number of patients treated at the several hospitals was 16,047, and the number of paupers who received outdoor relief was 2,593. The number of pauper orphans maintained in convents at the expense of the Poor Law Commission amounted to 50, and 852 infirm paupers were maintained in infirmaries. The number of sick paupers who applied at the public dispensaries, and who received either medicines or medical treatment, was 50,500.

4. The following table shows the total number of persons who received indoor and outdoor relief in 1905, namely:—

(*a*) Recipients of indoor relief:—	
Sick in country district hospitals	11,435
Sick in Civil hospital	4,302
Sick in Convent hospital, Canal Street ...	310
Inmates of Barkly Asylum	875
Lepers at St. Lazare	163
Inmates of lunatic asylum	495
Orphans in convents	50
Inmates of branch infirmaries	852
(*b*) Recipients of outdoor relief:—	
Alimentary and pecuniary	2,593
Medical (sick at dispensaries)	50,500
	71,575

There is also a leper asylum (St. Lazare) in Port Louis, into which 59 pauper lepers were admitted last year; and a lunatic asylum at Beau Bassin, into which there were admitted 66 males and 41 females, making a total of 107 inmates admitted in 1905.

REFORMATORY.

The admissions show an increase of 100, and the discharges an increase of 79 as compared with 1904.

The daily average number of convicted and unconvicted increased by 8·83, compared with 1904.

The daily average number of admissions increased by ·27 compared with 1904.

Ten escapes took place, showing a decrease of one as compared with those of 1904. Eleven were recaptured, two of whom escaped in 1904.

The total number of admissions into hospital shows an increase of 30, and, therefore, an increase of ·08 in the daily average number of admissions.

The daily average number of sick in hospital shows a decrease of ·90.

There were no deaths during the year. Four took place in 1904.

The total cost of maintaining and guarding the boys was Rs. 13,543.44 c. against Rs. 13,563.69 c. in 1904, showing a decrease of Rs. 20.25 c. as compared with 1904.

The total cost per head on average number of boys detained was Rs. 224.60 c. against Rs. 263.52 c. in 1904, or a decrease of Rs. 38.92 c. per head for 1905.

The earnings amounted to Rs. 3,068.85 c., against Rs. 3,561.70 c. in 1904. The decrease is therefore Rs. 492.85.

The total earnings per head on average number of boys was Rs. 50.89 c. against Rs. 69.19 c. in 1904, or a decrease of Rs. 18.30 c. per head for 1905.

SAVINGS BANK.

The deposits at the Government savings bank, at 3 per cent. interest, amounted to Rs. 2,845,052 on the 30th June, 1905, as compared with Rs. 2,886,780 on the same date in 1904, showing a decrease of Rs. 41,728.

The following return shows the number of depositors, and the amount standing to the credit of the general and the Indian populations at the end of the years 1903-4 and 1904-5.

Number of Depositors and Amount to Credit of General and Indian Populations.

—	1903–4.		1904–5.	
	No. of Depositors.	Amount.	No. of Depositors.	Amount.
		Rs.		Rs.
General Population	15,946	1,664,198	16,299	1,724,622
Indian Population	10,545	1,222,582	9,498	1,120,430
Total	26,491	2,886,780	25,797	2,845,052

The financial position of the bank on 30th June, 1905, was as follows:—

	Rs.
Investments	3,127,295.37
Cash in hand	11,065.07
Receiver-General (interest due by Treasury for 1904-5)	79,079.06
	3,217,439.50
Liabilities due to depositors	2,908,301.45
Balance in favour of bank	309,138.05

VI.—JUDICIAL STATISTICS.

Police, Prisons, and Criminal.

The total effective strength of the police force on the 31st December, 1905, was 714, the actual strength, however, was 711.

The force comprised nine nationalities, but 523 were natives of Mauritius.

Ninety-five constables were enlisted during the year, and nine were dismissed.

Sixty-nine sub-officers and constables resigned, or were discharged on pension or gratuity during the year.

Detection and Repression of Crime.

The number of offences coming to the knowledge of the police during 1905 totalled 22,905, in connection with which 13,050 persons were apprehended or summoned before the magistrates.

The following return will show the nature of the various offences:—

Nature of Offences.	No. of cases.	No. of persons charged.
(*a*) Serious offences reported to, or detected by, the Police, in which persons were charged.	2,533	3,167
(*b*) Serious offences reported to the Police, which, in certain cases, formed the subject of enquiries, but in which no persons were charged.	9,529	°502
(*c*) Minor offences reported to, or detected by, the Police in which persons were charged.	4,427	6,556
(*d*) Minor offences reported to the Police in which no persons were charged.	3,596	—
(*e*) Offences against the Labour Law	1,493	1,498
(*f*) Vagrancy	1,327	1,327
Total	22,905	13,050

° On suspicion.

CASES of CRIMES in which PERSONS were CHARGED.

Offences.	Number of Cases.	Number of Persons Charged.	Number of Persons Convicted or Committed to Assizes.	Number of Persons otherwise disposed of.	Pending.	Amount of Property Stolen.	Amount of Property Recovered.	
							By all Agencies.	By Police Only.
						Rs. c.	Rs. c.	Rs. c.
Murder, including parricide, infanticide, wife murder, &c., and poisoning causing death.	7	17	5	—	12	—	—	—
Attempt at foregoing: and attempt at poisoning not causing death.	8	71	40	6	25	—	—	—
Manslaughter, including wounds and blows causing death...	9	12	7	3	2	—	—	—
Rape, including attempt upon chastity	19	25	21	4	—	—	—	—
Larceny at night by breaking, or with violence to the person.	98	160	112	16	32	6,957.43	1,235.42	1,125.72
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	24	32	14	7	11	—	1,148.22	1,108.17
Prædial or other larcenies, including cheating, embezzlement, and swindling.	1,362	1,604	1,252	228	124	25,701.18	7,463.09	6,272.65
Removing, receiving or possessing stolen property obtained by foregoing larcenies.	301	345	252	69	24	—	4,241.21	3,873.72
Arson and other malicious injuries to property	11	17	15	—	2	—	—	—
All other offences not included in above	694	884	694	134	56	—	—	—
Total	2,533	3,167	2,412	467	288	32,658.61	14,087.94	12,380.26

It will be observed that of the serious offences reported to, or detected by, the police, there were 2,533 cases in which 3,167 persons were charged, and of these 2,412, or 76·16 per cent., were either summarily convicted or committed to assizes.

The amount of property declared to have been stolen was Rs. 32,658·61, of which Rs. 14,087.94, or 43·14 per cent., was recovered.

The following return records all serious offences reported to, or detected by, the police, which formed the subject of enquiries, and in which no persons were charged:—

Offences.	No of cases.	No. of persons arrested on suspicion.	Amount of Property alleged to have been stolen.	Amount of Property recovered.	
				By all Agencies.	By Police only.
			Rs.	Rs.	Rs.
Murder, including parricide, wife murder, and poisoning causing death	3	2	—	—	—
Attempt at foregoing, and attempt at poisoning not causing death	7	5	—	—	—
Other offences against the person	5,954	45	—	—	—
Larceny at night by breaking, or with violence to the person	317	52	19,689.98	1,686.70	1,576.20
Prædial and other larcenies, including cheating, embezzlement, and swindling ...	2,893	360	79,834.31	9,241.44	6,024.02
Removing, receiving, or possessing stolen property	36	17	—	242.23	231.75
Arson and other malicious injuries to property	23	16	—	—	—
Other offences against property...	284	4	—	—	—
All other offences not included above	12	1	—	—	—
Total	9,529	502	99,524.29	11,170.37	7,831.97

The total number of fires, which formed the subject of police investigation in 1905, was 191, and the total value of the property destroyed was Rs. 44,143.30

The following is another classification of the offences reported:—

Offences against the person	8,277
Prædial larceny	345
Offences against property other than prædial larceny	5,120
Other offences	9,163
	22,905

PRISONS.

During the year there were three prisons in Mauritius, the Central Prison at Port Louis, the New Central Prison at Beau Bassin, and the Savanne District Prison.

Beau Bassin and Port Louis.

The total number of prisoners admitted after conviction during the past year was 5,980 males and 176 females. These numbers show an increase of 565 males and a decrease of 39 females as compared with the returns for 1904.

2. The numbers committed under the different headings, compare with the previous year as follows:—

Year.	Debt.	Non-payment of fines and costs.	Safe custody till trial or for want of security.	Purposes of penal imprisonment.
1904 ...	8	1,523	2,570	4,099
1905 ...	10	1,610	3,393	4,536

There is a decrease of 136 prisoners previously convicted as compared with the number so convicted in 1904.

Under the classification of "duration of sentences" there is a decrease in short sentences, and in long sentences in periods of "five years to ten years," and an increase in life sentences, the figures being:—

Five to ten years:—

1904	15
1905	10
Decrease	5

Life:—

1904	5
1905	11
Increase	6

The daily average number under detention, as compared with 1904 shows an increase of 61·07.

Daily average:—

1904	943·76
1905	1,004·83
Increase	61·07

accounted for principally by a large number of untried prisoners connected with a riot case on one of the sugar estates, who were for some months under detention.

Sickness and Mortality.

The following were the prevailing diseases:—

Port Louis Central Prison.	Beau Bassin Central Prison.	Savanne District Prison.
Malarial Fever. Dysentery. Diarrhœa. Phthisis. Pneumonia. Debility.	Malarial Fever. Dysentery. Diarrhœa. Phthisis. Pneumonia. Debility. Influenza.	Malarial Fever. Pneumonia. Diarrhœa.

Forty-six deaths occurred during the year, eight at Port Louis, 27 at Beau Bassin, and 11 at Savanne, compared with 31 in 1904 (Port Louis 8, Beau Bassin 20, Savanne 3).

The causes were as under:—

—	Port Louis Central Prison.	Beau Bassin Central Prison.	Savanne District Prison.	Total.
Dysentery	1	3	—	4
Fever	2	1	3	6
Diarrhœa	—	1	2	3
Influenza	—	7	—	7
Debility	—	3	—	3
Peritonitis	—	1	—	1
Pneumonia	3	10	4	17
Pleurisy	1	1	—	2
Blows	—	—	1	1
Childbirth	1	—	—	1
Epilepsy	—	—	1	1
Total	8	27	11	46

The death rate for the two central prisons, taking the rate per cent. of deaths on the average daily number under detention, was 3·89, as compared with 3·30 in 1904.

Taking the two central prisons separately, it was as follows:—

Percentage of Deaths.

—	Daily average.		Death rate per 100.	
	1904.	1905.	1904.	1905.
Port Louis ...	304·18	269·19	2·63	2·97
Beau Bassin ...	544·58	629·49	3·67	4·28

These figures are not so satisfactory as regards the central prisons, and as regards Savanne prison the rate was as high as 10·36 on the daily average.

The average daily number of sick in hospital in the central prisons was 45·54, as compared with 35·75 in 1904. Separately the average in Port Louis rose from 17·26 in 1904, to 22·81 in 1905, and at Beau Bassin from 18·49 in 1904 to 22·73 in 1905. At Savanne the average was 4·90, which was remarkably low as compared with the death rate.

There were no cases of bubonic plague.

The cost of maintenance during 1905 was Rs. 71,325, as compared with Rs. 51,420 in 1904, the cost per head being Rs. 70·98 as compared with Rs. 60·58 in 1904.

The gross earnings amounted to Rs. 132,445 in 1905, against Rs. 124,310 in the previous year, the earnings per head being Rs. 112.

The prisoners were employed as carpenters, shoemakers, tailors, and at making rattan goods and mats. They were also employed at stone-breaking and labour upon the public roads.

Criminal Statistics.

The following table gives the judicial statistics for 1905:—

Informations in the Supreme, District, and Stipendiary Courts of Mauritius.

How case tried ended.	Total.	Murder, other than wife and child murder.	Manslaughter.	Attempt at murder.	The numbers include attempts to commit the several offences.												
(Each prisoner tried should be counted as a separate case, but where any large batch of prisoners* have been convicted together, the fact might be mentioned below.)					Murder of wife, reputed wife or concubine.	Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injuries to property.	Robbery with violence.	Prædial larceny.	Other offences against property.	Vaccination.	Miscellaneous offences.
Judgment for the Crown	19,097	1	3	19	—	—	—	—	6	3	747	216	77	309	1,256	35	17,407
Judgment for the prisoner	1,460	2	2	12	—	—	—	—	3	—	277	53	18	29	297	—	767
Prisoners found insane	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Cases which fell through for want of prosecution, including cases which the Procureur General declined to take at the Assizes.	3,759	1	—	40	—	1	—	—	3	—	210	197	38	13	889	5	2,362

---

* *i.e.* Five or more than five in number.

VII.—VITAL STATISTICS.

POPULATION.

—	Numbers.	
The population on the 1st January, 1905 was		378,745
The number of births registered in 1905	12,569	
The number of births unregistered owing to death intervening before registration was made, was	1,474	
Total births	14,043	
The number of deaths registered was	15,379	
Showing a decrease of		1,336
		377,409
Arrivals in the Island	4,978	
Departures from the Island	4,855	
Difference in favour of arrivals		123
Total Civil Population		377,532
Military stationed in the Island		3,156
Total population of the Island		380,688
Estimated population of Dependencies and out-lying Islands		5,440
Estimated total population of the Colony		386,128

The crews of non-Colonial shipping in the harbour have not been included in the above estimate.

The Indian population included in the above numbered 264,667, composed of 144,857 males and 119,810 females, showing an increase of 1,757 males and 3,824 females on the Census of 1901.

The general population (excluding Indians) numbered 112,865, of which 57,481 are males and 55,384 females, thus showing an increase of 1,029 males and a decrease of 101 females.

It will be noticed that while both populations show an increase when compared with the Census figures, they show a decrease when compared with those of last year.

The public health of the Colony during 1905 has been worse than that of 1904.

The death rate shows a noticeable increase, having risen from 32·2 in 1904 to 40·6 in 1905.

The birth-rate has decreased from 37·6 per 1,000 to 37·0.

An unsatisfactory feature is to be found in the high infantile mortality for the year.

Unfortunately, a very high proportion of still-births, 8·2 per cent., must at the same time be recorded.

The following is an abstract of marriages, births, and deaths in 1905:—

Districts.	Birth Rate per 1,000.	Death Rate per 1,000.	Total Population.				General Population.				Indian Population.			
	On Population on 1st January, 1905.	On Population on 1st January, 1905.	Marriages.	Births.	Deaths.	Still-births.	Marriages.	Births.	Deaths.	Still-births.	Marriages.	Births.	Deaths.	Still-births.
Port Louis	33·1	59·9	309	1,734	3,136	120	214	940	1,609	68	95	794	1,527	52
Pamplemousses	35·8	46·9	68	1,369	1,796	109	23	232	350	18	45	1,137	1,446	91
Rivière du Rempart ...	46·1	36·2	72	1,322	1,039	100	20	202	131	6	52	1,120	908	94
Flacq	33·7	42·4	83	1,919	2,415	186	21	393	473	29	62	1,526	1,942	157
Grand Port	37·5	43·6	97	1,904	2,214	210	42	491	552	46	55	1,413	1,662	164
Savanne	33·8	33·3	54	1,230	1,212	128	20	279	239	19	34	951	973	109
Plaines Wilhems... ...	41·1	29·5	227	2,680	1,922	148	124	993	738	52	103	1,687	1,184	96
Moka	37·9	29·4	62	1,413	1,099	119	23	216	160	24	39	1,197	939	95
Black River	35·2	40·7	36	472	546	32	14	198	166	5	22	274	380	27
Total	37·0	40·6	1,008	14,043	15,379	1,152	501	3,944	4,418	267	507	10,099	10,961	885

The following statement shows the different classes of occupations of the population*:—

Employment.	General Population.		Indo-Mauritians.		Other Indians.		Grand Total.		
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Total.
Class I.—Professional ..	3,225	624	712	29	373	19	4,310	672	4,982
Class II.—Domestic ..	2,874	3,087	5,183	1,047	1,656	192	9,713	4,326	14,039
Class III.—Commercial ..	5,681	110	3,744	473	3,350	369	12,776	952	13,727
Class IV.—Agricultural ..	3,605	157	41,069	3,779	27,675	1,606	72,349	5,542	77,891
Class V.—Industrial ..	18,211	3,269	1,824	227	756	33	20,791	3,529	24,320
Class VI.—Indefinite and Non-productive.	22,856	48,238	50,438	90,353	6,320	17,859	79,614	156,450	236,064
Total	56,452	55,485	102,970	95,908	40,130	20,078	199,552	171,471	371,023

Births.

There were 14,043 births registered during the year. The birth rate in the general population was 34·7 per 1,000, and in the Indian population 38·0.

Deaths.

15,379 deaths occurred during the year. The death rate was, in the general population, 38·8 per 1,000, and in the Indian population 41·3. The deaths consequently exceeded the births by 1,336.

Marriages.

There were 1,008 marriages celebrated during the year. Of these marriages, 501 belonged to the general population, and 507 to the Indian population.

The following return shows the mortality for the last five years:—

Year.	Mortality.	Rate per 1,000.
1901	14,971	40·3
1902	12,716	34·0
1903	15,034	39·9
1904	12,064	32·2
1905	15,379	40·6

---

* From the Census of 1st April, 1901.

CLIMATE.

General.

The Director of the Royal Alfred Observatory reports as follows:—

Mauritius lies between the meridians of 57° 18′ and 57° 49′ E. longitude, and the parallels of 19° 58′ and 20° 32′ S. latitude. To the north extends the equatorial belt of calms and variable winds with its hot, damp, and rarefied atmosphere; and to the south the sub-tropical belt of high pressure from which a current of air blows nearly continuously, in a curved path, towards the equator, being deflected to the west by the rotation of the earth.

The migrations of these belts north and south with the sun produce the seasonal variations of weather at Mauritius. With the system in its most southerly position the Island is under the influence of the belt of low pressure, and in its most northerly position the influence of the high pressure belt is felt; so that in the summer months—December to April—the atmospheric pressure is below the average, and the weather is hot and sultry with occasional very heavy rain, produced principally by the cyclones which form to the north-east of Mauritius and travel usually on a south-westerly course, passing sometimes to eastward and sometimes to westward, but seldom immediately over the island.

The mean atmospheric pressure varies from 29·919 ins. in February to 30·202 ins. in August, and the mean temperature of the air from 79° in January to 68° in July. (At Curepipe, a town situated on the central plateau, 1,800 ft. above sea-level, the temperature varies from 74° in January to 62° in July). The mean wind direction varies from east in December and January to south-east by east in June; its velocity varies from ten miles per hour in March to 12·4 miles per hour in August. The rainfall is very variable in different parts of the island; the wettest station is Cluny, in Grand Port, with a mean annual rainfall of 145 ins.; the driest is Albion, on the west coast, with a mean rainfall of 31 ins. The mean monthly rainfall for the whole island decreases from 12 ins. in March to 2·6 ins. in September and October.

In addition to the annual variation there is a marked diurnal variation in all elements amounting to 0·070 ins. in atmospheric pressure, from 12° in winter to 17° in summer in air temperature, from 25 to 50 per cent. in relative humidity, seven miles an hour in wind velocity, 20° in wind direction and 0·7 in. in rainfall.

SPECIAL FEATURES IN 1905.

Barometric Pressure.

The positive pressure pulse was prolonged until the middle of the year with, however, superposed negative pulses in January and March, due to the passage of cyclones. The smoothed curve shows a general decrease of pressure from May to October, and the monthly departure curve shows a large negative wave of pressure from April to November, with a well-marked positive wave superposed in August. In the latter month an interruption of the general trend of the curve is shown in most of the meteorological elements.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. — 0·021	Ins. + 0·018	Ins. — 0·025	Ins. — 0·020

Air Temperature.

The temperature rose generally, relatively to the normal, from September, 1904, to October, 1905, with, however, an interruption in August, 1905, as mentioned above. The positive pulse of temperature broke up apparently in November, 1905. The temperature in this month being 0·5° below normal, and in December 0·8° below.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
0·0°	0·0°	+ 0·4°	— 0·2°

Vapour Tension.

The departures from average of vapour tension were greater than usual. After a large positive wave in January, the curve shows a general decrease till April, followed by a general increase until the end of the year, with again an interruption in August. The (inverted) abnormality curve of vapour tension followed very closely the corresponding curve of barometric pressure, being below normal, when the barometric pressure was above normal, and vice versâ.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. + ·058	Ins. + ·014	Ins. + ·022	Ins. + ·036

Relative Humidity.

The abnormality curve of relative humidity followed closely that of the vapour tension, showing greater variation than usual.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 5·6	Per cent. + 1·7	Per cent. + 1·6	Per cent. + 4·9

Rainfall.

The rainfall abnormality curve followed those of vapour tension and relative humidity with unusual regularity. In January the fall was 21·16 ins., or 12·77 ins. above normal, the greatest on record. The previous greatest falls were 17·54 ins. in 1904, and 14·72 in 1871.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 52	Per cent. — 18	Per cent. — 3	Per cent. + 86

Wind Velocity.

The prolonged defect of wind velocity throws doubt on the accuracy of the Robinson anemometer. The recorded velocity was below normal in every month of the year except April, when it was 0·1 m.p.h. above.

The recorded run of the wind during the year was 78,052 miles, whereas the average for the period 1875-1899 was 97,236 miles, showing a defect of 19,184 miles during the year.

The monthly departures from normal followed closely the variations of atmospheric pressure, except in February, when a positive pulse of pressure was not reproduced in the wind velocity curve.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
M.p.h. — 2·6	M.p.h. — 1·1	M.p.h. — 3·1	M.p.h. — 2·0

Means and Extremes of Meteorological Elements.

The means and extremes of the various meteorological elements for the year 1905 are given below:—

——	Mean.	Highest.	Lowest.
	Ins.	Ins.	Ins.
Atmospheric Pressure ...	30·058	30·350	29·357
Air Temperature	73·5°	89·0°	52·3°
	Per cent.	Per cent.	Per cent.
Relative Humidity ...	78·5	100·0	41·8
	M.p.h.	M.p.h.	
Wind Velocity	8·9	49·0	—
Wind Direction	S. 75° E.	—	—
	Total.		
Rainfall	67·90	—	—

Sky Glows.

The morning and evening sky glows were of about normal intensity.

Zodiacal Light.

The Zodiacal light was also of about normal intensity.

Results of Magnetic Observations.

The magnetographs were at work throughout the year, and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1905:—

Declination (west)	9° 11′26
Dip (south)	53° 55′5
Horizontal force (C.G.S. units)	0·23590
Vertical force (C.G.S. units)	0·32379
Total force (C.G.S. units)...	0·40062

The largest magnetic disturbances occurred on February 3rd-6th, April 1-2, August 2, September 3-4, October 28-29, November 12-13, 15-16.

MISCELLANEOUS WORK AT THE ROYAL ALFRED OBSERVATORY.

Actinometric observations were taken with high and low sun on 41 days, and single observations on 31 other days.

Fifty-four earthquakes were recorded by the Milne seismograph during the year. The hourly measures of the seismograms were discontinued at the end of the year 1904, as it was found that the records were vitiated by a lamp used at night to check tremors. In August the instrument was moved to the magnetic basement.

Rainfall returns were collected from 62 stations in different parts of the Island. The mean rainfall for the whole Island during the year was 106·41 ins. as compared with an average of 79·85 inches.

Observations made on board vessels trading with Mauritius were tabulated, and detailed accounts of gales and hurricanes recorded. From observations thus obtained daily synoptic charts were prepared for the hurricane months, and the tracks of seven cyclones laid down. There was evidence at Mauritius of an eighth cyclone from December 1st to 4th, passing to north and north-west, but up to the present no information has come to hand from which to determine its track.

PUBLICATIONS.

Papers on a magnetic survey near the Royal Alfred Observatory, and on the climate of Pamplemousses, were published in the "Proceedings of the Royal Society," London, and in the "Report of the Eighth International Geographical Congress," respectively.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL.

The contract with the British India Steam Navigation Company, Limited, was renewed in 1904 for another year for a four-weekly service between Colombo and Mauritius. Besides the British India steamers, our mails to and from the East are conveyed by other British and French steamers. The Messageries Maritimes Company performed their bi-monthly voyages from Marseilles to Mauritius and *vice versâ*, calling at Aden, Zanzibar, Seychelles, Madagascar, and Réunion. The mails for and from South African ports were conveyed by the Union Castle steamers.

Statements of letters, postcards, newspapers, and postal parcels, &c., dealt with during the year 1905:—

—	Internal.	Mail Packets.				Other Vessels.				Total.
		United Kingdom.		Other Places.		United Kingdom.		Other Places.		
		From.	To.	From.	To.	From.	To.	From.	To.

The following are the telegraph and telephone lines in Mauritius:—

TELEGRAPH.

Wires.	Length.
	Miles
North Line (2 wires); 14 stations are connected on these wires and terminate at Grand River, S.E.—32 miles, making the length of both wires	64
A third wire from the Signal Mountain, Port Louis, passing through Central Railway Telegraph Office, Central Post Office Telegraph Office, direct to the Royal Alfred Observatory, Pamplemousses (1¼ miles from Railway Station at Pamplemousses)	12
At Mapou, on the North Line, 10 miles from Port Louis, two wires leave the Railway Station, one runs to Cannoniers Point, passing through Grand Bay	7
And the other to Butte aux Sables Signal Station	9
(These two wires communicate direct to Port Louis, by means of a switch.)	
One from Terre Rouge to Long Mountain	4
One from Poudre d'Or Station to Poudre d'Or Village	2
One from Argy Station to Central Flacq	1¼
On the Midland Line, two wires extend from Port Louis to Mahébourg (36 miles)	72
One from Port Louis to Plaine Lauzun Works	2
One from Port Louis to Le Réduit	12
One from Port Louis to Curepipe Railway Station for the use of the Military	16
One from Port Louis to Chemin Grenier	42
One from Rose Belle to Souillac	11
Two Moka-Flacq Line wires from Port Louis, through Rose Hill, and terminate at Rivière Sèche on the North Line	74
One from Petite Rivière to Bambous	5
Total	333¼

TELEPHONE.

Wires.	Length.
	Miles.
From Bambous to Petit Cap (Savanne)	22
From Mahébourg to Old Grand Port	7
The Observatory Circuit is always used for telephone communication with the Post Office and the Eastern Telegraph Office ...	¼
Total	29¼

There is also a telephonic service in Port Louis, which is the property of a private company.

MONEY ORDERS.

Inland money orders were issued during the year 1905 for a total sum of Rs. 341,132 against an aggregate sum of Rs. 292,805 during the previous year.

The foreign money orders show the following comparison:—

1904	Rs. 447,724
1905	351,618

The British postal order system was extended to Mauritius during the year.

The total Post Office expenditure for 1905 was Rs. 135,676.55, as follows:—

Personal emoluments	Rs. 102,872.56
Other Charges—	
Overtime	3,024.25
Sea and territorial transit	1,130.72
Maintenance of telegraph	1,547.35
Porterage of telegrams	11,745.16
Uniform	1,616.05
Gratuities to masters of vessels ...	3,289.18
Miscellaneous and special expenditure	10,451.28
	Rs. 135,676.55

And the total revenue for the same period was Rs. 131,445.24, collected under the following heads:—

	Rs.
1. Postal correspondence	90,272.35
2. Telegraph receipts	22,275.63
3. Rodrigues (postage and commission on money orders)	35.50
4. Commission on money orders (Inland, Foreign, and Indian)	10,782.76
5. Parcel postal service	3,894.16
6. Transit of correspondence	3,199.56
7. Private boxes	939.00
8. Commission on postal orders	46.28
	Rs. 131,445.24

IX.—MILITARY EXPENDITURE.

No. of Vote.	Particulars.	Amount.
	From 1st January, 1905, to 31st March, 1905.	£
1	Pay, &c., of the Army	27,127
2	Medical Establishments	1,304
6	Transport and Remounts	2,169
7	Provisions, Forage, &c.	14,232
8	Clothing Services	932
9	Warlike and other Stores	401
10	Works, Buildings, and Repairs	3,316
	Military Works Loan...	2,202
11	Establishments for Military Education ...	105
14 to 16	Army non-Effective Services	138
	From 1st April, 1905, to 31st December, 1905.	
1	Pay, &c., of the Army	65,855
2	Medical Establishments	1,856
6	Quarterings, Transport, and Remounts ...	18,140
7	Supplies and Clothing	33,779
8	Ordnance Department Establishments, &c.	1,244
9	Armaments and Engineer Stores	27
10	Works and Buildings	6,560
	Military Works Loan	1,637
11	Establishments for Military Education ...	323
12	Miscellaneous Effective Services	379
13	War Office and Army Accounts Department	1,048
14 to 16	Army non-Effective Services	734
	Total	183,508

X.—RAILWAYS.

The earnings of 1905 showed a decrease of Rs. 54,126 on those of 1904, owing to a comparatively reduced sugar crop, the figures being, for 1904, Rs. 2,378,950, for 1905, Rs. 2,324,824.

These figures are exclusive of Government traffic, which amounted in 1905 to Rs. 177,880.

The working expenses in 1905 were Rs. 1,581,749, and the percentage of working expenditure to earnings in 1905 was 63·20, against 71·93 in 1904.

The total length of railway open in 1905—exclusive of sidings—was 120 miles.

XI.—RODRIGUES.

The Island of Rodrigues, the magistrate in charge reports, has been free from cyclones, and sufficient rain has fallen, allowing the inhabitants to make fairly good crops.

The following statements give in a comparative form the value of the imports and exports, and the revenue and expenditure of the Dependency for the last three years:—

Trade.

Year.	Exports.	Imports.
	Rs.	Rs.
1903	176,675	237,346
1904	201,861	226,190
1905	210,671	180,276

The following were the principal exports:—

—	1903.	1904.	1905.
	Rs.	Rs.	Rs.
Horned Cattle	4,380	11,160	3,300
Goats	22,020	49,188	14,060
Pigs...	5,875	9,750	2,525
Salt Fish	120,345	97,933	161,460
Tobacco	16,380	27,300	15,330

REVENUE AND EXPENDITURE.

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1903	12,122	33,580
1904	12,155	30,706
1905	15,450	33,616

XII.—GENERAL.

The price of sugar ranged as follows from January, 1904, to April, 1906:—

Year.	Month.	Prices.
		Rs.
1904	January ...	7.90
"	February ...	7.80
"	March	8.00
"	April	8.00
"	May	8.50
"	June	9.55
"	July	9.55
"	August ...	8.85
"	September ...	9.90
"	October ...	10.80
"	November ...	11.95
"	December ...	12.15
1905	January ...	12.15
"	February ...	13.30
"	March	13.35
"	April	13.35
"	May	11.10
"	June	11.10
"	July	9.00
"	August ...	9.50
"	September ...	9.50
"	October ...	8.50
"	November ...	8.25
"	December ...	8.50
1906	January ...	8.25
"	February ...	8.00
"	March	8.10
"	April	7.80

There was unfortunately a marked decline in prices as compared with the rates at which the previous year's crop was sold, but the sugar crop of 1905 was a very abundant one, and the year was, there is reason to believe, a profitable one for most of the estates. The crop realised 183,077 tons, or some 39,000 tons more than the preceding year. The crop which the Colony is now about to gather is even a more abundant one than that of the year under review in this report.

D. C. Cameron,

Acting Colonial Secretary.

21st August, 1906.

COLONIAL REPORTS

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

MAURITIUS.

(For Report for 1905, *see* No. 506.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Mauritius,
August 27, 1907.

MY LORD,

I HAVE the honour to transmit herewith copies of the Blue Book of Mauritius for the year 1906, and of the Colonial Secretary's report thereon, which has been printed for convenience of transmission and perusal.

I have, &c.,

CAVENDISH BOYLE.

The Right Honourable
The Earl of Elgin and Kincardine,
K.G., G.C.S.I., G.C.I.E.,
Secretary of State for the Colonies.

1125 Wt 24282 11/07 D & S 5 30015

REPORT ON THE MAURITIUS BLUE BOOK FOR 1906.

I.—FINANCIAL.

The revenue for the financial year 1905-6 amounted to Rs. 11,169,783.21, as shown by the following comparative statement:—

Revenue.

No.	Heads of Revenue.	1904-5.	1905-6.	Increase.	Decrease.
		Rs. c.	Rs. c.	Rs. c.	Rs. c.
1	Customs	3,567,495.72	3,486,682.04	—	80,813.68
2	Port, Harbour, and Lighthouse Dues.	206,843.90	263,073.55	56,229.65	—
3	Licences, Excise and Internal Revenue, not otherwise classified.	2,464,920.98	2,530,444.46	65,523.48	—
4	Fees of Court or Office, Payments for Specific Services and Reimbursements in Aid.	239,259.88	269,353.06	30,093.18	—
5	Post Office and Telegraphs	136,720.36	139,479.45	2,759.09	—
6	Government Railways ...	2,657,596.00	2,437,510.65	—	220,085.35
7	Rent of Government Property.	70,752.16	64,745.79	— 27,125.97	6,006.37 —
8	Interest	908,899.53	936,025.50		
9	Miscellaneous Receipts ...	146,902.11	159,865.80	12,963.69	—
10	Land Sales	164.27	641.33	477.06	—
		10,399,554.91	10,287,821.63	195,172.12	306,905.40
11	Revenue from Loan Ordinance 31 of 1904.	—	881,961.58	881,961.58	—
	Total	10,399,554·91	11,169,783.21	1,077,133.70	306,905.40
	Result—Net increase ...	—	—	770,228.30	—

The increase of revenue, as compared with the preceding year, was due to the reimbursement out of the loan raised under Ordinance 31 of 1904, of the cost of certain public works which had in previous years been charged to the general revenue.

Expenditure.

The following is a comparative statement of the expenditure for the years 1904-5 and 1905-6:—

No.	Heads of Service.	1904-5.	1905-6.	Increase.	Decrease.
		Rs. c.	Rs. c.	Rs. c.	Rs. c.
1	Charge on account of Public Debt	1,022,873.25	1,264,583.79	241,710.54	—
2	Pensions	560,432.73	585,799.58	25,366.85	—
3	Governor and Legislature	94,156.55	94,307.63	151.08	—
4	Colonial Secretariat ...	67,066.92	58,001.83	—	9,065.09
5	Receiver General	148,693.26	143,451.30	—	5,241.96
6	Auditor General	55,306.45	56,273.28	966.83	—
7	Customs	233,374.12	126,542.87	—	106,831.25
8	Port and Marine	421,132.17	336,413.87	—	84,718.30
9	Meteorological Observatory	23,557.13	21,185.96	—	2,371.17
10	Public Library and Museum	10,571.08	10,426.34	—	144.74
11	Registrar General	20,746.46	19,751.94	—	994.52

Expenditure—cont.

No.	Heads of Service.	1904-5.	1905-6.	Increase.	Decrease.
		Rs. c,	Rs. c.	Rs. c.	Rs. c.
12	Receiver of Registration Dues.	50.188.54	50,600.87	412.33	—

39	Drainage Works (Upkeep)	24,133.32	16,861.58	—	7,271.74
40	Secret Service	526.55	—	—	526.55
41	Plague Services	186,340.01	170,259.49	—	16,080.52
	Total	10,563,521.43	9,915,868.52	370,496.54	1,018,149.45
	Result—Net decrease . .	—	—	—	647,652.91

The decrease in expenditure in 1905-6 may be attributed partly to the fact that in 1904-5 large sums spent on reafforestation and the Station Agronomique in previous years under "Advances" were written off to expenditure head "Miscellaneous," and partly to the savings in 1905-6 under head "Railways," caused by the non-execution in time of certain indents for railway materials.

POSITION OF THE COLONY AT THE CLOSE OF THE YEAR 1905-6.

	Rs.
At the close of the year 1904-5 there was a deficit of...	81,720
As the revenue of 1905-6 exceeded the expenditure by	1,253,915
A balance in favour of the Treasury of... ...	1,172,195

is, therefore, shown on 30th June, 1906.

The revenue and expenditure for the last five years, and the Treasury balances at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.	Debit Balance.
	Rs.	Rs.	Rs.	Rs.
1901–2 ...	9,140,754	9,043,066	1,834,669	
1902–3 ...	9,221,600	9,575,182	1,263,430	
1903–4 ...	9,473,112	10,664,115	82,247	
1904–5 ...	10,399,554	10,563,521	—	81,720
1905–6 ...	11,169,783	9,915,868	1,172,195	

Assets and Liabilities on 30th June, 1906.

1. Commissioners of currency:—

	Rs.
Assets	7,049,701
Liabilities	6,876,255
Balance in favour of Commissioners ...	173,446

2. Government savings bank:—

	Rs.
Assets	3,130,970
Liabilities	2,830,272
Balance in favour of bank	300,698

3. Treasury proper:—

	Rs.
Assets	4,299,779
Liabilities	3,127,584
Balance in favour of Treasury	1,172,195

4. Public debt:—

The public debt stood as follows on the 30th June, 1906:—

	£	*s.*	*d.*
(1) 6 per cent. Railway Debenture, under Ordinance 15 of 1864 (matured bond unclaimed)	1,000	0	0
(2) Savanne Railway 4½ per cent. Debentures, payable by annual drawings	35,300	0	0
Carried forward	36,300	0	0

	£	s.	d.
Brought forward	36,300	0	0
(3) Moka Railway 4 per cent. Debentures, payable by annual drawings	500	0	0
(4) Consolidated 4 per cent. Debentures, payable by annual drawings	49,900	0	0
(5) Mauritius 4 per cent. Inscribed Stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas (£34,000) ...	482,390	16	0
(6) Hurricane Loan 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892...	600,000	0	0
(7) 3½ per cent. Inscribed Stock, under Ordinances Nos. 31 of 1904 and 39 of 1905	150,000	0	0
	£1,319,090	16	0

For the redemption of the debentures and inscribed stock, the several sinking funds and cash balances in the hands of the trustees on the 30th June, 1906, amounted to £217,284, the amount duly provided as required by law.

The sum at the credit of the sinking funds on 30th June, 1906, showed an increase of £19,477 on the previous year.

Currency.

Amount of currency notes on 31st December, 1906:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents)...	483	16	5
Issue of 1860 (sterling)	3,405	0	0
	£3,888	16	5

Rupee notes, under Ordinance 28 of 1876:—

	Rs.
1. In the Commissioners' vault...	2,700,005
2. In the hands of the public (including the banks and financial officers)	4,176,250
	6,876,255

CHANGES IN TAXATION.

None during the year 1906.

MUNICIPALITIES.

Statement of the revenue and expenditure of the municipality of Port Louis for year ended 31st December, 1906:—

	Rs.
Balance in hand 1st January, 1906	77,713.89
Revenue during the year	*720,728.68
	798,442.57
Expenditure	*750,702.41
Balance in hand on 31st December, 1906 ...	47,740.16

The following is a comparative statement of the normal revenue and expenditure for the last five years:—

Year.	Revenue.	Expenditure.
	Rs c.	Rs. c.
1902	442,825.20	472,875.39
1903	†422,351.45	451,345.77
1904	501.365.27	502,601.14
1905	‡548,138.80	492,785.18
1906	537,366.04	510,587.68

Statement of the debt of the Municipal Corporation of Port Louis on 31st December, 1906, showing provision for payment in 1907:—

Loan.	Amount.	Repayments to be made in 1907.
	£ s. d.	£ s. d.
Conversion Loan	120,400 0 0	1,700 0 0
Electric Lighting Loan	9,666 13 4	333 6 8
	Rs.	Rs. c.
Colonial Loan	23,400	7,800.00
Grand River Bridge Loan	10,000	2,000.00
Manure Establishment Loan	20,000	2,000.00
Government Hurricane Loan	84,116	6,237.16
Flood Loan	8,333	4,167.00
Municipality Loan	24,000	2,000.00
Total	169,849	24,204.16

---

* Including advances, deposits, balance of loan of £10,000, &c.

† Not including a loan of Rs 30,000 for the purchase of the buildings of the Gas Company and of a traction engine for scavenging purposes.

‡ Not including a loan of £10,000 for Electric Lighting plant of the town.

Provision for payment of capital and interest on the above loans has been duly made in the annual budget of the Corporation.

Besides the Municipal Council of Port Louis, which is an elective assembly, there are three township boards—

Curepipe,
Beau Bassin and Rose Hill,
Quatre Bornes,

appointed annually by the Governor to administer the affairs of those places.

BOARD OF COMMISSIONERS OF CUREPIPE.

Comparative Statement of Revenue and Expenditure.

—	1901.	1902.	Half-year 1903.	1903-04.	1904-05.	1905-06.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	115,590.13	121,322.70	35,536.20	82,771.72	68,933,62	65,776.19
Expenditure ..	88,426.58	120,285.57	34,261.02	81,158.12	67,729.06	64,740.09

Debt of the Board of Curepipe.

—	Amount.	
	Rs.	Rs.
1. Amount of Debentures issued in 1901 and 1902 for the construction of the Town Hall, in virtue of Ordinance No. 39 of 1900.	70,000	
Amount paid off in 1902, 1903, 1904, 1905, and 1906	12,500	57,500
2. Government Special Loan repayable in 10 Annuities.	25,000	
Amount paid off in 1905 and in 1906...	5,000	20,000
Total		77,500

Provision is made annually for repayment.

BOARD OF COMMISSIONERS OF BEAU BASSIN AND ROSE HILL.

Comparative Statement of Revenue and Expenditure.

—	1901.	1902.	1903.	1904.	1905.	1906.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	28,252.08	29,342.81	29,270.19	29,345.61	26,644.97	26,476.80
Expenditure ..	27,520.54	33,133.34	29,235.29	26,260.19	28,186.97	25,188.03

Debt.—A loan of Rs. 20,000 was made to the Board by Government on its creation to permit of the works of repairing and draining the streets and lanes of the township being undertaken without delay. This amount is refunded by annual instalments of Rs. 1,500, and the debt is now reduced to Rs. 4,500.

A further loan of Rs. 5,000 was made to the Board in 1901, to be reimbursed after settlement of the loan of Rs. 20,000.

BOARD OF COMMISSIONERS OF QUATRE BORNES.

Comparative Statement of Revenue and Expenditure.

—	1901.	1902.	1903.	1904.	1905.	1906.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	12,827.14	13,627.55	15,460.80	12,724.51	12,549.48	12,624.69
Expenditure ..	10,148.32	13,451.95	14,000.25	13,274.16	12,571.97	12,415.57

Debt. Rs. 615.—This represents the share to be paid to Government by the Board for re-metalling a main road in the township. Provision has been made in the estimates to pay off this debt.

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

IMPORTS AND EXPORTS.

The following statements show in a comparative form the value of the imports and exports for the year 1906:—

VALUE of IMPORTS and EXPORTS (including charges and exchange) classified according to Secretary of State's Circular Despatch of 5th December, 1891.

—	Imports.		Exports.

TRADE IN MAURITIUS.

1. The total value of imports into, and exports from, the Colony (exclusive of duty-free goods to and from the Dependencies) for the year ended 31st December, 1906, compared with 1905, can be thus summarised:—

—	1905.	1906.
	Rs.	Rs.
Imports (including charges and exchange)	26,944,399.20	29,588,255.25
Exports (including shipping charges on local produce and manufacture).	36,843,046.15	41,156,120.02
Total	63,787,445.35	70,744,375.27

accounted for as under:—

—	Imports.		Exports.	
	1905.	1906.	1905.	1906.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	7,357,173.66	8,971,261.89	2,691,079.38	3,256,666.09
British Possessions.	13,541,654.69	14,829,436.32	33,208,007.44	35,579,161.53
Foreign Countries.	6,045,570.85	5,787,557.04	943,959.33	2,320,292.40
Total ...	26,944,399.20	29,588,255.25	36,843,046.15	41,156,120.02

2. The total value of imports and exports, from and to the Dependencies, per coast sufferances, is as follows:—

—	1905.	1906.
	Rs. c.	Rs. c.
Imports	433,702.42	405,249.30
Exports	473,071.48	461,754.60
Total	906,773.90	867,003.90

3. The aggregate value of trade is therefore as under:—

—	1905.	1906.
	Rs. c.	Rs. c.
Imports	27,378,101.62	29,993,504.55
Exports	37,316,117.63	41,617,874.62
Total	64,694,219.25	71,611,379.17

4. Excluding the value of exports to, and imports from, the Dependencies, the rate of trade per head of population (*i.e.*, for 1905—382,787 souls, and for 1906—380,972 souls) is:—

—	1905.	1906.
	Rs.	Rs.
Imports (including charges and exchange)	70.39	77.66
Exports (including shipping charges on local produce and manufacture).	96.24	108.02

5. The value of specie and bullion, imported and exported, is as follows:—

—	1905.			1906.		
	Declared Value.	Charges.	Total.	Declared Value.	Charges.	Total.
	Rs. c.	Rs. c.	Rs. c.	Rs. c	Rs c.	Rs c.
Imports	740,568.00	46,968.10	787,536.10	571,775.13	49,203.84	620,978.97
Exports	206,891.50	—	206,891.50	1,008,977.00	—	1,008,977.00
Total	947,459.50	46,968.10	994,427.60	1,580,752.13	49,203.84	1,629,955.97

6. Deducting specie and bullion, the declared value of imports and exports, mentioned in paragraph 1, is as follows:—

—	1905.	1906.
	Rs. c.	Rs. c.
Imports	26,156,863.10	28,967,276.28
Exports	36,636,154.65	40,147,143.02
Total...	62,793,017.75	69,114,419.30

7. The amount of duty collected during the years 1905 and 1906 (1st January to 31st December) is as under:—

—	1905.	1906.
	Rs. c.	Rs. c.
On Imports...	2,918,695.84	3,023,013.11
On Exports...	526,717.49	598,441.93
Total...	3,445,413.33	3,621,455.04

(1) The 4 per cent. surcharge produced:—	Rs.
In 1905	99,085.42
In 1906	103,261.73
(2) The additional 16 per cent. surcharge produced:—	
In 1905	329,471.02
In 1906	332,425.62
(3) The additional 2 cents per 100 kilos of sugar (deposits) for the station agronomique produced:—	
In 1905	32,839.03
In 1906	37,278.15

Postal Parcels.

8. The declared value of the parcels imported and exported during the past five years 1902-1906 is as under:—

—	1902.	1903	1904.	1905.	1906.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.	Rs. c.
Imported ...	231,993.73	224,885.17	297,804.73	263,198·86	301,566.71
Exported ...	20,628.64	28,624.83	33,467.35	42,286.27	35,742.77
Total ...	252,622.37	253,510.00	331,272.08	305,485.13	337,309.48

Imports and Exports.

9. The total value of imports and exports for the last five years, 1902 to 1906 is as under:—

Year.	Imports, including Charges and Exchange.	Exports, including Shipping Charges.
	Rs. c.	Rs. c.
1902	30,738,778.11	38,341,695.55
1903	39,269,847.24	37,794,266.75
1904	35,416,624.01	44,545,320.33
1905	26,944,399.20	36,843,046.15
1906	29,588,255.25	41,156,120.02

10. Comparative statement of the value of the chief imports and exports (including charges and exchange).

IMPORTS.

11. Dealing with the articles and their values according to the entries for 1905 and 1906 the following results are noticeable:—

Acids.

Phosphoric.—The imports for 1906 amounted to kilos 196,900, of the value of Rs. 47,971, against kilos 122,231, of the value of Rs. 31,610, showing an increase both in weight of kilos 74,669 and in value of Rs. 16,361. The increase is exclusively due to more imports from the United Kingdom.

Ammonia Sulphate.

Kilos 4,300,071, of the value of Rs. 954,650, were imported exclusively from the United Kingdom in 1906, against kilos 4,677,256, of the value of Rs. 994,679 in 1905 imported from the United Kingdom and Australia. There was a decrease both in weight of kilos 377,185 and in value of Rs. 40,029. The United Kingdom showed a falling off of kilos 326,385 in weight and of Rs. 28,795 in value, while Australia supplied kilos 50,800, value Rs. 11,234 in 1905 against nil in 1906.

Animals.

Asses.—No asses were imported in 1906. The Argentine Confederation supplied 77 head valued Rs. 12,124 in 1905.

Cows and Oxen.—There were imported 9,055 head in 1906, of the value of Rs. 784,106, against 7,316 head in 1905, of the value of Rs. 653,587. The increase was of 1,739 in number and of Rs. 130,519 in value.

Oxen are exclusively supplied from Madagascar.

Dogs.—The imports for 1906 amounted to 27 dogs, of the value of Rs. 5,891, against 18, of the value of Rs. 879, for 1905. There was an increase of nine in number, with a surplus of Rs. 5,012 in value. France and the United Kingdom supplied 9 dogs, valued Rs. 1,558, and eight dogs, valued Rs. 3,678 respectively, in 1906, against three, valued Rs. 553, and two, valued Rs. 80.67, in 1905.

Horses.—There were imported 238 head, of the value of Rs. 83,174, from Australia, and one racehorse, valued Rs. 1,515, from Réunion, in 1906, against one horse, valued Rs. 251, from the Argentine Confederation, and two racehorses, valued Rs. 2,505, from Australia in 1905. There was an increase of 236 in number, and of Rs. 81,933 in value, principally due to the importations from Australia.

Ponies.—382 head, of the value of Rs. 60,146, were imported in 1906, against 384 head, of the value of Rs. 87,074, in 1905. There was a shortage of two in number, with a decrease of Rs. 26,928 in value. Sandalwood showed a shortage of 14 head, with a falling off in value of Rs. 19,021, while from Australia 12 ponies, valued Rs. 2,272, were received in 1906, against nil in the previous year.

Mules.—No mules were imported in 1906, against 1,276, valued Rs. 413,325, and 58, valued Rs. 21,593, from the Argentine Confederation and Australia respectively in 1905. The decrease was of 1,334 in number and of Rs. 434,918 in value.

Apothecaries' Wares.

The imports for 1906 amounted to Rs. 177,775, against Rs. 181,211 for 1905, showing a falling off of Rs. 3,436. Decreases are from France (Rs. 3,499), Germany (Rs. 1,125), Spain (Rs. 844), China, the United States, Switzerland, Singapore, Pondichery, Belgium, and the Argentine Confederation. Increases are from the United Kingdom (Rs. 2,121), Australia and Continental India (Rs. 463). Belgium provided for Rs. 3,472 in 1906, against nil in the previous year.

Apparel, Wearing.

The imports for 1906 amounted to Rs. 138,336, against Rs. 150,899 in 1905, showing a decline of Rs. 12,563; there was an increase of Rs. 15,603 from Continental India; slight increases were noticeable under the United Kingdom (Rs. 545), Switzerland (Rs. 502), China (Rs. 362), Spain, Japan (Rs. 159). Australia, France, Germany, and Pondichery showed decreases of Rs. 121, Rs. 20,076, Rs. 489, and Rs. 8,731 respectively. Hong Kong and Natal provided for Rs. 857 and Rs. 30 in 1905, against nil in the past year, while on the other hand Ceylon and Zanzibar provided for Rs. 143 and Rs. 32 respectively in 1906, against nil in the previous year.

Areca Nuts.

Kilos 15,531, of the value of Rs. 5,207, were received in 1906, against kilos 47,964, of the value of Rs. 12,493 in 1905. The decrease was therefore of kilos 32,433 in weight and of Rs. 7,286 in value. Ceylon and Continental India showed decreases of kilos 2,100 and kilos 30,333 in weight and of Rs. 838 and Rs. 6,448 respectively in value.

Automobiles.

One automobile, valued Rs. 7,912, was imported in 1906, against one, valued Rs. 4,449, in 1905, with the result of a surplus in value of Rs. 3,463. They were imported from the United Kingdom in each case.

Bacon and Hams.

Kilos 25,891, valued Rs. 34,620, were imported in 1906, against kilos 30,380, valued Rs. 37,674 in 1905. There was a decrease, both in weight of kilos 4,489 and in value of Rs. 3,054, due principally to the importations from the United Kingdom.

Baggage.

Dutiable articles, amounting to Rs. 36,928, were imported in 1906, against Rs. 40,090 in 1905, with a short difference of Rs. 3,162 in value.

Bags.

Gunny.—The imports amounted to 3,121,379 bags, valued Rs. 1,064,473, for 1906, against 1,653,574, valued Rs. 468,047 in 1905 showing an increase of 1,467,805 in number, with a surplus in value of Rs. 596,426. The bags were exclusively supplied from Continental India.

Straw.—Exclusively imported from Madagascar, which supplied 339,100 bags, valued Rs. 60,741, in 1906, against 132,450 bags, valued Rs. 20,490, in 1905. There was an increase both in number of 206,650 and in value of Rs. 40,251.

Bark and Dyewood.

The imports for 1906 amounted to kilos 42,130, of the value of Rs. 6,027, against for 1905 kilos 89,247, of the value of Rs. 12,104. There was a decrease of kilos 47,117 in weight and of Rs. 6,077 in value. Australia showed a shortage of kilos 51,319 in weight and of Rs. 6,760 in value. The United Kingdom supplied kilos 4,202, valued Rs. 684, in 1906, against nil in the previous year.

Beef, Salted.

The imports for 1906 amounted to kilos 291,058, of the value of Rs. 144,585, against for 1905 kilos 78,421, of the value of Rs. 41,461, showing an increase of kilos 212,637 in weight and of Rs. 103,124 in value. The increases are from the United Kingdom and the United States, which supplied kilos 9,227 and kilos 201,678 more in 1906, with a surplus in value of Rs. 5,188 and Rs. 97,614, respectively. France and Madagascar supplied small quantities in 1905, against nil in 1906, while Australia supplied kilos 3,211, of the value of Rs. 1,479, in 1906, against nil in the previous year.

Beer and Ale.

In casks.—This article is exclusively supplied from the United Kingdom. There is an increase of hectolitres 58 in quantity and of Rs. 1,600 in value, as compared with 1905.

In bottles.—The imports for 1906 showed a decrease of litres 8,148, with a shortage in value of Rs. 1,057, due to less supplies from France, Germany, Denmark, and Holland. The United Kingdom showed an increase of litres 1,285, with a surplus of Rs. 2,650 in value. Norway and Austria provided a few litres in 1906, against nil in 1905.

Bicycles.

The imports for 1906 amounted to 140 bicycles, of the value of Rs. 13,814, against 92, of the value of Rs. 10,431, in 1905, showing an increase of 48 in number and of Rs. 3,383 in value. The United Kingdom showed an increase of 51 in number, with a surplus of Rs. 3,942 in value, while from France there was a decrease of three in number and of Rs. 559 in value.

Bichloride of Mercury.

The imports for 1906 showed a decrease both in weight of kilos 654 and in value of Rs. 2,686, due to less imports from the United Kingdom.

Bran.

The imports for 1906 amounted to kilos 2,018,323, of the value of Rs. 191,915, against kilos 2,096,015, of the value of Rs. 189,322, showing a decrease of kilos 77,692 in weight, but a surplus in value of Rs. 2,593. Australia showed an increase both in weight of kilos 33,082 and in value of Rs. 3,476. From Continental India there was a decrease of kilos 60,958 in weight, but a surplus in value of Rs. 5,546. The Argentine Republic supplied kilos 49,816, of the value of Rs. 6,429 in 1905, against nil in 1906.

Bricks and Tiles.

The imports for 1906 showed an increase, both in quantity of 181,983 and in value of Rs. 12,459, due principally to more imports from the United Kingdom, which supplied 151,617 bricks more, with a surplus in value of Rs. 11,612. France and Natal provided for Rs. 323 and Rs. 657, respectively, in 1906, against nil in the previous year, while Belgium provided for Rs. 133 in 1905, against nil in the past year.

Butter.

The imports for 1906 amounted to kilos 20,895, of the value of Rs. 52,714, against kilos 74,670, of the value of Rs. 135,627, in 1905, showing a substantial decrease of kilos 53,775 in weight and of Rs. 82,913 in value. The decreases are from Australia (Rs. 78,110), Denmark (Rs. 2,944), France (Rs. 2,333), Italy (Rs. 561), and Holland (Rs. 1,030). The United States provided for Rs. 1,294 in 1905, against nil in 1906. Germany provided for Rs. 2,438 in 1906, against nil in the previous year.

Cabinet and Upholstery Wares.

The imports for 1906 showed a decrease of Rs. 15,721, as compared with 1905. Decreases are from the United Kingdom (Rs. 3,851), Continental India, Singapore, Austria (Rs. 2,465), China, France (Rs. 9,393), Germany, the United States, Seychelles, and Madagascar.

Camphor.

Crude.—The imports for 1906 showed an increase, both in weight of kilos 1,395 and in value of Rs. 7,786, due principally to more imports from Continental India.

Candles.

Composition.—The imports for 1906 showed a decrease of kilos 29,072 in weight and of Rs. 16,882 in value. Decreases were from France (Rs. 14,485), United Kingdom (Rs. 2,313), Belgium (Rs. 674). Continental India showed an increase of Rs. 2,693. Holland provided for Rs. 2,104 in 1905, against nil in 1906.

Caoutchouc and India-rubber.

Manufactured.—This article is exclusively supplied from the United Kingdom. The imports for 1906 showed an increase of kilos 1,800 in weight and of Rs. 14,942 in value.

Carriages.

Eleven carriages, of the value of Rs. 6,146, were imported in 1906, against one, valued Rs. 662, which was imported from France in 1905. The supply for 1906 was as follows:—

From the United Kingdom	—3,	valued	Rs. 2,725
,, France	4,	,,	Rs. 1,742
,, United States	4,	,,	Rs. 1,679

Carts and Waggons.

In 1905 the undermentioned countries supplied 29 waggons, of the value of Rs. 38,706, against nil in 1906:—

United Kingdom	18	—valued	Rs. 34,540
Germany	10	,,	Rs. 3,880
France	1	,,	Rs. 286
Total	29		38,706

Casts of Statues and Busts.

Two hundred and fifty-one, of the value of Rs. 2,067, were received from France in 1906, against 685, of the value of Rs. 5,079, received in 1905 from France, Germany, and Holland. The decrease was of Rs. 3,012 in value due principally to imports from France.

Cement.

The imports for 1906 showed an increase both in weight of kilos 219.528 and in value of Rs. 16,604, due principally to more imports from the United Kingdom (Rs. 17,883) and from France (Rs. 2,453). From Belgium there was a decrease of Rs. 2,741.

Cheese.

Compared with 1905 the imports for 1906 showed a decrease of kilos 8,250 in weight and of Rs. 8,698 in value, due to the United Kingdom, Germany, and Holland which showed decreases of Rs. 1,950, Rs. 1,070, and Rs. 7,094, respectively. France showed an increase of Rs. 364.

Chocolate and Cocoa.

The imports for 1906 showed an increase both in weight of kilos 2,494 and in value of Rs. 3,571 over the imports for 1905, due principally to the United Kingdom and France, which provided for surplus values of Rs. 1,121 and Rs. 1,288, respectively, over the previous year.

Choorah.

In 1906 Continental India supplied kilos 10,485 more than in 1905, with a surplus in value of Rs. 1,953.

Clocks and Watches.

The imports for 1906 showed a decrease of 5,467 pieces with a falling off in value of Rs. 14,075, due chiefly to the United Kingdom, France, Germany, and Switzerland, which provided for Rs. 1,161, Rs. 6,983, Rs. 855, and Rs. 5,489, respectively, less than in 1905. From the United States there was an increase of Rs. 493.

Coals.

The imports for 1906 amounted to kilos 48,945,018 of the value of Rs. 1,788,351, against for 1905 kilos 44,903,493 of the value of Rs. 1,247,563, showing an increase both in weight of kilos 4,041,525 and in value of Rs. 540,788. From the United Kingdom and Australia kilos 5,638,445 and kilos 4,011,108 more were imported in 1906 with surplus in value of Rs. 545,609 and Rs. 86,081, respectively, while from Continental India kilos 6,257,252 less were received with a shrinkage in value of Rs. 108,559; from Belgium kilos 20,320, of the value of Rs. 790, were received in 1906 against nil in 1905. Natal supplied kilos 628,904, of the value of Rs. 16,868, in 1906, against nil in the previous year.

Coffee.

The imports for 1906 showed, as compared with 1905, a shrinkage both in weight of kilos 67,089 and in value of Rs. 39,881. Decreases are from Continental India, Ceylon, and Brazil, which provided for Rs. 34,000, Rs. 763, and Rs. 12,591, respectively. The United States provided for Rs. 5,137 in 1905, against nil in 1906. Java provided for Rs. 6,276 more than in 1905, while Singapore and Pondichery supplied for the value of Rs. 4,681 and Rs. 1,145, respectively, in 1906, against nil in 1905.

Confectionery.

The imports for 1906 amounted to Rs. 82,262, against Rs. 80,279 in 1905, showing a surplus of Rs. 1,983. Slight increases were noted under Continental India (Rs. 443), France (Rs. 2,284), Switzerland (Rs. 367), Réunion (Rs. 659), and Seychelles. Austria provided for Rs. 5,825 in 1905, against nil in 1906. Decreases were from the United Kingdom (Rs. 5,564), Holland, Belgium, and China. Australia and Réunion provided for Rs. 9,088 and Rs. 659, respectively, in 1906, against nil in 1905. Small supplies were received from Spain, Turkey, Egypt, and Singapore in 1906.

Copperah or Poonac.

The imports for 1906 amounted to kilos 27,405, of the value of Rs. 1,959, against kilos 996, of the value of Rs. 272, in 1905, showing an increase both in weight of kilos 26,409 and in value of Rs. 1,687. This article is exclusively imported from Seychelles.

Copper.

Yellow.—The imports for 1906 showed an increase of kilos 1,783 in weight and of Rs. 2,553 in value as compared with 1905. The imports were exclusively from the United Kingdom.

Old.—The imports for 1906 showed an increase both in weight of kilos 4,155 and in value of Rs. 2,585 as compared with 1905. The United Kingdom provided for a surplus of Rs. 4,298 in 1906, while France provided for Rs. 1,713 in 1905, against nil in 1906.

Sheets and Nails, red.—Compared with the previous year, the supplies for 1906 showed an increase both in weight of kilos 2,420 and in value of Rs. 6,606. The United Kingdom provided for a surplus of Rs. 7,027, while France showed a shrinkage of Rs. 421.

Cordage.

Coir.—Kilos 78,775, of the value of Rs. 16,954, were imported in 1906, the whole quantity from Continental India, which provided for Rs. 6,833 less than in 1905. The United Kingdom and Hong Kong supplied Rs. 438 and Rs. 3,672, respectively, in 1905, against nil in 1906.

Oiled.—Kilos 5,787 less were received in 1906 than in the previous year, giving a falling off of Rs. 3,384 in value.

Hemp.—The imports for 1906 amounted to kilos 31,680, of the value of Rs. 20,836, against kilos 30,902, of the value of Rs. 15,601, in 1905, showing an increase both in weight of kilos 778 and in value of Rs. 5,235, due chiefly to Continental India which provided for Rs. 7,350 more than in 1905. Decreases were noted from the United Kingdom (Rs. 852) and Hong Kong (Rs. 1,330).

Hemp, oiled.—Compared with 1905 the imports for 1906 showed a decrease both in weight of kilos 6,056 and in value of Rs. 2,703. The United Kingdom showed a shrinkage of Rs. 431, while Continental India and France provided for Rs. 1,414 and Rs. 858, respectively, in 1905, against nil in the past year.

Cordials and Liquors.

Litres 8,340, of the value of Rs. 21,485, were imported in 1906, against litres 6,794, of the value of Rs. 21,072, in 1905. There was an increase both in quantity of litres 1,546 and in value of Rs. 413, due to slight increases from the United Kingdom, China, and Spain. Slight decreases were noted from France, Holland, and Germany.

Corks and Bungs.

Compared with 1905 the imports for 1906 showed a decrease both in number of 2,277,255 corks and in value of Rs. 5,849, due specially to France which provided for Rs. 6,577 less than in the previous year. From Spain 100,000 corks, of the value of Rs. 487, were received in 1905, against nil in 1906, while from the United Kingdom 493,896 corks more were received, with a surplus in value of Rs. 1,197.

Corn, Grain, and Meal.

Barley.—The imports for 1906 showed, when compared with 1905, a decrease both in quantity of kilos 27,585 and in value of Rs. 2,859, due specially to less supplies from Continental India which provided for Rs. 2,494 less than in the previous year. From the United Kingdom kilos 304, of the value of Rs. 365, were received in 1905, against nil in 1906.

Beans.—Kilos 148,958, of the value of Rs. 20,195 were received in 1906 against kilos 118,159, of the value of Rs. 19,306 in 1905. There was an increase both in weight of kilos 30,799 and in value of Rs. 889. Continental India, China, and France provided for Rs. 5,300, Rs. 1,978, and Rs. 1,956, respectively, more than in 1905. Decreases were noted from Réunion (Rs. 6,849), the United Kingdom (Rs. 876), Madagascar and Australia.

Dholl.—Decrease both in weight of kilos 492,378 and in value of Rs. 40,850.

Gram.—Decrease both in weight of kilos 974,856 and in value of Rs. 84,265.

Lentils.—Decrease both in weight of kilos 54,920 and in value of Rs. 13,472.

Dholl, gram, and lentils were received from Continental India during the two years. Only 20 kilos lentils, of the value of Rs. 5, were received from France in 1905.

Maize.—Only 350 kilos, of the value of Rs. 35, were received from Sandalwood in 1906. In 1905 Continental India and Madagascar supplied kilos 790, of the value of Rs. 56, and kilos 30,758, of the value of Rs. 2,864, respectively. There was, therefore, a decrease in the importation of kilos 31,198 in weight and of Rs. 2,885 in value.

Oats.—Compared with 1905 the imports for 1906 showed a decrease both in weight of kilos 920,649 and in value of Rs. 107,881. From Australia there was a falling off in weight of kilos 679,798, with a shortage in value of Rs. 81,190. The United Kingdom and the Argentine Confederation supplied kilos 1,740, of the value of Rs. 343, and kilos 400,000, of the value of Rs. 43,680, respectively, in 1905, against nil in the past year. From Continental India there was an increase of kilos 160,889, with a surplus in value of Rs. 17,332.

Peas.—The imports for 1906 amounted to kilos 133,017, of the value of Rs. 24,450, against kilos 203,164 of the value of Rs. 33,584 for 1905. The decrease was of kilos 70,147 in weight and of Rs. 9,134 in value. The decreases were from the United Kingdom (Rs. 1,036), Continental India (Rs. 1,085), France (Rs. 1,023), Madagascar (Rs. 5,445), and Réunion.

Rice.—Compared with 1905 the imports for 1906 showed a large increase both in weight of kilos 9,072,147 and in value of Rs. 1,281,946, accounted for as under:—

Continental India.—Excess of kilos 6,643,383 in weight and of Rs. 1,003,146 in value.

China.—Excess of kilos 71,737 in weight and of Rs. 10,692 in value.

Madagascar.—Excess of kilos 5,382 in weight and of Rs. 1,432 in value.

Straits Settlements.—Shortage of kilos 206,580 in weight and of Rs. 30,636 in value.

Cochinchina.—Supplied kilos 2,251,500, of the value of Rs. 256,443, in 1906, against nil in the previous year.

Singapore.—Supplied kilos 306,725, of the value of Rs. 40,869, in 1906, against nil in the previous year.

Wheat.—The imports for 1906 amounted to kilos. 410,669, of the value of Rs. 46,643, out of which quantity Continental India supplied kilos 406,785, of the value of Rs. 46,436, and Delagoa Bay, kilos 3,884, of the value of Rs. 207. In 1905, wheat was exclusively imported from Continental India, which supplied kilos 432,000, of the value of Rs. 46,382. There was, therefore, a decrease in the importation of kilos 21,331 in weight, but a surplus in value of Rs. 261 as compared with the previous year.

Wheat Flour.—The imports for 1906 showed an increase both in weight of kilos 3,906,151 and in value of Rs. 576,613, due to more supplies from Australia (Rs. 563,830), Continental India (Rs. 12,322), and France (Rs. 483). From China there was a slight decrease amounting to Rs. 23.

Cotton Manufactures.

Coloured.—The imports for 1906 amounted to metres 5,454,328, of the value of Rs. 831,121, against 3,729,454 metres, of the value of Rs. 703,842, in 1905, showing an increase, both in measure of metres 1,724,874 and in value of Rs. 127,279, due chiefly to the United Kingdom which supplied metres 1,896,911 more, with an excess in value of Rs. 187,512. Decreases were noted from Continental India (Rs. 2,663), Belgium (Rs. 5,067), France (Rs. 12,748), Germany (Rs. 23,164), Pondichery (Rs. 6,291), Switzerland (Rs. 7,828), and Hong Kong. Slight increases were noted from Italy, China, and Japan.

Hosiery.—The imports for 1906 amounted to Rs. 35,376, against Rs. 29,523 for 1905, showing an increase of Rs. 5,853, due to more supplies from the United Kingdom (Rs. 914), Germany (Rs. 6,919), Continental India, and China. From France there was a falling off of Rs. 2,235.

Plain.—The imports for 1906 amounted to metres 4,937,394, of the value of Rs. 862,577, against metres 5,252,590, of the value of Rs. 704,581, for 1905, showing a decrease in measure of metres 315,196, but a surplus in value of Rs. 157,996, due to supplies from the United Kingdom which provided metres 4,437,853, of the value of Rs. 790,018, in 1906, against metres 4,748,177, of the value of Rs. 628,211, in 1905, showing a shortage of metres 310,324 in measure, but a surplus of Rs. 161,807 in value. France supplied metres 45,276 more with a surplus of Rs. 3,408 in value. Continental India supplied metres 51,259 less with a shortage in value of Rs. 6,776. Slight decreases were noted from Germany and Belgium. Holland and Pondichery provided for Rs. 863 and Rs. 185, respectively, in 1905, against nil in 1906.

Thread for Sewing.—Kilos 106 more were imported in 1906, but there was a decrease of Rs. 7,965 in the value of the importation. The United Kingdom supplied kilos 549 more than in 1905, but with a falling off in value of Rs. 5,382. France, Belgium, and Germany provided for Rs. 1,081, Rs. 1,441, and Rs. 61, respectively, in 1905, against nil in 1906.

Waste.—The imports for 1906 amounted to kilos 6,610, of the value of Rs. 2,589, received from the United Kingdom, against, for the previous year, kilos 20,458, of the value of Rs. 7,498, showing a decrease both in weight of kilos 13,848 and in value of Rs. 4,909, due chiefly to the United Kingdom which supplied kilos 13,128 less, giving a shortage of Rs. 4,656 in value. In 1905 Continental India supplied kilos 720, of the value of Rs. 253, against nil in 1906.

Wool.—The imports for 1906 amounted to kilos 4,962, of the value of Rs. 1,695, received from Continental India against kilos 14,706, of the value of Rs. 8,065, for 1905, showing a shortage in weight of kilos 9,744 and in value of Rs. 6,370, due chiefly to Continental India which supplied kilos 7,552 less with a decrease of Rs. 3,090 in value. The United Kingdom supplied kilos 2,182, of the value of Rs. 3,276, in 1905, against nil in the past year.

Earthen and China Wares.

The imports for 1906 amounted to Rs. 61,886, against Rs. 97,438 for 1905, showing a decrease of Rs. 35,552. Decreases were from France (Rs. 36,111), Germany (Rs. 4,021), Continental India (Rs. 955), China (Rs. 503), and Belgium. The United Kingdom and Austria showed increases of Rs. 370 and Rs. 4,597, respectively.

Fireworks.

The imports for 1906 showed, as compared with 1905, an increase of Rs. 2,221, due chiefly to China, which provided for Rs. 2,126 more than in the previous year. Slight increase was noted from Germany.

Fish.

Dried or Salted.—Kilos 600,222, of the value of Rs. 186,448, were imported in 1906, against kilos 650,109, of the value of Rs. 152,751 in 1905. There was a decrease in weight of kilos 49,887 but a surplus in value of Rs. 33,697, due chiefly to Continental India, which supplied kilos 48,764 less but a surplus of Rs. 11,236 in value, also to Nova Scotia which supplied kilos 127 less with a surplus in value of Rs. 711.

Decreases were noted from the United Kingdom (Rs. 1,525), Seychelles, France (Rs. 3,552), Madagascar (Rs. 6,799), Newfoundland (Rs. 1,676) and the United States (Rs. 5,235. Cape Colonies and China provided kilos 46,638 and kilos 1,059 more, with surplus values of Rs. 39,875 and Rs. 387, respectively, Zanzibar and Canada provided for Rs. 573 and Rs. 1,257 in 1905, against nil in the past year, while Holland, Norway, and Réunion provided for Rs. 1,625, Rs. 382, and Rs. 159, respectively, in 1906, against nil in the previous year.

Pickled.—Kilos 15,950 more were received in 1906, giving a surplus of Rs. 2,195 in value, due chiefly to the United States, which supplied kilos 44,330 more with an increase of Rs. 12,057 in value. Decreases are from the United Kingdom (Rs. 1,956), France (Rs. 1,067) and Nova Scotia, which supplied kilos 6,669 less with a shortage in value of Rs. 4,187. From Canada kilos 11,610, of the value of Rs. 2,502, were received in 1905, against nil in 1906.

Flowers.

Artificial.—The imports for 1906 showed, when compared with 1905, a decrease of Rs. 717, due to less supplies from France. The United Kingdom showed a small increase.

Fruits.

Almonds, dried.—Kilos 9,226, of the value of Rs. 4,436, were received in 1906, against kilos 6,627, of the value of Rs. 3,299 in 1905. There was an increase of kilos 2,599 in weight and of Rs. 1,137 in value, due chiefly to more imports from Continental India.

Cocoanuts.—Exclusively supplied from Seychelles, the imports for 1906 show that 273,475 cocoanuts less were received, with a shortage in value of Rs. 3,067.

Fresh.—The imports for 1906 show an increase of Rs. 5,253 in value, due chiefly to Cape Colony, which provided for Rs. 7,379 in 1906, against nil in the previous year. From Seychelles there was a decrease of Rs. 1,259.

Pistacchio nuts.—The imports for 1906 amounted to kilos 5,238, of the value of Rs. 866, against kilos 37,175, of the value of Rs. 8,244, showing a decrease of kilos 31,937 in weight and of Rs. 7,378 in value, due chiefly to less imports from Madagascar, which provided for a short value of Rs. 7,269.

Raisins.—Kilos 10,300, of the value of Rs. 3,718, were received in 1906, against kilos 20,443, of the value of Rs. 8,568, in 1905. The decrease was of kilos 10,143 in weight and of Rs. 4,850 in value, due chiefly to Cape Colony, which provided for Rs. 3,520 less than in 1905. Continental India and France showed also decreases of Rs. 1,482 and Rs. 364, respectively, while the United Kingdom showed an increase of Rs. 518.

Of other sorts.—The value of the imports for 1906 amounted to Rs. 5,962, against Rs. 3,290 for 1905, showing an increase of

Rs. 2,672, due chiefly to France, which provided for Rs. 2,145 more than in 1905. Cape Colony supplied for Rs. 267 in 1906, against nil in 1905.

Ghee.

This article is exclusively supplied from Continental India which in 1906 provided kilos 32,999 more than in the previous year, giving a surplus in value of Rs. 41,485.

Glassware.

22,933 pieces less were received than in 1905, with a shortage of Rs. 18,575 in value. Decreases were from France (Rs. 14,383), Germany (Rs. 8,948), Austria (Rs. 422) and China. The United Kingdom supplied 18,733 pieces more with an excess of Rs. 4,243 in value.

Glue.

Compared with the previous year, kilos 2,611 less were received in 1906, with a falling off of Rs. 1,608 in value, due to decreases from the United Kingdom (Rs. 505) and France (Rs. 1,059).

Grease-Cart.

The imports for 1906 amounted to kilos 85,613, of the value of Rs. 13,199, against kilos 61,751, of the value of Rs. 7,564, for 1905, showing an increase of kilos 23,862 in weight and of Rs. 5,635 in value.

The United Kingdom supplied kilos 16,466 more than in 1905, with a surplus of Rs. 2,774 in value. Kilos 7,396 of the value of Rs. 2,861 were received from the United States in 1906 against nil in 1905.

Groceries.

The value of the imports for 1906 was Rs. 26,712, against Rs. 21,856 for 1905, showing an increase of Rs. 4,856, due chiefly to more supplies received from the United Kingdom and Continental India, amounting to Rs. 3,161 and Rs. 1,396 respectively.

Haberdashery.

The imports for 1906 amounted to Rs. 613,311, against Rs. 535,828 for 1905, showing an excess of Rs. 77,483, due to increases from the United Kingdom (Rs. 18,383), Continental India (Rs. 11,201), China (Rs. 1,310), France (Rs. 56,787) and Japan (Rs. 487). Decreases were noted from Belgium (Rs. 374), Germany (Rs. 1,345), Holland (Rs. 5,405), Switzerland (Rs. 2,395), Pondichery (Rs. 469) and the United States (Rs. 285).

Hardware and Cutlery.

The value of the imports for 1906 amounted to Rs. 1,021,629, against Rs. 564,804 for 1905, showing the large increase of Rs. 456,825, due chiefly to more supplies from the United Kingdom amounting to Rs. 430,510. There were increases also from Belgium (Rs. 23,462), the United States (Rs. 9,792), Continental India (Rs. 298), Austria (Rs. 860), China (Rs. 294), Germany (Rs. 301), Sweden and Switzerland. Decreases are from France (Rs. 8,628), Australia, Denmark, and Holland.

Hats.

Felt.—11,242 hats, of the value of Rs. 17,103, were received in 1906, against 9,535 hats, of the value of Rs. 15,646, in 1905, with an increase of 1,707 hats and of Rs. 1,457 in value over the previous year, due to more supplies from Austria (Rs. 523), France (Rs. 697) and Italy (Rs. 1,384). From the United Kingdom there was a falling off of Rs. 1,044.

Silk.—The imports for 1906 amounted to 34 hats, of the value of Rs. 260, supplied exclusively from the United Kingdom, against for the previous year 149 hats, of the value of Rs. 1,224, out of which 145, valued Rs. 1,211, were received from the United Kingdom and the remainder from Continental India. There was, therefore, a shrinkage from the United Kingdom of 111 in number, with a shortage of Rs. 951 in value.

Straw.—The imports for 1906 amounted to 53,252 hats, of the value of Rs. 47,090, against 60,117, of the value of Rs. 40,084, in 1905, showing a decrease of 6,865 in number, with an increase of Rs. 7,006 in value, due chiefly to the importation from Madagascar, which supplied only 2,159 hats, of the value of Rs. 2,371 in 1906, against 24,026 hats, of the value of Rs. 3,955 in 1905, showing a shortage of 21,867 hats, with a decrease of Rs. 1,584 only. The United Kingdom supplied 19,932 more hats with an increase of Rs. 15,322 in value, while from France 4,198 less hats were received, giving a shortage of Rs. 5,529 in value.

Of other sorts.—The imports for 1906 amounted to Rs. 6,457, against Rs. 5,625 for 1905, showing an increase of Rs. 832, due chiefly to the United Kingdom, which provided for Rs. 1,588 more than in 1905. Decreases were noted from France (Rs. 441) and Continental India (Rs. 157). China and Italy supplied small quantities in 1905 against nil in 1906.

Hay and Straw.

The imports for 1906 amounted to kilos 10,104, of the value of Rs. 1,252, against kilos 181,721, of the value of Rs. 31,473 in 1905, showing a decrease of kilos 171,617 in weight, and of Rs. 30,221 in value, due chiefly to the importation from the Argentine Confederation which supplied kilos 170,250, of the value of Rs. 29,837 in 1905, against nil in 1906. From Australia there was a small decrease amounting to Rs. 391.

Hemp.

Undressed.—The imports for 1906 amounted to kilos 13,377, of the value of Rs. 12,439, against kilos 10,023, of the value of Rs. 8,777 in 1905, showing an increase of kilos 3,354 in weight, and of Rs. 3,662 in value, due chiefly to the United Kingdom, which supplied kilos 3,511 more, with a surplus of Rs. 3,765 in value. France, however, showed a falling off of Rs. 103.

Hides

Raw and Salted.—None received in 1906, against kilos 5,807, of the value of Rs. 5,457 from Madagascar in the previous year.

Tanned.—The imports for 1906 showed an increase of kilos 371, and of Rs. 2,160 in value, as compared with 1905. The increase was from Continental India (Rs. 2,984), while a decrease was shown from Pondichery amounting to Rs. 810.

India Rubber Wares.

The value of the imports for 1906 amounted to Rs. 24,542, against Rs. 15,669 for 1905, showing an increase of Rs. 8,873, due to more imports from the United Kingdom and from France, which provided for surplus values amounting to Rs. 5,351 and Rs. 3,536 respectively.

Iron.

Bars.—Kilos 705,755, of the value of Rs. 86,974, were received in 1906, against kilos 665,273, of the value of Rs. 75,548 in 1905. There was, therefore, an increase of kilos 40,482 in weight, and of Rs. 11,426 in value. The United Kingdom supplied kilos 62,087 more, with a surplus in value of Rs. 13,100, while from Belgium there was a shrinkage of kilos 22,761 in weight and of Rs. 1,570 in value.

Nails.—Kilos 186,445, of the value of Rs. 49,931, were imported in 1906, against kilos 158,827, of the value of Rs. 40,695 in 1905. There was an increase both in weight of kilos 27,618 and in value of Rs. 9,236. The United Kingdom supplied kilos 20,844 more, with a surplus in value of Rs. 8,068. Small increases were noted from Belgium (Rs. 133), France (Rs. 270) and Germany (Rs. 2,035). From Continental India there was a decrease of Rs. 1,270.

Pig.—Exclusively imported from the United Kingdom, which supplied kilos 48,768 more in weight, with a surplus of Rs. 3,782 in value, as compared with the importation for 1905.

Iron sheets.—The United Kingdom supplied kilos 123,024 less, with a shortage in value of Rs. 3,589, as compared with 1905. Kilos 1,345, valued Rs. 224, were received from Belgium in 1906, against nil in 1905.

Wrought of other sorts.—The imports for 1906 amounted to kilos 490,076, of the value of Rs. 108,702, against, for 1905, kilos 1,080,201, of the value of Rs. 173,389, showing a decrease of kilos 590,125 in weight and of Rs. 64,687 in value, due to the United Kingdom, Belgium, and Germany, which provided for less values of Rs. 62,242, Rs. 1,492 and Rs. 897 respectively.

Jams, Jellies, and Marmalade.

Kilos 11,756, of the value of Rs. 7,184, were imported in 1906, against kilos 14,704, of the value of Rs. 8,986 in 1905. There was a decrease both in weight of kilos 2,948 and in value of Rs. 1,802, due to short supplies from the United Kingdom and Australia.

Jewellery.

Compared with the previous year, the imports for 1906 showed a decrease of Rs. 17,794. France showed a decrease of Rs. 21,321. Increases were, however, noted from the United Kingdom and Continental India amounting to Rs. 2,767 and Rs. 804 respectively.

Juice of Lemon or Lime.

Hectolitres 201·42, of the value of Rs. 2,539, were received in 1906, against hectolitres 8·75, of the value of Rs. 831, in 1905. There was, therefore, an increase of hectolitres 192·67 in measure and of Rs. 1,708 in value, due chiefly to the United Kingdom which supplied hectolitres 192·65 more, with a surplus of Rs. 1,696 in value.

Lard.

Compared with the previous year the imports for 1906 showed a decrease of kilos 78,019 in weight and of Rs. 3,609 in value. China, Continental India and the United States showed decreases of Rs. 22,162, Rs. 8,306, and Rs. 4,134 respectively. Increases were noted from Australia, (Rs. 10,694) and France (Rs. 25,190). Denmark provided for Rs. 5,035 in 1905, against nil in the past year.

Lead.

Sheets and Pipes.—Kilos 45,432, of the value of Rs. 12,440, were received in 1906, against, for the previous year, kilos 65,004, of the value of Rs. 9,105. There was accordingly a decrease of kilos 19,572 in weight, but an increase of Rs. 3,335 in the value of the importation, due chiefly to supplies from the United Kingdom.

Leather.

Wrought: *Boots and Shoes.*—Compared with 1905 the imports for 1906 showed that 1,459 pairs more were received with, however, a shortage of Rs. 16,289 in the value of importation. From the United Kingdom and from France there were received 2,462 pairs and 1,005 pairs less, with decreases in value of Rs. 17,429 and Rs. 3,510 respectively. From Continental India 3,932 pairs more were received, with a surplus of Rs. 2,183 only in value. The United States supplied 183 pairs more, with an increase of Rs. 1,930 in value; 549 pairs of the value of Rs. 401, were received in 1906 from Pondichery, against nil in 1905.

Sole.—Kilos 6,144, of the value of Rs. 11,066, were received in 1906, against kilos 11,569, of the value of Rs. 18,119, in 1905, giving a decrease of kilos 5,425 in weight and of Rs. 7,053 in value, due almost exclusively to short supplies from Australia.

Wrought, of other sorts.—The value of the imports for 1906 amounted to Rs. 74,799, against Rs. 61,023 in 1905, showing an increase of Rs. 13,776. Increases were from the United Kingdom (Rs. 4,960), Germany (Rs. 1,508), and France (Rs. 7,615).

Lime.

Phosphate.—In 1906 there were received from Belgium kilos 30,900, of the value of Rs. 4,628, against in 1905, kilos 127,397, of the value of Rs. 17,148, imported from France. The decrease was of kilos 96,497 in weight and of Rs. 12,520 in value.

Superphosphate.—The imports for 1906 amounted to kilos 484,523, of the value of Rs. 33,318, against, for the previous year, kilos 201,600, of the value of Rs. 9,766, showing an increase of kilos 282,923 in weight and of Rs. 23,552 in value.

Linen Manufactures.

Canvas.—Kilos 23,981, of the value of Rs. 28,898, were received in 1906, against kilos 12,548, of the value of Rs. 22,364, in 1905. There was an increase of kilos 11,433 in weight and of Rs. 6,534 in value—From the United Kingdom there were received kilos 12,808 more, with a surplus of Rs. 8,523 in value, while France supplied kilos 1,535, of the value of Rs. 2,043, in 1905, against nil in 1906.

Machinery and Millwork.

Machinery and Mill-work.—The imports for 1906 amounted to kilos 681,625, of the value of Rs. 410,038, against kilos 535,721, of the value of Rs. 268,428, in 1905, showing an increase of kilos 145,904 in weight and of Rs. 141,610 in value. There were received from the United Kingdom kilos 130,925 more, with a surplus of Rs. 131,161 in value. France supplied kilos 5,752 more, with an increase of Rs. 6,614 in value. Kilos 1,632 less were received from Belgium with a shortage of Rs. 665 in value. Germany supplied kilos 11,641, of the value of Rs. 7,831, in 1906, against nil in 1905, while the United States supplied kilos 782, of the value of Rs. 3,332, in 1905, against nil in 1906.

Machinery consisting of Automobiles, Steam Road Engines, Locomotives, Waggons and Trucks, Rails and accessories and Wire Rope for Agricultural purposes.

The imports under this heading for 1906 amounted to kilos 2,095,676, of the value of Rs. 333,308, and those for 1905 aggregated Rs. 238,218 made up of Rs. 44,466, value of four locomotives, and Rs. 193,752, value of kilos 1,378,999 of machinery, consisting of tramway materials, accessories, wire rope, &c. The increase was of Rs. 95,090 in value.

The following is a comparative statement of the amount imported from each country, with the rate of importation for the two years 1905 and 1906:—

—	1905.		1906.	
	Value.	Rate.	Value.	Rate.
	Rs.	Per cent.	Rs.	Per cent.
Germany	151,488	63·6	251,419	75·5
Belgium	42,795	18·0	66,796	20·0
France	18,021	7·5	15,093	4·5
United Kingdom	25,914	10·0	—	—

From the above table it will be seen that German goods head the list and that no goods were imported from the United Kingdom in 1906.

Manure.

Guano.—Compared with 1905 the imports for 1906 showed a shrinkage of kilos 167,181 in weight and of Rs. 13,100 in value. The United Kingdom and Seychelles showed decrease of kilos 85,911 and kilos 81,280 in weight and of Rs. 11,189 in value.

Of other sorts.—Compared with 1905 the imports for 1906 showed a decrease in weight of kilos 529,144 and in value of Rs. 37,890. The Argentine Republic, Belgium, Ceylon and Holland provided for Rs. 63,070, Rs. 8,676, Rs. 3,058, and Rs. 8,407 respectively in 1905, against nil in 1906. Germany on the other hand, supplied kilos 88,708, of the value of Rs. 12,806 in 1906, against nil in the previous year. Increases were noted from the United Kingdom (Rs. 6,841), Continental India (Rs. 5,476), and France (Rs. 20,196).

Margarine.

The imports for 1906 showed a shrinkage both in weight of kilos 4,962 and in value of Rs. 3,624. Decreases were noted from the United Kingdom (Rs. 1,871), Germany (Rs. 2,300) and the United States (Rs. 5,184). Increases were from Denmark (Rs. 371) and Holland (Rs. 5,490).

Matches.

28,801 gross less were received in 1906, with a shortage in value of Rs. 24,159. Decreases were noted from Japan (Rs. 22,721) and Austria (Rs. 3,391). From Sweden there was an increase of Rs. 1,568.

Mats and Matting.

The value of the imports for 1906 amounted to Rs. 9,134, against Rs. 2,613 for 1905, showing an increase of Rs. 6,521, due specially to more supplies from China amounting to Rs. 5,231. Singapore provided for Rs. 753 in 1906, against nil in the previous year.

Meat.

Fresh Frozen.—The value of the imports for 1906 as compared with 1905, gave the following result:—

Carcases—

Cows and Oxen—Increase of Rs. 50,977 in value.

Sheep—Decrease of Rs. 7,725 in value.

Swine—None imported in 1905, against Rs. 4,226 in value in the past year.

Military Articles.

The imports for 1906 amounted to Rs. 694,987, against Rs. 1,062,000 in 1905, showing a decrease of Rs. 367,013, due to the United Kingdom and Continental India, which showed decreases of Rs. 270,248 and Rs. 100,387 respectively. The United States provided for Rs. 3,622 in 1906, against nil in 1905.

Motor Cars.

Eight, valued Rs. 29,452, were received in 1906, against five, valued Rs. 18,603, in 1905. There was an increase of three in number with a surplus of Rs. 10,849 in value. Two motor cars were received in each of the years 1905 and 1906 from the United Kingdom, with a shortage of Rs. 2,626 in value for the year 1906. France provided three motor cars more, giving an increase in value of Rs. 13,475.

Musical Instruments.

The value of the imports for 1906 amounted to Rs. 13,576, against Rs. 27,304 for 1905, showing a decrease of Rs. 13,728, due chiefly to France which supplied for a less value of Rs. 10,754. Small decreases were noted from the United Kingdom, Germany, and the United States

Oil.

Castor.—438,361 kilos, of the value of Rs. 156,254, were received in 1906, against kilos 381,032 of the value of Rs. 114,920 in 1905, showing an increase both in weight of kilos 57,329 and of Rs. 41,334 in value.

Castor oil is exclusively received from Continental India.

Cocoanut.—The imports for 1906 amounted to hectolitres 2,101, of the value of Rs. 51,297, against hectolitres 4,948, of the value of Rs. 97,698, showing a decrease of hectolitres 2,847 in measure and of Rs. 46,401, due almost exclusively to short supplies from Seychelles.

Gingely.—Kilos 62,052, of the value of Rs. 22,470, were imported in 1906, against kilos 190,176, of the value of Rs. 60,300, in 1905. There was therefore a decrease of kilos 128,124 in weight and of Rs. 37,830 in value, due chiefly to Continental India, which supplied kilos 127,524 less, with a shortage of Rs. 37,567 in value. A small decrease was also noted from China.

Linseed.—Hectolitres 928, of the value of Rs. 27,908, were received in 1906, against hectolitres 1,426, of the value of Rs. 36,254, in 1905, giving a decrease for 1906 of hectolitres 498 in measure and of Rs. 8,346 in value, due to short supplies from the United Kingdom.

Mustard.—Exclusively received from Continental India, the imports for 1906 showed, when compared with 1905, a decrease of kilos 101,990 in weight but an increase of Rs. 1,311 in value.

Petroleum.—The imports for 1906 showed an increase of hectolitres 5,537 in measure but a shortage of Rs. 5,279 in the value of the importation. The United States supplied hectolitres 3,599 more, with, however, a shortage of Rs. 51,502 in value. Borneo and Sumatra supplied respectively hectolitres 1,282, of the value of Rs. 14,428, and hectolitres 2,945, of the value of Rs. 48,094, in 1906, against nil in 1905. Russia supplied hectolitres 2,280, of the value of Rs. 36,098 in 1905, against nil in 1906.

Pistacchio.—Kilos, 19,632 less were received in 1906, with, however, a surplus of Rs. 2,049 in value, due chiefly to Continental India, which supplied kilos 23,519 less, with a surplus of Rs. 593 in value. Pondichery showed a decrease of kilos 8,776 in weight and of Rs. 3,173 in value. From China and Japan there were received kilos 11,655, of the value of Rs. 4,284, and kilos 1,008, of the value of Rs. 345, respectively, in 1906, against nil in 1905.

Of other sorts.—Hectolitres 712, with a surplus of Rs. 38,894, were received in 1906 more than in 1905, due to the United States, which showed an increase of Rs. 43,303. Decreases were from the United Kingdom (Rs. 10,993) and Continental India (Rs. 5,237).

Onions and Garlic.

Kilos 67,978 less, with a shortage of Rs. 4,485 in value, were received in 1906, due chiefly to short supplies from Continental India.

Opium, Crude.

The imports for 1906 amounted to kilos 1,137, of the value of Rs. 29,108, against kilos 1,593, of the value of Rs. 41,442 in 1905, showing a decrease both in weight of kilos 456 and in value of Rs. 12,334. A decrease of kilos 505 in weight and of Rs. 13,452 in value was noted from Continental India. Turkey supplied kilos 54, of the value of Rs. 1,186 in 1906, against nil in 1905.

Painters' and Dyers' Colours and Materials.

The imports for 1906 amounted to Rs. 102,774, against Rs. 87,502 for 1905, showing an increase of Rs. 15,272 in value. Increases were from the United Kingdom (Rs. 15,051), Germany (Rs. 763), Australia and China. Slight decreases were noted from Continental India, France, and Switzerland.

Paper, Cigarette.

The imports for 1906 showed when compared with the previous year a decrease both in weight of kilos 1,994 and in value of Rs. 27,044, due principally to short supplies from France.

Paper.

Packing.—The imports of 1906 amounted to Rs. 27,801, against Rs. 24,372 for 1905, showing an increase of Rs. 3,429 in value. Increases were from France (Rs. 835) and the United Kingdom (Rs. 3,302), while a decrease of Rs. 528 was noted from Germany.

Printing.—Compared with 1905 the imports for 1906 showed an increase of Rs. 2,737 in value, due chiefly to more supplies from the United Kingdom.

Stained for hanging.—Decrease in value of Rs. 2,649. Belgium provided for Rs. 3,243 in 1905, against nil in 1906. Slight increases were, however, noted from the United Kingdom and France.

Perfumery.

Compared with the previous year the imports for 1906 showed an increase of Rs. 23,325 in value. Increases were from France (Rs. 18,565), the United Kingdom (Rs. 2,640), Continental India (Rs. 837) and China (Rs. 1,229).

Pitch and Tar.

Decrease of Rs. 2,598 in value, due to short supplies from the United Kingdom.

Pockets, Empty.

The imports for 1906 amounted to 588,700 pockets, of the value of Rs. 143,105, against 1,409,000 pockets, of the value of Rs. 256,269, for 1905, showing a decrease both in number of 820,300 and in value of Rs. 113,164. From Continental India there was a decrease of 821,000 in number and of Rs. 113,295 in value. The United Kingdom provided for Rs. 131 in 1906, against nil in 1905.

Pork, Salted.

Compared with 1905, the imports for 1906 showed an increase both in weight of kilos 3,615 and in value of Rs. 3,702, due to the United States, which supplied kilos 3,613 more, with a surplus in value of Rs. 3,058.

Postal Parcels.

The value of postal parcels imported in 1906 amounted to Rs. 301,567, against, for the previous year, Rs. 263,199, showing an increase of Rs. 38,368. Increases were chiefly from the United Kingdom (Rs. 17,109), Continental India (Rs. 6,480), Egypt (Rs. 1,918), France (Rs. 20,726), and the United States (Rs. 789). Decreases were noted from Japan (Rs. 6,880) and Switzerland (Rs. 1,277).

Potash.

Nitrate of.—There was an increase both in weight of kilos 628,279 and in value of Rs. 121,077, due exclusively to more imports from Continental India. France supplied kilos 10,574, of the value of Rs. 3,708, in 1905, against nil in 1906.

Sulphate of.—There was an increase of kilos 227,133 in weight and of Rs. 15,345 in value. Increases were from Germany (Rs. 28,964), while decreases were noted under France (Rs. 9,337), and the United Kingdom (Rs. 9,981). The Cape Colonies provided for Rs. 5,599 in 1906, against nil in the previous year.

Potatoes.

Compared with 1905, the imports for the past year showed an increase both in weight of kilos 322,192 and in value of Rs. 25,888.Increases were from Continental India (Rs. 20,784), and France (Rs. 8,345). Decreases were noted from Australia (Rs. 636), and from Réunion (Rs. 1,435).

Prints and Engravings.

There was a decrease of Rs. 1,073, due to France, which provided for a less value of Rs. 3,023; from Germany there was an increase of Rs. 1,152.

Provisions, Preserved.

Compared with 1905, the value of the imports for 1906 showed a falling off of Rs. 19,722. Decreases were from the

United Kingdom (Rs. 8,512), Australia (Rs. 508), France (Rs. 6,902), Switzerland (Rs. 439), and the United States (Rs. 7,270). Slight increases were noted from China (Rs. 1,450) and Portugal (Rs. 4,930).

Rattans.

In 1906 rattans were received from Continental India and Singapore to the amount of kilos 16,217, of the value of Rs. 3,566, and kilos 38,087, of the value of Rs. 7,783, aggregating kilos 54,304, of the value of Rs. 11,349, against, for 1905, kilos 12,862, of the value of Rs. 3,358, received from China. There was, therefore, an increase of kilos 41,442 in weight and of Rs. 7,991 in value.

Rosin.

Decrease of kilos 12,153 in weight and of Rs. 1,512 in value. France provided for Rs. 1,369 in 1905, against nil in 1906; from Continental India there was a decrease of Rs. 678; an increase of Rs. 535 was noted from the United Kingdom.

Saddlery and Harness.

The value of the imports for 1906 amounted to Rs. 5,823, against, for 1905, Rs. 12,290, showing a decrease of Rs. 6,467. The United Kingdom, Continental India, and France showed decreases of Rs. 4,030—Rs. 1,203—and Rs. 1,234 respectively.

Salt.

Compared with 1905, the imports for 1906 showed the large increase of kilos 4,343,743 in weight and of Rs. 146,413 in value. From the United Kingdom there was an increase of kilos 3,366,533 in weight and of Rs. 115,918 in value. Kilos 829,007, of the value of Rs. 24,172, and kilos 148,000, of the value of Rs. 6,312, were received in 1906 from Aden and France, against nil in 1905.

Seeds.

Coriander.—There was an increase of kilos 1,981 in weight and of Rs. 8,804 in value, due chiefly to Continental India, which provided for a surplus value of Rs. 8,580. A small increase of Rs. 225 was noted from Pondichery.

Garden.—The value of the imports for 1906 amounted to Rs. 6,262, against Rs. 4,153 for 1905, showing an increase of Rs. 2,109 due to Ceylon, which provided for a surplus value of Rs. 2,972—from France there was a shrinkage of Rs. 656.

Mustard.—Increase both in weight of kilos 11,049 and in value of Rs. 2,684, due chiefly to Continental India, which supplied kilos 10,679 more, with a surplus of Rs. 2,585 in value.

Silk Manufactures.

Satin and Ribbons.—Metres 31,440, of the value of Rs. 26,464, were received in 1906, against metres 73,047, of the value of Rs. 56,299, in 1905. There was a decrease of metres 41,607, with a shortage of Rs. 29,835 in value. Decreases were from the United Kingdom (Rs. 6,220), Continental India (Rs. 587), China (Rs. 59), France (Rs. 15,544), Germany (Rs. 756), Belgium (Rs. 570), Switzerland (Rs. 3,332), Japan (Rs. 2,367), and Italy. Pondichery provided for Rs. 406 in 1905, against nil in 1906.

Skin.

Sheep and Goats, tanned.—Decrease both in weight of kilos 1,382 and in value of Rs. 5,936, due chiefly to Pondichery, which provided for a less value of Rs. 8,186. Continental India supplied kilos 602, of the value of Rs. 2,250 in 1906, against nil in 1905.

Soap.

Ordinary.—Decrease of kilos 22,687 in weight and of Rs. 18,897 in value, due to short supplies from France (Rs. 1,105) and from the United Kingdom (Rs. 17,826).

Soda.

Caustic.—Kilos 6,395, of the value of Rs. 1,227, were received in 1906, against kilos 63,812, of the value of Rs. 12,921, in 1905. There was a decrease of kilos 57,417 in weight and of Rs. 11,694 in value. From the quantities mentioned there were received kilos 26,007 less than in 1905 (with a shortage of Rs. 5,185 in value) of caustic soda, imported for use in local manufactures and paying duty at the lower rate of 30 cents per 1,000 kilos.

Nitrate.—The imports for 1906 amounted to kilos 1,361,495, of the value of Rs. 257,054, against, for the previous year, kilos 1,264,093, of the value of Rs. 218,753, showing an increase of kilos 97,402 in weight and of Rs. 38,301 in value, due chiefly to Chili, which provided for a surplus value of Rs. 28,040. In 1906 the United Kingdom supplied kilos 41,180, of the value of Rs. 10,261, against nil in the previous year.

Silicate.—There was a decrease of kilos 70,608 in weight and of Rs. 5,575 in value, due chiefly to short supplies from the United Kingdom.

Specie.

Gold.—The value of gold specie received from the United Kingdom in 1906 amounted to Rs. 39,385, against nil in 1905.

Paper Currency.—The value of paper currency received from the United Kingdom amounted to Rs. 30,600 for 1905, against nil in 1906.

Silver.—The value of silver currency imported in 1906 amounted to Rs. 560,646, against Rs. 738,265 for 1905, showing a falling off of Rs. 177,619 in value. From Continental India there was a decrease of Rs. 212,984, while from France there was an increase of Rs. 35,365.

Spices.

Chillies.—Compared with 1905, the imports for 1906 showed an increase of kilos 42,897 in weight and of Rs. 4,748 in value, due to more supplies from Continental India (Rs. 4,584) and Pondichery (Rs. 164).

Cloves.—Only 113 kilos, of the value of Rs. 69, were received in 1906 from Continental India, against, for the previous year, kilos 5,901, of the value of Rs. 3,129, from Continental India, Réunion, and Zanzibar, the two last-mentioned countries supplying kilos 1,110, of the value of Rs. 690, and kilos 3,569, of the value of Rs. 1,611, in 1905, against nil in the past year.

Pepper, black.—Increase of kilos 18,446 in weight and of Rs. 3,130 in value, due to more supplies from Continental India (Rs. 1,889) and Singapore (Rs. 1,473).

Spirits.

Brandy.—The imports for 1906 amounted to litres 59,244, of the value of Rs. 91,194, against, for the previous year, litres 41,184, of the value of Rs. 73,360, showing an increase of litres 18,060 in measure and of Rs. 17,834 in value. France supplied litres 15,699 more, with a surplus of Rs. 14,411 in value. An increase of litres 2,173 in measure and of Rs. 2,782 in value, was also noted from the United Kingdom.

Geneva.—Increase of 1838 litres in measure and of Rs. 2,633 in value, due to more supplies from the United Kingdom and Holland amounting to Rs. 1,488 and Rs. 1,216, respectively.

Rum.—The imports for 1906 amounted to litres 4,462, of the value of Rs. 2,320, against, for the previous year, litres 41,077, of the value of Rs. 8,451, showing a decrease of litres 36,615 in measure and of Rs. 6,131 in value, due principally to Hong Kong, which supplied litres 38,132, of the value of Rs. 7,490, in 1905, against nil in 1906. From Réunion there was an increase of litres 1,387, with a surplus of Rs. 905 in value.

Whisky.—Increase of litres 5,647 in measure and of Rs. 3,040 in value, due principally to more supplies from the United Kingdom. Litres 448, of the value of Rs. 171, were received from Holland in 1906, against nil in 1905.

Of other sorts.—Only 45 litres, valued Rs. 27, were received in 1906 from the United Kingdom, against litres 1,428, of the value of Rs. 1,646, received in 1905 from the United Kingdom, France, and Germany, the latter country supplying litres 1,000, of the value of Rs. 1,316 in 1905, against nil in 1906.

Starch.

Compared with 1905, the imports for the past year showed an increase of kilos 19,563 in weight and of Rs. 9,725 in value, due chiefly to Singapore, which provided kilos 6,913 more, with a surplus of Rs. 7,764 in value. Kilos 12,305, of the value of Rs. 1,960, were received in 1906 from China, against nil in 1905.

Stationery.

The value of the imports for 1906 amounted to Rs. 99,780, against Rs. 119,080 in 1905, showing a decrease of Rs. 19,300, due to short supplies from Continental India (Rs. 384), Belgium (Rs. 1,642), France (Rs. 2,933), Germany (Rs. 954), and the United Kingdom (Rs. 16,034). Increases were from Austria (Rs. 1,652) and China (Rs. 342). Small supplies were received from Switzerland and the United States in 1906, against nil in 1905.

Steel.

Unwrought.—Increase of kilos 4,539 in weight and of Rs. 5,817 in value, due to more supplies from the United Kingdom and France amounting to Rs. 1,426 and Rs. 4,390, respectively.

Stones.

Marble.—Compared with 1905, the imports for 1906 showed an increase of 67 in number, but a shortage of Rs. 2,247 in value. The shortage in value was due to the importation of three marbles, of the value of Rs. 2,412, from Italy in 1905, against nil in 1906.

Sugar.

Raw.—Kilos 103, of the value of Rs. 52, were received in 1905 from Germany, while for 1906 there were received from Continental India kilos 60, of the value of Rs. 8. Kilos 52,383 of raw sugar, of the value of Rs. 19,096, forming part of the original cargo, laden at Jamaica on board the vessel "Jules Simon," bound for Nantes, were sold here as damaged cargo, as the vessel entered this port in distress on her way to France in 1906.

Sulphur.

Common.—The imports for 1906 amounted to kilos 993,770, of the value of Rs. 106,074, against kilos 503,390, of the value of Rs. 44,150, for 1905, showing an increase of kilos 490,380 in weight and of Rs. 61,924 in value. The United Kingdom and France showed increases of kilos 35,620 and kilos 454,760 in weight and of Rs. 2,617 and Rs. 59,308 in value, respectively.

Tallow.

Kilos 14,273, of the value of Rs. 8,222, were received in 1906, against kilos 40,684, of the value of Rs. 19,076, in 1905. There was a decrease of kilos 26,411 in weight and of Rs. 10,854 in value, due chiefly to Australia, which provided for a less value of Rs. 11,155. A small increase of Rs. 261 was noted under the United Kingdom.

Tamarinds.

Increase of kilos 6,499 in weight and of Rs. 2,367 in value, due exclusively to more supplies from Continental India.

Tarpaulins.

Eighty tarpaulins, of the value of Rs. 7,160, were received in 1906, against 35, of the value of Rs. 2,390, in 1905. There was an increase of 45 in number and of Rs. 4,770 in value. Tarpaulins were exclusively received from the United Kingdom.

Tea.

The imports for 1906 amounted to kilos 46,132, of the value of Rs.. 41,437, against, for the previous year, kilos 54,675, of the value of Rs. 53,617, showing a decrease of kilos 8,543 in weight and of Rs. 12,180 in value. From Ceylon there was a decrease of kilos 12,811 in weight and of Rs. 14,225 in value. Continental India and China showed increases of kilos 1,579 and kilos 3,059 in weight and of Rs. 1,079 and Rs. 1,576 in value, respectively.

Tin.

Plates.—The imports for 1906 amounted to kilos 155,756, of the value of Rs. 35,861, against, for the previous year, kilos 147,353, of the value of Rs. 31,908, showing an increase of kilos 8,403 in weight and of Rs. 3,953 in value, due principally to the United Kingdom, which provided for a surplus value of Rs. 3,831.

Slabs.—Kilos 8,875, of the value of Rs. 36,510, were imported in 1906, against kilos 8,749, of the value of Rs. 23,221, in 1905. There was an increase of kilos 126 in weight, with a surplus of Rs. 13,289 in value. This large surplus in value was due to difference in the market prices of Straits Settlements, which supplied kilos 1,552 less, with a shortage of Rs. 382 only in value. There were received from Singapore kilos 1,359 more, with a surplus of Rs. 10,056 in value, and from the United Kingdom kilos 861 more, with a surplus of Rs. 3,261 in value. The Cape Colonies supplied kilos 1,028, of the value of Rs. 2,038, in 1905, against nil in 1906, while from Germany kilos 486, of the value of Rs. 2,391, were received in 1906, against nil in 1905.

Tobacco.

Manufactured.—The value of the imports amounted to kilos 155,530, of the value of Rs. 354,561, in 1906, against kilos 171,431, of the value of Rs. 353,162, in 1905, showing a decrease of kilos 15,901 in weight but an increase of Rs. 1,399 in value, due to difference in market prices from Réunion, which supplied kilos 2,756 less, but with an increase of Rs. 17,702 in value. From France there was an increase of Rs. 2,274, while from the United States a decrease of Rs. 18,590 was noted.

Cigars.—Decrease of kilos 3,532 in weight, but surplus of Rs. 3,202 in value. From Continental India there was a decrease of kilos 4,007 in weight and of Rs. 8,184 in value, but an increase of kilos 181 in weight and of Rs. 9,779 in value was noted from the United States.

Unmanufactured.—Compared with 1905, the imports for 1906 showed a decrease both in weight of kilos 16,930 and in value of Rs. 7,657, due to short supplies from Continental India.

Tortoise and Pearl Shell.

Kilos 4,010, of the value of Rs. 14,046, were received in 1905, out of which kilos 4,000 were from Madagascar. No import was received in 1906.

Turmeric.

Increase of kilos 53,254 in weight and of Rs. 15,493 in value, due chiefly to Continental India, which provided for a surplus value of Rs. 15,720.

Turpentine.

Increase of 29 hectolitres in measure and of Rs. 4,053 in value, due to the United Kingdom, which supplied hectolitres 29 more, with a surplus of Rs. 4,093 in value. France provided for Rs. 40 in 1905, against nil in 1906.

Twine.

Hemp.—Increase of kilos 4,161 in weight and of Rs. 4,335 in value, due to more supplies from the United Kingdom (Rs. 2,607), Continental India (Rs. 355) and France (Rs. 1,408).

Of other sorts.—Increase of kilos 15,218 in weight and of Rs. 9,938 in value, due principally to more supplies from Continental India.

Umbrellas and Parasols.

Cotton.—Compared with 1905, the imports for 1906 showed a decrease of 5,156 in number and of Rs. 6,165 in value. Decreases were from the United Kingdom (Rs. 9,396) and France (Rs. 933). From Continental India there was an increase of Rs. 2,361.

Varnish.

Decrease of hectolitres 126 in measure and of Rs. 4,325 in value. France and the United Kingdom showed decreases of hectolitres 10 and hectolitres 118, of the value of Rs. 1,704 and Rs. 2,853, respectively.

Vermicelli and Macaroni.

Decrease of kilos 10,073, with a shortage in value of Rs. 4,302, as compared with 1905. From France there was a falling off of kilos 10,235 in weight and of Rs. 4,296 in value.

Vinegar.

The imports for 1906 amounted to hectolitres 449, of the value of Rs. 8,356, against hectolitres 742, of the value of Rs. 13,205, for 1905, showing a decrease of hectolitres 293 in measure and of Rs. 4,849 in value. France showed a falling off of hectolitres 300, with a shortage of Rs. 4,982 in value.

Wine.

Champagne.—Compared with 1905, the imports for 1906 showed a decrease of litres 1,419, with a shortage of Rs. 21,401 in value, due exclusively to more supplies from France.

Claret in casks.—The imports for 1906 amounted to hectolitres 15,396, of the value of Rs. 516,761, against hectolitres 17,625, of the value of Rs. 604,945, showing a decrease of hectolitres 2,229 in measure and of Rs. 88,184 in value. France, Algeria, and Spain supplied, respectively, hectolitres 2,014, hectolitres 71, and hectolitres 155 less, with decreases of Rs. 83,717, Rs. 2,053, and Rs. 2,684 in value, respectively.

Claret in bottles.—2,027 litres more, with a surplus of Rs. 2,614 in value, were received in 1906, due chiefly to more supplies from France.

Pontac in casks.—The imports for 1906 showed an increase of hectolitres 12 and of Rs. 4,253 in value. Pontac is exclusively received from Cape Colony.

Port in casks.—Hectolitres 85 less were received in 1906, giving a shortage of Rs. 3,874 in value. Portugal and Spain supplied hectolitres 31 less, with a shortage of Rs. 3,080 in value, and hectolitres 46 less, with a shortage of Rs. 644 in value, respectively, as compared with 1905.

Port in bottles.—Litres 701, giving a shortage of Rs. 836 in value, were received in 1906. Decreases were noted from Portugal (Rs. 132) and Spain (Rs. 1,182).

Sherry in casks.—There was a decrease of hectolitres 51, with a falling off of Rs. 1,939 in value. Spain supplied hectolitres 65 less, with a shortage of Rs. 2,616 in value. From Portugal hectolitres 24, of the value of Rs. 933, were received in 1905, against nil in 1906, while from Algeria hectolitres 41, of the value of Rs. 1,767, were received in 1906, against nil in 1905.

Sherry in bottles.—1,192 litres more, with a surplus of Rs. 1,977 in value, were received in 1906, due chiefly to more supplies from Spain.

Vermouth in casks.—France supplied none in 1906, against hectolitres 176, of the value of Rs. 8,234, in 1905.

Vermouth in bottles.—Litres 18,785 more, with a surplus of Rs. 25,924 in value, were received in 1906. France supplied litres 18,663 more, with a surplus of Rs. 25,808 in value. Small quantities were received from Italy and Germany in 1906.

White Wine in bottles.—There was an increase of litres 1,426 in measure and of Rs. 847 in value. France supplied litres 825 more, with, however, a shortage of Rs. 177 in value. From Germany litres 601, of the value of Rs. 1,024, were received in 1906, against nil in 1905.

Of other sorts.—None received in 1906, against, for 1905, hectolitres 17, of the value of Rs. 2,012, from France, and hectolitres 5, of the value of Rs. 248, from Spain.

Wood.

Board and Planks.—The imports for 1906 amounted to cubic metres 6,746, of the value of Rs. 329,083, against cubic metres 5,693, of the value of Rs. 373,914, in 1905, showing an increase of cubic metres 1,053 in content but a decrease of Rs. 44,831 in value. From Singapore 357 cubic metres more, with a surplus of Rs. 55,183, were received in 1906. Australia supplied cubic metres 2,092, of the value of Rs. 230,293, in 1905, against nil in 1906, while from the United Kingdom cubic metres 1,782, of the value of Rs. 88,353, were received in 1906, against nil in 1905.

Casks, empty.—The imports for 1906 amounted to casks 2,502, of the value of Rs. 9,066, against, for the previous year, 196, of the value of Rs. 981, showing an increase of 2,306 in number and of Rs. 8,085 in value, due chiefly to the United Kingdom, which supplied 2,289 more, with a surplus in value of Rs. 8,039.

Shingles.—There was a decrease of 299,625 in number but an increase of Rs. 3,305 in value. From Singapore there was a decrease of 473,425, with a falling off of Rs. 7,236 in value. From Madagascar 55,500, of the value of Rs. 916, were received in 1905, against nil in 1906, while Continental India supplied 225,000, of the value of Rs. 11,409, in 1906, against nil in 1905. A few thousand shingles were also received from Réunion in 1906.

Shooks.—The imports for 1906 amounted to bundles 96,426, of the value of Rs. 528,671, received from the United Kingdom, Continental India, and France, against, for the prêvious year, bundles 61,286, of the value of Rs. 233,225, from the United Kingdom. There was, therefore, an increase of bundles 35,140 and of Rs. 295,446 in value. The United Kingdom provided bundles 26,669 more, with a surplus of Rs. 247,359 in value. France and Continental India provided for Rs. 23 and Rs. 48,064, respectively, in 1906, against nil in 1905.

Timber.—There was an increase of 311 cubic metres in bulk, but a shortage of Rs. 32,063 in value. Cubic metres 44 more were received from the United Kingdom in 1906, with a surplus of Rs. 5,011 in value. From Australia 502 cubic metres more, with a surplus of Rs. 29,238 only in value. From Continental India cubic metres 256 less, with a shortage of Rs. 58,238 in value were received. From Madagascar cubic metres 61 more were received, with, however, a shortage of Rs. 6,936 in value.

Woodenware.—The value of the imports for 1906 amounted to Rs. 8,737, against, for the previous year, Rs. 12,887, showing a decrease of Rs. 4,150. The chief decreases were from the United Kingdom (Rs. 3,196), France (Rs. 1,152), and China (Rs. 527).

Woollen Manufactures.

Blankets.—There was a decrease of Rs. 1,390, due to Holland, which provided for Rs. 2,549 in 1905, against nil in 1906. Increases were from France (Rs. 203), China (Rs. 953), and the United Kingdom (Rs. 1,001). From Continental India there was a shortage of Rs. 920.

Mixed with Cotton and Silk.—Decrease of metres 29,316 in measure and of Rs. 16,196 in value. Decreases were from France (Rs. 12,194) and Germany (Rs. 3,720). Italy provided for Rs. 1,780 in 1905, against nil in 1906. From the United Kingdom there was an increase of Rs. 2,162.

Shawls.—Compared with the previous year, the imports for 1906 showed a decrease of 578 shawls, with a shortage of Rs. 1,525 in value, due chiefly to Austria, which supplied 1,485 shawls less, with a falling off of Rs. 2,398 in value. Slight increases were noted from France and Germany. Switzerland provided for Rs. 209 in 1905, against nil in the past year.

EXPORTS.

The principal articles exported from Mauritius are sugar, rum, molasses, cocoanut oil, aloe fibre and vanilla—the produce of the Colony. The quantities and values exported in the last five years are shown hereunder:—

Articles.	1902.	1903.	1904.	1905.	1906.
Sugar—

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius. Sugar, of course, rum, vinegar, and soap are manufactured in the Colony. There is a small quantity of tea grown, and there are several factories for the extraction of fibre from the aloe plant, which grows abundantly in the Colony. There does not appear to have been any special incident of interest in connection with local manufactures during the year under review.

The fisheries are protected by special laws and by the creation of Crown reserves, as well as by the establishment of private barachois, by the creation of a close season, and by the prohibition of the capture of an illegal size of fish and the prohibition of illegal nets.

There are 11 private barachois or enclosures communicating with the sea, duly registered under Ordinance No. 21 of 1902. These private barachois are walled ponds or "fish paddocks," which, by permission, may be replenished from Government reserves.

Certain parts of the coast are set apart, which are called "reserves," and in which no fishing can take place except by rod and line or by basket net. The protection of these reserves is left to the Inland Revenue Branch of the Receiver General's Department, consisting of one superintendent, five inspectors, and twenty-five guards. The police have also concurrent jurisdiction in detecting offences under the fishery laws.

The fisheries of the Colony, in so far as the food supply is concerned, have in no way improved during the year. Mauritius is still almost entirely dependent on the Island dependencies of the Colony, and on British and foreign countries and Colonies for the supply of dried, salted, and pickled fish.

The exports of fish and fishing products are chiefly restricted to the "Bambara," or sea slugs, which are not consumed in the Colony, but sent to Hong Kong and Singapore. This industry is chiefly in the hands of the Chinese.

FORESTRY AND BOTANY.

The approximate area of lands of various descriptions under the care of the Forest Department was at the end of the year:

	acres.
Crown Lands	66,699
Mountain Reserves	11,000
River Reserves	6,000
Curatelle Lands	830
	84,529

There are three botanical stations at different altitudes which, besides being centres of acclimatisation of large numbers of plants, both tropical and subtropical, are also and chiefly forest nurseries of increasing importance.

The Royal Botanical Gardens, Pamplemousses.

These gardens, of a total extent of 91 acres, are resorted to both by large numbers of inhabitants of the Colony and by strangers. The foreign relations have also increased lately through the free exchange system, which correspondents all over the world have accepted to adhere to. 173,000 forest plants in 1906 were sold to the public for a sum of Rs. 1,887·87. To Government forests and public Institutions 9,428 Filao (Casuarina) and Eucalyptus plants, 49,980 other forest plants, 629 palms, 18,119 ornamental plants, 1,300 fruit trees and 64 pounds of seeds were sent free. For the local exchange, over 6,000 plants and 74 lbs. of seeds were supplied in return. The foreign exchange gave rise to a supply of 420 plants and 43 lbs. of seeds of various species from the gardens, and a reception of 1,683 plants and 44 lbs. of seeds.

The Governor has been pleased to reduce by half the price of all forest plants sold to the public, and the transport of planting material by rail is free to the public for orders exceeding

500 plants, the Forest Department repaying the cost to the Railway Department.

The Nursery Gardens, Curepipe.

These gardens, of an area of 56½ acres, are in the most populous town of the Island at an altitude of 1,800 feet, have gained some more importance this year through the increase of forest nurseries, which are now on an extensive footing.

Over 195,000 pine seedlings were transplanted successfully and about 130,000 are still on seed beds for the supply of forest plantations. In addition, over 268,000 forest plants were disposed of in favour of the public, of Government plantations, &c.

Five horticultural apprentices selected from primary schools were trained here in 1906.

The Réduit Gardens.

These are included in the Réduit domain, where resides the Governor of the Colony. The forest plantations made here in previous years supply useful seeds for other nurseries (eucalyptus, camphor, sandal, &c.).

Horticultural Society.

The Horticultural Society of Mauritius, formed in November 1904, reckons now over 100 members. Its object is the introduction of useful seeds and plants, and the promotion of horticulture in the Colony. It has a nursery at the Curepipe Gardens. It has already held two shows at Curepipe in 1905 and 1906, and they were largely attended and were a success, the society distributing to the exhibitors numbers of certificates and prizes worth Rs. 300 to Rs. 400. Sugars and sugar canes were very attractive at each of the exhibitions and formed with other products of the farm, vegetables and economics, &c., a useful annexure to the flower show.

The Horticultural Society has been favoured this year with a pecuniary assistance from the Government in token of its useful action and as an encouragement for the future.

Statement of Revenue derived from Pas Géométriques leased under "Planting Conditions" of Ord. 19 *of* 1895.

Districts.	Annual Rents.
	Rs.
Pamplemousses	1,116.00
Riviere du Rempart	1,086.00
Flacq	2,177.00
Grand Port	1,436.00
Savanne	1,066.00
Black River	1,344.12
Total	8,225.12

LAND GRANTS.

Lands are granted by the Government by lease and by sale. Lands which are situated on the sea coast beyond the limits of Port Louis, known as Pas Géométriques, can only be leased by public auction, except those forming part of settlements which have been proclaimed as villages. The sales are invariably made by public auction. There is, however, an exception to this rule in cases where lands are desired for charitable, religious, or educational purposes.

No sale of Crown land took place in 1906.

SHIPPING.

The shipping for the five years 1902-6 can be thus summarized:—

—	1902.		1903.		1904.		1905.		1906.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total No. and Tonnage of Vessels Entered and Cleared (exclusive of Coasting trade, *i.e.*, Dependencies).	469	746,517	442	767,977	425	801,154	372	731,470	433	805,924
2. British Vessels	324	546,155	306	539,542	290	572,440	245	490,378	270	522,101
3. Foreign Vessels	145	200,362	136	228,435	135	228,714	127	241,092	163	283,823
4. Sailing Vessels	134	88,957	101	65,308	96	66,449	73	50,471	89	59,822
5. Steam Vessels	335	657,560	341	702,669	329	734,705	299	680,999	344	746,102

Coasting Trade (i.e., Dependencies).

—	1902.		1903.		1904.		1905.		1906.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total No. and Tonnage of Vessels Entered and Cleared—	63	11,531	63	11,802	60	12,845	55	9,263	51	9,636
2. British Vessels	57	10,721	63	11,802	60	12,845	55	9,263	51	9,636
3. Foreign Vessels	6	810	—	—	—	—	—	—	—	—
4. Sailing Vessels	63	11,531	62	11,607	56	12,065	55	9,263	51	9,636
5. Steam Vessels	—	—	1	195	4	780	—	—	—	—

The nationality and description of the vessels are shown in statement on page 57.

The number and tonnage of steam vessels which entered and cleared from and to all countries viâ the Suez Canal, and the value of goods (including bullion and specie) imported into, and exported by that Canal into and from, Mauritius are shown in the following table:—

Suez Canal.

Years.	Vessels Entered.		Vessels Cleared.		Value of Goods (including Bullion and Specie).	
	No.	Tonnage.	No.	Tonnage.	Imports.	Exports.
					Rs.	Rs.
1902	26	50,849	27	52,242	3,887,611	2,189,981
1903	32	65,515	27	53,541	6,542,071	2,483,481
1904	32	71,428	20	42,717	3,149,920	234,010
1905	35	84,975	28	68,734	2,437,479	893,257
1906	37	89,109	27	61,980	2,554,574	1,358,512

The first table is a return of all vessels entered and cleared, excluding the coasting trade vessels, *i.e.*, vessels trading with the Dependencies, which are exclusively dealt with in the second table.

The total number of vessels entered and cleared during 1906 show an increase of 61 in number and of 74,454 in tonnage as compared with the figures for 1905.

Compared with 1905 the following differences are noted:—

—	Increase of	
	No.	Tonnage.
Sailing Vessels	26	9,351
Steam Vessels	45	65,103
British Vessels	25	31,723
Foreign Vessels	36	42,731

Of the 433 vessels which entered and cleared during 1906, 3 British steamers and 2 French steamers, with an aggregate tonnage of 7,958, called at this port for the purpose of coaling, showing an increase of 4 in number and of 5,681 in tonnage as compared with 1905.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the Dependencies during 1906 is 51, with a tonnage of 9,636, against, during 1905, 55 with a tonnage of 9,263, showing a falling off of 4 in number but an increase of 373 in tonnage.

No steamer entered and cleared from and to the Dependencies in 1905 and 1906.

The coasting trade has been exclusively performed by British vessels during 1903, 1904, 1905, and 1906.

Suez Canal.

The value of goods imported through the Suez Canal in 1906 amounted to Rs. 2,554,573.66, against Rs. 2,437,478.93 in 1905, showing an increase of Rs. 117,094.73.

Goods exported from Mauritius through the said canal in 1906 amounted to Rs. 1,358,512.18, against Rs. 893,257.07 in 1905, showing an increase of Rs. 465,255.11.

Vessels with Cargoes.

The tonnage of vessels entered with cargoes during 1906 amounted to 384,459, and the tonnage cleared to 291,942, as against 332,236 entered and 257,787 cleared for 1905.

The aggregate tonnage of the coasting trade amounted to 4,723 entered and 4,913 cleared in 1906, against 4,661 entered and 4,602 cleared in 1905.

Vessels touching at this Port.

Two French steamers with an aggregate tonnage of 3,812, one Norwegian sailing vessel of 337 and one American sailing vessel of 365 tons touched at this port without entering the harbour during 1906.

Statement of number and tonnage of British and foreign sailing vessels and steamers entered and cleared for 1905 and 1906:—

Entered.

—	1905.		1906.		Difference. + Increase, — Decrease.

The "D'Entrecasteau"	8,114
"Descartes"	4,200
German—	
The "Planet"	800
"Seadler"	1,640

III.—LEGISLATION.

During the Session of 1906, 23 Ordinances were passed by the Council of Government and assented to by the Governor.

The following enactments call for special mention:—

1. By Ordinance No. 4 the amount of security to be furnished under the Public Officers' Guarantee Fund, is raised from Rs. 7,500 to Rs. 12,000, and for any amount in excess of Rs. 12,000 security is to be given by means of an approved guarantee company.

2. Ordinance No. 6 declares the mean solar time of longitude 60° East of Greenwich to be, from 1st January, 1907, standard time throughout Mauritius and its Dependencies, except the Chagos Archipelago, where the standard time shall be the mean solar time of longitude 75° East of Greenwich.

3. Ordinance No. 7 regulates the employment of natives and residents of the Colony for services to be performed beyond the limits thereof, and provides for their due return to the Colony on completion of their term of service.

4. By Ordinance No. 9 the privilege attaching under the Imperial Statute, I William and Mary, Ch. II., to petitions to the Sovereign is extended to the Colony.

5. Ordinance No. 10 improves the classification of juvenile offenders in the Reformatory School.

6. The Quarantine law is amended by Ordinance No. 15, which deals with the admission in certain cases of vessels into the harbour previous to pratique, and with the issue of certificates of clearance in time of epidemics.

7. Ordinance No. 21 regulates the practice of dentistry in the Colony.

8. Ordinance No. 22 re-organises the pilot service of Mauritius by providing for the payment of pilots by fixed salary instead of by fees as hitherto.

9. All the laws dealing with the care and treatment of lunatics are consolidated under one enactment by Ordinance No. 23.

Two Bills were also passed by the Council in 1906, and were reserved by the Governor for the signification of His Majesty's pleasure thereon; the first "To amend the Letters Patent of the 16th September, 1885, as to the qualification of Elected Members" subsequently received His Majesty's gracious assent; the second, "To amend the duty payable on tea," was disallowed.

IV.—EDUCATION.

PRIMARY EDUCATION.

In the year 1906 there were 67 Government and 88 Grant-in-Aid schools in the Colony.

The average number of pupils on the roll for the year at the Government schools was 8,919, and at the Grant-in-Aid schools 9,807, the average number in attendance being 5,491 and 6,425, respectively.

Of the Grant-in-Aid schools, 66 were Roman Catholic, 19 Church of England, two Presbyterian, and one Mohammedan.

In these schools pupils are taught six standards, English, French, and arithmetic being the compulsory subjects for passes in the standards; in addition, at the great majority of the schools, an extended programme is taught in one or more of the subjects, English, French, arithmetic, geography, elementary science (for boys), and needlework (for girls).

Examinations are conducted annually by the Inspectors of Schools, who also pay frequent visits of inspection to the schools during the year.

All the schools are open, without payment of fee, to children of all classes and creeds between the ages of 5 and 16, or in some cases 18.

Religious instruction is imparted to the pupils of Christian creeds in both Government and Grant-in-Aid schools at hours specially set apart in the curriculum of each school, by the clergy of their various denominations.

SECONDARY EDUCATION.

Royal College, and Schools in connexion.

Secondary education is given at the Royal College with its preparatory schools, the schools associated with the Royal

College, and the girls' schools working under the scheme for the higher education of girls.

The number of pupils at the Royal College and its two schools in December was:—

College proper	240
Curepipe School	69
Port Louis School	43
Total	352

Of these, 257 were paying and 95 free pupils.

The free pupils belonged to the following classes:—

(1) Indigent pupils whose fees have been paid for two years	7
(2) Holders of eleemosynary scholarships	13
(3) Scholars and exhibitioners from primary schools...	30
(4) Scholars and exhibitioners whose free tuition has been extended	11
(5) Holders of scholarships and exhibitions won at the College and associated schools	34
Total	95

In the Royal College, pupils are prepared for the London Matriculation and the Cambridge Senior Local Examinations.

The passing of these examinations qualifies the successful candidates for entrance to the highest classes of the College on the Classical and Modern sides, respectively.

For the London Matriculation, 14 pupils were presented, and 5 passed.

For the Cambridge Senior, 68 College pupils and 23 outsiders entered; 23 College pupils and 2 outsiders passed.

In each of the highest classes a scholarship is annually given, of the value of about £1,000, to enable the successful student to follow some special course of study abroad, in general at some institution in the United Kingdom.

Numerous small scholarships, exhibitions, and other awards are given to students in the other classes.

The preparatory schools of the College and the 25 associated schools prepare students for the classes of the College proper.

Religious instruction is given at the College and its two schools, and annual examinations are held in this subject.

HIGHER GIRLS' SCHOOLS.

The girls' schools, in the scheme for the higher education of girls, provide a course of study suitable for girls between the ages of 11 and 17.

The principal subjects taught are English, French, history, geography, mathematics, Latin, music, drawing, needlework, and religious instruction.

Annual examinations are held for these schools, and on the results, prizes and certificates are awarded and grants are paid.

The number of these schools working in connexion with the Department and earning grants from Government was 22.

The examinations, however, are open to all the girls in the Colony who are of age to compete, except those who are pupils of the Government and Grant-in-Aid primary schools.

The number of girls who competed was 286; of these, 124 obtained certificates.

INDUSTRIAL, TECHNICAL, AND AGRICULTURAL SCHOOLS.

The Government training school for men teachers accommodates about 20 students in training, and that for women about 12 students. At the last examination for teachers, four men and four women from these schools obtained certificates.

Provision was made for the establishment of Grant-in-Aid training schools, but no such school has yet been established.

Eight mechanical engineering apprenticeships, tenable at the Government railway works, and two horticultural apprenticeships, tenable at the Government botanical gardens, are awarded every year on the results of competitive examinations.

Agricultural chemistry is taught at the Royal College to special classes of students.

Under the regulations in Code B, for the teaching of handicrafts to pupils in the primary schools, classes were conducted at four primary schools during the year.

In Code A provision is made for the teaching of handicrafts by means of a system of apprenticeships to promising students.

A scheme exists, as part of Code A, for the yearly appointment of two students in civil engineering.

V.—GOVERNMENT INSTITUTIONS.

HOSPITALS.

During the year under review, the hospitals and asylums of the Colony numbered 14, including the two small hospitals attached to Flacq and Souillac Prisons.

The following table supplies the usual statistical information concerning the admissions, cases treated, &c., in each of these institutions during the year 1906:—

Hospitals.	Remaining at end of 1905.	Admissions.	Deaths.	Total Cases Treated.	Remaining at end of 1906.
Civil	168	5,784	404	5,952	125
Port Louis Prisons...	18	898	6	916	12
Long Mountain ...	15	644	62	659	10
Poudre d'Or... ...	25	1,385	73	1,410	28
Flacq	37	2,045	133	2,082	25
Flacq Prisons ...	—	77	1	77	9
Mahébourg	26	2,218	90	2,244	39
Savanne	27	1,102	62	1,129	19
Savanne Prisons ...	10	280	2	290	6
Barkly Asylum ...	104	3,518	282	3,622	84
Lunatic Asylum ...	24	441	30	465	24
Beau Bassin Prisons	15	996	29	1,011	18
Reformatory ...	—	79	1	79	—
Moka...	13	904	46	917	5
Total... ...	482	20,371	1,221	20,853	404

There were 423 patients on the roll of the lunatic asylum at the close of the year under review, exclusive of one female patient who was then under observation on interim order. This total shows an increase of 12 over the number of the previous year. The daily average number of male lunatics confined in the asylum during 1906 was 248·10, and that of female patients 171·22.

Taking into account the number of patients in the lunatic asylum and the lunatic branch wards of the Barkly Asylum, as well as those out on probation, the number of insane is 1 in 632 of the population of the Colony.

The sanitary condition of the Colony has, on the whole, been slightly more satisfactory than that which obtained during the previous year. Fever and dysentery prevailed to a lesser extent, whilst the plague epidemic, with the exception of that of 1905, has been the lowest recorded since the introduction of the disease in 1899.

The total rainfall recorded for the year amounted to 41·66 inches, showing a reduction of 7·39 inches on the normal. This low rainfall, which was evenly distributed throughout the year, apparently helped in producing the amelioration noticed in the sanitary state of the island, especially as regards the prevalence of fever and dysentery.

The number of admissions into the hospitals and asylums was 20,371 in 1906, against 20,735 in 1905, which shows a reduction of 364.

Malarial Fever is responsible for 3,674 admissions in the hospitals. This figure is lower than that of the previous year by 1,449.

Dysentery.—The number of patients, 794, who resorted to the different hospitals on account of that complaint shows a considerable reduction, when compared with that of the previous year, when it stood at 1,013.

Enteric Fever.—Only six admissions for that disease were registered in the hospitals. In addition to these cases, 75 others were notified from the different districts of the Colony in compliance with the Contagious Disease Ordinance.

Influenza has given rise to 1,768 admissions, showing an increase of 729 over the number recorded in 1905. This disease prevailed in an epidemic character during the winter, and its incidence reached its acme in July, when 1,023 cases were reported from the different district hospitals.

Tuberculosis.—Under that heading, 972 admissions were recorded in 1906, showing a decrease of 36 when compared with the figure of the previous year.

Pertussis, which had only existed in a sporadic form during a number of years, occurred more frequently at the end of 1905 and assumed an epidemic character in 1906. The number of cases admitted into hospital was 169, of which five proved fatal, while the number of deaths ascribed to it at the civil status reached 216 during the year under review.

Plague.—As already remarked, the plague epidemic has been more limited than those of the previous years, 1905 excepted. The death rate, though it showed a diminution on that recorded in 1905, reached the high figure of 79·3 per cent. during the year under review.

The following table shows the yearly incidence of the disease since its appearance in 1899, as well as the deaths and death rate:—

Year.	Cases.	Deaths.	Death rate.
			Per cent.
1899	1,416	1,117	78·9
1900	796	593	74·5
1901	1,093	805	73·6
1902	506	386	76·3
1903	1,395	1,035	74·2
1904	568	449	79·0
1905	308	251	81·5
1906	434	344	79·3

The campaign for the destruction of rats, which play such an important part in the dissemination of plague, was prosecuted with unabated vigour throughout the year under review, 105,568 rats being destroyed by the official rat catchers alone.

Surra has existed throughout the year, but to a lesser extent than during the previous one. A rapid decline in the epizootic took place after the month of March, and the virulence of the disease appeared to be diminished.

POOR RELIEF.

There are no poorhouses, in the English sense, in Mauritius, but relief, both indoor and outdoor, is extensively given to the poor.

The indoor relief is given at the public hospitals of the Colony, at the Barkly Asylum for the aged and infirm poor, and at the various convent infirmaries and the public dispensaries. The outdoor relief consists of grants of food, money, clothes, and medicines.

The expenditure of the Poor Law Department for the year 1906 amounted to Rs. 221,040.35 c.

The number of patients treated at the several hospitals was 16,091, and the number of paupers who received outdoor relief was 2,113. The number of pauper orphans maintained in convents at the expense of the Poor Law Commission amounted to 40, and 939 infirm paupers were maintained in infirmaries. The number of sick paupers who applied at the public dispensaries, and who received either medicines or medical treatment, was 45,182.

The following table shows the total number of persons who received indoor and outdoor relief in 1906, namely:—

(*a*) Recipients of indoor relief:—	
Sick in country district hospitals	11,527
Sick in Civil Hospital	4,332
Sick in Convent Hospital, Canal Street ...	232
Inmates of Barkly Asylum	816
Lepers at St. Lazare	190
Inmates of Lunatic Asylum	504
Orphans in Convents	40
Inmates of Calebasses and Convent branch infirmaries	939
(*b*) Recipients of outdoor relief:—	
Alimentary and pecuniary	2,113
Medical (sick at dispensaries)	45,182
Total ...	65,875

There is also a leper asylum (St. Lazare) in Port Louis, into which 80 pauper lepers were admitted last year; and a lunatic asylum at Beau Bassin, into which there were admitted 81 males and 44 females, making a total of 125 inmates admitted in 1906.

REFORMATORY.

The admissions show a decrease of five, and the discharges a decrease of three, compared with 1905.

The daily average number of convicted and unconvicted increased by 4·46, compared with 1905.

The daily average number of admissions decreased by ·01, compared with 1905.

Six escapes took place, showing a decrease of four as compared with those of 1905. Seven were re-captured, one of whom escaped in 1905.

The total number of admissions into hospital shows an increase of seven, and therefore an increase of ·02 in the daily average number of admissions.

The daily average number of sick in hospital shows a decrease of ·04.

There was one death during the year. None occurred in 1905.

The total cost of maintaining and guarding the boys was Rs. 13,765.89 c., against Rs. 13,543.44 c. in 1905, showing an increase of Rs. 222.45 c. as compared with 1905.

The total cost per head on average number of boys detained was Rs. 212.56, against Rs. 224.60 c. in 1905, a decrease of Rs. 12.04 c. per head for 1906.

The earnings amounted to Rs. 3,288.09 c., against Rs. 3,068.85 c. in 1905. The increase is therefore Rs. 219.24 c.

The total earnings per head on average number of boys was Rs. 50.77 c., against Rs. 50.89 c. in 1905, a decrease of 12 cents per head for 1906.

SAVINGS BANK.

The deposits at the Government Savings Bank, at 3 per cent. interest, amounted to Rs. 2,850,234 on the 30th of June, 1906, as compared with Rs. 2,845,052 at the same date in 1905, showing an increase of Rs. 5,182.

The following return shows the number of depositors, and the amount standing to the credit of the general and the Indian populations at the end of the years 1904-05 and 1905-06.

Number of depositors and amount to credit of general and Indian populations:—

—	1904–5.		1905–6.	
	No. of Depositors.	Amount.	No. of Depositors.	Amount.
		Rs.		Rs.
General Population	16,299	1,724,622	17,629	1,669,038
Indian Population	9,498	1,120,430	10,054	1,181,196
Total	25,797	2,845,052	27,683	2,850,234

The financial position of the bank on 30th of June, 1906, was as follows:—

	Rs.
Investments	3,127,295.37
Cash in hand	3,674.86
Receiver-General (interest due by Treasury for 1905-06)	82,099.56
	3,213,069.79
Liabilities due to depositors and to Treasury	2,912,372.42
Balance in favour of the bank	300,697.37

VI.—JUDICIAL STATISTICS.

POLICE, PRISONS, AND CRIMINAL.

The total effective strength of the police force on the 31st of December, 1906, was 721; the actual strength, however, was 718.

The force comprised nine nationalities, but 534 were natives of Mauritius.

Ninety-one constables were enlisted during the year, and 11 were dismissed.

Fifty-four sub-officers and constables resigned, or were discharged on pension or gratuity during the year.

Detection and Repression of Crime.

The number of offences coming to the knowledge of the police during 1906 totalled 22,817, in connexion with which 12,628 persons were apprehended or summoned before the magistrates.

The following return will show the nature of the various offences:—

Nature of Offences.	No. of cases.	No. of persons charged.
(*a*) Serious offences reported to, or detected by, the Police, in which persons were charged.	2,417	3,034
(*b*) Serious offences reported to the Police, which, in certain cases, formed the subject of enquiries, but in which no persons were charged.	9,863	481°
(*c*) Minor offences reported to, or detected by, the Police in which persons were charged.	4,054	6,152
(*d*) Minor offences reported to the Police in which no persons were charged.	3,535	—
(*e*) Offences against the Labour Law	1,438	1,451
(*f*) Vagrancy	1,510	1,510
Total	22,817	12,628

° On suspicion.

CASES of CRIMES in which PERSONS were CHARGED.

Offences.	Number of Cases.	Number of Persons Charged.	Number of Persons Convicted or Committed to Assizes.	Number of Persons otherwise disposed of.	Pending.	Amount of Property Stolen.	Amount of Property Recovered.	
							By all Agencies.	By Police only.
						Rs. c.	Rs. c.	Rs.
Murder, including parricide, infanticide, wife murder, &c., and poisoning causing death.	12	18	12	5	1	—	—	—
Attempt at foregoing: and attempt at poisoning not causing death.	7	9	5	1	3	—	—	—
Manslaughter, including wounds and blows causing death...	8	9	8	—	1	—	—	—
Rape, including attempt upon chastity	19	21	11	4	6	—	—	—
Larceny at night by breaking, or with violence to the person.	114	186	141	33	12	14,825.77	1,722.21	1,611.47
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	46	57	38	10	9	—	663.41	660.91
Prædial or other larcenies, including cheating, embezzlement, and swindling.	1,283	1,548	1,236	186	126	27,031.17	8,745.51	7,555.25
Removing, receiving or possessing stolen property obtained by foregoing larcenies.	240	283	198	66	19	—	3,358.08	3,080.67
Arson or other malicious injuries to property	10	17	12	3	2	—	—	—
All other offences not included in above	678	886	612	152	122	—	—	—
Total	2,417	3,034	2,273	460	301	41,856.94	14,489.21	12,908.30

It will be observed that of the serious offences reported to, or detected by, the police, there were 2,417 cases, in which 3,034 persons were charged, and of these 2,273 or 74·91 per cent., were either summarily convicted or committed to assizes.

The amount of property declared to have been stolen was Rs. 41,856.94, of which Rs. 14,489.21, or 34·61 per cent., was recovered.

The following return records all serious offences reported to, or detected by, the police, which formed the subject of enquiries, and in which no persons were charged:—

Offences.	No of cases.	No. of persons arrested on suspicion.	Amount of Property alleged to have been stolen.	Amount of Property recovered.	
				By all Agencies.	By Police only.
			Rs.	Rs.	Rs.
Murder, including parricide, wife murder, and poisoning causing death	2	1	—	—	—
Attempt at foregoing, and attempt at poisoning not causing death	2	2	—	—	—
Other offences against the person	6,078	76	—	—	—
Larceny at night by breaking, or with violence to the person	437	62	37,297.83	1,065.26	333.94
Prædial or other larcenies, including cheating, embezzlement, and swindling ...	2,935	299	67,963.00	13,346.57	8,002.73
Removing, receiving, or possessing stolen property	33	17	—	192.94	156.93
Arson or other malicious injuries to property	27	12	—	—	—
Other offences against property...	321	9	—	—	—
All other offences not included in above	28	3	—	—	—
Total	9,863	481	105,260.83	14,604.77	8,493.60

The total number of fires which formed the subject of police investigation in 1906 was 246, and the total value of the property destroyed was Rs. 38,980.36 c.

The following is another classification of the offences reported:—

Offences against the person	8,281
Prædial larceny	380
Offences against property other than prædial larceny	5,142
Other offences	9,014
Total	22,817

PRISONS.

During the year 1906, in addition to the two Central Prisons of Port Louis and Beau Bassin, as well as the District Prison of Savanne already open, the Flacq District Prison was reopened in June.

The total number of prisoners admitted after conviction during the year was 5,539 males and 245 females. These numbers show a decrease of 441 males and an increase of 69 females as compared with the returns of 1905.

The number committed under the different headings, compared with the previous year, is as follows:—

Year.	Debt.	Non-payment of fines and costs.	Safe custody till trial or for want of security.	For purposes of penal imprisonment.
1905 ...	10	1,610	3,392	6,156
1906 ...	9	1,496	3,332	5,784

There is a decrease of 4 males and an increase of 69 females previously convicted, as compared with the number so convicted in 1905.

Under the classification "Duration of Sentences," a decrease in short sentences and an increase in long sentences, in periods of "5 to 10 years," as well as decrease in life sentences is shown, the figures being:—

Five to 10 years—	
1906	18
1905	10
Increase	8
Life—	
1905	11
1906	3
Decrease	8

The daily average number under detention, as compared with 1905, shows an increase of 23·04.

Daily average—	
1906	1,027·87
1905	1,004·83
Decrease	23·04

Sickness and Mortality.

The following were the prevailing diseases:—

Port Louis Central Prison.	Beau Bassin New Central Prison.	Savanne District Prison.	Flacq District Prison.
Malarial Fever. Dysentery. Influenza.	Malarial Fever. Diarrhœa. Dysentery. Influenza.	Malarial Fever. Dysentery. Influenza.	Malarial Fever.

Thirty-nine deaths occurred during the year:—1 at Flacq, 2 at Savanne, 29 at Beau Bassin, and 7 at Port Louis Prisons, compared with 46 in 1905.

The causes were as hereunder:—

Diseases.	No.	Diseases.	No.
Port Louis Prisons—		Beau Bassin Prisons—	
Pneumonia...	3	Influenza ...	3
Dysentery ...	1	Dysentery ...	4
Rupture of Spleen	1	Tuberculosis	3
Phthisis	1	General Debility ...	5
Tuberculosis	1	Congestion of Brain	2
		Cerebral Hæmorrhage	2
Total	7	Pericarditis	1
		Pneumonia...	5
		Pleurisy ...	1
		Peritonitis ...	1
		Diarrhœa ...	1
		Gangrene ...	1
Savanne District Prison—		Total	29
Pernicious Fever ...	1		
Pleurisy and Pneumonia...	1		
		Flacq District Prison—	
Total	2	Influenza ...	1

The death-rate for the prisons, taking the rate per cent. of deaths on the daily average number under detention, was 3·79. compared with 4·58 in 1905.

Taking the prisons separately, it was as follows:—

—	1905.	1906.
Port Louis Prisons	2·97	2·73
Beau Bassin Prisons	4·28	4·58
Flacq District Prison	Not open.	2·54
Savanne District Prison	10·36	2·04

The daily average number of sick in the prison hospitals was 50·48, as compared with 50·44 in 1905.

Escapes.

There were in all 31 escapes of prisoners during the year, as against 39 in 1905, including one escape from within the precincts (Savanne District Prison), 29 whilst at outdoor labour, and one while under police escort.

Of the above, 24 were recaptured, 7 still remaining at large on 31st December, 1906.

The total cost of maintenance during the year under review was Rs. 75,336.25, as compared with Rs. 71,325.76 in 1905.

The gross earnings were Rs. 136,598.14, as against Rs. 132.44 in the previous year. The yearly earnings per head averaged Rs. 143.71.

The prisoners were employed as carpenters, tailors, shoemakers, tinsmiths, and at making rattan goods and mats.

They were also employed at stone-breaking and sanitary works, and other kinds of out-door labour.

Criminal Statistics.

The following table gives the judicial statistics for 1906:—

Information in the Supreme, District, and Stipendiary Courts of **Mauritius.**

How cases tried ended.	Total.	Murder, other than wife and child murder.	Manslaughter.	Attempt at murder.	The numbers include attempts to commit the several offences.												
					Murder of wife, reputed wife or concubine.	Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injuries to property.	Robbery with violence.	Prædial larceny.	Other offences against property.	Vaccination.	Miscellaneous offences.
Judgment for the Crown	17,524	1	8	—	2	—	1	—	3	3	720	38	101	350	1,465	1	14,831
Judgment for the prisoner	1,504	5	5	56	2	—	1	—	4	—	400	12	16	19	333	—	651
Prisoners found insane	2	1	—	—	—	—	—	—	—	—	—	—	—	—	1	—	—
Cases which fell through for want of prosecution, including cases which the Procureur-General declined to take at the Assizes.	2,937	1	1	3	4	1	—	—	2	—	188	2	9	40	977	—	1,709

VII.—VITAL STATISTICS.

POPULATION.

—	Numbers	
The population on the 1st January, 1906 was		377,532
The number of births registered in 1906 was	11,363	
The number of births unregistered owing to death intervening before registration was made, was	1,306	
Total births	12,669	
The number of deaths registered was	15,118	
Showing a decrease of		2,449
		375,083
Arrivals in the Island	4,526	
Departures from the Island	4,209	
Difference in favour of arrivals		317
Total Civil Population		375,400
Military stationed in the Island		2,234
Total population of the Island		377,634
Estimated population of Dependencies and outlying Islands		5,572
Estimated total population of the Colony		383,206

The crews of non-Colonial shipping in the harbour have not been included in the above estimate.

The Indian population, included in the above, numbered 262,572, composed of 143,390 males and 119,182 females, showing an increase of 290 males and 3,196 females on the Census of 1901.

The general population (excluding Indians) numbered 112,828, of which 57,462 are males and 55,366 females, thus showing an increase of 1,010 males and a decrease of 119 females.

It will be noticed that while both populations show an increase when compared with the Census figures, they show a decrease when compared with the figures for last year.

The public health of the Colony during 1906 has been slightly better than that of 1905.

The death-rate shows a slight decrease, having fallen from 40·6 in 1905 to 40·0 in 1906.

The birth-rate has decreased from 37·0 per 1,000 to 33·5.

An unsatisfactory feature is to be found in the high infantile mortality for the year.

Unfortunately, a very high proportion of still-births, 8·9 per cent., must at the same time be recorded.

The following statement shows the different classes of occupations of the population*: —

Employment.	General Population.		Indo-Mauritians.		Other Indians.		Grand Total.		
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Total.
Class I.— Professional ..	3,225	624	712	29	373	19	4,310	672	4,982
Class II.— Domestic ..	2,874	3,087	5,183	1,047	1,656	192	9,713	4,326	14,039
Class III.— Commercial ..	5,681	110	3,744	473	3,350	369	12,775	952	13,727
Class IV.— Agricultural ..	3,605	157	41,069	3,779	27,675	1,606	72,349	5,542	77,891
Class V.— Industrial ..	18,211	3,269	1,824	227	756	33	20,791	3,529	24,320
Class VI.— Indefinite and Non-productive.	22,856	48,238	50,438	90,353	6,320	17,859	79,614	156,450	236,064
Total	56,452	55,485	102,970	95,908	40,130	20,078	199,552	171,471	371,023

Births.

There were 12,669 births registered during the year. The birth-rate in the general population was 33·6 per 1,000, and in the Indian population 33·5.

Deaths.

15,118 deaths occurred during the year. The death rate was, in the general population, 38·1 per 1,000, and in the Indian population 40·8. The deaths consequently exceeded the births by 2,449.

Marriages.

There were 976 marriages celebrated during the year. Of these marriages, 514 belonged to the general population, and 462 to the Indian population.

The following return shows the mortality for the last five years: —

Year.	Mortality.	Rate per 1,000.
1902	12,716	34·0
1903	15,034	39·9
1904	12,064	32·2
1905	15,379	40·6
1906	15,118	40·0

---

* From the Census of 1st April, 1901.

CLIMATE.

General.

The Director of the Royal Alfred Observatory reports as follows:—

Mauritius lies between the meridians of 57° 18′ and 57° 49′ E. longitude, and the parallels of 19° 58′ and 20° 32′ S. latitude. To the north extends the equatorial belt of calms and variable winds, with its hot, damp, and rarefied atmosphere; and to the south the sub-tropical belt of high pressure, from which a current of air blows nearly continuously, in a curved path, towards the equator, being deflected to the west by the rotation of the earth.

The migrations of these belts north and south with the sun produce the seasonal variations of weather at Mauritius. With the system in its most southerly position the Island is under the influence of the belt of low pressure, and in its most northerly position the influence of the high pressure belt is felt; so that in the summer months—December to April—the atmospheric pressure is below the mean for the year, and the weather is hot and sultry with occasional very heavy rain, produced principally by the cyclones which form to the north-east of Mauritius and travel usually on a south-westerly course, passing sometimes to eastward and sometimes to westward, but seldom immediately over the island.

The mean atmospheric pressure varies from 29·919 ins. in February to 30·202 ins. in August, and the mean temperature of the air from 79° in January to 68° in July. (At Curepipe, a town situated on the central plateau, 1,800 ft. above sea-level, the temperature varies from 74° in January to 62° in July). The mean wind direction varies from east in December and January to south-east by east in June; its velocity varies from 10 miles per hour in March to 12·4 miles per hour in August. The rainfall in very variable in different parts of the island; the wettest station is Cluny, in Grand Port, with a mean annual rainfall of 145 ins.; the driest is Albion, on the west coast, with a mean rainfall of 31 ins. The mean monthly rainfall for the whole island decreases from 12 ins. in March to 2·6 ins. in September and October.

In addition to the annual variation there is a marked diurnal variation in all elements; amounting to 0·070 ins. in atmospheric pressure, from 12° in winter to 17° in summer in air temperature, from 25 to 50 per cent. in relative humidity, 7 miles an hour in wind velocity, 20° in wind direction and 0·7 in. in rainfall.

SPECIAL FEATURES IN 1906.

Barometric Pressure.

The barometric pressure decreased, relatively to the normal, until April, oscillated about normal till July, then increased steadily till the end of the year.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. + 0·006	Ins. — 0·023	Ins. — 0·016	Ins. + 0·030

Air Temperature.

Relatively to the normal, the temperature fell generally from February to the end of the year, showing promise of a cold summer. The greatest positive wave culminated at the beginning of March, during the most rapid decrease of pressure relatively to the normal.

The greatest negative wave culminated at the end of the year, and was coincident with the greatest positive wave of pressure.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
+ 0·8°	0·0°	— 0·7°	— 1·5°

Vapour Tension.

The departures from average vapour tension followed the temperature curve very closely, and, inverted, followed the pressure curve approximately.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. + ·052	Ins. — ·028	Ins. — ·007	Ins. — ·033

Relative Humidity.

The abnormality curve of relative humidity followed closely that of the vapour tension, showing greater variation than usual, during the first half of the year.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 2·9	Per cent. — 3·8	Per cent. + 0·5	Per cent. — 0·1

Rainfall.

The rainfall decreased generally, relatively to the normal, from November 1905 to April 1906, with, however, an increase in March. It then increased generally until July, decreasing again until November.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. — 23	Per cent. — 38	Per cent. + 44	Per cent. — 12

Wind Velocity.

The wind velocity was again below normal, except in May and July, when it was normal; a large negative wave which culminated in February was coincident with large positive waves of temperature, vapour tension and relative humidity.

(Comparisons made with a small anemometer, tested at the Kew Observatory, indicated that the Observatory Standard gives identical results with Kew Standard at velocities of 11 miles per hour, the mean for Mauritius.)

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
M.p.h. — 2·8	M.p.h. — 1·2	M.p.h. — 1·3	M.p.h. — 1·3

Means and Extremes of Meteorological Elements.

The means and extremes of the various meterorological elements for the year 1906 are given below:—

—	Mean.	Highest.	Lowest.
	Ins.	Ins.	Ins.
Atmospheric Pressure ...	30·069	30·370	29·376
Air Temperature	73·1°	90·1°	51·6°
	Per cent.	Per cent.	Per cent.
Relative Humidity ...	75·0	97·8	40·7
	M.p.h.	M.p.h.	
Wind Velocity	9·4	48·0	—
Wind Direction	S. 69° E.	—	—
	Total.		
Rainfall	41·66	—	—

Results of Magnetic Observations.

The magnetographs were at work throughout the year, and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1906:—

Declination (west)	9°12′76
Dip (south)	53°52′9
Horizontal force (C.G.S. units) ...	0·23527
Vertical force (C.G.S. units)	0·32243
Total force (C.G.S. units)	0·39913

The largest magnetic disturbances occurred on July 11-12, August 7-8, September 22-23, December 22-23.

MISCELLANEOUS WORK AT THE ROYAL ALFRED OBSERVATORY.

Actinometric observations were taken with high and low sun on 42 days, and single observations on 42 other days.

Sixty-three earthquakes were recorded by the Milne seismograph during the year. The hourly measures of the seismograms, which were discontinued at the end of the year 1903, owing to the effect of the lamp used at night to check tremors, were resumed at the beginning of the year 1906, the instrument having been removed to the magnet basement.

Rainfall returns were collected from 64 stations in different parts of the island. The mean rainfall for the whole island during the year was 72·37 ins., as compared with an average of 79·52 inches.

Observations made on board vessels trading with Mauritius were tabulated, and detailed accounts of gales and hurricanes recorded. From observations thus obtained daily synoptic charts were prepared for the hurricane months, and the tracks of five cyclones laid down.

From May to December cablegrams giving a résumé of the weather at Mauritius for the preceding week were, as usual, despatched to the Director-General of Indian Observatories in connexion with the monsoon predictions and monthly cablegrams to the Director of the Geological Survey Department, Cairo.

Photographs of the sun were taken daily when the weather permitted. Spots were observed on 309 days, and faculæ on 314 days.

The installation of an electric time-ball in Port Louis, with the necessary accessories at the Observatory, was commenced in July last, but was not completed by the end of the year.

PUBLICATIONS.

Papers on a connexion between the rainfall at Durban and in Mauritius, and on the errors of minimum thermometers were published in the Transactions of the South African Philosophical Society.

INTRODUCTION OF STANDARD TIME.

In the month of August an Ordinance was passed by the Council of Government provided for the introduction of standard time (60° East of Greenwich) in Mauritius and its Dependencies on the 1st of January, 1907.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL.

The contract with the British India Steam Navigation Company, Limited, was renewed in 1906 for another year for a four-weekly service between Colombo and Mauritius. Besides the British India steamers, our mails to and from the East are conveyed by other British and French steamers. The Messageries Maritimes Company performed their bi-monthly voyages from Marseilles to Mauritius and vice-versâ, calling at Aden, Zanzibar, Seychelles, Madagascar, and Réunion. The mails for and from South African ports were conveyed by the Union Castle steamers.

Statement of letters, postcards, newspapers, and postal parcels, &c., dealt with during the year 1906:—

—	Internal.	Mail Packets.				Other Vessels.				Total.

MONEY ORDERS.

Inland money Orders were issued during the year 1906 for a total sum of Rs. 344,686, against an aggregate sum of Rs. 341,133 during the previous year.

The foreign money orders show the following comparison:—

	Rs.
1905 … … … … … …	351,618
1906 … … … … … …	318,610

The British postal order system was extended to Mauritius in 1905. Amount sold in 1906 Rs. 7,768, and paid Rs. 4,123.

The total Post Office expenditure for 1906 was Rs. 142,331, as follows:—

	Rs.
Personal emoluments … … … …	101,174
Other Charges:—	
Overtime … … … … …	3,045
Sea and territorial transit … … …	1,060
Maintenance of telegraphs … … …	5,466
Porterage of telegrams … … …	10,571
Uniform … … … … …	1,623
Gratuities to masters of vessels … …	2,184
Miscellaneous and special expenditure …	17,208
Total … …	Rs. 142,331

And the total revenue for the same period was Rs. 133,906, collected under the following heads:—

	Rs.
Postal correspondence … … …	94,347
Telegraph receipts … … … …	22,255
Commission on money orders (Inland, Foreign, and Indian) … … …	10,170
Postal parcel service … … … …	[illegible] 358
Transit of correspondence … … …	2,[illegible]1
Private boxes … … … … …	[illegible]69
Commission on postal orders … … …	132
Forfeited money orders … … …	569
Miscellaneous … … … … …	15
Total … …	Rs. 133,906

IX.

MILITARY (TROOPS AND EXPENDITURE).

The troops in the Colony on 31st December, 1906, numbered 1,394 of all ranks. The total military expenditure, as shown by the following statement, was £147,631, of which the Colony contributed £32,576.

No. of Vote.	Particulars.	Amount.
		£
1	Pay, &c., of the Army	64,839
2	Medical Establishments	2,814
6	Quarterings, Transport, and Remounts ...	18,782
7	Supplies and Clothing	41,561
8	Ordnance Department Establishments, &c.	1,608
9	Armaments and Engineer Stores	78
10	Works and Buildings	9,731
11	Establishments for Military Education ...	399
12	Miscellaneous Effective Services	476
13	War Office and Army Accounts Department	1,412
14 to 16	Army non-Effective Services	614
—	Military Works Loan	5,317
	Total	147,631

X.—RAILWAYS.

The earnings of 1906 were Rs. 2,507,411, showing an increase of Rs. 182,587 on those of 1905. These figures are exclusive of Government traffic which amounted to Rs. 180,947 in 1906.

The working expenses in 1906 were Rs. 1,693,284, against Rs. 1,581,749 in 1905, an increase of Rs. 111,535.

The percentage of working expenditure to earnings in 1906 was 62·98, against 63·20 in 1905.

The total length of line open in 1906 was 120 miles—exclusive of sidings.

XI.—RODRIGUES.

The following statements give in a comparative form the value of the imports and exports, and the revenue and expenditure of the Dependency for the last three years:—

Trade.

Year.	Exports.	Imports.
	Rs.	Rs.
1904	201,861	226,190
1905	210,671	180,276
1906	199,375	172,660

The following were the principal exports:—

—	1904.	1905.	1906.
	Rs.	Rs.	Rs.
Horned Cattle	11,160	3,300	—
Goats	49,188	14,060	12,508
Pigs...	9,750	2,525	2,350
Salt Fish	97,933	161,460	143,760
Tobacco	27,300	15,330	13,800

Revenue and Expenditure.

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1904	12,155	30,706
1905	15,450	33,616
1906	15,047	34,333

XII.—GENERAL.

The price of sugar ranged as follows from May, 1906, to April, 1907:—For ordinary white crystallized vesous suitable for the Indian markets:—

Year.	Month.	Prices.
		Rs. c.
1906	May	7.80
"	June	7.75
"	July	7.70
"	August ...	8.00
"	September ...	8.25
"	October ...	8.25
"	November ...	7.75
"	December ...	8.00
1907	January ...	7.50
"	February ...	7.75
"	March	7.50 to 7.75
"	April	7.50 to 7.75

GRAHAM BOWER,

Colonial Secretary.

23rd August, 1907.

COLONIAL REPORTS

The following recent reports relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page :—

ANNUAL.

No.	Colony, &c.	Year.
514	British Guiana	1905–1906
515	British Honduras	1905
516	Northern Nigeria	1905–1906

MAURITIUS.

(For Report for 1906, *see* No. 547.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Port Louis,
18th August, 1908.

MY LORD,

HEREWITH I have the honour to transmit the Blue Book of the Colony for the year 1907, together with the report of the Colonial Secretary thereon.

I have, &c.,

CAVENDISH BOYLE.

The Right Honourable
The Earl of Crewe, K.G.,
Secretary of State for the Colonies.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1907.

I.—FINANCIAL.

Comparative statements of revenue and expenditure during the financial years 1906-7 and 1905-6:—

A.—*Revenue.*

Heads of Revenue.	1906-7.	1905-6.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.
Customs	3,600,029.52	3,486,682.04	113,347.48	—
Port, Harbour, and Lighthouse Dues.	283,401.17	263,073.55	20,327.62	—
Licences, Excise and Internal Revenue, not otherwise classified.	2,443,766.72	2,530,444.46	—	86,677.74
Fees of Court or Office, Payments for Specific services and Reimbursements in Aid.	252,058.32	269,353.06	—	17,294.74
Post Office and Telegraphs ...	147,007.49	139,479.45	7,528.04	—
Government Railways ...	2,500,409.10	2,437,510.65	62,898.45	—
Rent of Government Property	61,576.36	64,745.79	—	3,169.43
Interest	890,831.41	936,025.50	—	45,194.09
Miscellaneous Receipts ...	150,362.66	159,865.80	—	9,503.14
Land Sales	175.50	641.33	—	465.83
	10,329,618.25	10,287,821.63	204,101.59	162,304.97
Recovered from Loan Fund ...	—	881,961.58	—	881.961.58
Total	10,329,618.25	11,169,783.21	204,101.59	1,044,266.55
Result—Net decrease ...	—	—	—	840,164.96

The revenue of the financial year 1906-7 therefore exceeded that of the previous year (exclusive of Rs. 881.961.58 recovered from Loan Funds) by Rs. 41,796.62.

Result—Net increase ...	—	—	258,640.06	—

The increase in expenditure in 1906-7 may be attributed chiefly to railway rolling stock indented for in 1905-6 having been supplied and paid for in 1906-7.

POSITION OF THE COLONY AT THE CLOSE OF THE YEAR 1906-7.

	Rs.
Surplus on 1st July, 1906	1,172,195
Excess of revenue over expenditure (1906-7)	155,109
Surplus on 30th June, 1907 ... Rs.	1,327,304

The revenue and expenditure for the last five years, and the Treasury balances at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.	Debit Balance.
	Rs.	Rs.	£	Rs.
1902-3 ...	9,221,600	9,575,182	1,263,430	—
1903-4 ...	9,473,112	10,664,115	82,247	—
1904-5 ...	10,399,554	10,563,521	—	81.720
1905-6 ...	11,169,783	9,915,868	1,172,195	—
1906-7 ...	10,329,618	10,174,509	155,109	—

During the financial year 1906-7 the Colony of Mauritius was fortunate in reaping a crop producing 217,000 tons of sugar. The consequent comparative prosperity had its effect on the finances of the Government as is apparent from the above financial statements. The increase in the revenue and expenditure of the railway department, for instance, was due to the fact that whilst more was earned by the carriage of sugar on the Government railways, more coal had to be consumed in carrying it, and more overtime paid for.

But for years the passenger traffic has shown a tendency to decline, and the earnings of this very important branch are not so satisfactory as could be wished.

It is not easy to explain this falling off in passenger earnings, and any explanation given must be mainly conjectural, but the following appear to be some amongst other possible explanations:—

1. Increased use of motor cars and bicycles.
2. Increased facilities for local shopping.
3. A lowering of the spending power of all classes.

The last is probably the more important factor, for there can be hardly any doubt but that even in prosperous years the pressure of population in Mauritius reduces the possible earnings of the labouring classes, and that the general tendency of employés of all sorts is in the direction of lower standards of earnings of wages and of living. The pressure of competition compels employers to economise, and the necessity for cheap production requires that the labour bill shall be kept low. It may be said, therefore, that whilst a good year gives more employment, the purchasing power of the community is low and shows a distinct tendency to become lower. The productivity of the Island has almost reached its maximum, the population is on the increase, the wages bill of the community cannot be increased so long as the margin of profit remains low, and there is consequently an increasing competition for the division of a limited wages fund. The economic result so far as the Government finances are concerned must be that whilst the importation of all articles not of prime necessity must diminish, the claims on poor law relief, hospital accommodation, &c., must increase. More sad still, the expenditure on prisons shows an automatic increase, which is still increasing.

It may seen strange to mention the increased use of motor cars in a paragraph describing an increase of poverty, but for some years the draught animals of the Island have been exposed to an epidemic of surra, a disease fatal to all equides, which has forced the Colony into increased use of mechanical traction and means of locomotion.

With an abundant supply of cheap labour the question naturally suggests itself: it is not possible to establish new industries which could profit by the cheap labour? But it must be remembered that Mauritius is in the Indian Ocean. If labour is cheap in Mauritius it is cheaper still in India. Moreover the necessaries of life are cheaper in India than in Mauritius, for Mauritius lives on Indian rice, and India is not only nearer to any possible market, but has a large home market of its own.

It is impossible to doubt therefore that the financial position of Mauritius must give cause for anxiety and watchfulness, but the sugar industry is still a profitable investment and likely to remain so. There is therefore a sound basis for sound finance, and with proper economy and a gradual lightening of the burdens on productive industry and commerce there is no reason why the Colony should not emerge successfully from the difficulties and trials it has had and still has to sustain.

Assets and Liabilities on 30th June, 1907.

1. Commissioners of Currency:—

	Rs.
Assets	7,073,667
Liabilities	6,876,255
Balance in favour of Commissioners ...	197,412

2. Government savings bank:—

	Rs.
Assets	3,134,574
Liabilities	2,835,470
Balance in favour of bank	299,104

3. Treasury proper:—

	Rs.
Assets	3,637,025
Liabilities	2,309,721
Balance in favour of Treasury ...	1,327,304

4. Public Debt:—

The public debt stood as follows on 30th June, 1907:—

	£	*s.*	*d.*
(1) 6 per cent. railway debenture under Ordinance 15 of 1864 (Matured bond unclaimed)	1,000	0	0
(2) Savanne Railway 4½ per cent. debentures, payable by annual drawings (maturing in 1919)	33,400	0	0
(3) Moka Railway 4 per cent. debentures, payable by annual drawings ...	500	0	0
Carried forward	34,900	0	0

4. Public Debt—*continued.*

	£	s.	d.
Brought forward	34,900	0	0
(4) 4 per cent. debentures conversion loan payable by annual drawings ...	48,300	0	0
(5) Mauritius 4 per cent. inscribed stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas (£34,000)	482,390	16	0
(6) Hurricane loan 3 per cent. Imperial guaranteed stock, under Ordinance 4 of 1892	600,000	0	0
(7) 3½ per cent. inscribed stock, under Ordinances 31 of 1904 and 39 of 1905	150,000	0	0
	£1,315,590	16	0

For the redemption of the debentures and inscribed stock, the several sinking funds and cash balances in the hands of the trustees on the 30th June, 1907, amounted to £235,965, the amount duly provided as required by law.

The sum at the credit of the sinking funds on 30th June, 1907, showed an increase of £18,681 on the previous year.

Currency.

Amount of currency notes on 30th June, 1907:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents)...	483	16	5
Issue of 1860 (sterling)	3,405	0	0
	£3,888	16	5

Rupee notes, under Ordinance 28 of 1876:—

	Rs.
1. In the Commissioners' vault	3,261,005
2. In the hands of the public (including the banks and financial officers)	3,615,250
	6,876,255

CHANGES IN TAXATION.

The Customs tariff has been amended by Ordinance No. 5 of 1907, which provides for a reduction of the duty on Hessian cloth when imported for the packing of hemp, and narrows the application of a nominal tariff on machinery or apparatus to the cases where such machinery is imported for the manufacture of any produce of the Colony.

SAVINGS BANK.

The deposits at the Government Savings Bank, at 3 per cent. interest, amounted to Rs. 2,754,763 on 30th June, 1907, as against Rs. 2,850,234 on 30th June, 1906, showing a decrease of Rs. 95,471.

The following return shows the number of depositors, and the amount standing to the credit of the general and the Indian populations at the end of the years 1906-7 and 1905-6:—

—	1906–7.		1905–6.	
	No. of Depositors.	Amount.	No. of Depositors.	Amount.
		Rs.		Rs.

Total	26,514	2,754,763	27,683	2,850,234

The financial position of the bank on 30th June, 1907, was as follows:—

	Rs.
Investments	3,127,295.37
Cash in hand	7,279.16
Receiver-General (interest due by Treasury for 1906-7)	76,775.00
	3,211,349.53
Liabilities due to depositors and to Treasury	2,931,175.32
Balance in favour of the bank ...	280,174.21

MUNICIPALITY.

Statement of the revenue and expenditure of the municipality of Port Louis for the year ended 31st December, 1907:—

	Rs.
Balance in hand on 1st January, 1907 ...	47,740.16
Revenue, including receipts on account during 1907	553,157.37
	600,897.53
Expenditure, including payments on account during 1907	572,765.21
Balance in hand on 31st December, 1907...	28,132.32

The following is a comparative statement of the normal revenue and expenditure for the last five years:—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1903	422,351	451,346
1904	501,365	502,601
1905	548,139	492,785
1906	537,366	510,588
1907	512,172	502,916

Statement of the debt of the Municipal Corporation of Port Louis on 31st December, 1907, showing provision for payment in 1908:—

Loan.	Amount.			Repayments to be made in 1908.		
	£	*s.*	*d.*	£	*s.*	*d.*
Conversion Loan	118,700	0	0	1,700	0	0
Electric Lighting Loan ...	9,333	6	8	333	6	8
	Rs.			Rs.		
Colonial Loan	15,600			7,800		
Grand River Bridge Loan...	8,000			2,000		
Manure Establishment Loan	18,000			2,000		
Government Hurricane Loan	77,879			6,487		
Flood Loan	4,167			4,167		
Municipality Loan	22,000			2,000		
Total	145,646			24,454		

Provision for payment of capital and interest on the above loans has been duly made in the annual budget of the Corporation.

Besides the Municipal Council of Port Louis, which is an elective assembly, there are three township boards: Curepipe, Beau Bassin and Rose Hill, and Quatre Bornes, appointed annually by the Governor to administer the affairs of those places.

BOARD OF COMMISSIONERS, CUREPIPE.

Comparative statement of revenue and expenditure for last five years:—

—	Half-year. 1903.	1903–4.	1904–5.	1905–6.	1906–7.
	Rs.	Rs.	Rs	Rs.	Rs.
Revenue	35,536	82,772	68,934	65,776	67,496
Expenditure	34,261	81,158	67,729	64,740	66,885

The debt of the Curepipe Board amounts to Rs. 66,625.*

---

* Provision is made annually for repayment.

BOARD OF COMMISSIONERS, BEAU BASSIN AND ROSE HILL.

Comparative statement of revenue and expenditure for last five years:—

—	1903.	1904.	1905.	1905–6.	1906–7.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	29,270	29,345	26,645	26,831	30,995
Expenditure	29,235	26,260	28,187	25,783	30,164

The Beau Bassin and Rose Hill Board is indebted to the extent of Rs. 9,500 to Government.

BOARD OF COMMISSIONERS, QUATRE BORNES.

Comparative statement of revenue and expenditure for last five years:—

—	1903.	1904.	1905.	1905–6.	1906–7.
	Rs.	Rs.	Rs.	Rs.	Rs.

IMPORTS AND EXPORTS.

(*General Remarks.*)

The general lesson to be gathered from the imports is that the United Kingdom is being pressed hard by the competition of Germany, Belgium, and France. But this competition cannot be taken as evidence of any falling off on the part of the United Kingdom; it is due rather to the shortness of cash in Mauritius. The superiority of English articles is generally admitted, and experience has taught, or is teaching, that nothing is so expensive as a cheap article; but a general scarcity of money deprives purchasers of any real choice. If, for instance, a clock is required by a purchaser, he, as a rule, selects the cheaper article under the conviction that it will last his time. It is the same with hardware and cutlery: the better article is purchased only by people who can afford it. Similarly it will be noticed that although English matches are generally recognised as the best in the world, none, or practically none, are imported; the cheap foreign matches are preferred. But in partially-manufactured articles, such as iron bars, the United Kingdom seems to be more than holding its own; in such articles the question of quality does not arise to the same extent as in fully manufactured goods.

Broadly speaking it would not be incorrect to say that purchasers prefer the English articles when they can afford them, and it is noticeable that in such articles as automobiles, steam road engines, locomotives, wagons, and trucks, and wire rope for agricultural purposes the United Kingdom supplied articles to the value of Rs. 14,454 in 1907, against nil in 1906. Planters are beginning to learn that cheap articles are not profitable.

It might be well also to call attention to the falling off in the importation of cocoa and chocolate from the United Kingdom, and the increase in the importation from Germany. The amounts are small, but they suggest the enquiry whether this trade is in any way affected by the sugar duty

IMPORTS.

(*Detailed Remarks.*)

Acids.

Carbolic.—The imports in 1907 amounted to kilos 2,549, of the value of Rs. 747, against kilos 7,080, of the value of Rs. 1,763 in 1906, showing a decrease both in weight of kilos 4,531 and in value of Rs. 1,016. The decrease was chiefly due to the United Kingdom, which supplied kilos 4,954 less than in 1906, with a shortage in value of Rs. 1,084.

Kilos 408, of the value of Rs. 80, were received from Belgium in 1907, against nil in 1906.

Phosphoric.—This article was exclusively received from the United Kingdom, which supplied kilos 14,547 more than in 1906, with a surplus of Rs. 4,622 in value.

Sulphuric.—Compared with 1906, the imports for 1907 showed a decrease in weight of kilos 10,876, with a shortage of Rs. 3,946 in value. The decrease was due principally to France, which supplied kilos 10,154 less than in 1906, with a shortage of Rs. 3,809 in value.

Ammonia, Sulphate.

Exclusively received from the United Kingdom, which supplied kilos 4,516,831, of the value of Rs. 990,890 in 1907, against kilos 4,300,071, of the value of Rs. 954,650 in the preceding year, showing an increase both in weight of kilos 216,760 and in value of Rs. 36,240.

Apothecaries' Wares.

The imports in 1907 amounted to Rs. 155,907, against Rs. 177,775 in 1906, showing a falling off of Rs. 21,868. Decreases were from the United Kingdom (Rs. 2,311), Continental India (Rs. 1,651), China (Rs. 819), and France (Rs. 15,668). Australia and Belgium provided for Rs. 1,689 and Rs. 3,472 respectively in 1906, against nil in 1907. Increases were from Germany (Rs. 1,359), the United States (Rs. 1,579), and Switzerland (Rs. 505).

Apparel, Wearing.

The imports in 1907 amounted to Rs. 131,479, against Rs. 138,336 in 1906, showing a decrease of Rs. 6,857. Decreases were from the United Kingdom (Rs. 4,700), China (Rs. 5,980), France (Rs. 2,514), and Pondichery (Rs. 12,195). Increases were from Continental India (Rs. 9,115), Germany (Rs. 6,537), Switzerland (Rs. 3,421), and Japan.

Beef, Salted.

Kilos 50,215, of the value of Rs. 26,433, were imported in 1907, against kilos 291,058, of the value of Rs. 144,585 in 1906. The imports therefore show a decrease both in weight of kilos 240,843, and in value of Rs. 118,152, due chiefly to short supplies from the United States, which provided kilos 225,835 less, with a decrease of Rs. 110,233 in value. The United Kingdom and Australia supplied kilos 13,081, valued at Rs. 7.057, and kilos 3,211, valued at Rs. 1,479 respectively in 1906, against nil in 1907, while small supplies were received from France and Madagascar in 1907, against nil in the previous year.

Beer and Ale.

In casks.—There was a decrease of hectolitres 1,923 in measure, and of Rs. 43,435 in value. This article was exclusively imported from the United Kingdom.

In bottles.—There was a decrease of 16,150 litres in quantity, with a shortage of Rs. 8,229 in value. Decreases were from the United Kingdom (Rs. 8,034), France (Rs. 837), Germany, and Holland. From Denmark there was an increase of Rs. 1,034.

Bicycles.

166 bicycles, of the value of Rs. 14,643, were imported in 1907, against 140, of the value of Rs. 13,814, in 1906: there was an increase of 26 in number, and of Rs. 829 in value. The United Kingdom supplied 10 more with a shortage, however, of Rs. 1,025 in value. In 1907 Switzerland supplied 11, of the value of Rs. 1,417, and Germany 3, of the value of Rs. 246, against nil in 1906.

Blue-Ultramarine.

In 1907, kilos 1,687, of the value of Rs. 1,351, were imported, against kilos 2,416, of the value of Rs. 1,324, in 1906. There was therefore a decrease in weight of kilos 729, with a surplus of Rs. 27 in value. From Germany kilos 1,075 less were received in 1907, with a shortage of Rs. 515 in value. France supplied kilos 366 more, with a surplus of Rs. 519 in value.

Books, Printed.

Increase both in weight of kilos 2,420, and in value of Rs. 3,719. The United Kingdom and France showed increases of Rs. 1,204 and Rs. 3,245 in value respectively. From Continental India there was a decrease of Rs. 1,293.

Brass Ornaments.

Compared with 1906 the imports in 1907 showed a decrease of Rs. 3,070, due principally to Continental India, which provided for a less value of Rs. 4,505. The United Kingdom showed an increase of Rs. 1,496.

Bricks and Tiles.

In 1906 the United Kingdom supplied 327,126 pieces, of the value of Rs. 19,987, Natal 29,675 pieces, of the value of Rs. 657, and France 2,026 pieces, of the value of Rs. 323, aggregating 358,827 in number, and Rs. 20,967 in value, against 165,578 pieces, of the value of Rs. 8,107 received exclusively from the United Kingdom in 1907. There was therefore a decrease of 193,249 in number, and of Rs. 12,860 in value, due principally to short supplies from the United Kingdom.

Bullion (Silver).

Decrease both in weight of kilos 195-300 grs. and in value of Rs. 13,520, due chiefly to Continental India, which supplied kilos 197-300 grs. less, with a shortage of Rs. 13,672 in value.

Butter.

The imports in 1907 amounted to kilos 54,666, of the value of Rs. 133,257, against in the previous year kilos 20,895, of the value of Rs. 52,714, showing an increase both in weight of kilos 33,771, and in value of Rs. 80,543.

Increases were from the United Kingdom (Rs. 13,237), Australia (Rs. 3,656), Belgium (Rs. 925), Denmark (Rs. 51,059), France (Rs. 12,753), Italy (Rs. 828), and Holland Rs. 271). Continental India provided for Rs. 253 in 1907, against nil in 1906, while Germany provided for Rs. 2,438 in 1906, against nil in 1907.

Cabinet and Upholstery Wares.

Compared with 1906 the imports in 1907 showed a decrease of Rs. 3,866. Decreases were chiefly from the United Kingdom (Rs. 2,876), Singapore (Rs. 667), China (Rs. 652), France (Rs. 3,370), and Germany (Rs. 326). The United States and Austria showed increases of Rs. 1,108 and Rs. 2,496 respectively.

Candles.

Composition.—Increase both in weight of kilos 14,844 and in value of Rs. 14,326. Increases were from Continental India (Rs. 3,480) and France (Rs. 14,728). The United Kingdom and Belgium showed decreases of Rs. 1,766 and Rs. 2,116 respectively

Caoutchouc and India-rubber.

Manufactured.—Kilos 1,729 less, with a shortage of Rs. 13,484 in value, were received from the United Kingdom.

Carriages.

Five, of the value of Rs. 2,044, were received in 1907, against 11, of the value of Rs. 6,146, in 1906. There was a decrease of 6 in number and of Rs. 4,102 in value. The United Kingdom and the United States show decreases of Rs. 1,826 and Rs. 1,055 in value. France supplied 4 carriages, of the value of Rs. 1,742, in 1906, against nil in 1907, while Canada supplied 1, of the value of Rs. 521, in 1907, against nil in the previous year.

Carts and Waggons.

Three, of the value of Rs. 214, were received in 1907 from the United States, against nil in 1906.

Cement.

Compared with 1906 the imports in 1907 show a decrease of kilos 105,185 in weight, with a shortage of Rs. 6,254 in value, due specially to France, which provided kilos 208,000 less, with a shortage of Rs. 7,236 in value.

Chocolate and Cocoa.

Kilos 12,634, of the value of Rs. 22,467, were imported in 1907, against kilos 21,648, of the value of Rs. 33,474, in the previous year. There was therefore a decrease both in weight of kilos 9,014, and of Rs. 11,007 in value; France, the United Kingdom, and Belgium showing decreases of Rs. 7,635, Rs. 2,236, and Rs. 2,750 respectively in value. There was, however, an increase of Rs. 1,654 in value from Germany.

Clocks and Watches.

2,631 pieces, of the value of Rs. 11,741, were imported in 1907, against 2,476 pieces, of the value of Rs. 13,518 in the previous year. There was therefore an increase of 155 in number with a shortage of Rs. 1,777 in value. The United Kingdom supplied 103 pieces less with a shortage of Rs. 447 in value; France supplied 138 pieces less with a shortage of Rs. 1,345 in value. Germany supplied 377 pieces more with a surplus of Rs. 876 only in value. The United States supplied 8 pieces less with a shortage of Rs. 1,054 in value. Switzerland supplied 30 pieces more with a surplus of Rs. 221 in value.

Coals.

The imports in 1907 amounted to kilos 45,375,727, of the value of Rs. 1,655,615, against kilos 48,945,018, of the value of Rs. 1,788,351 in the previous year, showing a decrease both in weight of kilos 3,569,291, and of Rs. 132,736 in value. From the United Kingdom kilos 7,430 more were received with, however, a shortage of Rs. 73,056 in value; from Natal kilos 13,748,510 more with a surplus of Rs. 396,256 in value; from Australia kilos 14,217,031 less were received with a shortage of Rs. 387,701 in value; from Continental India kilos 3,241,042 less were received with a shortage of Rs. 70,925 in value; Cape Colony and Transvaal provided kilos 46,736, of the value of Rs. 1,559, and kilos 106,426, of the value of Rs. 1,920 respectively, in 1907, against nil in the previous year, while Belgium supplied kilos 20,320, of the value of Rs. 790, in 1906, against nil in 1907.

Confectionery.

The imports in 1907, as compared with the previous year, show a decrease of Rs. 12,425. Decreases were chiefly from the United Kingdom (Rs. 1,458), Australia (Rs. 4,024), France (Rs. 5,122), China (Rs. 945), and Reunion (Rs. 657).

Copper.

Old.—Exclusively received from the United Kingdom, which supplied kilos 6.556 less, with a shortage of Rs. 4,557 in value, as compared with 1906.

Sheets and Nails—(red).—Shortage of kilos 7,427 in weight, and of Rs. 11,152 in value, due chiefly to short supplies from the United Kingdom. France provided for Rs. 616 less than in 1906.

Cordage.

Coir.—Compared with 1906, kilos 17,194 less, with a shortage of Rs. 2,061 in value were received in 1907, due chiefly to more supplies from Continental India. The United Kingdom supplied kilos 3,099, of the value of Rs. 1,956, in 1907, against nil in the previous year.

Oiled.—Kilos 9,799 more, with a surplus of Rs. 3,352 in value, were received in 1907. The increase was due chiefly to more supplies from Continental India.

Hemp.—Kilos 7,524 less, with a shortage of Rs. 3,311 in value, were received in 1907. Continental India shows a decrease of Rs. 8,274, but Hong Kong a surplus of Rs. 5,250 in value.

Cordials and Liquors.

Litres 5,358, of the value of Rs. 14,697, were received in 1907, against litres 8,340, of the value of Rs. 21,485 in the previous year. There was therefore a decrease of 2,982 litres in quantity and of Rs. 6,788 in value, due principally to France, which supplied for a less value of Rs. 7,159. Small decreases are from the United Kingdom, China, Spain, and Denmark.

Corn Flour.

There was a decrease of kilos 8,594 in weight, with a shortage of Rs. 4,345 in value, as compared with the importation in 1906, due principally to smaller supplies from the United Kingdom.

Corn, Grain, and Meal.

Rice.—The imports in 1907 amounted to kilos 59,430,743, of the value of Rs. 7,497,693, against kilos 60,787,183, of the value of Rs. 6,865,624, in the previous year. There was therefore a decrease of kilos 1,356,440 in weight, but an increase of Rs. 632,069 in value, accountable as under:—

Continental India.—Decrease of kilos 981,864 in weight, but increase of Rs. 653,366 in value.

China.—Decrease both in weight of kilos 157,348 and in value of Rs. 16,659.

Madagascar.—Decrease both in weight of kilos 3,078 and in value of Rs. 1,035.

Straits Settlements.—Increase both in weight of kilos 619,000 and in value of Rs. 96,511.

Cochin China.—Decrease both in weight of kilos 1,801,500 and in value of Rs. 215,654.

Singapore.—Increase both in weight of kilos 968,350 and in value of Rs. 115,540.

Wheat.—Compared with the previous year, the imports in 1907 show a decrease both in weight of kilos 378,577 and in value of Rs. 41,898, due principally to short supplies from Continental India.

Wheat Flour.—Compared with 1906, the importation in 1907 shows a decrease in weight of kilos 2,116,203 and in value of Rs. 187,563, accountable as under:—

From Australia: decrease both in weight of kilos 2,174,204 and in value of Rs. 291,158.

From Continental India: decrease in weight of kilos 301,667, but increase in value of Rs. 44,961.

The Argentine Confederation supplied kilos 363,606, of the value of Rs. 59,370, in 1907, against nil in 1906.

Cotton Manufactures.

Coloured.—2,131,792 metres, of the value of Rs. 429,682, were imported in 1907, against 5,454,328 metres of the value of Rs. 831,121 in 1906. There was a decrease of 3,322,536 metres in measure, and of Rs. 401,439 in value, due specially to the United Kingdom, which showed a decrease of Rs. 396,105. Belgium, France, Italy, and Pondichery showed also decreases of Rs. 5,639, Rs. 7,280, Rs. 1,057, and Rs. 837 respectively. Increases were from Continental India (Rs. 6,539), Germany (Rs. 1,086), and Switzerland (Rs. 2,169).

Hosiery.—There was a decrease of Rs. 6,427 in the importation of 1907, as compared with the previous year, due to short supplies from Germany and the United Kingdom, amounting to Rs. 5,347 and Rs. 905 respectively.

Plain.—3,764,911 metres, of the value of Rs. 501,830, were imported in 1907, against 4,937,394 metres, of the value of Rs. 862,577, in 1906: there was therefore a decrease of 1,172,483 metres in measure and of Rs. 360,747 in value. The United Kingdom, Continental India, and France showed decreases amounting to Rs. 348,684, Rs. 4,995, and Rs. 8,851 respectively in value. From Switzerland there was an increase of Rs. 2,694.

Thread for sewing.—The United Kingdom supplied kilos 2,808 less, with a shortage of Rs. 9,292 in value, during the year 1907. From France, kilos 16, valued Rs. 75, were received in 1907, against nil in 1906.

Eastern and China Wares.

323,188 pieces, of the value of Rs. 56,660, were received in 1907, against 475,367 pieces, of the value of Rs. 61,886, in the previous year, thus showing a decrease of 152,179 pieces in number, and of Rs. 5,226 in value. Decreases were from Austria (Rs. 2,834), Belgium (Rs. 409), China (Rs. 958), France (Rs. 13,286), Continental India (Rs. 125), Singapore, and Switzerland. Increases were from the United Kingdom (Rs. 11,085) and Germany (Rs. 1,322).

Glass.

Bottles (empty).—9,411 bottles less, with a shortage of Rs. 616 in value, were received in 1907. The United Kingdom supplied 2,714 bottles more, with a falling off of Rs. 55 in value. France supplied 12,125 bottles less, with a shortage of Rs. 561 in value.

Looking Mirrors.—2,746 pieces less, with a shortage of Rs. 2,222 in value, were received in 1907. Decreases were from Continental India (Rs. 208), France (Rs. 2,273), the United Kingdom (Rs. 369), Germany (Rs. 299), and China. From Belgium there was an increase of Rs. 1,034. Hong Kong provided for Rs. 260 in 1906, against nil in 1907, while Switzerland provided for Rs. 121 in 1907, against nil in the previous year.

Windows.—5,208 metres more were received in 1907 with, however, a shortage of Rs. 691 in value. The United Kingdom supplied 4,566 metres more, with a surplus of Rs. 894 only in value. Belgium supplied 216 metres less, with a shortage of Rs. 956 in value. France supplied 586 metres more with however, a shortage of Rs. 715 in value.

Glassware.

The imports in 1907, as compared with the previous year, show a decrease of 42,293 pieces in quantity, and of Rs. 14,261 in value. The United Kingdom, Austria, and France show decreases of Rs. 3,606, Rs. 1,214, and Rs. 12,871 respectively, in value, and Germany an increase of Rs. 4,584 in value.

Haberdashery.

Compared with 1906, the imports in 1907 show a decrease of Rs. 55,822. Decreases were from Continental India (Rs. 8,487), China (Rs. 1,609), France (Rs. 59,745), Japan (Rs. 964), and Hong Kong. Increases were from the United Kingdom (Rs. 623), Austria (Rs. 1,076), Belgium (Rs. 1,921), Germany (Rs. 1,042), Holland (Rs 3,844), and Switzerland (Rs. 5,992).

Hardware and Cutlery.

The imports in 1907 amounted to Rs. 744,119, against Rs. 1,021,629, in 1906, showing a decrease of Rs. 276,510. Decreases were from the United Kingdom (Rs. 247,123), continental India (Rs. 1,223), Austria (Rs. 601), Belgium (Rs. 17,669), China (Rs. 318), Holland (Rs. 316), Germany (Rs. 5,134), the United States (Rs. 7,054), and Sweden (Rs. 268). Australia, Hong Kong, Pondichery, and Japan supplied small quantities in 1906, against nil in 1907. Switzerland and France show increases of Rs. 2,391 and Rs. 641 respectively.

India Rubber Wares.

The imports in 1907 amounted to Rs. 20,087, against Rs. 24,542 in the previous year, showing a decrease of Rs. 4,455 in value. The United Kingdom shows a decrease of Rs. 6,800 and France a surplus of Rs. 2,082 in value.

Iron.

Bars.—The imports in 1907 amounted to kilos 643,846, of the value of Rs. 90,644, against kilos 703,755, of the value of Rs. 86,974, in 1906, showing a decrease of kilos 59,909 in weight, but a surplus of Rs. 3,670 in value. The United Kingdom shows an increase of kilos 33,047 in weight and of Rs. 13,079 in value, and Belgium a decrease of kilos 93,069 in weight and of Rs. 9,443 in value.

Nails.—The imports in 1907 amounted to kilos 112,318, of the value of Rs. 31,437, against kilos 186,445, of the value of Rs. 49,931 in 1906, showing a decrease of kilos 74,127 in weight, and of Rs. 18,494 in value; the United Kingdom, Belgium, France, and Germany showing decreases of Rs. 14,339, Rs. 3,104, Rs. 210, and Rs. 1,741 respectively. Norway supplied for Rs. 655 in 1907, against nil in the previous year.

Sheets.—The imports in 1907 amounted to kilos 516,199, of the value of Rs. 106,662, against kilos 634,234, of the value of Rs. 124,253, in 1906, showing a decrease of kilos 118,035 in weight and of Rs. 17,591 in value. From the United Kingdom there was a decrease of kilos 116,690 in weight and of Rs. 17,368 in value. Belgium provided for Rs. 224 in 1906, against nil in 1907.

Wrought, of other sorts.—Compared with 1906, the imports in 1907 show an increase of kilos 175,557 in weight and of Rs. 13,676 in value, due specially to the United Kingdom, which supplied kilos 195,647 more, with a surplus of Rs. 16,505 in value. From Belgium there was a decrease of kilos 19,966 in weight and of Rs. 2,815 in value.

Jewellery.

The imports in 1907 amounted to Rs. 71,807, against Rs. 41,198 in the previous year, showing an increase of Rs. 30,609 in value. Increases were from Switzerland (Rs. 2,910), Continental India (Rs. 1,082), France (Rs. 25,956), and Germany (Rs. 4,808). The United Kingdom and Pondichery show decreases of Rs. 2,278 and Rs. 625 respectively. Austria provided for Rs. 1,156 in 1906, against nil in 1907.

Juice of Lemon or Lime.

Compared with 1906, the imports in 1907 show a decrease of 189 hectolitres in measure, and of Rs. 2,207 in value, due principally to the United Kingdom, which provided 187 hectolitres less, with a shortage of Rs. 2,093 in value.

Lead.

Sheets and Pipes.—Exclusively received from the United Kingdom, which shows a decrease of kilos 18,897 in weight, and of Rs. 3,430 in value, as compared with 1906.

Leather.

Wrought, Boots, and Shoes.—35,059 pairs, of the value of Rs. 101,532, were received in 1907, against 42,048 pairs, of the value of Rs. 87,974, in the previous year, showing a decrease of 6,989 pairs in quantity, but an increase of Rs. 13,558 in value, accountable as under:—

From the United Kingdom: Increase of 4,303 pairs and of Rs. 18,020 in value.

From Continental India: Decrease of 9,958 pairs and of Rs. 3,132 in value.

From France: Decrease of 530 pairs, but increase of Rs. 2,076 in value.

From Pondichery: 549 pairs, of the value of Rs. 401, were received in 1906, against nil in 1907.

Sole.—Compared with 1906, the imports in 1907 show a decrease of kilos 3,463 in weight, and of Rs. 5,685 in value, due to Australia, which provided kilos 3,466 less, with a shortage of Rs. 5,708 in value.

Wrought, of other sorts.—The value of the imports in 1907 amounted to Rs. 72,904, against Rs. 74,799, in the previous year, showing a decrease of Rs. 1,895. The United Kingdom and France showed decreases of Rs. 3,850 and Rs. 1,106 respectively; from Germany there was an increase of Rs. 2,068.

Linen Manufactures.

Canvas.—Compared with 1906, the imports in 1907 show a decrease of kilos 10,567 in weight, and of Rs. 11,349 in value, due to the United Kingdom, which provided kilos 11,558 less, with a shortage of Rs. 13,045 in value. France supplied kilos 1,096, of the value of Rs. 1,633 in 1907, against nil in 1906.

Plain.—In 1907 the United Kingdom supplied metres 9,653, of the value of Rs. 1,797, while in 1906 Pondichery supplied 1,000 metres, of the value of Rs. 145. There was a decrease of 8,653 metres in quantity and of Rs. 1,652 in value.

Machinery and Mill-work.

Machinery and Mill-work.—The imports in 1907 amounted to kilos 2,341,078, of the value of Rs. 472,818, against kilos 681,625, of the value of Rs. 410,038 in the previous year, showing an increase of kilos 1,659,453 in weight, and of Rs. 62,780 in value, due principally to the United Kingdom, which shows an increase of kilos 1,663,391 in weight, and of Rs. 55,364 in value. Belgium and France provided kilos 1,189 more, with a surplus of Rs. 2,547 and kilos 2,421 more, with a surplus of Rs. 3,394 respectively, in value. Germany shows a decrease of kilos 7,548 in weight, but an increase of Rs. 1,476 in value.

Machinery consisting of automobiles, steam road engines, locomotives, wagons and trucks, rails and accessories, and wire rope for agricultural purposes.—The imports in 1907 amounted to kilos 2,424,377, of the value of Rs. 361,691, against kilos 2,095,676, of the value of Rs. 333,308, in the previous year, showing an increase of kilos 328,701 in weight, and of Rs. 28,383 in value. From Belgium there was an increase of kilos 255,266 and of Rs. 25,633; from Germany there was an increase of kilos 59,033 in weight, but a decrease of Rs. 10,693 in value; from France there was a decrease of kilos 21,305 in weight, and of Rs. 1,011 in value. The United Kingdom supplied kilos 35,707, of the value of Rs. 14,454, in 1907, against nil in the previous year.

Margarine.

Kilos 38,113, of the value of Rs. 34,810, were received in 1907, against kilos 45,415, of the value of Rs. 44,315, in 1906, showing a decrease of kilos 7,302 in weight, and of Rs. 9,505 in value. Decreases were from Denmark (Rs. 1,315), Germany (Rs. 1,641), Holland (Rs. 4,765), and the United States (Rs. 3,904). The United Kingdom, however, shows an increase of Rs. 2,120.

Matches.

Compared with 1906, the imports in 1907 show an increase of gross 30,171, with a surplus of Rs. 49,454 in value. Japan Sweden, and Austria supplied for surplus, quantities of 16,900 gross, 11,966 gross, and 675 gross, with increases in value of Rs. 34,232, Rs. 13,380, and Rs. 862 respectively. Belgium supplied 500 gross, of the value of Rs. 585, in 1906, against nil in 1907, while from Germany were received 1,875 gross, of the value of Rs. 2,169, in 1907, against nil in the previous year. China shows a decrease of 750 gross in quantity and of Rs. 630 in value.

Meat: Fresh, Frozen.

There was a substantial decrease in the importation of the article from Australia, as frozen meat does not appear to be appreciated by the population, and is now almost exclusively imported for the military, with whom the owners of the Frozen Meat Store are under contract. The decrease was as under:—

Cows and Oxen.—Only 98 carcasses, of the value of Rs. 23,003, were received in 1907, against 576, of the value of Rs. 109,696, in the previous year. Decrease: 478 in number and Rs. 86,693 in value.

Sheep.—Only 676 carcasses, of the value of Rs. 6,788, were imported in 1907, against 1,087, of the value of Rs. 14,856, in 1906. Decrease: 411 in number and Rs. 8,068 in value.

Swine.—None was received in 1907, against 143 carcasses, of the value of Rs. 4,226, in the previous year.

Poultry.—Poultry to the value of Rs. 68 were received in 1907, against nil in 1906.

Military Articles.

The value of the importation in 1907 amounted to Rs. 707,107, against Rs. 694,987, in 1906, showing an increase of Rs. 12,120 in value. From the United Kingdom there was an increase of Rs. 100,053, while from Continental India there was a decrease of Rs. 84,705. The United States provided for Rs. 3,622 in 1906, against nil in 1907.

Motor Cars.

Thirteen motor cars, of the value of Rs. 50,023, were received in 1907, against 8, of the value of Rs. 29,452, in the previous year, or an increase of 5 in number and of Rs. 20,571 in value. The United Kingdom supplied 10 more, with a surplus of Rs. 39,687 in value. From France, 5 less, with a shortage of Rs. 19,116 in value were received.

Painters', Dyers' Colours and Materials.

Compared with 1906, the imports in 1907 show a decrease of Rs. 13,971, due specially to the United Kingdom, which provided for a less value of Rs. 13,669. France and Germany show slight increases, while slight decreases are noticeable under China, Continental India, and Australia

Paper.

Cigarette.—Compared with the previous year, the imports in 1907 show an increase of kilos 5,090 in weight and of Rs. 26,830 in value, due principally to France, which provided kilos 4,951 more, with a surplus of Rs. 26,967 in value. Germany supplied kilos 125, of the value of Rs. 309 in 1906, against kilos 315, of the value of Rs. 398 in 1907.

Packing.—Compared with 1906, the imports in 1907 show a falling off of Rs. 7,978, due to France, which provided for Rs. 12,589 less. From the United Kingdom there was an increase of Rs. 2,069, while Germany provided for Rs. 2,995 in 1907, against Rs. 544 in 1906.

Plated and Gilded Wares.

Compared with the previous year, the imports in 1907 show an increase of Rs. 7,567 in value, due principally to France, which shows an increase of Rs. 6,653. From Germany also there was an increase of Rs. 1,000, while the United Kingdom and Switzerland show decreases of Rs. 262 and Rs. 136 respectively. Austria provided for Rs. 400 in 1907, against nil in 1906.

Postal Parcels.

The value of parcels imported shows an increase of Rs. 21,565 as compared with 1906. Increases were specially from the United Kingdom (Rs. 5,105), France (Rs. 4,658), Continental India (Rs. 5,192), Reunion (Rs. 987), Switzerland (Rs. 3,774), and Egypt (Rs. 468). Decreases were from Germany (Rs. 2,342), the United States (Rs. 910), Cape Colony (Rs. 149), and Natal (Rs. 42).

Saddlery and Harness.

The imports in 1907 amounted to Rs. 3,751, against Rs. 5,823, in the previous year, showing a decrease of Rs. 2,072 in value, due to short supplies from the United Kingdom.

Silk Manufactures.

Satin and Ribbons.—Metres 810 more, with a surplus of Rs. 2,971 in value, were received in 1907. The United Kingdom, France, and Japan show increases of Rs. 1,470, Rs. 2,713, and Rs. 1,538, respectively. Continental India, China, and Germany show decreases of Rs. 982, Rs. 523, and Rs. 631, respectively.

Soap: Ordinary.

The imports in 1907 amounted to kilos 1,344,441, of the value of Rs. 379,932, against kilos 978,195, of the value of Rs. 219,388, in the previous year, showing an increase of kilos 366,246 in weight, and of Rs. 160,544 in value. The United Kingdom supplied kilos 368,652 more, with an increase of Rs. 161,241 in value. France provided for Rs. 659 in 1906, against nil in 1907.

Specie.

Gold.—The United Kingdom provided in 1907 for Rs. 5,854 more than in the previous year.

Silver.—The imports in 1907 amounted to Rs. 2,707,295, against Rs. 560,646, in 1906, showing an increase of Rs. 2,146,649. Increases were from Continental India (Rs. 2,042,500) and France (Rs. 103,844). The United Kingdom provided for Rs. 304 in 1907, against nil in 1906.

Spirits.

Brandy.—There was a decrease of litres 26,033 in measure, and of Rs. 46,483 in value, due specially to France, which supplied litres 26,279 less, with a shortage of Rs. 44,012, in value. The United Kingdom also shows a decrease of litres 1,534 in measure, and of Rs. 3,075 in value. Holland supplied litres 1,968, of the value of Rs. 845, in 1907, against nil in the previous year, while small quantities were supplied by Australia and Germany in 1906, against nil in 1907.

Whisky.—The imports in 1907 amounted to litres 30,656, of the value of Rs. 53,031, against litres 46,862, of the value of Rs. 76,690, in 1906, showing a decrease of litres 16,206 in quantity, and of Rs. 23,659 in value. The decrease was due specially to the United Kingdom, which supplied litres 15,772 less, with a shortage of Rs. 23,515 in value.

Stationery.

The value of the imports in 1907 amounted to Rs. 127,057, against Rs. 99,780, in 1906, showing an increase of Rs. 27,277. Increases were from the United Kingdom (Rs. 22,552), Continental India (Rs. 544), Austria (Rs. 952), Belgium (Rs. 260), France (Rs. 774), Germany (Rs. 2,540), and Switzerland. Slight decreases were from China and the United States.

Steel.

Unwrought.—Kilos 11,502, of the value of Rs. 5,240, were received in 1907, against kilos 10,644, of the value of Rs. 8,537, in 1906. There was therefore an increase of kilos 858 in weight, but a decrease of Rs. 3,297 in value. The United Kingdom shows an increase of kilos 3,657 in weight and of Rs. 1,128 in value. In 1906 France supplied kilos 2,799, of the value of Rs. 4,424, against nil in 1907.

Tea.

The imports in 1907 amounted to kilos 49,959, of the value of Rs. 48,121, against kilos 46,132, of the value of Rs. 41,437, in 1906, showing an increase of kilos 3,827 in weight and of Rs. 6,684 in value, accountable as follows:—

From Ceylon: increase of kilos 3,973 in weight and of Rs. 4,568 in value.

From Continental India: increase of kilos 684 in weight and of Rs. 905 in value.

From China: decrease of kilos 320 in weight, but increase of Rs. 1,436 in value.

From Hong Kong: decrease of kilos 185 in weight and of Rs. 21 in value. Japan supplied kilos 300, of the value of Rs. 154, in 1906, against nil in 1907.

Tin.

Plates.—The imports in 1907 amounted to kilos 68,945 in weight and to Rs. 19,842 in value, against kilos 155,756, of the value of Rs. 35,861, in the previous year, showing a decrease of kilos 86,811 in weight and of Rs. 16,019 in value, due to the United Kingdom, which provided kilos 88,221 less, with a shortage of Rs. 18,282 in value. From Continental India there was an increase of kilos 1,410 in weight and of Rs. 263 in value.

Slabs.—Kilos 5,719, of the value of Rs. 20,063, were imported in 1907, against kilos 8,875, of the value of Rs. 36,510 in 1906, showing a decrease of kilos 3,156 in weight and of Rs. 16,447 in value. The Straits Settlements and Singapore provided kilos 814 and kilos 3,141 less, with decreases of Rs. 3,726 and Rs. 14,914 respectively. From the United Kingdom there was an increase of kilos 563 in weight and of Rs. 3,101 in value. Continental India supplied kilos 722, of the value of Rs. 1,483, in 1907, against nil in the previous year, while in 1906 Germany supplied kilos 486, of the value of Rs. 2,391, against nil in 1907.

Tobacco.

Manufactured.—Compared with 1906, the imports for 1907 show an increase of kilos 26,654 in weight and of Rs. 20,154 in value, due to the United States, which provided kilos 23,876 more, with a surplus of Rs. 25,482 in value. From Reunion there was an increase of kilos 2,335 in weight, but a shortage of Rs. 6,711 in value. Slight increases are noticeable under the United Kingdom, France, Hong Kong, and China.

Cigars.—There was an increase of kilos 451 in weight, but a decrease of Rs. 5,106 in value, due to Continental India, which supplied kilos 298 more with, however, a shortage of Rs. 588 in value. From the United Kingdom there was an increase of kilos 248 in weight and of Rs. 2,110 in value; from the United States there was a decrease of kilos 777 in weight and of Rs. 11,380 in value; from France there was an increase of kilos 180 in weight and of Rs. 1,432 in value; from Switzerland there was an increase of kilos 448 in weight and of Rs. 2,749 in value. Small supplies were received from Germany (Rs. 41), Holland (Rs. 430), Ceylon (Rs. 85), Egypt (Rs. 253), and Turkey (Rs. 189), in 1907, against nil in the previous year.

Unmanufactured.—Kilos 6,042 less were received in 1907, with a shortage of Rs. 33 in the value of the importation due to difference in the market price in Continental India.

Umbrellas and Parasols.

26,108, of the value of Rs. 32,822, were received in 1907, against 23,588, of the value of Rs. 29,485, in 1906, showing an increase of 2,520 in number and of Rs. 3,337 in value. France supplied 4,491 more, with a surplus of Rs. 4,646 in value. The United Kingdom showed an increase of 119 in number and of Rs. 220 in value, while from Continental India there was a decrease of 2,190 in number and of Rs. 1,977 in value. From Germany 100, of the value of Rs. 447, were received in 1907, against nil in the previous year.

Silk.—There was an increase of 715 in number and of Rs. 1,211 in value, due to France, which supplied 834 more, with a surplus of Rs. 1,574 in value. From the United Kingdom there was a decrease of 110 in number and of Rs. 309 in value.

Woodenware.

The value of the imports in 1907 amounted to Rs. 18,686, against Rs. 8,737 in the previous year, showing an increase of Rs. 9,949. Increases were from the United Kingdom (Rs. 8,997), and France (Rs. 1,428), and Continental India. Slight decreases were noticeable under Reunion, Japan, Australia, Cochin China, Singapore, Germany, Switzerland, and the United States.

Woollen Manufactures.

Blankets.—Compared with 1906, the imports in 1907 show a decrease of 725 blankets, and of Rs. 3,124 in value. Decreases were from the United Kingdom (Rs. 2,002), Continental India (Rs. 523), China (Rs. 589), and France (Rs. 480).

Mixed with cotton and silk.—The imports in 1907 amounted to 106,778 metres, of the value of Rs. 124,254, against metres 121,871, of the value of Rs. 141,808 in the previous year, showing a decrease of metres 15,093 in measure and of Rs. 17,554 in value. Decreases were from the United Kingdom (Rs. 12,478) and France (Rs. 8,220). From Germany there was an increase of Rs. 2,608 in value.

Shawls.—1,353 shawls, of the value of Rs. 1,420, were received in 1907, against 1,957 shawls, valued Rs. 2,221 in the previous year, showing a decrease of 624 shawls and of Rs. 801 in value. The United Kingdom supplied 669 less, with a shortage of Rs. 485 in value; Austria 153 less, with a shortage of Rs. 143, and France 88 less, with a shortage of Rs. 266 in value. Germany supplied 110 more, with, however, a shortage of Rs. 235 in value. Continental India supplied 176 more with a surplus of Rs. 294 in value.

MINES, MANUFACTURES, AND FISHERIES.

There are no mines in Mauritius and, so far as is known, no minerals, though traces of gold have been reported from a place called "Fressanges," in the southern portion of the Island, but in nothing approaching a payable proportion. The Island is purely agricultural, and such industries as exist are connected with agriculture, such as the manufacture of vacoas bags for the packing of sugar, &c.

The fisheries are protected by law, and give employment to a considerable population of fishermen. Fish to a great extent forms the principal food of the poorer classes who cannot afford meat.

FORESTRY AND BOTANY.

General Remarks.

Mauritius originally contained large forests with valuable trees; the wood from these trees was very durable, and in many cases exceedingly beautiful. But the need for land for sugar cultivation and the need for firewood has caused a disastrous shrinkage of the old indigenous forests. The necessity for a policy of reafforestation is universally recognised, and from time to time expert advice has been sought on the subject, the last being that of Mr. Gleadow, of the Indian Forest Department, in 1904. But owing to want of funds it has not been found possible to carry out any comprehensive scheme of reafforestation. Nevertheless the Forest Department is doing good work in the conservation and replanting of existing forest areas.

The mountain reserves and river reserves (private lands within which wood-cutting is forbidden) are carefully supervised, and a regular scheme has been started for the exploitation of the Government forests. From the æsthetic and historical point of view, it is to be hoped that every effort will be made to preserve the indigenous trees and to propagate them. Unfortunately they are so slow of growth that whilst the wood is often beautiful, as in the case of the ebony, the colophane and the tamalacoque, it pays better to plant conifers, casuarina trees, eucalyptus, or even acacia.

But the importance of forestation has been brought home to all in the Island, and though difficulties, mainly financial, stand in the way, planting is going on and the Forest Department sells large numbers of young plants to private landowners to be planted out, as will be seen from the more detailed statement given further on.

The foresters' enemies in Mauritius are monkeys, wood-eating beetles, dead trees which become the breeding ground of insect pests, and wood-cutting thieves. Cyclones should also be mentioned amongst the foresters' enemies.

Detailed Remarks.

The approximate area of lands of various descriptions under the care of the Forest Department was at the end of 1907:—

	Acres.
Crown lands	66,699
Mountain reserves	11,000
River reserves	6,000
Curatelle lands	830
	84,529

There are three botanical stations at different altitudes which, besides being centres of acclimatisation of large

numbers of plants, both tropical and sub-tropical, are also forest nurseries of importance.

1. *The Royal Botanical Gardens, Pamplemousses.*

These gardens, of a total extent of 91 acres, are visited by the inhabitants of the Island and by strangers. The free exchange system carried out with correspondents abroad results in useful acquisitions to the Colony in the way of economic and ornamental plants. 258,954 forest plants were sold for Rs. 2,548.61. To Government forests and public institutions 46,566 plants were sent free, and also 17,972 other plants, including economic and ornamental, and 250 pounds of seeds. Total 323,470 plants.

In local exchanges, 4,425 plants and 21 pounds of seeds were disposed of, and 6,723 plants were received, also 203 pounds of seeds.

For the foreign exchange 3,587 plants and 95 pounds of seeds were supplied, and 186 plants and 15 pounds of seeds were received.

The gardens do useful work also in experimental sugar cane cultivation and in experimental spice trees.

2. *The Nursery Gardens, Curepipe.*

These gardens, of an extent of 56½ acres, at an altitude of 1,800 feet, are chiefly managed in view of the forest nurseries they contain, and the conifers are most abundantly represented. 55,625 plants were sold to the public in 1907 for Rs. 680.43. To Government plantations and nurseries 144,700 plants were despatched, 4,760 to public establishments and river reserves. 3,930 plants, forest and ornamental, were given in exchange locally, and 91 plants and 5 pounds of seeds were received. Six apprentices received training during the year.

3. *The Réduit Gardens.*

These form part of the Réduit domain, the residence of the Governor. The forest plantations made here in previous years supply useful seeds for other nurseries (eucalyptus, camphor, sandal, &c.).

Horticultural Society.

The Horticultural Society of Mauritius, formed in November, 1904, receives encouragement both from the Government, in the way of an annual subsidy of Rs. 500, and from the public, who have at the several exhibitions given evidence of a desire to improve and utilise the economic and ornamental plants. Some beautiful fibres from the Ravenal or Travellers' palm were shown at the last exhibition.

Statement of revenue actually derived from all leases under the "planting conditions" of Ordinance No. 19 of 1895 (Pas Géométriques), for the year ended 30th June, 1907:—

Districts.	Rupees.
Port Louis	40
Pamplemousses	822
Rivière du Rempart	1,426
Flacq	2,360
Grand Port	1,620
Savanne	1,260
Black River	1,394
	8,922

LAND GRANTS.

Lands are granted by the Government by lease and by sale. Lands which are situated on the sea coast beyond the limits of Port Louis, known as Pas Géométriques, cannot be sold and can only be leased by public auction, except those forming part of villages which have been proclaimed as such. The sales are invariably made by public auction, except in cases where lands are desired for charitable, religious, or educational purposes, or for public utility. No sale of Crown land took place during the year ended 30th June, 1907.

SHIPPING

The shipping for the five years 1903-1907 can be thus summarised:—

—	1903.		1904.		1905.		1906.		1907.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total number and tonnage of vessels entered and cleared (exclusive of coasting trade, *i.e.*, dependencies.)	442	767,977	425	801,154	372	731,470	433	805,924	399	731,853
2. British vessels ..	306	539,542	290	572,440	245	490,378	270	522,101	248	501,491
3. Foreign vessels ..	136	228.435	125	228,714	127	241,092	163	283,823	151	230,362
4. Sailing vessels ..	101	65.308	96	66,449	73	50,471	89	59,822	39	20,682
5. Steam vessels.. ..	341	702,669	329	734,705	299	680,999	344	746,102	360	711,171

Coasting Trade (i.e., Dependencies).

—	1903.		1904.		1905.		1906.		1907.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total number and tonnage of vessels entered and cleared	63	11.802	60	12.845	55	9,263	51	9,636	48	11.624
2. British vessels ..	63	11.802	60	12,845	55	9,263	51	9,636	42	9,326
3. Foreign vessels ..	..	..	..	..	..	..	..	..	6	2,298
4. Sailing vessels ..	62	11,607	56	12,065	55	9,263	51	9,636	40	7,576
5. Steam vessels ..	1	195	4	780	..	..	..	..	8	4,048

The nationality and description of vessels are shown at pages 35-6.

The number and tonnage of steam vessels which entered and cleared from, and to all countries *viâ* the Suez Canal and the value of goods (including Bullion and Specie) imported into, and exported by that Canal into, and from Mauritius are shown in the following table:—

Suez Canal.

Years.	Vessels Entered.		Vessels Cleared		Value of Goods (including Bullion and Specie).	
	No.	Tonnage.	No.	Tonnage.	Imports.	Exports.
					Rs.	Rs.
1903	32	65,515	27	53,541	6,542,071	2,483,481
1904	32	71,428	20	42,717	3,149,920	234,010
1905	35	84,975	28	68.734	2,437,479	893,257
1906	37	89,109	27	61,980	2,554,574	1,358,512
1907	33	80,843	28	64,087	2,202,682	273,372

The first table is a return of all vessels entered and cleared, excluding the coasting trade vessels, *i.e.*, vessels trading with the dependencies which are exclusively dealt with in the second table.

In table 1, the total number of vessels entered and cleared during 1907 shows a decrease of 34 in number and of 74,071 in tonnage, as compared with the figures for 1906.

Compared with 1906 the following differences are noted:—

Sailing vessels—decrease of 50 in number and also of 39,140 in tonnage.

Steam vessels—increase of 16 in number but decrease of 34,931 in tonnage.

British vessels—decrease of 22 in number and also of 20,610 in tonnage.

Foreign vessels—decrease of 12 in number and also of 53,461 in tonnage.

Of the 399 vessels which entered and cleared during 1907, four British steamers and one Norwegian steamer, with an aggregate tonnage of 9,169, called at this Port for the purpose of coaling, showing an increase of 1,211 in tonnage, as compared with 1906.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the dependencies during 1907 is 48, with a tonnage of 11,624, against, during 1906, 51 with a tonnage of 9,636, showing a falling off of 3 in number, but an increase of 1,988 in tonnage.

Eight steamers, with a tonnage of 4,048, entered and cleared from and to the dependencies during 1907, against nil during 1906.

Six foreign vessels, with a tonnage of 2,298, entered and cleared from and to the dependencies during 1907, against nil during 1903 to 1906 inclusively.

Suez Canal.

The value of goods imported through the Suez Canal in 1907 amounted to Rs. 2,202,681.75, against Rs. 2,554,573.66 in 1906, showing a decrease of Rs. 351,891.91.

Goods exported from Mauritius through the canal in 1907 amounted to Rs. 273,371.50, against Rs. 1,358,512.18 in 1906, showing a decrease of Rs. 1,085,140.68.

Vessels with Cargoes.

The tonnage of vessels entered with cargoes during 1907 amounted to 351,375, and the tonnage cleared to 279,067, as against 384,459 entered and 291,942 cleared during 1906.

The aggregate tonnage of the coasting trade amounted to 5,669 entered and 5,955 cleared in 1907, against 4,723 entered and 4,913 cleared in 1906.

Vessels touching at this Port.

One British steamer of 875 tons, three British sailing vessels with an aggregate tonnage of 2,627, one French sailing vessel of 705 tons and one Norwegian sailing vessel of 270 tons touched at this Port without entering the harbour during 1907.

The number and tonnage of ships visiting Mauritius is naturally dependent on the amount of trade, and the trade varies with the crop. A large sugar crop requires more vessels or larger vessels to carry it, a small crop fewer. The year 1907 was a year of a small crop. But the general tendency is towards larger ships—and large ships require quick discharge, as the cost of detention is greater than in the case of small ships. Unfortunately owing to Quarantine regulations and to insufficient lighterage, the demands of the shipping companies have not been completely satisfied, but harbour improvements have been carried out, and it is to be hoped that some further measure of satisfaction may be given. For it is now generally recognised that quick despatch and greater facilities are the best means of securing lower freights.

Statement of number and tonnage of British and Foreign sailing vessels and steamers entered and cleared for 1907 and 1906:—

—	1907.		1906.		Difference. + Increase. — Decrease.

III.—LEGISLATION.

During the session of 1907 twenty-two Ordinances were passed by the Council of Government and assented to by the Governor. The following enactments call for special mention:—

1. Ordinance No. 1 amends the Letters Patent of the 16th September, 1885, as to the qualification of elected members.

2. Ordinance No. 8 restricts the introduction into the Colony of destitute persons likely to become chargeable to the Colony, and of vicious and criminal persons.

3. By Ordinance No. 9 the law relating to vagrancy is amended, and an improvement is effected on that portion of the Labour Law which deals with certain immigrants as vagrants.

4. Ordinance No. 11 amends articles 227, 307, and 333 of the Penal Code dealing respectively with blackmail and extortion, and with embezzlement, and makes further provision for the repression of bribery.

5. By Ordinance No. 16 power is given to the local Boards to acquire land for the improvement of roads in the townships and rural districts.

6. Ordinance No. 19 empowers the Governor to grant licences for the establishment of telephones and generally regulates the use of telephones in the Colony.

7. Ordinance No. 23 amends articles 205 and 767 of the Civil Code, dealing respectively with alimony and with the rights of the surviving spouse in the succession of the deceased spouse in case of intestacy.

IV.—EDUCATION.

PRIMARY EDUCATION.

In Mauritius primary education is free. There are two classes of schools: Government schools and grant-in-aid schools. The latter are denominational, but receive pupils of all religions.

The religious compromise on which primary education is based in Mauritius will be found in two sub-sections of the Education Ordinance. Section III., article 15, sub-section 3 runs as follows:—

"(3) Religious teaching shall not form part of the instruction to be given at any Government school; but any minister of a christian religion shall be authorised to give religious instruction to the children of the religious denomination to which the minister belongs at such times and places as may be agreed upon between him and the Director" of Public Instruction.

In regard to the grant-in-aid (denominational) schools the following is the law:—

Article 18, sub-section IV.: "That no child receive any religious instruction objected to by its parent or guardian or be present while such instruction so objected to is given to other children."

As a result of the system in force the schools were attended as follows:—

The Government schools contained:

5,395	Roman Catholics,
259	Anglicans,
78	Other Christian denominations.
937	Mahommedans, and
1,970	Hindoos.

The Roman Catholic schools contained:

6,501	Roman Catholics,
31	Anglicans,
25	Other Christian denominations,
411	Mahommedans, and
1,082	Hindoos.

The Church of England schools contained:
457 Roman Catholics,
229 Anglicans,
2 Other Christian denominations,
322 Mahommedans, and
1,085 Hindoos.

The Presbyterian schools contained:
30 Roman Catholics,
3 Anglicans,
65 Other Christian denominations,
19 Mahommedans, and
9 Hindoos.

The Mahommedan school contained:
16 Roman Catholics,
7 Anglicans,
77 Mahommedans, and
64 Hindoos.

There were 67 Government schools, 67 Roman Catholic, 20 Church of England, 2 Presbyterian, 1 Mahommedan school, with an annual average of 19,212 pupils on the roll, and an average attendance of 12,489. The general tendency is towards increased attendance at the grant-in-aid schools.

Lectures on hygiene were given to 225 teachers, who will, when qualified, teach hygiene to the school children.

SECONDARY EDUCATION.

Secondary Education is provided at the Royal College and its two Schools. During 1907 there were 268 paying pupils at the Royal College and 96 free pupils. Free railway travelling is granted to the boys attending the Royal College at Curepipe from Port Louis.

Two English scholarships of the value of a thousand pounds each, with a handsome allowance for passage to England and back, are granted annually to enable boys to qualify for some profession or to attend a University.

Money prizes, called scholarships, are also given to boys who may gain them in the schools, and it may fairly be said that in few countries does the State do so much for the individual boy or so much to relieve parents of their pecuniary responsibilities in respect of their children. During the year education cost Rs. 578,049, to which the parents contributed Rs. 45,792.

The Director of Public Instruction is of opinion that the expenditure could be reduced or better results could be obtained with the same expenditure if it were not for the inefficient or unnecessary schools which still continue to exist, and that it is extremely difficult to obtain the closing of an aided school.

This experience is not peculiar to Mauritius: it must exist everywhere, and the manager of a denominational school may

Weller & Graham Ltd Litho London

well be excused if he hesitates to turn adrift an old schoolmaster whose methods and teaching may be antiquated, but who has won the affection of the children.

Financial necessity is, however, likely to act as a persuasive force in the direction of reform, and it is likely that economical pressure will lead to the gradual suppression of the inefficients. The cause of education will not, however, suffer.

V.—MEDICAL AND PUBLIC HEALTH.

The expenditure on the Medical Department during the financial year ended 30th June, 1907, amounted to Rs. 920,740 (including quarantine and plague services). This is a large sum and bears a large proportion to the general revenue of the Colony, but it is difficult to see how it could be materially reduced unless the war against disease is to be relaxed. The diseases prevalent in Mauritius, though not directly caused by poverty, may be considered to be consequent on poverty, that is to say, on over-crowding, insufficient or bad food, want of clothing, and bad sanitation. It is impossible to legislate against poverty or to control economic conditions, and the Government is reduced to alleviating or curing diseases which under existing economic conditions it is powerless to prevent. The question of public health has never been approached in a niggardly spirit, and whilst the wisdom of some of the measures taken is disputed by different schools of thought in the medical profession, there is no sound of any reproach on the ground of niggardliness.

The hospitals, asylums, and dispensaries are as well equipped as the resources of a poor Colony allow, and the medical department has always had the first claim on the Treasury. It is disappointing, therefore, to find that, except under the heading of plague, there is no material improvement, but neither medical zeal nor medical talent can fight against poverty or the consequences of poverty.

But whilst putting poverty in the first rank as the chief predisposing factor in disease, the influence of climate cannot be ignored. Referring to the annexed chart for malaria, it will be seen that the number of cases rose steadily from February to April, and then rapidly diminished to reach a minimum in September. This curve runs practically parallel with that for the rainfall, the influence of which has been so often demonstrated that it is not necessary to again lay stress on the correlation which exists. But contrary to what should have been expected, no further increase has followed the high rainfall of April. This can apparently be explained partly by the fall in temperature which was coincidentally established, and the higher wind velocity which ruled during April and May.

Again, the influence of climatic conditions on the production of dysentery is clearly demonstrated by the second chart, to which further weight is added by the consideration of the conditions which have been enumerated above. Indeed, with the advent of rain in the early months of the year during which the fields are manured, a considerable amount of organic matter is washed to the rivers which, up to the present, constitute the only water supply of the greater number of the inhabitants. But the condition is made still worse when there happens to be a very high rainfall, which sweeps in addition the more or less decomposing organic matter which have accumulated along the banks of the rivers.

These factors, usually at work in the early months of the year, cease to ply their influence once the rivers and streams have been washed, so to speak; but in 1907, owing to the severe drought which set in, the water in the rivers ran so low that in some places it practically remained stagnant and allowed of the fermentation and decomposition of the leaves and fruits which fell into the beds of the rivers from the trees in the reserves. Hence dysentery and the diarrhœic diseases continued to run high during the later months of the year against what usually holds, the curve representing practically a plateau.

The following is a description of the work done by the hospitals, asylums, and dispensaries during the year 1907.

The number of hospitals and asylums has remained the same as in 1906, *i.e.*, fourteen, including those attached to the jails of the Colony.

The statistical table in the next paragraph shows the admissions and deaths, as well as the hospital population at the end of the year in each of these Institutions.

Institutions.	Remaining on 1st January, 1907.	Admissions.	Deaths.	Total Cases Treated.	Remaining on 31st December, 1907.

CHART II

CHART SHOWING MONTHLY ADMISSIONS FOR DYSENTERY AND MONTHLY RAINFALL. DURING 1907.

	January	February	March	April	May	June	July	August	September	October	November	December	
NUMBER OF ADMISSIONS	65	72	107	113	148	137	102	102	118	105	100	116	TOTAL 1,286
RAINFALL	1·72	2·77	7·31	8·57	4·75	4·21	·36	·12	·48	·67	1·33	12·16	

7324

Weller & Graham Ltd Litho London

The number of admissions—23,355—shows an increase of 2,984 over the previous year's figures; but the case-mortality, 5·34 per cent., is lower than that of 1906 by ·51.

55,635 cases were treated in the dispensaries of the Colony. This figure, on comparison with that of the previous year, shows a decrease of 719.

The number of inmates under confinement in the lunatic asylum on 31st December, 1907, amounted to 435, including 5 patients admitted on interim order, who were then under observation. The asylum population gave a daily average of 258·35 males and 172·49 females, against 248·10 and 171·22 respectively in 1906.

The proportion of certified lunatics in the Colony has been 1 in every 629 of the population during the year under review.

SANITARY CONDITION OF THE COLONY.

The sanitary condition of the Colony has been more satisfactory in 1907 than in the previous year as is evidenced by the diminished death-rate, the increased birth-rate, reduced number of attendances at the Dispensaries, and lower case-mortality in the hospitals.

It should here be remarked that the increase already referred to in the number of admissions in hospital is due not to a higher morbidity, but to other factors, the principal being the straitened circumstances of many consequent on the financial crisis which had made itself felt already towards the end of 1907.

Prevalence of Sickness.

Malarial Fever accounts for 4,272 admissions, against 3,674 in 1906.

Dysentery is answerable for 1,286 admissions, which figure is considerably higher than that of the previous year, when only 794 patients were admitted for that complaint. The higher incidence of dysentery is attributable principally to the prolonged drought which was experienced notably from July to November, and the consequent stagnation and pollution of the streams and rivers from which a great proportion of the population derive their water supply.

Influenza gave 1,264 admissions, against 1,768 in 1906, during which the disease prevailed epidemically.

Tuberculosis.—1,114 admissions were registered in the hospitals for that complaint, showing an increase of 142 over the number recorded in the previous year.

Pertussis.—Only one case of that complaint came under notice in the hospitals during the year under review, the epidemic referred to in 1906 having come to an end in that year.

Enteric Fever.—The number of cases notified in accordance with the Contagious Diseases Ordinance was 145, showing an increase of 64 over that of 1906. This increase is more apparent than real, being explained by the greater facility now afforded for the differentiation of the existing fevers by the creation of the bacteriological laboratory.

Diphtheria is answerable for 60 notifications, against 33 in the previous year. Here again the increase in the incidence of the disease is probably only apparent, and brings out the influence of the bacteriological laboratory in determining the final diagnosis in doubtful cases.

Measles.—An epidemic of that disease broke out in August. In spite of early precautionary measures, the infection spread rapidly, 347 cases having been notified between August and December.

Beri-beri, which is not endemic in the Island, broke out simultaneously in three out of the four prisons of the Colony in February. The source of the infection was traced to the use of a decorticated unstoved white rice from the East, which had been supplied to the prisons for some time. The epidemic at once subsided after a change of diet—from the incriminated rice to bread at first and to ordinary Indian rice later on—had been prescribed and carried into effect. Out of a total of 65 cases treated, 38 occurred in the prisons.

An outbreak of the disease, apparently traceable to the same source, was also reported from Six Islands during the year.

Plague.—The epidemic of the year has been the lowest on record since the appearance of the disease in 1899, the number of cases detected being 224, of which 178 proved fatal, giving a death-rate of 79·5 per cent.

The yearly incidence of the disease since 1899 is shown in the following tabular statement:—

Plague.

Year.	Cases.	Deaths.	Death-rate.
			Per cent.
1899	1,416	1,117	78·9
1900	796	593	74·5
1901	1,093	805	73·6
1902	506	386	76·3
1903	1,395	1,035	74·2
1904	568	449	79·0
1905	308	251	81·5
1906	434	344	79·3
1907	224	178	79·5

It will probably be of interest to compare the alternations of malaria with those of plague. It will be noticed that both favour alternate years.

Malaria.

Years.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.
No. of cases	4,152	2,848	4,182	3,360	4,788	3,039	5,123	3,674	4,272

The campaign against rats was carried on with increased vigour during the year under report, 125,558 of these vermin having been destroyed by the rat-catchers employed by the Department. This figure compares very favourably with that for 1906, which was only 105,568.

Surra.—The epizootic continued throughout the year, though with less virulence. Its existence was detected, however, in the southern part of Black River, which had at first escaped contamination.

A bacteriological laboratory was established in temporary buildings at Moka pending the construction of a more permanent home at Réduit.

Much good research work has been done, but it is too early yet to speak of definite results. Nevertheless the work in regard to surra is most hopeful.

Good work has been done also by assisting the medical profession in cases of doubtful diagnosis.

POOR LAW RELIEF.

In Mauritius there is a Poor Law Commissioner who presides over the Poor Law Department, but it is not easy to define precisely where poor relief begins or ends. The greater part, or at all events a great part, of the services rendered by the Medical Department are gratuitous, or when a charge is made it is insignificant and in no way proportionate to the expense incurred. To estimate properly the assistance given to the poor in Mauritius it would be necessary to add together the money spent on gratuitous education, the poor law relief proper given under the poor law, and the medical services rendered gratuitously by the Medical Department. Indeed these figures would not give a measure of the work of the Mauritius Government as a charitable institution, for it would be necessary to add the cost of the free railway tickets given to poor scholars and apprentices, and other details.

Poverty is undoubtedly on the increase in Mauritius, and there is a general tendency towards pauperism. The paternal system of Government seems to have undermined or to be undermining the spirit of independence and of self-help. There is an almost universal disposition to look to the Government for help and succour at all times. The appeals for charity are constant, and they are almost all of the same tenour.

The writers describe themselves as *mère* or *père de famille sans emploi et dans la plus grande misère.* These statements are only too often true, but the saddest thought is that the most deserving poor are as a rule concealed amongst those who never write and never beg, people of whom the Government officials never hear, and whose misery is known only to discreet neighbours or possibly to a benevolent and equally discreet priest.

It must not be supposed, therefore, that the statistics of poor relief give any measure of the poverty in Mauritius, but they serve as an indication of what the Government does to deal with the class of poverty that appeals to the law and comes within the law.

The total number of paupers of every description maintained and relieved by the Poor Law Department throughout the Colony during 1907 was 70,066, as follows:—

(a) *In-door Relief.*

In country district hospitals	13,430
In Civil Hospital, Port Louis	4,790
In Canal Street Convent Hospital	225
In Barkly Asylum	930
Lepers at St. Lazare	210
Lunatic Asylum	515
Orphans in Convents	47
Inmates of Branch Infirmaries	1,013

(b) *Out-door Relief.*

Alimentary and pecuniary	2,167
Sick in Dispensaries	46,739
	70,066

It is not possible to obtain any estimate of the charitable work done by the various charitable institutions, both Catholic and Protestant; but the Society of St. Vincent de Paul, the various Convents, the Church Missionary Society, and the numberless semi-private charitable societies of ladies which have been formed in Mauritius, have all taken their part in the cause of charity. Without such volunteer aid the secret cases of poverty, which never come within the knowledge of the official organisation, would escape notice altogether.

There are no rich in Mauritius, and those who give to charity do so at the price of genuine deprivation. The private charity of the Mauritian people is therefore one of the strongest evidences of the genuine kindness of heart which is so often concealed from those who do not look below the surface.

VI.—JUDICIAL STATISTICS.

POLICE, PRISONS, &c.

The police force of Mauritius on the 31st December, 1907, was 722, of 18 nationalities—a somewhat mixed force; but the population of Mauritius is itself somewhat heterogeneous, and the police force naturally reflects the character of the population. The numbers given must not, however, be taken as representing the effective strength, for large deductions must be made for men on leave of absence, sick in hospital, &c.

The work done by the force in 1907 is represented by the following table:—

Nature of Offences.	No. of cases.	No. of persons charged.
(*a*) Serious offences reported to, or detected by, the Police, in which persons were charged.	3,251	4,130
(*b*) Serious offences reported to the Police, which, in certain cases, formed the subject of enquiries, but in which no persons were charged.	10,948	624°
(*c*) Minor offences reported to, or detected by, the Police in which persons were charged.	5,254	7,492
(*d*) Minor offences reported to the Police in which no persons were charged.	3,411	—
(*e*) Offences against the Labour Law	1,262	1,262
(*f*) Vagrancy	1,355	1,355
Total	25,481	14,863

° Arrested on suspicion.

Of the 14,359 cases under (b) and (d) of the foregoing summary, 9,986 cases were not of a nature to warrant prosecution by the Crown, and their classification is as follows:—

Assaults	1,483
Threats	2,933
Disturbance	85
Abusive language	1,135
Stone throwing	13
Petty wounds and blows	3,383
Fictitious larcenies	500
Offences against property	376
Offences against the person	78
	9,986

The balance, *i.e.*, 4,373 cases, represent cases which remained undetected at the close of the year.

With the increase of poverty in the Island, it is natural to expect an increase in prædial larceny, by which is meant robbing provision grounds and homesteads (thefts of fowls, goats, or other animals excepted); and the following table shows the increase in this the poor man's form of crime:—

Year.	No. of cases declared or reported to police.	No. of persons charged.	No. of persons convicted.	No. of persons otherwise disposed of.	Pending.	Amount of property stolen.	Amount of property recovered.	Percentage of convictions on number charged.	Percentage of property recovered on property lost.
								Per cent.	Per cent
1903.. ..	314	244	213	30	1	166	65	87·29	39·33
1904.. ..	271	158	132	22	4	275	125	83·54	45·59
1905.. ..	345	230	194	26	10	303	130	84·34	42·91
1906.. ..	380	286	253	27	6	449	196	88·46	43·60
1907.. ..	642	513	448	49	16	694	288	87·32	44·28

PRISONS.

There are four prisons in Mauritius:—

The Central Prison at Beau Bassin,
The Savanne Prison,
The Flacq Prison, and
The Port Louis Prison.

During the year 1907 the number of prisoners admitted after conviction were:—

Males	6,453
Females	296
Total	6,749

These figures show an increase of 914 in the number of males and 51 in the number of females, or a total increase of 965, as compared with 1906. Unfortunately the prison population is still on the increase: the most probable explanation is the great increase of poverty amongst the population, and there is little hope that any improvement is likely to take place in this respect. The people in Mauritius are poor, and are becoming poorer.

In 1880 the number of prisoners' rations issued was 7,099: in 1907 it was 27,625. But in 1880 the Island was comparatively prosperous; now there are many who are living on the margin of existence.

The religions of prisoners are shown by the following statement:—

Year.	Christians.	Mahommedans.	Hindus.	Buddhists.	Others.
1906 ...	1,364	629	3,764	14	13
1907 ...	1,755	612	4,367	14	1

The decreases, as will be seen, are in Mahommedans and "Others"; but Christians and Hindus show an increase. There is a decrease under the heading "Read and write," and an increase under "illiterate."

The longest time spent by any prisoner waiting trial was 218 days.

There were 44 deaths, as against 39 in 1906. The most prevalent disease was malarial fever, but dysentery was also very prevalent. There were 3 deaths from beri-beri, but the epidemic was quickly checked by an alteration in the prison diet.

In 1906 the daily average of patients in the prison hospitals was 50·48: in 1907 it rose to 68·57.

The work done for the Government, such as carpentering, repairs to buildings, breaking stones for macadam, and work on the public roads, was valued at Rs. 139,000.

The average cost of a prisoner's rations for the year was Rs. 52·58, but the hospital charges were more than double those of the previous year. The total cost of all prisons was Rs. 181,327 after taking credit for cash receipts, value of goods supplied, and work done for the Government. The net cost per prisoner was Rs. 117·73.

REFORMATORY.

The number of admissions to the Reformatory (including untried boys) during 1907 was 364, showing an increase of 115 on the previous year. Of the 270 boys convicted, 233 were sentenced for six months or less.

The boys were taught carpentering, tinsmith's work, basket-making, and gardening, and were frequently visited by clergy of the various denominations. But the system of short sentences, and the impossibility of carrying out a proper system of classification prevents any substantial improvement in the boys. During 1907, 70 ex-reformatory boys were committed to prisons for post-reformatory offences. On the whole, however, the Reformatory is giving better results. The discipline is improving, and the petty larcenies from the gardens were less than half.

The cost of the Reformatory was Rs. 17,474.

It would be easy to suggest improvements in an admittedly imperfect system, but in this, as in all other matters in Mauritius improvements cost money, and it is impossible to increase expenditure; all that can be said it that the best that can be done is done with the funds available.

CRIMINAL STATISTICS.

The total number of offences reported to the Magistrates in 1907 was 22,506, or 817 more than in the previous year.

The total number of convictions in the inferior Courts during the year was 18,490, or 1,072 more than in 1906; and in the Supreme Court 84, or 22 less than in 1906.

The acquittals were as follows: in the inferior Courts 1,562, as against 1,384 in 1906; and in the Supreme Court 56, as against 120 in 1906.

The total number of cases which fell through during the year for want of prosecution, amounted to 4,231, as against 2,937 in 1906.

One prisoner was found insane in 1907, as against two in the previous year.

VII.—VITAL STATISTICS.

POPULATION.

The population on the 1st January, 1907, was		375,400
Number of births registered in 1907	12,901	
Number of unregistered owing to death intervening before registration was made	1,285	
Total births	14,186	
Number of deaths registered in 1907	13,037	
Showing an increase of		1,149
Arrivals in the Island	4,264	
Departures from the Island	4,178	
Difference in favour of arrivals		86
Total civil population		376,635
Military stationed in the Island		1,009
Total population of the Island		377,644
Estimated population of dependencies and out-lying Islands		5,764
Estimated total population of the Colony		383,408

The crews of non-Colonial shipping in the harbour have not been included in the above estimate.

The Indian population included in the above numbered 263,983, composed of 143,930 males and 120,053 females, showing an increase of 830 males and 4,067 females on the census of 1901.

The general population (exclusive of Indians) numbered 112,652, of which 57,055 were males and 55,597 females, thus showing an increase of 603 males and 112 females.

It will be noticed that while both populations show an increase when compared with the census figures, the Indian population shows an increase and the general population a decrease when compared with the figures for last year. But the variation of population for years past has been in the direction of an increase in the Indian population and a decrease in the creole population.

The public health of the Colony during 1907 has been much better than that of 1906.

The death-rate shows a sensible decrease, having fallen from 40·0 in 1906 to 34·7 in 1907.

The birth-rate has increased from 33·5 per 1,000 to 37·7.

An unsatisfactory feature is to be found in the high infantile mortality for the year, and a very high proportion of still-births, 8·5 per cent., must at the same time be recorded.

According to the census of 1st April, 1901, the following statement shows the different classes of occupations of the population at that time:—

Employment.	General Population.		Indian Population.		Total.		
	Males.	Females.	Males.	Females.	Males.	Females.	Total.
Class I.—Professional	3,225	624	1,085	48	4,310	672	4,982
Class II.—Domestic	2,874	3,087	6,839	1,239	9,713	4,326	14,039
Class III.—Commercial	5,681	110	7,094	842	12,775	952	13,727
Class IV.—Agricultural	3,605	157	68,744	5,385	72,349	5,542	77,891
Class V.—Industrial	18,211	3,269	2,580	260	20,791	3,529	24,320
Class VI.—Indefinite and Non-productive.	22,856	48,238	56,758	108,212	79,614	156,450	236,064
Total	56,452	55,485	143,100	115,986	199,552	171,471	371,023

Marriages.

There were 967 marriages celebrated during the year. Of these marriages, 503 belonged to the general population and 464 to the Indian population.

The following return shows the mortality for the last five years:—

Year.	Mortality.	Rate per 1,000.
1903	15,034	39·9
1904	12,064	32·2
1905	15,379	40·6
1906	15.118	40·0
1907	13,037	34·7

CLIMATE.

General.

Mauritius lies close to the edge of the southern tropic, and has the climate which is to be expected in such a latitude. It is also in the direct line of the track of the cyclones of the Southern Indian Ocean. But the climate at the lower levels, though unfavourable to man, is very favourable to vegetation; even a hurricane may prove to be a blessing in disguise, and the heat and rain of the summer months, though they fill the hospitals, push the growth of the sugar cane and thus help also to fill the pockets of the sugar planters. The higher levels, though damp owing to the condensation of the trade wind, are not unhealthy; and it is poverty rather than climate which should bear the responsibility of the sickness and mortality amongst the population in the higher levels.

SPECIAL FEATURES IN 1907.

Barometric Pressure.

The barometric pressure decreased, relatively to the normal, from January to July; increased until August, and then decreased generally. The decrease from January to July was unusually large and steady.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. + 0·044	Ins. — 0·040	Ins. — 0·014	Ins. — 0·026

Air Temperature.

Relatively to the normal, the temperature increased from January to April, decreased generally till August, and increased rapidly until November.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
— 0·8°	— 0·3°	— 0·9°	+ 0·9°

Vapour Tension.

The departures from average vapour tension followed very closely those of air temperature and, inverted, showed the usual agreement with those of atmospheric pressure.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. — ·037	Ins. — ·005	Ins. — ·045	Ins. + ·040

Relative Humidity.

The relative humidity departures followed the temperature and vapour tension departures, particularly in the latter part of the year.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. — 1·6	Per cent. 0·0	Per cent. — 4·2	Per cent. + 2·2

Rainfall.

The inverted rainfall departures followed generally the departures of barometric pressure. This is probably because the latter were more pronounced than usual.

The most striking feature in the four last mentioned elements was the large regular increase from August to the end of the year.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. — 53	Per cent. + 74	Per cent. — 84	Per cent. + 70

Wind Velocity.

The wind velocity was again below normal throughout the year: the variations (inverted) followed approximately the pressure variations.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
m.p.h. —3·12	m.p.h. —1·60	m.p.h. —2·01	m.p.h. —2·03

The wind velocity, as recorded by the Robinson anemometer, has been above normal in only 6 of the 70 months beginning March, 1902. The total defect of wind during this period was over 86,000 miles. As mentioned last year, from comparisons with a smaller instrument which had been previously tested at the Kew Observatory, it appeared that the anemometer gives results practically identical with the Kew Standard. The comparisons are being continued, and the results for several months may give some indication of the cause of the above mentioned defect, which is almost certainly not climatic.

Means and Extremes of Meteorological Elements.

The means and extremes of the various meteorological elements for the year 1907 are given below:—

Element.	Mean.	Highest.	Lowest.
Atmospheric Pressure	Ins. 30·063	Ins. 30·347	Ins. 29·403
Air Temperature	73·1°	90·3°	49·9°
Relative Humidity	Per cent. 74·0	Per cent. 98·0	Per cent 40·0
Wind Velocity	m.p.h. 8·9	m.p.h. 36·6	—

Rainfall	Ins. 44·19	Ins. 3·37 (in 24 hours)	—

Results of Magnetic Observations.

The magnetographs were at work throughout the year, and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1907:—

Declination (west)	9°13′64
Dip (south)	53°49′00
Horizontal force (C.G.S. units)... ...	0·23461
Vertical force (C.G.S. units)	0·32075
Total force (C.G.S. units)	0·39739

The largest magnetic disturbances occurred on January 11-12; February 9-10; March 10-11, 21-22; May 29; June 19-20; September 10-11; October 13-15, 22-23; November 21-22.

MISCELLANEOUS WORK IN 1907.

Actinometric observations were taken on 44 days with both high and low sun, and on 47 other days single sets of observations only were made.

Fifty-six earthquakes were recorded by the Milne seismograph during the year. The hourly measures of the seismograms have been continued throughout the year.

Rainfall returns were collected from 69 stations in different parts of the Island. The mean rainfall for the whole Island during the year was 67·38 inches, as compared with an average of 80·53 inches.

Observations made on board vessels trading with Mauritius were tabulated, and detailed accounts of gales and hurricanes recorded. From observations thus obtained daily synoptic charts were prepared for the hurricane months, and the tracks of four cyclones laid down. Four other cyclones occurred in the South Indian Ocean whose tracks have not yet been determined owing to want of observations.

From May to December cablegrams giving a resumé of the weather at Mauritius for the preceding week were, as usual, despatched to the Director-General of Indian Observatories in connection with the monsoon predictions, and monthly cablegrams to the Director of the Geological Survey Department, Cairo.

Photographs of the sun were taken daily when the weather permitted. Spots were observed on 301 days and faculæ on 302 days.

The installation of an electric time ball at Port Louis, which was commenced in July, 1907, was completed early in the year. During the first two months of working several failures occurred, but since then it has worked satisfactorily.

On the 1st January, 1907, the standard time of the 60th meridian East of Greenwich was introduced in Mauritius and all its Dependencies, except the Chagos Archipelago, where the standard time of the 75th meridian has been adopted.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

POSTAL.

The contract with the British India Steam Navigation Company was renewed in 1907 for another year, for a four-weekly service between Colombo and Mauritius. Besides the British India steamers, the mails to and from Europe are conveyed by other British and French steamers. The Messageries Maritimes Company performed their bi-monthly voyages from Marseilles to Mauritius and *vice versa*, calling at Aden, Zanzibar, Seychelles, Madagascar and Reunion. The mails for and from African ports were conveyed by the Union Castle steamers.

Statement of letters, post cards, newspapers, and postal parcels dealt with during the year 1907:—

—	Internal.	Mail Packets.				Other Vessels.				Total.
		United Kingdom.		Other Places.		United Kingdom.		Other Places.		
		From.	To.	From.	To.	From.	To.	From.	To.

Official Letters	241,503	705	509	568	660	—	—	528	812	245,285
Newspapers	1,320,944	59,927	2,314	120,021	7,628	—	—	3,412	9,904	1,524,150
Postal Parcels	135	5,577	675	8,390	1,969	—	—	—	—	16,746

TELEGRAPHS AND TELEPHONES.

There are 323 miles of telegraphs in Mauritius, and 63 miles of telephones (exclusive of private telephone services).

MONEY ORDERS.

Inland money orders were issued during the year 1907 for a total sum of Rs. 318,255, as against an aggregate sum of Rs. 344,686 during the previous year.

The foreign money orders show the following comparison:—

	Rs.
1907	333,745
1906	318,610

POSTAL ORDERS.

The British postal order system was extended to Mauritius in 1905. The number of postal orders sold and paid in 1907 was 1,511 and 777, of the value of Rs. 11,822 and Rs. 7,919 respectively.

POSTAL PARCELS.

The number of postal parcels dealt with during the year 1907 was 16,746. The general tendency is towards an increased use of the parcel post, and the local shopkeepers complain that the facilities are such as to interfere seriously with their business.

The total Post Office expenditure in 1907 was Rs. 167,626, as follows:—

	Rs.
Personal emoluments	105,546
Other Charges.	
	Rs.
Overtime	3,943
Sea and territorial transit ...	7,342
Maintenance of telegraphs ...	6,232
Porterage of telegrams	9,621
Uniform	4,766
Gratuities to Masters of Vessels ...	2,805
Miscellaneous and special expenditure	27,371
	167,626

The total revenue for the year was Rs. 130,239, collected under the following heads:—

	Rs.
Postal correspondence	89,178
Telegraph receipts	19,849
Commission on money orders (Inland, Foreign, and Indian) ...	11,177
Postal parcel service	4,992
Transit of correspondence ...	3,054
Private boxes	1,004
Commission on postal orders ...	224
Forfeited money orders	758
Miscellaneous	3
	130,239

IX.—MILITARY (TROOPS AND EXPENDITURE).

Mauritius is a fortified coaling station on the route between the Cape and India. The garrison on the 31st December, 1907, comprised 1,009 men of all ranks. The military expenditure during the year amounted to £112,357, and the Colonial contribution (including the amount paid in lieu of remission of customs duties) to £29,699.

The following railway concession made to the military is of course an indirect contribution:—

1. Officers travel 1st class for 2nd class fares;
2. Non-commissioned officers travel 2nd class for 3rd class fares; and
3. Privates are allowed to travel at the single fare for the double journey (3rd class). If they make only the single journey they pay full 3rd class fare.

X.—RAILWAYS.

The earnings in 1907 were Rs. 2,212,492, showing a decrease of Rs. 294,919 on those of the previous year. These figures are exclusive of Government traffic, which amounted to Rs. 168,083 in 1907, as against Rs. 180,947 in 1906.

The working expenses in 1907 were Rs. 1,795,379, with an increase of Rs. 102,094, as compared with 1906.

The percentage of working expenditure to earnings in 1907 was Rs. 75·41, as against Rs. 62·98 in the previous year.

The total length of line open in 1907 was 120 miles (exclusive of sidings).

XI.—RODRIGUES.

Rodrigues is a dependency of Mauritius, inhabited mainly by fishermen and small cultivators, though stock raising is done on a small scale. The climate is healthy and the population, which was 4,231 in 1907, tends to increase. The people are of mixed blood in which the African blood predominates.

The revenue was Rs. 6,552 in 1907, as against Rs. 15,047 in 1906. The falling off was due to the remission of taxation consequent on a cyclone, a power that is conferred on the Governor by Regulation No. 1 of 1907.

The expenditure, exclusive of sums paid in Mauritius, of the cost of meteorological observations and of matters of account, was Rs. 36,211, being an increase of Rs. 1,877 on the expenditure of 1906.

Communication is maintained with Mauritius by a contract vessel, but the vessel does not run during the hurricane season.

There are two schools at Rodrigues, with a total of 284 boys and girls on the roll.

There is a magistrate, who practically governs the Island; a doctor; two clergymen (one Catholic and one Church of England); and a small force of police.

Rodrigues is an important station of the Eastern Telegraph Company, and a large staff of employés is maintained there for the service of the submarine cable.

XII.—GENERAL.

The following table gives the variations of the prices of sugar for the 12 months ended April, 1908, the standard being what is called crystallised vesous or Bombay sugar:—

		Rs.
1907	May	8·25
„	June	8·25 nominal.
„	July	8·50 „
„	August	8·50
„	September	8·25 to 8·50
„	October	8·00 to 8·25
„	November	8·00 to 8·50
„	December	8·25 to 8·40
1908	January	8·50
„	February	8·50
„	March	10·00 nominal.
„	April	9·40 to 9·50

GRAHAM BOWER,
Colonial Secretary.

14th August, 1908.

MAURITIUS.

(For Report for 1907, *see* No. 581.)

THE GOVERNOR TO THE SECRETARY OF STATE.

Government House,
Port Louis,
23rd September, 1909.

MY LORD,

HEREWITH I have the honour to transmit the Blue Book of the Colony for the year 1908, together with the report of the Colonial Secretary thereon.

I have, &c.,

CAVENDISH BOYLE.

The Right Honourable
The Earl of Crewe, K.G.,
Secretary of State for the Colonies.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1908.

I.—FINANCIAL.

The following tables contain statements of the revenue and expenditure of the Government of Mauritius for the financial years 1906-7 and 1907-8:—

A.—*Revenue.*

Heads of Revenue.	1906–7.	1907–8.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.
Customs	3,600,029.52	2,987,013.77	—	613,015.75
Port, Harbour, and Lighthouse Dues.	283,401.17	236,591.88	—	36,692.71
Licences, Excise and Internal Revenue, not otherwise classified.	2,443,766.72	1,999,922.37	—	386,559.05
Fees of Court or Office, Payments for Specific services and Reimbursements in Aid.	252,058.32	371,586.62	3,310.10	—
Post Office and Telegraphs.	147,007.49	148,286.59	1,279.10	—
Government Railways	2,500,409.10	2,039,326.26	—	461,082.84
Rent of Government Property.	61,576.36	54,497.25	—	7,079.11
Interest...	890,831.41	822,676.64	—	65,171.36
Miscellaneous Receipts	150,362.66	62,089.10	—	42,440.65
Land Sales	175.50	736.71	561.21	—
Total	10,329,618.25	8,722,727.19	5,150.41	1,612,041.47
Result—Net decrease ...	...	...	...	1,606,891.06

The revenue of the financial year 1907-8 was therefore below that of the previous year by Rs. 1,606,891.

B.—*Expenditure.*

Heads of Service.	1906–7.	1907–8.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.

Loan Office	11,940.34	11,940.76	.42	—
Total	10,174,508.58	9,853,009.92	261,451.71	582,950.97
Result—Net decrease ...	...	...	...	321,498.66

The decrease of expenditure in 1907-8 is explained by the unusually large sums spent on account of railway materials and new engines in the previous year. But there are automatic increases in the Pensions and Education Votes owing to the provisions of the Pension Law and the Education Law.

Position of the Colony at the close of the Year 1907-8.

	Rs.
Surplus on 1st July, 1907	1,327,304
Excess of expenditure over revenue	1,130,282
Surplus on 30th June, 1908	197,022

The revenue and expenditure for the last five years, and the Treasury balances at the close of each year, were as follows:—

Year.	Revenue.	Expenditure.	Treasury Balances.	Debit Balance.
	Rs.	Rs.	Rs.	Rs.
1903–4	9,473,112	10,664,115	82,247	—
1904–5	10,399,554	10,563,521	—	81,720
1905–6	11,169,783	9,915,868	1,172,195	—
1906–7	10,329,618	10,174,509	1,327,304	—
1907–8	8,722,727	9,853,009	197,022	—

The financial year of 1907-8 was a bad year for Mauritius, and the depression, which was felt by the whole community, naturally influenced the finances of Government. The sugar crop amounted to only 164,000 tons, as against 217,000 tons in the previous year. Moreover, the monetary crisis, which began with financial disasters in New York at the close of the year 1907, was felt all over the world, and its influence spread to Mauritius. One of the banks raised its rate of discount to 12 per cent. in sympathy with the Indian money market, and the other bank greatly restricted its discount. There was a steady drain of specie from the Colony, and two important firms of brokers failed.

All these influences co-operated to produce a general tightness of money and a want of confidence which restricted commercial or industrial enterprise. The distress inevitably spread to the labouring population, and towards the end of 1907 and during the early months of 1908 there were many unemployed. All classes were compelled to curtail expenditure and to discharge any servants or employés that could possibly be spared. From information gathered from those who were in contact with the unemployed, the discharged domestic servants suffered most, as they were for the most part unfitted to apply themselves to other occupations, but they were patient and the complaints came mostly from the discharged artisans.

The Colony has not yet, at the time of writing, recovered from the distress prevalent in the early months of 1908. There has certainly been a recovery but the recovery has not yet reached the lower classes. The explanation probably is, that when an industry or a household has once learned to do without certain employés or servants, it takes time and confidence to restore the old scale of expenditure. But the fact remains, that out of a total population of 380,000, about 50,000 may be said to be living on the margin of existence. This fact makes the financial position of the Government a difficult problem; the ordinary method of meeting a deficit is found in increased taxation. But though taxation has been increased it must be remembered that the prosperity of the Government is dependent on the prosperity of the people, and if it be true that the most profitable expenditure is that of the money left to fructify in the pockets of the people, then there is a limit at which taxation becomes unprofitable. For the distress of the people is augmented whilst the Treasury is not enriched, and the expenditure on poor law, prisons, and hospitals is automatically increased. The better course seems to be to cut down expenditure wherever possible, and this is the course that has been adopted. Economies have been made and are still being made. Public works, however desirable, have been postponed. The Civil Service is being slowly but surely reduced. Reductions on education are under consideration. Unfortunately, the expenditure on poor relief, hospitals, and prisons has automatically increased. But this is a necessary accompaniment of all periods of distress. No Government can neglect the elementary duties of humanity or fail to protect property even in times of public distress.

But although the Colony is passing through one of its recurrent hard times, the sugar industry remain a profitable industry even in the hardest times, and with improved appliances is daily becoming more profitable. There is, therefore, no reason why capitalists should be discouraged or why money should not find a profitable investment in Mauritius.

Assets and Liabilities on 30*th June*, 1908.

1. Commissioners of Currency:—

	Rs.
Assets	8,081,513
Liabilities	7,858,255
Balance in favour of Commissioners	223,258

2. Government Savings Bank:—

	Rs.
Assets	3,096,201
Liabilities	2,742,612
Balance in favour of Bank	353,589

3. Treasury proper:—

	Rs.
Assets	2,709,731
Liabilities	2,512,709
Balance in favour of Treasury	197,022

4. Public Debt:—

The public debt stood as follows on 30th June, 1908:—

	£	*s.*	*d.*
(1) 6 per cent. Railway Debenture, under Ordinance 15 of 1864 (matured bond unclaimed)	1,000	0	0
(2) Savanne Railway 4½ per cent. Debentures, payable by annual drawings (Ordinance 10 of 1876), maturing in 1919	31,200	0	0

	£	s.	d.
(3) Moka Railway 4 per cent. Debentures, payable by annual drawings (Ordinance 2 of 1887)	500	0	0
(4) 4 per cent. Debentures, Conversion Loan, payable by annual drawings (Ordinance 10 of 1879)	46,200	0	0
(5) Mauritius 4 per cent. Inscribed Stock, under Ordinances 1 and 22 of 1887, including loan made for Mare-aux-Vacoas (£34,000) ...	482,390	16	0
(6) Hurricane Loan, 3 per cent. Imperial Guaranteed Stock, under Ordinance 4 of 1892	600,000	0	0
(7) 3½ per cent. Inscribed Stock, under Ordinances 31 of 1904 and 39 of 1905	150,000	0	0
	£1,311,290	16	0

For the redemption of the Debentures and Inscribed Stock the several sinking funds and cash balances in the hands of the Trustees on the 30th June, 1908, amounted to £256,110, the amount duly provided as required by law.

The sum at the credit of the Sinking Fund on 30th June, 1908, showed an increase of £20,145 on the previous year.

Currency.

Amount of currency notes on 30th June, 1908:—

	£	s.	d.
Issue of 1848 and 1849 (dollars and cents) ...	483	16	5
Issue of 1860 (sterling)	3,383	0	0
	£3,866	16	5

Rupee notes, under Ordinance 28 of 1876:—

	Rs.
1. In the Commissioners' vault	4,674,005
2. In the hands of the public (including the banks and financial officers)	3,184,250
	7,858,255

Changes in Taxation.

An Ordinance to amend and consolidate the Customs tariff estimated to produce an additional Rs. 300,000 per annum was assented to on the 10th December, 1908. This Ordinance raises the Customs tariff slightly on all articles other than the food of the poor. For instance, the duty on bacon, hams, tongues, and sausages has been raised to Rs. 10 per 100 kilos, whilst the duty on rice remains at Rs. 6·24 per ton. The duty on petrol has been raised to Rs. 6 per hectoliter, a tax that will be felt mainly by the proprietors of motor cars.

Further taxes on motor cars and bicycles were imposed on the 4th February, 1909. But up to the present the revenue is still below that collected in previous years, when taxation was lower. This seems to indicate that the remedy for the financial position will be found in reduced expenditure, and that to greatly increase the existing taxes would not be profitable.

Savings Bank.

The deposits at the Government Savings Bank, at 3 per cent. interest, amounted to Rs. 2,692,795 on 30th June, 1908, as against Rs. 2,754,763 on 30th June, 1907, showing a decrease of Rs. 61,968.

The following return shows the number of depositors and the amount standing to the credit of the general and the Indian populations at the end of the years 1907-8 and 1906-7:—

—	1907–1908.		1906–1907.	
	No. of depositors.	Amount.	No. of depositors.	Amount.
		Rs.		Rs.
General population ...	15,631	1,561,418	15,712	1,571,330
Indian population ...	10,767	1,131,377	10,802	1,183,433
Total	26,398	2,692,795	26,514	2,754,763

The financial position of the bank on the 30th June, 1908, was as follows:—

	Rs.
Investments	3,094,171.18
Cash in hand	2,030.39
Receiver-General (interest due by Treasury for 1907-8)	75,092.67
	3,171,294.24
Liabilities due to depositors and to Treasury	2,817,704.96
Balance in favour of the bank ...	353,589.28

MUNICIPALITY AND LOCAL BOARDS.

There is one elective municipality in Mauritius—that of Port Louis—and three nominee boards, those of Curepipe, Quatre Bornes, and Rose-Hill—Beau-Bassin. Their revenue is provided partly by Government grants and partly by local rates.

Municipality of Port Louis.

The following is a statement of the revenue and expenditure of the municipality of Port Louis for the year ended 31st December, 1908:—

	Rs.
Balance in hand on 1st January, 1908 ...	28,132.32
Revenue, including receipts on account during 1908	608,711.15
	636,843.47
Expenditure including payments on account during 1908	635,789.21
Balance on hand on 31st December, 1908	1,054.26

The following is a comparative statement of the normal revenue and expenditure for the last five years:—

Year.	Revenue. Rs.	Expenditure. Rs.
1904	501,365	502,601
1905	548,139	492,785
1906	537,366	510,588
1907	512,172	502,916
1908	476,130	500,776

Statement of the debt of the Municipal Corporation of Port Louis on 31st December, 1908, showing provision for payment in 1909:—

Loan.	Amount.			Repayments to be made in 1909.		
	£	*s.*	*d.*	£	*s.*	*d.*
Conversion Loan ...	117,000	0	0	1,900	0	0
Electric Lighting Loan	9,000	0	0	333	6	8
Municipality Loan ...	4,000	0	0	220	0	8
	130,000	0	0	2,453	7	4
	Rs.			Rs.		
Colonial Loan	7,800			7,800		
Grand River Bridge Loan	6,000			2,000		
Manure Establishment Loan	16,000			2,000		
Government Hurricane Loan	71,392			6,746		
Municipality Loan ...	20,000			2,000		
Total	121,192			20,546		

Provision for payment of capital and interest on the above loans has been duly made in the annual budget of the Corporation.

BOARD OF COMMISSIONERS, CUREPIPE.

Comparative Statement of Revenue and Expenditure for last five years.

—	1903-4.	1904-5.	1905-6.	1906-7.	1907-8.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	82,772	68,934	65,776	67,496	79,331
Expenditure ...	81,158	67,729	64,740	66,885	75,659

The debt of Curepipe Board amounts to Rs. 73,500, for which provision is made annually for repayment.

BOARD OF COMMISSIONERS, BEAU BASSIN AND ROSE HILL.

Comparative Statement of Revenue and Expenditure for the last five years.

—	1904.	1905.	1905-6.	1906-7.	1907-8.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	29,345	26,645	26,831	30,995	37,044.19
Expenditure ...	26,260	28,187	25,783	30,164	37,695.06

The Beau Bassin and Rose Hill Board is indebted to the extent of Rs. 9,500 to Government.

BOARD OF COMMISSIONERS, QUATRE BORNES.

Comparative Statement of Revenue and Expenditure for last five years.

—	1904.	1905.	1905-6.	1906-7.	1907-8.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	12,725	12,549	13,202	12,957	13,815.36
Expenditure ...	13,274	12,572	12,416	12,800	13,865.99

II.—TRADE, AGRICULTURE, AND INDUSTRIES.

The following statements show the value of goods imported into, and exported from, Mauritius during the year 1908:—

IMPORTS.

Countries.	Value of Total Imports, exclusive of Charges and Exchange.	Charges and Exchange.	Total
	Rs.	Rs.	Rs.
United Kingdom	3,648,507	3,001,055	6,649,562
British Possessions	9,912,282	7,168,590	17,080,872
Foreign Countries	3,625,711	2,826,629	6,452,340
Total	17,186,500*	12,996,274	30,182,774
Postal Parcels	5,711	3,405	9,176
Baggage	18,676	9,338	28,014
Total	17,210,947	13,009,017	30,219,964

* Inclusive of amount of specie and bullion imported, Rs. 2,568,919.35.

EXPORTS.

Countries.	Produce and Manufactures of this Colony.	Shipping Charges on Produce and Manufactures of this Colony.	British, Foreign, and other Colonial produce and manufactures.	Total.
	Rs.	Rs.	Rs.	Rs.
United Kingdom	3,542,235	233,925	111,665	3,887,825
British Possessions.	26,961,784	2,072,725	2,085,968	31,120,475
Foreign Countries	399,551	19,316	358,787	777,654
Total ...	30,903,570	2,325,964	2,556,420	35,785,954
Baggage ...	4,272	—	—	4,272
Total ...	30,907,842	—	—	35,790,226*

* Inclusive of amount of specie and bullion exported, Rs. 2,098,845.

The following comparison between the trade of the Islands of Réunion and Mauritius, though not falling within the scope of the report on the Blue Book, may also be found interesting.

A word of introduction is, however, necessary.

Réunion, the French Colony, is 125 miles distant from Mauritius. Both Islands are of volcanic origin; the climate of both is about the same on the coast, but the mountains of Réunion, which contain an active volcano. rise much higher than those of Mauritius. The soil of Réunion is generally believed to be richer than the soil of Mauritius, and Mauritius receives its best vegetables from Réunion. The area of Mauritius is 705 square miles. The area of Réunion is 969·7 square miles, say, one-third larger. It is, perhaps, unnecessary to add that, like all French Colonies, Réunion gives and receives important preferential treatment in regard to all imports from, or exports to, France. The figures are given for 1907, being the latest French figures available here; and the values have been given in rupees. The French francs have been converted into rupees for the purpose.

Year, 1907.	Population.	Area (square miles).	Value of Imports from Mother Country given in rupees.	Value of Imports from Sister Colonies or Possessions given in rupees.	Value of Imports from Foreign Countries given in rupees.	Total Imports given in rupees.	Value of Exports to Mother Country given in rupees.	Value of Exports to Sister Colonies or Possessions given in rupees.	Value of Exports to Foreign Countries given in rupees.	Total Value of Exports given in rupees.
		Sq. miles.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Mauritius	373,336	705	7,960,799	16,671,921	6,528,375	31,161,095	7,024,615	37,291,918	2,031,183	46,347,716
Réunion	173,912	969.7	4,647,590	2,889,615	1,157,386	8,694,592	7,983,153	137,995	264,986	8,286,134

MAURITIUS TRADE.

In Mauritius the aggregate value of trade for the years 1907 and 1908 is as under:—

	1907.	1908.
	Rs.	Rs.
Imports	31,161,095	30,219,964
Exports	46,347,716	35,790,226
Total	77,508,811	66,010,190

Excluding the value of exports to, and imports from, the Dependencies, the rate of trade per head of population was:—

	1907	1908.
Imports (including charges and exchange)	81.49	74.21
Exports (including shipping charges on local produce and manufacture)	121.20	92.57

showing a falling off in the purchasing power of the people.

The value of specie and bullion imported and exported was as follows:—

—	1907.			1908.		
	Declared Value.	Charges.	Total.	Declared Value.	Charges.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Imports ...	2,628,821	131,193	2,760,014	2,568,919	1,451,439	4,020,358
Exports ...	2,683,935	—	2,683,935	2,098,845	—	2,098,845
Total ...	5,312,756	131,193	5,443,949	4,667,764	1,451,439	6,119,203

Deducting specie and bullion, declared value of imports and exports was as follows:—

	1907.	1908.
	Rs.	Rs.
Imports	28,401,080	27,651,045
Exports	43,663,781	33,691,381
	72,064,861	61,342,426

The amount of duty collected during the years 1907 and 1908 was as under:—

	1907.	1908.
	Rs.	Rs.
On imports	2,719,824	2,473,239
On exports	627,119	638,810
	3,346,943	3,112,049

The total value of imports and exports for the last five years, 1904 to 1908, was as under:—

Year.	Imports. (Including charges and exchange.)	Exports. (Including shipping charges on local produce and manufactures.)
	Rs.	Rs.
1904	35,416,624	44,545,320
1905	26,944,399	36,843,046
1906	29,588,255	41,156,120
1907	31,161,095	46,347,716
1908	30,219,964	35,790,226

Comparative Statement of the Value of the Chief Imports and Exports.

---

* Including shipping charges on the principal home produce, viz., sugar, rum, molasses, aloe fibre, cocoanut oil, and vanilla.

IMPORTS (Detailed Remarks).

Bicycles.—Decrease of 94 in number and of Rs. 8,055 in value, due chiefly to the United Kingdom.

Brass and Copper Wares.—Brass ware and ornament, decrease of Rs. 6,578, chiefly from United Kingdom. Copper sheets and nails (yellow) increase of Rs. 10,779 in the importation from the United Kingdom.

Coal.—Increase of Rs. 316,066 over last year. Natal provided for a surplus of Rs. 520,248, due to the railways consuming larger quantities of such coal. Decreases were from the United Kingdom (Rs. 180,324) and Australia (Rs. 28,867).

Corn, Grain, Meal.—Rice.—Showed an increase in the importation of Rs. 553,819, due to Cochin China and Madagascar providing for surplus values of Rs. 1,019,477 and Rs. 550,619, respectively; whereas decreases were from Continental India (Rs. 849,565), Straits Settlements (Rs. 39,660), and Singapore (Rs. 131,807).

Wheat.—Decrease in flour of Rs. 280,282, due to less importation from Continental India (Rs. 145,379), Australia (Rs. 75,410), and the Argentine Republic (Rs. 59,370).

Decreases in the importation of dholl, gram, and lentils (Rs. 115,162, Rs. 52,411, and Rs. 1,487, respectively) from Continental India.

Oats.—Cape Colony and the Argentine Confederation provided for surplus values of Rs. 138,149 and Rs. 163,360, respectively; whereas Continental India and Australia showed falling off of Rs. 68,080 and Rs. 31,459, respectively.

Cotton Manufactures.—Increase of Rs. 89,492 in the importation over last year, due chiefly to more supplies from Continental India and the United Kingdom.

Haberdashery (including flowers (artificial), silk, satin, and ribbons).—Decrease of Rs. 129,069 as compared with 1907, due to less supplies from the United Kingdom (Rs. 45,081), France (Rs. 31,739), Continental India (Rs. 18,907), and China (Rs. 17,488).

Hardware and Cutlery (including iron—bars, nails, pig, sheet, wire netting, anchors, grapnels, wrought—other sorts; lead, sheets and pipes, steel, wrought and unwrought, tins of all sorts, zinc solder).—The total importation showed an increase of Rs. 41,916, and the following headings are to be noted:—

Hardware and Cutlery.—Decrease of Rs. 58,964, due to short importations from United Kingdom (Rs. 66,860), France (Rs. 6,727), and the United States (Rs. 6,141). Belgium showed an increase of Rs. 17,866.

Iron Bars.—Shortage of Rs. 25,613, due to less importations from United Kingdom (Rs. 29,183). Belgium showed an increase of Rs. 3,604.

Iron, Pig.—Shortage of Rs. 4,553 from the United Kingdom.

Iron, Sheets.—Shortage of Rs. 14,616 from the United Kingdom.

Iron, Wrought. — Increase of Rs. 51,382, chiefly from the United Kingdom.

Steel.—Increase of Rs. 7,589 from the United Kingdom.

Tin Plates.—Increase of Rs. 31,950 from the United Kingdom.

Tin Slabs.—Increase of Rs. 8,197, due chiefly to increases from the Straits Settlements (Rs. 9,832). From the United Kingdom there was a falling off of Rs. 3,407.

Machinery and Mill Work.—Shortage of Rs. 208,354 as compared with 1907, with the following percentage:—

In weight	22 per cent.
In value	55 per cent.

The decreases were chiefly from the United Kingdom (Rs. 185,174), France (Rs. 16,258), and Germany (Rs. 5,868).

Machinery for Agricultural Purposes (including locomotives, steam road engines, waggons, trucks, tramway materials, rails, and accessories, wire rope).

There was a falling off of Rs. 319,890, due to short importation chiefly from Germany (Rs. 190,045), Belgium (Rs. 91,196), and also from the United Kingdom (Rs. 35,161) and France (Rs. 12,374). The United States provided for Rs. 8,887 in 1908, against nil in 1907.

Malt Liquors, Spirits, and Wines.—Beer and Ale.—Decrease of Rs. 61,215, due to short importation from the United Kingdom.

Spirits, Brandy.—Decrease of Rs. 18,297, chiefly from France.

Whisky.—Decrease of Rs. 9,761 from the United Kingdom.

Wine, Champagne. — 3,076 litres more with a shortage of Rs. 7,683 in value, due to differences in market prices from France.

Wine, Claret, in casks.—Decrease of Rs. 124,406, due to less importations from France (Rs. 98,345), Algeria (Rs. 16,049), and Spain (Rs. 17,456).

Vermouth.—Decrease of Rs. 18,016, due to less importation from France.

Wine, White.—Decrease of Rs. 7,092 from France.

It is to be noticed that hard times produce a diminution in the importation of wine and spirits.

Timber and Woodenware.—The importations showed a falling off of Rs. 228,315, accountable as under:—

Boards and Planks.—Decrease of 2,181 cubic metres in bulk and of Rs. 135,108, due to less importations from Norway (Rs. 12,677) and Singapore (Rs. 122,143).

Shingles.—Decrease of Rs. 19,947, due to Continental India (Rs. 9,908), Singapore (Rs. 22,858). Trinidad provided for Rs. 12,847 in 1908, as against nil in 1907.

Timber.—Increase of 2,003 cubic metres in bulk and of Rs. 140,630 in value, due to more importation from United

Kingdom (Rs. 66,696), Australia (Rs. 29,657), Continental India (Rs. 27,792). Austria provided for Rs. 19,218 in 1907, against nil in 1908; whilst Sweden supplied for Rs. 44,211 in 1908, as against nil in 1907. Madagascar showed a decrease of Rs. 7,733.

Woodenware.—Decrease of Rs. 11,915, due to less importation from United Kingdom.

Woollen Manufactures.—Decrease of Rs. 48,923 in the importations, chiefly under heading "Mixed with Cotton or Silk," which showed a decrease of Rs. 45,857, due chiefly from United Kingdom (Rs. 24,273), France (Rs. 18,203), and Germany (Rs. 5,864).

General Remarks.

The Customs returns indicate clearly that the United Kingdom is being pressed hard by Belgium, Germany, and France in certain lines. But it would not be correct to assume too much from this symptom, for it is nothing more than a symptom of poverty. A poor community purchases cheap, showy articles in preference to the better but dearer goods. Moreover, some of the large French houses, such as the Louvre and the Bon Marché, have agents in Mauritius, whose business it is to push the sale of the articles retailed by those houses. German and Belgian travellers also visit Mauritius and make things easy for intending purchasers. But despite the competition of Germany and France, the prestige of the English manufacturer remains unshaken, and so long as English manufacturers continue to provide the best articles, it is likely to remain unshaken. But something more might be done if the large retail establishments were to arrange facilities through local firms for placing orders for such things as can be conveniently sent by parcel post. The arrangement for the transmission of postal parcels to be paid for on delivery has not been accepted by Mauritius and is not likely to be. But there are many articles which cannot be supplied by the local shops that would probably be ordered from the large London shops if they offered the same facilities for placing such orders as are furnished by the Parisian establishments. The price list, to be circulated locally, should be in the French language, and should show the prices in rupees. The local agents should receive the order, accept payment, and arrange to deliver the goods.

MANUFACTURES AND FISHERIES.

The fisheries have been referred to in previous reports. It is, perhaps, possible that the channels inside the coral reefs might be planted with sponges or the pearl oyster, but the project does not hold out sufficient prospect of success to justify expenditure on experiments, at all events at the present time. Enquiries have been made by commercial firms as to the possibilities of a trade in vacoa bags. These bags, which are made from the leaves of the vacoa palm, are very strong and durable. They would probably prove to be the best coal sacks in the world, and as the manufacture of these bags is a home industry of the poorest classes it should be an advantage if it could be organised and developed by capital.

FORESTRY AND BOTANY.

The area of land under the care of the Forest Department amounts to 84,529 acres.

Exploitation of Forests.

Two of the forests of the island, Kanaka and La Pipe, were exploited in 1908. The net profit for Kanaka was Rs. 32,170 and for La Pipe Rs. 13,962. A small revenue was also derived from cuttings on the Pas Géométriques, a belt of inalienable land, 250 feet wide, round the sea coast held by the Government in perpetuity. The areas exploited were replanted with young trees. But forest exploitation must not be looked at only from the point of view of the commercial results attained by cutting and replanting. In the course of exploitation, noxious growths are removed, stagnant waters are drained, the breeding places of destructive insects, which live on dead and dying trees, are destroyed, and forests which might otherwise become foci of disease are rendered healthy. The traveller's palm, which is believed to be a breeding place for mosquitoes, is cut down whenever met with. It may be safely said, therefore, that provided forest exploitation is not pushed to an extent that could affect the water supply, it is both profitable and beneficial.

It is satisfactory to be able to report that though useful trees are planted out in the forests, special attention is being given to collecting and propagating the seeds of the old indigenous trees of the island. The public for the most part purchase the quick-growing eucalyptus casuarinas or conifers, which are commercially more profitable than the slow-growing indigenous trees. It is therefore all the more incumbent on the Forest Department to cultivate and preserve those beautiful, though slow-growing, old trees which might otherwise become practically extinct.

Unfortunately an enforced economy necessitated by want of funds caused the loss of 150,000 young pines at Curepipe Gardens. These trees, which had been intended for planting on new areas, have now become too old for transplanting, but, nevertheless, 190,698 forest plants were sent out during the year from Curepipe Nursery Gardens to the Government plantations, and 35,045 plants were sold to the public.

Experiments have been made with rubber, but a definite judgment cannot yet be formed. So far as can be seen it would appear that the standard trees—the Para, Ceara, and other species—are severely damaged by the cyclones, and are prejudicially affected by the strength of the trade winds; but the rubber creepers do not appear to suffer from wind, and there may be an opening for the cultivation of creepers.

The various public gardens at Pamplemousses and Curepipe have been described in previous reports, and, indeed, they need very little description, for the gardens at Pamplemousses may be said to have earned historic celebrity, but it may be mentioned that useful work has been done by the introduction, propagation, and sale of new varieties of sugar cane. The excellent fruit tree, the letchee, has been propagated and planted out.

Experiments have been made with cocoa plants, and the ylang-ylang, a scent tree which has proved profitable at Réunion, has been introduced and planted out. Sisal plants were also propagated and sold.

On the whole it may be said that with very limited resources the Forest Department has done, and is doing, good work, though forest thefts are, unfortunately, too common. The forests have been preserved, and the botanical and nursery work so necessary to an agricultural Colony is being carried on in the interests of the agricultural community. In the nature of things experiments cannot always be successful, and it must be remembered that even failures have their useful side, for the experience thus gained acts as a warning to planters who might otherwise embark on unprofitable enterprises.

In forestry and agriculture there are many enemies to contend with; forest thefts and prædial larceny are common, but the worst enemies of the forester are monkeys and bats, which destroy the seeds of the best trees. Next to them come insect pests, which are the enemies of all sorts of agriculture, for there is probably no economical plant which has not insect enemies. But the systematic study which is given to this subject by the Forest Department and at the Station Agronomique is furnishing the foresters and planters with information to enable them to cope successfully with these natural difficulties.

The Horticultural Society, which receives a small subsidy from the Government, is doing useful work, and the two exhibitions which they have held during 1908 prove that the spirit of emulation and competition has been encouraged amongst all classes of cultivators.

CROWN LANDS.

The Crown land sales have been unimportant. In Mauritius two small plots have been sold, and at Rodigues eight agreements have been concluded, and the sales completed or partly paid for. The revenue derived from the leases under the planting conditions of Ordinance 19 of 1895, of the Pas Géométriques, which form a narrow strip of land round the coast, and cannot be alienated, amounted to Rs. 8,613.

SHIPPING.

The tendency of the shipping trade is in the direction of fewer, but larger, vessels. There is, however, an exception to this rule. The size of the Messageries Maritimes steamers is limited by the difficulties of entering the harbour of Pointe des Galets at Réunion. This harbour has a narrow entrance between two breakwaters, and vessels have to turn at right angles in a narrow channel. It is hardly possible, therefore, for the Messageries Maritimes Company to greatly increase the size of steamers trading to Mauritius.

But the increased size of steamers renders quick despatch more than ever necessary, for the cost of detention of a large steamer is greater than that of a small steamer. The harbour at Port Louis has been dredged, and steamers can now come in much closer than formerly, but much remains to be done to facilitate entry and discharge of steamers. New moorings will be laid down as soon as funds are available; and the provision of increased quay space and shed accommodation has only been delayed through want of funds.

It would, of course, be an advantage if piers could be built to take large ships alongside, but the cost of the scheme which has been prepared is prohibitive, and is likely to remain so for years to come. For the present, at all events, the Colony must limit its efforts to the gradual improvement of existing facilities, and postpone more ambitious projects to the advent of a more prosperous future.

The shipping for the five years 1904-1908, can be thus summarized:—

(a.) *Exclusive of Coasting Trade* (i.e., *Dependencies*).

—	1904.		1905.		1906.		1907.		1908.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total number and tonnage of vessels entered and cleared.	425	801,154	372	731,470	433	805,924	399	731,853	363	753,591
2. British vessels	290	572,440	245	490,378	270	522,101	248	501,491	232	503,618
3. Foreign vessels	135	228.714	127	241,092	163	283,823	151	230,362	131	249,973
4. Sailing vessels	96	66,449	73	50,471	89	59,822	39	20,682	32	17,768
5. Steam vessels	329	734,705	299	680,999	344	746,102	360	711,171	331	735,823

(b.) *Coasting Trade* (i.e., *Trade with the Dependencies*)

—	1904.		1905.		1906.		1907.		1908.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.
1. Total number and tonnage of vessels entered and cleared.	60	12,845	55	9,263	51	9,636	48	11,624	47	15,458
2. British vessels ...	60	12,845	55	9,263	51	9,636	42	9,326	43	13,926
3. Foreign vessels ...	—	—	—	—	—	—	6	2,298	4	1,532
4. Sailing vessels ...	56	12,065	55	9,263	51	9,636	40	7,576	35	5,342
5. Steam vessels ...	4	780	—	—	—	—	8	4,048	12	10,116

The number and tonnage of steam vessels which entered and cleared from and to all countries viâ the Suez Canal, and the value of goods (including bullion and specie) imported into and exported by that Canal into and from Mauritius are shown in the following table:—

Suez Canal.

Year.	Vessels Entered.		Vessels Cleared.		Value of Goods (including Bullion and Specie).	
	No.	Tons.	No.	Tons.	Imports.	Exports.
					Rs.	Rs.
1904	32	71,428	20	42,717	3,149,920	234,010
1905	35	84,975	28	68,734	2,437,479	893,257
1906	37	89,109	27	61,980	2,554,574	1,358,512
1907	33	80,843	28	64,087	2,202,682	273,372
1908	36	88,091	28	63,670	2,092,982	477,747

The first table is a return of all vessels entered and cleared excluding the coasting trade, *i.e.*, vessels trading with the Dependencies, which are exclusively dealt with in the second table.

In table 1 the total number of vessels entered and cleared during 1908 show a decrease of 36 in number, but an increase of 21,738 in tonnage as compared with the figures for 1907.

Compared with 1907 the following differences were noted:—

Sailing vessels.—Decrease of 7 in number, and also of 2,914 in tonnage.

Steam vessels.—Decrease of 29 in number, but increase of 24,652 in tonnage.

British vessels.—Decrease of 16 in number, but increase of 2,127 in tonnage.

Foreign vessels.—Decrease of 20 in number, but increase of 19,611 in tonnage.

Of the 363 vessels which entered and cleared during 1908, two British vessels, with an aggregate tonnage of 3,204 tons, entered this port for the purpose of coaling, showing a decrease of 5,965 tons as compared with 1907.

Coasting Trade—Dependencies.

The number of vessels entered and cleared from and to the Dependencies during 1908 were 47 in number, with a tonnage of 15,458, against 48 in number, with a tonnage of 11,624, during 1907, showing a decrease of one in number, but an increase of 3,834 in tonnage.

Twelve steamers, with tonnage of 10,116, entered and cleared from and to the Dependencies in 1908 as against 8, with a tonnage of 4,048, in 1907, showing an increase of 4 in number and of 6,068 in tonnage.

Thirty-five sailing vessels, with a tonnage of 5,342, for 1908 entered and cleared from and to the Dependencies against 40 vessels of a tonnage of 7,576 for 1907, showing a decrease of 5 in number, and of 2,234 in tonnage.

Four foreign vessels, with a tonnage of 1,532, entered and cleared from and to the Dependencies in 1908 against 6 vessels, with a tonnage of 2,298, in 1907, showing a decrease of 2 in number and of 766 in tonnage.

Suez Canal.

The value of goods imported through the Suez Canal in 1908 amounted to Rs. 2,092,982 against Rs. 2,202,682 in 1907, showing a decrease of Rs. 109,700.

Goods exported from Mauritius through the Canal in 1908 amounted to Rs. 477,747 against Rs. 273,372 in 1907, showing an increase of Rs. 204,375.

Vessels with Cargoes.

The tonnage of vessels entered with cargoes during 1908 amounted to 347,455, and the tonnage cleared to 295,964, as against 351,375 entered, and 279,067 cleared, for 1907. The aggregate tonnage of the coasting trade amounted to 7,667 entered and 7,791 cleared in 1908, against 5,669 entered and 5,955 cleared in 1907.

Vessels touching at this Port.

No vessels touched at this port without entering the harbour during the year 1908.

Transports and Men-of-War.

The following transports and men-of-war visited this port during the year 1908:—

	Registered tonnage.
British—	
The "Mercedes"	2,965
"Pelorus"	2,135
"Hermione"	4,360
French—	
"Surprise"	200

Statement showing the classification of shipping by nationalities:—

III.—LEGISLATION.

The law in Mauritius is based on the French Civil and Penal Codes (Code Napoléon), and although both have been considerably amended by statutes, the fundamental principles remain untouched, and are part of the social life of the people; but the increase of the Indian population, and the growing importance of the Mahomedan community, tend to bring forward questions as to marriage and succession which may call for consideration before long. It is naturally difficult to reconcile the ideas of family relationships and of civic duties based on social systems so opposed as those of Napoleonic France and Mahomedan India, but the experience of India will probably furnish material for a solution should the question become one calling for legislative interference.

During the Session 1908-9, 28 Ordinances were passed by the Council of Government and assented to by the Governor.

The following enactments call for special mention:—

1. Ordinance No. 11 adapts the provisions of Section 92 of 24 and 25 Victoria, c. 96, to the Colony, and provides for the joinder of alternative counts charging the same person for larceny (with or without aggravating circumstances), and for being found in possession of, or for having unlawfully received, the proceeds of such larceny.

2. Ordinance No. 12 regulates in District Courts:—

(1) The order of imprisonment in lieu of fine and of costs in certain cases;

(2) The procedure when sentences of imprisonment and of fine are passed on the same day in several cases on the same person;

(3) The passing of concurrent or of consecutive sentences when a person convicted is already undergoing imprisonment under a prior sentence;

(4) The recovery of "poundage" expenses.

It also gives power to convict for attempt on an information charging the complete offence, and makes embezzlement interchangeable with larceny.

3. Ordinance No. 13 brings certain modifications in the Labour Ordinance, No. 12, of 1878, the most important of which is the substitution for what is known as the "double cut" (viz., the forfeiture to the employer of two days' wages for each day of illegal absence) of a system by which, in the case of one or more illegal absences during the working days of any week, the indentured servant forfeits his wages for the Sunday following (Article 6), and is treated as an habitual idler and punished accordingly if the total number of illegal absences during any one month exceeds nine working days (Article 7).

The other modifications lie in the extension of the protective powers of the Protector of Immigrants (Articles 1, 2, 4, and 11); in the remodelling of penalties for breaches of contract by servants (Articles 2, 7, and 8); while a new provision (Article 9) was inserted to permit of a corresponding prolongation of contract of indentured servants sentenced to undergo imprisonment during the period of their engagement.

The Ordinance is to come into force on a day to be fixed by proclamation (Article 13).

4. Ordinance No. 14 consolidates and revises the Customs duties mainly in accordance with the recommendations of a Special Committee of the Council appointed in 1905 to report on the revision of the Customs tariff.

5. Ordinance No. 16 "modernizes" the old law (proclamation of 30th March, 1825), relating to the constitution and powers of Roman Catholic Parochial Councils (Fabriques).

6. Ordinance No. 19 regulates the duration and conditions of leases of Pas Géométriques for cocoanut plantations.

IV.—EDUCATION.

In the report for 1907 an account was given of the working of the religious compromise in Mauritius, and it is not necessary to repeat the terms of that compromise. It will be sufficient to say that the education law contains two clauses which may be described as toleration clauses, and which work out as follows:—

The Government schools contained:—

Roman Catholics	5,191
Anglicans	228
Other Christian denominations	101
Mahomedans	905
Hindoos	2,090

The Roman Catholic schools contained:—

Roman Catholics	6,400
Anglicans	21
Other Christian denominations	39
Mahomedans	447
Hindoos	1,123

The Church of England schools contained:—

Roman Catholics	503
Anglicans	231
Other Christian denominations	7
Mahomedans	361
Hindoos	1,092

The Presbyterian schools contained:—

Roman Catholics	31
Anglicans	3
Other Christian denominations	67
Mahomedans	23
Hindoos	12

The Mahomedan school contained:—

Roman Catholics	11
Anglicans	7
Mahomedans	86
Hindoos	38

There were 67 Government schools, 66 Roman Catholic, 19 Church of England, 2 Presbyterian, 1 Mahomedan school with an annual average of 18,585 pupils on the roll, and an average attendance of 12,021. The general tendency is towards increased attendance at the Grant-in-Aid schools.

Lectures on hygiene were given to 225 teachers, who will, when qualified, teach hygiene to the school children.

The above figures may be taken as a certificate to the general fairness of the Educational Law, and complaints are limited to the increasing expenditure due to the increased grants that are being earned by the Grant-in-Aid schools under the law. This increase is automatic, and is due to greater efficiency in the teaching. The qualifying standards have, however, been slightly "stiffened," and it is probable that this measure will tend to economy without any diminution in efficiency; for even the present standards are slightly below those reached by English or French boys of the same age.

The schools are not attended by Indian children in the same proportion as Creoles; there were probably between 50,000 and

60,000 Indian children of school age in the Colony during 1908, but of these only about 7,000 attended school.

Recent legislation in regard to Indian labour has, however, raised the age at which a minor may enter into a written contract from 10 to 13 years, and the result will probably be to send more Indian children to school.

The language is not a difficulty, for under the Code any language may be employed as medium in the three lowest standards. In the three higher standards, English is the sole medium.

Secondary education is provided by the Royal College, the two college schools, and 40 associated schools.

There are the usual two sides of the College—the Classical and the Modern.

On the Classical side English, French, Latin, Greek, mathematics, history, and geography are taught. Drawing is an optional subject.

On the Modern side English, French, mathematics, elementary and higher chemistry and physics are taught. Drawing, as on the Classical side, is an optional subject. Shorthand, Hindustani, agricultural chemistry, and agricultural science are also taught.

There are three religious teachers—two Roman Catholics and one Church of England, who give about 4½ hours' instruction a week to the boys of their denominations.

There are 383 boys at the College; of these 115 are non-paying pupils. The cost to the Government works out at about Rs. 284 per head all round. There are two laureateships, or scholarships, given annually, worth £1,150 each, to enable the winners to proceed to England to study for some profession.

Technical or industrial education is encouraged by scholarships in mechanical engineering, civil engineering, horticulture, and also needle-work for girls. Forty-five girls competed in 1908 for the four needle-work scholarships.

Visitors to Mauritius are often surprised to find themselves in a French society where only a portion of the men speak English and very few of the women. This is changing in the younger generation. Nearly all the youth and young men speak English as well as French, and their sisters are learning English. The prizes given in the examination in the higher education of girls are encouraging this movement, and it is probable that the barrier of language, which has hitherto been such a hindrance to the social intercourse of English and French, will before long be removed.

Looking to the numbers of schools and the standards obtained, it may fairly be said that the Government gets full value for the money spent on education. Whether the parents of the pupils should not contribute more than they do is another and very difficult question. The poorer classes certainly cannot contribute anything; and in a Colony where equality, though possibly never attained, is regarded as a sacred ideal, as sacred indeed as fraternity, it would be invidious to establish class schools to which admittance could only be gained by high school fees.

As matters stand, the son of a coloured artisan may sit on the same bench at the Royal College as the son of the richest planter, and no one reproaches the poorer boy because he is a non-paying pupil. For though the planter's son pays Rs. 12 a month both are, in fact, being educated at the expense of the State; but this feeling of equality would not stand in the way of residential fees if it were found possible to establish masters' houses for the benefit of boys whose parents live in the more distant parts of the island. Anything that would introduce the social life of an English public school could not fail to be a benefit to the cause of education, and to the social, physical, and moral training of the boys.

V.—MEDICAL AND PUBLIC HEALTH.

Poverty is increasing in Mauritius. There has been a steady increase for years past, but the financial crisis through which the island has passed has produced an unusually large increase in poverty and crime. There is another notable feature. Hitherto pauperism has been mainly limited to the Creole population, whose thriftless habits have rendered them without resource at times of unemployment. But during 1908 there was a marked increase of pauperism in the Indian population.

The following table, giving the proportion relieved per thousand of each section of the population, is instructive:—

Year.	General population.	Indian population.
1899	26·4	4·4
1900	24·6	4·1
1901	28·4	4·6
1902	25·7	4·5
1903	26·4	5·7
1904	29·6	5·1
1905	28·3	6·2
1906	24·6	5·9
1907	26·2	6·2
1908	35·2	8·9

The caste feelings of the Indians are so strong that they are reluctant to go to hospital when ill, and they are, as a body, so frugal and thrifty that nothing but genuine and poignant distress can reduce them to the condition of paupers. This is proved by the death-rate—for the death-rate in 1907 amongst the Indian population was 34·6 per mille, and in 1908 the death-rate amongst the Indian population rose to 41·7 per mille.

These figures, taken in connection with the figures given for poor law relief, indicate clearly enough the social and economic conditions produced by financial stringency.

Should these figures increase the Government will be in presence of serious social and economic problems, for not the least of the evils of poor law relief is the tendency to sap the self-reliance of the recipients. Hitherto the Indians, exclusive of the professional beggars—a quasi religious profession—have always been self-reliant and self-helpful.

The total number of paupers of every description maintained and relieved by the Poor Law Department throughout the Colony in 1908 amounted to 88,995 against 70,066 in 1907, a very alarming increase in figures that were sufficiently serious.

For it must be remembered that apart from the official Poor Law Department there are numerous private and religious charities working in the island. Amongst these may be mentioned the Society of St. Vincent de Paul, the Society de St. Marthe, the Société de Bienfaisance, the Sisterhood of Bon Secours, besides numerous minor societies organised by charitable ladies. The Mahommedan community distribute food to the poor of all religions at the Mosque every Friday. Private donations are also common, and, indeed, there is probably no country in the world where public and private charity is proportionally so profuse as in Mauritius. Unfortunately, it is needed. Unfortunately, too, it is most needed when public and private finances are least able to meet the calls on them. But the conclusion is inevitable; with so much poverty and unemployment the island must be overpopulated.

In 1908 there was a further and a marked increase in the number of patients admitted into the hospitals and asylums of the Colony, as compared with the two preceding years. The admissions rose to 27,751 in 1908, against 23,335 and 20,371 in 1907 and 1906, respectively, but contrary to what obtained in 1907, the case mortality rose to 5·79 per cent., being ·45 per cent. higher than that of the previous year. Concurrently, the number of cases treated in the dispensaries increased to 66,077, against 55,635 in 1907.

Judging therefore from the standard of comparison adopted in previous reports, it may be said that the sanitary condition of the Colony during 1908 was inferior to what it had been the year previous, as shown by the higher general and hospital death-rates, lowered birth-rate, and larger number of attendances both at the hospitals and at the dispensaries. The increased calls for free medical assistance were mainly due, however, to the financial difficulties through which the Colony has passed.

Malaria.—As already alluded to the Colony has suffered from a rather severe and widespread visitation of this disease during the year under reference. For the first time for many years the number of admissions in the hospitals did not show the usual alternance previously noted, as shown in the following tabular statement:—

Years.	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.
Admissions	4,152	2,818	4,182	3,360	4,788	3,039	5,123	3,674	4,272	5,071

The admissions (5,071) were the largest recorded during the past ten years with one exception, and nearly equalled those of 1905 which reached 5,123. This is no doubt to be explained by the heavy rains of the earlier and hotter months of the year, the higher average temperature and higher degree of humidity, but much of this unfortunate state of things was probably also brought about by the financial stringency which was such a marked feature in the history of the island. A further argument in support of this view is to be found in the increased number of cases of splenic enlargement due, apparently, entirely to chronic malaria that claimed admission. These cases were probably due to old-standing infection, and would under other circumstances not have come to hospital at all.

Every effort was made that could be made with the means at the disposal of the Medical Department to cope with the exigencies of the situation that was thus created.

Dysentery and Diarrhœa.—The following table shows an alarming increase in deaths from dysentery and diarrhœa:—

Year.	Diarrhœa.	Dysentery.
1899	281	690
1900	244	685
1901	356	898
1902	294	709
1903	270	769
1904	198	548
1905	330	987
1906	220	771
1907	230	899
1908	310	1,316

The increase in the occurrence of dysentery is attributable to the same causes, though in a different manner, as were active in the causation of malaria. The actual type of the disease has not yet been definitely established, but there are indications that many of the cases are of amœbic origin. Although in isolated outbreaks infection may possibly have taken place through the instrumentality of flies or dust, there seems to be good ground for regarding the contamination of rivers and streams, which serve very generally as sources of water supply, with excremental matters as the principal channel of infection.

Enteric Fever.—A further increase is observable in the number of cases of this disease notified under the Infectious Disease Ordinance of 1898, 229 cases having been registered against 145 in the previous year. If it is stated that the figure for 1907 showed an increase of 80 per cent over that of 1906 it would appear at first sight that typhoid fever is rapidly spreading in the Colony. As explained, however, in last year's report, this rise in the incidence of the disease is more apparent than real, and is probably to be accounted for by greater accuracy of diagnosis, principally through the assistance furnished by the Bacteriological Laboratory. In this connection it may be pointed out that in spite of the much larger number of cases notified the deaths from typhoid have only exceeded by nine those recorded in 1907. Moreover, the general death-rate from that cause, which was 25·5 per cent in the latter year, fell to 15·7 per cent in 1908, a fact which tends to show that owing to greater facilities of diagnosis many milder cases were notified which would otherwise have escaped registration. For purposes of comparison with previous reports the following table is inserted, showing the distribution of the cases in each month and in each district:—

Month.	Districts.									Total.
	Port Louis.	Pamplemousses.	Rivière du Rempart.	Flacq.	Grand Port.	Savanne.	Plaines Wilhems.	Black River.	Moka.	
January ...	1	—	3	—	—	1	7	—	3	15
February	1	—	2	—	—	—	7	—	1	11
March ...	2	—	3	—	1	—	8	—	6	20
April ...	1	—	3	—	1	—	5	—	4	14
May ...	1	1	2	1	—	4	4	—	2	15
June ...	2	—	4	1	1	2	4	—	3	17
July ...	2	—	6	—	2	2	5	—	4	21
August ...	4	—	3	1	—	1	3	—	7	19
September	1	—	2	—	4	1	10	—	9	27
October ...	9	—	7	2	1	4	4	—	4	31
November	5	—	1	2	2	1	7	—	2	20
December	—	—	5	4	2	3	3	—	2	19
Total ...	29	1	41	11	14	19	67	—	47	229

The districts most affected were Plaines Wilhems, Moka, Riviere du Rempart and Port Louis, the first heading the list as usual. On the whole, the cases were pretty evenly distributed throughout the year, with a tendency perhaps to be slightly more numerous during the second half. The disease appeared in the form of scattered cases or small groups of cases, the original source of infection remaining usually obscure or undiscoverable. The impression which is derived from a study of these occurrences is that the infection was principally kept up and disseminated through the agency of bacilli carriers.

In connection with this subject it may be as well to mention that it is not unfrequent to meet with cases of more or less continued fever refractory to quinine with no malarial parasites in the blood, and in which Widal's re-action is negative. These cases, which appear to be neither malarial nor typhoid in their nature, seem to point to the existence in the island of a febrile affection or affections, possibly similar to the unclassified fevers of India, regarding which it is hoped more accurate knowledge will be acquired with the assistance of the Bacteriological Laboratory.

Diphtheria.—The cases of diphtheria notified during the year rose to 114, against 60 in 1907. Although as in the case of enteric fever this increase is no doubt partly due to greater accuracy of diagnosis, yet the higher fatality of the disease (14 deaths were ascribed to that cause) is probably an index of actual enhanced prevalence. The districts most affected were Plaines Wilhems, Moka, and Port Louis. Anti-diphtheritic serum from the Lister Institute was supplied by Government to all who applied for it, no charge being made in the case of persons unable to pay. A certain quantity is always kept in readiness at the Bacteriological Laboratory to permit of the early application of the treatment whenever necessary after examination of the preparations.

Measles.—The epidemic of measles which took place in 1907 continued during the year under review. The outbreak was at its height in January, when 168 cases were registered, but rapidly abated until by the end of the year it practically disappeared. The total number of cases notified was 476, with 27 deaths, or a mortality of 5·6 per cent. The districts most affected were those of Plaines Wilhems, Savanne, and Grand Port.

Plague.—The number of cases recorded during the year was 167, showing a reduction of 57 upon that for the preceding year. The annual epidemic recurrence was slow in asserting itself, and it was not until September that the disease can be said to have become prevalent. As a consequence, the epidemic only reached its maximum in November instead of October as is usually the case. In spite of a somewhat virulent recrudescence at Port Louis, it is satisfactory to note that the tendency to decline, manifested by plague since 1906, has been maintained, the epidemic of 1908 being the smallest registered since 1899. Moreover, with the exception of two small outbreaks at Souillac and at the Mount and Mon Gout (Pamplemousses) the disease has been entirely confined to the districts of Port Louis and Plaines Wilhems, which may be regarded as possibly the only two indigenous foci in the island. In view of the number of cases (six) detected in the latter district, the hope may not unreasonably be entertained that it may before long be rid of the scourge.

The campaign was conducted on the same general lines as before, special prominence being given to the destruction of rats and disinfection of contaminated and insanitary premises. The total amount spent on plague measures generally was Rs. 119,541.52.

The number of rats destroyed by the Health Department was 81,958 at Port Louis, and 90,546 in the rural districts, giving a total of 172,504, against 125,558 in 1907. Of these, 11,518 were microscopically examined, and 234 were found plague-infected.

Cerebro-spinal Meningitis.—Twenty cases of this affection were reported during the year. Although it had not previously been unknown in the Colony, where it was probably introduced from India, it is the first time it has ever assumed anything like epidemic form. It has accordingly been added to the diseases notification of which is compulsory. Cases were observed in the prisons at Port Louis, Plaines Wilhems, and Savanne, in private practice in the same districts, and at Rivière du Rempart. It manifested no marked tendency to spread, but in such cases as were discovered it showed the same high degree of fatality as is usually associated with the disease in other countries, 16 out of 20 cases ending in death, or a mortality of 80 per cent. The cases were more numerous during the first half of the year.

Influenza.—This disease, which for some years past has assumed an epidemic prevalence annually, made its appearance in the colder months of 1908, but, as already stated and for reasons little known, though probably connected with climatic conditions, has not prevailed with the same intensity as before.

Bronchitis and Pneumonia.—Contrary to what might have been expected from the foregoing paragraph, bronchitis and pneumonia have been more prevalent in 1908 than the year before. This is probably to be accounted for by the fact that in many cases these affections may have been late complications of an attack of measles.

Beri-beri. — This disease showed no tendency to recur in epidemic form. In addition to the cases admitted in the public hospitals a few scattered cases were reported by private medical practitioners. These cases were too few and disseminated to permit of definite conclusions being drawn as to their probable cause.

Nephritis.—This affection, whatever may be its ætiology, is steadily on the increase in the island. It is to be hoped that clinicians and bacteriologists will unite in their endeavours to trace it to its, as yet obscure, causes.

Scarlet Fever.—Two cases of this affection were notified, one at Port Louis and the other at Moka. They were both of a mild type. Doubts are still being entertained as to the identity of the disease, as observed here, with true scarlet fever.

Erysipelas.—This disease assumed some epidemic prevalence during the year, 73 cases being notified, with 16 deaths.

Leprosy.—It appears that little change has taken place in the number of lepers maintained at the St. Lazare Asylum at the expense of Government. This, as previously mentioned, is no criterion of the progress of the disease in the island, as segregation in the asylum is not compulsory, but when taken in conjunction with the fact that the year 1908 has been financially a difficult one for a large proportion of the population, it seems at any rate to indicate that the affection is not on the increase. But whatever efforts may be made by the Medical Department, they cannot fight successfully against poverty, with its attendant evils of overcrowding, insufficient nourishment, inadequate clothing, and insanitary conditions. Debilitated constitutions are ready-made recipients of diseases, and lack the stamina which in the more vigorous constitutions is the doctor's best ally.

Surra.—Occasional cases of this epizootic among equines and bovines were reported during the year, but it has on the whole been less prevalent than in 1907.

The disease is being carefully studied at the Bacteriological Institution.

HOSPITALS, ASYLUMS, AND DISPENSARIES.

In spite of the financial embarrassments of the Colony the hospitals and asylums already in existence all continued to be maintained by Government. As already stated, those affording free medical assistance to the sick poor were all taken advantage of by the population, the total number of admissions rising from 23,355 in 1907 to 27,751 in 1908, and many hospitals were unduly full for a longer or shorter period during the unhealthier portion of the year.

The following tabular statement furnishes the usual statistical information with regard to these institutions, including the five hospitals attached to the different jails of the Colony:—

Institutions.	Remaining at end of 1907.	Admissions.	Deaths.	Total cases treated.	Remaining at end of 1908.
Civil Hospital ...	180	7,174	539	7,354	179
Port Louis Prison...	22	1,454	11	1,476	14
Long Mountain ...	22	909	68	931	14
Poudre d'Or ...	32	1,909	83	1,941	24
Flacq	40	2,407	136	2,447	32
Mahébourg ...	1	86	5	87	4
Mahébourg ...	39	3,740	200	3,779	42
Souillac	21	1,389	87	1,410	29
Souillac Prisons ...	4	191	7	195	1
Barkly Asylum ...	176	4,832	338	5,008	147
Lunatic Asylum ...	14	489	32	503	19
Beau Bassin Prisons	29	1,605	68	1,634	19
Reformatory ...	4	218	5	222	2
Moka	24	1,348	62	1,372	25
Total ...	608	27,751	1,641	28,359	551

The dispensaries afforded relief to 66,077 patients, against 55,635 in 1907. With a view to relieve distress and prevent overcrowding of the hospitals at a time when sickness was at its height, the Dispensary Medical Officers were authorised by the Government to issue beef, bread, and other necessaries of life to the sick applying at their dispensaries—for in many cases insufficient nourishment was a main promoting cause of disease.

The dispensaries, 28 in number the year before, were increased by one by the opening of a temporary dispensary in the cemetery office buildings at Black River.

ANTI-MALARIAL MEASURES.

The following major works were carried out during the year:—

(*a.*) The drainage works at Clairfond, Phœnix, were completed.

(*b.*) A large extent of wooded and swampy ground at Mon Plaisir was reclaimed and dried by the construction of 950 feet of drains, which were connected with those already constructed, thus terminating the important works undertaken in that area.

(*c.*) Pamplemousses River, along a portion of its course through the village of the same name, was canalised and its banks rough trained. In June, 1908 the Council of Government voted Rs. 5,500 for certain anti-malarial works to be undertaken during the financial year 1908-9, part of which sum was spent on the works mentioned at (*b*) and (*c*).

By prison labour and with the funds voted for minor sanitary works the rivers of Curepipe, Vacoas Phœnix, Rose Hill Centre of Flacq, and the streams in the extra urban portion of Port Louis were cleansed and in part canalised. A large area of waste lands in the town of Port Louis itself, the owners of which could not be discovered, were cleaned of bush and excavations in them filled up or drained. With the consent and under the supervision of the Woods and Forests Department the banks of the watercourses were cleared of excess of vegetation and levelled.

Important drainage works were commenced at La Louise, Quatre Bornes, by cutting trenches for the drainage of extensive marshes in the neighbourhood of that town.

Professor Ross's visit to this Colony came to an end on February 25th, 1908, but the mosquito-brigade work, which had been initiated by him, was continued under the supervision of Mr. D'Emmerez de Charmoy, with 10 "moustiquiers" and a number of labourers. Much good work was done by these gangs in looking for and destroying mosquito-breeding places, but owing to their small number as compared with the extent of ground to be covered, their action, which has been confined to some of the more populous areas, could exercise but little influence over the general incidence of the disease. They will, however, prove very useful as a trained nucleus for a more comprehensive organisation when Professor Ross's recommendations are carried into effect.

Every effort was made to maintain the drainage canals at Clairfond in the highest state of efficiency, and although anopheles mosquitoes are still to be found in small numbers in the locality, there was no indication at the close of the year of any return of the epidemic which had prevailed with such intensity during the previous malarial season.

Quinine was distributed free from 35 depôts established in the more malarious localities and from the public dispensaries. Arrangements were also made to permit of Government servants receiving salary at the rate of Rs. 720 and under being supplied with the drug free of charge from the hospitals and dispensaries.

Professor Ross's report having been received, copies were presented to the members of the Council of Government, the municipal bodies and persons likely to take an active interest in the subject, and steps were taken to carry out such of the malarial expert's recommendations as were within the means at the disposal of the Medical Department. Two moustiquiers were especially told off for work in Port Louis District, and the number of malaria gangs, suggested by Professor Ross, for the extra urban portion of the district, of which the Department has sanitary charge, were organised with the labourers already employed by the sanitary branch. Rs. 400 having been allowed by the Government for the purchase of spleen-census registers, preparations were being made at the close of the year, with the assistance of the Immigration and Education Departments, for:—

(1.) The periodical examination and quinine treatment of children in schools and on estates.

(2.) The continuous treatment of fever patients on the latter.

(3.) A house-to-house spleen census at Port Louis, and a distribution of quinine to the inmates.

The Municipality of Port Louis started the anti-malaria works in 1907-8, and in 1908 raised a loan of £4,000 to that effect.

Streams were canalised over an area of 8,392 square metres, and canalised and paved over an area of 1,792 square metres.

2,000 square metres of land were drained; gutters were rebuilt over an area of 12,074 square metres, and joints of gutters cemented over an area of 4,000 square metres.

Three retaining walls were built and existing ones repaired; several drains and two open drains constructed; twelve streams were cleaned; the drains and discharge canals were cleaned and sprinkled with petroleum; 1,915 openings and covered drains were cleaned and sprinkled with petroleum. It is evident, therefore, that so far as limited resources permit both the Medical Department and the Municipality of Port Louis are doing their best to give effect to the recommendations of Professor Ross.

VI.—JUDICIAL STATISTICS.

The total authorised strength of the police force on 31st December, 1908, was 724; the actual strength was 722, less men on leave, sick, or in hospital.

The force was composed of 22 Europeans, 2 Cape of Good Hope men, 1 New Zealander, 1 native of Trinidad, 3 natives of Réunion, 1 native of Rodrigues, 554 Creoles of Mauritius, and 138 Indians.

Complaints have been numerous as to the inefficiency of the police; but these complaints are not peculiar to Mauritius; even in countries which admittedly possess the best police in the world complaints appear in the newspapers under the heading "Where are the Police?"

It must, however, be admitted that larcenies, especially prædial larcenies, are greatly on the increase. The following table, furnished by the Inspector-General of Police, which is reproduced literatim, speaks for itself:—

Separate Statement of Prædial Larcenies committed in the Island of Mauritius during the year 1908 *as compared with the five previous years.*

By "Prædial Larceny" is meant the Offences prevalent in Sugar-growing and Coolie-Importing Colonies of robbing provision grounds and homesteads. (Thefts of Fowls, Goats or other Animals excepted).

Year.	Number of Prædial Larcenies declared or reported to the Police.	Number of persons charged.	Number of persons convicted.	Number of persons otherwise disposed of.	Pending.	Amount of property stated to have been stolen.	Amount of property recovered.	Percentage of convictions on number of persons charged.	Percentage of property recovered on property lost.	Remarks.
						Rs. c.	Rs. c.	Per cent.	Per cent.	
1908	1,392	1,252	1,082	148	22	1,034.97	500.74	89·66	48·38	The increase of 750 cases of Prædial Larceny in 1908 as compared with 1907 is attributable to no other cause than that of the increasing poverty of the mass of the people through want of employment.
1907	642	513	448	49	16	694.52	287.65	87·32	44·28	
1906	380	286	253	27	6	449.33	195.92	88·46	43·60	
1905	345	230	194	26	10	303.19	130.10	84·34	42·91	
1904	271	158	132	22	4	275.23	125.49	83·54	45·59	
1903	314	244	213	30	1	166.55	65.51	87·29	39·33	

The economic effect of prædial larceny is disastrous; small cultivators give up the cultivation of market gardens in despair, and whilst the increase of prædial larceny is undoubtedly due to poverty, the effect is to discourage industry and to increase poverty and pauperism.

The question is surrounded with difficulties, but these difficulties are not insuperable, and they are receiving the careful consideration of the Government, who have before them the report of a representative Committee of the Council of Government which was specially appointed to consider the subject.

The following table, showing the cases of crime in which persons were charged, shows the work done by the police:—

Offences.	No. of cases.	No. of persons charged.	No. of persons convicted or committed to Assizes.	No. of persons otherwise disposed of.	Pending.	Amount of property stolen.	Amount of property recovered.	
							By all Agencies.	By Police only.
						Rs. c.	Rs. c.	Rs. c.
Murder including parricide, infanticide, wife murder, and poisoning causing death.	14	26	9	2	15			
Attempt at foregoing and attempt at poisoning not causing death.	6	6	3	1	2			
Manslaughter including wounds and blows causing death.	7	13	11	1	1			
Rape including attempt upon chastity.	9	10	8	—	2			
Larceny at night by breaking or with violence to the person.	173	288	223	41	24	14,022.71	5,697.68	5,385.26
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	73	90	61	16	13	—	1,654.18	1,637.58
Larceny (Prædial)	961	1,252	1,082	148	22	467.29	332.84	175.26
Other larcenies, including cheating, embezzlement, and swindling.	1,848	2,149	1,745	288	116	22,546.20	10,835.07	5,458.68
Removing, receiving, or possessing stolen property obtained by foregoing larcenies.	343	397	277	92	28	—	2,341.79	1,800.80
Arson and other malicious injuries to property.	30	36	31	2	3			
All other offences not included in above.	683	920	697	176	47			
Total	4,147	5,187	4,147	767	273	37,036.20	20,861.56	14,457.58

During the year 1908 the total number of prisoners admitted to the prisons was 7,628 males and 299 females. These numbers show an increase of 1,175 males and three females as compared with the year 1907.

There is a decrease of 36 females and an increase of 753 males previously convicted as compared with 1907.

The increase of reconvictions is probably due partly to the fact that the criminal instincts are developed and the moral instincts lowered by prison life and its associations; but something must be allowed also for the difficulty that a known "jail bird" experiences in securing honest employment.

The prison tasks have been made heavier by regulation, and they may have a deterrent effect; but it is obvious that to men who have sunk to the lowest level of poverty, prison life cannot act as a deterrent in the same way as it does to persons in healthy and comfortable conditions.

The daily average number under detention was, in 1908, 1,445·83 as compared with 1,180·63 in 1907, showing an increase of 265·20.

Ninety-three deaths occurred in 1908 in the prisons, the principal causes being malaria and dysentery.

The daily average of sick in the prison hospital was 77·73 as compared with 68·57 in 1907.

The cost of maintenance of prisoners was Rs. 197,060 in 1908 as compared with Rs. 181,327 in the previous year.

The question of the prison ration has been under consideration, and a new scale, drawn up by the Medical Department, has now been adopted.

The question of the reformatory has long been under consideration, and the evils of the present system, which does not reform the boys, are admitted. There can be no doubt that the boys at the reformatory might be classified so as to avoid the association of the hopelessly irreclaimable with those who have still some of the better side of human nature left in them on which moral and religious influences could be brought to bear. A classification according to ages and character would do much, and might be accompanied by the grant of privileges.

It is, of course, impossible that a Magistrate should be empowered to sentence a Mahomedan or Hindoo boy to become a Christian, and it is not possible to replace the secular organisation by a religious institution, but if the parents consented, it might be possible to bring more humanising influences to bear on young children than is possible in what is practically a boys' prison.

The number of admissions to the Government Reformatory in 1908 was 216 new boys, 107 ex-reformatory boys, 2 deserters, and 106 untried; total, 431 against 364 in 1907. The education given to these boys, both scholastic and industrial, was good. Four Catholic priests and one Protestant clergyman visited the boys frequently, and the Christian boys regularly attended the churches of their various denominations; but that the result of the system is not satisfactory is proved by the fact that 81 ex-reformatory boys were committed to prison in 1908, and took their places in the ranks of the criminal classes. As only 70 ex-reformatory boys were sentenced as criminals in 1907, this shows an increase of 11 in one year.

Criminal Statistics.

The total number of offences reported to the Magistrate in 1908 was 21,433, or 1,073 less than in the previous year. The total number of convictions in the Inferior Courts during the year was 17,627, or 863 less than in 1907, and in the Supreme Court 127, or 43 more than in 1907.

The acquittals were as follows:—In the Inferior Courts 1,374 as against 1,562 in 1907; and in the Supreme Court 61 as against 56 in 1907.

The total number of cases which fell through during the year for want of prosecution amounted to 3,290 as against 4,321 in 1907.

Two prisoners were found insane in 1908 as against one in the previous year.

VII.—VITAL STATISTICS.

There was a decrease in both the general population and the Indian population during the year 1908. In the general population the deaths exceeded the births by 325, and amongst the Indian population the deaths exceeded the births by 1,315. In both, the general population and the Indian population, the males predominate. The marriage rate fell from 5·0 in 1907 to 4·1 in 1908. The birth-rate in the general population was 34·1, and in the Indian population 36·3 per thousand. The death-rate rose from 34·7 in 1907 to 40·0 in 1908—the death-rate being higher in the Indian population than in the general population; but in this connection it must be remembered that infant mortality is very high amongst the Indian population. The highest death-rate of any district was, as usual, that of Port Louis, the capital.

The following table, showing the death-rate in certain British Colonies, may be interesting:—

		Death-rate per thousand.
British Guiana	1907	36·9
Jamaica	1907	26·2
Trinidad	1908	22·6
Mauritius	1908	40·0

The following table shows the death-rate from fever for the decennial period of 1899 to 1908:—

Years.	Deaths from fever.
1899	4,576
1900	4,844
1901	5,612
1902	4,456
1903	5,840
1904	4,333
1905	6,764
1906	5,827
1907	5,100
1908	5,820

The following table gives the statistics of population during 1908:—

The population on 1st January, 1908, was		376,635
The number of births registered in 1908 was	12,177	
The number of births unregistered owing to death intervening before registration was made was	1,279	
Total births	13,456	
The number of deaths registered was	15,096	
Showing a decrease of		1,640
		374,995
Arrivals in the island	3,504	
Departures from the island	4,262	
Difference in favour of departures		758
Total civil population		374,237
Military stationed in the island		1,198
Total population of the island		375,435
Estimated population of Dependencies and outlying islands		5,907
Estimated total population of the Colony		381,342

The crews of non-Colonial shipping in the harbour have not been included in the above estimate.

CLIMATE.

The Royal Alfred Observatory in Mauritius is primarily a meteorological observatory though astronomical work is also done. From May to December weather telegrams are sent to the Director-General of Indian Observatories weekly, as these are of value for the purpose of monsoon predictions, and monthly cables are sent to Cairo. Photographs of the sun are taken daily, and spots were observed on 219 days in 1908, and faculæ on 228 days. Four photographs of the annular solar eclipse of 23rd December (partial at Mauritius) were obtained with the photoheliograph through thin clouds.

The mean rainfall for the whole island in 1908 was 90·06 inches. Heavy rain fell over the whole island during the cyclone of February 28th to March 4th, ranging from 45·42 inches at Curepipe to 9·14 at Port Louis. During the hurricane season observations are exchanged daily with Réunion.

SPECIAL FEATURES IN 1907.

Barometric Pressure.

The barometric pressure decrease, relatively to the normal, which commenced in August, 1907, continued until March, 1908. It then increased till June, again increasing till the end of the year, with, however, a slight increase in September.

The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. — ·068	Ins. + ·007	Ins. — ·001	Ins. — ·035

Air Temperature.

Relatively to the normal, the air temperature decreased steadily from November, 1907, to February, 1908, increased till June and decreased steadily from August to the end of the year. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
— 0·6°	+ 0·6°	+ 0·6°	0·0°

Vapour Tension.

A large positive wave of vapour tension culminated in December, 1907. This element increased generally, relatively to the normal, from February to the end of the year. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Ins. + ·006	Ins. — ·006	Ins. + ·009	Ins. + ·026

Relative Humidity.

The relative humidity departures followed very closely those of vapour tension. The quarterly departures from the average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 1·6	Per cent. – 2·3	Per cent. – 0·3	Per cent. – 2·8

Rainfall.

The principal feature in the rainfall was the large positive wave culminating in June, preceded and followed by partial droughts in May and September. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
Per cent. + 35	Per cent. + 29	Per cent. 0	Per cent. + 7

Wind Velocity.

The wind velocity was above normal in March and July, in the other months it was below. The quarterly departures from average were as follows:—

January–March.	April–June.	July–September.	October–December.
M.p.h. + ·58	M.p.h. – ·29	M.p.h. – ·33	M.p.h. – 1·50

The comparison, mentioned last year, between the records of the Beckley anemometer and those of a smaller instrument which had been previously tested at the Kew Observatory were continued, but gave negative results. They showed, however, that the factor of one or both of the instruments varied to such an extent as to render one or both unfit for the detection of secular variations of wind velocity.

Means and Extremes of Meteorological Elements.

The means and extremes of the various meteorological elements for the year 1908 are given below:—

Element.	Mean.	Highest.	Lowest.
	Ins.	Ins.	Ins.
Atmospheric pressure ...	30·046	30·358	29·097
Air temperature	73·6°	89·1°	53·8°
	Per cent.	Per cent.	Per cent.
Relative humidity	75·5	100	42·1
	M.p.h.	M.p.h.	
Wind velocity...	10·72	60·3	—
Wind direction	S. 73° 54′ E.	—	—
	Ins.	Ins.	
Rainfall	62·43	7·645 (in 24 hous).	—

RESULTS OF MAGNETIC OBSERVATIONS MADE AT THE ROYAL ALFRED OBSERVATORY.

The magnetographs were at work throughout the year, and absolute values of the magnetic elements determined, as a rule, four times a month. The following are the mean results for 1908:—

Declination (west)	9°14′27
Dip (south)	53°44′7
Horizontal force (C.G.S. units) ...	0·23422
Vertical force (C.G.S. units)	0·31937
Total force (C.G.S. units)	0·39605

The principal magnetic disturbances occurred as follows:—March 26-28; August 21-22; September 5-6, 11-12, 29-30; November 8-9, 17-18.

VIII.—POSTAL, TELEGRAPH, AND TELEPHONE SERVICES.

The Postal contract with the British India Steam Navigation Company was renewed in 1908 for another year, for a four-weekly service between Colombo and Mauritius. Besides the British India steamers, mails to and from Europe are conveyed by other British and French steamers. The Messageries Maritimes Company perform their bi-monthly voyages from Marseilles to Mauritius and *vice versâ*, calling at Aden, Zanzibar, Seychelles, Madagascar, and Réunion. The mails for and from the South African ports were conveyed by the Union Castle steamers.

Statement of Letters, Postcards, Newspapers, and Postal Parcels dealt with during the Year 1908.

—	Internal.	External.				Total.
		United Kingdom.		Other Places.		
		From.	To.	From.	To.	
Insured letters	—	3	25	269	50	347
Express delivery	17,770	3	13	2	14	17,802
Postcards	180,200	10,588	8,916	20,963	12,847	235,514
Paid letters	1,623,052	181,230	63,251	235,724	149,829	2,233,086

Registered letters	55,787	2,472	5,080	16,235	16,441	96,015
Official letters	223,892	967	1,627	1,829	1,104	229,419
Newspapers	1,032,399	89,118	12,848	229,909	39,707	1,403,981
Postal parcels	6	3,748	682	7,848	1,344	13,628

There are 331½ miles of telegraph in Mauritius and 55½ miles of telephones (exclusive of private telephone services).

Inland money orders were issued during the year 1908 for a total sum of Rs. 342,260, as against an aggregate sum of Rs. 318,255 during the previous year.

The foreign money orders show the following comparison:—

	Rs.
1908	308,928
1907	333,745

The British postal-order system was extended to Mauritius in 1905. The number of postal orders sold and paid was 1,760 and 1,119 of the value of Rs. 13,954 and Rs. 11,715, respectively.

The number of postal parcels dealt with during the year 1908 was 13,622, excluding 6 inland, as against 16,611 in 1907, showing a decrease in the purchasing power.

The total Post Office expenditure in 1908 was Rs. 153,243, as follows:—

	Rs.
Personal emoluments	108,347
Other charges	44,896
Total	153,243

The total revenue for the year was Rs. 138,588.

The Post Office in Mauritius has to work under difficult circumstances. There are practically four mails a month. But with the exception of the Messageries Maritimes steamers they arrive and leave at uncertain intervals, with the result that the postal staff may for a week or more have to deal only with internal correspondence and then suddenly find itself compelled to sort and distribute the incoming mail on a day when the outgoing mail is leaving. It is, of course, impossible to keep a sufficient permanent staff to deal with such heavy traffic in as short time as could be desired. But every effort is made to satisfy the demand of the public who, under such circumstances, desire to receive and answer their letters at once, and it may be said that the heavy labour is efficiently performed within the short time available.

IX.—RAILWAYS.

The total length of line open is 120 miles, and the total expenditure on capital account has been Rs. 21,559,667. The earnings for 1908 amounted to Rs. 2,220,872, showing a decrease of Rs. 159,703 as against 1907.

The working expenditure amounted to Rs. 1,786,007 in 1908, showing a decrease of Rs. 6,783 as against 1907.

If allowance were made for depreciation and interest on capital, the railways of Mauritius would be working at a heavy loss. The passenger traffic has greatly fallen off, and there is no sign of a recovery. Moreover, much of the rolling stock requires renewal, and the bridges require strengthening. All this involves expenditure which the Colony has hitherto been unable to meet out of revenue.

Consequent on the decrease of passenger traffic, unprofitable passenger trains have been discontinued, and every effort is made to ensure economy. The railway is a necessity to Mauritius, for apart from the fact that the people have built their residences with a view to railway facilities, most of the smaller townships have grown up round the railway stations. The sugar crop could not be harvested or marketed without the railway. The whole question of railway material and of modernisation of rolling stock and working has received, and is receiving, careful consideration.

It is hoped that if the railway were brought up to date the working expenses would be decreased and the profits increased.

X.—RODRIGUES.

The Island of Rodrigues is a dependency of Mauritius, and is governed by Mauritius Law and special Regulations, administered by a magistrate. The population numbers 4,386, nearly all of African descent. The revenue was Rs. 12,989 and the expenditure Rs. 26,728.

There are two schools in the island, with a roll of 268. There is also a hospital and a Government Medical Officer. 132 patients were treated in 1908. The industries are mainly fisheries, cattle rearing, and vegetable growing; some tobacco is also grown. Goats and poultry are exported to Mauritius.

XI.—MISCELLANEOUS.

The financial crisis already described produced anxiety amongst all classes, an anxiety which was increased by several bankruptcies. There was a general feeling of want of confidence, and on the 3rd February, 1908, the Mauritius Commercial Bank, seeing that the holders of current accounts were steadily withdrawing their money, approached the Governor with a view to obtaining assistance. The Commissioners of Currency were, therefore, authorised by warrant of the Governor covered by subsequent legislative sanction to issue one million rupees in notes at ten per cent. interest to the bank. Against this advance security in dock warrants to the amount of Rs. 1,500,000 was deposited with the Commissioners.

The notes were issued on the 4th February, and the whole loan of one million was paid off by the 14th May.

Interest amounting to Rs. 20,493 as well as the cost of telegrams, &c., was paid by the Bank on the 31st August. The transaction may, therefore, be considered to have been very profitable to the Government. The crisis has now completely passed over, and at the time of writing the banks have more money than they can profitably advance.

Ordnance Survey, Southampton, 09.

The following table gives the variation of the prices of sugar for the 12 months ended April, 1909, the standard being what is called crystallised vesous, or Bombay, sugar, a standard somewhat higher than the mean when the inferior sugars are taken into consideration:—

	Rs.
1908—	
May	10 (nominal).
June	10 ,,
July	—
August	8.50 to 8.75
September	8.50 ,, 8.60
October	8.25 ,, 8.50
November	8.25 ,, 9.50
December	9.50 ,, 10.00
1909—	
January	9.00 ,, 9.35
February	9.00 ,, 9.50
March	9.50 ,, 9.75
April	9.50

The mean cost of production of the whole island for all classes of sugars taken together is somewhat over Rs. 6. Taking this as a standard it would be fair to estimate the cost of production of the sugar quoted in the above table at about Rs. 7 though somewhat under that figure.

The following table gives the export of sugar for three years, and the stock on hand on the 31st July, as the crop usually begins about the 1st August. These figures deal with "crop years."

—	Crop of 1908–09.	Crop of 1907–08.	Crop of 1906–07.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1909.

I.—FINANCIAL.

General Revenue and Expenditure.

Revenue.

The Revenue for the financial year 1908–09 amounted to Rs. 8,824,464 which was Rs. 1,008,406 less than the estimate and Rs. 101,737 more than the revenue of the previous year.

The following is a comparative statement showing the actual revenue collected during the financial years 1907–08 and 1908–09.

Heads of Revenue.	1907-8.	1908-9.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.
1. Customs	2,987,013.77	3,225,510.52	238,496.75	—
2. Harbour	236,591.88	234,855.39	—	1,736.49
3. Licenses, Excise, &c...	1,999,922.37	1,846,840.91	—	153,081.46
4. Fees of Court, &c. ...	371,586.62	355,933.17	—	15,653.45
5. Post and Telegraphs...	148,286.59	131,499.10	—	16,787.49
6. Railways	2,039,326.26	2,070,698.84	31,372.58	—
7. Rent	54,497.25	67,448.94	12,951.69	—
8. Interest	822,676.64	858,887.66	36,211.02	—
9. Miscellaneous ...	62,089.10	32,125.41	—	29,963.69
Total Rs....	8,721,990.48	8,823,799.94	319,032.04	217,222.58
10. Land Sales	736.71	664.22	—	72.49
Total Rs....	8,722,727.19	8,824,464.16	319,032.04	217,295.07
Net increse ...	—	—	—	101,736.97

There were deficiencies on the estimated revenue of Rs. 240,000 in Import Duties, of Rs. 41,000 in Port and Harbour Dues, of Rs. 496,000 in Licenses, Excise and Internal revenue, of Rs. 229,000 in Railway receipts and of Rs 48,000 under the Head "Miscellaneous," making altogether a deficiency of over a million rupees. Under the Head, Interest, there was an excess of revenue over the estimate of Rs. 46,000, due to the payment of interest on a temporary loan made during the previous year and to the payment of an additional instalment by the Loan Commissioners.

As compared with 1907–08, there were increases of Rs. 238,000 in Import Duties, of Rs. 31,000 in Railway receipts, of Rs. 12,952 in rents from Government Property and of Rs. 36,000 under Interest. Under other Heads there were decreases, the largest being Rs. 153,000 in revenue derived from Licenses and Excise. The causes which have led to a shortage in the revenue during the years 1907–08 and 1908–09 and to a general depression in Commerce have been fully explained in the report for the former year and in other public documents.

There was on the 30th of June 1908 a surplus balance of Rs 197,022 and on the 30th June, 1909 a net deficit of Rs. 599,968, the expenditure having exceeded the revenue for the year by Rs. 796,990. The accounts for the year ended 30th June, 1909 are the latest completed accounts, but since that date there has been a marked improvement in the yield of revenue from all sources and especially so under Import Duties, Licenses and Excise and Railway receipts. The actual encashments have exceeded the estimates, and after meeting the expenditure for the year and the deficit with which it opened, a surplus cash balance of considerable amount will remain.

Expenditure.

The expenditure for the year 1908–09 amounted to Rs 9,621,454 or Rs. 245,020 less than the estimated expenditure. Owing to the shortage in the revenue the most rigid economy was exercised and the expenditure, wherever possible was curtailed. There were savings on the Estimates of Rs. 93,000 under the votes controlled by the Medical Department, of Rs. 63,000 under Military Expenditure, of Rs. 35,000 under Public Works Recurrent and Rs. 69,000 under Public Works Extraordinary, giving, with savings of Rs. 150,000 under other votes a total saving of nearly Rs. 400,000.

The saving of Rs. 93,000 under Medical Department votes included a saving of Rs. 38,710 on the amount provided for Plague Services, the number of cases recorded during the year being the lowest since the first outbreak of Plague in 1899. The other economies were effected by reductions in the staff and by the strictest economy in departmental expenditure. A readjustment of the Military contribution paid in excess during the previous year and the revenue falling short of the estimate, accounted for the decreased expenditure under that Head. Works which had been provided for were deferred and the expenditure incurred on Cave's Point Lighthouse was less than the estimate owing to the lantern not being delivered within the year.

It was necessary to appropriate additional sums of Rs. 75,000 under Head Poor, of Rs. 44,000 on Railways and Rs. 33,000 on other services. The Poor Law Commissioner attributed the increased expenditure on relief to the general depression and its effect on the labour market. Delay in the delivery of Locomotive Boilers ordered in the previous year and urgent repairs to much deteriorated rolling stock caused the excess on the Railway expenditure.

The following is a comparative statement of expenditure for the years 1907–08 and 1908–09:—

Heads of Service.	1907–8.	1908–9.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. C.
1. Charge on account of Public Debt	1,231,550.80	1,273,817.16	42,266.36	—
2. Pensions	609,364.23	597,353.73	—	12,010.50
3. The Governor & Legislature	95,117.71	94,345.70	—	772.01
4. Colonial Secretary's Depart.	64,013.03	56,791.64	—	7,221.39
5. Receiver General's Depart.	175,518.71	158,341.85	—	17,176.86
6. Customs Department ...	127,613.31	123,364.18	—	4,249.13
7. Auditor General	58,356.85	57,492.74	—	864.11
8. Port & Marine Department	174,127.88	180,516.21	6,388.33	—
9. Meteorological Observatory	20,677.77	20,932.26	254.49	—
10. Public Library & Museum	9,343.55	8,154.65	—	1,188.90
11. Registrar General	16,874.80	15,675.35	—	1,199.45
12. Registration & Mortgage Office	42,612.32	40,854.95	—	1,757.37
13. Archives	7,264.14	7,313.56	49.42	—
14. Supreme Court	126,268.48	127,831.50	1,563.02	—
15. Procureur General ...	75,774.98	76,228.91	453.93	—
16. { District Magistrates ...	231,782.78	228,385.59	—	3,397.19
{ Stipendiary Magistrates	31,099.55	33,080.71	1,981.16	—
17. Ecclesiastical	152,712.81	152,688.70	—	24.11
18. Police	552,505.17	549,434.85	—	3,070.32
19. Prisons	187,193.97	181,583.13	—	5,610.84
20. Reformatory	17,654.31	18,733.08	1,078.77	—
21. Medical & Health Depart.	801,937.92	760,327.82	—	41,610.10
22. Quarantine...	9,698.47	10,381.15	682.68	—
23. Plague	132,162.02	113,426.46	—	18,735.56
24. Royal College	217,500.56	215,338.67	—	2,161.89
25. Primary Education ...	407,551.15	412,358.45	4,807.30	—
26. Poor	259,405.79	282,809.99	23,404.20	—

Result— Net decrease ...	—	—	—	231.555.52

Assets and Liabilities.

The assets of the Colony on the 30th. June, 1909 were Rs. 2,365.414 and the liabilities Rs. 2,965,382. The liabilities thus exceeding the assets by Rs. 599,968.

The Assets included :—

	Rs.
Cash in the hands of the Receiver General	68,765
Investments	650,252
Miscellaneous Advances	403,935
Advances on account of loan authorized for mechanical transport (Ordinance No. 34 of 1902)	1,242,461

The chief liabilities were :—

General Deposits	1,970,515
Loan Funds, unexpended	43,507
Advances made by the Crown Agents	937,500

Public Debt.

The total indebtedness of the Colony on the 30th of June, 1909 was £ 1,305,990 and the Sinking Funds amounted to £ 266,458, leaving a nett debt of £ 1,039,532.

In 1894 the nett debt was £ 1,147,409 and approximately two and a half times the annual revenue of £ 471,172. The nett debt on the 30th of June, 1909 was less than twice the revenue for the year.

Under Ordinances No. 10 of 1876, No. 10. of 1879 and No. 2 of 1887 outstanding debentures are redeemed by annual drawings. Provision is made for the repayment of other loans by means of a sinking fund.

The raising of a loan of £ 70,000 for the purpose of making advances to Planters to assist them in substituting mechanical for animal transport on their estates was authorised by Ordinance No. 34 of 1902. The loan was not raised but advances were made partly from Treasury balances and partly from temporary advances obtained from the Crown Agents.

Currency and Banking.

The Currency of the Colony consists of :—

(1) The following Mauritius Bronze and Silver coins which are legal tender up to Rs. 5.

(a) Bronze : 1 cent, 2 cents, 5 cents.
(b) Silver : 10 cents, 20 cents.

(2) The Silver rupee of India with its silver subdivisions.

(3) Mauritius Government notes of Rs. 50, Rs. 10 and Rs. 5

On the 30th of June, 1909 the value of Currency notes in circulation was Rs 3,892,250. The specie held amounted to Rs 1,572,000 and the Investment and Depreciation Funds to Rs 2,320,250 and Rs 249,116 respectively.

The Banks which do business in the Colony are the Bank of Mauritius Limited and the Mauritius Commercial Bank.

MUNICIPALITY OF PORT LOUIS.

The following is a comparative statement of the Revenue and Expenditure of the Municipality of Port Louis for the five years 1905 to 1909 :—

Year.	Revenue. Rs.	Expenditure. Rs.
1905	548,139	492,785
1906	537,366	510,588
1907	512,172	502,916
1908	476,130	500,776
1909	484,841	476,448

The indebtedness of the Municipality up to the end of the year and the provision for payment are shewn below :—

Loan.	Amount.			Repayments to be made in 1910.		
	£	s.	d.	£	s.	d.
Conversion Loan	115,100			1,900		
Electric Lighting Loan ...	8,666	13	4	333	6	8
Municipality Loan	3,857	8	4	142	17	2
Municipality Loan	5,000	0	0	178	11	5
	132,624	1	8	2,554	15	3

	Rs.	Rs.
Government Hurricane Loan, 1892	64,646.21	7,016
Grand River Bridge Loan ...	4,000.00	2,000
Manure Factory and Night Soil Service Loan...	14,000.00	2,000
Municipality Loan, 1903	18,000.00	2,000
	100,646.21	13,016

LOCAL BOARDS.

There are Boards of Commissioners for the Towns of Curepipe, Beau Bassin and Rose-Hill and Quatre Bornes which are entrusted with the general improvement and conservancy of these towns.

The Board of Curepipe receives the amount of taxes on horses and vehicles collected in the town and licences paid by the traders and others. The Board may also levy a tax not exceeding one per cent on house property. The two other Boards receive the amount of the taxes paid by traders and others in the towns and may also levy a similar tax on house property.

The following table shews the revenue and expenditure of the Boards for the past five years :—

CUREPIPE.

——	1904–5.	1905–6.	1906–7.	1907–8.	1908–9.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	68,934	65,776	67,496	79,331	73,759
Expenditure	67,729	64,740	66,885	75,659	72,516

BEAU BASSIN & ROSE HILL.

——	1905.	1905-6.	1907-8.	1908-9.	1909-10.
	Rs.	Rs.	Rs,	Rs.	Rs.
Revenue	26,645	26,831	30,995	37,044	33,541
Expenditure	28,187	25,783	30,164	37,695	33,476

QUATRE BORNES.

——	1905.	1905–6.	1906–7.	1907–8.	1908–9.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	12,549	13,202	12,957	13,815	13,842
Expenditure	12,572	12,416	12,800	13,865	13.508

Below will be found a statement of the debts of the Boards :—

Curepipe Board	Net Amount of Debt	Rs. 68,500
Beau Bassin and Rose Hill	„	„ 8,600
Quatre Bornes*	„	„ nil

There is a District Board for each of the eight rural districts of the Island. To them are entrusted under Ordinance 9 of 1900 the maintenance of the branch Roads.

---

* The indebtedness of the Board of Quatre Bornes is incorrectly shewn in the Blue Book as amounting to Rs. 615.

They receive as revenue a contribution from Government equivalent to 10 o/o of the direct taxes collected in each District during the year and an addition of 10 o/o to the direct taxes to be levied in each year in each district exclusive of Port Louis and the Townships. The additional 10 o/o to be levied on the direct taxes may be increased to 25 o/o subject to the approval of the Governor in Executive Council. The Government contribution amounted in 1908-09 to Rs 10,000.

The powers of the District Boards were extended by Ordinance No 35 of 1902 to include the construction, maintenance and management of water works. For this purpose they receive an annual contribution from Government which in 1908–09 amounted to Rs 76,000 and also the proceeds of water rates and of charges paid for water supplies.

II.—TRADE, AGRICULTURE, AND INDUSTRIES

Imports and Exports.

The aggregate value of Imports and Exports, excluding specie, for the years 1908 and 1909 was as follows :—

	1908	1909
Imports ... ...Rs.	26,199,606*	Rs. 27,013,970
Exports	33,691,381	34,424.923
	59,890,987	61,438,893

The value of Imports from and Exports to the United Kingdom, British Possessions and Foreign Countries during the same years is shewn below, (specie and unclassified goods are not included):—

—	Imports.		Exports.	
	1908 unit Rs. 1,000	1909 unit Rs. 1,000	1908 unit Rs. 1,000	1909 unit Rs. 1,000
United Kingdom ...	6,618	7,431	3,888	4.316
British Possessions ...	13,219	12,282	29.210	29,667
Foreign Countries ...	6,325	7,281	589	441
Total ...	26,162	26,994	33,687	34,424

---

* The figures given in the Blue Book report for 1908, viz : Rs. 27,651,045 have since been corrected : they should be as now given.

The following tables shew the percentage of Imports from and Exports to the United Kingdom, British Possessions and Foreign Countries during each of the last five years :—

Imports.

From	1905	1906	1907	1908	1909
United Kingdom	28.1	30.8	27.8	25.3	27.5
British Possessions	48.9	49.4	49.7	50.5	45.5
Foreign Countries	23.0	19.8	22.5	24.2	27.0

Exports.

To	1905	1906	1907	1908	1909
United Kingdom	7·3	8.1	16.0	11.5	12.5
British Possessions	90.3	86.4	79.7	86.7	86.2
Foreign Countries	2.4	5.5	4.3	1.8	1.3

It will be observed that Mauritius continues to send almost the whole of its produce to the United Kingdom and British Possessions, the combined imports from which have steadily diminished since 1906 and that in 1909 the imports from Foreign Countries almost equalled those from the United Kingdom. A large part of the increased importations from Foreign Countries, is, as is later shown, due to the increased imports of rice from non-British India.

With the exception of goods which are regarded as the peculiar speciality of particular countries preference is shown for British goods with a guarantee of quality even at higher prices and when articles of good quality do not exist others readily acquire a transitory and fictitious reputation at the cost of the uneducated purchaser. There is room for effort on the part of the British manufacturer to place his goods on the market in an attractive form and a peculiarly mixed population demands a varied selection. The local market is not overworked. In 1909 only one Commercial traveller deposited samples at the Customs House. He represented a foreign firm and travelled in haberdashery perfumery and confectionery. The value of haberdashery imported in 1909 was approximately Rs. 600,000 of which only Rs. 200,000 was of British origin.

The Customs revenue shewed an increase of Rs. 405,858 as compared with 1908 and the chief articles contributing to the revenue in 1909 were :—

Tobacco and Cigars	Rs. 705,000
Grain (including Rice, dholl &c)	525,000
Cotton manufactures	160,000
Wines	160,000
Spirits	100,000
Matches	99,000
Petroleum Oil	92,000

The Export duty on sugar yielded Rs. 573,000.

Imports.

The value of the imports in 1909 was greater by Rs. 800,000 than in the previous year.

The largest increases occur under the following heads.—

	Rs.
Cotton manufactures	460,059
Iron and steel...	489,812
Mechanical Transport (part of above) ...	271,616
Haberdashery	152,906
Wines and spirits	128,812
Wearing apparel	77,756
Tobacco and Cigars	74,793

The articles in which these increases occur indicate a general improvement in trade and a growing demand for more than bare necessities to which a succession of adverse circumstances had limited requirements in the two previous years.

The increases in the value of importations under Heads Machinery and Mechanical Transport are of importance. The machinery is mainly that required for sugar factories and the form of mechanical transport generally adopted is the light tramway. All the large estates are provided with such tramways and permission is granted by Government to run the tramways along the public roads so that the road tractor is comparatively little used. The construction of these tramways, begun in 1903, has been extended year by year until the total length on estates and roads approximates 700 miles.

The profits of the sugar crop of 1909-10 were not realised in time to permit of large importations before the close of the year but the rise in the importations in 1909 is indicative of considerable expenditure on improvements in the machinery of sugar mills and on increased facilities for transport on the estates which the abnormally heavy traffic on the railway in the succeeding months proves to have been incurred.

The following tables give the value of the importations and the country of origin under the Heads Machinery and Mechanical Transport during the years from 1905 to 1909 :—

Machinery.

Country.	1905.	1906.	1907.	1908.	1909.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
United Kingdom..	251,003	382,164	437,528	252,354	329,155	1,650,204
France	13,193	19,807	23,201	6,943	18,616	81,760
Germany... ...	...	7,831	9,307	3,439	...	20,577
Belgium	900	235	2,782	1,728	867	6,512
Other Countries...	3,332	...	...	...	810	4,142
Total ...	268,428	410,037	472,818	264,464	349,448	1,763,195

Mechanical Transport.

Country.	1905.	1906.	1907.	1908.	1909.	Total.
	Rs.	Rs.	Rs,	Rs.	Rs.	Rs.
Germany... ...	132,936	251,419	240,726	50,681	210,402	886,164
Belgium	42,795	66,795	92,429	1,233	62,696	265,948
United Kingdom..	...	...	14,454	13,920	59,726	88,100
France	18,021	15,093	14,082	1,707	15,219	64,122
United States ...	...	...	...	8,887	...	8,887
Total ...	193,752	333,307	361,691	76,428	348,043	1,313,221

It will be seen that the machinery is almost entirely of British make while the locomotives, wagons rails and sleepers for tramways, which are supplied at cheap rates and on easy terms of payment, are of foreign origin. Given a reasonable profit on the present crop, which is already practically assured, there is every probability of an immediate demand both for machinery and tramway materials which will be continued in succeeding years. The British manufacturer will in all probability retain without great effort the trade in machinery but there is no reason why he should not have a large share of the trade in tramway materials if he will make a bid for it.

As compared with 1908 there were decreases in 1909 in the value of importations of Rice (Rs. 380,000), Other grain (Rs. 281,000) and Coal (Rs. 237,000).

The importations of Rice from British India decreased by Rs. 575,000 while those from Non-British India increased by

Rs. 695,000. There were small importations from Non-British India in 1907 amounting to Rs. 40,000, they rose to Rs. 1,060,000 in 1908 and to Rs. 1,755,000 in 1909. The decrease in the importations from British India is due to scarcity of rice and high prices.

The following table shews the countries which export goods to Mauritius and the value of the goods exported exclusive of specie in the years 1908 and 1909 :—

Country	Exports to Mauritius.	
—	1908	1909
British India	Rs. 10,756,870	Rs. 10,307,800
United Kingdom... ...	6,618,181	7,431,356
France	1,926,781	2,402,077
Indo China	1,060,265	1,756,409
Australia	607,299	857,627
United States	540,743	732,423
Madagascar	1,134,086	659,844
Germany	203,204	530,001
Natal	936,827	471,599
Cape Colony	488,312	295,012
Belgium	108,324	286,013
Reunion	233,912	236,661
China	61,041	153,150
Singapore	138,868	128,812
Sumatra	183,483	49,735
Seychelles	109,801	37,642
Chili	269,412	...
Argentine Confederation...	189,652	...

The United Kingdom, British India or British Possessions are the largest suppliers of wearing apparel, bacon, gunny bags, beer in casks and bottles, books, bran, chemicals for manures, cement, coal, confectionery, dholl, gram, oats, rice, flour, cotton, salt fish, ghee, hardware and cutlery, iron nails, wrought iron, boots and shœs, machinery for local industries, manure (bone), provisions preserved, salt, soap, whisky, stationery,* tea, tin, umbrellas (cotton), shooks, sleepers, timber, woollen goods.

Foreign countries are the largest suppliers of apothecaries' wares, oxen, butter, candles, clocks and watches, enamelled ware, glassware, haberdashery, indiarubber ware, jewellery, light tramway wagons, locomotives and materials, matches, motor cars, Petroleum, cigarette paper, perfumery, potatoes, satin and ribbons, brandy, gin, wine, sulphur, tobacco and cigars, toys, umbrellas (silk), woollen blankets.

---

* The importations of stationery from the United Kingdom are principally for Government services. Most of the stationery on sale in the local shops is of foreign origin and of very inferior quality.

Exports.

The total value of the exports, excluding specie but including charges, was in 1908 of Rs. 33,691,381 and in 1909 of Rs. 34,424,923. The following table shews the value and the destination of the products of the Colony, other than sugar, which were exported in 1908 and 1909.

Product	Year	Exported to		
		United Kingdom	British Possessions	Foreign Countries
		Rs.	Rs.	Rs.
Molasses ...	1908	......	418,209	3
	1909	......	702,019	...
Rum ...	1908	59,118	15,825	1
	1909	31,144	12,549	1
Aloe Fibre..	1908	555,671	......	67,985
	1909	464,583	8,509	57,605

Sugar.

The following table shows the principal countries to which sugar was exported during the calendar years 1908 and 1909 :—

Country	1908 kilos.	1909 kilos
British India...	137,827,008	116,332,244
United Kingdom	19,103,463	20,261,528
British Columbia	8,694,703	15,762,892
Cape Colony ...	20,735,984	12,152,321
Australia ...	2,803,110	3,456,004
Hong-Kong ...	...	3,010,162
Delagoa Bay ...	1,241,579	510,321
France ...	6,525	508,906
Aden ...	222,427	387,682
Natal ...	1,569,573	288,208
British East Africa	53,055	93,625
Ceylon ...	20,302	50,517

Agriculture.

The crop year for sugar begins on the 1st. of August and ends on the 31st. of July of the following year and for the purpose of comparison of the crops it is convenient to maintain this distinction.

Exceptionally favourable climatic conditions resulted in a sugar crop far in excess of that of any previous year, the largest crop previously recorded being 215,697 tons in 1903. Large yields of cane were obtained all over the island and the heavy and well distributed rainfall allowed the planters to reap the full benefit of the " intensive " methods of cultivation adopted in recent years. The use of cane and mill residue as fertilizers steadily increases with beneficial results and the value of manures and chemicals annually imported exceeds Rs. 2,000,000. The total crop of 1909, exclusive of local consumption was 246,560 tons* which figure is arrived at in the following manner :—

		Tons.*
Exports 1st. August 1909 to 31st. July 1910 ...		235,184
In Store on 31st. July 1910	151,806 bags	
„ „ 1909	6,187 „	
Add balance in Store, (145,619 bags × 78.12 kilos average weight of 1 bag)		11,376
Total Crop, 1909 ... ... Tons*		246,560

The average selling price as determined by the Chamber of Agriculture was approximately Rs. 8.50 per 50 kilos giving to the crop a monetary value of about 42 millions of rupees and on the assumption that the cost of producing 50 kilos of sugar is about Rs. 6.00, leaving a profit of nearly 12½ millions of rupees.

The corresponding figures for the last five years are :—

	Total Produce Tons*	Monetary Value unit Rs. 1,000,000.
	—	—
1904–5	142,253	27.5
1905–6	186,007	26.0
1906–7	214,699	28.3
1907–8	163,911	24.9
1908–9	191,491	28.7

There were two developments during the year which had an appreciable effect on the local market. Considerable shipments of white crystals were made to London and the direct shipment of sugar to India was undertaken by European firms.

The favourable prices realised for sugar towards the end of the year appear to have given an impetus to the cultivation of the cane on both large and small estates and as a result there were complaints of scarcity of labour for field work in connection with the coming crop.

---

* Metric ton = 1,000 kilogrammes.

The heavy yield of cane and the high prices obtained have somewhat diverted attention from other industries. There is a tendency to extend the plantations of aloe and to rely less on the product of uncultivated lands. The selling price of aloe fibre was approximately Rs. 277 per ton as compared with an average cost of production of Rs. 188, leaving a profit per ton of Rs. 88. Other industries such a tea, vanilla, maize and tobacce show no development. The quantity of tea imported in 1909 was 47,392 kilos as compared with 47,244 kilos in 1908 indicating that the local production has not materially increased.

A comparison of the number of deaths from surra declared to the Sanitary Authorities shows that the epizootic is steadily declining.The number of fatal cases recorded in 1907 was 306, in 1908, 192 and in1909,158.The cases declared only form part of the total number of cases which occur, but they afford the only basis of estimating the prevalence of the disease in the years to which they refer. Investigation of the disease has been assiduously continued by the Director of the Bacteriological Laboratory.

Shipping.

The following table shews the number and tonnage of the vessels which entered Port Louis in 1908 and 1909 :—

Nationality.	1908.		1909.	
	Number.	Tonnage.	Number.	Tonnage.
British	136	258,237	140	272,964
French	47	103,063	44	93,534
Norwegian	16	12,691	6	7,429
German	3	7,763	1	4,236
Swedish	1	2,044	...	...
Total... ...	203	383,798	191	378,163

In the report for 1908 the total number and tonnage of vessels entered and cleared which are engaged in Trade with the Dependencies were shewn as 48 of an aggregate tonnage of 11,624 in 1907 and as 47 of an aggregate tonnage of 15,458 in 1908. There are one steam vessel of 1,073 tons and 4 or 5 sailing vessels which are engaged in this trade. The steam vessel is under contract with Government to carry mails to and from Rodrigues, to which it made 5 voyages in the course of the year.

The Harbour dues collected in 1909 amounted to Rs. 266,815 as compared with Rs. 252,063 in 1908, shewing an increase of Rs. 14,752. By Ordinance No. 28 of the 14th. December 1909 the anchorage charges were reduced from 23 cents a ton to 8 cents on vessels calling for bunker coal. Since this reduction in the rates and up to the time of writing 17 vessels of a total tonnage of 47,147 have called to coal as compared with 5 vessels of a total tonnage of 13,477 during the 12 months immediately preceeding the reduction in the rates.

III.—LEGISLATION.

Among the more important legislative measures of the year 1909, are the following :—

The License Law (Vegetables and Fruits) amendment Ordinance (No. 2) amends the license law with the object of encouraging market gardening.

The Minors Mortgage (Amendment) Ordinance (No. 3) gives power to the Supreme Court to order the erasure of an inscription of the Minor's legal mortgage burdening an immoveable property which it may be in the interest of all concerned to erase.

The Defaced Silver Coins Ordinance (No. 4) adapts to the Colony the relevant provisions of the Indian Coinage Act, 1906. The measure originated in the attention of the Government being called in 1907 by the Banks to the large number of soldered rupee coins in circulation.

The Royal Commission Ordinance (No. 9) gives full powers to the Royal Commissioners appointed by His Majesty to enquire into the conditions and resources of the Colony. The Ordinance is modelled on the lines of The Commissioners (Examination of Witnesses) Ordinance No. 19 of 1897.

The Children and young Persons (Abolition of Death sentence) Ordinance (No. 13) is a measure borrowed from section 103 of the Children Act. 1908 (8 Edward VII C. 67), providing for the abolition of death sentences in the case of children and young persons, the age limit is that fixed by the Imperial enactment.

By the Electric Light and Power Amendment Ordinance (No. 17.—(a) powers of control are given to the Director of Public Works over the technical nature of any intended electrical undertaking and works connected with it. (b) power is taken to define " pressure " by regulation, (c) powers of appeal to the Governor in Council are extended, and (d) power is given to an undertaker to control and inspect within reasonable bounds, the installation of a consumer.

The Bench Jurisdiction Extension Ordinance (No. 18) places within the jurisdiction of the Bench of Magistrates offences under articles 122 and 123 paragraph 2 of the Penal Code (embezzlement committed by public depositaries and accountants, and by clerks or servants of the Government or of public depositaries) and under article 249 paragraph 2 (indecent assault), which were hitherto within the exclusive jurisdiction of the Assize Court with a jury, no matter the comparative unimportance of the case.

The Quarantine Amendment Ordinance (No. 23) improves the definition of " healthy vessel " under the quarantine laws of the Colony so as to allow any ship producing evidence that she has worked in quarantine at any infected port, to be admitted to pratique on her arrival in the Colony, whether she has taken cargo or not at that port, provided that she otherwise comes within the definition of a healthy vessel.

The Harbour Dues Amendment Ordinance (No. 28) reduces the anchorage dues on steamers entering the harbour for the exclusive purpose of coaling from R. 0.23 to R. 0.08 per ton register, (with a proviso charging an additional due of R. 0.05 per ton register for every subsequent 12 hours or part of 12 hours day-light over and above a period of 24 hours, up to the maximum charge of 23 cents of a rupee provided by the main enactment).

The Penal Code Amendment Ordinance (No. 29) corrects various clerical errors in Ordinance No. 22 of 1901, and at the same time introduces into the Colony the principles of the English law on seditious libel. It also adds a provision against the compounding of offences on the lines of that existing in the Indian Penal Code.

The Criminal Evidence Ordinance (No. 30) enacts the excellent provisions of the Criminal Evidence Act. 1898 (61 and 62 Victoria C. 36.)

The Bankruptcy (Amendment) Ordinance (No. 32) makes Agents of firms carrying on business in the Colony on behalf of non-resident principals, criminally responsible for their own acts when such acts in the case of a principal are fraudulent under the Bankruptcy law. The word " debtor " is defined with a view to meet the decision of the House of Lords in the case of Cooke and the Charles A. Vogeler Company (1901) A. C. 102. Power is taken in the Ordinance to reach criminally principals or their agents, who on the eve of bankruptcy sell their stock in trade at low prices with intent to defraud their creditors. The definition of a bankrupt's property, which is not divisible among his creditors, is amended with a view to restrict the inclusion of property obtained within one month prior to the petition. The amount of small bankruptcies is for purposes of summary procedure fixed at Rs. 5,000 and the procedure in prosecutions in minor cases is simplified, such cases being placed within the jurisdiction of the District Magistrates.

IV.—EDUCATION.

Primary Education.

The Primary schools at the end of the year 1909, numbered 152 of which 64 were Government and 88 Aided Schools. There is a decrease of 3 in the number of Government Schools as compared with the previous year, due to the amalgamation of separate schools for boys and girls in the same locality. The amalgamation has resulted in strengthening the Staff and reducing expenditure. Of the Aided Schools there were 66 Roman Catholic, 19 Church of England, 2 Presbyterian and 1 Mahomedan.

The number of Primary Schools, Government and Aided, and the number of pupils for the years 1905 to 1909 is shown in the following table :—

	Government Schools.			*Aided Schools.*		
Years.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.
1905	66	8,510	4,798	88	9,374	6.112
1906	67	8,919	5,491	88	9,807	6.491
1907	67	8,615	5.670	90	10.367	6,918
1908	67	8,359	5,242	88	10,226	6,779
1909	64	8,634	5.433	88	10,651	7,234

The average attendance in Government and Aided Schools for the year was 12,667 with a roll of 19,285 showing the low average attendance of 65.6 o/o of the number of pupils on the roll.

The number of Indian children attending the Primary Schools in 1909 was 7,125 a slight increase as compared with the previous year but the parents are disinclined to send their girls to school and their boys are continually on the outlook for casual employment. The age at which a minor may enter into a written contract of labour was in 1908 raised from 10 to 13 years. Endeavours to establish half time schools have not proved successful.

The examination results show as compared with 1908 a decrease in the number of passes in the Obligatory subjects (Reading, Writing and Conversation in English and French and Elementary Arithmetic) and the percentage of passes declined from 62 to 57.59. Candidates from Aided Schools shewed great weakness, in Arithmetic as an optional subject only 8 o/o of those who were presented for examination succeeding in passing.

The total expenditure for the year on the salaries of and grants to Teachers in Primary Schools amounted to Rs. 326,625 of which

Rs. 162,334 was expended on Government Schools and Rs. 164,291 on Aided Schools.

The figures for 1908 were Rs. 337,353., Rs. 170,312 and Rs. 167,041 respectively. The cost to Government of a pupil in a Government school was Rs. 20.55 and in an aided school Rs. 15.42 as compared with Rs. 22.24 and Rs. 16.33 in 1908. The decrease is attributable to a raising of the standard and to other measures resulting in economy.

There are open annually to pupils of Primary Schools six scholarships and six exhibitions at the Royal College for which there is keen competition. The exhibitioners receive free tuition and the scholars free tuition and an allowance of Rs. 100 a year. There were 131 candidates in 1909.

Secondary Education.

Secondary Education is provided by the Royal College, two schools in connection with it and 22 associated schools of which 17 presented pupils at the Annual Examination. There were in December 1909, 203 pupils at the College, 124 at Curepipe School and 62 at Port-Louis School. Of the 389 pupils at the College and its two schools, 136 did not pay fees.

There were 12 candidates for the London Matriculation Examination in 1909. Of the 9 candidates from the College 5 passed, one being placed in the 1st division.

There were 83 candidates for the Senior Cambridge Examination, 32 out of the 82 candidates from the College passed, one obtaining honours in the 2nd Class and one in the 3rd Class.Out of 16 candidates for the Junior Cambridge Examination 10 passed.

There are scholarships and exhibitions in all the classes of the College and there are two valuable scholarships to enable pupils of the College to continue their studies in Europe.

There are 23 girls' schools which are affiliated to the Royal College in connection with the scheme for the Higher Education of Girls. The number of candidates who were presented for examination was 359 of whom 151 obtained Honours Certificates and 33 Pass Certificates. Eleven girls entered for the Senior Cambridge Local Examination of whom 2 passed. Eleven entered for the Junior Examination of whom 7 passed. The total sum expended in 1909 on the Higher Education of Girls was Rs. 8,018.

Training of Teachers.

There are Government Training schools for men and for women. There were 7 candidates from the Men's Training School for the Second Class Teacher's Certificate of whom four passed and the only candidate for the third Class Certificate also passed. There were 4 candidates from the Women's Training School for the second class certificate, none of whom passed.

The following table shews the number of candidates for certificates and the number who passed during the year :

Class of Certificate.	Candidates.			Successful.		
	Men.	Women.	Total.	Men.	Women.	Total.
Second	34	8	42	12	1	13
Third	48	29	77	12	5	17
Monitors'	134	97	231	14	18	32
Total	216	134	350	38	24	62

There are 584 certificated Teachers employed in Government and Aided schools of whom 154 are Head Teachers, 143 Assistant Teachers and 287 Monitors.

In 1908 it was found necessary for purposes of economy to defer arrangements then made for giving instruction in Hygiene in the Primary Schools but this subject will now be included in the Scheme of work and the teachers, who qualified in 1908 to teach it, will be eligible to earn grants for the pupils whom they pass. A course of lectures was delivered by the Director of Forests and his Assistants at the Curepipe Gardens to Teachers of Primary Schools on the principles of Agriculture. The course was largely attended and has awakened the interest of the teachers in this important branch of instruction.

Technical Education.

There are eight mechanical engineering apprenticeships for which there were 131 candidates in 1909. There are two agricultural apprenticeships for which there were 36 candidates and two egineering studentships for which there were 4 candidates.

Needlework receives attention in Girls' schools and the work of the pupils shews a marked improvement. Fifty three candidates entered for the needlework competition to four of whom apprenticeships were awarded.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Dispensaries.

There are 13 hospitals including 5 in connection with the Prisons and Reformatory and there are 28 dispensaries. There is in addition a hospital ward attached to the Lunatic Asylum. The number of admissions to all hospitals was 23,205 in 1909 as compared with 27,751 in 1908 and 23,355 in 1907. The case mortality remained practically the same as in 1908 being 5.83 o/o. The number of cases treated at the dispensaries has risen from 55,635 in 1907 to 69,593 in 1909, but perhaps the increase is not so much due to sickness being more prevalent as to the inclination of the poorer classes to more frequently seek medical advice at these institutions for minor ailments for which dispensary treatment would not have been sought in former years.

Lunatic Asylum.

There is a Lunatic Asylum and a lunatic ward in connection with the Barkly Asylum which is under the Poor Law Commissioner. There were 430 patients in the Asylum on the 31st of December 1909 as compared with 431 on the corresponding date of the previous year but the daily average for the year of 427.30 showed a decrease of 6.65. The decrease in the daily average number of male patients was 5.1 as compared with a decrease of 1.55 in the daily average of females. The total number of certified lunatics in the Colony including patients on probation and patients in the Lunatic ward of Barkly Asylum was 625 giving a proportion of one insane to 600 of the population.

Poor Relief.

Barkly Asylum is the only institution under the direct control of the Poor Law Commissioner at which paupers receive in-door relief. There are in connection with it and under the control of the Medical Department a hospital ward and a lunatic ward. The number of paupers who were maintained or treated at Barkly Asylum during the year 1909 was 789 but to a very much larger number, indoor relief in various forms was afforded. The number of paupers who received treatment at the public hospitals was 18,912 and at the Lunatic Asylum 501. Arrangements also exist with various religious institutions for the maintenance of sick and infirm paupers at fixed rates and there is an asylum for pauper lepers which is not a Government institution but in which the patients are maintained at the public expense. The paupers who received indoor relief in one or other of these forms and the cost of whose maintenance forms the larger part of the expenditure of the Poor Law Department numbered 21,778 during the year 1909.

The recipients of outdoor relief during the year are shown as numbering 65,578 of whom 61,706 were treated at public dispensaries and 3,872 received alimentary or pecuniary relief. It is not shown what number of paupers in receipt of alimentary or pecuniary relief also received free treatment at public dispensaries or on how many occasions such treatment was received by each person.

The proportion per 1,000 of the general population and of the Indian population who have received relief during the last five years is shown below :—

Year	General population	Indian population
1905	28.3	6.2
1906	24.6	5.9
1907	26.2	6.2
1908	35.2	8.9
1909	38.3	9.0

Though proportionately less than in the case of the general population there is since 1906 a steady rise in the numbers of the Indian population who have received relief and it is noticeable that in recent years the number of the Indian population who have received outdoor relief has increased as compared with those who have received indoor relief.

The total number of persons receiving relief during 1909 are returned as 87,356 as compared with 88,995 in 1908. These figures show that the expenditure of the Poor Law Department only represents a portion of the total expenditure incurred on relief to the poor. It is difficult to determine exactly the expenditure of the Medical Department on gratuitous treatment in the hospitals and at the dispensaries but it is estimated that such expenditure reaches the sum of Rs. 480,000 annually.

Savings Bank.

At the Government Savings Bank there was on the 30th. of June, 1909 a sum of Rs. 2,716,605 to the credit of 26,577 depositors. The investment funds amounted to Rs. 3,094,171. Interest is allowed on deposits at the rate of 3 o/o.

The following table shows the number of depositors who belonged to the General and the Indian population and the amount standing to their credit on the 30th. of June, 1909 :—

	Number	Rs.
General Population...	15,728	1,555,431
Indian Population	10,849	1,161,171

VI.—JUDICIAL STATISTICS.

POLICE.

The authorized strength of the Police on the 31st. December 1909 was 1 Inspector General, 7 Inspectors, 12 Sub-Inspectors, 1 Staff Sergeant Major, 2 Check Sergeants, 41 Sergeants, 3 Mounted Orderlies, 50 Corporals, 402 European or Creole Constables and 205 Indian Constables. 56 men were enlisted in 1909.

CRIMINAL STATISTICS.

The total number of cases reported to the Police was 22,197, as against 24,601 in the preceding year.

These arrange themselves as follows :—

Offences against the Person	7,973
Prædial Larceny	640
Other offences against Property	5,401
Other offences	8,183
	22,197

In respect of these offences 12,715 persons were apprehended by the Police or summoned before the Magistrates, while in 9,306 cases the charges were of too doubtful or trivial a character to warrant prosecution by the Crown.

The number of persons summoned or dealt with by the Magisterial Courts was 21,615, as against 22,369 in 1908. The charges against these persons are classified under the following heads :—

Offences against the Person	1,379
Prædial Larceny	438
Other offences against property	4,264
Offences against Masters and Servants acts, including Acts relating to Indentured Coolies.	3,160
Offences against Revenue, Municipal, Road or other laws relating to the Social Economy of the Colony	8,732
Other offences	3,642
	21,615

These persons were disposed of as follows :—

Discharged for want of prosecution	3,289
Discharged on the merits of the case ...	1,803
Summarily convicted	16,454
Committed for trial in the Superior Courts...	69
	21,615

In respect of convictions in the Magisterial Courts, 16,454 against 17,627 in the preceding year, the following punishments were inflicted :

Fine...	10,259
Imprisonment in lieu of fine where there was no sentence of peremptory imprisonment.	1,704
Fine and peremptory imprisonment ...	39
Peremptory imprisonment without fine ...	4,079
Whipping	1
Bound over or other trivial punishment ...	372
	16,454

Of the committals for trial in the Superior Courts, 62 persons were dealt with during the year on the following indictments :

Murder	3
Attempt at murder	2
Manslaughter and attempt at manslaughter....	1
Rape	3
Other offences against the Person ...	32
Robbery with violence	8
Malicious injury to property	5
Other offences against property	8
	62

Judgment for the Crown was obtained in 53 cases and there were 9 acquittals.

The improvement shown in these figures, as compared with 1908, is attributed by the Inspector General of Police, in the main, to the general improvement in the affairs of the Colony in the year under review.

PRISONS AND REFORMATORY.

There was a decrease of 2,174 in the number of prisoners admitted to prison after conviction as compared with 1908, the figures are :—

	Males	Females	Total
1908	7,628	299	7,927
1909	5,484	269	5,753

The daily average number under detention shows a decrease of 265 as compared with 1908, the daily average for that year being 1,445.83 as against 1,180.49 in 1909.

The deaths in the Prisons numbered 59 as compared with 93 in 1908. 14 deaths were due to phthisis, 8 to dysentery, 7 to pneumonia, and 6 to malaria. The daily average number under treatment in the Prisons hospitals fell from 77.73 in 1908 to 56.10 in 1909.

There were 39 escapes as against 47 in 1908. 34 of the prisoners who escaped were recaptured.

The number of offences against discipline by prisoners was 2,344 as against 2,184 in 1908. This rise in the number of offences is partly due to an increase in the hard labour task.

The numbers admitted to the Reformatory in 1909 were 123 new boys, 67 ex-Reformatory boys, 47 untried,—a total of 237 as against 431 in 1908. There was a decrease of 0.52 in the daily average as compared with 1908.

Of the 190 boys who were admitted on conviction 137 entered the Institution with sentences of 6 months or less, of whom 99 were sentenced to a month or less, and 44 of these to sentences varying between one and seven days.

The admissions to hospital decreased by 20. The prevailing diseases were malaria, influenza and dysentery. There was during the year one death due to pulmonary tuberculosis.

The Discipline among the boys was satisfactory: there were 113 departmental offences as against 174 in 1908, none of the offences were of a grave nature.

VII.—VITAL STATISTICS.

Population.

At the Census of 1901 the population, excluding the military and non-resident shipping population, was 371,023. The estimated population at the end of the year 1909 was 373,071, which however showed a decrease of 1,166 as compared with the previous year. There was a decrease of 1,681 in the Indian population which numbered 261,550 in 1908 and 259,869 in 1909. The estimated population in the Dependencies and outlying islands is 6,115.

Birth and Death rates

There were 11,509 births registered during the year. The law allows a delay of 45 days for free registration and the number of births which were not registered owing to death intervening before registration was 1328. The total number of births was accordingly 12,837 giving a proportion of 34.3 infants born to 1,000 persons living. The deaths registered numbered 13,761 giving 36.7 deaths to 1,000 persons living. The birth rate showed a decrease of 2.4 per thousand as compared with 1908 and the death rate a decrease of 3.3 per thousand. The birth and death rates amongst the Indian population were 35.4 and 38.4 per thousand.

Public Health.

The year 1909 showed a distinct reduction in the number of patients admitted into the public hospitals, the figures falling from 27,751 in 1908 to 23,205. The case mortality rose however from 5.79 o/o to 5.83 o/o, being the highest recorded since 1906.

The number of deaths attributed to diseases classified as Specific Febrile or Zymotic was 7,165 or 52 o/o of the total number, of which 5,248 were due to malarial diseases, 978 to Diarrhoeal diseases of which 770 to Dysentery and 202 to Diarrhoea, and 785 to Miasmatic diseases. There were 1,255 deaths from constitutional diseases, of which 809 were due to tuberculosis and 182 to Phthisis. There were 1,590 deaths from diseases of the respiratory system of which 599 were due to bronchitis and 859 to pneumonia.

There was a widespread recrudescence of plague and the outbreak was the most severe which has been recorded since 1904: the total number of cases being 457 as against 167 in 1908 and the number of deaths 329 as against 135. The case mortality was 72.9 o/o which is the lowest recorded. The first cases were registered in July and as is usual gradually increased in frequency until the epidemic established itself in September, the climax being reached in November, in which month there were 152 cases. The epidemic of 1909 was not confined as is generally the case to Port Louis and the district of Plaines Wilhems, but rapidly spread to Pamplemousses, Rivière du Rempart, Moka and Savanne, a number of estates being affected.

Malaria.

The incidence of malaria was less severe in 1909 than in the previous year. The death rate for malarial diseases fell from 15.5 per thousand of the population to 14 per thousand and the proportion which deaths from malaria bore to deaths from other causes deceased from 38.6 o/o to 38.1 o/o.

The number of persons suffering from malaria and from splenic enlargement who were admitted to the public hospitals showed a marked decrease. The following table shews the number of malarial patients admitted to hospital during the last five years :—

Year	1905	1906	1907	1908	1909
Admissions	5,123	3,674	4,272	5,071	3,929

Favourable climatic conditions, a lower rainfall in the earlier part of the year and a lower mean temperature, are in part accountable for the decrease in the incidence of the disease but the effect of measures for the improvement of sanitary conditions which have been taken by the Medical and Health Department, the Municipal Corporation of Port Louis, the Boards of Commissioners for Curepipe, Beau Bassin and Rose-Hill and Quatre Bornes and many of the sugar estates should not be overlooked. Cleaning and canalisation of streams near populous centres, drainage of marshy ground and reduction in the number of breeding places for mosquitoes have been continued.

Amongst the works undertaken by the Sanitary branch of the Medical Department, a marsh at Centre of Flacq has been drained by cutting a channel of over 3,200 feet in length, and for part of its course through rock. The bed of the Mesnil stream has been deepened to drain the marshes in the centre of the town of Curepipe. La Louise marshes at Quatre Bornes have been drained and the course of Lataniers stream in the extra-urban area of Port-Louis has been altered to prevent the flooding, after rain, of a large extent of ground on its banks.

Free distribution of quinine from depots and at schools has been continued and the taking of a spleen census at Port Louis afforded opportunity for a special distribution in that town. The drug is issued in the form of lozenges prepared with glycerine and covered with magnesia. The lozenges remain soft for several months but fresh issues are made in fortnightly supplies and the doses vary from half a grain to 5 grains.

Vaccination.

The number of children presented for vaccination at the public vaccine stations was 9,709 as compared with 11,638 in 1908. Of this number the Public Vaccinators certified 9,587 to have been successfully vaccinated. The percentage of successful vaccinations was 98.7 o/o and of the infants born during the year 75 o/o were vaccinated at the public expense.

Meteorological.

Meteorological observations are taken at the Royal Alfred Observatory, Pamplemousses, and at eleven second order stations. The Observatory is about three miles from the West coast and is 179 feet above sea level. There are considerable variations both in temperature and humidity in the different parts of the island, the coast districts being hotter and drier than the higher altitudes in the interior. Hurricanes occur between December and April which is the hottest season.

The mean rain-fall from 72 stations was 90.50 inches as compared with 90.06 inches in 1908 and an average of 83.87 inches. The rainfall in June was the greatest on record in all parts of the island and in July it was the greatest on record in the districts of Pamplemousses, Plaines Wilhems and portions of Grand Port. In other districts it was 200 o/o to 250 o/o of the normal. Returns from 10 stations shewed a mean rainfall of 16.32 inches in June and 10.07 inches in July as compared with averages of 4.55 inches and 4.16 inches in these months for the period from 1862 to 1909. The highest rainfall previously recorded in June was 9.33 inches in 1872 and in July 8.57 inches in 1878. The rainfall for the year at Port Louis was 33.15 inches and at Kanaka forest, 1700 feet above sea-level, 168.35 inches. The number of "rainy days" at the Observatory was 224 as compared with an average of 204 for the period 1875 to 1905, a "rainy day" being one in which .005 inches. or more of rain was measured.

The mean temperature of the air at the Observatory was 73°.1 as compared with an average of 73°.4, the highest temperature recorded being 89°.3 on the 27th. of December, and the lowest 54°.7 on the 29th. of July. The highest and lowest temperatures recorded at the Observatory between 1875 and 1909 were 94°.7 on the 23rd December 1900 and 49°.9 on the 8th. of August 1907.

The abnormality curve of air temperature showed two large negative waves culminating in May and October. The hottest of the second order stations was Port-Louis with a mean temperature of 76°.8 and the coolest Kanaka forest with a mean temperature of 67°.2.

During the year 1909 eight cyclones of which records were kept occurred in the South Indian Ocean. One passed to the North and North West of Mauritius and another passed from North East to South East of Rodrigues.

VIII.—POSTAL AND TELEGRAPH SERVICES.

The total number of Offices open in 1909 was 63 of which 57 were also Telegraph Offices. Forty-eight of the Post Offices are at Railway Stations and 15 are in districts at a distance for the Railway system.

The revenue for the year 1909 was Rs. 139,365 as compared with Rs. 138,588 in 1908. The expenditure was Rs. 153,243 in 1908 and Rs. 141,619 in 1909. If allowance is made for the value of the work done for the Government which in 1909 is estimated at Rs. 48,510 there remains a balance in favour of the Post Office of Rs. 46,256.

The total estimated number of letters, post cards, newspapers and postal packets, exclusive of parcels which passed through the Post Office in 1909 was approximately 3 millions. The number of parcels was 14,303 being an increase of 569 over the previous year. The number of parcels dealt with in 1909 is however over 2,500 less than in 1907. The decrease in parcels in recent years is partly accounted for by the fact that some of the large French houses have representatives in the Colony who receive orders and to whom the goods are shipped as cargo.

The total of the money order business done during 1909 amounted to Rs. 709,153 as compared with 741,541 in 1908. The

Inland money orders amounted to approximately one half of the total in each year. There was a decrease of Rs. 28,000 in the business done with the United Kingdom and of Rs. 16,000 with India. The decrease in the business done with the United Kingdom is partly compensated for by an increase in Postal Order business. The number of orders issued and received increased in number from 2,879 to 3,897 and in value from Rs. 25,669 to Rs. 35,479.

There are 341¼ miles of Telegraph and 86½ miles of Telephone wires under the charge of the Department.

The Telegraph line between Port-Louis and Rose-Hill has been reconstructed and additional lines have been erected between Port-Louis and Mahebourg and between Curepipe and Rose-Belle. Modern instruments have been installed in the principal offices, the single needle type being replaced by " bell sounders ". A telephone line has been erected between Port-Louis and Grand River South East on the North Line of Railway for the use of that department.

The Railway has not a telegraphic system of its own and the ordinary messages for the working of the traffic and for the administration of the Department are transmitted over the Post Office lines. The number of Railway messages transmitted in 1909 was 98,413.

The number of Telegraph messages sent by the public is small. In 1909 out of a total number of nearly 166,000 messages sent, only 9,000 were sent by the public. The receipts for the messages including charges for porterage amounted to approximately Rs. 18,000.

The telegraph system is liable to serious interruption during the hurricane season and it is proposed to connect the Observatory by an underground line with Port Louis and with that portion of the Midland Line of Railways where the traffic is heaviest.

IX.—RAILWAYS.

There is a single line of Railway of 120 miles in length. The guage is 4 feet 8½ inches.

The earnings from all sources for the year amounted to Rs. 2,415,928 being an increase of Rs. 195,056 over 1908. Excluding Government Traffic the earnings amounted to Rs. 2,213,712 and exceeded those of 1908 by Rs. 183,355, of which increase Rs. 140,914 was in Goods Traffic and Rs. 25,313 in Passenger Traffic.

Reducing all tickets to single journey and season tickets to 50 single journeys a month the total number of passengers carried was 2,568,632 as compared with 2,540,080 in 1908, an increase of 28,552.

The following table shews the tonnage of Goods Traffic carried in 1908 and 1909 :—

	1908 Tons	1909 Tons	Increase Tons
Sugar Canes	138,890	193,367	54,477
Sugar	147,154	159,525	12,371
General Merchandize...	147,114	178,750	31,636
Total ...	433,158	531,642	98,484

In the figures for general merchandize given above are included 11,502 tons in 1908 and 9,722 tons in 1909 of traffic carried for Government Departments for which no payment was made.

Of the total quantity of sugar received in Port-Louis, the percentage which was carried by the railway was 75.69 in 1908 and 77.41 in 1909. The amount earned by the Railway per ton of sugar carried was Rs. 3.78 in 1908 and Rs. 3.79 in 1909.

The actual working expenses of the main lines were Rs. 1,542,010 and the earnings Rs. 2,213,712 leaving a profit on the year's working of Rs. 671,702. This is exclusive of the services performed by the Railway for other Government Departments for which no Cash payments are made and which at ordinary rates would cost Rs. 202,216.

The total expenditure charged to Capital Account up to the 31st. December, 1909 was Rs. 21,559,952.

Bois Chéri.

There is a light railway of 2 ft. 6 inches gauge running from Rivière du Poste Station on the Savanne Branch of the Midland Line to Mexico. The length of the line is 10 miles. The total Goods traffic carried in 1909 amounted to 16,621 tons of which 13,251 tons were sugar cane. The Sugar cane carried in 1909 shewed an increase of 3,268 tons as compared with the previous year. The actual working expenses for 1909 were Rs. 11,728, the earnings Rs. 10,869 and the work done for Government Departments was valued at Rs. 3,013. The Capital expenditure up to 31st. December 1909 was Rs. 264,640.

X.— PUBLIC WORKS.

The most important works undertaken by the Public Works Department during the year were the construction of the tower of the Lighthouse at Caves Point and a bridge across Rivière La Chaux at Mahebourg.

Caves Point Lighthouse—A tower of 67½ feet in height has been constructed in reinforced concrete on a cliff of 68 feet above high water level and suitable quarters have been built for the Light-keepers. A second order, double flashing, dioptric apparatus will be installed. The height of the light above high water level will be

146 feet. The light of 300,000 candle power will be visible from a ship's deck at a distance of 23 miles but the rays will in clear weather be visible at a much greater distance. At a height of one hundred feet above high water, there will be a fixed red light to mark the anchorage.

Rivière La Chaux Bridge.

The bridge is designed for heavy traffic by tractor which the existing wooden bridge could not carry, the abutments, arches and piers being constructed in reinforced concrete. There are 6 piers and 7 arches of 62½ feet span. The total width of the bridge is 21 feet, with a clear road way for vehicular traffic of 16 feet. One abutment, one arch and two piers were built in 1908, three arches and three piers have been built in 1909, and it is expected that the bridge will be completed in March 1911 at a cost of Rs. 125,000.

Mare aux Vacoas Water Works.

The reservoir at Mare aux Vacoas, where the average annual rainfall is 137 inches, has a catchment area of about 5 square miles. The top water level is 1,840 feet above the mean sea-level and the reservoir has a maximum capacity of 570 millions of gallons. The water flows from the Reservoir for 4,900 feet, in an open channel and for a further distance of 7,700 feet is taken in a 16" cast iron pipe to the filtering establishment at La Marie, which is 1,040 feet above sea level.

At the filtering establishment there is a depositing reservoir with a capacity of 1,300,000 gallons and a covered service reservoir with a capacity of 500,000 gallons. Owing to the water being at times heavily charged with organic matter the "Anderson Process" for the purification of water was installed and concrete partitions were erected in the depositing reservoir to improve the settlement of solids. Originally there were only 4 filter beds with a superficial area of 6,720 square feet, but five additional filter beds have since been constructed with a superficial area of 18,000 square feet, and extra aerating trays have been added. These additional works and the increased filtration area enable two filters to be always left exposed to sun and air and with a slower process of filtration there are few complaints of the quality of the water.

The daily consumption of water is about 1,600,000 gallons and with the exception of the supply to the town of Curepipe the water flows by gravitation to the lower districts. The supply for Curepipe is pumped by means of hydraulic rams to two reservoirs standing 368 feet above the Filtering Establishment, the motor being driven by water power from the 16" supply main. Owing to the increase in the population of Curepipe it is proposed to add to the pumping plant and to reconstruct the reservoirs. At the same time 2' concrete pipes will be laid where the water at present flows in an open channel from tho Reservoir. The total capital expenditure on the works amounts to Rs. 1,750,000, and the cost of maintenance is Rs. 31,500 a year.

Port Louis Drainage Works.

The Port Louis drainage works were begun in 1895, the sewers being designed on the seperate system and the surface drainage being carried in the street gutters to the various streams which flow into the Harbour. The town is divided for drainage purposes into four districts three of which drain by gravitation sewers into seperate collecting wells which are connected by means of syphon pipes to the pumping station near Caudan Bassin. From there, the sewage is pumped through cast iron pipes for 7,000 feet to the sea outfall at the mouth of Grand River North West and is discharged in 10 feet of water at low tide, a thousand feet from the shore.

Sewers have been laid in districts Nos. 2. and 3 and in the immediate vicinity of Line Barracks in District No. 4. The capital expenditure already incurred on these works and on the pumping station amounts to Rs. 706,700 and it is estimated that the additional cost of completing the whole scheme will amount to Rs. 1,075,000. It is proposed to complete the laying of the sewers in District No. 4 and to begin the work in District No. 1. The pumping plant has already proved insufficient and is being increased by additional pumps. These will suffice until the sewers in District No. 1 have been laid when a further extension will become necessary.

The cost of the house drainage works is defrayed by the owners of the properties who are permitted to repay the expenditure incurred by instalments.

Roads.

There are 432 miles of main roads which are maintained by the Public Works Department at an average annual cost of Rs. 365 a mile, the total expenditure in 1908-9 being Rs. 157,000. The portion of the roads on which the expenditure is largest is that between Port Louis and Pamplemousses on which the cost of maintenance amounts to over Rs. 1,000 a mile, this high rate being due to heavy traffic by road tractor with Port Louis. Most of the traffic comes from the estates in the District which may be reughly described as lying along a line drawn between Pamplemousses station on the North Line of Railways and Fayences Mountain in Flacq District.

XI.—FORESTS AND GARDENS.

The area of forests and waste lands under the care of the Forests Department was 84,867 acres.

Utilization.

The Improvement fellings at Kanaka were continued on a small scale, 658 cubic feet of timber and 260,000 shingles being obtained, in addition 1,776 tons of firewood were sold to Sugar Estates. The revenue from the operations exceeded the expenditure for the year by Rs. 17,787.

Clear cuttings of Casuarina on Pas Géométriques along the coast yielded fuel valued at Rs. 20,554 which was sold to the lessees, who replanted the areas cleared.

Thinnings in the pine forests in the neighbourhood of Curepipe gave a revenue of Rs. 2,822. From these forests and those near Port-Louis, 4,424 cords of fuel were cut for supply to Public Institutions.

Forest Plantations.

162,000 plants of various species were laid out in the forests at various altitudes. The varieties planted were principally Junipers, Pines and Cryptomeria japonica.

Gardens.

At the Royal Botanical Gardens, Pamplemousses 25,360 plants of sisal, cloves, coffee, palms and other varieties were sold or given free to the public. Selected sugar canes were received from the West Indies and Australia and disposed of in the same manner. 158,552 forest plants of various species were sent to Crown Lands or sold to the Public, the latter taking chiefly Casuarina and Eucalyptus.

From the Nursery Gardens, Curepipe, 202,000 plants were sent to various forests and public establishments or sold to the Public. These included 7,500 plants of the valuable but very slow growing indigenous species of trees and many conifers.

XII.—DEPENDENCIES.

The Dependencies comprise a large number of small Islands situated between 5° and 19°.50′ South latitude and 51° and 72°. 30′. East longitude of which the nearest is 230 miles and the most remote about 1,200 miles distant from Mauritius.

The largest and most important is Rodrigues with an area of 42 square miles and a population of 4,560. It is administered by a resident Magistrate and has a public Hospital to which 120 patients were admitted during the year and two Government Schools with a roll of 217 pupils. In the course of 1909 a branch of the Mauritius Savings Bank was opened and there was at the end of the year a sum of Rs. 6,041 at the credit of the depositors.

The value of the chief exports in 1909 was :—Salt fish, Rs. 32,256 ; Cattle, Pigs, Goats and Fowls, Rs. 19,000, seeds (chiefly acacia), Rs. 18,800 ; tobacco, Rs. 11,456.

Most of the Islands in the Lesser Dependencies have been conceded or sold with the exception of a few Islands in the St. Brandon group and two islands in the Diego Garcia group, Tromelin Island, and one near the great Chagos Bank which are leased.

The Islands are administered by two Magistrates who are resident in Mauritius and pay regular visits to the Dependencies. The value of the chief exports from the Dependencies in 1909 were : cocoanut oil Rs. 189,956 ; cocoanuts Rs. 12,628 ; guano Rs. 32,779 and fish (dried and salted) Rs. 27,856.

XIII.—MISCELLANEOUS.

The Governor, His Excellency Sir Cavendish Boyle, K.C.M.G. returned to Mauritius from leave of absence on the 23rd of April and was in residence in the Colony for the remainder of the year. During his absence the Government was administered by Sir Graham Bower, K.C.M.G., Colonial Secretary.

The Council of Government, having had under its consideration the financial position of the Colony, decided on the 2nd of February 1909 to ask for the appointment of a Royal Commission to enquire into the condition and resources ot the Colony. The Secretary of State accepted in principle the proposal for a Royal Commission. On the 13th of May the appointment by His Majesty was announced of Sir Frank Athelstane Swettenham, K.C.M.G., Sir Edward Loughlin O'Malley, Kt. and Mr. Hubert Bayley Drysdale Woodcock, Barrister,to be Commissioners to enquire into the conditions and resources of the Colony, with Mr. Arthur John Harding, B. A. as Secretary. The Commissioners arrived in Mauritius on the 18th of June and left the Colony on the 24th of August.

J. MIDDLETON,

COLONIAL REPORTS—ANNUAL.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1910.

I.—FINANCIAL.

General Revenue and Expenditure.

Revenue.

Previous to the financial year 1909–10 the revenue of the Colony had on three occasions exceeded ten millions of rupees. In 1904–5 the revenue amounted to Rs. 10,399,555, in 1905–6 to Rs. 10,287,821 (omitting Rs. 881,962 recovered from Loan Funds) and in 1906–7 to Rs. 10,329,618. The normal sources of revenue yielded in 1909–10 a total of Rs. 10,559,348 which exceeded the collections of any previous year and exceeded those of 1904–5 by Rs. 159,793.

The total revenue for 1909–10 amounted to Rs. 10,799,723 in which is included a sum of Rs. 240,375 received during the year on account of the lease and sale of the dredger Cerné.

The normal revenue was Rs. 609,278 more than the estimate and Rs. 1,734,884 more than the revenue of the previous year.

The following is a comparative statement showing the actual revenue collected during the financial years 1908–9 and 1909–10 but excluding in the latter year under Head "Harbour" the sum of Rs. 240,375 paid on account of the lease and sale of the dredger Cerné.

Head of Revenue.	1908-9.	1909-10.	Increase.	Decrease.
	Rs. c.	Rs. c.	Rs. c.	Rs. c.

Net increase of normal revenue...	...	...	...	1,734,884 ...

G.E.H. Apr. 24, 1913 S.h.

The collections under every head of revenue, with the exception of Rent and Interest, showed an increase over the collections of the previous year. The sources principally contributing to the total increase in normal revenue of Rs. 1,734,884 over the revenue of 1908–9 were : Customs duties Rs. 730,663 ; Licenses, Excise and Internal Revenue Rs. 440,553 ; and Railways Rs. 432,132. In Customs Import duties there was an increase of Rs. 565,372 and in Export duties an increase of Rs. 165,291. Shop Licenses yielded an increase of Rs. 17,394 ; Excise duties an increase of Rs. 389,479 ; and Taxes on vehicles an increase of Rs. 10,394. The receipts from the Main lines of Railway showed increases of Rs. 266,936 in goods traffic and Rs. 142,975 in Passenger traffic. The heavy yield of cane from the crop of 1909–10, the favourable prices obtained for sugar towards the close of the year 1909 and the resulting substantial profit have naturally had a marked effect on the general prosperity of the community as shown by its increased power of consumption and have brought about a welcome revival in the commercial activity of the Colony.

As was anticipated in the report for last year the deficit of Rs. 599,968 with which the financial year 1909–10 opened was cleared off and there remained on the 30th. of June 1910 a surplus balance of Rs. 750,380. The improvement in the yield of Revenue from the principal sources has been maintained and a strict control over the expenditure has been continued.

Though the accounts of the financial year 1910–11 have not yet been completed, it is anticipated that the Revenue will exceed eleven millions of rupees and that the receipts will exceed the expenditure by one million and a half, leaving a surplus balance as on 30th. June 1911 of approximately 2¼ millions of Rupees. From this sum has been expended about Rs. 400,000 on account of Railway re-equipment which will be repaid when the loan already authorised is raised.

Expenditure.

The expenditure for the year 1909–1910 amounted to Rs. 9,449,261 or Rs. 199,806 less than the estimated Expenditure.

The following are the principal Heads under which the Expenditure was less than the Estimate: Railways Rs. 85,090, Medical and Health Department Rs. 54,000, Education Rs. 48,000, Prisons Rs. 26,000. It was necessary to appropriate additional sums of Rs. 53,000 under Head Poor, Rs. 36,000 on Public Works Extraordinary and Rs. 52,000 on other services. The amount provided under Head Poor, in the Estimates of 1909–10 and previous years was insufficient to meet the expenditure annually incurred on Institutional and out-door relief, the actual expenditure in 1909–10 was Rs. 21,000 less than in the previous year.

Provision was made in the Estimates of 1908–09 for the cost of the Caves Point Light but the apparatus was not delivered until after the close of the year necessitating supplementary appropriation under Public Works Extraordinary to meet its cost.

The following is a comparative statement of expenditure for the years 1908–09 and 1909–10:—

Head of Service.	1908–9.	1909–10.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Charge on account of Public Debt	1,273,817	1,256,368	...	17,449
2. Pensions	597,354	617,588	20,234	...
3. The Governor & Legislature	94,346	91,241	...	3,105
4. Colonial Secretariat ...	56,792	54,548	...	2,244
5. Treasury	158,342	152,931	...	5,411
6. Customs	123,364	122,293	...	1,071
7. Audit	57,493	56,450	...	1,043
8. Port & Marine	180,516	133,807	...	46,709
9. Observatory	20,932	19,766	...	1,166
10. Public Library & Museum	8,155	8,119	...	36
11. Registrar General	15,675	15,707	32	...
12. Registration & Mortgage	40,855	40,524	...	331
13. Archives	7,314	7,452	138	...
14. Law and Justice	465,527	442,660	...	22,867
15. Ecclesiastical	152,689	152,721	32	...
16. Police	549,435	535,708	...	13,727
17. Prison and Reformatory ...	200,316	169,152	...	31,164
18. Medical & Health ...	760,328	733,750	...	26,578
19. Quarantine... ...	10,381	8,016	...	2,365
20. Plague	113,426	133,913	20,487	...
21. Education	627,697	591,600	...	36,097
22. Poor	282,810	261,237	...	21,573
23. Storekeeper General ...	35,463	33,069	...	2,394
24. Immigration	91,719	88,291	...	3,428
25. Dependencies, Rodrigues ...	53,676	54,003	327	...
26. Military Expenditure ...	371,583	427,540	55,957	...
27. Miscellaneous	413,330	421,587	8,257	...
28. Charitable Allowances ...	8,172	9,594	1,422	...
29. Interest and Exchange ...	200,892	211,069	10,177	...
30. Post Office	150,594	147,012	...	3,582
31. Railways	1,726,679	1,542,042	...	184,637
32. Forests and Gardens ...	169,624	161,544	...	8,080
33. Public Works Department	108,123	113,754	5,631	...
34. Public Works, Recurrent...	435,850	471,923	36,073	...
35. Public Works, Extraordinary	46,569	152,293	105,724	...
36. Loan Commission	11,616	9,989	...	1,627
Total Rs...	9,621,454	9,449,261	264,491	436,684
Result—Net Decrease	...	...	...	172,193

The total expenditure for the year 1909–10 was less than the expenditure for 1908–09 by Rs. 172,193. The principal Heads under which the expenditure in 1909–10 was less were Railways Rs. 184,000, Port and Marine Rs. 46,000, Education Rs. 36,000, Prisons Rs. 31,000. The principal Heads under which the expenditure in 1909–10 was greater were Public Works Extraordinary Rs. 105,000, Public Works Recurrent Rs. 36,000, Military Contribution Rs. 45,000, Pensions Rs. 20,000, Plague Rs. 20,000. The expenditure on Public Works Extraordinary in 1908–09 amounted to only Rs. 46,000, works having been deferred for purposes of economy. The increase in the Military Contribution followed on an increase in the Revenue of the Colony.

Assets and Liabilities.

The assets of the Colony on the 30th. of June 1910 were Rs 3,194,748 and the Liabilities Rs. 2,444,368 the assets thus exceeding the liabilities by Rs 750,380.

	Rs.
The assets included :—	
Cash in the hands of the Receiver General and sub-accountants...	494,611
Investments at cost ...	657,018
Temporary investments at Bank rate £ 51,000 at 1/4ᵈ	765,000
Miscellaneous Advances	328,880
Advances on account of loan authorized for mechanical transport (Ordinance No. 34 of 1902)	949,239
The chief liabilities were :—	
General Deposits	2,358,967
Loan Funds, unexpended	22,748
Government of India	44,047

Public Debt.

The total indebtedness of the Colony on the 30th of June, 1910, was £ 1,300,890 and the Sinking Funds amounted to £ 286,857, leaving a nett debt of £ 1,014,033.

In 1894 the nett debt was £ 1,147,409 and approximately two and a half times the annual revenue of £ 471,172. The nett debt on the 30th of June, 1910, was less than one and a half times the normal revenue for the year.

Under Ordinances No. 10 of 1876, No. 10. of 1879 and No. 2 of 1887 outstanding debentures are redeemed by annual drawings. Provision is made for the repayment of other loans by means of a sinking fund.

The raising of a loan of £ 70,000 for the purpose of making advances to Planters to assist them in substituting mechanical for animal transport on their estates was authorized by Ordinance No. 34 of 1902. The loan was not raised but advances were made partly from Treasury balances and partly from temporary advances obtained from the Crown Agents. The actual amount advanced to Planters was £ 185,184 of which there remained due in Capital sum on the 30th of June, 1910, £ 63 282. The advances obtained from the Crown Agents were settled in full in February 1910.

The Railway (Improvement) Loan Ordinance 1910 authorizes the raising of a loan of £ 270,000 for the improvement and re-equipment of the Railways. The loan has not yet been raised the expenditure incurred having so far been met by payment from surplus cash balances.

Currency and Banking.

The Currency of the Colony consists of :—

(1) The following Mauritius Bronze and Silver coins which are legal tender up to Rs 5.

- (a) Bronze : 1 cent, 2 cents, 5 cents.
- (b) Silver : 10 cents, 20 cents.

(2) The Silver rupee of India with its silver subdivisions.

(3) Mauritius Government notes of Rs. 50, Rs. 10 and Rs. 5.

On the 30th June, 1910, the value of Currency notes in circulation was Rs. 4,620,250. The specie held amounted to Rs. 2,300,000 and the Investment and Depreciation Funds to Rs. 2,320,250 and Rs. 275,193 respectively.

The Banks which do business in the Colony are the Bank of Mauritius Limited and the Mauritius Commercial Bank.

MUNICIPALITY OF PORT LOUIS.

The following is a comparative statement of the Revenue and Expenditure of the Municipality of Port Louis for the five years 1906 to 1910 :—

Year.	Revenue. Rs.	Expenditure. Rs.
1906	537,366	510,588
1907	512,172	502,916
1908	476,130	500,776
1909	484,841	476,148
1910	523,494	504,058

The indebtedness of the Municipality up to the end of the year and the provision for payment are shewn below :—

Loan.	Amount.	Repayments to be made in 1911.
	£.	£.
Conversion Loan	113,200	2,100
Electric Lighting Loan ...	8,333	333
Municipality Loan	3,715	143
Municipality Loan	4,821	178
	130,069	2,754
	Rs.	Rs.
Government Hurricane Loan, 1892	57,630.	4,991
Grand River Bridge Loan ...	2,000.	2,000
Manure Factory and Night Soil Service Loan	12,000.	2,000
Municipality Loan, 1903	16,000.	2,000
	87,630.	8,991

LOCAL BOARDS.

There are Boards of Commissioners for the Towns of Curepipe, Beau Bassin and Rose Hill and Quatre Bornes which are entrusted with the general improvement and conservancy of these towns.

The Board of Curepipe receives the amount of taxes on horses and vehicles collected in the town and licenses paid by the traders and others. The Board may also levy a tax not exceeding one per cent on house property. The two other Boards receive the amount of the taxes paid by traders and others in the towns and may also levy a similar tax on house property.

The following table shews the revenue and expenditure of the Boards for the past five years :—

CUREPIPE.

	1905-6	1906-7.	1907-8.	1908-9.	1909-10
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	65,776	67,496	79,331	73,759	90,966
Expenditure	64,740	66,885	75,659	72,516	85,360

BEAU BASSIN AND ROSE HILL.

	1905-6.	1906-7.	1907-8.	1908-9.	1909-10.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	26,831	30,995	37,044	33,541	35,804
Expenditure	25,783	30,164	37,695	33,476	34,639

QUATRE BORNES.

	1905-6.	1906-7.	1907-8.	1908-9.	1909-10.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	13,202	12,957	13,815	[illegible]	12,513
Expenditure	12,416	12,800	13,865	13,508	12,615

Below will be found a statement of the debts of the Boards :—

Curepipe Board	Net Amount of Debt	Rs. 57,500.
Beau Bassin and Rose Hill	,,	,, 7,100.
Quatre Bornes	,,	,, nil

There is a District Board for each of the eight rural districts of the Island. To them is entrusted under Ordinance 9 of 1900 the maintenance of the branch Roads.

They receive as revenue a contribution from Government equivalent to 10 o/o of the direct taxes collected in each District during the year and an addition of 10 o/o to the direct taxes to be levied in each year in each district exclusive of Port Louis and the Townships. The additional 10 o/o to be levied on the direct taxes may be increased to 25 o/o subject to the approval of the Governor in Executive Council. The Government contribution amounted in 1909–10 to Rs. 10,000.

The powers of the District Boards were extended by Ordinance No. 35 of 1902 to include the construction, maintenance and management of water works. For this purpose they receive an annual contribution from Government which in 1909–10 amounted to Rs. 76,000 and also the proceeds of water rates and of charges paid for water supplies.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The aggregate value of Imports and Exports, excluding specie, for the years 1908, 1909 and 1910 was as follows :—

	1908	1909	1910
Imports ...	Rs. 26,199,606	Rs. 27,013,970	Rs. 35,014,664
Exports ...	33,691,381	34,424,923	36,528,536
	59,890,987	61,438,893	71,543,200

The value of Imports from and Exports to the United Kingdom, British Possessions and Foreign Countries during the years 1909 and 1910 is shewn below, (specie is not included) :—

	Imports from		Exports to	
	1909 unit Rs. 1,000	1910 unit Rs. 1,000	1909 unit Rs. 1,000	1910 unit Rs. 1,000
United Kingdom ...	7,437	11,282	4,316	8,267
British Possessions ...	12,288	16,225	29,667	27,863
Foreign Countries ...	7,287	7,507	441	397
Total ...	27,012	35,014	34,424	36,527

The following tables shew the percentage of Imports from and Exports to the United Kingdom, British Possessions and Foreign Countries during each of the last five years :—

Imports.

From	1906	1907	1908	1909	1910
United Kingdom	30.8	27.8	25.3	27.5	32.2
British Possessions	49.4	49.7	50.5	45.5	46.4
Foreign Countries	19.8	22.5	24.2	27.0	21.4

Exports.

To	1906	1907	1908	1909	1910
United Kingdom ...	8.1	16.0	11.5	12.5	22.6
British Possessions ...	86.4	79.7	86.7	86.2	76.3
Foreign Countries ...	5.5	4.3	1.8	1.3	1.1

There has been a marked expansion in trade during the year and especially with the United Kingdom the imports from and exports to which have largely increased while in the imports from foreign countries the increase is considerably less. The imports and exports have been classified in accordance with the arrangement adopted by the Board of Trade and a comparison of the returns with those for 1909 gives the following information. In the group "Food etc." the imports of rice from Foreign countries have decreased by 1¾ millions of rupees while the imports from British possessions increased by 1½ millions of rupees. Under "Raw Materials" there are increases in coal of Rs. 348,000 from the United Kingdom and Rs. 726,000 from British Possessions and there is an increase of Rs. 404,000 in chemicals for manure from the United Kingdom. In the group "Manufactured Articles" increases occur under the following heads—from the United Kingdom : Hardware Rs. 499,000, wrought iron Rs. 295,000, Machinery for local manufactures Rs. 698,000, Cottons Rs. 298,000, Soap Rs. 121,000 ; from Foreign Countries: Tramway materials Rs. 251,000, Motor cars Rs. 83,000, Cottons Rs. 112,000, Haberdashery Rs. 239,000, Petroleum Rs. 151,000.

The Colony continues to send practically all its produce to the United Kingdom and British Possessions and though India still takes the bulk of the sugar produced, the exports to the United Kingdom rose considerably in 1910.

In 1910 four commercial travellers deposited samples at the

Customs. They all represented foreign firms and travelled in haberdashery, perfumery, wines, spirits and preserved provisions.

The Customs Revenue showed an increase of Rs. 1,563,000 as compared with 1909 and the chief articles contributing to the revenue in 1910 were :—

	Rs.
Tobacco and Cigars	790,000
Grain (including rice, dholl, etc.)	577,000
Cotton manufactures	204,000
Wines	190,724
Spirits	145,009
Matches	110,000

The Export duty on sugar yielded Rs. 647,000.

Imports.

The value of the imports in 1910 was greater by Rs. 8,000,000 than in the previous year.

The largest increases occur under the following heads :

	Rs.
Coal	1,107,000
Machinery (for local industries)	712,000
Hardware and Cutlery	556,000
Timber	535,000
Animals	452,000
Manures and Fertilizers	500,000
Oils	351,000
Grain	[illegible]
Cotton Manufactures	316,000
Haberdashery	311,000
Machinery (Mechanical Transport) ...	298,000
Provisions (preserved)	259,000
Wines and spirits	156,000
Soap	121,000

The articles in which these increases occur indicate a general and marked improvement in the trade of the colony following the profitable sugar crop of the previous year and there are noteworthy increases in the importations affecting Agriculture.

There was an increase of 2,344 in the number of oxen imported from Madagascar and though the meat supply of the Island is derived from this source a considerable number of draft animals were introduced. Twenty six horses and sixty swine were imported from

the United Kingdom for breeding purposes and 263 horses and poneys were imported from Australia.

The importations of coal increased by 22,000 tons due partly to ships calling to coal and to the more general use of coal in the industries of the colony and especially on Estate tramways. The value of manures imported increased by Rs. 500,000, and there were increases of Rs. 712,000 and Rs. 298,000 under machinery for local industries and under the head Mechanical Transport. The value of the machinery imported was three times greater than in the previous year and practically all of it came from the United Kingdom. The locomotives, wagons and rails for tramways continue to come from foreign countries, the importations of these materials from the United Kingdom though small were nearly doubled in 1910 as compared with the previous year. Fifty four motor cars of value Rs. 263,000, were imported during the year.

The following tables give the value of the importations and the country of origin under the Heads Machinery and Mechanical Transport for the years 1906 to 1910 :—

Machinery.

Country.	1906	1907	1908	1909	1910	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
United Kingdom	382,164	437,528	252,354	329,155	1,028,122	2,429,323
France ...	19,807	23,201	6,943	18,616	29,716	98,283
Germany ...	7,831	9,307	3,439	...	...	20,577
Belgium ...	235	2,782	1,728	867	3,411	9,026
Other countries .	...	...	...	810	463	1,273
Total ...	410,037	472,818	264,464	349,448	1,061,715	2,558,482

Mechanical Transport.

Country.	1906	1907	1908	1909	1910	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Germany ...	251,419	240,726	50,681	210,402	398,845	1,152,073
Belgium ...	66,795	92,429	1,233	62.696	140.277	363,430
United Kingdom	...	14,454	13,920	59,726	106,909	195,009
France	15,093	14,082	1,707	15,219	927	47,028
United States ...	...	...	8,887	...	...	8,887
Total ...	333,307	361,691	76,428	348,043	646,958	1,766,427

The total imports of rice which is the chief article of food of the majority of the population were practically the same as in the previous year and amounted to 58,000 tons (metric) being Rs. 183,000 less in value. The imports from British India increased by over 12,000 tons approximately the equivalent of the imports from Non-British India in 1909 from which no rice was imported in 1910. The imports from the Straits Settlements remained steady at 600 tons while those from Madagascar decreased by one-half. A small quantity of rice, excellent as are the local Arrowroot and Tapioca, is grown in the Island, but the price is high and imported rice is generally preferred. "Creole" rice is sold at prices varying from 20 to 25 cents a pound, Madagascar rice at 12 cents and Indian rice at from 7 to 10 cents.

The quantities and value of the imports of dholl and gram increased and the quantity of lentils imported from India, (value Rs. 160,000) was nearly double that of the previous year although lentils of better quality are grown locally.

It is significant of the backward condition of agriculture in other branches than the cultivation of the sugar cane, upon which effort has principally been concentrated and which has been brought to great perfection, that although dairies have been successfully established in the Island the imports of butter, margarine, cheese and milk amounted to Rs. 164,000 and that although the country is adapted to oil bearing trees and plants and a good oil is produced in small quantities from ground nuts the value of the importations of culinary oils, lard and like products amounted to Rs. 894,000. Similarly tea grown in the colony has been favourably reported on, but the imports increased from 47,638 kilogrammes in 1909 to 60,092 kilogrammes in 1910. It is further noteworthy as indicating other directions in which local industries may possibly be developed that the following appear among the Imports for the year :—

Coffee	Rs. 173,592
Castor Oil	144,157
Soap	436,373
Potatoes...	97,261
Salt	71,159
Chillies	49,665
Peas	45,063
Cocoa nut oil	21,973
Tamarinds	14,344
Cart Grease	16,064
Tallow	13,054
Bark and Dyeword	10,170

The following table shews the countries which export goods to Mauritius and the value of the goods exported, exclusive of specie, in the years 1909 and 1910 :—

Country	Exports to Mauritius.	
—	1909	1910
	Rs.	Rs.
British India	10,307,800	13,237,466
United Kingdom	7,431,356	11,282,129
France	2,402,077	3,088,554
Australia	857,627	1,059,195
United States	732,423	888,791
Madagascar	659,844	1,069,101
Germany	530,001	721,828
Natal	471,599	375,301
Cape Colony	295,012	433,953
Transvaal	32,810	670,542
Belgium	286,013	503,596
Reunion	236,661	316,638
Straits Settlements	183,060	247,685
China	153,150	168,149
Indo-China	1,756,409	nil

The United Kingdom, British India or British Possessions are the largest suppliers of wearing apparel, bacon, gunny bags, beer in casks and bottles, books, bran, chemicals for manures, cement, coal, confectionery, dholl, gram, oats, rice, flour, cotton, salt fish, ghee, hardware and cutlery, iron nails, wrought iron, boots and shoes, machinery for local industries, manure (bone), provisions (preserved), salt, soap, whisky, stationery, tea, tin, umbrellas (cotton), shooks, sleepers, timber, woollen goods.

Foreign countries are the largest suppliers of apothecaries' wares, oxen, butter, candles, clocks and watches, enamelled ware, glassware, haberdashery, jewellery, light tramway wagons, locomotives and materials, matches, motor cars, petroleum, cigarette paper, perfumery, potatoes, satin and ribbons, brandy, gin, wine, sulphur, tobacco and cigars, toys, umbrellas (silk), woollen blankets.

Exports.

The total value of the exports, excluding specie but including charges, was in 1909 Rs. 34,424,923 and in 1910 Rs. 36,528,536.

The following table shews the value and the destination of the products of the Colony, other than sugar, which were exported in 1909 and 1910.

Product	Year	Exported to			
		United Kingdom	British Possessions	Foreign Countries	Total
		Rs.	Rs.	Rs.	Rs
Molasses ...	1909	......	702,019	...	702,019
	1910	462	510,265	...	510,727
Rum ...	1909	31,144	12,549	...	43,693
	1910	15,024	14,737	...	29,761

* Metric ton=1,000 kilogrammes.

Agriculture

SUGAR.

The crop year for sugar begins on the 1st of August and ends on the 31st of July of the following year. For the purposes of comparison it is convenient to maintain this distinction.

The year closing on the 31st of July 1911 has been one of great activity in the sugar industry. The crop of 1909, produced under most favourable conditions, had reached 246,560 tons* and had exceeded that of any previous year. The heavy yield of cane per acre in 1909 and the favourable prices obtained for the sugar have brought about a rapid extension of the area cultivated, particularly on the lands of peasant proprietors. The total crop of 1910 exclusive of local consumption was 214,372 tons*, which figure is arrived at in the following manner :—

		Tons.*
Exports, 1st August 1910 to 31st July 1911 ...		224,093
In store on the 31st July 1911 ...	24,317 bags	
„ „ 1910 ...	151,806 „	
Subtract balance in Store, (127,489 × 76.25 kilos average weight of 1 bag)		9,721
		214,372

The abnormally heavy rains of June and July 1909 were followed during the growing season of the crop of 1910 by long periods of drought which adversely affected the yield of cane. The harvesting of this relatively large crop in spite of generally unfavourable climatic conditions is due to

(1) An extension of the area planted ;

(2) An exceptionally good " virgin " crop produced by the heavy rains which fell in June and July 1909 immediately after the canes had been planted ;

(3) An unusually rich and pure juice ;

(4) Improved methods of extraction and manufacture.

There has resulted a crop slightly above normal which has in a measure counterbalanced the low price realised for the sugar.

The market opened with a general average price of about Rs. 9 per 50 kilos which fell rapidly in the closing months of 1910, the average for the whole crop, though not yet definitely determined by the Chamber of Agriculture, being approximately Rs. 7 per 50 kilos as compared with Rs. 8.50 in the previous year. The monetary value of the crop for the last five years is shewn below.

---

* Metric ton = 1000 kilogrammes.

	Total Produce Tons (metric)	Monetary value units Rs. 1,000,000.
1906– 7	214,699	28.3
1907– 8	163,911	24.9
1908– 9	191,491	28.7
1909–10	246,560	41.9
1910–11	214,372	30.0

The agricultural returns which have this year been prepared in the Statistical Office of the Chamber of Agriculture show that on the 31st. of December, 1910, 144,297 arpents* out of a total area of 439,451 arpents in the Island of Mauritius were under cultivation in sugar cane giving an increase of 16,552 arpents since 1909, of which 4,864 arpents are on large estates and 11,688 on small holdings.

The Protector of Immigrants reports that there was a decrease of 6,447 in the estate population as compared with the previous year and a decrease of nearly 1,000 in the number of written contracts of service, excluding those of new immigrants, entered into during 1910. The introduction of indentured labour from India was restricted and later in the year discontinued. The extended cultivation of small holdings absorbed a large amount of regular labour and there was consequently a scarcity of labour causing some anxiety during harvest and the busier seasons of field work. Agricultural work was plentiful throughout the year and wages ruled high.

Attempts have been made from time to time and recently renewed to introduce steam ploughs for field work, but much of the land under cane cultivation is very rocky and hand labour still prevails, except in a few isolated cases where the soil lends itself to mechanical appliances. The use of cane and mill residue as fertilizers continues to be generally adopted and the imports of manures and chemicals increase annually, the value for 1910 being approximately 2½ millions of rupees. The construction of light tramways has been further extended and their total length is estimated by the Statistical Office of the Chamber of Agriculture at little short of 900 miles. As supplementing the tramway system, a considerable number of oxen are used for transport. The wastage is made good by imports from Madagascar though the "Creole ox", of which about 450 are bred annually, is preferred as better resisting disease and being generally a more sturdy animal.

In 1908 there were 66 Sugar Factories working and this number had at 31st. December 1910 decreased to sixty two. Great improvement has been effected in the manufacture of sugar and large sums have been expended on the machinery of the factories. The total value of the machinery imported in 1910 exceeded one million of rupees and consisted principally of larger vacuum pans, improved turbines, " malaxeurs " and other machinery and labour saving appliances for the work of the sugar factories. In one or two instances improved and powerful crushing plants have been introduced the results from which will be followed with great interest.

---

* arpent = 1·043 acre.

Mauritius Hemp.

Furcrœa Gigantea or " Aloës vert " from which is produced the fibre commercially known as " Mauritius Hemp " is believed to have been introduced into the island from South America about 1790 as an ornamental plant. It had by 1871 spread so extensively that its commercial value came to be recognised and 120 cwts. of fibre were exported in that year for experimental purposes. In 1882 the exports had risen to 1228 tons and in 1884 they fell to 324 tons. From 1887 an impetus appears to have been given to the industry and the exports rose to 2729 tons in 1889. In 1894 they had again fallen to 858 tons and in 1900 they reached their maximum of 3105 tons valued at Rs. 940,000. The quantities exported during the last six years and their value are shewn below.

	Tons.	Value. unit Rs. 1000.
1905	1674	564
1906	1951	737
1907	2879	986
1908	2142	623
1909	1878	530
1910	2021	627

An article in the Bulletin of the Imperial Institute (Vol. VIII No. 3, 1910) pointing out the possibility of development in the Mauritius Hemp Industry shows that the price has varied considerably. In the end of 1905 and the beginning of 1906 £ 30 a ton was paid in London for " good fair Mauritius hemp. " The price fell rapidly in 1907 and was as low as £ 19.10 in March 1908. Thereafter it remained low fluctuating between £ 19 and £ 21.10 until it gradually rose in the end of 1909 and was in the latter part of 1910 about £26—£27 per ton. It is at the time of writing quoted at £ 21 to £ 25 per ton. The average selling price, in the Colony, including all grades, was during the year 1909 approximately Rs. 277 per ton, (metric) with an average cost of production of Rs. 188 a ton. The average selling price during 1910 was approximately Rs. 300 a ton varying from Rs. 375 for the best quality to Rs. 150 for the lowest.

The tendency to extend the plantations and to rely less on the product of uncultivated lands, to which reference was made in the report of last year, has increased but only to a small extent, and experiments have also been made in planting agave. The Furcrœa flourishes in the most unproductive and barren lands and reproduces itself with great rapidity by the bulbils which fall from the " pole ". There are low lying lands which are either uncultivated or on which the cultivation of the sugar cane is carried on with difficulty, and on which it seems probable that the cultivation of Furcrœa and the production of Mauritius hemp on a larger scale than has hitherto been attempted might be undertaken with good prospects of success. The industry appears to be capable of considerable development and to offer a profitable opening for capital.

The need for better methods of manufacture and improved machinery is keenly felt. There is a demand for a more efficient decorticating installation than is generally in use, and a machine which could be easily moved from place to place so as to avoid the not inconsiderable cost of the transport of the leaves, would find a ready market.

Cotton.

The cultivation of cotton, which was formerly grown with success in the Island, appears also to offer possibilities on lands not well suited to sugar cane and on fallow lands. During the course of the year the Fine Spinners and Doublers Association Limited of Manchester, and Messrs J. and P. Coats Limited of Paisley offered to supply free, selected seed of "Sea Island" Cotton for experimental sowing, to maintain at their cost a cotton growing expert and to erect ginning and baling apparatus. Towards the end of the year Mr. J.H. Lee arrived in the Colony to supervise and advise on cotton cultivation. A total area of over 400 acres was planted in plots varying from half an acre to 80 acres, the more important being in the districts of Rivière du Rempart, Flacq and Black River. The sowing which was begun late in the season was somewhat unduly prolonged and the climatic conditions in the ensuing growing season were peculiarly unfavourable to the experiment. The damage caused by the cyclones of February and March 1911 does not appear to have been great except in the case of very young seedlings, but the low temperature and shortage of rain were very seriously felt in some districts. A small ginnery has been established in Port Louis with three Macarthy gins driven by a steam engine and a screw baling press with a capacity of 200 lbs. The cotton produced has been generally of a high quality and has been bought at R. 1.80 per kilogramme of cotton lint. Mr. Lee has expressed the opinion that if the cotton is planted at the beginning of the rainy season and if care and attention are bestowed on its cultivation it would pay well, especially on the low lying lands.

Shipping.

There was much activity in shipping during the year. The following comparative tables show the number, tonnage and nationality of ships entered and cleared during the years 1909 and 1910.

Nationality.	1909. Steam vessels.		Sailing vessels.		Total		1910. Steam vessels.		Sailing vessels.		Total.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.

These tables show that 234 vessels with a tonnage of 488,751 reported during the year, against 191 with a tonnage 378,163 in the previous year showing a total increase of 43 vessels with a tonnage of 110,588 :—236 vessels with a tonnage of 497,516 cleared as against 189 with a tonnage of 376,987 in the previous year, showing an increase of 47 vessels with a tonnage of 120,529.

The increase in the number reported is divided between those reporting with cargo and those reporting in ballast as follows :

Reported with cargo	35	tonnage	102,249
Reported with ballast	8	„	8,339
	43	„	110,588

The clearances show an increase of 47 vessels with a tonnage of 120,529 divided between vessels cleared with cargo and vessels cleared in ballast, the figures are as follows :

Cleared with cargo	23	tonnage	56,241
Cleared with ballast	24	„	64,288
	47		120,529

Distinguishing steam vessels from sailing vessels there has been an increase of 26 with a tonnage of 102,579 reporting as compared with the previous year and an increase of 31 with a tonnage of 112,459 cleared. The number of steamers reporting with cargo is 22 with a tonnage of 93,501 in excess of the previous year and the number of steamers reporting with ballast is 4 with a tonnage of 9,078 in excess of the previous year. Thirteen steamers (tonnage 54,060) cleared with cargo in excess of the number of the previous year while the number of vessels clearing in ballast in excess of the previous year was 18 with a tonnage of 58,399.

There was an increase in the number of sailing vessels reporting with cargo of 13 with a tonnage of 8,748 and of those reporting in ballast an increase of 4 in number with a tonnage less by 739. The number of sailing vessels cleared with cargo was greater by 10 (tonnage 2,181) and of sailing vessels cleared with ballast greater by 6 (tonnage 5,889).

There were increases in the number of ships entered from the United Kingdom of 10 with a tonnage of 43,853 and of ships cleared for the United Kingdom of 12 with a tonnage of 47,010 ; the number of ships entered from Australia increased by 15 with a tonnage of 41,708, and the number of ships cleared for India increased by 8 with a tonnage of 35,205.

III.—LEGISLATION.

Among the more important legislative measures of the year are the following :—

The Census Ordinance (No. 2) is modelled on the lines of the measure passed in 1900 (Ordinance No. 20). Article 1 is declaratory of the Census and Article 23 provides for the taking of the Census in the Dependencies.

The Importation of Plants (diseases prevention) Ordinance (No. 4) is modelled on an Ordinance of British Guiana (No. 21 of 1903). Power is taken to prohibit or restrict effectively the importation of seeds, plants, cuttings or soil which are likely to be a means of introducing plant diseases.

The Children and Young Persons (Abolition of Death Sentence) Amendment Ordinance (No 6) gives to the Court a discretionary power, in the absence of positive proof in determining the age of a child or young person for the purposes of the Children and Young Persons (Abolition of death sentence) Ordinance of 1909.

The Banishment (Amendment) Ordinance (No 8) restricts the operation of the Banishment Ordinance of 1909 to Aliens (1) convicted by a competent Court of certain offences or (ii) certified by the Court within 12 months after they last entered the Colony to have been sentenced in a foreign country with which there is an extradition treaty for a crime (not being an offence of a political character) which as respects that country is an extraditable offence within the meaning of the Extradition Act 1870.

The General Loan and Inscribed Stock Ordinance (No 9) defines in one enactment the terms and conditions applicable to loans hereafter authorized to be raised by the Legislature of the Colony, provides for the creation of inscribed stock and enables the Colony to take advantage of the provisions of the Colonial Stock Act 1877 and subsequent amending enactments.

The Railway (Improvement) Loan Ordinance (No. 10) authorizes the raising of a loan of £270,000 to meet the cost of improvements to the Railways.

The Inquiries into Wrecks and Marine Court Ordinance (No. 11) passed under the authority of Section 478 of the Merchant Shipping Act 1894 makes better provision for the exercise of the jurisdiction of the District Court of Port Louis, First Division, as a Marine Court sitting with assessors.

The Sale of Food (Municipal Control) Ordinance (No. 14) gives to authorised Municipal Officers within the limits of the town of Port Louis the same power of entering into shops and of inspection and control of food sold or stored therein as are vested in the Sanitary Authorities by Article 41 of the Public Health Law of 1894—1895.

The Crown Lands (amendment) Ordinance (No. 16) empowers the Governor to authorize the exchange by private contract of Crown Lands for other lands subject to the provisions of the Crown Land Ordinances No. 18 of 1874 and No. 19 of 1899 ; the lessee of Crown Lands is also granted a preference over the highest bidder for the lease of adjoining Pas Géométriques.

The Electric Light and Power (purchase) Ordinance (No. 17) gives to the Governor in Executive Council power to purchase undertakings for the supply of electricity for public purposes authorized under Ordinance No. 18 of 1902 and provides a basis of valuation.

The Merchant Shipping Ordinance (No. 19) consolidates 17 local Ordinances which are absorbed in seven parts as follows : Masters and Seamen ; Distressed Colonial Seamen ; Mercantile Marine Officers ; Survey of Passenger Steamers ; Life Saving Appliances ; Unseaworthy ships ; Wrecks and Salvage.

The Merchant Shipping (Extension) Ordinance (No. 20) adapts certain provisions of the Merchant Shipping Act (1906) to the Colony, viz : Sections 3, 6, 9, 10, 11, 22, 57 ; and applies Part III (except Section 27) and so much of Part IV and of Part V as relate to shipping officers, engagement and discharge of seamen, payment and allotment of wages, legal rights to wages, mode of recovering wages, wages and effects of deceased seamen, provisions, health and accommodation of seamen, power of seamen to make complaints, protection of seamen from imposition, and discipline, to all ships registered at and trading with Mauritius (except such as are exclusively employed in the coasting trade) when such ships are within the jurisdiction of the Government of the Colony.

The Electoral Registers (Preparation) Amendment Ordinance (No. 21) makes provision for the appointment of additional officers, termed Revising Officers, for the purpose of adjudicating upon all matters incidental to the revision and preparation of yearly registers of electors within the period fixed in Ordinances Nos. 5 of 1887 and 22 of 1895.

The Clearing of Rivers Ordinance (No. 22) extends and better defines the powers of the Executive to grant permission to clean River Reserves and to cut trees growing thereon. The riparian owner may be authorized to clear the bed of a river from trees, weeds, growth or impediment, to clear the banks for a width of ten feet from the water's edge and to remove trees in and under certain conditions.

The Motor Car Ordinance (No.24) regulates the use of motor cars and embodies in substance the main provisions of the Act 3 Edward VII. Cap. 36.

IV.—EDUCATION.

Primary Education.

The Primary schools at the end of the year 1910 numbered 149 of which 61 were Government and 88 Aided Schools. The number of Government Schools has been reduced from 67 in 1908 and 64 in 1909 by the amalgamation of separate schools for Boys and Girls in the same locality. The Schools which were so amalgamated in 1910 were L'Escalier in the District of Grand Port, Flacq Central and Pamplemousses, and considerable economy has resulted both in the salaries of the Teachers and in the working expenses of the schools. Of the Aided Schools there were 66 Roman Catholic, 19 Church of England, 2 Presbyterian and 1 Mahomedan.

The number of Primary Schools, Government and Aided, and the number of pupils for the years 1906 to 1910 are shown in the following table :—

	Government Schools.			*Aided Schools.*		
Years.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.
1906	67	8,919	5,491	88	9,867	6,491
1907	67	8,615	5,670	90	10,367	6,918
1908	67	8,359	5,242	88	10,226	6,779
1909	64	8,634	5,433	88	10,651	7,234
1910	61	9,326	5,951	88	11,621	7,934

The average attendance in Government and Aided Schools for the year was 13,885 with a roll of 20,947 showing an average attendance of 66·2 o/o of the number of pupils on the roll. There is a slight improvement as compared with 1909 when with a roll of 19,285 there was an average attendance of 12,667 or 65·6 o/o of the number of pupils on the roll. The number of pupils on the roll and the number in average attendance have increased by nearly 10 o/o as compared with 1909 but the Director of Public Instruction reports that only a small proportion, between a third and a quarter, of the children of school age attend Government or Aided Schools and that only a very small proportion of the remainder get any schooling at all. The average attendance in 1910 compared favourably with that of 1909 but it is still very low and when the school year is well begun it may be generally considered a good attendance if there are present two thirds of the number of pupils on the register.

The number of Indian children attending the Primary Schools in 1910 was 7,462 as compared with 7,125 in 1909 and 6,996 in 1908.

With an increase in the number of pupils attending the Schools as compared with 1909 the Examination results show a rise in the number of passes but the number of pupils who successfully passed the Examination tests and especially in obligatory subjects showed, as compared with the number of pupils presented for examination, a satisfactory increase. Of the total number of pupils on the roll in the six Standard classes 62 o/o passed the examination tests as compared with 53·64 o/o in 1909, while of the number of pupils who were presented for examination 65 o/o passed in 1910 as compared with 57·59 o/o in 1909. The reports of the Inspectors however indicate that teaching is frequently too much directed to the attainment of examination results at the cost of important matters which are not directly tested by examination.

The total expenditure for the year on the salaries of and grants to Teachers in Primary Schools amounted to Rs. 292,608 of which Rs. 133,885 was expended on Government Schools and Rs. 158,722 on Aided Schools. The figures for 1909 were Rs. 326,625., Rs. 162,334 and Rs. 164,291 respectively. The cost to Government of a pupil in a Government School was Rs. 19.75 and in an Aided School Rs. 15.14 as compared Rs. 20.25 and Rs. 15.42 in 1909.

There are open annually to pupils of Primary Schools six scholarships and six exhibitions at the Royal College for which there is keen competition. The exhibitioners receive free tuition and the scholars free tuition and an allowance of Rs. 100 a year. There were 128 candidates in 1910 against 131 in 1909. Seven candidates failed in the test examination and 14 scored the minimum number of marks. The numbers of candidates from Government Schools was 81 and from Aided Schools 47.

An important addition was made to the Code of the Primary Schools by the inclusion of a syllabus of instruction in Hygiene for the upper standards and of regulations for the payment of grants on examination in this subject.

Secondary Education.

Secondary Education is provided by the Royal College, two schools in connection with it and 22 associated schools of which 17 presented pupils at the Annual Examination. There were in December 1910, 194 pupils at the College, 124 at Curepipe School and 68 at Port-Louis School. Of the 386 pupils at the College and its two schools, 114 did not pay fees.

There were 11 candidates for the London Matriculation Examinations in 1910, 4 of whom passed in the Second Division.

There were 93 candidates for the Senior Cambridge Examination, 20 out of the 71 candidates from the College passed. Out of 29 candidates for the Junior Cambridge Examination 14 passed.

There are scholarships and exhibitions in all the classes of the College and there are two valuable scholarships to enable pupils of the College to continue their studies in Europe.

There are 23 girls' schools which are affiliated to the Royal College in connection with the scheme for the Higher Education of Girls. The number of candidates who were presented for examination was 351 of whom 147 obtained Honours Certificates and 60 Pass Certificates. Eighteen girls entered for the Senior Cambridge Local Examination of whom 5 passed. Nine entered for the Junior

Examination of whom 2 passed. The total sum expended in 1910 on the Higher Education of Girls was Rs. 8,590 as against Rs. 8,818 in 1909.

Training of Teachers.

There are Government Training schools for men and for women. There were 4 candidates from the Men's Training School for the second class teacher's certificate of whom 2 passed and the two candidates for the third class certificate also passed. There was only one candidate from the Women's Training School for the second class certificate, who was not successful but the three candidates for the third class certificate all passed.

The following table shews the number of candidates for certificates and the number who passed during the year :

Class of Certificate.	Candidates.			Successful.		
	Men.	Women.	Total.	Men.	Women.	Total.
Second	31	8	39	6	0	6
Third	47	29	76	10	10	20
Monitors' ...	123	83	206	18	15	33
Total ...	201	120	321	34	25	59

There are 609 certificated Teachers employed in Government and Aided schools of whom 151 are Head Teachers, 145 Assistant Teachers and 313 Monitors.

Technical Education.

There are eight mechanical engineering apprenticeships for which there were 104 candidates as against 131 in 1909. There are two agricultural apprenticeships for which there were 37 candidates and two engineering studentships for which there were 3 candidates only one of whom was successful.

Needlework receives attention in Girls' schools and the work of the pupils continues to shew improvement. Fifty two candidates entered for the needlwork competition to four of whom apprenticeships were awarded.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Dispensaries.

There are 13 Hospitals, including 5 in connection with the Prisons and Reformatory, and there are 29 dispensaries, being an increase of one dispensary over the previous year. There is in addition a Hospital ward attached to the Lunatic Asylum. The number of admissions to all hospitals was 18,128 as compared with 23,205 in 1909 and 27,751 in 1908. The case mortality rose from 5.83 o/o in the previous year to 6.03 o/o, the highest figure since 1896. The number of cases treated at the dispensaries fell from 69,593 in 1909 to 57,889 in 1910 and 5,690 cases were treated as out-patients at the hospitals. Cases so treated have not been included in the figures of previous years and should properly appear amongst the cases receiving dispensary treatment. There have been added to the buildings of the Civil Hospital at Port Louis a kitchen, a mortuary, and a post-mortem room; and an operating room and a maternity ward are in course of construction. An operating room has also been constructed at Mahebourg Hospital.

Lunatic Asylum.

There is a Lunatic Asylum and a Lunatic Ward in connection with the Poorhouse of Barkly Asylum. There were 416 patients in the Asylum on the 31st. December 1910 as compared with 430 on the corresponding date of the previous year and the daily average fell from 427.3 in 1909 to 422 in 1910 giving a reduction of 9 since the year 1908. The decrease in the daily average number of male patients was 3.09 as compared with a decrease of 1.97 in the daily average number of females. The total number of certified lunatics in the Colony on the 31st. of December 1910, including patients out on probation and patients in the Lunatic Ward of Barkly Asylum, was 636 (396 males and 240 females) giving a proportion of one insane to 588 of population.

Poor Relief.

Barkly Asylum is the only institution under the direct control of the Poor Law Commissioner at which paupers receive Institutional relief.

The buildings of Barkly Asylum were originally constructed for the purpose of affording Institutional relief to the Poor, and included a Hospital which was later placed entirely under the control of the Medical Department and has come to be used as a General Hospital for the district. Arrangements also exist at various religious institutions for the maintenance of aged and infirm pauper at fixed rates, and there is an asylum for pauper lepers in which patients are maintained at the public expense. The maintenance of paupers at these institutions forms the larger part of the expenditure of the Poor Law Department.

The Poor Law Commissioner reports that there was a further decrease in the number of cases in which relief was afforded. Distinguishing Medical Relief from other forms of relief the number of admissions to the Public Hospitals, in which free treatment was given, fell from 18,918 in 1909 to 14,537 in 1910, while 202 cases were treated at the public expense at Canal Street Convent Hospital as against 183 in 1909 and 176 lepers were maintained at the public cost at St Lazare Asylum as against 191 in 1909. The number of attendances of sick paupers at the Public Dispensaries fell from 61,706 in 1909 to 48,009 in 1910. The number of persons who were treated is not shown and the figures do not include sick paupers attending the Public Hospitals as out patients.

The recipients of Institutional Relief during the year are shown as numbering 1,989 as compared with 2,492 in 1909. In 1910 there were 1,110 aged and infirm, 617 feeble minded and 262 children, in 1909 the aged and infirm numbered 1,520 the feeble minded 610 and the children 362.

The number of persons receiving out-door relief, permanent or temporary, is shewn to be 3,405 in 1910 of whom 834 were males and 2,571 females as compared with 3,872 in 1909 of whom 880 were males and 2,992 were females.

Savings Bank.

At the Government Savings Bank there was on the 30th. June 1910 a sum of Rs. 3,000,028 to the credit of 27,316 depositors. The investment funds amounted to Rs. 3,094,171. Interest is allowed at the rate of 3 o/o.

The following table shows the number of depositors who belonged to the General and Indian populations and the amount standing to their credit on the 30th. June 1910.

	Number.	Rs.
General population	16,097	1,673,135
Indian Population	11,219	1,326,893

VI.—JUDICIAL STATISTICS.

Police.

The authorized strength of the Police on the 31st. of December 1910 was 1 Inspector General, 7 Inspectors, 12 Sub Inspectors, 1 Staff Sergeant Major, 2 Check Sergeants, 41 Sergeants, 3 Mounted Orderlies, 50 Corporals, 402 European and Creole Constables, and 205 Indian Constables : 57 men were enlisted in 1910 and the total number of dismissals was 12.

Criminal Statistics.

The number of offences reported to the Police in 1910 was 22,254 as against 22,197 in 1909.

They may be classified as follows :—

Homicide	26
Other offences against the person ...	8,963
Prædial Larceny	279
Other offences against property	4,943
Other offences	8,043
	22,254

In connection with these offences 11,890 persons (including 551 persons arrested on suspicion) were apprehended by the Police or summoned before the Magistrates. In 13,885 of the cases no person was charged.

The total number of persons brought before the Magisterial Courts (District, Stipendiary and Bench of Magistrates) in 1910 was 21,749, of these the number prosecuted was 17,848 including persons tried before a Bench of Magistrates or committed to the Court of Assizes. The number discharged for want of prosecution by party complaining or for want of evidence was 3,901.

The cases prosecuted in the District Courts (including preliminary enquiries with a view to commitment to the Assizes and Bench cases) were distributed as follows :—

Offences.	Discharged for want of prosecution or evidence.	Dismissed on the merits.	Convictions.	Committed to the Assizes.
Against the person	195	320	958	45
Prædial larceny	7	31	175	...
Other offences against property	1,550	442	1,484	9
Offences against Revenue Municipal, Road and other laws relating to the social economy of the Colony	288	431	9,943	...
Other offences	70	155	1,498	8
Total	2,110	1,379	14,058	62

The total number of persons prosecuted before the District Courts during the last five years was distributed as follows :—

Year.	Offences against the person.	Prædial larceny.	Other offences against property.	Other offences (including Revenue cases etc).	Total.
1906	1,105	369	1,918	12,383	15,775
1907	1,044	453	2,696	12,893	17,086
1908	994	1,156	3,014	10,888	16,052
1909	1,192	432	2,699	12,086	16,409
1910	1,323	206	1,935	12,035	15,499

The convictions (including committal to the Assizes) before the District Courts for the same period were as follows :—

Year.	Offences against the person.	Prædial larceny.	Other offences against property.	Other offences.
1906	749	350	1,560	11,826
1907	722	428	2,169	12,370
1908	732	1,044	2,520	10,798
1909	849	370	2,223	11,235
1910	1,003	175	1,493	11,449

There were 32 cases in which 53 persons were brought before the Assizes in 1910 of whom six were acquitted and 45 convicted.

The following table shows the number of persons convicted at the Assizes during the last five years and the offences for which they were convicted.

Year.	Murder other than wife and child murder.	Manslaughter and attempt at.	Attempt at murder.	Murder of wife, reputed wife or concubine.	Including attempts to commit the several offences.									
					Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injury to property.	Larceny with aggravating circumstances.	Other offences against property.	Miscellaneous.
1906	1	8	5	2	...	...	...	2	...	19	5	10	4	...
1907	...	4	2	...	...	...	...	2	...	20	13	15	1	...
1908	...	3	...	...	...	1	...	4	...	13	28	21	2	...
1909	3	1	...	...	...	...	...	2	...	30	3	12	1	...
1910	...	3	...	...	...	...	...	6	...	24	3	8	...	1

In 1910, 36 persons were tried at the Assizes for offences against the person as compared with 41 in 1909, the number convicted being 33 in 1910 and 36 in 1909. The number of persons tried at the Assizes for offences against property was 16 in 1910 of whom 11 were convicted and 20 in 1909 of whom 16 were convicted.

PRISONS AND REFORMATORY.

There was a decrease of 1,316 in the number of prisoners admitted to prison after conviction as compared with 1909, the figures are :—

	Males	Females	Total
1909	5,484	269	5,753
1910	4,249	188	4,437

The daily average number under detention shows a decrease of 259·97 as compared with 1909, the daily average for that year being 1,180·49 as against 920·52 in 1910.

The deaths in the Prisons numbered 21 as compared with 59 in 1909. There was a marked improvement in the health of the Prisons; the daily average number under treatment in the Prison Hospitals fell from 56·10 in 1909 to 35·67 in 1910 : the prevailing diseases were malaria and lung diseases.

There were 16 escapes as against 39 in 1909. Thirteen of the prisoners who escaped were recaptured.

The number of offences against discipline by prisoners was 2,847 as against 2,344 in 1909. The rise in the number of offences is in great measure due to an increase in the hard labour task, no less than 1,127 reports being for " non-performance of task ".

The numbers admitted to the Reformatory in 1910 were 82 new boys, 50 ex-Reformatory boys, 34 untried,— a total of 166 as against 237 in 1909. There was a decrease of 28·47 in the daily average as compared with 1909.

Of the 132 boys who were admitted on conviction, 114 entered the Institution with sentences of 6 months or less, of whom 88 were sentenced to a month or less, and 40 of these to sentences varying between one and seven days.

No death occurred during the year and the admissions to hospital decreased by 45. There were two cases of typhoid fever both of which recovered.

The discipline among the boys was on the whole satisfactory; there were 121 departmental offences as against 113 in 1909. The offences were committed by 52 boys, thirty two of whom infringed the rules for the first time.

VII.—VITAL STATISTICS.

At the Census of 1901 the population, excluding the military and non resident shipping population, was 371,023. The population at the end of the year 1910 as estimated by the Registrar General was 375,597. The preliminary report on the Census of the population which was taken on the night of Friday the 31st. of March 1911 shows an error in the estimated population of the previous years due to departures to the Dependencies not being included in the returns while arrivals from the Dependencies were so included. The population has decreased by 2,513 as compared with the Census enumeration of 1901 and a correction of the statistics for the intervening years will be necessary when the report on the census of 1911 is completed. The estimated population in the Dependencies and outlying islands is 6,289.

Birth and Death rates.

There were 12,087 births registered during the year. The law allows a delay of 45 days for free registration and the number of births which were not registered owing to death intervening before registration was 1,251. The total number of births was accordingly 13,338, of which 6,710 were males and 6,628 females giving a proportion of 35·7 infants born to 1,000 persons living. The deaths registered numbered 12,488, giving a proportion of 33·4 deaths to 1,000 persons living, the lowest since the year 1904. The birth rate showed an increase of 1·4 per thousand as compared with 1909 and the death rate a decrease of 3·3 per thousand. The birth and death rates amongst the Indian population were 35·9 and 34·9 per thousand as compared with 35·4 and 38·4 per thousand in 1909.

Public Health.

The year 1910 showed a still further reduction in the number of patients admitted to the public hospitals, the figures falling from 27,751 in 1908 to 23,205 in 1909 and 18,128 in 1910. The case mortality however showed a further rise, that for 1909 being 5·83 o/o, the highest recorded since 1906 and that for 1910 being 6·03 o/o, the highest since 1896.

The number of deaths attributed to diseases classified as Specific Febrile or Zymotic was 6,369 or 51 o/o of the total of which 4,593 were due to malarial diseases ; 732 to Diarrhœal diseases, of which 582 to Dysentery and 150 to Diarrhœa ; 385 to Miasmatic diseases and 519 to Bubonic Plague. There were 1,001 deaths from constitutional diseases of which 105 were due to Phthisis and 775 to Tuberculosis, the figures for these two diseases in 1909 being 182 and 809 respectively. There were 3,382 deaths attributed to local diseases of which 1,522 were due to diseases of the Respiratory system.

There was a severe outbreak of plague, the total number of cases being 731 ; and there were a greater number of cases than in any year since 1903 ,when 1,395 cases were recorded. The first outbreak of plague occurred in 1899 when 1,416 cases were recorded. From 1903 onward, each year, with the exception of 1906, showed a decrease in the number and in 1908 there were only 167 cases.

The following year showed a large increase and the cases in 1910 were not much below the number recorded in 1900. The epidemic began in July and reached its highest point in November when 209 cases and 153 deaths were recorded.

In 1908 the cases were confined to Port Louis and the district of Plaines Wilhems, in 1909 it spread to Pamplemousses, Rivière du Rempart, Moka and Savanne, and in 1910 every district in the Island was attacked. The disease assumed principally the bubonic form, 615 cases being of that type. There were 25 cases of pneumonic and 2 of septicæmic plague, all of which proved fatal. Of the total number of 731 cases, 553 proved fatal, giving a case mortality of 75·6%. Gratuitous vaccination with Haffkine's antiplague vaccine was offered to the public and the fluid was issued free to those who applied for it; 1,218 persons availed themselves of this means of protection of whom one contracted the disease and died.

Malaria.

Malarial fever accounted for 2,338 admissions to the Public Hospitals. During the last ten years the highest number of admissions was 5,123 in 1905 and the lowest in 1910. The following table shows the number of malarial patients admitted to hospital during the last five years :—

Year	1906	1907	1908	1909	1910
Admissions	3674	4272	5071	3929	2338

The case mortality was 0.8% as compared with 0.91% in the previous year. The death rate for malarial diseases fell to 12·3 per thousand of the population as compared with 14 per thousand in 1909 and 15.5 per thousand in 1908, and the proportion which deaths from malaria bore to deaths from other causes decreased from 38.6% in 1908 and 38.1% in 1909 to 36.8% in 1910. Corresponding to the decrease in the number of malarial patients admitted to the hospitals there is a decrease in the number of admissions for splenic hypertrophy, the figures for 1908, 1909 and 1910 being 1193, 886 and 561 respectively.

In the Government and Aided Schools 12,724 chidren were examined for enlarged spleen 24% of the children being affected and the average spleen being 2. The examination of children on the Estates has not proved successful owing to the disincliration of the labourers to allow their children to be submitted to a spleen examination. The free distribution of quinine from depots and at schools has been continued the amount of the drug so distributed being 2151 lbs.

The drainage and reclamation work undertaken by the Sanitary Branch of the Medical Departement has further progressed. The work begun last year at Roche Bois in the extra urban area of Port Louis has been continued and a masonry drain 1,541 feet in length with section 2′ × 1′ 6″ was constructed. At Rose Belle Village a masonry drain 2′ 6″ × 2′ was prolonged for 664 feet and a culvert built across the road. In order to drain the marshes in the centre of the town of Curepipe further work was undertaken in deepening the bed of the Mesnil Stream and about 6 acres of land were reclaimed. Poule d'Eau and Rivière Sèche in the vicinity of the town were improved near their sources the water courses being cleared of stones and decaying vegetation, the banks dressed and earth channels dug in order to reduce the swampy area.

In April 1910 Malaria broke out in an epidemic form at La Dagotière and Valetta in the district of Moka and a vigorous campaign was at once undertaken in which ready assistance and cooperation was afforded by the proprietor of Valetta Estate. The streams, canals, drains and other places suited to the breeding of mosquitoes were cleared and cleaned and quinine was distributed free by house to house visitation. The amount so distributed was 30 lbs. As a result of these measures the number of deaths at La Dagotière fell from 21 in the first half of the year to 6 in the second half and at Valetta from 14 in the first to 6 in the second half of the year.

Vaccination.

The number of children presented for vaccination at the public vaccine stations was 10,312 as compared with 9,709 in 1909. Of this number the Public Vaccinators certified 10,097 to have been successfully vaccinated. The percentage of successful vaccination was 97·9 o/o and of the infants born during the year over 77 o/o were vaccinated at the public expense.

Meteorological.

Meteorological observations are taken at the Royal Alfred Observatory, Pamplemousses, and at eleven second order stations. The Observatory is about three miles from the West coast and is 179 feet above sea level. There are considerable variations both in temperature and humidity in the different parts of the island, the coast districts being hotter and drier than the higher altitudes in the interior. Hurricanes occur between December and April which is the hottest season.

The mean rain-fall from 71 stations was 64.12 inches as compared with 90.50 inches in 1909 and an average of 79.95 inches. The rainfall was specially low in May and June but above the average in July and September.

The rainfall for the year at Port Louis was 19·47 inches on 51 days and at Cluny 143·29 inches on 260 days. The number of " rainy days " at the Observatory was 203 as compared with an average of 204 for the period 1875 to 1905, a " rainy day " being one in which ·005 inches, or more of rain was measured.

The mean temperature of the air at the Observatory was 72°.9 as compared with an average of 73°.4, the highest temperature recorded being 90°·2 on the 5th. of January and the lowest 53°·5 on the 21st. of August. The highest and lowest temperatures recorded at the Observatory between 1875 and 1909 were 94°·7 on the 23rd. of December 1900 and 49°·9 on the 8th. of August 1907.

The abnormality curve of air temperature showed a large irregular negative wave from January to December broken by a positive wave in July. The abnormality curve of vapour tension, humidity, and rainfall followed closely the temperature curve, the rise in July being conspicuous in each element.

During the year 1910 four cyclones occurred in the South Indian Ocean. The tracks of three of them have been determined as follows :—

Number of cyclone.	Date.	Position of centre at noon.		Distance travelled in 24 hours.
		Latitude (South).	Longitude (East).	
1	January 10	16°.3	64°.6	Miles.
	11	18.3	57.9	403
	12	20.7	53.7	278
	13	23.7	51.7	212
2	February 14	19.8	68.3	
	15	21.1	61.8	373
	16	22.5	54.6	410
3	February 17	15.0	67.5	
	18	18.6	66.2	234
	19	21.7	66.1	187
	20	25.8	68.0	267

The fourth cyclone passed to the west and south of Réunion, but further observations are required before its track can be determined.

Halley's Comet was first observed on the 26th. of January with the 6 inch equatorial, as a nebulous body with no nucleus.

The transit over the Sun having been predicted for May 19^d. 6^h. 22^m (Ingress) to 19^d. 7^h. 22^m (Egress) five photographs of the Sun were obtained with the photoheliograph between 7^h. 8^m and 7^h. 35^m, during a break in the clouds ; but no trace of the Comet could be distinguished on the plates.

The maximum length of tail observed was on the morning of May 21. It extended about 5° to the West of θ Aquilæ.

On May 19th., 20th. and 21st. two tails were visible in the morning.

At 5 a.m. on May 22nd. an arch of faint light was visible in the western sky of a dull purple red colour. The arch was about 10° high at its apex and extended from N.W. to S.W. No trace of the Comet's tail could be detected, nor the equatorial band of light suggested by Prof. Birkelund.

The Comet was first seen in the evening on May 21st., its tail being then 30° long and slightly curved. The brightness on May 24th. was estimated to be between 1.0 and 1.5. It was not visible to the unaided eye after June 11th., owing to the brightness of the Moon.

VIII.—POSTAL AND TELEGRAPH SERVICES.

The total number of Offices open in 1909 was 63 of which 57 were also Telegraph Offices. Forty-eight of the Post Offices are at Railway Stations and 15 are in districts at a distance from the Railway system.

The revenue for the year 1910 was Rs. 202,733 as compared with Rs. 139,365 in 1909. The expenditure was Rs. 141,619 in 1909 and Rs. 144,669 in 1910 in which year there was an excess of Revenue over Expenditure of Rs. 58,064.

The total estimated number of letters, post cards, newspapers and postal packets, exclusive of parcels which passed through the Post Office in 1910 was approximately 3,195,306 as compared with 3,032,764 in 1909. Foreign and Inland letters and Post Cards show an increase and Inland newspapers a considerable decrease. The number of postal parcels received and despatched increased by 622, the figures being 14,191 for 1909 and 14,813 for 1910. The business with the United Kingdom showed a decrease of 102 and that with other countries an increase of 724.

The total of the money order business done during 1910 amounted to Rs. 740,910 as compared with Rs. 709,153 in 1909. The Inland money orders amounted to Rs. 327,606. During the year a Telegraphic money order system was inaugurated between Mauritius and Rodrigues. Two orders were received from Rodrigues for Rs. 3,200 and 6 orders were sent to Rodrigues for Rs. 14,853. There was again an increase in the Postal Order business. The orders issued and received increased in number from 3,897 to 5,318 and in value from Rs. 35,480 to Rs. 51,070. The increase in the orders issued was 401 in number and Rs. 4,637 in value and in orders received 1,020 in number and Rs. 10,952 in value.

There are 375 miles of Telegraph and 87 miles of Telephone wires under the charge of the Department. The reconstruction of the line between Port Louis and Rose Hill was completed during the year and the wires have been run on strong poles capable of withstanding storms. The telephone circuit temporarily erectedfor the Railway Department between Port Louis and Grand River South East was made permanent and is working well.

The Railway has not a telegraphic system of its own and the ordinary messages for the working of the traffic and for the administration of the Department are transmitted over the Post Office wires.

The number of Railway messages transmitted in 1910 was 54,881 The number of messages sent by the public increased considerably in 1910. Out of a total number of 270,648 messages forwarded 47,713 were sent by the public as compared with 24,081 out of total of 166,000 in 1909. The receipts for the messages sent by the public amount to a little over Rs. 22,000 in which charges for porterage are included.

IX.—RAILWAYS.

There is a single line of Railway of 120 miles in length. The gauge is 4 feet 8½ inches.

The earnings from all sources for the year amounted to Rs. 2,761,529 being an increase of Rs. 345,601 or 14·3 o/o over 1909. Excluding Government Traffic the earnings amounted to Rs. 2,562,842 and exceeded those of 1909 by Rs. 349,130, of which increase Rs. 183,080 was in Goods Traffic and Rs. 164,000 in Passenger Traffic. The services performed for Government Departments for which no cash payments were made would at ordinary rates have cost Rs. 198,687 of which Rs. 167,129 for Passenger Traffic, Rs. 26,088 for Goods Traffic and Rs. 5,470 for Parcels, representing 7·75 o/o of the total traffic as compared with 8·37 o/o in 1909.

The receipts for passenger traffic show an increase of Rs. 164,048 as compared with the previous year. Season tickets have yielded about Rs. 4,000 less than in the previous year and ordinary tickets Rs. 168,000 more, nearly all of which increase is in 3rd. class tickets.

The following table shows the tonnage of Goods Traffic, exclusive of Government traffic carried in 1909 and 1910.

	1909.	1910.	Increase.	Decrease.
Sugar Canes ...	193,367	157,762	...	35,605
Sugar	159,525	172,062	12,537	...
General Merchandize.	169,028	201,171	32,143	...
			44,680	35,605

The total increase in goods traffic amounted to 9,000 tons, the decrease in the tonnage of canes being almost equalled by an increase in general merchandize while sugar showed a considerable rise due to part of the large crop of 1909 not having been brought to Port Louis until the opening months of 1910. The amount of sugar carried by the railway was larger than in any previous year and represented 76·34 o/o of the total amount brought to Port Louis as estimated by the Statistical Office of the Chamber of Agriculture. Freight on sugar yielded Rs. 653,744 or Rs. 3.80 a ton. Although the weight of canes carried was less than in 1909, the earnings were greater by Rs. 21,000 due to an increase in the rates for freight which does not appear to have had any appreciable effect on the amount of traffic offering.

The total expenditure charged to Capital Account up to the 31st. of December 1910 was Rs. 21,578,943 of which Rs. 18,991 was incurred during the year. The working expenses for 1910 amounted to Rs. 1,628,271. The ratio which working expenses bore to earnings showed a decrease of 6·55 o/o as compared with 1909, the figures being 63·10 o/o and 69·65 o/o respectively. The net earnings amounted to Rs. 1,133,258 representing 5·25 o/o on the capital.

Orders in connection with the re-equipment of the railway were placed during the year including locomotive engines, passenger coaches, wagons, and materials for the permanent way. A Stores branch was established and storage accommodation enlarged in anticipation of the arrival of the materials. The estimated cost of strengthening the viaduct over Grand River North West being very high and the position of the bridge being for several reasons objectionable it was decided to deviate the line between Plaine Lauzun Workshops and Richelieu Station and to construct new bridges on the Grand River and the St. Louis stream.

Bois Chéri.

There is a light railway of 2 ft. 6 inches gauge running from Rivière du Poste Station on the Savanne Branch of the Midland Line to Mexico. The length of the line is 10 miles. The total Goods traffic carried in 1910 amounted to 13,516 tons of which 10,782 tons were sugar cane. The Sugar cane carried in 1910 showed a decrease of 2,418 tons as compared with the previous year. The actual working expenses for 1910 were Rs. 11,504, the earnings Rs. 9,442 and the work done for Government Departments was valued at Rs. 1,724. The Capital expenditure up to 31st. December 1910 was Rs. 264,640.

X.—PUBLIC WORKS.

The most important works undertaken by the Public Works Department during the year were the completion of the Lighthouse at Caves Point and the bridge across Rivière La Chaux at Mahebourg.

Caves Point Lighthouse.

The ferro-concrete tower 67½ feet height was begun in August 1909 and completed at the end of April 1910. A second order, double flashing, dioptric apparatus was installed under the direct supervision of the makers Messrs Chance Brothers. The height of the 300,000 candle power light above high water level is 146 feet. At a height of 100 feet above high water there is a fixed red light which with a Wigham Buoy at the entrance of Port Louis Harbour marks the anchorage. The light has been working satisfactorily since the 1st. of October 1910. The total cost of the Lighthouse was Rs. 130,731 in which are included in addition to the tower and apparatus the cost of quarters for the Lightkeepers, the reconstruction of a mile and a quarter of road and the supply of Mare-aux-Vacoas water.

Rivière La Chaux Bridge.

The bridge in ferro-concrete for heavy traffic was practically completed by the end of the year. It was satisfactorily tested in March 1911 by passing over it a traction engine of 17 tons and three trailers (total weight 28 tons). The deflection in any one span did not exceed one twenty fourth of an inch. The bridge has been completed within the estimate of Rs. 125,000.

Mare aux Vacoas Water Works.

The reservoir at Mare aux Vacoas, where the average annual rainfall is 137 inches, has a catchment area of about 5 square miles. The top water level is 1,840 feet above the mean sea-level and the reservoir has a maximum capacity of 570 millions of gallons. The water flows from the Reservoir for 4,900 feet, in an open channel and for a further distance of 7,700 feet is taken in a 16″ cast iron pipe to the filtering establishment at La Marie, which is 1,040 feet above sea-level.

At the filtering establishment there is a depositing reservoir with a capacity of 1,300,000 gallons and a covered service reservoir with a capacity of 500,000 gallons. Owing to the water being at times heavily charged with organic matter the "Anderson Process" for the purification of water was installed and concrete partitions were erected in the depositing reservoir to improve the settlement of solids. Originally there were only 4 filter beds with a superficial area of 6,720 square feet, but five additional filter beds have since been constructed with a superficial area of 18,000 square feet, and extra aerating trays have been added. These additional works and the increased filtration area enable two filters to be always left exposed to sun and air and with a slower process of filtration there are few complaints of the quality of the water.

The daily consumption of water exceeds 1,600,000 gallons and with the exception of the supply to the town of Curepipe the water flows by gravitation to the lower districts. The supply for Curepipe is pumped by means of hydraulic rams to two reservoirs standing 368 feet above the Filtering Establishment, the motor being driven by water power from the 16″ supply main. The increase in the population of Curepipe has necessitated additions to the pumping plant and the reconstruction of the reservoirs.

An additional main has been laid to supply the Bacteriological Laboratory, the Station Agronomique, Government House Le Réduit and the lower part of the district of Moka including the village of that name and the village of St Pierre. The length of piping laid was

50,000 feet varied from 9 to 4 inches in diameter. The cost was Rs 100,000 to which the District Board of Moka contributed the largest proportion.

The revenue derived from the supply of water has risen from Rs. 13,000 in 1891 to approximately Rs 50,000.

Port Louis Drainage Works.

The Port Louis drainage works were begun in 1895, the sewers being designed on the separate system and the surface drainage being carried in the street gutters to the various streams which flow into the Harbour. The town is divided for drainage purposes into four districts three of which drain by gravitation sewers into separate collecting wells which are connected by means of syphon pipes to the pumping station near Caudan Bassin. From there, the sewage is pumped through cast iron pipes for 7,000 feet to the sea outfall at the mouth of Grand River North West and is discharged in 10 feet of water at low tide, a thousand feet from the shore. Sewers have been laid in districts Nos. 2 and 3, and in the immediate vicinity of Line Barracks in District No. 4. The laying of the sewers in the remaining portion of District No. 4 is being proceeded with and the pumping plant is being enlarged.

The cost of the house drainage works is defrayed by the owners of the properties who are permitted to repay the expendiditure incurred by instalments.

XI.—FORESTS AND GARDENS.

The area of forests, mountain and river reserves and curatelle lands under the care of the Forest Department was 84,867 acres of which 68,082 acres are Crown lands.

Utilization.

The improvement fellings at Kanaka and Talbot were continued on a limited scale yeilding about 890 cubic feet of timber and in addition 1,126 tons of firewood were sold to sugar estates. The revenue from these operations exceeded the expenditure for the year by Rs. 22,618. Fuel to the value of Rs. 44,000 was supplied to the Public Departments at a cost of Rs. 10,651 for felling and transport. The greater portion of the firewood was taken from the Pouce Valley where a wire rope 5,000 feet long was erected to bring down the wood.

The cuttings of casuerina on the Pas Géométriques yielded fuel valued at Rs. 20,553 which was sold to the lessees who replanted the areas cleared.

Thinnings in forest plantations brought in a revenue of Rs. 3,457. The net profit realised in the pine forest of La Brasserie in 1909 and 1910 amounted to Rs. 2,333 while in addition 747 cords of Yatis were supplied to Public Institutions for firewood and timber to the value of Rs. 500 was used by the Forest Department.

There are reserves covering an area of 6,000 acres along the banks of the rivers which vary from 10 to 50 feet in width on each side of the water-course according to the importance of the stream. The protection of these belts of trees on private lands is entrusted to the Forest Department the powers of which were extended by Ordinance No. 22 of 1910 owing to difficulties which had arisen though the pressure of Agriculture and the greater attention to the clearing and cleaning of river beds near populous centres which anti-malarial measures demanded.

Forest Plantations.

The year was favourable to artificial reproduction and the work of raising and planting seedlings was actively carried on. The nurseries in which the greater number of seedlings were raised were Kanaka and Talbot, La Pipe and Nouvelle Découverte, and the species propagated included Natte, Colophane, Makak, Ebony, Sandal, Toon, Mahogany, Eucalyptus, Camphor, Juniper and Cryptomaria Japonica.

The remaining portion of the slope of the Black River Peak, measuring about 278 arpents, in the mountain reserves of Chamarel, was acquired during the year and the reafforestation of the catchment area of Rivière Viande Salée and its tributaries which supply water to six hamlets along the sea coast in Black River district was started. A nursery was established at an altitude of 1075 feet above sea-level and was stocked with plants, and the planting out of Juniper and Pines was begun.

The sisal plantation at Plaine Lauzun was further extended and in Dauguet orchard progress was made in the planting of Cacao, Coffee, Mangoes and other fruit trees.

Gardens.

At the Royal Botanic Gardens, Pamplemousses the grafting of selected mangoes, including Auguste, Aristide, Rosat, José, Gélée and Villars, was continued. Sugar canes from Queensland and the West Indies which had been grown experimentally were sold by auction and had a ready demand. Eighteen varieties of Cassava from Barbados were reaped in June and distributed to planters and nurseries for propagation and the plants and seeds of seven varieties of tobacco from Java were given to planters who are interested in tobacco cultivation. A large number of seedlings were raised in the nurseries and were either sold or used for planting out on Crown lands.

The distribution of indigenous trees from the Curepipe nursery Gardens was continued and a large number of conifers raised in the nurseries were planted on Crown lands or sold to the public. Several new species of conifers and other economic trees were received for experimental growing. The cultivation of Cowpeas and Pois sabre as fodder crops did not prove successful.

XII.—DEPENDENCIES.

The Dependencies comprise a large number of small Islands situated between 5° and 19° 50′ South Latitude and 51° and 72° 30′ East longitude of which the nearest is 230 miles and the most remote about 1,200 miles distant from Mauritius.

The largest and most important is Rodrigues with an area of 42 square miles and a population of 4,500. It is administered by a resident Magistrate and has a public Hospital to which 47 patients were admitted during the year and two Government Schools with a roll of 217 pupils. There is a branch of the Mauritius Savings Bank. There were on the 30th. of June 1910, 33 depositors with a total of Rs. 7,399 to their credit as compared with 9 depositors and a total of Rs. 1,687 on the corresponding date of the previous year.

The chief exports to Mauritius are Salt fish, Cattle, Pigs, Goats and Fowls, Acacia seeds and Tobacco.

Most of the Islands in the Lesser Dependencies have been conceded or sold with the exception of a few Islands in the St. Brandon group and two islands in the Diego Garcia group, Tromelim Island, and one near the great Chagos Bank which are leased. The islands are administered by two Magistrates who are resident in Mauritius and pay regular visits to the Dependencies. The chief exports from the Dependencies are cocoanut oil, cocoanuts, guano and fish (dried and salted).

XIII.—MISCELLANEOUS.

The term of office of His Excellency Sir Cavendish Boyle, K.C.M.G. as Governor and Commander in Chief of the Colony and its Dependencies was extended from the 20th. of August 1910 until July 1911. Sir John Graham Bower, K.C.M.G. who had held the post of Colonial Secretary since 1899 retired from the Public Service on the 14th. of January 1910. He was succeeded as Colonial Secretary by Mr. George Smith, Registrar General of Cyprus, who arrived in the Colony on the 12th. of July 1910.

The report of the Commissioners appointed by His Majesty on the 13th of May 1909 to enquire into the condition and resources of the Colony was published on the 22nd of June 1910.

COLONIAL REPORTS—ANNUAL.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1911.

I.—FINANCIAL.

General Revenue and Expenditure.

Revenue.

For the twelve months immediately following the harvesting of the largest and most valuable crop of sugar which the Island has produced, it is satisfactory to record the collection of a revenue from normal sources considerably in excess of that of any previous year. The revenue for the year 1904–05, which followed the harvesting in 1903-04 of a crop most nearly approaching in quantity that of 1909-10, amounted to Rs. 10,399,555, which was greater than that of any previous year, and than that of the year immediately preceding by Rs. 926,443. In the two succeeding years normal sources of revenue yielded Rs. 10,287,821 and Rs. 10,329,618. There was a fall in 1907-08 to Rs. 8,722,727 due to special circumstances, a slight rise in 1908-09 to Rs. 8,824,464, and a marked recovery in 1909-10, when the total revenue from normal sources amounted to Rs. 10,559,348 and exceeded the collections of any previous year. The revenue from normal sources in 1910-11 showed a still further increase of Rs. 330,641 and amounted to Rs. 10,889,989.

In the report for the year 1910 in determining the revenue from normal sources for the financial year 1909-10 there was deducted from the total collections of Rs. 10,799,723 the sum of Rs. 240,375 (Head II, Harbour) which had been received during the year on account of the lease and sale of the dredger "Cerné". The total encashments for 1910-11 amounted to Rs. 11,129,989 and included Rs. 256,142 derived from Droits of the Crown and Escheats (Head IX, Miscellaneous, Item 1). The increase from Rs. 28,318 in the previous year was due to the operation of the Curatelle Ordinance of 1890 (No. 9). The period of prescription of 30 years fixed by Article 2262 of the Civil Code had been reduced to 20 years by Ordinance No. 16 of 1883, but the shorter period of limitation was only made applicable to Vacant Estates by the enactment of the Curatelle Ordinance, No. 9 of 1890. By article 57 of that Ordinance the prescriptions of 30 years begun under the previous Curatelle laws were allowed to run, but the maximum period was made not to exceed 20 years from the passing of the Ordinance (6th. October 1890): hence the falling in on the 7th. of October 1910 of Estates of considerable value, which was the cause of the large increase in revenue from Droits of the Crown and Escheats which for the 5 years preceding 1909-10 had yielded on an average a little over Rs. 19,000. In comparing the revenue for the years 1909-10 and 1910-11 a deduction of Rs. 240,000, very nearly corresponding to the deduction made in the previous year, has been made from the collections of 1910-11 under the Head Miscellaneous.

The following is a comparative statement showing the actual revenue from normal sources collected during the financial years 1909-10 and 1910-11.

Head of Revenue.	1909-10.	1910-11.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Customs	3,956,174	4,059,116	102,942	...
2. Harbour	287,716	213,259	...	74,457
3. Licenses, Excise, &c ...	2,287,394	2,558,911	271,517	...
4. Fees of Court, &c.... ...	399,334	368,790	...	30,544
5. Post and Telegraphs ...	173,776	210,275	36,499	...
6. Railways	2,502,831	2,519,235	16,404	...
7. Rent	67,003	74,179	7,176	...
8. Interest	829,546	844,120	14,574	...
9. Miscellaneous	54,433	41,589	...	12,844
Rs. ...	10,558,207	10,889.474	449,112	117,845
10. Land Sales...	1,141	515	...	626
Total Rs. ...	10,559,348	10,889,989	449,112	118,471
Net increase of normal revenue	...	...	330,641	...

The sources which principally contributed to the total increase in normal revenue of Rs. 330,641 over the previous year were : Customs duties Rs. 102,942 ; Licenses, Excise and Internal Revenue Rs. 271,517 ; and Post and Telegraphs Rs. 36,499. Import duties yielded Rs. 181,392 more and Export duties Rs. 78,450 less than in the previous year. Shop licenses yielded an increase of Rs. 18,581, Excise duties an increase of Rs. 220,357 due in no small measure to stricter control, and Taxes on vehicles and animals an increase of Rs. 7,861. The receipts from the main lines of Railway showed an increase of Rs. 104,306 in passenger traffic but a decrease of Rs. 117,557 in goods traffic which was chiefly due to the smaller quantity of sugar carried. The total receipts of the Railways reached Rs. 2,519,235 which is the highest amount for any one year with the exception of 1904-05 when they were Rs. 2,657,596.

The only head of revenue under which the actual revenue encashed fell short of the amount which it was estimated would be received was that of Harbour, the collections being Rs. 6,741 less than the estimate of Rs. 220,000. The amount collected was Rs. 74,457 less than that of the preceding year owing to the discontinuance of the special dues levied under Ordinance No. 12 of 1905 to meet the working expenses of dredging Port Louis harbour.

There was on the 30th. of June 1910 a surplus balance of Rs. 750,494. The revenue for the year 1910-11 exceeded the expenditure by Rs. 1,551,745 bringing up the surplus at the 30th. of June 1911 to Rs. 2,302,239. From this sum there was advanced during the year on account of Railway re-equipment Rs. 1,611,595. The accounts for the first half of the current financial year show that the revenue amounted to Rs. 5,424,891 and the expenditure to Rs. 4,878,005. The expenditure was less than the revenue by Rs. 546,886 and at the 31st. of December 1911 the surplus balance had been increased to Rs. 2,849,125. From the 1st. of July to the 31st. of December 1911 additional advances amounting to Rs. 765,200 were made for Railway re-equipment. The total amount so advanced up to the 31st. of December 1911 was Rs. 2,376,795 which will be repaid when the loan of £ 270,000 authorized by the Railway (Improvement) Loan Ordinance, 1910, is raised. Deducting these advances the actual surplus balance at the 31st. of December 1911 was reduced to Rs. 472,330.

It is to be regretted that the surplus and deficit account does not permit of accurate comparison, over a long period, of the financial position of the Colony, and deductions drawn from the financial returns are liable to be misleading. Previous to the financial year 1904-05 the surplus and deficit account has apparently been regularly increased by sums which did not pass through the revenue account and decreased by sums which did not pass through the expenditure account. The accounts show that there existed at the close of the financial year 1883 a surplus balance of Rs. 4,011,418, that during the succeeding years up to the 30th. of June 1904 the total excess of expenditure over revenue reached Rs. 4,939,533 and that the period closed with a surplus balance of Rs. 82,246 of which no explanation is given. Taking then the accounts for the seven financial years from 1904-05 to 1910-11, which included the very critical period of 1907-08, it is shown that there were deficits on three occasions but that the total excess of revenue over expenditure amounted to Rs. 2,219,992. In this total are included the following sums which cannot properly be considered as revenue from normal sources: 1905-06 Rs. 881,962 recovered from Loan Funds; 1909-10 Rs. 240,375 for the lease and sale of the dredger "Cerné"; and 1910-11 Rs. 240,000 due to the operation of the Curatelle Ordinance (1890). Deducting these sums there remains a balance of normal revenue over expenditure of Rs. 857,655 for the seven years, and of Rs. 2,421,832 for the two last years of the period.

Expenditure.

The expenditure for the year 1910-11 amounted to Rs. 9,578,244 or Rs. 473,238 less than the estimated expenditure.

The following are the principal heads under which the expenditure was less than the estimate: Railways Rs. 185,377, Medical and Health Department Rs. 107,518, Poor Rs. 46,929, Prisons Rs. 32,928, Education Rs. 28,258. It was necessary to appropriate additional sums of Rs. 21,884 under Pensions, Rs. 17,133 under Military expenditure, Rs. 53,861 under Miscellaneous. In the expenditure under Miscellaneous were included the following items for which provision was not made in the original estimate : Rs. 32,373 in connection with the Coronation festivities, approximately Rs. 15,000 in connection with the disturbances in Port Louis in January 1911 and Rs. 13,357 on the acquisition of Mountain reserves.

The following is a comparative statement of the Expenditure for the years 1909-10 and 1910-11 :—

Head of Service.	1909-10.	1910-11.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.

30. Post Office	147,012	164,733	17,721	...
31. Railways	1,542,042	1,569,664	27,622	...
32. Forests and Gardens ...	161,544	165,316	3,772	...
33. Public Works Department	113,754	111,918	...	1,836
34. Public Works, Recurrent...	471,923	496,270	24,347	...
35. Public Works, Extraordinary	152,293	193,526	41,233	...
36. Loan Commission	9,989	9,923	...	66
Total Rs...	9,449.261	9,578,244	285,342	156,359
Net Increase	...	...	128,983	...

The total expenditure for the year 1910-11 exceeded the expenditure for the year 1909-10 by Rs. 128,983. The principal heads under which the expenditure in 1910-11 was greater were : Public Works Recurrent and Extraordinary Rs. 65,580, Military expenditure

Rs. 46,357, Miscellaneous Rs. 41,914, Registrar General Rs. 29,929, Railways Rs. 27,622, Post Office Rs. 17,721, Education Rs. 15,277. The expenditure on Recurrent works exceeded that of the previous year by Rs. 24,347 but attention has previously been drawn to the inadequacy of the amounts appropriated and actually expended in recent years under this head. The Extraordinary works on which the largest expenditure was incurred were enlarging the pumping plant for Curepipe water supply Rs. 44,434, Port Louis Drainage—completing sewerage in Districts No. 2 and No. 4 and extending the Pumping Station Rs. 54,865. For these works, which are purely local improvements, the expenditure had previously been met from loan funds. The interruption during storms of telegraphic communication between the Observatory and Port Louis and on the Railway and the attendant danger had shown the necessity for the construction of an underground Telegraph line in connection with which Rs. 28,165 was expended during the year. In addition to these works Rs. 11,662 was expended on completing Caves Point Lighthouse. The increase in the Military Expenditure was due to the increase in the revenue. The increase under Registrar General is accounted for by the expenditure on the taking of the Census of 1911 and the preparation of the Decennial Tables, and under Post Office largely to charges for sea and territorial transit for previous years being brought to account in the year under review. It will be observed that the excess of Rs. 128,983 in the expenditure of 1910-11 as compared with that of 1909-10 is more than covered by the charges under head Miscellaneous, for which, as already explained, no provision was made in the original estimate, by the increase in the Military expenditure and by the cost of the taking of the Census and the preparation of the Decennial Tables.

The principal heads under which the expenditure in 1910-11 was less than in 1909-10 were : Medical and Health Rs. 55,599, Poor Rs. 36,842 and charge on account of Public Debt Rs. 19,673.

The expenditure on Establishments amounted to Rs. 3,432,404 as compared with Rs. 3,480,220 in the preceding year and Rs. 3,503,434 in 1907-08, the year in which the expenditure was highest. There is a decrease of Rs. 47,816 as compared with 1909-10 and of Rs. 71,030 as compared with 1907-08. The total expenditure on personal emoluments rose from Rs. 3,053,841 in 1904-05 to Rs. 3,401,870 in 1905-06 and Rs. 3,503,434 in 1907-08. This sudden rise is not due to increase in the Establishments but to re-classification of expenditure, the cost of the salaries of persons in continuous employment, principally in the Railway Department and on Plague preventive duties, being transferred from the sub-head "Other charges" to "Personal emoluments." In comparing the expenditure of subsequent years it will be necessary to take into consideration changes in the arrangement of the Estimates and the classification of expenditure.

Assets and Liabilities.

The assets of the Colony on the 30th. of June 1911 were Rs. 2,632,538 and the liabilities Rs. 1,941,894 the assets thus exceeding the liabilities by Rs. 690,644.

	Rs.
The assets included :—	
Cash in the hands of the Receiver General and sub-accountants	724,460
Investments at cost	663,669
Temporary investments at Bank rate £16,000 at 1s. 4 d.	240,000
Miscellaneous advances	354,550
Advances on account of loan authorized for mechanical transport (Ordinance No. 34 of 1902)	649,858
The chief liabilities were :—	
General Deposits	1,872,559
Loan Funds, unexpended	14,475
Government of India	31,715
Drafts and Remittances	23,144

There was brought to account during the year expenditure amounting to Rs. 1,611,481 on Railway re-equipment.

Public Debt.

The total indebtedness of the Colony on the 30th. of June, 1911, was £ 1,296,090 and the Sinking Funds amounted to £ 306,066 leaving a net debt of £ 990,024.

In 1894 the net debt was £ 1,147,409 and approximately two and a half times the annual revenue of £ 471,172. The net debt on the 30th. of June 1911 was approximately one and a third times the normal revenue for the year.

Under Ordinances No. 10 of 1876, No. 10 of 1879 and No. 2 of 1887 outstanding debentures are redeemed by annual drawings. Provision is made for the repayment of other loans by means of a sinking fund.

The raising of a loan of £ 70,000 for the purpose of making advances to Planters to assist them in substituting mechanical for animal transport on their estates was authorised by Ordinance No. 34 of 1902. The loan was not raised but advances were made partly from Treasury balances and partly from temporary advances obtained from the Crown Agents. The actual amount lent was £ 185,185 of which there remained due in capital sum on the 30th. June 1911 £ 43,323 as compared with £ 63,282 on the 30th. of June 1910. The advances obtained from the Crown Agents were settled in full in February 1910. The last payments on account of sums lent are due to be made in September 1913.

The Railway (Improvement) Loan Ordinance 1910 authorizes the raising of a loan of £ 270,000 for the improvement and re-equipment of the Railways. The loan has not yet been raised the expenditure incurred having so far been met by payment from surplus cash balances.

Currency and Banking.

The Currency of the Colony consists of :—

(1) The following Mauritius Bronze and Silver coins which are legal tender up to Rs. 5 :
  (a) Bronze : 1 cent, 2 cents, 5 cents.
  (b) Silver : 10 cents, 20 cents.
(2) The Silver rupee of India with its silver subdivisions.
(3) Mauritius Government notes of Rs. 50, Rs. 10 and Rs. 5.

On the 30th. June, 1911, the value of Currency notes in circulation was Rs. 5,080,250. The specie held amounted to Rs. 2,760,000 and the Investment and Depreciation Funds to Rs. 2,320,250 and Rs. 301,867 respectively.

The Banks which do business in the Colony are the Bank of Mauritius Limited and the Mauritius Commercial Bank.

MUNICIPALITY OF PORT LOUIS.

The following is a comparative statement of the revenue and expenditure of the Municipality of Port Louis for the five years 1907 to 1911 :—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1907	512,172	502,916
1908	476,130	500,776
1909	484,841	476,448
1910	523,494	504,058
1911	510,285	498,614

The indebtedness of the Municipality up to the end of the year and the provision for payment are shown below :—

Loan.	Amount.	Repayments to be made in 1912.
Conversion Loan	£ 111,100	£ 2,145
Electric Lighting Loan	8,000	333
Municipality Loan, 1908	3,571	143
Municipality Loan, 1909	4,643	179
	£ 127,314	£ 2,800
Government Hurricane Loan, 1892...	Rs. 50,334	Rs. 7,588
Manure Factory and Night Soil Service Loan	10,000	2,000
Municipality Loan, 1903	14,000	2,000
	Rs. 74,334	Rs. 11,588

LOCAL BOARDS.

There are Boards of Commissioners for the Towns of Curepipe, Beau Bassin and Rose Hill and Quatre Bornes which are entrusted with the general improvement and conservancy of these towns.

The Board of Curepipe receives the amount of taxes on vehicles and animals collected in the town and of licenses paid by traders and others. The Board may also levy a tax not exceeding one per cent. on house property. The two other Boards receive the amount of the taxes paid on vehicles and animals in the towns and may also levy a similar tax on house property.

The following tables show the revenue and expenditure of the Boards for the past five years :—

CUREPIPE.

	1906-7.	1907-8.	1908-9.	1909-10.	1910-11.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	67,496	79,331	73,759	90,966	68,510
Expenditure	66,885	75,659	72,516	85,369	72,008

BEAU BASSIN AND ROSE HILL.

	1906-7.	1907-8.	1908-9.	1909-10.	1910-11.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	30,995	37,044	33,541	35,804	36,996
Expenditure	30,164	37,695	33,476	34,639	36,651

QUATRE BORNES.

	1906-7.	1907-8.	1908-9.	1909-10.	1910-11.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	12,957	13,815	13,842	12,513	12,748
Expenditure	12,800	13,865	13,508	12,615	11,096

Below will be found a statement of the debts of the Boards :—

Curepipe	Net Amount of Debt	Rs. 52,500
Beau Bassin and Rose Hill	„	„ 5,600
Quatre Bornes	„	nil

There is a District Board for each of the eight rural districts of the Island. To them is entrusted under Ordinance No. 9 of 1900 the maintenance of the branch roads.

They receive as revenue a contribution from Government equivalent to 10 o/o of the direct taxes collected in each District during the year and an addition of 10 o/o to the direct taxes to be levied in each year in each district, exclusive of Port Louis and the Townships. The additional 10 o/o to be levied on the direct taxes may be increased to 25 o/o subject to the approval of the Governor in Executive Council. The Government contribution amounted in 1910-11 to Rs. 10,495.

The powers of the District Boards were extended by Ordinance No. 35 of 1902 to include the construction, maintenance and management of water works. For this purpose they receive an annual contribution from Government, which in 1910-11 amounted to Rs. 76,000, and also the proceeds of water rates and of charges paid for water supplies.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The Customs returns for the year 1911 show the aggregate value of Imports and Exports, exclusive of specie, to be Rs. 77,854,660 the value of Imports being Rs. 37,440,332 as compared with Rs. 35,014,664 in 1910. Import duties however yielded Rs. 74,882 more in 1910 than in 1911 when there were large importations from the United Kingdom of materials for the re-equipment of the Government Railways upon which no duties were paid. The exact value of these importations as appearing in the Customs returns is not easily determinable as they are classified in various groups, but an approximate estimate may be arrived at by a comparison of the total imports from the United Kingdom the value of which was Rs. 11,282,129 in 1910 and Rs. 11,995,549 in 1911 in spite of a large decrease in the last year in the value of Textile Manufactured Articles. The largest increase is in Hardware and Cutlery the importations of which from the United Kingdom increased by Rs. 1,700,000 in 1911. Under this head most of the material for the re-equipment of the Railways appears to have been classified and following the method adopted by the Customs for determining the value of importations the total value of these materials, although the Railway Department returns a lower figure, may be estimated at approximately 2 millions of rupees.

The aggregate value of Imports and Exports, excluding specie, for the years from 1908 to 1911 was as follows :—

Year.	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.
1908	26,199,606	33,691,381	59,890,987
1909	27,013,970	34,424,923	61,438,893
1910	35,014,664	36,528,536	71,543,200
1911	37,440,332*	40,414,328	77,854,660*

*Including Railway re-equipment materials.

The value of Imports from, and Exports to the United Kingdom, British Possessions and Foreign Countries during the same years is shown below, (specie is not included) :—

Year.	Imports from (Unit Rs. 1,000.)			Exports to (Unit Rs. 1,000.)		
	United Kingdom.	British Possessions.	Foreign Countries.	United Kingdom.	British Possessions.	Foreign Countries.
1908	6,627	13,232	6,339	3,887	29,212	590
1909	7,437	12,288	7,287	4,315	29,667	441
1910	11,282	16,225	7,506	8,267	27,863	397
1911	11,995*	18,130	7,313	13,397	22,170	4,846

The following tables show the percentage of Imports from, and Exports to the United Kingdom, British Possessions and Foreign Countries during each of the last five years :—

Imports.

From	1907	1908	1909	1910	1911
United Kingdom	27.8	25.3	27.5	32.2	32.1†
British Possessions ...	49.7	50.5	45.5	46.4	48.4
Foreign Countries... ...	22.5	24.2	27.0	21.4	19.5

Exports.

To	1907	1908	1909	1910	1911
United Kingdom	16.0	11.5	12.5	22.6	33.1
British Possessions ...	79.7	86.7	86.2	76.3	54.9
Foreign Countries... ...	4.3	1.8	1.3	1.1	12.0

An examination of the returns of imports and exports shows that—the United Kingdom and British Possessions supply most of the Colony's needs and purchase nearly all its produce; the supplies from Foreign Countries are mainly in the groups (1) Food, Drink and Tobacco and (2) Manufactured Articles; owing to the failure of the beet sugar crop a large quantity of Mauritius sugar was in the year 1911 diverted from the markets of India to those of Europe; in these markets the United Kingdom was by far the largest purchaser though purchases greatly in excess of former years were made by France and Spain; the trade of the Colony is principally with the United Kingdom and India and in normal years the trade with India represents nearly one-half of the aggregate import and export trade.

---

*Including Railway re-equipment materials.

†Including Railway re-equipment materials, exclusive of which percentage is United Kingdom 28.2, British Possessions 51.2, Foreign Countries 20.6.

In 1911 the total imports in the group Food, Drink and Tobacco exceeded the value of the imports in 1910 by 2½ millions of rupees the increase being due to larger importations of Rice, Dholl and Wheat Flour from India. An apparent increase of half a million of rupees in the imports of Raw Materials from Foreign Countries is due to a reclassification of oils. In the group Manufactured Articles the total imports were about a million of rupees less than in 1910. Those from British Possessions and Foreign Countries fell by Rs. 765,000 and Rs. 825,000 respectively while those from the United Kingdom rose by Rs. 700,000 in the special circumstances already explained.

In 1910 there were imported from India approximately two millions of rupees in specie as compared with four thousand in 1911, these fluctuations being due to importations made by the Banks and to exchange operations. Specie in silver was imported from France to the value of Rs. 157,000 in 1910 and of Rs. 134,000 in 1911, and there were re-exports to Madagascar to the value of Rs. 132,000 in 1910 and Rs. 255,000 in 1911 evidently to meet payments for the purchase of cattle.

Five commercial travellers deposited samples at the Customs· They all represented foreign firms and travelled in haberdashery, perfumery, hardware and earthenware.

The chief articles contributing to the customs revenue in 1911 were :

	Rs.
Tobacco and Cigars	892,000
Grain (including rice, dholl, etc.)	680,000
Wines	153,000
Spirits	136,000
Matches	116,000
Cotton Manufactures	113,000

The export duty on sugar yielded Rs. 711,150.

Imports.

The value of the imports (including Railway re-equipment materials) in 1911 was greater by approximately 2½ millions of rupees than in the previous year and by 10½ millions of rupees than in 1909.

The largest increases as compared with 1910 occur under the following heads :

Grain	Rs.	2,251,000
Hardware and Cutlery		1,732,000
Machinery (Local Industries)		498,000
Manures and Fertilizers		359,000
Provisions (all sorts)		350,000

The largest decreases occur under the following heads :

Cotton manufactures	Rs.	847,000
Coal		465,000
Machinery (Mechanical Transport) ...		395,000
Gunny bags and pockets		195,000
Soap		123,000
Malt Liquors and spirits		114,000

The meat supply of the Island is obtained from Madagascar from which country it is shown that there were imported in 1911 7,875 oxen of a total value of Rs. 847,692 giving an average of Rs. 107.6, as compared with 8,167 oxen of a total value of Rs. 799,975 and an average of Rs. 97.9 in 1910. The values given appear excessive as the average selling price of the oxen in the local market varies from Rs. 70 to Rs. 80 per head. The imports of rice, which is the chief article of food of the majority of the population, reached nearly 69,000 tons (metric) as compared with 59,000 tons in the previous year, the value of the importations being Rs. 9,200,000 in 1911 and Rs. 7,400,000 in 1910. India supplied practically all the rice imported. There were no importations from the Straits Settlements from which 610 tons were imported in 1910 and the importations from Madagascar fell from 203 tons to 29 tons. The imports of dholl from India increased from 4,808 tons value Rs. 550,000 to 7,207 tons value Rs. 814,000. The imports of wheat flour from Australia fell from 2,702 tons value Rs. 396,000 to 1,977 tons value Rs. 271,000 while those from India rose from 5,148 tons value Rs. 632,000 to 7,370 tons value Rs. 917,000. There continue to be imported supplies which the Colony appears to be capable of producing at least in quantity sufficient to make production profitable.

The importations of coal decreased by 22,500 tons, a quantity approximately equivalent to the increase of the importations in 1910 over those of the previous year. The United Kingdom is the principal source of supply and there were marked decreases in the quantities imported from Australia and South Africa. The value of manures and fertilizers showed a still further increase of Rs. 359,000 and it will be observed that 2,927 tons of guano value Rs. 135,000 were imported from Seychelles in 1911 as compared with 610 tons value Rs. 20,000 in 1910.

There was an increase of Rs. 498,000 in the value of imports of machinery for local industries and a decrease of Rs. 395,000 in machinery for mechanical transport. The following tables give the value and country of origin of importations under the heads Machinery and Mechanical Transport for the years 1907 to 1911.

Machinery.

Country.	1907	1908	1909	1910	1911	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
United Kingdom	437,528	252,354	329,155	1,028,122	1,125,953	3,173,112
France ...	23,201	6,943	18,616	29,716	428,267	506,743
Germany ...	9,307	3,439	...	...	...	12,746
Belgium ...	2,782	1,728	867	3,414	786	9,577
Other countries..	...	...	810	463	4,281	5,554
Total ...	472,818	264,464	349,448	1,061,715	1,559,287	3,707,732

Mechanical Transport.

Country.	1907	1908	1909	1910	1911	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Germany ...	240,726	50,681	210,402	398,845	150,587	1,051,241
Belgium ...	92,429	1,233	62,696	140,277	72,232	368,867
United Kingdom	14,454	13,920	59,726	106,909	29,338	224,347
France	14,082	1,707	15,219	927	...	31,935
United States...	...	8,887	...	...	...	8,887
Total ...	361,691	76,428	348,043	646,958	252,157	1,685,277

The value of machinery for local industries imported in 1911 was Rs. 1,559,000 and the imports during the last five years have reached the not inconsiderable total of Rs. 3,700,000. Practically all the machinery comes from the United Kingdom but in 1911 a powerful sugar mill was imported from France. The rolling stock for the light tramways is of foreign manufacture. Two steam ploughs value Rs. 46,700 were imported during the year from the United Kingdom.

The use of motor cars and motor cycles has developed rapidly in the last 3 years. In 1907 13 cars and 2 cycles were imported and in 1908 6 cars and 3 cycles, while during the last 3 years 142 cars valued at Rs. 697,000 and 37 cycles valued at Rs. 23,500 have been imported. The average value of the cars imported rose from Rs. 4,380 in 1909 to Rs. 5,580 in 1911 and of cycles from Rs. 588 to Rs. 769.

The following table shows the countries which export goods to Mauritius and the value of the goods exported, exclusive of specie, in the years 1910 and 1911 :—

Country	Exports to Mauritius.	
—	1910	1911
British India	Rs. 13,237,000 ...	Rs. 15,711,000
United Kingdom... ...	11,282,000 ...	*11,995,000
France	3,089,000 ...	3,317,000
Madagascar	1,069,000 ...	997,000
Australia	1,059,000 ...	618,000
United States	889,000 ...	630,000
Germany	721,000 ...	451,000
Transvaal...	671,000 ...	612,000
Cape Colony	434,000 ...	498,000
Natal	375,000 ...	190,900
Belgium	506,000 ...	387,000
Réunion	317,000 ...	340,000
Straits Settlements ...	248,000 ...	213,000
China	168,000 ...	202,000
Seychelles	55,000 ...	144,000

The United Kingdom, British India or British Possessions are the largest suppliers of wearing apparel, bacon, gunny bags, beer in casks and bottles, books, bran, chemicals for manures, cement, coal, confectionery, dholl, gram, oats, rice, flour, cotton, salt fish, ghee, hardware and cutlery, iron nails, wrought iron, boots and shoes, machinery for local industries, manure (bone), provisions (preserved), salt, soap, whisky, stationery, tea, tin, umbrellas (cotton), shooks, sleepers, timber, woollen goods.

Foreign countries are the largest suppliers of apothecaries' wares, oxen, butter, candles, clocks and watches, enamelled ware, glassware, haberdashery, jewellery, light tramway wagons, locomotives and materials, matches, motor cars, petroleum, cigarette paper, perfumery, potatoes, satin and ribbons, brandy, gin, wine, sulphur, tobacco and cigars, toys, umbrellas (silk), woollen blankets.

Exports.

The total value of the Exports, excluding specie but including charges, was in 1910 Rs. 36,528,536 and in 1911 Rs. 40,414,328.

The following table shows the value and the destination of the products of the Colony, other than sugar, which were exported in 1910 and 1911 :

Product.	Year.	Exported to			
		United Kingdom.	British Possessions.	Foreign Countries.	Total.
		Rs.	Rs.	Rs.	Rs.
Molasses ...	1910	462	510,265	...	510,727
	1911	...	292,964	7	292,971
Rum	1910	15,024	14,737	...	29,761
	1911	24,137	13,377	2,157	39,671
Aloe Fibre ...	1910	536,458	2,116	88,927	627,501
	1911	556,634	3,561	45,357	605,552

---

* Including Railway re-equipment materials.

The following table shows the principal countries to which sugar was exported during the calendar years 1910 and 1911 :

Country	1910. tons.*	1911. tons.*
British India	140,510	106,157
United Kingdom	47,316	77,672
Cape Colony	19,137	17,047
Hong-Kong	3,854	882
Australia	1,860	1,500
Portuguese East Africa	1,161	1,279
Natal	740	665
Seychelles	304	268
Aden	377	332
British East Africa	212	265
Zanzibar	99	123
Ceylon	73	35
France	51	19,544
St. Helena	43	43
Spain	......	6,560
St. Vincent	......	4,643

It will be observed that although British India continues to be the largest purchaser of Mauritius sugar the exports to Europe were, owing to the failure of the beet crop, nearly equal to the exports to India. In 1911 77,672 tons were exported to the United Kingdom as compared with 47,316 tons in the previous year; 19,544 tons were exported to France as compared with 51 tons in 1910 and 6,560 tons were exported to Spain which had not been a purchaser in recent years. Australia and South Africa can no longer be relied on as markets, Queensland and Natal having both become producers. The exports to Australia, which were formerly about one-third of the total crop, fell in 1911 to 1,500 tons. In Natal the sugar industry is reported to have developed rapidly in the last five years. The machinery of the mills has been improved and the area under cultivation has been greatly increased. The yield has risen from 35,000 tons of sugar in 1907 to 92,000 tons in 1911 and it is expected that the 1912 crop will produce 112,000 tons, an amount nearly sufficient to supply all the requirements of South Africa —(*Annual report* (1911), *Durban Chamber of Commerce*).

Agriculture.

SUGAR.

The crop year for sugar begins on the 1st. of August and ends on the 31st. of July of the following year. For the purposes of comparison it is convenient to maintain this distinction.

---

* Metric ton = 1,000 kilogrammes.

The crop for the year closing on the 31st. of July 1912 owing principally to the extremely low temperature during the growing season was deficient in all the districts of the Island with the exception of that of Black River.

The crop of 1910 produced 214,372 tons* of sugar ; the crop of 1911 exclusive of local consumption was 165,806 tons or 23 o/o less than that of the previous year. This figure is arrived at in the following manner :

	Tons*
Exports 1st. August 1911 to 31st. July 1912 ...	165,567
In store on 31st. July 1912—27,372 bags	
„ 31st. July 1911—24,317 „	
Add balance in store (3,055 bags × 78.23 kilos the average weight of 1 bag) ...	239
	165,806

The shortage in the crop was in a measure compensated by the unusually high price at which it was disposed of. The average selling price, as determined by the Chamber of Agriculture, was approximately Rs. 9.68 per 50 kilos giving to the crop a monetary value of about 32 millions of rupees and, on the assumption that the cost of producing 50 kilos of sugar is about Rs. 6.00, leaving a profit of over 12 millions of rupees. The average selling price in 1910 was Rs. 7.09 per 50 kilos and in 1909 Rs. 8.50. With the exception of 1905 when the average price was Rs. 9.70 that of 1911 is the highest in the last 15 years.

The weight and the monetary value of the crop for the last five years is shown below :

	Total Produce Tons*	Monetary value unit Rs. 1,000,000.
1906- 7	214,699	28.3
1907- 8	163,911	24.9
1908- 9	191,491	28.7
1909-10	246,560	41.9
1910-11	214,372	30.4
1911-12	165,803	32.0

The agricultural returns prepared in the Statistical Office of the Chamber of Agriculture show that on the 31st. of December 1911 out of a total area of 439,451 arpents† in the Island, 144,480 arpents were under cultivation in sugar cane. The area shows practically no extension from the previous year in which there was an increase of 16,500 arpents as compared with 1909. During the year under review development in the sugar industry has taken place principally in improvement of the machinery of the mills which, with a further reduction of one, numbered 61 on the 31st. of December 1911. The value of the machinery imported, in addition to that made by local engineering firms, was 1½ million of rupees in 1911, one million of rupees in 1910, and approximately 3¾ millions of rupees during the last five years. In consequence there has been a marked reduction in the period of cane crushing and great improvement in the methods of manufacture. A powerful 14 roller mill of British make and a 9 roller mill of French make were working during the last crop. Both these mills are stated to be capable of crushing 60 tons of cane per hour. The most interesting developments are however to be observed in improvement of the machinery for the treatment of the masse-cuite and the recovery and curing of the sugar. The adoption of the process of crystallisation in movement by means of malaxeurs or sugar mixers, the replacement of the earlier forms of centrifugal machines or turbines by those of the Weston type and double curing of the crystals cannot fail to have an important effect on the output of the high grade consumption white sugar which the Colony exports. The quantity of sugar present as crystals in first masse-cuites, irrespective of their purity, does not greatly vary. A pure juice produces crystals readily recoverable in the centrifugal machines but the small crystals contained in masse-cuite resulting from juice of low purity pass through the perforated baskets in the turbines and are only recovered from the molasses at a later stage in the form of low syrups. The mechanical action of crystallisation in movement permits the fine grain to deposit on crystals already formed so that a larger quantity of first grade sugar is recovered in the centrifugals. The yield is further increased by the process of double curing which though commonly practised in sugar manufacture was only introduced into Mauritius in the course of 1911 by Mr. W. P. Ebbels at Beau Séjour. When the operations of separating the sugar from the molasses, of washing the crystals with water and purging them with high pressure steam are carried out in the same centrifugal machine there is a diminution in the output of sugar and in the quantity of masse-cuite cured. With double curing the washing and purging of the crystals are carried out in a separate machine, and a higher output results. These changes in the methods of manufacture and the use of improved machinery have had for their effect largely to increase the proportion of high grade sugar which is recovered from the masse-cuite as a first product.

---

* Metric ton=1,000 kilogrammes.

† 1 arpent=1.043 acre.

There was a further addition in the course of the year to the already considerable list of insect pests which attack the sugar cane in the appearance of the hitherto unidentified Phytalus Smithi. The damage was fortunately confined to a small area in the Pamplemousses district. The young virgin plantations suffered most, large numbers of larvæ being found at the roots of the canes and in the ground between the lines of canes. In the plantations where the larvæ were most numerous the ground was ploughed and insecticides freely used, but it was not until later when the adult beetle appeared that destruction could be most effectively undertaken. The beetles remain buried in the soil during the day and only take their short flight at sunset. Large numbers of the beetles were collected after dark on hedges, trees and grass and were destroyed. The damage which borers are doing to the sugar cane is specially referred to in the report for 1911 of the Director of the Station Agronomique and concerted measures for the protection of the cane plantations from insect pests and from disease deserve serious consideration.

Other Industries.

There is no progress to record in other forms of cultivation than that of the sugar cane and the history of the Colony shows that development is unlikely to take place without the active assistance of a technical staff and the establishment of agricultural education beginning in the primary schools. Reference was made in the report of 1910 to the possibility of development in the "Mauritius hemp" industry and the need for improved machinery. There are over 50 fibre factories in the island and the area producing fibre is returned at 20,000 arpents. Automatic machinery is generally employed elsewhere for the manufacture of sisal hemp but the adaptability of the same machines for use with the leaves of furcroea gigantea has not been established. At least one important firm of manufacturers is engaged in adapting the sisal machines to the peculiarities of the leaves of furcroea gigantea by practical test. Mauritius seems to offer a profitable field for the conduct of such experiments.

The Customs returns show considerable fluctuations in the imports of coffee, a beverage largely consumed in the Colony. The quantities re-exported are small but the imports vary from 423,000 kilos value Rs. 251,000 in one year to 135,000 kilos value Rs. 67,000 in the following year. The average annual imports during the last five years have been 268,000 kilos value Rs. 149,000. A small quantity of coffee is produced locally and finds a ready market; it is however questionable whether it can be produced on a large scale owing to the liability of the tree to damage by violent storm and the existence of leaf disease. The tea shrub on the other hand is better able to resist storm and there are lands in the higher parts of the island admirably suited to its cultivation. Further the consumption of tea is becoming more general. The imports in 1884 amounted to 26,000 kilos value Rs. 35,000; in 1909 they were 48,000 kilos value Rs. 45,000; in 1910 they rose to 60,000 kilos value Rs. 55,000 and in 1911 to 71,000 kilos value Rs. 70,000. The area under cultivation in tea in 1911 is returned at 260 arpents showing only a very slight increase over the previous year. All the tea produced is disposed of locally the best quality being retailed at 95 cents of a rupee per pound: it would seem that production could with a factory fitted with modern plant profitably be undertaken on a larger scale than at present if only to supply the local demand.

Shipping.

The following comparative tables show the number, tonnage and nationality of ships entered and cleared during the years 1910 and 1911.

Nationality.	1910.						1911.					
	Steam vessels.		Sailing vessels.		Total.		Steam vessels.		Sailing vessels.		Total.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.

German	...	......	...	......	...	......	3	3,560	...	......	3	3,560
Swedish	...	......	...	......	...	......	1	2,287	...	......	1	2,287
Total cleared...	185	479,352	51	18,164	236	497,516	175	425,277	40	14,333	215	439,610

These tables show that 217 vessels with a tonnage of 438,081 reported during the year against 234 with a tonnage of 488,751 in the previous year, giving a total decrease of 17 vessels and a reduction of 50,670 in tonnage :—215 vessels with a tonnage of 439,610 cleared as against 236 with a tonnage of 497,516 in the previous year, showing a decrease of 21 vessels and a reduction of 57,906 in tonnage.

In 1911 19 fewer ships reported with cargo than in the previous year the reduction in tonnage being 64,524, while the ships reported with ballast number two more in 1911 than in 1910, with an increase of 13,854 in tonnage.

The clearances show a decrease of 21 vessels and of 57,906 in tonnage. Divided between vessels cleared with cargo and vessels cleared in ballast, the figures are as follows :

Cleared with cargo	15	tonnage	27,850
Cleared with ballast	6	,,	30,056
	21		57,906

Distinguishing steam vessels from sailing vessels there has been a decrease of 6 in the number reporting and of 47,807 in tonnage as compared with the previous year and a decrease of 10 in the number cleared and of 54,075 in tonnage. The number of steamers reporting with cargo is 13 less than in the previous year with a reduction of 61,921 in tonnage, and the number of steamers reporting with ballast is 7 more than in the previous year with an increase of 14,114 in tonnage. Two fewer steamers cleared with cargo than in the previous year while the number of vessels clearing in ballast was less by 8.

There was a decrease in the number of sailing vessels reporting with cargo of 6 and of those reporting in ballast a decrease of 5 in number. The number of sailing vessels cleared with cargo was less by 13 and of sailing vessels cleared with ballast greater by 2.

III.—LEGISLATION.

Among the more important legislative measures of the year are the following :—

The Police Constitution (Amendment) Ordinance (No. 2) leaves the determination of the numbers, pay and organisation of the police force to the Governor with the approval of the Secretary of State.

The District and Stipendiary Courts (Amendment) Ordinance (No. 3) gives discretionary power to District and Stipendiary Magistrates, in civil causes or matters, to take evidence out of their Courts, in cases where a party or a witness cannot attend through serious and lawful impediment.

The White Phosphorus Matches Prohibition Ordinance (No. 5) gives effect to the provisions of the International Convention for the prohibition of the use of white phosphorus in the manufacture of matches, and is adapted from the Gibraltar Ordinance No. 2 of 1910.

The Plants Diseases Prevention Ordinance (*No. 8*) is borrowed from a Cyprus enactment and was introduced with the object of empowering the Executive to take effective measures for destroying an insect pest which was threatening the sugar industry. The duration of the Ordinance was limited to one year.

The Hurricane Loan Administration (*Amendment*) *Ordinance* (*No. 9*) amends the Hurricane Loan Administration Ordinances Nos. 13 of 1894 and 14 of 1907 by increasing the annual contribution of the Government towards the payment of interest and sinking fund from Rs. 70,000 to Rs. 75,000 a year.

The Public Contracts (*Stamp and Registration*) *Ordinance* (*No. 10*) settles troublesome and moot questions in respect of the stamping and registration of Government Contracts under the Stamp and Registration Laws by enacting that there shall be no fixed period for the registration of such contracts, and by exempting the contracts from stamp duties.

The Surveyors (*Amendment*) *Ordinance* (*No. 11*) requires Surveyors to deposit at one and the same time, and within the statutory delay for registration, the duplicate minutes of every memorandum of survey, at the Registration Office. The Ordinance further provides for the suspension and dismissal of any Surveyor failing to cause a memorandum of survey made by him to be registered within the statutory delay.

The Farmers Protection Ordinance (*No. 13*) is the outcome of the recommendations of a Committee appointed to consider what protection against prædial larcenies could be afforded to small cultivators and farmers; it provides for the registration of "farmers" within the meaning of the Ordinance, and for the better control of persons selling, hawking or being found in possession of vegetables, animals and poultry.

The Post Office (*Amendment*) *Ordinance* (*No. 14*) regulates the conveyance of inland and foreign parcels and the issue and transmission of money and postal orders on the lines of the Imperial Statutes.

The Explosives (*Amendment*) *Ordinance* (*No. 15*) adapts to the existing legislation (Ordinance No. 30 of 1884-85) provisions borrowed from the Trinidad and Tobago Explosives Ordinance (No. 15 of 1907) in respect of search for, seizure, detention and forfeiture of explosive substances.

The Explosive Substances (*Offences*) *Ordinance* (*No. 16*) strengthens the existing penal law by adapting to local circumstances some of the repressive provisions of the Imperial Statutes (46 & 47 VICT. Cap. 3 and 24 & 25 VICT. Cap. 97, Sections 9 and 10), in respect of the criminal use of explosives.

IV.—EDUCATION.

Primary Education.

The Primary schools at the end of the year 1911 numbered 148 of which 60 were Government and 88 Aided schools. The number of Government schools has been reduced from 67 in 1908 principally by the amalgamation of separate schools for Boys and Girls in the same locality. The reduction of one in 1911 is due to the closing of the school at Black River, the few children attending it being able to obtain instruction at the Aided schools in the neighbourhood. Of the Aided schools there were 67 Roman Catholic, 18 Church of England, 2 Presbyterian and 1 Mahomedan. There is an increase of one in the number of Roman Catholic schools as compared with the previous year, one Church of England school having been taken over.

The number of Primary schools, Government and Aided, and the number of pupils for the years 1907 to 1911 are shown in the following table :—

	Government Schools.			*Aided Schools.*		
Years.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.
1907	67	8,615	5,670	90	10,367	6,918
1908	67	8,359	5,242	88	10,226	6,779
1909	64	8,634	5,433	88	10,651	7,234
1910	61	9,326	5,951	88	11,621	7,934
1911	60	9,421	6,030	88	11,589	7,972

The average attendance in Government and Aided schools for the year was 14,002 with a roll of 21,010,showing an average attendance of 66.6% of the number of pupils on the roll. There is a slight improvement as compared with 1910 when with a roll of 20,947 there was an average attendance of 13,885 or 66.2% of the number of pupils on the roll. The figures for 1909 were 19,285 and 12,667 or 65.6%. The number of pupils on the roll and the number in average attendance have increased although the increases are comparatively not so great as in the previous year. The number of pupils on roll and the number in average attendance in the year 1911 are higher than in any previous year.

The number of Indian children attending the Primary schools in 1911 was 8,175, as compared with 7,462 in 1910, 7,125 in 1909 and 6,996 in 1908. The increase is probably in some measure due to the age at which minors may enter into a written contract of service having been raised from 10 to 13 in 1908.

Of the total number of pupils on the roll in the six standard classes

60 o/o passed the examination tests as compared with 62 o/o in 1910 and 53.64 o/o in 1909, while of the number of pupils who were presented for examination 63 o/o passed in 1911 as compared with 65 o/o in 1910 and 57.59 o/o in 1909. The results as compared with those of recent years, and if allowance is made for the increase in school attendance, may be considered as generally satisfactory, but it should not be overlooked that there have not for some time been any changes in the subjects of study. Instruction however appears frequently to be directed too much to the attainment of examination results at the cost of important matters which are not directly tested by examination as is shown by the following extract from the annual report of the Director of Public Instruction :—

"The reports which I have received from the Inspectors and "my own observations indicate that there is much to be done, which "could be done by the present staff of Inspectors, to remedy the defects in the methods of teaching and organisation, if arrangements "could be made to give the Inspectors more time for this work. At "present any improvement which the Inspectors can produce in the "schools is produced mainly by showing up their deficiencies by "means of examinations. It would be better if the Inspectors could "spend less time in showing what the teachers ought to do and more "in showing them how to do it. At present, too, no part of the "emoluments of a teacher or of the payments made to a school "depends upon the general quality of the teaching and organisation, as tested by inspection of the schoolwork as it is carried on "day by day. And the system encourages teachers to believe that "nothing has to be done by them but to produce examination "results and that examinations are the only proper test of their "efficiency. Any advice to encourage good handwriting or tidiness "or system or quiet behaviour in the children or anything that is "not directly represented by a result grant in the Code is in too "many cases listened to with little seriousness and very soon "forgotten".

The total expenditure for the year on the salaries of, and grants to Teachers in Primary schools amounted to Rs. 293,634 of which Rs. 135,393 was expended on Government schools and Rs. 158,241 on Aided schools. The figures for 1910 were Rs. 292,608, Rs. 133,885 and Rs. 158,722 respectively. The cost to Government of a pupil in a Government school was Rs. 19.48 and in an Aided school Rs.15.14 as compared with Rs. 19.75 and Rs. 15.14 in 1910.

There are open annually to pupils of Primary schools six scholarships and six exhibitions at the Royal College for which there is keen competition. The exhibitioners receive free tuition and the scholars free tuition and an allowance of Rs. 100 a year. There were 140 candidates in 1911 against 128 in 1910. Eight candidates failed in the test examination and 26 scored the minimum number of marks. The number of candidates from Government schools was 109 and from Aided schools 31 as compared with 81 from Government and 47 from Aided schools in the previous year.

Secondary Education.

Secondary Education is provided by the Royal College, two schools in connection with it and associated schools. 298 candidates from 13 associated schools were presented for examination of whom 84 passed. There were in December 1911, 204 pupils at the College, 101 at Curepipe School and 60 at Port Louis School. Of the 365 pupils at the College and its two schools, 112 did not pay fees.

There were 23 candidates for the London Matriculation Examinations in 1911, six of whom passed, one in the First Division.

There were 91 candidates for the Senior Cambridge Examination, 29 out of the 68 candidates from the College, and one of the 23 others passed. Out of 29 candidates from the Royal College for the Junior Cambridge Examination 16 passed.

There are scholarships and exhibitions in all the classes of the College and there are two valuable scholarships to enable pupils of the College to continue their studies in Europe.

There are 23 girls' schools which are affiliated to the Royal College in connection with the scheme for the Higher Education of Girls. The number of candidates who were presented for examination was 374 of whom 142 obtained Honours Certificates and 42 Pass Certificates. Eighteen girls entered for the Senior Cambridge Local Examination of whom 6 passed. Ten entered for the Junior Division and two passed. The total sum expended in 1911 on the Higher Education of Girls was Rs. 7,275 as compared with Rs. 8,590 in 1910.

Training of Teachers.

There are Government Training schools for men and for women. There were 10 candidates from the Men's Training School for the second class teacher's certificate, of whom 8 passed. There were three candidates from the Women's Training School for the second class certificate, and one candidate for the third class certificate, all of whom passed.

The following table shows the number of candidates for certificates and the number who passed during the year :

Class of Certificate.	Candidates.			Successful.		
	Men.	Women.	Total.	Men.	Women.	Total.
Second	35	6	41	17	4	21
Third	41	29	70	7	11	18
Monitors' ...	105	81	186	22	15	37
Total ...	181	116	297	46	30	76

There are 632 certificated Teachers employed in Government and Aided schools of whom 150 are Head Teachers, 147 Assistant Teachers and 335 Monitors.

Technical Education.

There are eight mechanical engineering apprenticeships for which there were 110 candidates as against 104 in 1910. There are two agricultural apprenticeships for which there were 22 candidates and two engineering studentships for which there were 5 candidates.

Needlework receives attention in Girls' schools and the work of the pupils continues to show improvement. 45 candidates entered for the needlework competition to four of whom apprenticeships were awarded.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Dispensaries.

There are 13 Hospitals, including 5 in connection with the Prisons and Reformatory, and there is also a Hospital ward with 30 beds attached to the Lunatic Asylum. The eight public Hospitals have 947 beds. The total number of "cases" treated at all hospitals as indoor patients was 18,074 and as out patients 6,783 as compared with 18,128 and 5,690 in 1910. The number of "cases" treated at 27 dispensaries was 62,384.

Lunatic Asylum.

There is a Lunatic Asylum and a Lunatic Ward in connection with the Poorhouse of Barkly Asylum. There were 456 patients in the Asylum on the 31st. December 1911 as compared with 416 on the corresponding date of the previous year and the daily average rose from 422 in 1910 to 430.9. The total number of certified lunatics in the Colony on the 31st. of December 1911, including patients out on probation and patients in the Lunatic Ward of Barkly Asylum, was 660 : 406 males and 254 females, giving a proportion of one insane to 564 of population. There were 25 criminal lunatics of whom 21 were males and 4 females.

Poor Relief.

Barkly Asylum is the only institution under the direct control of the Poor Law Commissioner at which paupers receive institutional relief.

The buildings of Barkly Asylum were originally acquired for the purpose of affording institutional relief to the poor. The hospital was later placed entirely under the control of the Medical Department and has come to be used as a general hospital for the district. Arrangements also exist at various religious institutions for the maintenance of aged and infirm paupers at fixed rates, and there is an asylum for pauper lepers in which patients are maintained at the public expense. The maintenance of paupers at these institutions forms the larger part of the expenditure of the Poor Law Department, which amounted to Rs. 224,000 in 1911 as compared with Rs. 239,000 in 1910.

The Poor Law Commissioner reports that there was a further decrease in the number of cases in which relief was afforded exclusive of dispensary treatment. Distinguishing medical relief from other forms of relief the number of " cases " treated free in the Public Hospitals, fell from 14,537 in 1910 to 13,800 in 1911 ; 250 cases are shown to have been treated at the public expense at Canal Street Convent Hospital as against 202 in 1910 and 156 lepers to have been maintained at the public cost at St. Lazare Asylum as against 176 in 1910. There were 52,552 applications at the Public Dispensaries for free medicines as compared with 48,009 in 1910.

The recipients of institutional relief during the year are shown as numbering 1,869 as compared with 1,989 in 1910. In 1911 there were 995 aged and infirm, 640 feeble minded and 234 children, in 1910 the aged and infirm numbered 1,110, the feeble minded 617 and the children 262.

The number of persons receiving out-door relief, permanent or temporary, is shown to be 3,353 of whom 773 were males and 2,580 females as compared with 3,405 in 1910 of whom 834 were males and 2,571 were females.

Savings Bank.

At the Government Savings Bank there was on the 30th. June 1911 a sum of Rs. 3,254,195 to the credit of 28,032 depositors as compared with Rs. 3,000,028 to the credit of 27,316 depositors on the 30th. June 1910. The investment funds amounted to Rs. 3,494,171. Interest is allowed at the rate of 3 o/o.

The following table shows the number of depositors who belonged to the General and Indian populations and the amount standing to their credit on the 30th. June 1911.

	Number	Rs.
General population	15,634	1,710,204
Indian population	12,398	1,543,991

VI—JUDICIAL STATISTICS

Police.

The authorised strength of the Police on the 31st. of December 1911 was 1 Inspector General, 7 Ispectors, 12 Sub Inspectors, 1 Staff Sergeant Major, 2 Check Sergeants, 41 Sergeants, 3 Mounted Orderlies, 50 Corporals, 402 European and Creole Constables, and 205 Indian Constables: 63 men were enlisted in 1911 and the total number of dismissals was 6.

Criminal Statistics.

The number of offences reported to the Police in 1911 was 23,725 as against 22,254 in 1910

They may be classified as follows:

Homicide	29
Other offences against the person	9,454
Prædial Larceny	341
Other offences against property	5,570
Other offences	8,331
	23,725

In connection with these offences 12,335 persons (including 565 persons arrested on suspicion) were apprehended by the Police or summoned before the Magistrates. In 15,088 of the cases no person was charged.

The total number of persons brought before the Magisterial Courts (District, Stipendiary and Bench of Magistrates) in 1911 was 21,842; of these the number prosecuted was 18,105 including persons tried before a Bench of Magistates or committed to the Court of Assizes. The number discharged for want of prosecution by party complaining or for want of evidence was 3,737.

The cases prosecuted in the District Courts (including preliminary inquiries with a view to commitment to the Assizes and Bench cases) were distributed as follows:—

Offences.	Discharged for want of prosecution or evidence.	Dismissed on the merits.	Convictions.	Committed to the Assizes.
Against the person	149	444	935	19
Prædial Larceny	8	15	159	...
Other offences against property	1,836	492	1,691	185
Offences against Revenue, Municipal, Road and other laws relating to the social economy of the Colony	307	296	8,753	4
Other offences	101	280	2,940	...
Total	2,401	1,527	14,478	208

The total number of persons prosecuted before the District Courts during the last five years was distributed as follows :

Year.	Offences against the person.	Prædial Larceny.	Other offences against property.	Other offences (including Revenue cases &c.)	Total.
1907	1,044	453	2,696	12,893	17,086
1908	994	1,156	3,014	10,888	16,052
1909	1,192	432	2,699	12,086	16,409
1910	1,323	206	1,935	12,035	15,499
1911	1,398	174	2,368	12,273	16,213

The convictions (including committal to the Assizes) before the District Courts for the same period were as follows :—

Year.	Offences against the person.	Prædial larceny.	Other offences against property.	Other offences.
1907	722	428	2,169	12,370
1908	732	1,044	2,520	10,798
1909	849	370	2,223	11,235
1910	1,003	175	1,493	11,449
1911	954	159	1,876	11,697

There were 32 cases in which 153 persons were brought before the Assizes in 1911. Of these 94 persons were acquitted or discharged in cases of plunder committed by bodies or bands with open force under article 352 of the Penal Code in connection with the disturbances of the 19th. of January 1911. The number of convictions whether on graver or subsidiary charge was 54.

The following table shows the number of persons convicted at the Assizes during the last five years and the offences for which they were convicted.

Year.	Murder other than wife and child murder.	Manslaughter and attempt at.	Attempt at murder.	Murder of wife, reputed wife or concubine.	Including attempts to commit the several offences.									
					Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injury to property.	Larceny with aggravating circumstances.	Other offences against property.	Miscellaneous.
1907	...	4	2	...	...	...	...	2	...	20	13	15	1	...
1908	...	3	...	...	...	1	...	4	...	13	28	21	2	...
1909	3	1	...	..	...	...	...	2	...	30	3	12	1	...
1910	...	3	...	...	...	...	...	6	...	24	3	8	...	1
1911	...	1	...	...	...	...	...	...	...	2	49	2	...	...

In 1911 5 persons were tried at the Assizes for offences against the person as compared with 36 in 1910, the number convicted being 3 in 1911 and 33 in 1910. The number of persons tried at the Assizes for offences against property was 148 in 1911 of whom 51 were convicted and 16 in 1910 of whom 11 were convicted.

PRISONS AND REFORMATORY.

There was a decrease of 364 in the number of prisoners admitted to prison after conviction as compared with 1910, the figures are :—

	Males	Females	Total
1910	4,249	188	4,437
1911	3,905	168	4,073

The number of prisoners under detention on the 31st. of December 1911 was 774 as compared with 765 on the corresponding date in the previous year. The daily average number under detention shows a decrease of 61.22 as compared with 1910, the daily average for that year being 920.52 as against 859.30 in 1911.

The deaths in the Prisons numbered 23 as compared with 21 in 1910.

The daily average number under treatment in the Prison Hospitals was 38.55 in 1911 as compared with 35.67 in 1910 : the prevailing diseases were malaria and dysentery.

There were 16 escapes and the same number in 1910. Fifteen of the prisoners who escaped were recaptured during the year.

The number of offences against discipline by prisoners was 2,595 as compared with 2,847 in 1910. The number is high but in a great measure due to the enforcement of a full task from prisoners undergoing sentences of hard labour.

The numbers admitted to the Reformatory in 1911 were 80 new boys, 43 ex-Reformatory boys, 48 untried,— a total of 171 as against 166 in 1910. There was a decrease of 8·76 in the daily average as compared with 1910.

Of the 123 boys who were admitted on conviction, 86 entered the Institution with sentences of 6 months or less, of whom 55 were sentenced to a month or less, and 22 of these to sentences varying between two and six days.

One death occurred during the year, due to pneumonia. The general state of health of the boys was fair except for the temporary appearance of bilharziasis. The admissions to hospital increased by 15 as compared with the previous year and two cases of typhoid were removed to Barkly Asylum Hospital, both patients recovering.

The discipline among the boys was satisfactory ; there were 94 departmental offences as against 121 in 1910. The offences were committed by 42 boys, 21 of whom infringed the rules for the first time. Two boys of mischievous disposition together incurred 20 reports. None of the offences were of a serious nature.

VII.—VITAL STATISTICS.

A Census of the population was taken on the night of Friday the 31st. of March 1911. The returns show that the resident population of Mauritius and the adjacent islands, exclusive of the population of the Dependencies, of the Military in barracks and of foreign shipping, numbered 368,791 of whom 194,095 were males and 174,696 females.

The population in barracks was returned as 1,602 and 34 officers and men residing out of barracks were enumerated in the general population. The population of the Dependencies amounted to 6,690 bringing the total population of the Colony and its Dependencies, exclusive of foreign shipping, up to 377,083 persons of whom 199,138 were males and 177,945 females.

For the first time since the Census of 1846, the population of Mauritius and the adjacent islands is found to be a decreasing quantity being 2,232 less than in 1901, of which 843 is attributable to a decrease in the general population and 1,389 to a decrease in the indian population.

The general population was highest in 1861 when it numbered 117,416; it fell to 99,784 in 1871 and rose again to 114,668 in 1891; during the following intercensal period it decreased by 2,731 and fell to 111,094 in 1911. The indian population was greatest in 1901 when it numbered 259,086: it fell to 257,697 in 1911. In the total population the males have steadily decreased from 208,655 in 1881 to 194,095 in 1911 and in the general population the females now exceed the males.

In the Census Report the returns of the civil condition of the population have for the first time been drawn up in age periods and the classification of occupations is made to follow that of the report on the Census of the British Empire in 1901. The returns show a marked tendency on the part of the Indian population to replace the General population under the three main occupational classes—Professional, Commercial and Industrial—and there is a large decrease in the Indian Agricultural Class.

Births and Deaths.

There were 13,326 births registered during the year. The law allows a delay of 45 days for free registration and the number of births which were not registered owing to death intervening before registration was 1,258. The total number of births was accordingly 14,584 of which 7,365 were males and 7,219 females. The deaths registered number 12,204.

Public Health.

In commenting on the prevalence of sickness the Director of the Medical and Health Department observes in his report for 1911 that—

“ The disease that caused most deaths was Malaria—4,313
“ deaths being attributed to this disease alone, *i.e.* more than one-
“ third of the total. This figure is not reliable; “ la fièvre ” is a
“ common and easy diagnosis and is the cause of death usually
“ given when the registration is made by the friends of the de-
“ ceased and without a certificate from a medical man. The next
“ highest comes Pneumonia with 1,186, Tuberculosis, 836, and
“ Debility (Ankylostomiasis ?) 809. Adding the deaths caused by
“ these diseases and subtracting their sum from the total deaths,
“ we find that 58.5 o/o of the people who die in Mauritius die from
“ diseases that are now looked upon as preventable ones and that
“ with proper sanitary precautions it should be possible to reduce
“ the death-rate of the Island considerably. As I have said above,
“ the figures for malaria are not reliable, but considering the
“ weakening of resisting power caused by repeated attacks of ma-
“ laria, we may take it as certain that though many of the deaths
“ recorded as due to malaria were not immediately due to that

" disease, the possibility is that they would not have occurred if the " patient had not been weakened previously by several attacks of " fever during his life."

There was a decrease in the cases of plague, the total numbering 173 as compared with 731 in 1910. The number in 1911 is, with the exception of 1908 when there were 167 cases, the lowest since the first outbreak in 1899: 131 cases were fatal giving a death rate of 75.7 o/o. The worst month of the year was January when 86 cases were recorded; then 22 in February, 5 in March and 6 in April the last being declared on 20th. April. No further case was reported until June 2nd. The next was reported on 27th. August and from September to the end of the year there were 51 additional cases. There was a sharp outbreak in the town of Rose Hill between the 18th. of November and the 11th. of December when there were 19 cases of which 13 proved fatal. An insanitary block of buildings in which the cases occurred was demolished and there has been no subsequent case in the town.

Malaria.

Malaria fever accounted for 2,117 cases appearing on the hospital returns. Malaria is distinctly on the decrease: the cases in 1911 were 221 fewer than in 1910 and the lowest number in any of the last ten years. The following are figures for the years 1907 to 1911.

Year ...	1907	1908	1909	1910	1911
Cases ...	4,272	5,071	3,929	2,338	2,117

The case mortality was 0.89 o/o an increase of .01 o/o as compared with the previous year. Of the total of 12,204 deaths in the Colony in 1911 4,313 were ascribed to fever. Corresponding to the decrease in the cases of malaria treated in the hospitals there is a decrease in the number of cases of splenic hypertrophy, the figures for 1908, 1909, 1910 and 1911 being 1193, 886, 561 and 380 respectively.

The spleen census and treatment of school children with quinine has been continued and a number of minor anti-malarial works have been carried out under the supervision of the officers of the Sanitary Branch of the Medical and Health Department.

Vaccination.

The number of children presented for vaccination at the public vaccine stations was 11,290 as compared with 10,312 in 1910. Of this number the Public Vaccinators certified 11,090 to have been successfully vaccinated; 68 vaccinations were unsuccessful. The percentage of successful vaccination was 98.2 o/o and of the infants born during the year 77 o/o were vaccinated.

Meteorological.

Meteorological observations are taken at the Royal Alfred Observatory, Pamplemousses, and at eleven second order stations. The Observatory is about three miles from the West coast and is 179 feet above sea level. There are considerable variations both in temperature and humidity in the different parts of the island, the coast districts being hotter and drier than the higher altitudes in the interior. Hurricanes occur between December and April which is the hottest season.

The mean rain-fall from 73 stations was 79.97 inches as compared with 64.12 inches in 1910 (71 stations) and an average of 79.23 inches. A severe drought commenced in July and persisted throughout the remainder of the year being exceptionally severe in November. The rain-fall at the Observatory for the year was 46.30 inches as compared with an average of 47.95 inches for the period 1875–1910. The number of "rainy days" recorded was 150 as compared with an average of 204, a "rainy day" being one in which .005 inches or more of rain was measured.

The mean temperature of the air at the Observatory was 72°.8 as compared with an average of 73°.4, the highest temperature recorded being 92°.3 on the 2nd. and 5th. of December and the lowest 54°.8 on the 11th. and 12th. of June. The highest and lowest temperatures recorded at the Observatory between 1875 and 1910 were 94°.7 on the 23rd. of December 1900 and 49°.9 on the 8th. of August 1907.

The temperature abnormality curve showed a long negative wave lasting from January to August. This wave was a continuation of the period of low temperature which commenced in 1909, the mean monthly temperature being above normal in only one month out of the twenty-five from August 1909 to August 1911 inclusive.

During the year 1911, so far as is yet known, there were eight cyclonic disturbances in the South Indian Ocean as follows :—

January	28 to 31
February	1 to 7
March	7 to 12
,,	23 to 24
March	29 to 31
November	20 to 25
,,	25 to 29
December	15

The cyclone of March 29 to 31 caused some damage to crops and property in the Central and Southern portions of the Island, while that of November 25 to 29 passed near Rodrigues, and that of December over or near Agaléga, causing considerable damage.

VIII.—POSTAL AND TELEGRAPH SERVICES.

The total number of Offices open in 1911 was 63 of which 57 were also Telegraph Offices. Forty-eight of the Post Offices are at Railway Stations and 15 are in districts at a distance from the Railway system.

The revenue for the year 1911 was Rs. 182,622 as compared with Rs. 202,733 in 1910. The expenditure was Rs. 156,830 in 1911 and Rs. 144,669 in 1910 leaving an excess of Revenue over Expenditure of Rs. 58,064 in 1910 and Rs. 25,792 in 1911.

The total estimated number of letters, post cards, newspapers and postal packets, exclusive of parcels, which passed through the Post Office in 1911 was approximately 3,077,321 as compared with 3,195,306 in 1910. Foreign letters, post cards and newspapers showed decreases as did Inland post cards and newspapers ; while there was an increase in Inland letters which may partly be accounted for by the introduction of letter cards. The system of reply coupons was inaugurated towards the close of the year. The number of postal parcels received and despatched increased by 298, the figures being 14,803 for 1910 and 15,101 for 1911. The number of parcels received from abroad increased by 663 and the duty collected amounted to Rs. 41,212.

The number of Inland money orders issued and paid was 43,358 and their value Rs. 449,105 being an increase of Rs. 121,498 over the previous year. The number of money orders issued on Foreign Countries was 9,322 and their value Rs. 272,466 being Rs. 12,349 less than in 1910.

There was a large decrease in the money order business with Rodrigues the rates of commission having been raised in the course of the year. There was again an increase in the postal order business : the orders issued and received increased in number from 5,318 to 6,435 and in value from Rs. 51,069 to Rs. 62,828. The increase in the orders issued was 438 in number and Rs. 3,581 in value and in orders received 679 in number and Rs. 8,177 in value.

There are 359 miles of Telegraph and 110 miles of Telephone wires under the charge of the Department. During the year under review all the wires between Quatre Bornes and Curepipe and between Montagne Blanche and Rivière Sèche were renewed. An eight pair (16 wire) cable was laid through the Central Railway Station.

The Railway has not a telegraphic system of its own and the ordinary messages for the working of the traffic and for the administration of the Department are transmitted over the Post Office wires. The number of Railway messages and signals transmitted in 1911 was 132,401. The number of messages sent by the public increased in 1911. Out of a total number of 255,084 messages forwarded 59,274 were sent by the public as compared with 47,713 out of a total of 270,648 in 1910. The receipts for the messages sent by the public amount to a little over Rs. 25,123 in which charges for porterage are included.

IX.—RAILWAYS.

There is a single line of Railway of 120 miles in length. The gauge is 4 feet 8½ inches.

The earnings from all sources for the year amounted to

Rs. 2,601,001 as compared with Rs. 2,761,529 in 1910 being a decrease of 5.81 o/o. Excluding Government Traffic the earnings amounted to Rs. 2,392,482 being Rs. 170,360 less than in 1910. The services performed for Government Departments for which no cash payments were made would at ordinary rates have cost Rs. 208,519 of which Rs. 174,278 for Passenger Traffic, Rs. 29,455 for Goods Traffic and Rs. 4,786 for Parcels, representing 8.02 o/o of the total traffic as compared with 7.19 o/o in 1910.

The receipts for passenger traffic were greater than in any previous year and amounted to Rs. 1,219,714. They exceeded the receipts of 1910 by Rs. 52,682 and the mean of the last ten years by Rs. 102,787. The increase is principally in the ordinary 3rd. class tickets. It is difficult to estimate the exact effect of the more general use of motor cars during the last 3 years on the receipts for 1st. and 2nd. class passenger traffic. The number of motor cars licensed in 1911 was 164 and of motor cycles 25. In 1908 the receipts from 1st. and 2nd. class season tickets were Rs. 124,842 and from ordinary tickets Rs. 129,240 a total of Rs. 254,082. The figures for 1911 were Rs. 121,803, Rs. 142,793 and a total of Rs. 264,596. Whatever loss of traffic there may have resulted to the Railway it is probable that at least a part could be regained by the establishment of a quicker service of passenger trains on the busiest section of the line between Port Louis and Curepipe Stations which improvements in rolling stock and the system of working will eventually make possible.

The following table shows the tonnage of Goods Traffic, exclusive of Government traffic, carried in 1910 and 1911 :

	1910.	1911.	Decrease.
Sugar Canes ...	157,762	131,418	26,344
Sugar ...	172,062	138,164	33,898
General Merchandize ...	209,888	182,342	27,546
Total ...	539,712	451,924	87,788

The total tonnage carried was 87,788 tons or 16.27 less in 1911 than in 1910. This reduction is mainly due to the shortage in the sugar crop. The aggregate earnings for goods traffic were Rs. 203,015 or 15.27 o/o below those of 1910. The earnings for sugar cane traffic were Rs. 104,415 or 79.45 cents of a rupee per ton carried as compared with 79.19 cents in 1910. The earnings for sugar traffic were Rs. 538,917 or Rs. 3.90 per ton carried as against Rs. 3.80 in 1910. The earnings for general merchandize were Rs. 483,439 or Rs. 2.65 per ton carried as against Rs. 2.61 in 1910. The total expenditure charged to capital account including all sums paid from general revenue, surplus balances or loans up to the 31st. of December 1911 was Rs. 30,583,168* in which is included Rs. 2,377,000 advanced on account of the re-equipment of the

---

* Figures subject to confirmation by the Treasury.

Railways and which is eventually to be met from loan funds. The working expenses for 1911 amounted to Rs. 1,597,853. The ratio which working expenses bore to earnings showed an increase of 3.68 o/o as compared with 1910, the figures being 66.78 o/o and 63.10 o/o respectively. The net earnings amounted to Rs. 1,003,148 or 3.28 o/o on the capital. The actual payments made to the Treasury by the Railways in 1911 amounted to Rs. 2,496,192 and deducting charges for working expenditure, interest and sinking fund of loans and pensions there remained a balance of Rs. 299,969 which sum does not include any credit for work done for Government Departments.

The following work in connection with the re-equipment of the Railways was undertaken in 1911. Three 16″ cylinder six wheels coupled tank engines, six 2-8-2 85 ton side tank engines, 3 pasenger coaches, 1 brake van, 85 open high sided 20 ton wagons and 132 covered 23 ton wagons were erected. Turntables were put up at Port Louis, Mahebourg and Rose Belle Stations. Eight miles of the permanent way were relaid with 80 lbs. B.S. bull headed rails. The steel work for eleven bridges on the Midland line was rivetted ready for erection. On the Plaine Lauzun—Richelieu deviation line 12,000 cubic yards of excavation were completed, and 2,400 feet of permanent way was laid and ballasted ; one-third of the masonry work of the St. Louis bridge and the excavations for the abutments as well as one pier of the Grand River bridge were completed.

Bois Chéri.

There is a light railway of 2 feet 6 inches gauge running from Rivière du Poste Station on the Savanne Branch of the Midland Line to Mexico. The length of the line is 10 miles. The total goods traffic carried in 1911 amounted to 12,695 tons of which 10,362 tons were sugar cane as against a total traffic of 13,516 tons and 10,782 tons of sugar cane in 1910. The actual working expenses for 1911 were Rs. 14,756, the earnings Rs. 6,243 and the work done for Government Departments was valued at Rs. 1,374. The corresponding figures for the previous year were Rs. 11,504, Rs. 9,142 and Rs. 1,724.

The decrease in the sugar cane traffic from the high land through which the line passes is greater than the figures indicate. Of the total carried in 1911 4,000 tons was entirely new traffic from Joli Bois Estate to Gros Bois factory.

X.—PUBLIC WORKS.

The most important works undertaken by the Public Works Department during the year were in connection with the reconstruction of road bridges, the Mare-aux-Vacoas water works and the Port Louis drainage works.

Bridges.

The reconstruction of two large bridges in the district of Savanne was undertaken. Colville bridge with one span of 50′ and one of

42′ 6″ had not been completed at the close of the year but Ste. Marie bridge with three spans of 35 feet was completed at a cost of Rs. 24,500. Seven small bridges in the same district were also rebuilt.

Mare-aux-Vacoas Water Works.

The reservoir at Mare-aux-Vacoas, where the average annual rainfall is 137 inches, has a catchment area of about 5 square miles. The top water level is 1,840 feet above the mean sea-level and the reservoir has a maximum capacity of 570 millions of gallons. The water flows from the Reservoir for 4,900 feet in an open channel and for a further distance of 7,700 feet is taken in a 16″ cast iron pipe to the filtering establishment at La Marie, which is 1,645 feet above sea-level.

At the filtering establishment there is a depositing reservoir with a capacity 1,300,000 gallons and a covered service reservoir with a capacity of 500,000 gallons. Owing to the water being at times heavily charged with organic matter the "Anderson Process" for the purification of water was installed and concrete partitions were erected in the depositing reservoir to improve the settlement of solids. Originally there were only 4 filter beds with a superficial area of 6,720 square feet, but five additional filter beds have since been constructed with a superficial area of 18,000 square feet, and extra aerating trays have been added. These additional works and the increased filtration area enable two filters to be always left exposed to sun and air and with a slower process of filtration there are few complaints of the quality of the water.

The daily consumption of water exceeds 1,600,000 gallons and with the exception of the supply to the town of Curepipe the water flows by gravitation to the lower districts. The supply for Curepipe is pumped by means of hydraulic rams to two reservoirs standing 368 feet above the filtering establishment, the motor being driven by water power from the 16″ supply main. The increase in the population of Curepipe has necessitated additions to the pumping plant and the reconstruction of the reservoirs. A masonry building was erected at the filter beds for the pumping machinery and a second 16″ cast iron pipe has been laid to supply the motive power. The open conduit from the reservoir to the filter beds which is liable to pollution is being replaced by a concrete conduit with a ferro concrete covering.

Port Louis Drainage Works.

The Port Louis drainage works were begun in 1895, the sewers being designed on the separate system and the surface drainage being carried in the street gutters to the various streams which flow into the harbour. The town is divided for drainage purposes into four districts three of which drain by gravitation sewers into separate collecting wells which are connected by means of syphon pipes to the pumping station near Caudan Bassin. From there, the sewage is pumped through cast iron pipes for 7,000 feet to the sea outfall at the mouth of Grand River North West and is discharged in 10 feet of water at low tide, a thousand feet from the shore. Sewers have been laid in districts Nos. 2 and 3, the laying of the sewers in district No. 4 is being proceeded with ; the enlargement of the pumping station has been completed and the additional pumps have been installed. The total length of sewers laid is 19.28 miles and 732 properties have been connected. The amount expended on construction works in districts 2, 3 and 4 is Rs. 796,740 and on house services Rs. 470,000.

XI.—FORESTS AND GARDENS.

The area of forests, mountain and river reserves and curatelle lands under the care of the Forest Department was 84,866 acres of which 68,296 acres are Crown lands, 10,330 acres Mountain Reserves and 6,000 acres River Reserves.

Utilization.

The improvement fellings at Kanaka and Talbot were continued on a limited scale yielding about 490 cubic feet of timber. Improvement fellings were also begun during the year at Coutanceau which adjoins Talbot and has an area of 304 arpents. The wood-crop was found to be in much the same condition as in Kanaka and Talbot the trees being partly or wholly destroyed from the effects of wind, insects and fungi, and the yield thereby greatly diminished. The tramway line was extended across Talbot to permit of the extraction of the timber. Public establishments were supplied with 4,896 cords of firewood taken principally from the Port Louis district. A trial shipment of logwood from the Pouce Valley was sent to England in the course of the year. About 10 cords of standing timber were cut for one ton of heartwood, the difference being used as fuel. There were difficulties in extracting the wood from the forest in the Pouce Valley which added considerably to the cost of the operation. The cost of felling, extraction by wire rope and final conversion was Rs. 38.14 a ton. The logwood was reported to be of good quality and offers were made for the purchase of larger quantities at 43 shillings per ton f.o.b., Port Louis. The price offered did not permit of operations being profitably continued in the Pouce Valley but it is possible that logwood may be obtained at a less cost from other lands where the difficulties of extraction are not so great.

The cuttings of casuarina on the Pas Géométriques yielded fuel valued at Rs. 25,746 which was sold to the lessees who replanted the areas cleared.

Forest Plantations.

A cyclone in February 1911 did considerable damage to young trees. The year was otherwise favourable to artificial reproduction and the work of raising and planting seedlings was actively carried on. The nurseries in which the greater number of seedlings were raised were Kanaka and Talbot, La Pipe, Nouvelle Découverte, Curepipe, Escalier and Bois Sec. The species propagated included Natte, Colophane, Makak, Ebony, Sandal, Toon, Mahogany, Bois d'Olive, Moreton Bay Pine, Eucalyptus, Camphor, Cinnamon, Champac, Juniper and Cryptomaria Japonica.

The re-afforestation of the catchment area of Rivière Viande Salée and its tributaries in Black River district was continued but some inconvenience was caused through difficulties in transporting plants from other nurseries. During the year about 200 acres were acquired in the Nicolière Mountain in Pamplemousses district. A considerable part of the area, forming the gathering ground of Rivière du Rempart is subject to erosion and is being re-afforested.

Gardens.

At the Royal Botanic Gardens, Pamplemousses, the grafting of selected mangoes, including Auguste, Aristide, Rosat, José, Gélée and Villars was continued. From the grafts of the best local varieties 31 were planted at Mon Plaisir. Experiments were carried out in rubber tapping during April. A large number of seedlings were raised in the nurseries and were either sold or used for planting out on Crown lands, but these operations were temporarily interfered with by the restrictions which it was found necessary to impose on the removal of plants from the gardens on account of the danger of the Phytalus Smithi spreading. Further progress was made in the planting of Cacao, Coffee, Mangoes and other fruit trees in Dauguet orchard.

The distribution of indigenous trees from the Curepipe nursery Gardens was continued and a large number of conifers raised in the nurseries were planted on Crown lands or sold to the public. Several new species of conifers and other economic trees were received for experimental growing. The experimental plots of Cowpeas and Pois Sabre were destroyed by the cyclone of February 1911.

XII.—DEPENDENCIES.

The Dependencies comprise a large number of small Islands situated between 5° and 19° 50′ South Latitude and 51° and 72° 30′ East Longitude of which the nearest is 230 miles and the most remote about 1,200 miles distant from Mauritius.

Rodrigues, the largest and most important, is administered by a resident Magistrate, has an area of 40 square miles and had at the Census of 1911 a population of 4,829 of whom 2,523 were males and 2,306 were females. The total population showed as compared with 1901 an increase of 1,667.

The increase was almost entirely in the general population which numbered 4,667 or 1,567 more than in 1901. The Indo-

Mauritian population numbered 102, other Indians 36 and Chinese 24. The male agricultural population has increased considerably in the last ten years and development is noticeable in the trade of the island. The Customs returns show that 69 cattle were sent to Mauritius in 1911 as against 39 in 1910, and that two bulls were introduced for the improvement of stock. In 1911 1,466 pigs value Rs. 26,500 were sent to Mauritius as against 195 value Rs. 4,800 in 1910 and 3,221 goats and sheep value Rs. 11,242 as against 605 value Rs. 2,100 in 1910. The poultry trade is growing but to what extent is not shown by the returns. There was a large increase in the exports of salted fish the figures being 42,000 kilos in 1910 and approximately 270,000 in 1911. Tobacco however showed a decrease from 50,000 to 36,000 kilos.

At the Rodrigues branch of the Government Savings Bank there was on the 30th. of June 1911 a sum of Rs. 22,322 to the credit of 46 depositors as compared with Rs. 7,399 and 33 depositors on the corresponding date of 1910 and Rs. 1,687 and 9 depositors in 1909 in which year the branch was opened.

Most of the Islands in the Lesser Dependencies have been conceded or sold with the exception of a few Islands in the St. Brandon group and two islands in the Diego Garcia group, Tromelin Island, and one near the great Chagos Bank, which are leased. The islands are administered by two Magistrates who are resident in Mauritius and pay regular visits to the Dependencies. The chief exports from the Dependencies are cocoanut oil, cocoanuts, guano and fish (dried and salted).

XIII.—MISCELLANEOUS.

The Coronation of Their Majesties The King and Queen was celebrated in Mauritius with every mark of loyalty and enthusiasm. The 22nd. and 23rd. of June were proclaimed public holidays and the 24th. of June an estate holiday. The celebrations opened with thanksgiving services in the two cathedrals of Port Louis on the morning of the 22nd. of June and later in the day a levee was held by His Honour the Officer Administering the Government at which all classes of the community were represented. In the afternoon there was a review of the troops of the garrison on the Champ-de-Mars when the Colour was trooped by the 3rd. Battalion of the Royal Fusiliers and in the evening the town which was brilliantly illuminated was filled with dense crowds. The Railway carried over 9,000 passengers to the Capital during the day and large numbers travelled by road. The 23rd. of June was devoted to celebrations organised by the Municipal Corporation of Port Louis and the festivities were continued in the districts on later dates. All parts of the Island vied with each other in their manifestations of rejoicing and loyalty. The fact that the personalities of Their Majesties had become known to the inhabitants of Mauritius in the course of the Royal visit of 1901 probably accounts for

the universally personal note of loyalty and respect which found expression in the rejoicings of every class of the community on the occasion of Their Majesties' Coronation.

The extended term of office, as Governor and Commander-in-Chief, of His Excellency Sir Cavendish Boyle K.C.M.G., who left the Colony on leave of absence on the 10th. of April, expired on the 10th. of July 1911. He was succeeded by His Excellency Major J. R. Chancellor R.E., C.M.G., D.S.O., who arrived in the Colony and assumed the Administration on the 13th. of November 1911. In the interval the Government was administered by Mr. George Smith, C.M.G., Colonial Secretary.

J. MIDDLETON,

September 1912.

Assistant Colonial Secretary.

COLONIAL REPORTS—ANNUAL.

REPORT ON THE MAURITIUS BLUE BOOK FOR 1912.

I.—FINANCIAL.

General Revenue and Expenditure.

Revenue.

The revenue for the year 1911–1912 amounted to Rs. 10,435,648, being Rs. 94,768 above the estimate and Rs. 474,344 above the average for the five years immediately preceding. The revenue was less than the revenue from normal sources in the previous year by Rs. 454,341. The total encashments for 1910–11 amounted to Rs. 11,129,989, including Rs. 256,142 derived from Droits of the Crown and Escheats, and for reasons explained in the Report for 1911 a deduction of Rs. 240,000 was made from this item in comparing the revenue of the years 1909–10 and 1910–11.

The following is a comparative statement showing the actual revenue from normal sources collected during the financial years 1910–11 and 1911–12 :—

Head of Revenue.	1910-11.	1911-12.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Customs	4,059,116	3,841,092	...	218,024
2. Harbour	213,259	206,930	...	6,329
3. Licenses, Excise, &c. ...	2,558,911	2,545,369	...	13,542
4. Fees of Court, &c.... ...	368,790	340,871	...	27,919
5. Post and Telegraphs ...	210,275	217,604	7,329	...
6. Railways	2,519,235	2,334,982	...	184,253
7. Rent	74,179	70,466	...	3,713
8. Interest	844,120	828,363	...	15,757
9. Miscellaneous	41,589	47,352	5,763	...
	10,889,474	10,433,029	13,092	469,537
10. Land Sales...	515	2,619	2,104	...
Total	10,889,989	10,435,648	15,196	469,537
Net decrease of normal revenue	...	...	...	454,341

The revenue of 1910–11 exceeded that of any previous year and, with the exception of the year 1909–10 when the receipts from normal sources amounted to Rs. 10,559,318, the revenue of the year 1911–12 most nearly approached that of 1910–11. The heads of revenue under which the receipts in 1911–12 show the greatest disparity as compared with 1910–11 are Customs and Railways, the collections being Rs. 218,024 and Rs. 184,253 less respectively in 1911–12 than in 1910–11. Import duties however in 1911–12 yielded Rs. 85,556 more than the estimate, while Export duties yielded Rs. 100,000 less than the estimate owing to the shortage of the sugar crop. For the same reason the earnings of the Railway from Goods Traffic were less than was anticipated, while the receipts from Passenger Traffic exceeded the estimate. There were small increases as compared with 1910–11 under Post and Telegraphs of Rs. 7,300 due to a reclassification of revenue from stamps, and under Miscellaneous of Rs. 5,800.

There was on the 30th. of June 1911 a surplus balance of Rs. 2,302,239. The revenue for the year 1911–12 exceeded the expenditure by Rs. 591,668 bringing up the surplus at the 30th. of June 1912 to Rs. 2,893,907. From this sum there had been advanced on account of Railway re-equipment Rs. 2,678,557. The accounts for the first half of the current financial year show that the revenue amounted to Rs. 5,544,822 and the expenditure to Rs. 4,929,044. The expenditure was less than the revenue by Rs. 615,778 and at the 31st. of December 1912 the surplus balance had been increased to Rs. 3,509,685. From the 1st. of July to the 31st. of December 1912 advances amounting to Rs. 384,197 were made for Railway re-equipment. The total amount so advanced up to the 31st. of December 1912 was Rs. 3,062,754 and the actual surplus balance at that date was accordingly reduced to Rs. 446,931.

Expenditure.

The expenditure for the year 1911–12 amounted to Rs. 9,843,980, which is Rs. 131,348 below the original estimate, Rs. 265,736 above the expenditure for the previous year and Rs. 108,685 above the average of the preceding five years. The amounts originally estimated to be expended during the year were exceeded to an appreciable extent under the following Heads : Pensions Rs. 10,400, Military Expenditure Rs. 52,700, Miscellaneous Rs. 150,000 and Forests and Gardens Rs. 36,300 ; the expenditure in the first two cases is regulated by special laws, while the excess under Head Miscellaneous includes a sum of Rs. 148,000 paid by way of compensation in connection with the disturbances in Port Louis in January 1911. It was necessary to appropriate an additional sum of Rs. 43,000 under Head Forests and Gardens to meet expenditure on measures for the destruction of an insect pest which seriously threatened the sugar industry in one locality. The following are the principal Heads under which the actual expenditure was less than the original estimate for the year :—Public Works Recurrent and Extraordinary (Rs. 79,000) due to works for which provision had been made not being carried out, Medical and Health (Rs. 73,000), Education (Rs. 40,000), Law and Justice (Rs. 37,000) and Police (Rs. 33,000).

The following is a comparative statement of the Expenditure for the years 1910-11 and 1911-12 :—

Head of Service.	1910-11.	1911-12.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Charge on account of Public Debt	1,236,695	1,244,986	8,291	...
2. Pensions	628,542	671,534	42,992	...
3. Governor and Legislature	93,498	79,048	...	14,450
4. Colonial Secretariat ...	57,806	88,964	31,158	...

25. Dependencies ...	53,866	55,760	1,894	...
26. Military Expenditure ...	473,897	513,256	39,359	...
27. Miscellaneous	681,872	734,449	52,577	...
28. Post Office	164,733	159,291	...	5,442
29. Railways	1,569,664	1,677,237	107,573	...
30. Forests and Gardens ...	165,316	217,996	52,680	...
31. Public Works Department	111,918	111,624	...	294
32. Public Works Recurrent...	496,270	547,477	51,207	...
33. Public Works Extraordinary	193,526	154,046	...	39,480
34. Loan Commission	9,923	9,914	...	9
Total ...	9,578,244	9,843,980	464,898	199,162
Net Increase	...	...	265,736	...

The principal Heads under which the expenditure in 1911-12 was greater than in the previous year were: Railways Rs. 107,500, Forests and Gardens Rs. 52,600, Miscellaneous Rs. 52,500, Public Works Recurrent Rs. 51,200, Pensions Rs. 43,000, Military Expenditure Rs. 39,300, Treasury Rs. 32,600, Medical and Health

Rs. 32,200 and Colonial Secretariat Rs. 31,100, while the expenditure in 1911–12 was less than in the previous year under: Public Works Extraordinary Rs. 39,500, Law and Justice Rs. 34,000 and Police Rs. 23,300.

Assets and Liabilities.

The assets of the Colony on the 30th. of June 1912 were Rs. 2,386,773 and the liabilities Rs. 2,171,423, the assets thus exceeding the liabilities by Rs. 215,350.

The assets included :—	Rs.
Cash in the hands of the Receiver General and sub-accountants	438,414
Investments at cost	671,671
Temporary investments at Bank rate £ 33,000 at 1s. 4 d.	495,000
Miscellaneous advances	364,170
Advances on account of loan authorized for mechanical transport (Ordinance No. 34 of 1902)	342,518
Drafts and Remittances	75,000

The chief liabilities were :—	
General Deposits	2,070,341
Government of India	77,287
Drafts and Remittances	17,934
Loan Funds, unexpended	5,861

There was brought to account during the year expenditure amounting to Rs. 1,066,962 on Railway re-equipment.

Public Debt.

The total indebtedness of the Colony on the 30th. of June 1912 was £ 1,290,690 and the Sinking Funds amounted to £ 324,558, leaving a net debt of £ 966,132 as against £ 990,024 on 30th. June 1911, as compared with a debt of £ 1,147,409 and a revenue of £ 471,172 in 1894.

Under Ordinances No. 10 of 1876, No. 10 of 1879 and No. 2 of 1887 outstanding debentures are redeemed by annual drawings. Provision is made for the repayment of other loans by means of a sinking fund.

The raising of a loan of £ 70,000 for the purpose of making advances to Planters to assist them in substituting mechanical for animal transport on their estates was authorized by Ordinance No. 34 of 1902. The loan was not raised but advances were made partly from temporary advances obtained from the Crown Agents which have

now been settled in full, and partly from Treasury balances. The actual amount lent was £ 185,185 of which there remained due in capital sum on the 30th. June 1912 £ 22,834 as compared with £ 43,323 on the 30th. of June 1911. The last payments on account of sums lent are due to be made in September 1913.

The Railway (Improvement) Loan Ordinance 1910 authorizes the raising of a loan of £ 270,000 for the improvement and re-equipment of the Railways. The loan has not yet been raised, the expenditure incurred to the 31st. December 1912 amounting to £ 204,183 having been met by payment from surplus cash balances.

Currency and Banking.

The Currency of the Colony consists of :—

(1) The following Mauritius bronze and silver coins which are legal tender up to Rs. 5 :

(a) Bronze : 1 cent, 2 cents, 5 cents.

(b) Silver : 10 cents, 20 cents.

(2) The silver rupee of India with its silver subdivisions.

(3) Mauritius Government notes of Rs. 50, Rs. 10 and Rs. 5.

On the 30th. June 1912, the value of Currency notes in circulation was Rs. 5,080,250. The specie held amounted to Rs. 2,760,000 and the Investment and Depreciation Funds to Rs. 2,320,250 and Rs. 328,900 respectively.

The Banks which do business in the Colony are the Bank of Mauritius Limited and the Mauritius Commercial Bank.

MUNICIPALITY OF PORT LOUIS.

The following is a comparative statement of the revenue and expenditure of the Municipality of Port Louis for the five years 1908 to 1912 :—

Year.	Revenue.	Expenditure.
	Rs.	Rs.
1908	476,130	500,776
1909	484,841	476,448
1910	523,494	504,058
1911	510,285	498,614
1912	515,504	509,944

The indebtedness of the Municipality up to the end of the year and the provision for payment are shown below :—

Loan.	Amount.	Repayments to be made in 1913.
Conversion Loan	£ 109,000	£ 2,300
Electric Lighting Loan	7,667	333
Municipality Loan, 1908	3,428	142
Municipality Loan, 1909	4,464	178
	£ 124,559	£ 2,953

Loan.	Amount.	Repayments to be made in 1913.
Government Hurricane Loan, 1892...	Rs. 42,745	Rs. 7,892
Manure Factory and Night Soil Service Loan	8,000	2,000
Municipality Loan, 1903	12,000	2,000
	Rs. 62,745	Rs. 11,892

LOCAL BOARDS.

There are Boards of Commissioners for the towns of Curepipe, Beau Bassin and Rose Hill and Quatre Bornes which are entrusted with the general improvement and conservancy of these towns.

The Board of Curepipe receives the amount of taxes on vehicles and animals collected in the town and of licenses paid by traders and others. The Board may also levy a tax not exceeding one per cent. on house property. The two other Boards receive the amount of the taxes paid on vehicles and animals in the towns and may also levy a similar tax on house property.

The following tables show the revenue and expenditure of the Boards for the past five years :—

CUREPIPE.

	1907-8.	1908-9.	1909-10.	1910-11.	1911-12.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	79,331	73,759	90,966	68,510	73,136
Expenditure	75,659	72,516	85,300	72,008	76,420

BEAU BASSIN AND ROSE HILL.

	1907-8.	1908-9.	1909-10.	1910-11.	1911-12.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	37,044	33,541	35,804	36,996	34,811
Expenditure	37,695	33,476	34,639	36,651	36,507

QUATRE BORNES.

	1907-8.	1908-9.	1909-10.	1910-11.	1911-12.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	13,815	13,842	12,513	12,748	13,374
Expenditure	13,865	13,508	12,615	11,096	11,720

Below will be found a statement of the debts of the Boards :—

Curepipe	Net amount of Debt	Rs. 47,500
Beau Bassin and Rose Hill	,,	Rs. 4,100
Quatre Bornes	,,	nil

There is a District Board for each of the eight rural districts of the Island. To them is entrusted under Ordinance No. 9 of 1900 the maintenance of the branch roads.

They receive as revenue a contribution from Government equivalent to 10 °/₀ of the direct taxes collected in each district during the year and an addition of 10 °/₀ to the direct taxes to be levied in each year in each district, exclusive of Port Louis and the Townships. The additional 10 °/₀ to be levied on the direct taxes may be increased to 25 °/₀ subject to the approval of the Governor in Executive Council. The Government contribution amounted in 1911–12 to Rs. 10,904.

The powers of the District Boards were extended by Ordinance No. 35 of 1902 to include the construction, maintenance and management of water works. For this purpose they receive an annual contribution from Government, which in 1911-12 amounted to Rs. 76,000, and also the proceeds of water rates and of charges paid for water supplies.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.

The Customs returns for the year 1912 show the aggregate value of Imports and Exports, exclusive of specie, to be Rs. 68,895,709, the value of Imports being Rs. 32,002,440 as compared with Rs. 37,440,332 in 1911. Import duties show a decrease of Rs. 138,509 as compared with 1911.

Most of the material imported from the United Kingdom for the re-equipment of the Railways valued at about Rs. 227,000 (as returned by the Railway Department) or Rs. 1,800,000 less than in 1911 has been classified under the head "Hardware and Cutlery", which shows a decrease of Rs. 1,900,000 which is very nearly equal to the decrease in the imports from the United Kingdom under that head.

The aggregate value of Imports and Exports, excluding specie, for the years 1908 to 1912 was as follows :—

Year.	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.
1908	26,199,606	33,691,381	59,890,987
1909	27,013,970	34,424,923	61,438,893
1910	35,014,664	36,528,536	71,543,200
1911	37,440,332*	40,414,328	77,854,660*
1912	32,002,440*	36,893,269	68,895,709*

The value of Imports from, and Exports to the United Kingdom, British Possessions and Foreign Countries during the same years is shown below, (specie is not included) :—

Year.	Imports from (Unit Rs. 1,000.)			Exports to (Unit Rs. 1,000).		
	United Kingdom.	British Possessions.	Foreign Countries.	United Kingdom.	British Possessions.	Foreign Countries.
1908	6,627	13,232	6,339	3,887	29,212	590
1909	7,437	12,288	7,287	4,315	29,667	441
1910	11,282	16,225	7,506	8,267	27,863	397
1911	11,995*	18,130	7,313	13,397	22,170	4,846
1912	11,504*	14,117	6,382	4,467	32,038	389

The following tables show the percentage of Imports from, and Exports to the United Kingdom, British Possessions and Foreign Countries during each of the last five years :—

Imports.

From	1908	1909	1910	1911	1912
United Kingdom	25.3	27.5	32.2	32.1*	36.0*
British Possessions ...	50.5	45.5	46.4	48.4	44.1
Foreign Countries	24.2	27.0	21.4	19.5	19.9

---

* Including Railway re-equipment materials.

Exports.

To	1908	1909	1910	1911	1912
United Kingdom	11.5	12.5	22.6	33.1	12.2
British Possessions ...	86.7	86.2	76.3	54.9	86.8
Foreign Countries	1.8	1.3	1.1	12.0	1.0

An examination of the returns of imports and exports shows that—the United Kingdom and British Possessions supply most of the Colony's needs and purchase nearly all its produce ; the supplies from Foreign Countries are mainly in the groups (1) Food, Drink and Tobacco and (2) Manufactured Articles.

The trade of the Colony is principally with the United Kingdom and India and in normal years the trade with India represents nearly one-half of the aggregate import and export trade.

In 1912 the value of the imports in the group Food, Drink and Tobacco was less by 4½ millions of rupees than in the previous year. There was also a decrease of 2½ millions of rupees in the group Manufactured Articles, while the imports of Raw Materials show an increase of 1½ millions of rupees.

Six commercial travellers deposited samples at the Customs. One represented an English firm and the others French firms. They travelled in woollens, haberdashery, ironmongery and biscuits.

The chief articles contributing to the customs revenue in 1912 were :

	Rs.
Tobacco and Cigars	837,000
Grain (including rice, dholl, etc.)	539,000
Cotton Manufactures	162,000
Oil (manufactured)	147,000
Wines	130,000
Spirits	127,000
Matches	101,000

The export duty on sugar yielded Rs. 618,201.

Imports.

The value of the imports in 1912 was less by approximately 5½ millions of rupees than in the previous year and by 3 millions of rupees than in 1910.

The largest increases as compared with 1911 occur under the following heads :

Cement	Rs. 893,000
Cotton manufactures	418,000
Manures and Fertilizers	383,000
Soap	150,000

The largest decreases occur under the following heads:

Corn grain	Rs. 3,247,000
Hardware and Cutlery	1,912,000
Machinery (Local Industries)	767,000
Provisions (all sorts)	530,000
Animals	460,000
Woodenware	303,000

The meat supply of the Island is obtained from Madagascar from which country it is shown that there were imported in 1912 7,397 oxen of a total value of Rs. 465,839 giving an average of approximately Rs. 63 as compared with 7,875 oxen of a total value of Rs. 847,692 and an average of Rs. 107.6 in 1911, and 8,167 oxen of a total value of Rs. 799,975 and an average of Rs. 97.9 in 1910. The values given for 1910 and 1911 appear excessive as the average selling price of the oxen in the local market varies from Rs. 70 to Rs. 80 per head. The imports of rice, which is the chief article of food of the majority of the population, was approximately 50,000 tons (metric) as compared with 69,000 tons in the previous year, the value of the importations being Rs. 6,605,000 in 1912, and Rs. 9,200,000 in 1911. India supplied practically all the rice imported ; the importations from Madagascar amounted to only 25 tons and 90 tons were imported from China. The imports of dholl from India fell from 7,207 tons value Rs. 814,000 to 4,577 tons value Rs. 508,000.

The importations of coal increased from 44,774 tons to 56,984, the United Kingdom continuing to be the principal source of supply.

There was a decrease of Rs. 767,000 in the value of imports of machinery for local industries and of Rs. 92,000 in machinery for mechanical transport. The following tables give the value and country of origin of importations under the heads Machinery and Mechanical Transport for the years 1908 to 1912.

Machinery.

Country.	1908	1909	1910	1911	1912	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
United Kingdom.	252,354	329,155	1,028,122	1,125,953	667,535	3,403,119

Belgium ...	1,728	867	3,414	786	2,101	8,896
Germany ...	3,439	...	...	...	646	4,085
Other countries...	...	810	463	4,281	...	5,554
Total ...	264,464	349,448	1,061,715	1,559,287	792,028	4,026,942

Mechanical Transport.

Country.	1908	1909	1910	1911	1912	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Germany ...	50,681	210,402	398,845	150,587	89,965	900,480
Belgium ...	1,233	62,696	140,277	72,232	53,043	329,481
United Kingdom.	13,920	59,726	106,909	29,338	17,472	227,365
France	1,707	15,219	927	...	...	17,853
United States ...	8,887	...	...	...	...	8,887
Total ...	76,428	348,043	646,958	252,157	160,480	1,484,066

The value of machinery for local industries imported in 1912 was Rs. 792,000 and the imports during the last five years amount to Rs. 4,000,000. Practically all the machinery comes from the United Kingdom, the rolling stock for the light tramways being of foreign manufacture.

The use of motor cars and motor cycles has developed rapidly in the last 4 years. In 1907 13 cars and 2 cycles were imported and in 1908 6 cars and 3 cycles, while during the last 4 years 219 cars valued at Rs. 1,058,000 and 53 cycles valued at Rs. 33,000 have been imported. The number of motor cars imported in 1912 was 77 valued at Rs. 361,239 and of cycles 16 valued at Rs. 9,688.

The following table shows the countries which export goods to Mauritius and the value of the goods exported, exclusive of specie, in the years 1911 and 1912 :—

Country	Exports to Mauritius.	
—	1911	1912
British India	Rs. 15,711,000 ...	Rs. 12,186,000
United Kingdom ...	*11,995,000 ...	*11,504,000
France	3,317,000 ...	2,906,000
Madagascar	997,000 ...	617,000
Australia	618,000 ...	396,000
United States	630,000 ...	847,000
Germany	451,000 ...	354,000
Transvaal	612,000 ...	311,000
Cape Colony	498,000 ...	564,000
Natal	190,000 ...	181,000
Belgium	387,000 ...	544,000
Réunion	340,000 ...	356,000
Straits Settlements ...	213,000 ...	371,000
China	202,000 ...	154,000
Seychelles	144,000 ...	8,000

---

*Including Railway re-equipment materials.

The United Kingdom, British India or British Possessions are the largest suppliers of wearing apparel, bacon, gunny bags, beer in casks and bottles, books, bran, chemicals for manures, cement, coal, confectionery, dholl, gram, oats, rice, flour, cotton, salt fish, ghee, hardware and cutlery, iron nails, wrought iron, boots and shoes, machinery for local industries, manure (bone), provisions (preserved), salt, soap, whisky, stationery, tea, tin, umbrellas (cotton), shooks, sleepers, timber, woollen goods.

Foreign countries are the largest suppliers of apothecaries' wares, oxen, butter, clocks and watches, enamelled ware, glassware, haberdashery, jewellery, light tramway wagons, locomotives and materials, matches, motor cars, petroleum, cigarette paper, perfumery, potatoes, brandy, gin, wine, sulphur, tobacco and cigars, toys, umbrellas (silk).

Exports.

The total value of the Exports, excluding specie but including charges, was in 1911 Rs. 40,414,328 and in 1912 Rs. 36,893,269.

The following table shows the value and the destination of the products of the Colony, other than sugar, which were exported in 1911 and 1912 :

Product.	Year.	Exported to			
		United Kingdom.	British Possessions.	Foreign Countries.	Total.
		Rs.	Rs.	Rs.	Rs.
Molasses ...	1911	...	292,964	7	292,971
	1912	30	176,348	...	176,378
Rum	1911	24,137	13,377	2,157	39,671
	1912	4,591	13,911	...	18,502
Aloe Fibre ...	1911	556,634	3,561	45,357	605,552
	1912	640,663	584	40,731	681,978

The following table shows the principal countries to which sugar was exported during the calendar years 1911 and 1912:

Country.	1911. Tons.*	1912. Tons.*
British India	106,157	143,361
United Kingdom	77,672	20,869
Cape Colony	17,047	10,560
Australia	1,500	26,273
Hong-Kong	882	2,017
Portuguese East Africa	1,279	429
Natal	665	575
Seychelles	268	479
Aden	332	657
British East Africa	265	316
Zanzibar	123	275
France	19,544	177
Spain	6,560	......
St. Vincent	4,643	......

It will be observed that British India continues to be the largest purchaser of Mauritius sugar. The exports to Europe fell from 103,000 tons in 1911 to 21,000 tons in 1912. The exports to Australia, which were formerly about one-third of the total crop, rose from 1,500 tons in 1911 to 26,000 tons in 1912.

Agriculture.

SUGAR.

The crop year for sugar begins on the 1st. of August and ends on the 31st. of July of the following year. For the purposes of comparison it is convenient to maintain this distinction.

The conditions under which the crop for the year ending on the 31st. of July 1913 was grown and harvested were by no means favourable. Although temperatures were generally high, drought in the period from October 1911 to January 1912 was severely felt and was followed by excessive rains in February 1912 which were especially harmful in the South Eastern Districts of the Island.

---

*Metric ton = 1,000 kilogrammes.

The generally favourable conditions of April and May were in a measure compensated by dry and cold weather in June.

The crop of 1911 produced 165,806 tons of sugar: the crop of 1912 exclusive of local consumption was 206,677 tons which is arrived at in the following manner :

		Tons *
Exports 1st. August 1912 to 31st. July 1913...		208,772
In store on 31st. July 1913—	598 bags ...	48
„ „ 1912—	27,372 „ ...	2,143
Subtract excess of balance in store in July 1912 over that in July 1913		2,095
Total Produce for Export 1912=		206,677

The average selling price as determined by the Chamber of Agriculture was approximately Rs. 7 per 50 kilos giving to the crop a monetary value of 28.9 millions of rupees and, on the assumption that the cost of producing 50 kilos of sugar is about Rs. 5.50, leaving a profit of over six millions of rupees. The average selling price in 1911 was approximately Rs. 9.68 per 50 kilos the highest price, with the exception of Rs. 9.70 in 1905, recorded in the last 16 years. The average selling price in 1910 was Rs. 7.09 per 50 kilos and in 1909 Rs. 8.50.

The weight and monetary value of the crop for the last five years is shown below :—

	Total Produce Tons *	Monetary value unit Rs. 1,000,000.
1908– 9	191,491	28.7
1909–10	246,560	41.9
1910–11	214,372	30.4
1911–12	165,806	32.0
1912–13	206,677	28.9

The agricultural returns prepared in the Statistical Office of the Chamber of Agriculture show that on the 31st. of December 1912 out of a total area of 439,451 arpents† in the Island 147,897 arpents were under cultivation in sugar cane. This area shows an extension of 3,417 arpents as compared with the previous year and of approximately 20,000 arpents as compared with 1909. There is noticeable in the year under review continued progress in factory improvements and in the adoption of labour saving appliances.

---

* Metric ton=1,000 kilogrammes.

† 1 arpent =1.043 acre.

Shipping.

The following comparative tables show the number, tonnage and nationality of ships entered and cleared during the years 1911 and 1912.

Portuguese	...	...	...	...	...	...	1	879	...	...	1	879
Total cleared ...	175	425,277	40	14,333	215	439,610	148	377,810	36	10,024	184	387,834

These tables show that 187 vessels with a tonnage of 385,258 reported during the year against 217 with a tonnage of 438,081 in the previous year, giving a total decrease of 30 vessels and a reduction of 52,823 in tonnage:—184 vessels with a tonnage of 387,834 cleared as against 215 with a tonnage of 439,610 in the previous year, showing a decrease of 31 vessels and a reduction of 51,776 in tonnage.

The decrease in the number reported is divided between those reporting with cargo and those reporting in ballast as follows:

Reported with cargo	21	tonnage	32,918
„ „ ballast	9	„	19,905
	30		52,823

The clearances show a decrease of 31 vessels and of 51,776 in tonnage. Divided between vessels cleared with cargo and vessels cleared in ballast, the figures are as follows:

Cleared with cargo	24	tonnage	44,773
„ „ ballast	7	„	7,003
	31		51,776

Distinguishing steam vessels from sailing vessels there has been a decrease of 27 in the number reporting and of 48,936 in tonnage as compared with the previous year and a decrease of 27 in the number cleared and of 47,467 in tonnage. The number of steamers reporting with cargo is 17 less than in the previous year with a reduction of 29,009 in tonnage, and the number of steamers reporting with ballast is 10 less than in the previous year with a decrease of 19,927 in tonnage. Twenty-five fewer steamers cleared with cargo than in the previous year with a corresponding decrease of 43,094 in tonnage; the number of steamers clearing in ballast was less by 2 with a corresponding decrease of 4,373 in tonnage.

The number of sailing vessels reporting with cargo was less by 4 with a corresponding decrease of 3,909 in tonnage, the number of those reporting in ballast was greater by 1 with a corresponding increase of 22 in tonnage. There was an increase of 1 in the number of sailing vessels cleared with cargo but a decrease of 1,679 in tonnage; the number of sailing vessels cleared with ballast was less by 5 with a corresponding decrease of 2,630 in tonnage.

III.—LEGISLATION.

Among the more important legislative measures of the year are the following:—

The Audit (Transfer of Powers) Amendment Ordinance, (*No.* 3) and *The Audit (Transfer of Powers) Extension Ordinance* (*No.* 22) give effect to changes in laws, under which certain offices were held and duties performed *ex-officio* by the Auditor General, necessitated by the accounts of Mauritius being placed under the control of the Director of Colonial Audit and by a Local Auditor being appointed in place of the Auditor General.

The Labour Law (Medical Officer's Duties) Amendment Ordinance (No. 4) transfers the various duties and powers attached to the office of Medical Officer of the Immigration Department created under article 25 of Ordinance No. 12 of 1878 or vested in that Officer, to the Director of the Health Department or such officer as the latter may with the Governor's approval appoint.

The Copyright (Repeal) Ordinance (No. 6) repeals the local Ordinance No. 24 of 1851 on the subject of Copyright in consequence of the coming into operation in the Colony under Proclamation No. 33 of 1912 of the Copyright Act, 1911, (1 and 2 Geo. 5 Ch. 46).

The Customs Tariff (Amendment) Ordinance (No. 11) reduces the import duty on ghee, while readjusting the duty on similar articles of diet (butter, margarine and oils).

The Registration of Voters (Amendment) Ordinance (No. 13) amends the law as to registration of voters (Ordinances No. 5 of 1887 and No. 22 of 1895) by providing that all claims by persons desirous of being registered as electors shall be made only in the district in respect of which the vote is to be exercised.

The Widows and Orphans' Pension Fund (Actuaries) Ordinance (No. 14) settles difficulties which have from time to time arisen in respect of the quinquennial appointment of actuaries under article 36 of Ordinance No. 2 of 1886.

The Prosecution of Certain Offences (Amendment) Ordinance (No. 15) empowers the Supreme Court without a jury to try seditious libels, and outrages committed against Public Officers (particularly those entrusted with the administration of Justice).

The Magistrates and Bench Jurisdiction (Extension) Ordinance (No. 16) removes doubts as to the powers of Magistrates to act in any district of the Colony as "Riot Magistrates" under article 127 of Ordinance No. 23 of 1888 and Ordinance No. 11 of 1890; it also includes within the jurisdiction of Bench of Magistrates offences under article 352 of the Penal Code (riotous damage or destruction of property committed by a body or band and with open force.)

The Cinematograph Ordinance (No. 17) provides for the censorship and control of cinematograph exhibitions generally, on the lines of the Grenada Cinematograph Ordinance No. 9 of 1911 and the Hong-Kong Ordinance No. 17 of 1910.

The Money Lending Transactions (Relief) Ordinance (No. 18). This Ordinance is reproduced from the Trinidad and Tobago Ordinance No. 3 of 1912 which is itself borrowed from sections 1 and 4 of the Money Lenders Act 1900 (63 and 64 Vict. Ch. 51). It allows of the re-opening of money lending transactions in the discretion of the Court where there is evidence which satisfies the Court that the interest or the amounts charged for expenses, &c. are excessive, and that the transaction is harsh and unconscionable, or is otherwise such that a Court of equity would give relief. The powers to relieve a borrower under article 1 are advisedly hedged round, as in the English Act, with conditions carefully designed to prevent any abuse. The duration of the Ordinance was limited to one year.

The Pharmacy Ordinance (*No.* 19) consolidates the Pharmacy laws of the Colony. The main improvements are the following :—

In *Part I* it is made compulsory for a Pharmacist's shop to be in charge of a competent and responsible person.

In *Part II* better provision is made for a Board of Examiners and the conduct of examinations and the curriculum of studies.

Part III deals with the attendance of the Pharmacist at his shop, the mixture of drugs, the dispensing of prescriptions, the sale of poisons and the control and inspection of pharmacists' shops.

Part IV deals with the substances to be deemed poisons under the Ordinance and with regulations concerning the same.

The Cremation (*Amendment*) *Ordinance* (*No.* 24) facilitates the procedure relating to applications for cremation, while maintaining all essential safeguards.

The Wireless Telegraphy (*Amendment*) *Ordinance* (*No.* 25) completes the Wireless Telegraphy Ordinance No. 33 of 1903 by providing for the framing and issue of Regulations concerning the use of wireless telegraphy on board Merchant ships, whether British or foreign, while in the territorial waters of the Colony.

The Curatelle (*Amendment*) *Ordinance* (*No.* 27) fixes a commission on a sliding scale on immoveable property and on moveable property not being money actually received as principal, revenue or rent in whatsoever manner vested in the Curator of Vacant Estates ; it further provides for the mode of valuation of property vested in the Curator and for the inscription of mortgage on such property and erasure thereof on proof of payment of the commission. It also fixes the time required for prescription in favour of the Government of estates or property belonging to absentees.

The Civil Status (*Indian Marriages*) *Amendment Ordinance* (*No.* 28) empowers the Governor to appoint Hindu and Mahomedan priests for the celebration of marriages between Hindus or Mahomedans of the same religion as such priests, and provides for the procedure for such marriages and the registration thereof, and for the conditions required for their validity.

The Donations Inter Vivos and Wills (*Amendment*) *Ordinance* (*No.* 29) empowers persons domiciled in the Colony, at the time of marriage, under certain conditions to declare and cause to be recorded their intention that the limitations imposed by the local law (the Civil Code) regarding the power to dispose of property either by gift *inter vivos* or by will shall not apply to any estate, real or personal, of which they or either of them may die possessed.

The Department of Agriculture (Organisation) Ordinance (No. 30) provides for the establishment and organisation of a Department of Agriculture.

The Companies Ordinance (No. 35) places on the Statute Book a measure borrowed from the English Companies (Consolidated) Act 1908 as adapted by the Transvaal Act No. 31 of 1909 with certain additions and modifications to suit local circumstances.

The Supreme Court (Amendment) Ordinance (No. 36) provides for the hearing and determination of certain cases before one Judge only and does away with the compulsory attendance of the *Ministère Public* in Court in causes where the Crown or the public revenue is concerned and in any matter connected with the civil status of any person, any divorce, guardianship of any minor or interdicted person, or in which the Procureur General may, under the existing law, intervene as a party.

IV.—EDUCATION.

Primary Education.

The Primary schools at the end of the year 1912 numbered 149 of which 60 were Government and 89 Aided schools. The number of Government schools has been reduced from 67 in 1908 principally by the amalgamation of separate schools for Boys and Girls in the same locality. Of the Aided schools there were 67 Roman Catholic, 18 Church of England, 2 Presbyterian and 2 Mahomedan. There is an increase of one in the number of Mahomedan schools as compared with the previous year.

The number of Primary schools, Government and Aided, and the number of pupils for the years 1908 to 1912 are shown in the following table :—

	Government Schools.			*Aided Schools.*		
Years.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.	Number of Schools.	Annual average number of pupils on roll.	Annual average number of pupils in attendance.
1908	67	8,359	5,242	88	10,226	6,779
1909	64	8,634	5,433	88	10,651	7,234
1910	61	9,326	5,951	88	11,621	7,934
1911	60	9,421	6,030	88	11,589	7,972
1912	60	9,522	5,775	89	11,987	7,635

The average attendance in Government and Aided schools for the year was 13,410 with a roll of 21,509 showing an average attendance of 62.34 °/₀ of the number of pupils on the roll. There is a further increase in the number of pupils on the roll but a slight decrease in attendance due to sickness in the latter part of the year as compared with 1911 when with a roll of 21,010 there was an average attendance of 14,002 or 66.6 °/₀ of the number of pupils on the roll. The figures for 1910 were 20,947 and 13,885 or 66.2 °/₀. The number of pupils on the roll is greater than in any previous year and notwithstanding the absence of pupils through sickness the average attendance is higher than in any year except 1910 and 1911.

The increase in the number of Indian children attending the Primary schools is maintained, the figures being as follows: 8,316 in 1912—8,175 in 1911—7,462 in 1910—7,125 in 1909 and 6,996 in 1908.

Of the total number of pupils on the roll in the six standard classes 56 °/₀ passed the examination tests as compared with 60 °/₀ in 1911 and 62 °/₀ in 1910 while of the number of pupils who were presented for examination 59 °/₀ passed in 1912 as compared with 63 °/₀ in 1911 and 65 °/₀ in 1910.

The reports of the Inspectors on the examination of the schools indicate the necessity for more frequent visits of inspection at times other than those fixed for holding examinations by which the amounts of the annual grants in aid are determined.

The total expenditure for the year on the salaries of, and grants to Teachers in Primary schools amounted to Rs. 296,860 of which Rs. 133,438 was expended on Government schools and Rs. 163,422 on Aided schools. The figures for 1911 were Rs. 293,634, Rs. 135,393 and Rs. 158,241 respectively. The cost to Government of a pupil in a Government school was Rs. 19.09 and in an Aided school Rs. 15.14 as compared with Rs. 19.48 and Rs 15.14 in 1911.

There are open annually to pupils of Primary schools six scholarships and six exhibitions at the Royal College for which there is keen competition. The exhibitioners receive free tuition and the scholars free tuition and an allowance of Rs. 100 a year. There were 145 candidates in 1912 against 140 in 1911. 21 candidates failed in the test examination and 33 scored the minimum number of marks. The number of candidates from Government schools was 105 and from Aided schools 40 as compared with 109 from Government and 31 from Aided schools in the previous year.

Secondary Education.

Secondary Education is provided by the Royal College, two schools in connection with it, and associated schools. 322 candidates from 13 associated schools were presented for examination of whom 138 passed. There were in December 1912, 220 pupils at the College, 89 at Curepipe School and 15 at Port Louis School. Of the 324 pupils at the College and its two schools, 103 did not pay fees.

There were 24 candidates for the London Matriculation Examinations in 1912. Seven out of the twenty candidates from the Royal College passed, three in the First Division, and one of the 4 others passed in the Second Division.

There were 112 candidates for the Senior Cambridge Examination, 34 out of the 90 candidates from the Royal College and 6 of the 22 others passed. Out of 25 candidates from the Royal College for the Junior Cambridge Examination 8 passed.

There are scholarships and exhibitions in nearly all the classes of the Royal College and there are two valuable scholarships to enable pupils of the College to continue their studies in Europe.

There are 15 girls' schools which are affiliated to the Royal College in connection with the scheme for the Higher Education of Girls. The number of candidates who were presented for examination was 397 of whom 157 obtained Honours Certificates and 32 Pass Certificates. Eighteen girls entered for the Senior Cambridge Local Examination of whom 8 passed. Nine entered for the Junior Division and 6 passed. The total sum expended in 1912 on the Higher Education of Girls was Rs. 9,288 as compared with Rs. 7,275 in 1911.

Training of Teachers.

There are Government Training Schools for men and for women. There were 7 candidates from the Men's Training School for the second class teacher's certificate of whom 2 passed. There were 2 candidates from the Women's Training School for the second class certificate of whom one passed, and four candidates for the third class certificate, all of whom passed.

The following table shows the number of candidates for certificates and the number who passed during the year:

Class of Certificate.	Candidates.			Successful.		
	Men.	Women.	Total.	Men.	Women.	Total.
Second	34	9	43	14	4	18
Third	46	35	81	12	17	29
Monitors' ...	104	107	211	16	22	38
Total	184	151	335	42	43	85

There are 664 certificated Teachers employed in Government and Aided schools of whom 151 are Head Teachers, 156 Assistant Teachers and 357 Monitors.

Technical Education.

There are eight mechanical engineering apprenticeships for which there were 73 candidates as against 110 in 1911. There are two agricultural apprenticeships for which there were 29 candidates as against 22 in 1911 and two engineering studentships for which there were 2 candidates only one of whom was successful.

Needlework receives attention in Girls' schools and the work of the pupils continues to show improvement. 42 candidates entered for the needlework competition to four of whom apprenticeships were awarded.

V.—GOVERNMENT INSTITUTIONS.

Hospitals and Dispensaries.

There are 13 Hospitals, including 5 in connection with the Prisons and Reformatory, and there is also a Hospital ward with 30 beds attached to the Lunatic Asylum. The eight public Hospitals have 1,009 beds. The total number of " cases " treated at all hospitals as indoor patients was 18,641 and as out patients 5,891 as compared with 18,074 and 6,783 in 1911. The number of " cases " treated at 27 dispensaries was 67,578.

Lunatic Asylum.

There is a Lunatic Asylum and a Lunatic Ward in connection with the Poorhouse of Barkly Asylum. There were 437 patients in the Asylum on the 31st. December 1912 as compared with 456 on the corresponding date of the previous year and the daily average rose from 430.9 in 1911 to 441.1. The total number of certified lunatics in the Colony on the 31st. of December 1912 including patients out on probation and patients in the Lunatic Ward of Barkly Asylum, was 668 : 412 males and 256 females, giving a proportion of one insane to 556 of population. There were 29 criminal lunatics of whom 24 were males and 5 females.

Poor Relief.

Barkly Asylum is the only institution under the direct control of the Poor Law Commissioner at which paupers receive institutional relief.

The buildings of Barkly Asylum were originally acquired for the purpose of affording institutional relief to the poor. The hospital was later placed entirely under the control of the Medical Department and has come to be used as a general hospital for the district. Arrangements also exist at various religious institutions for the maintenance of aged and infirm paupers at fixed rates, and there is an asylum for pauper lepers in which patients are maintained at the public expense. The maintenance of paupers at these institutions forms the larger part of the expenditure of the Poor Law Department, which amounted to Rs. 227,600 in 1912 as compared with Rs. 224,000 in 1911.

The Immigration and Poor Law Departments were amalgamated on the 1st. July 1912, and the Protector of Immigrants and Poor Law Commissioner reports that " the introduction of the *Case* " *Paper* system in Port Louis which was effected in the last few " months of the year and the full enquiry which the compilation of " a case paper involves has resulted in a marked decrease in the " number of recipients of outdoor relief in Port Louis ". Distinguishing medical relief from other forms of relief the number of " cases " treated free in the Public Hospitals and General Lunatic Asylum was 14,734 as against 14,331 in 1911 ; 290 cases are shown to have been treated at the public expense at Canal Street Convent Hospital as against 250 in 1911, and 124 lepers to have been maintained at the public cost at St. Lazare Asylum as against 156 in 1911. There were 55,234 applications at the Public Dispensaries for free medicines as compared with 52,552 in 1911.

The recipients of institutional relief during the year are shown as numbering 1,579 as compared with 1,744 in 1911. In 1912 there were 1,299 aged and infirm, 110 feeble minded and 170 children.

The number of persons receiving outdoor relief, permanent or temporary, is shown to be 3,151 of whom 690 were males and 2,461 females as compared with 3,353 in 1911 of whom 773 were males and 2,580 were females.

Savings Bank.

At the Government Savings Bank there was on the 30th. June 1912 a sum of Rs. 3,261,252 to the credit of 28,318 depositors as compared with Rs. 3,254,195 to the credit of 28,032 depositors on the 30th. June 1911. The investment funds amounted to Rs. 3,494,171. Interest is allowed at the rate of 3 %.

The following table shows the number of depositors who belonged to the General and Indian populations and the amount standing to their credit on the 30th. June 1912 :

	Number	Rs.
General population	16,107	1,780,091
Indian population	12,211	1,481,161

VI.—JUDICIAL STATISTICS.

Police.

The authorised strength of the Police on the 31st. of December 1912 was 1 Inspector General, 1 Deputy Inspector General, 6 Inspectors, 12 Sub Inspectors, 1 Staff Sergeant Major, 2 Check Sergeants, 41 Sergeants, 3 Mounted Orderlies, 50 Corporals, 452 European and Creole Constables, and 205 Indian Constables: 131 men were enlisted in 1912 and the total number of dismissals was 37.

Criminal Statistics.

The number of offences reported to the Police in 1912 was 23,790 as against 23,725 in 1911.

They may be classified as follows :

Homicide	19
Other offences against the person	9,055
Prædial Larceny	389
Other offences against property	5,173
Other offences	9,154
	23,790

In connection with these offences 13,247 persons (including 588 persons arrested on suspicion) were apprehended by the Police or summoned before the Magistrates. In 14,205 of the cases no person was charged.

The total number of persons brought before the Magisterial Courts (District, Stipendiary and Bench of Magistrates) in 1912 was 23,104 ; of these the number prosecuted was 20,324 including persons tried before a Bench of Magistrates or committed to the Court of Assizes. The number discharged for want of prosecution by party complaining or for want of evidence was 2,780.

The cases prosecuted in the District Courts (including preliminary inquiries with a view to commitment to the Assizes and Bench cases) were distributed as follows :—

Offences.	Discharged for want of prosecution or evidence.	Dismissed on the merits.	Convictions.	Committed to the Assizes.
Against the person	155	413	1,053	20
Prædial Larceny	3	17	280	...
Other offences against property	944	377	1,643	2
Offences against Revenue, Municipal, Road and other laws relating to the social economy of the Colony	167	336	12,290	1
Other offences	33	229	1,296	...
Total... ...	1,302	1,372	16,562	23

The total number of persons prosecuted before the District Courts during the last five years was distributed as follows :—

Year.	Offences against the person.	Prædial Larceny.	Other offences against property.	Other offences (including Revenue cases &c).	Total.
1908	994	1,156	3,014	10,888	16,052
1909	1,192	432	2,699	12,086	16,409
1910	1,323	206	1,935	12,035	15,499
1911	1,398	174	2,368	12,273	16,213
1912	1,486	297	2,022	14,152	17,957

The convictions (including committal to the Assizes) before the District Courts for the same period were as follows :—

Year.	Offences against the person.	Prædial larceny.	Other offences against property.	Other offences.
1908	732	1,044	2,520	10,708
1909	849	370	2,223	11,235
1910	1,003	175	1,493	11,440
1911	954	159	1,876	11,697
1912	1,073	280	1,645	13,587

There were 11 cases in which 14 persons were brought before the Assizes in 1912. Of these 2 persons were acquitted. The number of convictions was 12.

The following table shows the number of persons convicted at the Assizes during the last five years and the offences for which they were convicted.

Year.	Murder, other than wife and child murder.	Manslaughter and attempt at.	Attempt at murder.	Murder of wife, reputed wife or concubine.	Including attempts to commit the several offences.									
					Child murder.	Concealment of birth.	Abortion.	Rape.	Unnatural crimes.	Other offences against the person.	Malicious injury to property.	Larceny with aggravating circumstances.	Other offences against property.	Miscellaneous.
1908	...	3	...	...	...	1	...	4	...	13	28	21	2	...
1909	3	1	...	...	...	...	...	2	...	30	3	12	1	...
1910	...	3	...	...	...	...	...	6	...	24	3	8	...	1
1911	...	1	...	...	...	...	...	...	...	2	49	2	...	...
1912	...	...	1	...	...	...	...	...	...	6	2	2	1	...

In 1912 9 persons were tried at the Assizes for offences against the person as compared with 5 in 1911, the number convicted being 7 in 1912 and 3 in 1911. The number of persons tried at the Assizes for offences against property was 5 in 1912 all of whom were convicted, as against 148 in 1911 of whom 51 were convicted.

Prisons and Reformatory.

There was an increase of 312 in the number of prisoners admitted to prison after conviction as compared with 1911, the figures being :—

	Males.	Females.	Total.
	—	—	—
1911 ...	... 3,905	168	4,073
1912 ...	... 4,213	172	4,385

The number of prisoners under detention on the 31st. of December 1912 was 717 as compared with 774 on the corresponding date in the previous year. The daily average number under detention shows a decrease of 50.50 as compared with 1911, the daily average for that year being 859.30 as against 808.80 in 1912.

The deaths in the Prisons numbered 25 as compared with 23 in 1911. The daily average number under treatment in the Prison Hospitals was 36.54 in 1912 as compared with 38.55 in 1911: the prevailing diseases were malaria and dysentery.

There were 18 escapes during the year as against 16 in 1911. Fifteen of the prisoners who escaped were recaptured.

The number of offences against discipline by prisoners was 2,682 as compared with 2,595 in 1911. The numbers in both years are high but in a great measure due to the enforcement of a full task from prisoners undergoing sentences of hard labour.

The numbers admitted to the Reformatory in 1912 were 123 new boys, 59 ex-Reformatory boys and 36 untried, a total of 218 as against 171 in 1911. There was a decrease of 6.66 in the daily average as compared with 1911.

Of the 182 boys who were admitted on conviction, 143 entered the Institution with sentences of 6 months or less, of whom 101 were sentenced to a month or less, and 54 of these to sentences varying between three and seven days.

Two deaths occurred during the year, due to dysentery and adenitis from ulcer. The general state of health of the boys was good except for the temporary appearance of measles. The admissions to hospital decreased by 24 as compared with the previous year and one case of typhoid was removed to Barkly Asylum Hospital, where the patient died.

The discipline among the boys was satisfactory; there were 54 departmental offences as against 94 in 1911. The offences were committed by 32 boys, 20 of whom infringed the rules for the first time. None of the offences were of a serious nature.

VII.—VITAL STATISTICS.

A Census of the population was taken on the night of Friday the 31st. March 1911. The returns show that the resident population of Mauritius and the adjacent islands, exclusive of the population of the Dependencies, of the Military in barracks and of foreign shipping, numbered 368,791 of whom 194,095 were males and 174,696 females.

The population in barracks was returned as 1,602 and 34 officers and men residing out of barracks were enumerated in the general population. The population of the Dependencies amounted to 6,690 bringing the total population of the Colony and its Dependencies, exclusive of foreign shipping, up to 377,083 persons of whom 199,138 were males and 177,945 females.

The total population of the Island on the 31st. December 1912 is estimated in the Registrar General's Annual Report at 371,746, exclusive of the Dependencies (6,681).

Births and deaths.

There were 11,824 births registered during the year. The law allows a delay of 45 days for free registration and the number of births which were not registered owing to death intervening before registration was 1,385. The total number of births was accordingly 13,209, of which 6,758 were males and 6,451 females, giving a proportion of 35.5 infants born to 1,000 persons living. The deaths registered numbered 14,429, giving a proportion of 38.7 deaths to 1,000 persons living, the highest since the year 1908.

The birth rate amongst the general population was 32.6 per thousand as compared with 35.6 per thousand in 1911, and amongst the Indian population 36.7 per thousand as compared with 41.1 per thousand in 1911. The death rate amongst the general and Indian populations was 39.6 and 38.4 per thousand respectively as against 31.4 and 33.5 per thousand respectively in the previous year.

Public Health.

The disease that caused most deaths was Malaria—4,498 deaths being attributed to this disease alone. Plague was more than usually virulent in 1912, 541 deaths being due to this disease. An epidemic of whooping-cough broke out, causing 1,064 deaths.

There was an increase in the cases of plague, the total numbering 656 as compared with 173 in 1911; 541 cases were fatal giving a death rate of 82.5 %. The worst month of the year was November when 174 cases were recorded.

Malaria.

Malaria fever accounted for 2,554 cases appearing on the hospital returns. The following are figures for the years 1908 to 1912:

Year ...	1908	1909	1910	1911	1912
Cases ...	5,071	3,929	2,338	2,117	2,554

The case mortality was 1.17 %, an increase of .28 % as compared with the previous year. Of the total of 14,429 deaths in the Colony in 1912, 4,498 were ascribed to fever. Corresponding to the increase in the cases of malaria treated in the hospitals there is an increase in the number of cases of splenic hypertrophy, the figures for 1908, 1909, 1910, 1911 and 1912 being 1,193, 886, 561, 380 and 481 respectively.

The spleen census and treatment of school children with quinine has been continued and a number of minor anti-malarial works have been carried out under the supervision of the officers of the Sanitary Branch of the Medical and Health Department.

Vaccination.

The number of children presented for vaccination at the public vaccine stations was 10,931 as compared with 11,290 in 1911. Of this number the Public Vaccinators certified 10,704 to have been successfully vaccinated ; 93 vaccinations were unsuccessful. The percentage of successful vaccination was 97.9 °/₀.

Meteorological.

Meteorological observations are taken at the Royal Alfred Observatory, Pamplemousses, and at eleven second order stations. The Observatory is about three miles from the West coast and is 179 feet above sea level. There are considerable variations both in temperature and humidity in the different parts of the island, the coast districts being hotter and drier than the higher altitudes in the interior. Hurricanes occur between December and April which is the hottest season.

The mean rain-fall from 69 stations was 96.34 inches as compared with 79.97 inches in 1911 (73 stations) and an average of 79.21 inches. Heavy rains, relatively to the normal, fell in February, May and October, those of the last mentioned month having greatly benefited the forthcoming crop. The rain-fall at the Observatory for the year was 72.92 inches as compared with an average of 47.95 inches for the period 1875–1910, and the number of "rainy days" recorded was 221 as compared with an average of 204, a "rainy day" being one in which .005 inches or more of rain was measured.

The mean temperature of the air at the Observatory was 73°.3 as compared with an average of 73°.4, the highest temperature recorded being 90°.2 on the 4th. of January and the lowest 53°.9 on the 27th. of June. The highest and lowest temperatures recorded at the Observatory between 1875 and 1912 were 94°.7 on the 23rd. of December 1900 and 49°.9 on the 8th. of August 1907.

The abnormality curve of air temperature showed a long negative wave from January to May. From May to December the curve fell, irregularly at first, from 1°.1 above normal to 1°.5 below normal.

During the year 1912 there were eight cyclonic disturbances in the South Indian Ocean as follows :—

January	19 to 24	February	26 to March 1
February	2 to 4	March	18 to 20
„	5 to 11	May	16 to 19
„	21 to 27	November	22 to 27

The exact tracks of these cyclones have not yet been determined.

VIII.—POSTAL AND TELEGRAPH SERVICES.

The total number of Offices open in 1912 was 63 of which 57 were also Telegraph Offices. Forty-eight of the Post Offices are at Railway Stations and 15 are in districts at a distance from the Railway system.

The revenue for the year 1912 was Rs. 218,993 as compared with Rs. 182,622 in 1911. The expenditure was Rs. 160,751 in 1912 and Rs. 156,830 in 1911, leaving an excess of Revenue over Expenditure of Rs. 58,242 in 1912 and Rs. 25,792 in 1911.

The total estimated number of letters, post cards, newspapers and postal packets, exclusive of parcels, which passed through the Post Office in 1912 was approximately 3,703,756 as compared with 3,077,321 in 1911. Inland letters, post cards and newspapers showed increases, as did foreign newspapers, while there was a decrease in foreign letters and post cards. The number of reply coupons sold during the year was 165 and the number paid was 76. The number of inland parcels dealt with amounted to 308 as against 274 in 1911. The number of postal parcels received from and despatched abroad decreased by 194, the figures being 14,907 for 1912 and 15,101 for 1911. The number of parcels received from abroad decreased by 321 and the duty collected amounted to Rs. 35,491.

The number of Inland money orders issued and paid was 42,460 and their value Rs. 420,926, being a decrease of 898 in number and of Rs. 28,179 in value as compared with the previous year. The number of money orders issued on foreign countries was 8,229 and their value Rs. 228,339, being a decrease of 1,093 in number and of Rs. 44,127 in value as compared with the previous year.

There was again an increase in the postal order business : the orders issued and received increased in number from 6,435 to 7,243 and in value from Rs. 62,828 to Rs. 69,976. The increase in the orders issued was 209 in number and Rs. 182 in value and in orders received 599 in number and Rs. 6,966 in value.

There are 379¾ miles of Telegraph and 154½ miles of Telephone wires under the charge of the Department. The Railway has not a telegraphic system of its own and the ordinary messages for the working of the traffic and for the administration of the Department are transmitted over the Post Office wires. The number of Railway messages and signals transmitted in 1912 was 155,919. The number of messages sent by the public decreased in 1912 : out of a total number of 258,350 messages forwarded 44,453 were sent by the public as compared with 59,274 out of a total of 255,084 in 1911. The receipts for the messages sent by the public amount to Rs. 24,229 in which charges for porterage (Rs. 10,135) are included.

IX.—RAILWAYS.

There is a single line of Railway of 120 miles in length. The gauge is 4 feet 8½ inches.

The earnings from all sources for the year amounted to Rs. 2,619,714 as compared with Rs. 2,601,001 in 1911 being an increase of .72 °/₀. Excluding Government traffic the earnings amounted to Rs. 2,391,017 being Rs. 1,465 less than in 1911. The services performed for Government Departments for which no cash payments were made would at ordinary rates have cost Rs. 228,697 of which Rs. 189,393 for passenger traffic, Rs. 34,547 for goods traffic and Rs. 4,757 for parcels, representing 8.73 °/₀ of the total traffic as compared with 8.02 °/₀ in 1911.

The receipts for passenger traffic amounted to Rs. 1,190,253, being less than those of the preceding year by Rs. 29,461, but in excess of the mean of the last ten years by Rs. 59,308. The decrease is principally in the ordinary 3rd. class tickets which yielded Rs. 22,465 less than in the previous year.

The following table shows the tonnage of goods traffic, exclusive of Government traffic, carried in 1911 and 1912 :

	1911.	1912.	Increase.	Decrease.
	—	—	—	—
Sugar Canes	131,418	144,627	13,209	...
Sugar	138,164	143,229	5,065	...
General Merchandize ...	182,342	179,141	...	3,201
Total ...	451,924	466,997	18,274	3,201

The total tonnage carried was 15,073 tons or 3.33 °/₀ more in 1912 than in 1911. The aggregate earnings for goods traffic were Rs. 23,435 or 2.07 °/₀ above those of 1911. The earnings for sugar cane traffic were Rs. 107,352 or 74.23 cents of a rupee per ton carried as compared with 79.45 cents in 1911. The earnings for sugar traffic were Rs. 570,810 or Rs. 3.99 per ton carried as against Rs. 3.90 in 1911. The earnings for general merchandize were Rs. 472,044 or Rs. 2.63 per ton carried as against Rs. 2.65 in 1911. The total expenditure charged to capital account including all sums paid from general revenue, surplus balances or loans up to the 31st. of December 1912 was Rs. 31,628,672* in which is included Rs. 3,062,754 advanced on account of the re-equipment of the Railways and which is eventually to be met from loan funds. The working expenses for 1912 amounted to Rs. 1,693,358. The ratio which working expenses bore to total earnings showed an increase of 3.21 °/₀ as compared with 1911, the figures being 64.64 °/₀ and 61.43 °/₀ respectively. The net earnings amounted to Rs. 926,356 or 2.93 °/₀ on the capital. The actual payments made to the Treasury by the Railways in 1912 amounted to Rs. 2,364,778 and after deducting charges for working expenditure, interest and sinking fund of loans and pensions there remained a balance of Rs. 90,303 which sum does not include any credit for work done for Government Departments.

---

* Figure subject to confirmation by the Treasury.

The following work in connection with the re-equipment of the Railways was undertaken in 1912. Ten new composite 1st. and 2nd. class, twenty-one 3rd. class carriages and eleven passenger luggage vans were erected, also fifteen open 20 ton wagons and sixty-eight covered 23 ton wagons. Thirteen covered and sixty-three high sided wagons were rebuilt with new underframes and sides and fitted with the vacuum brake. Eighty-five high sided open wagons were also fitted with the vacuum brake. 3½ miles of the permanent way were relaid with heavy rails. With the exception of about 8,000 cubic yards, the earth-work of the Plaine Lauzun—Richelieu deviation line was completed during the year. The St. Louis bridge, the Pailles road bridge, the Plaines Wilhems main road bridge and an accommodation bridge were all completed. The building of the piers of the Grand River North West bridge was unfortunately interfered with by delay in the arrival of the cableway ordered from England, but otherwise satisfactory progress was made with the work. All the bridges on the Midland line have now been renewed, as well as those on the Moka—Flacq and Savanne lines with the exception of four, the steel work for which was however received during the year and rivetted up ready for erection. The reconstruction of Rose Hill Station has almost been completed. The erection of ten cottages for the station staff at Port Louis, Rose-Hill, Curepipe and Rose-Belle was begun.

Bois Chéri.

There is a light railway of 2 feet 6 inches gauge running from Rivière du Poste Station on the Savanne Branch of the Midland Line to Mexico. The length of the line is 10 miles. The total goods traffic carried in 1912 amounted to 10,894 tons of which 6,792 tons were sugar cane as against a total traffic of 12,695 tons and 10,362 tons of sugar cane in 1911. The actual working expenses for 1912 were Rs. 12,544, the earnings Rs. 5,840 and the work done for Government Departments was valued at Rs. 2,821. The corresponding figures for the previous year were Rs. 14,756, Rs. 6,243 and Rs. 1,374.

X.—PUBLIC WORKS.

The most important works undertaken by the Public Works Department during the year were in connection with the enlargement of the Royal College, the reconstruction of road bridges, the Mare-aux-Vacoas water works and the Port Louis drainage works.

Royal College enlargement.

The work of enlarging the Royal College was started early in the year. The walls and foundations of the old College building were found to be in so unsatisfactory a state that it had to be almost entirely pulled down and temporary buildings were put up to afford sufficient accommodation. The masonry work was begun on October 21st. 1912, the construction has been pushed on with all possible speed and it is anticipated the new College will be ready for occupation at the beginning of 1914.

Bridges.

The reconstruction in ferro-concrete of Colville bridge and of several other small bridges in the district of Savanne was completed early in 1912. Nouvelle France, Ruisseau Sec and Union Park bridges in the district of Grand Port were reconstructed; their spans were widened and the approaches to the road improved. The reconstruction of Molino bridge, Grand Port, 88 feet span, was also begun in the middle of the year. Two small bridges were also reconstructed in the district of Flacq.

Mare-aux-Vacoas Water Works.

The reservoir at Mare-aux-Vacoas, where the average annual rainfall is 137 inches, has a catchment area of about 5 square miles. The top water level is 1,840 feet above the mean sea-level and the reservoir has a maximum capacity of 570 millions of gallons. The water flows from the Reservoir for 4,900 feet in an open channel and for a further distance of 7,700 feet is taken in a 16″ cast iron pipe to the filtering establishment at La Marie, which is 1,645 feet above sea-level.

At the filtering establishment there is a depositing reservoir with a capacity of 1,300,000 gallons and a covered service reservoir with a capacity of 500,000 gallons. Owing to the water being at times heavily charged with organic matter the "Anderson Process" for the purification of water was installed and concrete partitions were erected in the depositing reservoir to improve the settlement of solids. Originally there were only 4 filter beds with a superficial area of 6,720 square feet, but five additional filter beds have since been constructed with a superficial area of 18,000 square feet, and extra aerating trays have been added. These additional works and the increased filtration area enable two filters to be always left exposed to sun and air and with a slower process of filtration. There are few complaints of the quality of the water.

The daily consumption of water exceeds 1,600,000 gallons and with the exception of the supply to the town of Curepipe the water flows by gravitation to the lower districts. The supply for Curepipe is pumped by means of hydraulic rams to two reservoirs standing 368 feet above the filtering establishment, the motor being driven by water power from the 16″ supply main. The increase in the population of Curepipe has necessitated additions to the pumping plant and the reconstruction of the reservoirs. A masonry building was erected at the filter beds for the pumping machinery and a second 16″ cast iron pipe has been laid to supply the motive power. An additional set of hydraulic motors and pumps have been erected and work satisfactorily. It is expected that the concrete covered channel which is to replace the open conduit from the reservoir to the filter beds will be completed early in 1914. An additional service reservoir is in course of construction at Curepipe.

Port Louis Drainage Works.

The Port Louis drainage works were begun in 1895, the sewers being designed on the separate system and the surface drainage being carried in the street gutters to the various streams which flow into the harbour. The town is divided for drainage purposes into four districts three of which drain by gravitation sewers into separate collecting wells which are connected by means of syphon pipes to the pumping station near Caudan Basin. From there, the sewage is pumped through cast iron pipes for 7,000 feet to the sea outfall at the mouth of Grand River North West and is discharged in 10 feet of water at low tide, a thousand feet from the shore. Sewers have been laid in districts Nos. 2 and 3, the laying of the sewers in district No. 4 is being proceeded with; the enlargement of the pumping station has been completed and the additional pumps have been installed. The total length of sewers laid is 21.46 miles and 980 properties have been connected. The amount expended on construction works in districts 2, 3 and 4 is Rs. 840,950 and on house services Rs. 525,790.

XI.—FORESTS AND GARDENS.

The area of forests, mountain and river reserves and Curatelle lands under the care of the Forest Department was 84,866 acres, of which about 68,504 acres were Crown Lands, 10,122 acres Mountain Reserves and 240 acres Vacant Estates.

Forest Utilization.

The improvement fellings in the Grand Bassin Forest were continued, yielding about 490 cubic feet of timber at Talbot and 5,300 cubic feet at Coutanceau; 145,000 shingles and 10,000 Railway keys were also manufactured from the off-fall of trees during the last 2 months of the year at the saw mill erected at Talbot. The yield was very poor indeed on account of the combined effects of wind, insects and fungi on timber. For the supply of fuel to public establishments about 3,000 cords of firewood were felled in Crown Lands, and eleven tons of charcoal were burnt. Thinnings in forest plantations (chiefly Pines and Eucalypts) yielded a revenue of Rs. 4,500 and clear-cuttings on Pas Géométriques (chiefly Casuarina) Rs. 10,250, the lessees replanting the areas cleared.

Forest Plantations.

About 232 acres were artificially restocked in Crown Lands, chiefly in the gathering grounds of important rivers. This should be added to about 2,327 acres replanted during the 10 previous years, the average expenditure per acre being about Rs. 63.85. The species propagated included Natte, Colophane, Olive, Benjoin, Fer, Juniper, Cryptomeria japonica, Eucalypts, Mahogany, Auraucarias and Terminalia.

Gardens.

At the Royal Botanic Gardens, Pamplemousses, the grafting of selected mangoes was continued. A large number of seedlings were raised in the nurseries and were either sold to the public or planted on Crown Lands and River Reserves. The regulations imposed on account of the Phytalus beetle on sugar cane again necessitated the disposal of all plants through the intermediate Depôt in Port Louis and this was the cause of restrictions in the raising of economics.

At the Nursery Gardens, Curepipe, the exotic conifers were produced on a large scale for the reforestation of the gathering grounds of rivers.

XII.—DEPENDENCIES.

The Dependencies comprise a large number of small Islands situated between 5° and 19° 50′ South Latitude and 51° and 72° 30′ East Longitude of which the nearest is 230 miles and the most remote about 1,200 miles distant from Mauritius.

Rodrigues, the largest and most important, is administered by a resident Magistrate, has an area of 40 square miles and had at the Census of 1911 a population of 4,829 of whom 2,523 were males and 2,306 were females. The total population showed as compared with 1901 an increase of 1,667.

The increase was almost entirely in the general population which numbered 4,667 or 1,567 more than in 1901. The Indo-Mauritian population numbered 102, other Indians 36 and Chinese 24. The male agricultural population has increased considerably in the last 10 years and development is noticeable in the trade of the island. The Customs returns show that 40 cattle were sent to Mauritius in 1912 as against 69 in 1911. In 1912 1,246 pigs value Rs. 19,725 were sent to Mauritius as against 1,466 value Rs. 26,500 in 1911 and 3,682 goats and sheep value Rs. 13,789 as against 3,221 value Rs. 11,242 in 1911. There was a further large increase in the exports of salted fish, the figures being 341,690 kilos in 1912 and 269,900 in 1911. Tobacco showed an increase from 36,000 to 38,705 kilos.

At the Rodrigues branch of the Government Savings Bank there was on the 30th. of June 1912 a sum of Rs. 22,198 to the credit of 55 depositors as compared with Rs. 22,322 and 46 depositors on the corresponding date of 1911.

Most of the Islands in the Lesser Dependencies have been conceded or sold with the exception of a few Islands in the St. Brandon Group and two islands in the Diego Garcia group, Tromelin Island, and one near the great Chagos Bank, which are leased. The islands are administered by two Magistrates who are resident in Mauritius and pay regular visits to the Dependencies. The chief exports from the Dependencies are coconut oil, coconuts, guano and fish (dried and salted).

J. MIDDLETON,

August, 1913. Colonial Secretary.

COLONIAL REPORTS, &c

The following recent reports, &c., relating to His Majesty's Colonial Possessions have been issued, and may be obtained from the sources indicated on the title page:—

REPORT ON THE MAURITIUS BLUE BOOK FOR 1913.

I.—FINANCIAL.

General Revenue and Expenditure.

Revenue.

The revenue for the year 1912–13 amounted to Rs. 11,035,641, being Rs. 634,941 above the estimate and Rs. 1,053,132 above the average for the five years immediately preceding.

The following is a comparative statement showing the actual revenue from normal sources collected during the financial years 1911–12 and 1912–13 :—

Head of Revenue.	1911–12.	1912–13.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Customs	3,841,092	4,024,768	183,676	...
2. Harbour	206,930	224,615	17,685	...
3. Licenses, Excise, &c, ...	2,545,369	2,753,694	208,325	...
4. Fees of Court, &c. ...	340,871	340,121	...	750
5. Post and Telegraphs ...	217,604	224,360	6,756	...
6. Railways	2,334,982	2,480,554	145,572	...
7. Rent	70,466	69,368	...	1,098
8. Interest	828,363	865,241	36,878	...
9. Miscellaneous	47,352	52,139	4,787	...
	10,433,029	11,034,860	603,679	1,848
10. Land Sales...	2,619	781	...	1,838
Total	10,435,648	11,035,641	603,679	3,686
Net increase of normal revenue	...	...	599,993	...

The revenue of 1912–13 was the highest yet recorded, that of the next best year, 1910–11 being Rs. 10,889,989. The heads of revenue under which the receipts in 1912–13 show the greatest disparity as compared with 1911–12 are Licenses, Excise, &c., Customs and Railways, the receipts being Rs. 208,325, Rs. 183,676 and Rs. 145,572 less respectively in 1911–12 than in 1912–13. Import duties in 1912–13 yielded Rs. 194,216 above the estimate, the increase being due to the large demands for goods resulting from the increased purchasing power of the population, while Export duties yielded Rs. 64,449 less than was anticipated owing partly to an overestimate of the sugar crop and partly to the additional duty of 2 cents per 100 kilos of sugar being credited to the Station Agronomique Funds. There were small increases as compared with 1911–12 under Harbour of Rs. 17,685, Post and Telegraphs Rs. 6,756, Interest of Rs. 36,878 due to the temporary investment of the surplus balances of the Colony by the Crown Agents, and Miscellaneous of Rs. 4,787.

There was on the 30th. of June 1912 a surplus balance of Rs. 2,893,907. The revenue for the year 1912–13 exceeded the expenditure by Rs. 800,037 bringing up the surplus at the 30th. of June 1913 to Rs. 3,693,944. From this sum there had been advanced on account of Railway re-equipment Rs. 3,343,646. The accounts for the first half of the current financial year show that the revenue amounted to Rs. 5,487,149 and the expenditure to Rs. 5,337,411. The expenditure was less than the revenue by Rs. 149,737 and at the 31st. of December 1913 the surplus balance had been increased to Rs. 3,843,681. From the 1st. of July to the 31st. of December 1913 advances amounting to Rs. 188,934 were made for Railway re-equipment and Irrigation Works. The total amount so advanced up to the 31st. of December 1913 was Rs. 3,532,580 and the actual surplus balance at that date was accordingly reduced to Rs. 311,101.

Expenditure.

The expenditure for the year 1912–13 amounted to Rs. 10,235,605, which is Rs. 311,150 above the original estimate, Rs. 391,625 above the expenditure for the previous year and Rs. 566,415 above the average of the preceding five years. The amounts originally estimated to be expended during the year were exceeded to an appreciable extent under the following Heads: Pensions Rs. 31,800, Port and Marine Rs. 19,200 chiefly due to the construction of a pontoon and the erection of a crane thereon; Medical and Health Rs. 81,200 owing to the measures taken to combat small-pox, Miscellaneous Rs. 45,900, Forests Rs. 14,000 to meet expenditure in connection with the destruction of the phytalus smithi, Railways Rs. 193,700 consequent on the enhanced cost of materials, on the rise in the price of coal and on its increased consumption on account of the heavier rolling stock introduced, Public Works Extraordinary, Rs. 118,000 chiefly in connection with the enlargement of the Royal College. The following are the principal Heads under which the actual expenditure was less than the original estimate for the year:—Education (Rs. 45,000), Law and Justice (Rs. 47,000), Immigration and Poor Relief (Rs. 42,000), Police (Rs. 26,000) and Agriculture (Rs. 25,000).

The following is a comparative statement of the Expenditure for the years 1911–12 and 1912–13:—

Head of Service.	1911–12.	1912–13.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.
1. Charge on account of Public Debt	1,244,986	1,266,963	21,977	...
2. Pensions	671,534	693,293	21,759	...

Assets and Liabilities.

The assets of the Colony on the 30th. of June 1913 were Rs. 2,571,846 and the liabilities Rs. 2,221,549, the assets thus exceeding the liabilities by Rs. 350,297.

The assets included :—	Rs.
Cash in the hands of the Receiver General and sub-accountants	399,715
Investments at cost	679,869
Temporary investments at Bank rate £ 62,000 at 1 s. 4 d.	930,000
Miscellaneous advances	542,634
Advances on account of loan authorized for mechanical transport (Ordinance No. 34 of 1902)	13,128
Drafts and Remittances	6,500

The liabilities were :—	
General Deposits	2,080,220
Government of India	112,514
Drafts and Remittances	26,791
Loan Funds, unexpended	2,024

There was brought to account during the year expenditure amounting to Rs. 3,343,646 on Railway re-equipment.

Public Debt.

The total indebtedness of the Colony on the 30th. of June 1913 was £ 1,285,390 and the Sinking Funds amounted to £ 327,949, leaving a net debt of £ 957,441 as against £ 966,132 on 30th. June 1912, as compared with a debt of £ 1,147,409 and a revenue of £ 471,172 in 1894.

Under Ordinances No. 10 of 1876, No. 10 of 1879 and No. 2 of 1887 outstanding debentures are redeemed by annual drawings. Provision is made for the repayment of other loans by means of a sinking fund.

The raising of a loan of £ 70,000 for the purpose of making advances to Planters to assist them in substituting mechanical for animal transport on their estates was authorized by Ordinance No. 34 of 1902. The loan was not raised but advances were made partly from temporary advances obtained from the Crown Agents and partly from Treasury balances. The amount lent had been settled in full in September 1913.

The Railway (Improvement) Loan Ordinance 1910 authorizes the raising of a loan of £ 270,000 for the improvement and re-equipment of the Railways. The loan has not yet been raised, the expenditure incurred to the 31st. December 1913, amounting to Rs. 3,521,565, having been met by payment from surplus cash balances.

Currency and Banking.

The Currency of the Colony consists of :—

(1) The following Mauritius bronze and silver coins which are legal tender up to Rs. 5 :
  (a) Bronze : 1 cent, 2 cents, 5 cents.
  (b) Silver : 10 cents, 20 cents.
(2) The silver rupee of India with its silver subdivisions.
(3) Mauritius Government notes of Rs. 50, Rs. 10 and Rs. 5.

On the 30th. June 1913, the value of Currency notes in circulation was Rs. 5,080,250. The specie held amounted to Rs. 2,542,000 and the Investment and Depreciation Funds to Rs. 2,538,250 and Rs. 356,244 respectively.

The Banks which do business in the Colony are the Bank of Mauritius Limited and the Mauritius Commercial Bank.

MUNICIPALITY OF PORT LOUIS.

The following is a comparative statement of the revenue and expenditure of the Municipality of Port Louis for the five years 1909 to 1913 :—

Year.	Revenue.	Expenditure.
1909	484,841	476,448
1910	523,494	504,058
1911	510,285	498,614
1912	515,504	509,944
1913	529,332	535,447

The indebtedness of the Municipality up to the end of the year and the provision for payment are shown below :—

Loan.	Amount.	Repayments to be made in 1913.
Conversion Loan	£ 106,700	£ 2,365
Electric Lighting Loan	7,334	333
Municipality Loan, 1908	3,286	142
Municipality Loan, 1909	4,286	178
	£ 121,606	£ 3,018
Government Hurricane Loan, 1892...	Rs. 34,853	Rs. 8,208
Manure Factory and Night Soil Service Loan	6,000	2,000
Municipality Loan, 1903	10,000	2,000
	Rs. 50,853	Rs. 12,208

LOCAL BOARDS.

There are Boards of Commissioners for the towns of Curepipe, Beau Bassin and Rose Hill, and Quatre Bornes which are entrusted with the general improvement and conservancy of these towns. By Ordinance No. 4 of 1913, the Board of Curepipe has been entrusted with the powers and duties, sanitary control excepted, of the Health Department in respect of Slaughter Houses, Public Markets and Butchers' Shops.

The Board of Curepipe receives the amount of taxes on vehicles and animals collected in the town and of licenses paid by traders and others. The Board may also levy a tax not exceeding one per cent. on house property. The two other Boards receive the amount of the taxes paid on vehicles and animals in the towns and may also levy a similar tax on house property.

The following tables show the revenue and expenditure of the Boards for the past five financial years :—

CUREPIPE.

	1908–09.	1909–10.	1910–11.	1911–12.	1912–13.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	73,759	90,966	68,510	73,136	74,883
Expenditure ...	72,516	85,360	72,008	76,420	71,148

BEAU BASSIN AND ROSE HILL.

	1908–09.	1909–10.	1910–11.	1911–12.	1912–13.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	33,541	35,804	36,996	34,811	37,959
Expenditure ...	33,476	34,639	36,651	36,507	37,921

QUATRE BORNES.

	1908–09.	1909–10.	1910–11.	1911–12.	1912–13.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	13,842	12,513	12,748	13,374	13,216
Expenditure ...	13,508	12,615	11,096	11,720	14,152

Below will be found a statement of the debts of the Boards :—

Curepipe	Net amount of Debt.	Rs. 42,500
Beau Bassin and Rose Hill	„	Rs. 2,600
Quatre Bornes	„	Nil

There is a District Board for each of the eight rural districts of the Island. To them is entrusted under Ordinance No. 9 of 1900 the maintenance of the branch roads.

They receive as revenue a contribution from Government equivalent to 10 °/₀ of the direct taxes collected in each district during the year and an addition of 10 °/₀ to the direct taxes to be levied in each year in each district, exclusive of Port Louis and the Townships. The additional 10 °/₀ to be levied on the direct taxes may be increased to 25 °/₀ subject to the approval of the Governor in Executive Council. The Government contribution amounted in 1912–13 to Rs. 11,816.

The powers of the District Boards were extended by Ordinance No. 35 of 1902 to include the construction, maintenance and management of water works. For this purpose they receive an annual contribution from Government, which in 1912–13 amounted to Rs. 76,000, and also the proceeds of water rates and of charges paid for water supplies.

II.—TRADE, AGRICULTURE AND INDUSTRIES.

Imports and Exports.§

The Customs returns for the year 1913 show the aggregate value of Imports and Exports, exclusive of specie, to be **Rs.** 68,156,409, the value of Imports being Rs. 35,864,703 as compared with Rs. 32,002,440 in 1912. Import duties show an increase of Rs. 266,590 as compared with 1912.

Most of the material imported from the United Kingdom for the re-equipment of the Railways, valued at about Rs. 135,000 (as returned by the Railway Department) or Rs. 92,000 less than in 1912, has been classified under the head " Hardware and Cutlery ", which shows a decrease of Rs. 88,000 when compared with the value of last year's imports.

The aggregate value of Imports and Exports, excluding specie, for the years 1909 to 1913 was as follows :—

Year.	Imports.	Exports.	Total.
1909 ...	Rs. 27,013,970 ...	Rs. 34,424,923 ...	Rs. 61,438,893
1910 ...	35,014,664 ...	36,528,536 ...	71,543,200
1911 ...	37,440,332*...	40,414,328 ...	77,854,660*
1912 ...	32,002,440*...	36,893,269 ...	68,895,709*
1913 ...	35,864,703*...	32,291,706 ...	68,156,409*

---

§ The value of cows and oxen imported from Madagascar is shown by a statistical error at Rs. 1,223,712 in the Blue Book. The actual value was Rs. 480,744. The corrected figures are given in this report.

* Including Railway re-equipment materials.

The value of Imports from, and Exports to, the United Kingdom, British Possessions and Foreign Countries during the same years is shown below, (specie is not included) :—

Year.	Imports from (Unit Rs. 1,000.)			Exports to (Unit Rs. 1,000.)		
	United Kingdom.	British Possessions.	Foreign Countries.	United Kingdom.	British Possessions.	Foreign Countries.
1909	7,437	12,288	7,287	4,315	29,667	441
1910	11,282	16,225	7,506	8,267	27,863	397
1911	11,995*	18,130	7,313	13,397	22,170	4,846
1912	11,504*	14,117	6,382	4,467	32,038	389
1913	12,149*	15,599	8,117	5,955	24,886	1,450

The following tables show the percentage of Imports from, and Exports to, the United Kingdom, British Possessions and Foreign Countries during each of the last five years :—

Imports.

From	1909	1910	1911	1912	1913
United Kingdom ...	27.5	32.2	32.1*	36.0*	33.9*
British Possessions...	45.5	46.4	48.4	44.1	43.5
Foreign Countries ...	27.0	21.4	19.5	19.9	22.6

Exports.

To	1909	1910	1911	1912	1913
United Kingdom	12.5	22.6	33.1	12.2	18.4
British Possessions	86.2	76.3	54.9	86.8	77.1
Foreign Countries	1.3	1.1	12.0	1.0	4.5

An examination of the returns of imports and exports shows that—the United Kingdom and British Possessions supply most of the Colony's needs and purchase nearly all its produce ; the supplies from Foreign Countries are mainly in the groups (1) Food, Drink and Tobacco and (2) Manufactured Articles.

---

* Including Railway re-equipment materials.

The trade of the Colony is principally with the United Kingdom and India and in normal years the trade with India represents nearly one-half of the aggregate import and export trade.

In 1913 the value of the imports in the group Food, Drink and Tobacco was greater by about 3 million of rupees than in the previous year. There was also an increase of 1½ million of rupees in the group Manufactured Articles, while the imports of Raw Materials show a decrease of more than ½ a million of rupees.

The chief articles contributing to the customs revenue in 1913 were :

Tobacco and Cigars	Rs. 861,000
Grain (including rice, dholl, etc.)	607,000
Cotton Manufactures	155,000
Wines	154,000
Oil (manufactured)	148,000
Spirits	129,000
Matches	115,000
Haberdashery	101,000

The export duty on sugar yielded Rs. 563,316.

Imports.

The value of the imports in 1913 was greater by approximately 4 millions of rupees than in the previous year and less by 1½ million of rupees than in 1911.

The largest increases as compared with 1912 occur under the following heads :

Corn, Grain, &c.	Rs. 2,098,000
Machinery (Local Industries)	367,000
Manures and Fertilizers	626,000
Coals	318,000
Postal Parcels	206,000
Haberdashery	183,000
Oil	149,000

The largest decreases occur under the following heads :

Cement	Rs. 866,000
Gunny Bags	151,000

The meat supply of the Island is obtained from Madagascar from which country it is shown that there were imported in 1913 7,587 oxen against 7,397 in 1912. The imports of rice, which is the chief article of food of the majority of the population, was approximately 64,000 tons (metric) as compared with 50,000 tons in the previous year, the value of the importations being Rs. 8,514,000 in 1913, and Rs. 6,605,000 in 1912. India supplied practically all the rice imported ; the importations from Madagascar amounted to 2,386 tons, from Cochin China 1,871 tons, from China 176 tons, and 16 tons were imported from Singapore. The imports of dholl from India rose from 4,577 tons value Rs. 508,000 to 5,220 tons value Rs. 586,000.

The importations of coal increased from 56,984 tons to 61,090, the United Kingdom continuing to be the principal source of supply.

There was an increase of Rs. 367,000 in the value of imports of machinery for local industries and of Rs. 313,000 in machinery for mechanical transport. The following tables give the value and country of origin of importations under the heads Machinery and Mechanical Transport for the years 1909 to 1913.

Machinery.

Country.	1909	1910	1911	1912	1913	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Total ...	348,043	646,958	252,157	160,480	473,302	1,880,940

The value of machinery for local industries imported in 1913 was Rs. 1,159,000 and the imports during the last five years amount to Rs. 4,922,000. Practically all the machinery comes from the United Kingdom, the rolling stock for the light tramways being of foreign manufacture.

The use of motor cars and motor cycles has developed rapidly in the last 6 years. In 1907 13 cars and 2 cycles were imported and in

1908 6 cars and 3 cycles, while during the last 5 years 294 cars valued at Rs. 1,418,000 and 75 cycles valued at Rs. 50,000 have been imported. The number of motor cars imported in 1913 was 75 valued at Rs. 360,000, and of cycles 22 valued at Rs. 17,000.

The following table shows the principal countries which export goods to Mauritius and the value of the goods exported, exclusive of specie, in the years 1912 and 1913 :—

Country.	Exports to Mauritius.	
—	1912	1913
British India	Rs. 12,186,000 ...	Rs. 13,463,000
United Kingdom ...	*11,504,000 ...	*12,149,000
France	2,906,000 ...	3,444,000
Madagascar	617,000 ...	996,358
Australia	396,000 ...	608,000
United States	847,000 ...	863,000
Germany	354,000 ...	431,000
Transvaal	311,000 ...	215,000
Cape Colony	564,000 ...	789,000
Natal	181,000 ...	159,000
Belgium	544,000 ...	593,000
Réunion	356,000 ...	373,000
Straits Settlements ...	371,000 ...	178,000
China	154,000 ...	145,000
Cochin China	300 ...	293,000

The United Kingdom, British India or British Possessions are the largest suppliers of wearing apparel, bacon, gunny bags, beer in casks and bottles, books, bran, chemicals for manures, cement, coal, confectionery, dholl, gram, oats, rice, flour, cotton, salt fish, ghee, hardware and cutlery, iron nails, wrought iron, boots and shoes, machinery for local industries, manure (bone), salt, soap, whisky, stationery, tea, tin, umbrellas (cotton), shooks, sleepers, timber, woollen goods.

Foreign countries are the main source of supply for apothecaries' wares, oxen, butter, clocks and watches, enamelled ware, glassware, haberdashery, jewellery, light tramway wagons, locomotives and materials, matches, motor cars, petroleum, cigarette paper, perfumery, potatoes, brandy, gin, wine, sulphur, tobacco (manufactured) and cigars, toys, candles, umbrellas (silk).

Exports.

The total value of the Exports, excluding specie but including charges, was in 1912 Rs. 36,893,269 and in 1913 Rs. 32,291,706.

---

*Including Railway re-equipment materials.

The following table shows the value and the destination of the products of the Colony, other than sugar, which were exported in 1912 and 1913 :

Product.	Year.	Exported to			
		United Kingdom.	British Possessions.	Foreign Countries.	Total.
		Rs.	Rs.	Rs.	Rs.
Molasses ...	1912	30	176,348	...	176,378
	1913	4	61,298	8	61,310
Rum	1912	4,591	13,911	...	18,502
	1913	4,416	17,914	...	22,330
Aloe Fibre ...	1912	640,663	584	40,731	681,978
	1913	703,654	49,365	100,549	853,568

The following table shows the principal countries to which sugar was exported during the calendar years 1912 and 1913 :

	1912.	1913.
Country.	Tons.*	Tons.*
British India	143,361	127,620
United Kingdom	20,869	31,170
Cape Colony	10,560	14,387
Australia	26,273	2,132
Hong-Kong	2,017	3,293
Portuguese East Africa	429	1,085
Natal	575	852
Seychelles	479	310
Aden	657	312
British East Africa	316	279
Zanzibar	275	97
France	177	5,378
Belgium	......	201
Ceylon	......	629

It will be observed that British India continues to be the largest purchaser of Mauritius sugar. The exports to Europe rose from 21,000 tons in 1912 to 37,000 in 1913. The exports to Australia, which were formerly about one-third of the total crop, fell from 26,000 tons in 1912 to 2,000 tons in 1913.

---

* Metric Ton = 1,000 kilogrammes.

Agriculture.

The Department of Agriculture which was established under Ordinance No. 30 of 1912 commenced its operations on the 10th. of May 1913. The Station Agronomique which had been in existence from 1893 and the Bureau of Agricultural Statistics of the Chamber of Agriculture dating from 1909 were absorbed into the new Department. To it was also transferred the control of the gardens of Pamplemousses and Curepipe and of the Réduit grounds which had hitherto been in the hands of the Director of Forests.

SUGAR.

The agricultural returns compiled by the statistical division of the Department of Agriculture show that on December 31st. 1913 a total of 153,416 arpents was under cultivation in sugar-cane. This area shows an extension of 5,519 arpents over the area recorded for 1912. A portion of this large increase may be accounted for by the fact that statistical data is becoming more and more accurate every year, but there has been without doubt during the year an extension of several thousand arpents under sugar-cane cultivation mainly in the districts of Pamplemousses, Rivière du Rempart and Grand Port. Certain properties which formerly had large areas under wild aloe fibre or waste have extended their cultivation or have leased these lands for cane cultivation to small planters. Of the total area of 153,416 arpents under sugar-cane, planters cultivated 60,902 arpents, of which 50,590 arpents were cultivated by small planters of Indian origin. The total area of land cultivated in sugar-cane by Indians in the colony was 54,887.54 arpents or 35.77 % of the total area under this product. Of this area, 42,599.39 arpents are held freehold or are in course of liberation and 12,288.15 are leased from estates.
